Zad. Frag.	*Zadokite Fragments*

Other Chris tian, Jewish, and Greco-Roman texts are referred to by their standard abbreviations. See, e.g., *The SBL Handbook of Style* (1999), ch. 8, appendix F, and appendix H.

Q
A late tradition regards this mountain, called Quarantania, as the site of Jesus' temptation.

Q. The symbol used to designate a hypothetical source of sayings of Jesus and other discursive materials found in Matthew and Luke but not in Mark (or John). This abbreviation is thought to be derived from the German word for "source," *Quelle.* According to the Two-Source Theory of gospel origins, both Matthew and Luke used the Gospel of Mark for their basic narrative framework, and both also had access to a collection of dominical sayings (Q) that apparently was unknown to Mark. For many scholars, Q was a written document (possibly composed in Aramaic originally), and some have spent considerable effort trying to reconstruct it (see J. M. Robinson et al., eds., *The Critical Edition of Q* [2000]; R. Valantasis, *The New Q: A Fresh Translation with Commentary* [2005]). For others, Q refers to a body of oral tradition. Still others use the abbreviation simply as a convenient way of referring to the material that is shared by Matthew and Luke but missing in Mark. Finally, some writers strongly deny the validity of this concept (e.g., M. Goodacre, *The Case against Q: Studies in Markan Priority and the Synoptic Problem* [2002]). See GOSPELS III.B.

Qadesh. See KADESH ON THE ORONTES.

Qere kuh-ray' (קְרֵי, either impv. ["read!"] or, more prob., pass. ptc. ["what is read"] of Aram. קְרָא *H10637* "to call, read"). This term is applied to Hebrew or Aramaic readings preferred by the Masoretes over the written, consonantal text of the OT. They are either corrections or variant changes placed in the margin by the SCRIBES. Rules prohibited changing the authoritative, consonantal text; but the Masoretes sometimes attached the vowels of a preferred reading to the unchanged consonants (called the KETIB, "what is written") and then indicated the appropriate consonants of the amended word in the margin. More than 1,300 such marginal notes are said to be found in the MT. See TEXT AND MANUSCRIPTS (OT) VI.

<div align="right">L. J. WOOD</div>

qesitah kes'i-tah See WEIGHTS AND MEASURES IV.I.

Qoheleth koh-hel'ith. See ECCLESIASTES, BOOK OF.

qoph kohf (קוֹף *H7761,* "monkey"). The nineteenth letter of the Hebrew ALPHABET (ק), with a numerical value of 100. It was one of several "emphatic" consonants, the exact pronunciation of which is uncertain. The sound may have been similar to that of the consonant *k,* but articulated toward the back of the mouth, near the soft palate (as in Arabic).

Quadratus, Apology of kwahd'ruh-tuhs *(Kodratos).* One of the earliest Christian apologies. It was presented to Emperor HADRIAN at a time when Christians were being persecuted, possibly in ASIA MINOR in A.D. 123 – 124 or 129 (or in ATHENS in 125 or 128 – 129). The only part of the text preserved is a brief quotation of about fifty words in EUSEBIUS *(Eccl. Hist.* 4.3.2), which states that some persons whom Christ had healed or raised from the dead survived to Quadratus's own time.

<div align="right">P. WOOLLEY</div>

quail. Although the origin of the Hebrew term *śĕlāw H8513* is uncertain, there is full agreement that it refers to the quail, and no other bird fits the biblical texts (Exod. 16:13; Num. 11:31 – 32; Ps. 105:40). These require (a) a clean bird and (b) one that passed in great numbers. This miraculous supply to the traveling Israelites is mentioned on two specific occasions; first in the Desert of Sin, in the SW of the SINAI Peninsula, some six weeks after leaving Egypt (see SIN, WILDERNESS OF); second at KIBROTH HATTAAVAH, not far away, a year later. This is another example of natural resources being used by God, the miraculous element being in the precise timing of the supply. Although such concentrated flocks may have been exceptional, the quail must have passed across the Sinai area twice a year, and it is reasonable to assume that they were taken and eaten more or less regularly.

Quail are almost the smallest game birds and the only ones that truly migrate. The best known is the common quail (*Coturnix coturnix* or *C. communis*) of Europe and Asia. It is only seven inches long, mottled brown and much like a miniature partridge. Like many of its relatives, it is more often heard than seen, the call being made as much by night as by day. These birds breed over most of Europe and in W Asia. In autumn they migrate toward N Africa, many of them crossing the route of the exodus, and do so again on their return journey in spring. There is some difficulty about the translation of Num. 11:31. The KJV renders, "two cubits high upon the face of the earth," implying

that they were piled to that height (similarly NRSV and other versions); the NIV says that the wind brought the quail down "to about three feet above the ground," which is preferable (suggesting that they were flying close to the ground).

Although strong fliers over short distances, quail need help from the wind for long migration flights, and the narrative says that they came in with the wind. An unfavorable change of wind can bring them to the ground and make them easy prey for humans. Various estimates have been made about the numbers taken in these incidents, and one researcher has suggested that the Israelites killed some nine million. This could be a gross overestimate, but there is recent evidence that such a figure is not entirely fanciful. Heavy exploitation of migratory quail took place throughout the 19th cent. and well into the 20th. For many years, Egypt exported over two million a year; in 1920, a peak of three million was reached. This was far more than the quail population could stand, and mass migration soon ceased. (See A. Parmelee, *All the Birds of the Bible* [1959], 76; O. L. Austin, *Birds of the World* [1961], 95; *FFB*, 66 – 67.)

G. S. CANSDALE

Quarantania kwah'ruhn-tay'nee-uh. Also Quar-antana. The name given by Christians to a high mountain near JERICHO where, according to a late tradition, Jesus was tempted by Satan (Matt.4:8 – 10).

A late tradition regards this mountain as the site of Jesus' temptation.

The name alludes to the forty days of the TEMPTATION OF CHRIST; in Arabic it is known as Jebel Kuruntul. (See McClintock-Strong, *Cyclopedia*, 8:835.)

quarry. An excavation made by removing stone for building purposes. This term is used by the KJV twice to render *pěsîlîm* (pl. of *pāsîl H7178*) in a difficult passage (Jdg. 3:19, 26). The Hebrew word elsewhere refers to an image carved for religious purposes (Deut. 7:5 et al.), thus the NIV here translates "idols," but some think such a reference makes little sense in the context. The NRSV renders it "sculptured stones," whereas the NJPS treats it as a place name, "Pesilim" (for other interpretations, see *HALOT*, 3:948 – 49). Modern versions use *quarry* occasionally to render other Hebrew terms, such as the phrase *maqqebet bôr* (lit., "the excavation of the pit," Isa. 51:1). See also

SHEBARIM.

Stone quarries abound in Palestine (see STONE). Suitable ROCK is plentiful. The limestone used is easily worked and hardens when exposed to air. Stones yet in their quarries, only partially extracted, illustrate methods used in biblical days. A narrow-bladed pick was used to cut around the sides of the projected stone. The cut was wide enough only for the workman's arm and pick. Sometimes wedges, inserted in pre-cut holes in a line, were driven deep with a heavy hammer to split the rock. Other times wooden strips were inserted in pre-cut cracks and then made to swell with water. Once loose, the stone was moved with crowbars and then transported by sledges or rollers. The largest stones, weighing several hundred tons each, have been found at BAALBEK. They were moved from a quarry nearly one mile distant. (See G. A. Reisner et al., *Harvard Excavations at Samaria*, 2 vols. [1924], 1:37 – 38, 96ff.; J. Simons, *The Geographical and Topographical Texts of the Old Testament* [1959], 271, 287.)

L. J. WOOD

quart. See WEIGHTS AND MEASURES III.C.

Quarter, Second (New). See SECOND DISTRICT.

quartermaster. This term, referring to an army officer responsible for the subsistence of a group of soldiers, is used by the NRSV and other versions to render the expression *śar měnûhâ* (lit., "chief of resting"; cf. KJV, "a quiet prince"), which occurs only once (Jer. 51:59; NIV, "staff officer").

Quartus kwor'tuhs (Κούαρτος *G3181,* from Latin *Quartus,* "fourth"). An early Christian who sent greetings to the Christians in Rome (Rom. 16:23). PAUL refers to him as "our [*lit.,* the] brother," and some have speculated that Quartus was the physical brother of a previously mentioned individual in the list. Most scholars believe that the expression is simply equivalent to "Brother Quartus," indicating spiritual kinship, though it is possible that he was an associate of the apostle.

Ancient Jerusalem quarry.

quaternion kwah-tuhr'nee-uhn. See SQUAD.

queen. Of the several Hebrew words that can be translated "queen," *malkâ H4893* (fem. of *melek H4889*, "king") is the most common. It is the term used for the QUEEN OF SHEBA (1 Ki. 10:1 et al.), for VASHTI and ESTHER (Esth. 1:9; 2:22; et al.), and for the wife of the Babylonian monarch BELSHAZZAR (Dan. 5:10). The plural form occurs in one passage (Cant. 6:8 – 9; with regard to the form *mĕleket H4906*, see QUEEN OF HEAVEN). The second most common word for "queen," *gĕbîrâ H1485* (lit., "mighty woman, mistress," fem. of *gĕbîr H1484*, "lord, master"), is used of TAHPENES, Pharaoh's wife (1 Ki. 11:19); of MAACAH, the queen mother of King ASA (1 Ki. 15:13; 2 Chr. 15:16); of JEZEBEL (2 Ki. 10:13); and of NEHUSHTA, the mother of JEHOIACHIN (Jer. 29:2; cf. 2 Ki. 24:8). The rare form *šēgal H8712* ("royal consort") occurs twice (Neh. 2:6; Ps. 45:9 [NIV, "royal bride"]). Finally, the term *śārâ H8576* ("woman of nobility, princess") is appropriately rendered "queen" in at least one passage (Isa. 49:23; cf. also Lam. 1:1 NIV). In the NT, the Greek word *basilissa G999* is applied to the Queen of the South (i.e., of Sheba, Matt. 12:42; Lk. 11:31) and to the Ethiopian queen, CANDACE (Acts 8:27); the title is also assumed by the prostitute Babylon (Rev. 18:7).

The only ruling queen the Hebrews ever had was ATHALIAH, who had been queen mother until her son AHAZIAH died; she reigned for seven years, until JEHOIADA the priest overthrew her (2 Ki. 11:1 – 20). The wives of the Hebrew kings were understood to be queens. Two of them are noted for the rights they assumed: MICHAL, daughter of SAUL, mocked and defied her husband, King DAVID (2 Sam. 6:20 – 23); JEZEBEL, wife of AHAB, has been memorialized as ELIJAH's persecutor (1 Ki. 19:1 – 3).

The queen mother was generally the widow of the former king and mother of the reigning one. Certain obligations devolved upon her and she received appropriate respect. SOLOMON bowed to his mother, BATHSHEBA (1 Ki. 2:19). ASA, however, removed his heretical mother, MAACAH, for unbecoming religious behavior (1 Ki. 15:13). It is also worthy of note that in Judah at least the name of the king's mother always received mention in the record of his coming to the throne (e.g., 2 Ki. 12:1). (See N.-E. A. Andreasen, "The Role of the Queen Mother in Israelite Society," *CBQ* 45 [1983]: 179 – 94.)

<div align="right">R. L. ALDEN</div>

Queen of Heaven. An object of Jewish worship in the time of JEREMIAH. Most of the information regarding this cult comes from outside the Bible. The only biblical clues available are in Jer. 7:18 and 44:17 – 19, 25. The former passage states, "The children gather wood, the fathers light the fire, and the women knead the dough and make cakes of bread for the Queen of Heaven." It is generally agreed that the cakes were made in the shape of a human being. Many such fragments have been found in clay, usually with accented female features. In Jer. 44:17 it is recorded that the people intended to "burn incense to the Queen of Heaven and…pour out drink offerings to her…in the towns of Judah and in the streets of Jerusalem."

The problem is compounded by the use of the unusual MT form of the word "queen," *mĕleket H4906*. Some consider this an erroneous writing of the normal *malkâ H4893*. Others have understood it to be *mĕleʾket*, construct form of *mĕlāʾkâ H4856*, "work, handiwork" (cf. Jer. 7:18 LXX, *tē stratia tou ouranou,* "to the army of heaven"; the Aram. Tg. reads here "to the stars of heaven").

Some consider Ashtoreth, a well-known Canaanite fertility deity, to be the "Queen of Heaven" who according to Jeremiah was worshiped on rooftops.

It is well accepted that this was a borrowed deity. Several of Israel's neighbors had consorts for their male deities—goddesses and a queen of heaven. In ASSYRIA, the goddess ISHTAR was called the "lady of heaven," whereas in the literature from UGARIT she is "queen of heaven." The Canaanite Astarte, or ASHTORETH, was a well-known FERTILITY goddess. This seems to be the domain of the Queen of Heaven mentioned in Jer. 44, since the people were rejoicing in her for their general welfare and freedom from famine. The people of Ugarit also had ANATH, a kind of mother goddess. This name appears in the texts from ELEPHANTINE, Egypt, where Anat-Yaho is represented as the consort of Yaho (Yahweh). Perhaps this was a recurrence of the Queen of Heaven cult against which Jeremiah preached. (See E. O. James, *The Cult of the Mother Goddess* [1959]; *The Ancient Gods* [1960], 77–106; S. M. Olyan in *UF* 19 [1987]: 161–74; S. Ackerman in *Gender and Difference in Ancient Israel,* ed. P. L. Day [1989], *109 – 24; ABD,* 5:586–88; *DDD,* 678 – 79.)

R. L.ALDEN

queen of Sheba. A ruler from the old Arab state of SHEBA who visited King SOLOMON ostensibly "to test him with hard questions" only to discover that his wisdom surpassed all that she had heard (1 Ki. 10:1 – 13; 2 Chr. 9:1-12). There may have been trade motives in the visit as well. Her camels brought spices, gold, and precious stones (1 Ki. 10:2, 10). What Solomon gave in return is not specified, although it seems clear that he gave her some commodities (v. 13). Trading was an important facet of Solomon's activities, and the Red Sea and Arabian peninsula came within the ambit of his interest. Indeed, he had a port on the Red Sea at EZION GEBER (1 Ki. 9:26 – 28; 10:11-12,22-29). Specific reference is made in 10:15 to the gold which he obtained "from merchants and traders and from all the Arabian kings and the governors of the land." Hence a visit from an Arab queen would not be inconceivable.

The ancient kingdom of Saba, the S Arabic name of the old SABEAN state, lay in the SW corner of the Arabian peninsula, roughly the area of modern Yemen. The state and its people, the Sabeans, are referred to often in the OT (Job 6:19; Ps. 72:10, 15; Isa. 60:6; Jer. 6:20; Ezek. 27:22 – 23; 38:13). Important excavations conducted during 1951 – 52 in Marib, the old capital, have given a remarkable insight into the Sabean civilization. Its origins are unknown, but there is some evidence

that it may have been occupied by Semites who migrated S in the middle of the 2nd millennium. By the 10th cent. B.C. there was a flourishing kingdom in the region, and a diplomatic and trade mission led by a queen to the kingdom of Solomon some 1,500 mi. to the N was possibly part of a total policy of commercial expansion. Assyrian inscriptions from the 8th and 7th centuries B.C. mention several queens and this suggests a matrilineal system of succession.

The tradition that the Abyssinian royal line is descended from Solomon and the queen of Sheba is difficult to prove (or disprove!). ETHIOPIA was probably colonized from S Arabia by the Sabeans. Arabic legends give many details about the queen who married Solomon, and JOSEPHUS linked the queen of Sheba with Ethiopia (*Ant.* 2.10.2; 7.6.5–6). (See W. Phillips, *Sheba's BuriedCity* [1955]; G. W. Van Beek in *The Bible and the Ancient Near East: Essays in Honor of W. F. Albright* , ed. G. E. Wright [1961], 229 – 48; K. A. Kitchen in *The Age of Solomon: Scholarship at the Turn of the Millennium*, ed. L. K. Hardy [1997], 126 – 53.)

quest of the historical Jesus. See BIBLICAL CRITICISM V.E; JESUS CHRIST III.G.

quick, quicken. The adjective *quick* in modern usage refers most often to speed, but the KJV translators used it in its older sense, "alive": "…and they go down quick into the pit" (Num. 16:30); "Then they had swallowed us up quick" (Ps. 124:3); "…who shall judge the quick and the dead" (2 Tim. 4:1); "For the word of God is quick, and powerful" (Heb. 4:12). Similarly, the verb *quicken* is used in the KJV with the meaning "revive, make alive"; although this sense is still found in modern usage, current English versions prefer different renderings (e.g., in Ps. 119:50 the KJV has "thy word hath quickened me," but the NRSV, "your promise gives me life," and the NIV, "Your promise preserves my life"). The verb is found in contexts that speak of REGENERATION (e.g., Eph. 2:1) and RESURRECTION (e.g., Rom. 4:17). Note, however, that the KJV often uses the adverb *quickly* in the sense "with speed" (Gen. 18:6 et al.).

quicksands. This term is used by the KJV to render Greek *Syrtis G5358*, which refers to an area of the Libyan coast known for its shifting sandbars (Acts 27:17). See SYRTIS.

Quintus Memmius. See MEMMIUS, QUINTUS.

Quirinius kwi-rin'ee-uhs (Κυρήνιος *G3256*, some MSS Κ Κυρίνιος, a more precise representation of the Latin *Quirinius*). KJV Cyrenius (a transliteration of the Greek without reference to the Latin form). Publius Sulpicius Quirinius was what the Romans called a "new man": like Cicero, he came to office and held a consulship (12 B.C.) and provincial governorships without the aid and advantage of a family tradition in politics or administration. TACITUS (*Annals* 3.48) devoted a brief chapter to Quirinius when he recorded his death in A.D. 21. He wrote:

> About the same time he [Tiberius] desired of the senate that "the decease of Sulpicius Quirinius might be celebrated by a public funeral." Quirinius was born at Lanuvium, a municipal town, and was nowise related to the ancient patrician family of the Sulpicii; but being a brave soldier, was for his active services rewarded with the consulship under Augustus, and soon after with a triumph, for driving the Homonadenses out of their strongholds in Cilicia; next, when the young Caius Caesar was sent to settle the affairs of Armenia, Quirinius was appointed his principal adviser, and at the same time had paid court to Tiberius, then in his retirement at Rhodes. This the emperor represented now to the senate; he extolled the kind offices of Quirinius, and branded Marcus Lollius as the author of the perverse behavior of Caius Caesar to himself, and of all the tensions between them. But the memory of Quirin-ius was not agreeable to the rest of the senate, by reason of the danger he brought upon Lepida, as I have before related, and his sordid meanness and overbearing conduct in the latter part of his life.

Quirinius was a notable soldier, with a desert campaign to his credit in CYRENE, which along with CRETE he ruled as PROCONSUL about 15 B.C. Between 12 and 2 B.C. he was engaged on a pacification project in PISIDIA against the mountaineers, whom Tacitus, in the passage quoted above, described inaccurately as Cilician. Dates are vague, and for biblical scholars these are tangled with the problem of the date of the nativity. A fair statement might run as follows: The "first census," which took place "while Quirinius was governor [*i.e.*, imperial legate] of Syria" (Lk. 2:2), could not have been the one to which GAMALIEL referred, as reported in Acts 5:37. That registration was in A.D. 6 or 7. It therefore follows, given the customary fourteen-year census cycle, that the previous enrollment was in 8 or 7 B.C.; hence the problem. LUKE is clearly claiming that Quirinius conducted

an earlier census in Palestine distinct from the one to which he makes reference in his second book.

Consideration of this problem can begin with the assumption that Luke was a competent historian, careful of his facts, and not prone to unverified statements. His work generally supports such a reputation. Reference, therefore, to an earlier census taken by Quirinius in Palestine must be taken seriously. To assume such a census, while complete proof is lacking, requires no distortion of known historical facts. Luke's claim is consistent with an extraordinary command for Quirinius in the E, between one and two decades prior to his regular governorship of SYRIA. It was established Roman practice, going far back into Republican history, to appoint able officers to posts of special authority to deal with a local situation beyond the power or ability of the official within whose proper sphere it lay. AUGUSTUS was notably wary of placing too much power in the hands of the governors of those provinces that called for large military forces, and he often demonstrated a preference for special commissioners directly responsible to himself for the resolution of problems of extraordinary complexity.

According to Ronald Syme (*Roman Revolution* [1939], 755), Quirinius was busy on the frontier problems of the Pisidian highlands between 12 and 2 B.C., though this is not to say that the subjugation of the Homonadenses, mentioned by Tacitus, required ten years of continuous campaigning. It does appear, however, that Quirinius was strategically placed for a piece of special work in the E in the middle years of this decade. It does no violence to Luke's language, or to the known facts of history, if Quirinius was especially commissioned at this time to supervise the Palestine census. Luke could not know that so much evidence would disappear with the lapse of time —that historians would wonder why he spoke of Quirinius as governor of Syria, when it was common knowledge that Quin-tilius Varus occupied that important post.

Quintilius Varus, who was governor of Syria from 7 to 4 B.C., was a man for whom Augustus may justifiably have entertained no great regard. Augustus, above all, was an able judge of men, and it was Quintilius Varus who, in A.D. 9, reprehensibly lost three legions in the Teutoburger forest in Germany, one of the most shocking disasters to Roman arms in the century. Assuming that Augustus had some misgivings over the ability of Varus to handle an explosive situation, it is easy to see a reason for a special intrusion, under other direction, in the affairs of Varus's province.

A reasonable reconstruction might assume that Varus came to Syria in 7 B.C., an untried man. The census was due in Palestine in 8 or 7 B.C., and it could well be that Augustus ordered Quirinius, who had just successfully dealt with the problem of the Pisidian highlanders, to undertake the delicate task. HEROD had recently lost the favor of the emperor and may have been temporizing about the taking of the census, a process that always enraged the difficult Jews. Quirinius's intervention, the requisite organization, and the preparation for the census, could easily have postponed the actual date of registration to the end of 5 B.C., a reasonable date. (The matter is argued at length in E. M. Blaiklock, *The Century of the New Testament* [1962], appendix 4. For the view that the reference to a census under Quirinius is not historical, see R. E. Brown, *The Birth of the Messiah: A Commentary on the Infancy Narratives in Matthew and Luke* [1977], 547 – 56. For a discussion of several other proposed solutions, see D. L. Bock, *Luke*, 2 vols, BECNT [1994 – 96], 1:903 – 9.)

The picture emerges of a notable Roman, distinguished for his career of faithful service to Augustus, and perhaps for that reason earning the unpopularity at which Tacitus twice glanced. It is possible to observe his rise. Quirinius's first wife was Appia Claudia, no undistinguished name. His second wife was Aemilia Lepida, a descendant of Sulla and Pompey, and destined bride of the young L. Caesar, untimely dead. He grew old, says Syme, "in envied opulence, the prey of designing society ladies" (*Roman Revolution*, 381). He was shrewd enough to pay discreet court to TIBERIUS, in exile

at Rhodes, and lost nothing by such wisdom when Tiberius, in default of other heirs, succeeded Augustus. He left no heirs himself.

<div align="right">E. M. BLAIKLOCK</div>

quiver. A case for holding and carrying arrows (Heb. *tĕlî H9437*). It was generally made of LEATHER and slung over the shoulder of the hunter or soldier. ESAU the hunter carried one (Gen. 27:3); two passages use the same Hebrew word in connection with WAR equipment (e.g., Job 39:23; Isa. 22:6). The other four occurrences of the word are metaphorical. One of them speaks of a man's family as the quiver and his children as the arrows (Ps. 127:5). The prophet, pictured as an arrow, is said to be concealed in God's quiver (Isa. 49:2). Because a killer uses his arrows, Jeremiah likens the empty quiver to an open tomb (Jer. 5:16); he also says of God's afflictions, "He pierced my heart with arrows [*lit.*, sons] from his quiver" (Lam. 3:13). A different Hebrew word, *ĕleṭ H8949*, should perhaps be rendered "quiver" in some passages (e.g., Jer. 51:1; cf. NRSV and NJPS), but this term is of uncertain meaning and probably means "shield" (KJV and NIV; see the discussion in *HALOT*, 4:1522 – 23).

This Assyrian relief (c. 700 B.C.) depicts a quiver case held by a soldier.

<div align="right">R. L. ALDEN</div>

Qumran koom'rahn. Khirbet Qumran is a site near the NW shore of the DEAD SEA where the Wadi Qumran flows from the Judean hills into the Dead Sea. Though long known to travelers, the site was not excavated until the discovery of the DEAD SEA SCROLLS in neighboring caves from 1947 onward drew attention to it. The excavations were carried out in 1951 and 1953 – 56 under the direction of R. de Vaux and G. L. Harding. The site, which stands on a plateau about half a mile from the shore, consists of a complex of buildings and an associated cemetery. The earliest building there dates from the 8th – 7th cent. B.C. and is probably to be connected with King UZZIAH (2 Chr. 26:10); the area possibly should be identified with the "City of Salt" (Josh. 15:62; but see SALT, CITY OF).

The site was deserted for some centuries after this settlement and there was no sign of activity until the 2nd cent. B.C., when the ancient building was modified and used by a small group of settlers (Level Ia), but the most flourishing period (Ib) followed in about 110 B.C. when, with an enlarged population, the complex was provided with an elaborate water system, a pottery, smithy, laundry, bakery, mill, kitchens, refectory, and assembly halls.

The site of Qumran with the Dead Sea and the mountains of Moab in the background. (View to the E.)

This phase ended about 30 B.C. following a fire; a few years later there was an earthquake, and the site remained virtually uninhabited until 4 B.C., when it was reconstructed by new settlers (Level II) much on the lines of Ib; it remained in occupation until its destruction by the Romans in A.D. 68 during the First Jewish Revolt. It was fortified (III) and continued as a Roman post until the end of the century. The site again was used as a center by the rebels during the Second Jewish Revolt (A.D. 132 – 135), but no serious rebuilding was again undertaken. See WARS, JEWISH.

The surrounding caves in which were found the DSS contained pottery contemporary with Levels Ib and II. Many of the scrolls had been copied at Khirbet Qumran (a scriptorium was found in Level II), and probably were deposited in the caves in A.D. 68 when the Roman conquest was imminent. The identity of the community is uncertain, but most scholars would now connect them with the ESSENES. (See J. T. Milik, *Ten Years of Discovery in the Wilderness of Judaea* [1959], 45 – 56; J. Finegan, *Light from the Ancient Past: The Archaeological Background of Judaism and Christianity*, 2nd ed. [1959], 273 – 76; R. de Vaux, *Archaeology and the Dead Sea Scrolls* [1973]; P. R. Davies, *Qumran* [1982]; J. Magness, *The Archaeology of Qumran and the Dead Sea Scrolls* [2002]; K. Galor et al., eds., *Qumran: The Site of the Dead Sea Scrolls* [2006]; *ABD*, 5:590 – 94; *NEAEHL*, 4:1235 – 41.)

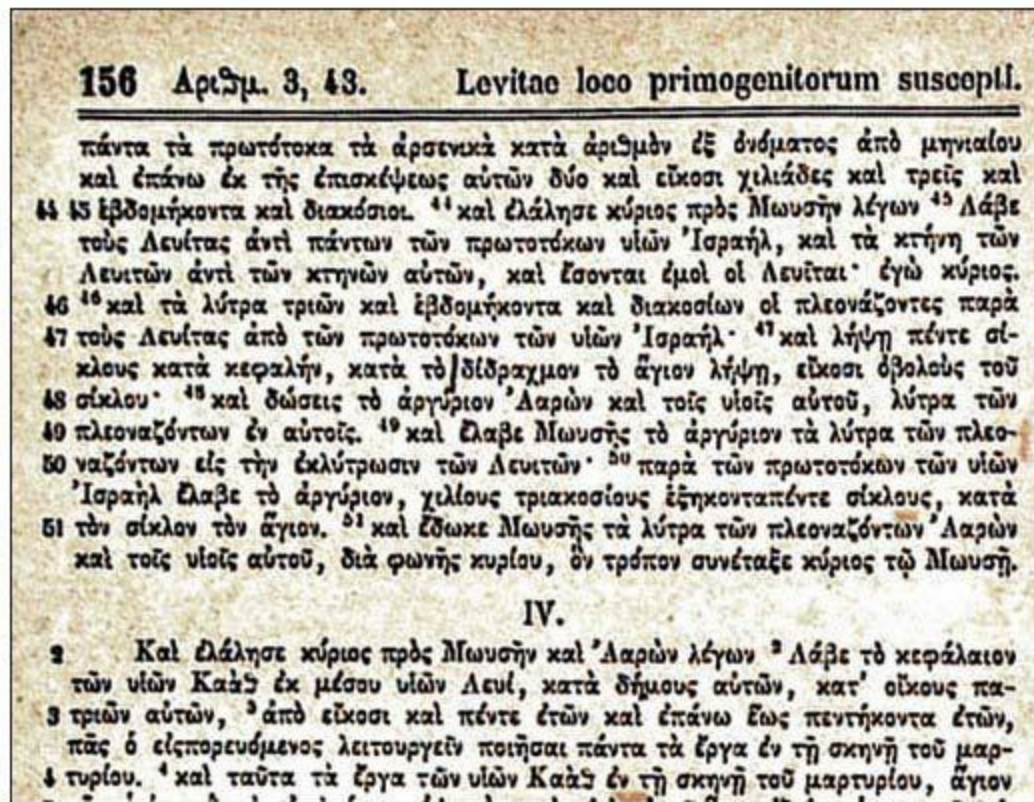
T. C. MITCHELL

quotations in the New Testament. The form and content of citations in the NT will be treated under the following headings:

1. Numbers and kinds
2. Textual affinities
3. The style of OT quotations
4. The purposes for which the OT is quoted
5. Quotations from sources other than the OT

I. Numbers and kinds. Most of the quotations in the NT are drawn from the OT. The bulk of these occur in the Synoptic Gospels, the epistles of Paul, Hebrews, and Revelation. How many there are depends largely on the number of allusive OT quotations counted—and that is a delicate matter. The number of explicit OT quotations has been variously estimated in the range of 150 – 300, allusive quotations over 1,000. Revelation contains numerous allusive quotations, but none which are explicit.

The explicit quotations of the OT are easy to identify; quotation formulas often introduce them. Allusive quotations are clauses, phrases, and sometimes single words that may easily escape notice. For example, the unattentive reader might well miss that the words from the cloud at Jesus' TRANSFIGURATION (Matt. 17:5) came from three separate passages in the OT: "This is my Son [Ps. 2:7]…; with him I am well pleased [Isa. 42:1]. Listen to him [Deut. 18:15]!" More easily overlooked is Matthew's changing the description of Joseph of Ari-mathea (see JOSEPH #13) as "a prominent member of the Council" in Mk. 15:43 to "a rich man" (Matt. 27:57) to conform with a prediction by Isaiah that the Suffering Servant would have "his grave…with *a rich man* in his death" (Isa. 53:9 RSV).

There is the possibility that some coincidences of wording between the OT and the NT are fortuitous, as is probable in the narratives of the flights to Egypt by JEROBOAM I (1 Ki. 11:40) and the Holy Family (Matt. 2:13 – 15). In most instances, however, there is justification in seeing conscious allusions, for Jewish education was steeped in OT lore. Because of rote memory, many of the rabbis were "living concordances." The DEAD SEA SCROLLS have shown that an author's weaving OT phraseology into his own words was a common literary practice in NT times.


A page from the book of Leviticus in the Septuagint (Tischendorf's ed., 1875). The authors of the NT frequently used a form of this Greek version when quoting the OT.

II. Textual affinities. In quoting the OT, the NT writers occasionally transliterate the original Hebrew (or Aramaic); cf. "Immanuel" (Matt. 1:23), and "Eloi, Eloi, lama sabachthani" (Mk. 15:34).

Usually they follow the text of the LXX, frequently even when it differs from the MT. The NT may disagree, however, with the LXX throughout an entire quotation or only in parts of a quotation. Sometimes the disagreement with the LXX will show agreement with the MT, the TARGUMS, the Syriac version (Peshitta; see VERSIONS OF THE BIBLE, ANCIENT III.C), the Greek version attributed to Theodotion (see SEPTUAGINT IV.C), and variant readings in Hebrew MSS, the DSS, rabbinical tradition, and JOSEPHUS—and sometimes complete independence from any known OT textual tradition. Often combinations of different textual traditions occur within a single OT quotation. It is especially well known that this phenomenon characterizes the so-called "formula-citations" in Matthew, introduced by a statement such as "this took place to fulfill what the Lord had said through the prophet" (Matt. 1:21 et al.).

The mixed text probably should not be attributed to inaccurate citation by memory (as is often stated). That is made unlikely by the numerous agreements with various textual traditions and by agreement among different NT writers against all others (Matt. 11:10; Mk. 1:2; Lk. 7:27 [these three citing Mal. 3:1]; Rom. 9:33 and 1 Pet. 2:6 [citing Isa. 28:16]; see J. Scott, *Principles of New Testament Quotation* [1877], 93).

Scholars have put forward a number of hypotheses to account for the aberrant text of numerous OT quotations in the NT. J. R. Harris argued that the NT writers used a "Testimony Book," that is, a catena or series of OT proof texts (*Testimonies*, 2 vols. [1916 – 20]). Many of the textual variants are then traceable to such a book, as are also recurring combinations of OT passages, supposed mis-ascriptions, and the known "Testimony Book" of Cyprian, an early church father. Support for the hypothesis comes from the catena of messianic texts discovered in Qumran Cave 4 (See J. M. Allegro in *JBL* 75 [1956]: 186; 77 [1958]: 350). Doubtless, early Christian evangelists and teachers drew on a common stock (oral and/or written) of favorite OT proof texts for tenets of the Christian faith. But there is little reason to think that a "Testimony Book" par excellence or any number of them are the reason for the frequent failure of NT writers to follow the LXX. One reason for not thinking so is that a number of the aberrant quotations do not convey the idea of messianic FULFILLMENT, and probably did not, therefore, stem from a catena of Christian proof texts.

According to Paul Kahle, the non-LXX elements in NT quotations of the OT reflect written Greek targums widely used before the church adopted the LXX as its standard version of the OT (*The Cairo Geniza*, 2nd ed. [1959], 209 – 64). The mass of variant readings in MSS of the LXX—variants that Kahle uses along with the aberrant text of OT quotations in the NT to prove the existence of Greek targums—present a discernible pattern of development from an archetype, not a hodgepodge of unrelated variants from independent Greek targums. Furthermore, the DSS have shown that many of the variants in the Septuagintal MSS were the result of progressive assimilation to the Hebrew text of the OT, not the result of amalgamation of differing Greek targums utilized by NT writers.

Krister Stendahl proposes that Matthew emanates from a Qumran-like "school" that practiced PESHER (interpretive) selection and adaptation of known variant readings in the quoted OT texts (*The School of St. Matthew and Its Use of the Old Testament* [1954]; cf. the treatment of the OT text in the DSS, especially the Habakkuk Commentary). This hypothesis, however, labors under two basic weaknesses: (1) the DSS have shown that in NT times the OT text contained mixed readings that later became isolated in separate streams of textual tradition, so that the variants in OT quotations may be due to the mixed OT text used by NT and Qumran writers rather than to deliberate selection and adaptation by them; (2) an aberrant text is frequently an OT quotation where no hermeneutical motive for changing the LXX (or MT) is apparent. The same objections militate against the view of Barnabas Lindars that the aberrant text of many OT quotations in the NT stems from reworking of the texts

according to apologetic needs as the church confronted Judaism (*New Testament Apologetic: The Doctrinal Significance of the Old Testament Quotations* [1961]).

In the synoptics, only the explicit quotations of the OT in the Markan tradition are purely Septuagintal (or nearly so). On the other hand, some of Matthew's formula citations are wholly or partly Septuagintal as well as non-Septuagintal, showing affinities with the MT, the Aramaic targums, etc. This same sort of willy-nilly mixture occurs in the other OT quotations, including those that are allusive. It would appear, then, that the explicit quotations in the Markan tradition were conformed to the LXX because they stood out and because their grammatical independence in context subjected them to easy assimilation, and that the mixed text in other OT quotations stems partially from the mixed state of the OT text in NT times and partially from the Jewish practice of free translation in "targumizing." Agreeing to the mixture of Hebrew, Aramaic, and Greek textual traditions in many NT quotations of the OT is the archaeological evidence that these three languages were commonly used in 1st-cent. Palestine (see R. H. Gundry, *The Use of the Old Testament in St. Matthew's Gospel* [1967], 172 – 78; id. in *JBL* 83 [1964], 404ff.). Divergences from the LXX in OT quotations outside the synoptics (as in John and the Pauline epistles) are likewise best explained as the result of loose, ad hoc renderings in the targumic style (cf. E. D. Freed, *Old Testament Quotations in the Gospel of John* [1965]; E. E. Ellis, *Paul's Use of the Old Testament* [1957]—although both of these writers find more interpretative changes of the OT text than the present writer is inclined to see; and Ellis hypothesizes that Christian prophets engaged in oracular adaptations).

III. The style of OT quotations. The formulas by which explicit quotations are introduced are varied. "It is [or stands] written" emphasizes the permanent validity of the OT REVELATION. "That it might be fulfilled" points up the consummation of the OT revelation in NT events. The OT passage may be attributed to the human author ("Isaiah says") or to God himself ("God/the Lord says," "the Holy Spirit says"). Other formulas are "the Scripture says," "the law says," "the prophet says," "it says," and numerous variations. These introductory formulas exhibit the highest possible concept of OT INSPIRATION on the part of Jesus and the NT writers. Not only does God often appear as the author of Scripture; the identification is so close that sometimes the Scripture is personified. At the same time the references to Moses, David, Isaiah, and others show recognition of the human element.

Notice should be made of the ḥaraz method, that is, quoting from two or three sections of the Hebrew OT canon (e.g., Rom. 11:8 – 10 from Isa. 29:10; Deut. 29:4 [MT v. 3]; and Ps. 69:22 – 23 [LXX 68:23 – 24]) or, less formally, chain-quoting different passages from the same section (e.g., Rom. 9:25 – 29 from Hos. 2:23 [MT v. 25]; 1:10 [MT 2:1]; and Isa. 10:22 – 23). Some combinations of quotations seem also to rest on key words. Outstanding are the quotations about the "stone" in Rom. 9:33 (Isa. 8:14; 28:16) and 1 Pet. 2:6 – 8 (Isa. 28:16; Ps. 118:22; Isa. 8:14).

Problems of ascription arise. For example, the quotation in Matt. 27:9 concerning the thirty pieces of silver comes from Zech. 11:13, but it is ascribed to Jeremiah. All sorts of explanations are offered; but probably it is taken for granted that the reader will see the relationship to Zechariah, so that attention is called to easily missed parallels in Jer. 19, such as the allusions to a potter and field (cf. the analogy of 2 Chr. 36:21 in relation to Lev. 26:34 – 35 and Jer. 25:12; 29:10). In other instances a quotation lacks ascription in the NT and it may be difficult to determine its source; notorious examples include Matt. 2:23 ("He will be called a Nazarene"); Jn. 7:38 ("…streams of living water will flow from within him"); and Eph. 5:14 ("Wake up, O sleeper…").

The NT writers often quoted an OT text without indicating the source. The ancients had no feelings about plagiarism in such a practice. Nor did they sharply distinguish between direct and

indirect quotations. To weave interpretative phraseology into a quotation (making it inexact) was not to disregard its sacredness, but to honor that sacredness by treating the text as supremely important for interpretation and application. By the same token, it does not really matter that the text of the quotation differed somewhat from that of the Hebrew OT. It is the meaning that counts. Only if the point of the quotation may rest on a change of text does a serious problem arise. That is a matter of judgment in each claimed instance. For an example, see the commentaries on Heb. 10:5 ("a body you prepared for me" versus "my ears you have pierced," Ps. 40:6).

It frequently is charged that the NT writers misinterpreted the OT text. Many times, however, they point to TYPOLOGY in the OT passage without meaning to deny the original meaning in its historical setting. Beyond that, scholars are dealing with matters of judgment—and each place where it is claimed that misinterpretation has occurred has to be considered separately. For example, does PAUL's argument that the singular "seed [*or* offspring]" in God's promise to ABRAHAM ("and to thy seed," Gen. 13:15 KJV) must refer to one person, Christ, wrongly overlook the use of "seed, offspring" as a collective singular? Hardly, for the context of the quotation shows that Paul is thinking of Christ as a collective singular—the corporate Christ, or Jesus Christ plus all those united to him by faith (note the conclusion of the argument, Gal. 3:29). Or does Paul's use of Hab. 2:4 ("The righteous shall live [have eternal life] by faith [trust in Christ]"—Rom. 1:17 ASV) violate an original meaning, "The righteous shall physically survive by virtue of their fidelity to Yahweh"? Again, one must answer negatively, for the verb "to live" in Hab. 2:4 carries the full meaning, "to enjoy divine favor," and fidelity to God is rooted in trust. Indeed, the OT passage seems to contrast the arrogant self-confidence of the wicked with the patient trust of the righteous, so that trust is the primary connotation rather than (or at least arising out of) fidelity.

Concerning the OT quotations in the Gospels, it is also charged that Christian desire to find fulfilled prophecies has resulted in the warping and creation of tradition about Jesus to fit OT texts. Against such a view are the facts that Christians failed to exploit many OT passages easily susceptible to the motif of fulfillment and that many of those they did exploit were not, so far as one can tell, messianically interpreted in Judaism at that time. Some of the quotations are so out of the way that it is doubtful a Christian writer would have thought to create a corresponding tradition about Jesus. Or the tradition is so realistic that derivation from the OT is unlikely. Not even among the DSS, where the desire to find fulfillment was so strong that the OT text is tortuously treated, does one meet creation of tradition to fit prophecy. For these and other reasons, one is to accept the priority and trustworthiness of the tradition concerning Jesus, and view the attached OT texts as later accretions rather than sources.

IV. The purposes for which the OT is quoted.

The motif of fulfillment in OT quotations is very strong. Quotations that fall under the category of fulfillment have to do with both direct predictions of future events and typological significance beyond the intention of the OT writers. The main motifs of these quotations in the NT are as follows: Jesus acts as Yahweh himself. He is the foretold Messianic King, the Isaianic Servant of Yahweh, and the Danielic Son of man. He culminates the prophetic line, the succession of OT righteous sufferers, and the Davidic dynasty. He reverses the work of ADAM, fulfills the divine promise to ABRAHAM, and recapitulates the history of Israel.

The priesthood of MELCHIZEDEK and AARON both prefigure (the latter sometimes contrastingly) the priesthood of Christ. The paschal lamb and other sacrifices represented the sacrificial, redemptive death of Jesus, and also Christian service. Jesus is life-giving bread like the manna, the

rock source of living water, the serpent lifted up in the wilderness, and the tabernacle-temple abode of God among his people.

JOHN THE BAPTIST was the predicted prophetic forerunner. Jesus inaugurated the foretold eschato-logical period of salvation and the new covenant. JUDAS ISCARIOT fulfilled the role of the wicked opponents of OT righteous sufferers. The church is (or individual Christians are) the new creation, the spiritual seed of Abraham by incorporation into Christ, the new Israel, and the new temple. The Mosaic law prefigured grace both positively and negatively. Noah's flood stands for the last judgment and for Christian baptism. The passage through the Reed (Red) Sea and circumcision also picture baptism. Jerusalem stands for the celestial city. Entrance into Canaan prefigures the entrance of Christians into spiritual rest. Proclamation of the gospel to all men fulfills the promise to Abraham and prophetic predictions of universal salvation. That OT quotations fall under a limited set of recognizable themes sharply contrasts with the piecemeal treatment of the OT text in the DSS and rabbinical writings. The early Christians must have learned their OT hermeneutics from Jesus himself (cf. Lk. 24:27, 32).

Underlying the fulfillment quotations is the concept of *Heilsgeschichte* (salvation-history). God directs history according to his redemptive purpose. He reveals what he will do through his prophets. Their predictive word has a potency to bring about its own fulfillment, for it comes from the Lord of history. Thus, when the fulfillment takes place, confirmation results. Confirmation also comes when, looking back, one sees predictive symbolism in the pattern of OT events, persons, and institutions— that is, typology—not within the purview of the OT writers, but divinely intended.

One must not think that the early Christians searched haphazardly through the OT for any proof text for fulfillment that they could find. In his book *According to the Scriptures* (1952), C. H. Dodd showed that most of the NT quotation material relating to Jesus and the church comes from fairly restricted text plots in the OT. These he outlined as follows:

(1) *Apocalyptic-Eschatological Scriptures*—Joel 2 – 3; Zech. 9 – 14; Dan. 7 (primary); Mal. 3:1 – 6; Dan. 12 (supplementary).

(2) *Scriptures of the New Israel*—Hos. 1 – 14; Isa. 6:1—9:7; 11:1 – 10; 28:16; 40:1 – 11; Jer. 31:10 – 34 (primary); Isa. 29:9 – 14; Jer. 7:1 – 15; Hab. 1 – 2 (supplementary).

QUOTATIONS FROM AND REFERENCES TO ISAIAH 53 IN THE NEW TESTAMENT

ISAIAH 53	NEW TESTAMENT
53:1 – 12	Lk. 24:27, 46; 1 Pet. 1:11
53:1	Jn. 12:38; Rom. 10:16
53:2	Matt. 2:23
53:3	Mk. 9:12
53:4	Matt. 8:17; 1 Pet. 2:24
53:4 – 5	Rom. 4:25
53:5	Matt. 26:67; 1 Pet. 2:24
53:5 – 6	Acts 10:43
53:6	1 Pet. 2:25

53:6 – 7	Jn. 1:29
53:7	Matt. 26:63; 27:12, 14; Mk. 14:60 – 61; 15:4 – 5; 1 Cor. 5:7; 1 Pet. 2:23; Rev. 5:6, 12; 13:8
53:7 – 8 LXX	Acts 8:32 – 33
53:8 – 9	1 Cor. 15:3
53:9	Matt. 26:24; 1 Pet. 2:22; 1 Jn. 3:5; Rev. 14:5
53:11	Rom. 5:19
53:12	Matt. 27:38; Lk. 22:37; 23:33 – 34; Heb. 9:28; 1 Pet. 2:24

(3) *Scriptures of the Servant of the Lord and the Righteous Sufferer*—Isa. 42:1—44:5; 49:1 – 13; 50:4 – 11; 52:13—53:12; 61; Pss. 69; 22; 31; 38; 88; 34; 118; 41; 42 – 43; 80 (primary); Isa. 58; 6 – 10 (supplementary).

(4) *Unclassified Scriptures*—Pss. 8; 110; 2; Gen. 12:3; 22:18; Deut. 18:15, 19 (primary); Pss. 132; 16; 2 Sam. 7:13, 14; Isa. 55:3; Amos 9:11 – 12 (supplementary).

To the above may be added Exod. 1 – 4; 24; 34; Num. 23 – 24; 2 Ki. 1; Ps. 78; Dan. 2; the last part of Dan. 11 (to go with ch. 12, which Dodd cites); Isa. 13; 34 – 35; and the last chapters of Isaiah generally beyond the limits of Dodd's text-plots; Mic. 4 – 5; 7; Zech. 1 – 6; and the rest of Malachi (beyond Mal. 3:6). Since the church recognized these OT passages as specially relevant to the new dispensation, an individual quotation became a pointer to the text-plot as a whole.

Sometimes the OT may be quoted only for the purpose of literary allusion; but usually, if not always, closer examination will discover a deeper rationale, such as fulfillment. In other usages, the OT quotation becomes the basis of comment (as in Jesus' teaching on marriage and divorce—Mk. 10:2 – 9 and parallels), sometimes in an argumentative setting (as in Jesus' debate with the Sadducees over resurrection—12:18 – 27 and parallels). Or the OT may be quoted prescriptively (cf. the repetition of nine out of the Ten Commandments in scattered passages throughout the NT).

V. Quotations from sources other than the OT. Apart from OT quotations in the NT, Matthew and Luke quote Mark and perhaps Q and other sources (cf. Lk. 1:1 – 4 and see Gospels III.B). Quotations of Jesus' sayings appear (usually very allusively) in the epistles. Paul quoted an otherwise unrecorded saying (*agraphon*) of Jesus in Acts 20:35: "It is more blessed to give than to receive." See Agrapha. In Acts, Luke quotes a number of early Christian sermons and speeches. Of course, the evangelists quote large amounts of the teaching of Jesus—not always verbatim. The difference in the style of Jesus' speech in John and in the synoptics is to be explained by at least three considerations: (1) in the process of translation from Aramaic and Hebrew into Greek, John's own Greek style imposed itself more heavily than that of the synoptists; (2) John paraphrased more than the synoptists; (3) John deliberately preserved a strand of tradition not prominent in the synoptics—but that Jesus did speak in the Johannine style is proved by Matt. 11:25 – 27 and Lk. 10:21, 22.

Prayers are quoted in the NT: Matt. 6:9 – 13; Lk. 11:2 – 4 (the Lord's Prayer); Acts 4:24 – 30 (a persecution prayer in the early church); and 1 Cor. 16:22 (if Maranatha is to be understood as an imperative form, "Our Lord, Come!"; cf. Rev. 22:20). So also are early Christian hymns, confessional creeds, and other traditional material: Lk. 1:46 – 55, 68 – 79; 2:14, 29 – 32; Jn. 1:1 – 14; Rom. 1:3 – 4; 4:24, 25; 10:9; 1 Cor. 11:23 – 26; 12:3; 15:3 – 5; Eph. 5:14; Phil. 2:5 – 11; Col.

1:15 – 20; 1 Tim. 3:16; 1 Pet. 3:18 – 22; Rev. 4:8, 11; 5:9 – 10. The above references are only representative. Some are less certain than others because of the difficulty in distinguishing quotations from the authors' own compositions. In particular, E. G. Selwyn proposes heavy quotation in 1 Peter and other epistles of such sources as liturgical hymns and creedal forms, a persecution fragment containing exhortations, catechetical documents, and *verba Christi*, thus accounting for the many similarities among the NT epistles (*The First Epistle of St. Peter* [1958]; see further R. P. Martin, *Worship in the Early Church* [1964], chs. 3 – 5 and literature there cited). There remains the possibility that Paul quoted his own earlier writings and that other epistolary writers quoted Paul. Jude extensively quoted 2 Peter, or vice versa (see the commentaries and introductions).

Lists of household duties and catalogues of virtues and vices in the epistles may be adaptive quotations of similar material in Jewish and/or Hellenistic ethical codes. There are possible quotations from or allusions to apocryphal books, as in Matt. 11:28 – 30 (Sir. 51:23 – 27); Rom. 2:4 (Wisd. 11:23); Heb. 1:1 – 3 (Wisd. 7:25 – 27); Heb. 11:35 – 37 (2 Macc. 6 – 7). Jude quotes from the pseudepigraphal *1 En.* 1:9 (Jude 14 – 15) and apparently from a now lost part of the *Assumption of Moses* (Jude 9). Many of the phrases in Revelation have been attributed to extracanonical Jewish apocryphal literature (see, e.g., R. H. Charles, *The Book of Enoch* [1912], xcv-iff.). Material that appears in the pagan writers Epimenides, Aratus, Cleanthes, Callimachus, and Menander is quoted in Acts 17:28; 1 Cor. 15:33; and Tit. 1:12. Finally, Paul appears to quote slogans of his opponents in passages such as 1 Cor. 6:12; 8:1; and 2 Cor. 10:10.

R
Aerial view of the city of Rome (looking W).

Ra rah. See RE.

Raamah ray'uh-mah (רַעְמָה *H8311* and רַעְמָא *H8309* [1 Chr. 1:9], derivation uncertain). Son of CUSH, grandson of HAM, and father of SHEBA and DEDAN (Gen. 10:7; 1 Chr. 1:9). Raamah thus appears as the eponymous ancestor of a tribe in ARABIA. The traders of both Raamah and Sheba brought to the markets of TYRE their best of all kinds of spices, precious stones, and gold (Ezek. 27:22). Its location has not yet been fixed. On the basis of the SEPTUAGINT rendering, *Regma* (*Ragma* in Ezekiel), many have identified it with a city of that name mentioned by Ptolemy (*Geogr.* 6.7.14) and located in E Arabia on the Persian Gulf, but this location is problematic. Others believe that Raamah is the same as Ragmat(um), an ancient city in the oasis of Najran mentioned in S Arabian inscriptions (cf. *HALOT*, 3:1268; *ABD*, 5:597), though it is objected that Old South Arabic *g* does not correspond to Hebrew ʿ*ayin* (cf. *ISBE* rev. [1979 – 88], 4:27). The suggested equivalence between biblical Raamah and the *Rhammanitōn* mentioned by Strabo (*Geogr.* 16.4.24) is rejected by some. (Note further W. F.

Albright, "Dedan," in *Geschichte und Altes Testament* [1953], 1 – 12.) See also NATION II.A.3.

B. K. WALTKE

Raamiah ray'uh-mi'uh (רַעַמְיָה *H8313,* perhaps "Yahweh has thundered" or "[born during] a thunderstorm"). An Israelite mentioned among leading individuals who returned from Babylon with ZERUBBABEL (Neh. 7:7; called "Reelaiah" in Ezra 2:2 and "Resaiah" in 1 Esd. 5:8 [KJV, "Reesaias"]).

Raamses ray-am'seez. See RAMESES.

Rabbah (Ammon) rab'uh (רַבָּה *H8051,* "great [city]"). The capital city of AMMON, also known as Rabbath-Ammon (cf. Heb. *rabbat běnê(ammôn,* lit., "Rabbath of the sons of Ammon," i.e., "Rabbah of the Ammonites," Deut. 3:11; Ezek. 21:20). Its modern name is Amman, the capital of the Hashemite Kingdom of Jordan. Rabbah seems to be the only Ammonite city that is mentioned by name in the Bible. It is located about 23 mi. E of the JORDAN River and lies at the headwaters of the Wadi Amman, which soon becomes the JABBOK River. This very strong spring on the edge of the desert was the reason for the city's existence. Ammon, or a fortified sector within it, was called "the city of waters" (2 Sam. 12:27 KJV; NIV, "its water supply"; see P. K. McCarter, Jr., *II Samuel,* AB 9 [1984], 312).

I. Bible History. In the first reference to Rabbah (Deut. 3:11), the city is cited as the permanent location of the famous iron bed of OG, king of BASHAN. This "bed," possibly a sarcophagus, has been an enigma to scholars, since Og ruled at the beginning of the Iron Age, when this metal was uniquely valuable (see IRON). Within the territory of GAD, the city of AROER is located to the E of Rabbah (Josh. 13:25). The next reference to the capital of the Ammonites details the siege of that city by the Israelites under the direction of JOAB, along with the interwoven episode of DAVID and BATHSHEBA (2 Sam. 11:1—12:31). Joab captured the section of the city located around the springs, but he waited for King David himself to capture the citadel section on the steep hill above the springs (12:27 – 31; 1 Chr. 20:1 – 3). The city was a rich prize and its captured population was put to the corvée or public works battalion. This demonstrates that David anticipated his son SOLOMON when the latter rebuilt JERUSALEM. David, like Solomon, needed many laborers whom he secured from his prisoners of war. Later, when David was fleeing from his son ABSALOM, he came to MAHANAIM and was aided by some friends, among whom was the son of NAHASH, the king of Rabbah (2 Sam. 17:27 – 29). Apparently David had established a new dynasty on the Ammonite throne after he captured the capital.

By the time of the prophet AMOS, the city was again an independent capital of the Ammonite kingdom, which was expanding its boundaries up into GILEAD. Because of the unusually brutal ruthlessness of this military conquest, Amos predicted the destruction of Rabbah (Amos 1:13 – 14). In JEREMIAH's day the Ammonites were again conquering the same territory of Gilead, and the prophet predicted the city's destruction (Jer. 49:1–). EZEKIEL made two prophecies against the Ammonites. He predicted that the king of BABYLON would capture Rabbah in the same campaign that would see the destruction of Jerusalem (Ezek. 21:20). The capital of the Ammonites, however, was not to meet its annihilation on this occasion; it would come later at the hands of the Arabs of the desert (25:1 – 7). It was Rabbah's control over these desert tribes of the Wadi Sirhan, who traded also with the Arabs, that had made Rabbah wealthy throughout many years. Ezekiel predicted that the Ammonite

kingdom would return to desert pasture land through military conquest by the same desert tribes.

Rabbah of Ammon.

II. Intertestamental history. The first reference to Rabbah after the close of the OT is its capture by PTOLEMY Philadelphus. The city was renamed Phil adelphia in his honor and it continued to bear that name through the Roman period, although occasionally the older name Rabbath Ammon appeared in historical writings. ANTIOCHUS the Great captured the city in 218 B.C. after a long siege. In 199 B.C. it returned to the Ptolemaic sphere of influence. The city became Roman when POMPEY took over Palestine in 63 B.C. The NABATEANS, who were its normal occupants in the 1st cent. B.C., were conquered by HEROD the Great c. 30 B.C. Under the Romans Philadelphia became one of the cities of the DECAPOLIS, the southernmost city of that confederation.

III. Archaeological history. Rabbah's abundant water supply was the secret of the city's continuing life. Archaeological artifacts show occupation from the Palaeolithic through the Neolithic and Chalcolithic times (excavations in 1994 uncovered homes and towers thought to date to c. 7000 B.C.). The same is true of its occupation in all the Bronze and Iron Ages (except Iron III), as well as the Hellenistic and Roman periods. A tomb from the HYKSOS period shows the wealth of the city at that time. Still more interesting is a Late Bronze Age temple in open country c. 2.5 mi. from the city. The richness of the finds seems to show that commerce from the Mediterranean of significant volume and great wealth was passing through Rabbah in addition to the normal N-S commerce of the KING'S HIGHWAY shortly before the Israelites under MOSES came through TRANSJORDAN. The main commercial

route was always this one between ARABIA and DAMASCUS.

Typical pottery from the Ammonite culture in Transjordan dating to the Late Bronze Age (c. 1550 – 1200 B.C.).

The great Roman and Byzantine buildings on the citadel hill are too valuable to be removed in order to uncover earlier history. The cost of land purchase in the modern city around the citadel also makes it too expensive for archaeological digging. The only biblical phase found to date is a part of the city's Iron Age wall.

The archaeological remains above ground are almost all from the Roman period (esp. 2nd and early 3rd cent. A.D.), Byzantine, or Umayyad. From Roman times there can be seen today the great theater (cut in part out of the solid rock of the hill) seating c. 6,000 people. It is still used on special occasions. Nearby is an odeum (i.e., a small theater) for various types of performances. There are also two temples, a nymphaeum (i.e., a monument consecrated to the nymphs of the springs), a bath, an aqueduct, and remains of various colonnaded streets. These great buildings of the Roman period are valuable for NT parallels since the basic architectural forms changed little, and one can have a good idea of what Jerusalem, Jericho, and Samaria looked like when Jesus visited these cities. Still finer examples of a Palestinian Roman city can be found at Jerash (GERASA). It is one of the spectacular ruins of the Near East.

Herr, *The Amman Airport Excavations 1976*, AASOR 48 [1983]; R. Dornemann, *The Archaeology of the Transjordan in the Bronze and Iron Ages* [1983], passim; B. MacDonald et al., eds., *The Archaeology of Jordan* [2001], index s.v. "Amman"; *NEAEHL*, 4:1243 – 52.)

J. L. KELSO

Rabbah (Judah) rab'uh (רַבָּה *H8051*, with the definite article attached, "the great [city]"). A town in the hill country of the tribe of JUDAH (Josh. 15:60). Rabbah and KIRIATH JEARIM are the only towns included in the last district listed in this passage; apparently, they were intended to guard the western approach to JERUSALEM. It is generally agreed that Rabbah is the same as *Rbt* (vocalized Rubute or Robbotu), a town mentioned in Egyptian sources (cf. Y. Aharoni, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 163, #105). Aharoni identified it with modern Khirbet □amideh, but this

site is in the SHEPHELAH (c. 2 mi. WSW of AIJALON and 5 mi. ESE of GEZER) rather than in the hill country, and he himself acknowledged that such a location "would violate the geographic principle upon which the entire list is founded" (ibid., 355). The identification of Rabbah is thus uncertain. (For fuller discussion, see A. F. Rainey in *ISBE* rev. [1979 – 88], 4:29 – 30.)

Rabbath rab'uhth. See RABBAH (AMMON).

rabbi rab'*i* (ραββί *G4806*, from Heb. רַב *H8042* [Aram. רַב *H10647*], with 1st person pronominal suffix, "my master, my teacher"). A term used by the Jews after the OT period in designation of their religious teachers. First employed as a term of respect, particularly in reference to SCRIBES trained in the law (Matt. 23:2 – 7), it came to be used during the 1st cent. as a title, the pronominal suffix losing its significance. It was translated into the Greek by the word *didaskalos G1437,* meaning TEACHER (Matt. 23:8; Jn. 1:38). Due to its significance (the adjective *rab H8041* means "great"), Jesus forbade his disciples to accept it in self-designation (Matt. 23:8). Christ was so addressed (Matt. 26:25, 49; Mk. 9:5; et al.), as was JOHN THE BAPTIST (Jn. 3:26). In some of these passages, the use of the term appears to be a form of address corresponding roughly with English *sir.* The title "Rabboni" (Gk. *rhabbouni G4808*, Mk. 10:51; Jn. 20:16) derives from a heightened form of the word in ARAMAIC (*rabbān* or *rabbôn*). (See further *ABD*, 5:600 – 602.)

L.J. WOOD

rabbinic literature. See MISHNAH; TALMUD.

rabbit. See HARE.

Rabbith rab'ith (רַבִּית *H8056*, with the definite article attached, meaning possibly "the great [city]"). A town within the tribal territory of ISSA-CHAR (Josh. 19:20). Rabbith is listed between ANAHARATH (prob. a site some 7 mi. SE of Mount TABOR) and KISHION (prob. near the S slope of the mountain), and many think it is the same town as *dobrat H1829* (DABERATH, on the N side of the mountain; cf. Z. Kallai, *Historical Geography of the Bible* [1986], 424 – 25). Indeed, CODEX VATICANUS has *Dabirōn* for the MT's *rabbît*, but some scholars do not accept this identification.

rabboni ra-boh'n*i*. See RABBI.

Rabmag rab'mag (רַב *H8041*, "great, chief," and מַג *H4454*, possibly from Akk. *maḫḫu*, "soothsayer" [BDB, 550], but the whole phrase is prob. a loan from Akk. *rab-mu[n]gi*, a title applied to high military officials). Also Rab-mag. The Babylonian title borne by NERGAL-SHAREZER (Jer. 39:3). Most English versions simply transliterate the term, but the NIV renders it as "a high official." The title was apparently given to special royal envoys. See also RABSARIS; RABSHAKEH.

Rabsaris rab'suh-ris (רַב *H8041*, "great, chief," and סָרִיס *H6247*, "eunuch, official"; the phrase corre sponds to Akk. *rab-ša-rēši*, lit., "chief of the one at the head"). Also Rab-saris. Title applied to one of three officials sent by SENNACHERIB, king of Assyria, to HEZEKIAH (2 Ki. 18:17 NRSV and most ver sions); the other two were the TARTAN and the RABSHAKEH. The title is applied also to Nebo-Sarsekim (Jer. 39:3; see SARSECHIM) and to NEBUSHAZBAN (v. 13), both of whom were Babylonian senior officials. In every instance, the NIV renders this phrase "chief officer." See also

Rabshakeh rab'shuh-kuh (רַב־שָׁקֵה H8072, from Akk. *rab-šāqê,* "chief cupbearer" [cf. Heb. מַג H8041, "great, chief," and סָרִיס H9197 hiphil, "to give to drink"]). Title applied to high-ranking Assyrian officials. When SENNACHERIB attacked LACHISH, he sent the Rabshakeh, along with the TARTAN and the RABSARIS, to deliver an ultimatum to HEZEKIAH (2 Ki. 18:17 et al.; cf. Isa. 36:2 et al.). The Rabshakeh, however, acted as the chief spokesman. The NIV, instead of transliterating the term, renders it "field commander." See also CUPBEARER; RABMAG.

L. L. WALKER

raca rah'kah (ῥακά G4819 [some MSS have ῥαχά], prob. from Aram. רֵיקָא [also], רֵיקָה "empty"). A term of reproach or insult. In the Bible the word occurs only in Matt. 5:22, where Jesus warns that "anyone who says to his brother, 'Raca,' is answer able to the Sanhedrin" (NRSV, "if you insult a brother or sister, you will be liable to the council"). The Aramaic word *rêqāʾ* is used figuratively in rabbinic literature as a term of contempt, meaning "worthless, good for nothing, stupid." For example, the MIDRASH on Eccl. 9:15 states that NOAH said to his contemporaries, "Woe, ye foolish ones [*rqyyʾ,*]! Tomorrow a flood will come, so repent" (*Qoh. Rab.* 9.17). The TALMUD relates that "once when a certain pious man was praying by the roadside, an officer came by and greeted him and he did not return his greeting. So he waited for him till he had finished his prayer. When he had finished his prayer he said to him: Fool [*ryqʾ*]!" (*b. Ber.* 32b). Note also that a Greek papyrus letter dating from the 3rd cent. B.C. already uses the form *rhacha* as an insult (cf. BDAG, 903, which includes a summary of patristic interpretations; for further discussion, see J. Jeremias in *TDNT,* 6:973 – 76).

G.H. WATERMAN

Racal ray'kuhl (רָכָל H8218, perhaps from a root meaning "to trade"). KJV Rachal; TNIV Rakal. A place in S Judah to which DAVID sent some of the plunder he took from ZIKLAG (1 Sam. 30:29). The SEPTUAGINT (CODEX VATICANUS) reads *en Karmēlō,* and on that basis many scholars emend the MT to read *běkarmel* (see CARMEL), referring to a town not far from ESHTEMOA, the previous place mentioned on the list (v. 28).

race. A population distinguishable from others; a tribe or nation composed of people that derive from the same stock. (For the meaning "a contest of speed," see ATHLETE.) There are two primary considerations to be made when discussing the human races. One is biological, dealing with the processes of differentiation among populations as well as the classification of the results of these processes. The second one is sociological, which deals rather with the mechanisms within SOCIETY that influence the processes of differentiation as well as the reaction of a given social group to the end results of the various processes of differentiation. During the last decades of the 20th cent., scientific discussions of race underwent significant changes.

1. The biological problem of race
    1. Definition of race
    2. Means of classifying races

I. The biological problem of race. No two human beings are alike. Two may look very much alike, but upon closer examination details of the physical features will reveal distinctions. Even when the outward physical features appear almost identical, there will still remain distinction of blood type. At the same time, it is commonly agreed in scientific circles today that all living human beings belong to a single species. A species is composed of all those organisms that interbreed to produce viable fertile offspring.

Anthropologists generally agree that humans form a single, continuously varying species that is *polymorphic* (i.e., showing marked variability in many structural characteristics), *polytypic* (i.e., within any given population a number of types of individuals will occur), and *polygenic* (i.e., at a great number of "gene loci," two or more alleles [alternative forms of a gene] are found in relatively stable proportions, which vary from one population to another depending upon selective pressures). They also agree that most phenotypical characteristics are the product of multiple gene effects. The human species is composed of a large number of breeding populations, differing from one another because of local adaptive pressures, geographic impediments, and, in some cases, social impediments to free gene flow between populations. This means that in all their major biological characteristics, they have more features in common than they have distinguishing differences.

Somewhere between considering only two humans and considering all humans within one species, it becomes apparent that certain distinctive traits tend to cluster in populations that have lived predominantly in one part of the world or other. The clustering of such traits becomes the basis for classification of populations. There is no question but that such traits tend to cluster in specific populations; populations native in central Africa have much higher frequencies of genes that produce dark skin than do European populations. The frequency of the gene for blue eye color progressively diminishes southward from Scandinavia through central Europe to the Mediterranean and Africa. The problem arises in attempting to classify the subdivisions of populations on the basis of such traits. Prior to modern-day attempts to classify races on genetically based biological studies, *taxonomy* (lit., "arrangement of names") formed the basis of classification. It is generally conceded that Linnaeus's system is the most complete. Before Darwin's time, such name schemes became an end in themselves. In more recent times there has been a shift in the use of classifications: from one that presents a picture of the ordained and eternal to one that represents distances and relationships.

Many schemes that attempt to group or classify populations have been presented. Some of these schemes have been based on physical traits alone, such as the color of the skin, the color and form of the hair, the eye color, and other characteristic physical features. One such approach divides all the people of the world into three major stocks: the *Caucasoid* (Caucasian) or white; the *Negroid* or black; and the *Mongoloid* or yellow. Each in turn is divided further into subgroups. This was the dominant scheme of classification when the children's chorus was composed: "Jesus loves the little children, / All the children of the world, / Red and yellow, black and white, / All are precious in his

sight, / Jesus loves the little children of the world." The expression of the love of Jesus is quite biblical. The "racial classification" is neither biblical nor adequate.

Man blowing shofar during Elul at Western Wall.

Another scheme is based on geography alone. This classification coincides basically with the ethnic divisions within a geographically defined land mass, such as the Asiatic. Other approaches are based on blood types such as A, B, or O. Still other schemes are based on the differences of language and/or custom.

Since the term *race* has been applied to all of these classifications, confusion has resulted, and some noted anthropologists such as Ashley Montague have urged the elimination of the term. The idea has strong support in theory. In the selection of a trait to utilize in classification, if one character is used, it is possible to divide a species into subspecies according to the variation in this character. If two characters are used, it is still possible, but there will be some problems arising from the mixture. As the number of characters increases it becomes nearly impossible to determine actual races. Further, the selection of the racially determining traits becomes a wholly arbitrary choice. It is felt by some that, because of the complexity of the problem, the concept of race becomes meaningless.

There is the further problem that all populations have a history. What can be done in classifying the United States population in light of extensive immigration? Again, with the observed fact that most of today's differentiations are the result of culture, some feel that the new conditions are so different that it is better not to use the term at all. In the words of Washburn, "races are products of the past, relics of times and conditions which have long ceased to exist."

It becomes quite obvious that if the term or the concept is used at all, it must be done with the greatest caution. If used meaningfully to classify populations, the classification must grow out of the purpose of the classification. As J. Buettner-Janusch (*Origins of Man: Physical Anthropology* [1966]) has suggested, "Classifications are not immutable, and the ones that we use must be appropriate for the occasion."

A. Definition of race. A scientific biological classification based on established genetic criteria permits the breaking of the human species into smaller, biologically determined units. "A race is a human population that is sufficiently inbred to reveal a distinctive genetic composition manifest in a distinctive combination of physical traits." This definition is a biological one based on *genotype* or

genetic makeup rather than on a *phenotype* distinction of persons who have a fairly definite combination of distinguishing physical traits. It does not ignore the physical characteristics; rather, it recognizes them to be part of the picture as contributing to classification but not the sole criterion of classification.

B. Means of classifying races. According to E. Adamson Hoebel (*Anthropology: The Study of Man* [1966]), four basic ideas are emphasized in the above definition: population, inbreeding, genetic composition, and distinctive physical traits.

A *population* may be defined as "a group of possible observations or of individuals united by some common principle." Generally speaking, a geographical distinction is made focusing on people who have inhabited a given continent or a section of continent in the past and who still do inhabit it to a great extent (e.g., Caucasians). They are more likely to share common ancestry. Within each geographical area or the race that results might be found *local races*, again based on a geographic consideration. These are localized over broad areas within a continent or island chain (e.g., Nordics). S. M. Garn and C. S. Coon, who originally formulated this approach to racial analysis, suggest that the number of such races might be thirty. Finally, within each of these categories of local races might be found what have been called *microgeographic races*. These are extremely isolated, tightly inbreeding, small populations set off from other such populations (e.g., the Kentucky mountaineers of the southern Appalachians).

Inbreeding is the result of isolation and limited mobility and itself results in a random distribution of genes among a population of humans. Such distribution assures that a given population has specific genes not shared by other populations. They would have these to a greater or lesser extent. The more outside contact a population might have, the greater the distribution of the genes. The more restricted the contact, the more limited the distribution of the genes and the more highly specialized the genetic make-up of the population. Both geographic and social factors enter into the isolation of a group or population. Oceans may keep two populations from interbreeding on the international scene, whereas exogamy/ endogamy (required marriage outside/within a specific group) may restrict marriage opportunities and thus reduce interbreeding on the local scene.

Genetic composition suggests that the hereditary materials in the sex cells are arrays of more or less discrete units. These were called *genes* in 1909 by W. Johannsen. The laws of inheritance produced by G. Mendel suggest four areas in which genetic theory clarifies the problem of heredity. The parental heredities do not mix in the progeny: when the descendants mature and proceed to form their own sex cells, the components of the parental heredities segregate, mutually uninfluenced and uncontaminated by their generation-long sojourn in the same body. Further, heredity is particulate and not continuous: the hereditary materials in the sex cells are arrays of more or less discrete units. Also, although a child gets half his genes from his mother and the other half from his father, he or she receives only half the total genes (never all) each parent possesses. Finally, even though the gene theory seems notoriously capricious to a casual observer, there is system in this apparent caprice.

Following Mendel's discoveries, specialists began to unfold the wonder of the gene and its influence in the life processes. It was discovered in 1902 that genes were contained in chromosomes. The chromosomes were later found to contain DNA (deoxyribonucleic acid) and protein. In 1961, Marshall Nirenberg of the National Institute of Health found that all of life is not only built from the same basic DNA units, but is also assembled by one kind of code. All life was shown to be controlled by its own specific genetic code.

A whole concatenation of *physical traits* marks a given race. Yet it is clear that one individual

never possesses all the traits that characterize his race. Such traits may be physical or they can also involve blood types. Physical traits are the obvious characteristics of height, skin color, and kind of hair, for example. Blood is classified according to its agglutinative reactions, that is, according to whether the hemoglobin (red blood corpuscles) clump together when mixed with alien blood. Such blood types as O, A, B, and AB form the basis for blood type classifications.

This photo from the beginning of the 20th cent. shows a nomadic Arab guide on a horse.

C. A classification of races. Modern anthropologists usually resist racial classifications. In the past, perhaps the most complete and extensive classification (based on the preceding definition of race) was the one suggested by E. Adamson Hoebel. It consists of nine major categories, subdivided according to local races as follows:

(1) EUROPEAN (population of Europe, North Africa, and the Middle East, and their worldwide descendants)

(a) Northwest European: Scandinavia, northern France and Germany, the Low Countries, the United Kingdom, and Ireland
(b) Northeast European: Eastern Baltic, Russia, and modern Siberia
(c) Alpine: central France, southern Germany, Switzerland, and northern Italy, to the Black Sea
(d) Mediterranean: population surrounding the Mediterranean, eastward through Asia Minor

(2) INDIAN (population of the Indian subcon tinent)

(a) Indic: India, Pakistan, and Ceylon
(b) Dravidian: aboriginal population of southern India

(3) ASIAN (population of Siberia, Mongolia, China, Japan, SE Asia, and Indonesia)

(a) Classic Mongoloid: Siberia, Mongolia, Korea, and Japan

(b) North Chinese: northern China and Manchuria
(c) Turkic: western China and Turkestan
(d) Tibetan: population of Tibet
(e) Southeast Asian: southern China through Thailand, Burma, Malaya, the Philippines, and Indonesia
(f) Ainu: aboriginal population of Japan
(g) Eskimo: northern maritime fringe of N America and ice-free fringes of Greenland
(h) Lapp: arctic Scandinavia and Finland

(4) MICRONESIAN (population of the western Pacific Islands from Guam to the Marshalls—no local races distinguished)
(5) MELANESIAN (population of the western Pacific Islands S of Micronesia, extending from New Guinea to Fiji)

(a) Papuan: mountain highlands of New Guinea
(b) Melanesian: coastal area of New Guinea and most of the other islands in the Melanesian archipelago

(6) POLYNESIAN (population of the eastern Pacific Islands from Hawaii to New Zealand and Easter Island)

(a) Polynesian: aboriginal population
(b) Neo-Hawaiian: 19th to 20th cent. blend of Polynesian, European, and Asiatic

(7) AMERICAN (i.e., Native Americans, earlier called "Indians")

(a) North American: Canada and the Continental United States
(b) Central American: southwestern United States, Mexico, and Central America to Brazil
(c) South American: all South America, except Tierra del Fuego
(d) Fuegian: population around the Straits of Magellan
(e) Ladino: new Latin-American population resulting from blending of Mediterranean, Central and South American ("Indians"), Forest Negroes, and Bantu
(f) North American Colored: 18th to 20th cent. population blended of northwestern Europeans and Africans

(8) AFRICAN (population of Africa S of the Sahara)

(a) East African: E African Horn, Ethiopia, and Nilotic Sudan
(b) Sudanese: the Sudan, except for Nilotics
(c) Forest Negro: W Africa and most of the Congo
(d) Bantu: S Africa and adjacent parts of E Africa
(e) Bushman-Hottentot: surviving post Pleistocene population in S Africa
(f) Pygmy: small-statured population living in the equatorial rain forest
(g) South African Colored: population of S Africa produced by a blend of NW European and Bantu, plus some Bushman-Hottentot

(9) AUSTRALIAN

(a) Murrayian: aboriginal population of southeastern Australia
(b) Carpentarian: aboriginal population of central and northern Australia

The Negrito populations are sporadically scattered throughout SE Asia, Indonesia, and New Guinea. They thus straddle several normal geographic areas and cannot be placed in any one of the major categories.

The attempts to identify racial differences by describing physiological traits have become highly controversial. What follows is a traditional but problematic description.

European (formerly Caucasoid). The European race is not actually white. It belongs to the group possessing varying pigmentation. Eye color varies from light blue to dark brown. Hair is blond to black and of fine to medium texture; it may be straight, wavy, or curly, but is rarely kinky and never woolly. The males tend to grow hair on their chests, arms, legs, and faces as well as on the tops of their heads. The nose is narrow and high, rarely broad or flat. Although the forehead is usually sloping, the face is not prognathous. Chins tend to jut, and lips are thin. Stature is medium to tall.

Indian. The fact that India is a subcontinent isolated from the rest of Asia by vast mountain ramparts qualifies its population for consideration as a geographical race. The population is, in fact, made up of hundreds of local races and microgeo-graphic races. Tribal and caste endogamy has split the population into numerous intrabreeding groups separated by great social distances that are more inhibiting than geographical distances. In the N of India, skin color is variably light. In the S, it may be very dark. Stature is short, except in the extreme NW, where there has been much European (mostly Middle Eastern) intermixture. Most Indians are brunettes, and the hair is usually wavy. Body hair on males is moderately frequent. The head is almost always dolichocephalic. Eyes are dark brown and large. Body build is gracile.

Asian (formerly Mongoloid). The most outstanding Asian physical trait is the slant eye, more elegantly known to anthropologists as the internal epicanthic fold. The infants also have a unique feature, the "Mongolian patch," which is a purplish, triangular area of skin at the base of the spine. Skin color is brown or yellowish-tan. Eyes are brown or dark-brown, and the hair is black. It is very coarse and straight, growing long on the head and scarcely at all on the face or body. Most Asian populations are brachycephalic. The cheekbones are broad and high, while the nose is squat and low-bridged, thus giving a flat-faced appearance. While their body trunks are fairly long, heavy, and broad, they are usually short and squat in stature, because their legs are short.

Micronesian. This population resulted from a blending of SE Asians and Melanesians. It is medium-statured, brown-eyed, and dark-skinned. Hair is black and frequently frizzy. The head is brachycephalic to mesocephalic.

Melanesian (formerly Oceanic Negro). The peoples of the Black Islands are black in skin color (some are brown) and hair color. The hair is long and frizzy; hence the nickname "Fuzzy-Wuzzies" given them by American soldiers in World War II. The head is usually dolichocephalic, and the nose is high and broad (sometimes called Semitic). Eyes are dark and set in a very prognathous face, which has notably thick lips. Body hair is scanty. Stature is medium and the body well-formed.

Polynesian. Predominantly they are of Indic mixed with Melanesian and S Asian stocks. The race is very similar to the Malayo-Indonesians except that the stronger Mediterranean heredity gives a wavy form to the hair, elongates the face and body, lightens the skin, and produces a high nose. African traits show up in a tendency to fullness of lips. The dominant roundheadedness of the Asian

characterizes most Polynesians. Hair grows luxuriantly on the head, but, as is to be expected in an Indic-Asian-Melanesian mixture, it is scanty on the face and body. As well-fed islanders, they have developed large and powerful bodies.

American (formerly Amerind). The "Indians" of the Americas are highly variable in stature, head form, and details of facial features. In general, however, they reveal their Asian ancestry in a predominance of brachycephaly; brown eyes; black, usually straight hair; thin lips; broad, high cheekbones; occasional internal epicanthic fold; and yellow or reddish-brown skin covering a broad and heavy body. Blood-type frequencies, as already noted, differ markedly from those of the Asian, however.

African (formerly Negro). Africans are the possessors of the darkest pigmentation of all mankind; nevertheless, few Africans are actually black. Most are dark-brown or brownish-black in skin color. Hair is prevailingly black, coarse, wiry, and tightly curled, kinky, or woolly. With few exceptions, heads are long and narrow. The occipital region juts out, as does the lower portion of the face, which in appearance is accentuated by the thick, everted mucous membrane that forms the lips. The African nose is broad, with flaring wings and a broad, deeply depressed bridge. The hair on the head, though thick, is short in length, while the male beard is sparse; body hair is rare. Stature is medium tall. The forearm is long, and the legs are thin (i.e., the calves do not ordinarily develop thick musculature).

Australian. The Australian aborigine is physically a "lowbrow." His forehead slopes back from the heaviest supraorbital ridges to be found in any surviving race. His skull is narrow and houses a brain that is notably smaller in volume than that of any other living race. His face juts forward, and his dental arches even more so. His dark-brown eyes are set beside a deeply depressed nasal root, below which the broad thick tip of the nose flares up in a great bulb. The whole face is compressed from symphysis to nasion. The Australian is neither very short nor very tall. He grows a slender, short body on a pair of pipestem legs.

It needs to be stressed again, however, that since the 1970s there has been increasing opposition to the task of classifying races. The measurement of human variation on the basis of genetic analysis makes clear that individual (rather than population) differences account for most of the variation, and many believe that such data refutes the concept of biologically distinct races. By 1998, the American Anthropological Association had gone on record as opposing racial classification.

D. How races differentiate. "The differences between human races are, after all, rather small, since the geographic separation between them is nowhere very marked. The races gradually diverge. There is, of course, nothing fatal about this divergence, and under some circumstances the divergence may stop or even be turned into convergence. This is particularly true of the human species. The human races were somewhat more sharply separated in the past than they are today. Although the species inhabits almost every variety of environment on earth, the development of communications and the increase of mobility, especially in modern times, has led to much intermarriage and to some genetic convergence of the human races" (T. Dobzhansky, *Mankind Evolving: The Evolution of the Human Species* [1962]).

Races differentiate within the human species as a result of four factors. (1) *Selection* is the operation of environment at various levels to prevent or encourage the reproduction of genes of the individuals carrying them. If forces of any kind favor individuals of one genetic complexion over others, in the sense that they live and reproduce more successfully, the favored individuals will necessarily increase their bequest of genes to the next generation relative to the rest of the population.

(2) *Genetic drift* refers to the loss of genes through sampling accidents in the process of segregation and recombination of genes. In a large population the relative amount of any given individual's contribution to the next generation is much less than would be the case where the population size is small, though a given mutation stands a better chance of being transmitted in the larger population than in the smaller. Whereas selection is directional, genetic drift is nondirectional, due primarily to its being the result of chance. (3) *Mutation* is the molecular reorganization of the genetic code. The gene fails to copy itself exactly in the process of replication. It has been estimated that this happens in only one in 50,000 to 100,000 replications. According to some, the vast majority of mutations result in physiological inactivation, as for example, the depigmented and eyeless fishes that inhabit underground rivers and pools in caves. Mutation, however, has been proven only to produce variation within a species. There has never been proof of the development of a new species by this mechanism. The resultant change is thus likely to be regression rather than progression. *Genetic flow* is the transmission of genes from one population to another.

Wall painting from the tomb of Ptah-Hotep in Saqqara, depicting ancient Egyptians.

Three very significant factors—geography, environment, and sociology—enter into the problem of the differentiation of the races to encourage or impede the processes of differentiation indicated above. (1) *Geography* becomes a factor in differentiating races in terms of space and physiographic features. Each serves to result in geographical proximity or isolation. Because thousands of miles of ocean separate the Iroquois from the Australian, it is not likely that they will interbreed. A mountain range may effectively separate two populations simply because of the time and effort necessary to cross the mountain to effect interaction. On the other hand, in many primitive groups it is likely that every person is genetically related to the other.

(2) Ectogenetic theories of human development suggest that the *environment* plays a major role in human change, determining in certain instances just what kind of change takes place. These theories suggest that alterations induced in the inhabitants of warm climates will differ from those in cold climates and that different races, species, etc., will eventually appear. Such theories have generally been discredited, since the environment itself is not recognized to impose changes on the organism, but there is recognition that environment does have some effect on the differentiation of races. The human organism is known to adapt to a specific environment in two ways: either an organism can possess a morphology suitably generalized so that it can get along adequately in a variety of environments, or it can preserve the genetic potential for producing variants capable of getting along

under specifically differing conditions.

(3) Finally, *social isolation* may produce differentiation. This may be due to social, religious, political, or economic factors. If one society is Catholic and another Buddhist, there is limited expectation of interbreeding.

E. Modern races versus prehistoric races.

It is relatively simple to conceive of races in the present day. We accept them as part of our everyday involvement in living. However, scientists have not always been able clearly to differentiate racial groups in the past. In studying the human fossil record and reconstructing the line of human development, a unilinear approach is likely to be presented. *Homo sapiens* is thus pictured as being in a line of descent from *Australopithecus* through such developments as *Homo erectus* and/or *Neanderthals* (although there is debate concerning where the direct relationships lie). We may never know for sure, but any of the fossil humans could have easily been separate races rather than part of a unilinear development of distinct human types.

Carleton Coon elaborated a theory of race originally proposed by Franz Weidenreich. Based on a concept of parallel lines of development, Coon suggested that whereas the contemporary Asian population traces its lineage back to *Homo erectus pekinensis*, the contemporary European population traces its lineage to *Homo sapiens steinheimensis*. In all, he posits five racial lines in this way, "each as old as man himself," back to *Homo erectus*. More recent work, however, has led most scientists to the view that the human species cannot be subdivided into biologically distinct races.

II. The sociological problems of race

A. Deriving from the religious community

1. The Bible and race. The Bible does not have a specific term for "race"; nor is there a concept of race developed in Scripture. Yet, the Bible has been made the center of very deep-rooted feelings regarding this subject. Such feelings, as well as the theories that have sustained them, have derived from sociological rather than biblical sources. Within specific societies, the rise of racial distinctions has developed into racist attitudes. They derive mainly from ethnocentric orientations to the universe that make one kind of people the center of the universe, so to speak, and all other peoples inferior to them. Once such racial distinctions are made, a variety of authorities are naturally called upon to substantiate the point of view selected. It is at this time, and for this purpose, that the Bible is utilized, since it has been an authoritative source for a large portion of the civilized world since its writing.

The early chapters of Genesis are susceptible to the interpretation that the races were separate species created by God as they are today. The range of interpretation is quite broad. There are those who have taken the ADAM and EVE account to apply only to Caucasians. It has even been argued that the Negroes appearing in Egyptian monuments, as well as the skulls of the Indian mound builders of Ohio, differed in no way from their living descendants. This would imply that there was no important change in living creatures in the only slightly longer time since the creation itself, established time-wise by Archbishop Ussher at 4004 B.C. Some others have argued that Cain was black and thus founded the Negro race, an idea very attractive to racists, since they can then associate Cain's behavior with the Negro type. Other extreme theories have focused on intelligence, but the Negro, by all measures that are scientific, covers the full range of intelligence of any living human with lighter pigmentation of skin.

Additional points of view centered on the family of NOAH. Some firmly believed that the Negro differentiated slowly from the racial type of the family of Noah. Others considered the Negro a direct descendant of HAM, who supposedly (according to an unfounded tradition) was born black. One variation on the "Hamite" theme is that SHEM and his descendants moved eastward into Asia; JAPHETH moved westward into Europe; and Ham moved southward into Africa. Since people who lived in Asia are reddish brown, apparently Shem was of that color; since those who come from Europe are of lighter skin color, therefore Japheth must have been of that color; and since Africans are dark-skinned people, therefore Ham was a dark-skinned person. None of these arguments takes into consideration the possibility that all three of the brothers were of a darker skin pigmentation, one that characterizes the peoples of the Near East. The differentiation of color likely came many hundreds of years after the time of the sons of Noah.

Another variation on the Hamite theme is that Ham was turned into a dark-skinned individual through the curse placed upon him. The curse of Noah was really on CANAAN, one of four children of Ham, not on Ham himself. Apparently the curse had no lasting import, since history tells us that Canaan's descendants dominated the whole land of Palestine until long after the death of MOSES. There is further no indication that the curse had any "spiritual" import; that it had any sanction of God that would make it an enduring curse; that it had any relation to skin pigmentation; and that Canaan was in any way connected with the Negro population. W. F. Albright even went so far as to indicate that all known races in the region of the OT world belonged to the so-called "white" or "Caucasian" race, with the exception of the Cushites (Ethiopians), who were strongly Negroid in type.

The tower of BABEL account has become the focus for other theories of the origin of race. Some have considered that God miraculously produced the races in the same instant that he confounded the languages. A man by the name of Ariel even suggested that the tower of Babel was built by Negroes

who had no connection with the family of Noah.

Such theories or fancies have been utilized to establish racial distinctions as they relate to racists' arguments. At any one point in the history of civilization it has been difficult to distinguish the true from the false interpretations of Scripture. Present-day scientific schemes, on the other hand, do not serve to negate the Scriptures; rather they negate the untruth that has grown up around the truth of Scripture, as people have "seen in part" and dogmatically asserted that they have seen the whole.

With such a background, it is possible to suggest what the Bible does say about the question of human races. Scripture does talk about *ethnic* groups by name, going so far as to describe specific customs characteristic of these groups, such as in the book of Ruth. Elsewhere the Bible refers to geographical locations and the language problems that arise. Thus Acts 2 states that the HOLY SPIRIT came upon the disciples of Christ after his death, and that they "began to speak in other tongues" (v. 4) so that the people from the different geographical areas were bewildered "because each one heard them [the disciples] speaking in his own language" (v. 6). PAUL too recognized legitimate distinctions of language (1 Cor. 14:10). In some instances, the Bible refers to black or dark skin color, but only in terms of illness (Job 30:30) or beauty (Cant 1:5); in no case is there a derogatory reference or any indication of inferior status assigned to those of black skin.

Prior to the building of the tower of Babel, "the whole world had one language" (Gen. 11:1). It appears that the people preferred to live in a non-divided geographical zone and had opportunity to interrelate rather continuously. Following the construction of the tower of Babel, the larger group was divided into a number of groups, as could be assumed from the concept "scattered" (v. 8). They apparently proceeded to migrate in a broader, divided geographical zone. They thus became a number of separate or geographically isolated inbreeding populations rather than one inbreeding population. Whether the confounding of the language was instantaneous or not does not appear to be the point of the story. It appears rather that there was a causal effect, that in order to confound their language, they were scattered.

Such scattering was certain to produce two effects, effects that are known today from the genetic and linguistic sciences: the separation of inbreeding populations produces distinct phenotypic characteristics within each separate population; and through the process of language change, isolated populations develop distinct languages. Just when this scattering took place is not clear from the biblical account. The narration possibly is not in the proper temporal sequence. It appears rather that the incident may have been interjected here by the author to clarify a point in the genealogical listing, which point is lost to us due to the writing-translation process. Either way, we have a very clear insight into the scientific process of genetic and linguistic differentiation. The best scientific minds today tend to agree that *Homo sapiens* appeared and began to differentiate into races at the same time. The Bible does not need to be contradictory at this point.

Finally, two concepts become clear in the biblical record. The first is that when dealing with people of distinct ethnic and linguistic backgrounds, one must deal with them in keeping with their backgrounds, as for example in Acts 2, when the disciples spoke in tongues. A second concept is that of Christian love manifested by Jesus in all his dealings with the people of diverse backgrounds, such as the woman of Samaria. There appeared to be no place for racism or racial distinctions based on superiority-inferiority in his experience.

2. Racial supremacy. Racial prejudice may arise from a variety of causes, including economic and political as well as social; from a concept of superiority-inferiority; from biological differences or from combinations of these. It thus implies that "the differentiation of races is not a matter of science;

it is by immediate perception that we recognize emotionally the differences we call racial." Racial prejudice lies at the base of white-negro relations, which appears to have reached its climax in the United States; conflicts between Jews and non-Jews reached their climax during Hitler's regime in Germany and still lie behind much of the trouble in the Middle East.

The questions that arise from the problem of prejudice are: Do some races have a superior capacity for cultural attainment? Are they inherently more intelligent? Do they have an inherently greater capacity for leadership and domination that justifies their control and exploitation of allegedly less fortunately endowed races?

When one examines the comparative anatomy of races, there is no clear indication of superiority of any given race. When races are compared with subhuman primates, Africans come out most "apelike" in five characteristics and Europeans in three; but Africans are least "apelike" in six of the selected traits, while the Europeans are least so in only three. Such a comparison becomes somewhat absurd.

In comparisons of the brain size as correlated with intelligence, O. H. Klienberg concludes: "In general there appears to be an exceedingly small, though positive correlation between head size and intelligence." But this can be due as much to good nutrition as to inheritance.

Intelligence tests do tend to indicate something about intelligence level when they are composed and applied to members of the same society. They produce somewhat absurd results when they are applied cross-culturally, since many of the basic factors upon which the specific intelligence test is prepared are changed. How can an intelligence test designed to test Americans who learn individually and make decisions individually be used with any success among Australian aborigines or even Maya-related Indians of Central America who learn and make decisions in the group, not individually? S. D. Porteus attempted such an application among the Australians and they were disturbed when he did not help them solve the tests, especially since he had even been made a tribal member.

Such testing produces very little evidence for racial superiority. So-called "intelligence tests" measure innate skill plus cultural experience. Any results must be critically evaluated in light of the knowledge of the culture. Aptitude tests do reveal racial differentials in visual, motor, and vocal skills, but these too are influenced by culture, and no test can fully control this variable. Finally, many skills of intelligence and aptitude definitely change when the cultural environment changes.

B. Deriving from the whole of society

1. Sociological controls in a breeding population.

Society interacts with the environment to control the breeding population. The reaction of one society with the environment may very well determine with what other society it will make contact, for example, in economic exchange, thus enlarging or restricting the interbreeding potential of each society.

The social structure of a given society also controls the breeding population. The paired principle of exogamy/endogamy, for example, which establishes marriage relationships between societies as well as within societies, regulates, most effectively, interbreeding between groups. Rules of exogamy/ endogamy indicate the group outside of which one must go to find a suitable marriage partner, and also indicate the larger group within which one must find a suitable marriage partner. Any group not a part of the intermarriage potential of a given group will be sociologically isolated

from that group, and thus differentiation will likely result. Such arrangements between societies as economic trade commitments, political liaisons, or religious affiliations will limit or increase contact between these societies.

2. Sociological reactions to distinct populations. We do know certain things about all races. All humans, as T. Dobzhansky has pointed out, are adapted to learn language—any language; to perform skillful tasks—a fabulous array of tasks; to cooperate; to enjoy art; to practice religion, philosophy, and science. The study of cultures should give a profound respect for the biology of human capacity to learn.

Unfortunately, however unfounded the basis for racial prejudice may be, the importance of the attitudes and behavior proceeding from it in many countries is indisputable. It is here that the most profound damage to society and the individual is sensed. Denial of equality of opportunity stultifies the genetic diversity with which men and women became equipped during their development. Inequality conceals and stifles some peoples' abilities and disguises the lack of ability in others. In 1900 the life expectancy of white males in the United States was forty-eight years and in that same year the life expectancy of the African American males was thirty-two years. As the life expectancy of the whites increased from forty-eight to about seventy-five years, that of the African Americans increased from thirty-two to sixty-nine years. It was evident that although there was progress, this progress lagged many years behind the whites who obviously had better economic and social opportunities.

As long ago as 1950, the *Statement on Race* of the United Nations Educational, Scientific, and Cultural Organization (UNESCO) affirmed: "Available scientific knowledge provides no basis for believing that the groups of mankind differ in their innate capacity for intellectual and emotional development…Some biological differences between human beings within a single race may be as great or greater than the same biological differences between races…Vast social changes have occurred that have not been connected in any way with changes in racial type. Historical and sociological studies thus support the view that genetic differences are of little significance in determining the social and cultural differences between different groups of men…There is no evidence that race mixture produces disadvantageous results from a biological point of view. The social results of race mixture, whether for good or ill, can generally be traced to social factors."

<div align="right">M. K. MAYERS</div>

Rachab ray'kab. KJV NT form of RAHAB.

Rachal ray'kuhl. KJV form of RACAL.

Rachel ray'chuhl (רָחֵל *H8162*, "ewe"; Ραχήλ *G4830*). Daughter of LABAN, wife of JACOB, and mother of JOSEPH and BENJAMIN (Gen. 29:6 et al.). Jacob, obeying the instructions of his father ISAAC (28:1 – 2), traveled to the region of PADDAN ARAM in search of a wife from the family of his mother REBEKAH (Laban's sister). When he came to a well near HARAN (29:2), he met his cousin Rachel, "a shepherdess" who had brought her father's sheep to water them (29:9). Jacob fell in love with Rachel, who is described as "lovely in form, and beautiful," so he offered to work seven years for Laban in return for marrying her (29:17 – 18). Laban agreed, but deceitfully gave to Jacob his older daughter LEAH and then proposed that Jacob work an additional seven years for Rachel (29:21 – 27). Jacob was willing to accept these terms: the years he had already worked "seemed like only a few days to him because of his love for" Rachel (29:20). Thus after concluding the week-long wedding festivities with Leah, he was given Rachel and then proceeded to work the additional seven years (29:28 – 30).

Because Jacob did not really love Leah, and thus presumably treated her as a second-class wife, God made her fertile and she gave birth to four sons (Gen. 29:31 – 35). Rachel, on the other hand, was barren, and her jealousy toward Leah made her cry out to Jacob, "Give me children, or I'll die!" (30:1). Jacob responded in anger that it was God who had kept her from having children (30:2). Rachel then proceeded to give her maidservant BILHAH to Jacob as a CONCUBINE, hoping that the latter would bear children who would be counted as Rachel's own. Bilhah gave birth to two sons, DAN and NAPHTALI, and Rachel felt vindicated, exclaiming that in her struggle with Leah she had prevailed (30:3 – 8). Leah, not to be outdone, gave to Jacob her maidservant ZILPAH, who proceeded to bear two more sons (30:9 – 12).

Leah, evidently, continued to hold a subordinate position, for when Rachel asked for some of the MANDRAKES (a fruit thought to promote fertility) that Leah's oldest son REUBEN had gathered, Leah retorted, "Wasn't it enough that you took away my husband? Will you take my son's mandrakes too?" (Gen. 30:14 – 15). In return for the mandrakes, Rachel allowed Leah to sleep with Jacob. Then "God listened to Leah," and she gave birth to two more sons and a daughter (30:17 – 21). Then finally, after all these years, "God remembered Rachel; he listened to her and opened her womb. She became pregnant and gave birth to a son and said, 'God has taken away my disgrace.' She named him Joseph, and said, 'May the LORD add to me another son'" (30:22 – 24).

Some time later, when Jacob decided to leave Haran, Rachel stole her father's household gods, the possession of which was apparently indicative of family honor or leadership (Gen. 31:30 – 35; see TERAPHIM). It may be that, since both Rachel and Leah felt they had been defrauded by Laban when he kept their dowries (vv. 14 – 16), her taking the household gods was thought to secure a blessing for Jacob's family (perhaps a parallel to Jacob's stealing his father's blessing, which should have gone to the eldest child, ESAU ch. 27).

Young women still function as shepherdesses as did Rachel.

After Jacob and his family arrived in Palestine, they first settled near SHECHEM (Gen. 33:18), where DINAH, Leah's daughter, was violated, an act that led to the slaughter of the city's male inhabitants at the hands of SIMEON and LEVI (ch. 34). Under God's direction, Jacob moved to BETHEL, where he built an altar to God (35:1 – 7). Later, on the way from Bethel to EPHRATH (BETHLEHEM), Rachel went into hard labor. "As she breathed her last—for she was dying—she named her son Ben-Oni [*i.e.*, son of my sorrow]. But his father named him Benjamin [*i.e.*, son of the right hand]" (35:18). Rachel was buried there, and Jacob set up a pillar that marked RACHEL'S TOMB for centuries (35:19; cf. 48:7). (For a brief discussion of the literary qualities of this narrative, see *ABD*, 5:605 – 8.)

It is important to note that, as the mother of Joseph (whose sons EPHRAIM and MANASSEH became ancestors of two large Israelite tribes) and of Benjamin, Rachel was the ancestress of three of the most prominent tribes in the Hebrew nation. Not surprisingly, she is alluded to elsewhere in the Bible. When BOAZ announced his intention to marry RUTH, the elders of Bethlehem congratulated him with these words, "May the LORD make the woman who is coming into your home like Rachel and Leah, who together built up the house of Israel" (Ruth 4:11).

In the 8th cent. B.C., the Assyrians advanced toward Ramah, a town in Benjamin a few miles N of Jerusalem (see RAMAH #3), and more than a century later "the weeping prophet," anticipating further destruction and EXILE, announced this word from the Lord: "A voice is heard in Ramah, / mourning and great weeping, / Rachel weeping for her children / and refusing to be comforted, / because her children are no more" (Jer. 31:15). The woman who had so desperately longed for children now finds herself bereaved of them. Matthew quotes these words in connection with the slaughter of the infants in Bethlehem by HEROD (Matt. 2:18). The significance of this quotation is debated, but it may express an eschatological hope: "The tears of the Exile are now being 'fulfilled'—i.e., the tears begun in Jeremiah's day are climaxed and ended by the tears of the mothers of Bethlehem. The heir to David's throne has come, the Exile is over, the true Son of God has arrived, and he will introduce the new covenant…promised by Jeremiah [cf. Jer. 31:31 – 34; Matt. 26:28]" (D. A. Carson in *EBC*, 8:95).

Rachel's tomb. According to Gen. 35:19 – 20, JACOB set up a pillar over RACHEL's grave, a landmark still existing at the time of SAMUEL (1 Sam. 10:2). E. P. Eddrupp noted: "As Rachel is the first related instance of death in childbearing, so this pillar over her grave is the first recorded example of the setting-up of a sepulchral monument" (*A Dictionary of the Bible*, ed. W. Smith [1863], 2:989).

Many scholars think that the Bible presents two divergent traditions with regard to the site of the grave. S. H. Hooke argued that (a) according to several passages (Gen. 35:16; 1 Sam. 10:2; Jer. 31:15), EPHRATH, the stated site (Gen. 35:19), lay on the N border of the tribe of BENJAMIN, c. 10 mi. N of JERUSALEM; but (b) according to two passages (Gen. 35:19 and 48:7), it was near BETHLEHEM, presumably S of Jerusalem (*HDB* rev., 830). Moreover, the traditional site is just N of Bethlehem, some 4 mi. S of Jerusalem. S. V. Fawcett added that Matthew's quotation of Jer. 31:15 with reference to the slaughter of the infants around Bethlehem (Matt. 2:16 – 18) would indicate that Matthew accepted the traditional view (*IDB*, 4:5). Regarding the identification of Ephrath with Bethlehem as a late, erroneous gloss, both of these scholars rejected the traditional site and preferred an unidentified Ephrah in the N of Benjamin.

However, the three verses cited supporting a location N of Jerusalem do not contradict the clear statements in Gen. 35:19 and 48:7. (1) Gen. 35:16 reads literally, "there was still a stretch of land to go to Ephrath," a statement that implies a site S of Jerusalem. (2) 1 Sam. 10:2 says that it was located on the border (Heb. *gĕbûl H1473*) of Benjamin. This could refer to Benjamin's S border just S of Jerusalem (Josh. 15:8; 18:15 – 17), because the city mentioned in 1 Sam. 9, presumably close to the border, is not identified. Furthermore, the expression "by Rachel's tomb" (1 Sam. 10:2) need not be pressed, since otherwise the further definition "at Zelzah" (unidentified) would be superfluous. On the other hand, the traditional site may not be authentic: it appears to be too far S of Benjamin's border. (3) Finally, the statement in Jer. 31:15 furnishes no evidence that Rachel's tomb was in RAMAH, 5 mi. N of Jerusalem. The prophet may have evoked in sublime prosopopoeia Rachel bewailing her children at Ramah either because he foresaw that the captives of Judah and Benjamin would be brought to Ramah after the fall of Jerusalem before being led into exile (Jer. 40:1), or because Ramah was a height in the territory of Benjamin where the desolation of the land was visible.

JOSEPHUS and the TALMUD agree in placing her tomb near Bethlehem. ORIGEN, EUSEBIUS, and JEROME accepted this site. Later the pilgrims described it as a pyramid formed of twelve stones. The Crusaders rebuilt it, erecting a building 23 ft. square formed by four columns bound by pointed arches 12 ft. wide and 21 ft. high, the whole crowned by a cupola. In 1788 the arches were walled up, giving it the appearance of a *weli*. In 1841 Sir Moses Montefiore obtained for the Jews the key of *Qub-bet Rahil*, and added a poor square vestibule with a *mihrab* for Muslims (E. Hoade, *Guide to the Holy Land* [1946], 347).

B. K. WALTKE

Raddai rad'*i* (דַּדַּי *H8099*, "[Yahweh] rules"). Fifth son of JESSE and brother of DAVID (1 Chr. 2:14).

raft. See SHIPS.

Ragau ray'gaw. See RAGES; REU.

Rages rah'guhs (Ῥάγοι [some MSS Ῥάγα], from Old Pers. *Rägă*). A strategic road-center and strongly fortified city in NE MEDIA of the Persian empire. Rages is generally identified with the modern ruins of Ray (Rai, Rhay, Rhey), c. 5 mi. SE of modern Teheran. It was located just S of the high mountain range of Alborz bordering the Caspian Sea and controlled the Caspian Gates. The city was eleven days' journey from ECBATANA and was one of the oldest centers of civilization in Iran. Because of its location, Rages played an important part in the wars of Media and of ALEXANDER THE GREAT and his successors.

Rages is mentioned seven times in TOBIT, where it is usually called "Rages of Media." Tobit had left ten talents of silver at Rages (Tob. 1:14; 4:1, 20). His son Tobias, accompanied by the angel Raphael, started for Rages in quest of the money; it was finally recovered by the angel (5:5[6]; 6:9, 13; 9:2). The "Ragau" mentioned in JUDITH refers to the nearby territory around the Elburz mountain range (Jdt. 1:5, 15; Gk. *Ragau*; RSV, "Ragae"). (See A. V. Jackson, "A Historical Sketch of Ragha, the Supposed Home of Zoroaster's Mother," in *Spiegel Memorial Volume* [1908], 237 – 45; *University of Pennsylvania Bulletin*, 5/5 [1935]: 41 – 49; 6/3 [1936]: 79 – 87; 6/4 [1936]: 133 – 36; A. T. Olm-stead, *History of the Persian Empire* [1948], 30, 111, 114 – 15.)

D. E. HIEBERT

Raguel ruh-gy*oo'uhl* (רְעוּאֵל H8294, "friend of God"; Ῥαγουηλ). (1) KJV alternate form of REUEL (Num. 10:29).

(2) Ancestor of TOBIT and descendant of NAPHTALI (Tob. 1:1 NRSV, following CODEX SINAITICUS).

(3) Father of Sarah; the latter was given in marriage to Tobit's son, Tobias (Tob. 3:7, 17). Raguel features throughout the narrative (6:11 – 13; 7:1 – 15; 8:9 – 15; 10:7 – 13; 14:12 – 13).

(4) One of several archangels mentioned in the book of *1 Enoch* (20.4 et al.).

J. C. MOYER

Rahab ray'hab (רָחָב H8147, meaning uncertain; Ῥαχάβ G4829 [Matt. 1:5] and Ῥαάβ G4805 [LXX; Heb. 11:31; Jas. 2:25]). A prostitute of JERICHO, at whose house two spies stayed just prior to the conquest of Palestine by JOSHUA (Josh. 2:1 – 21).

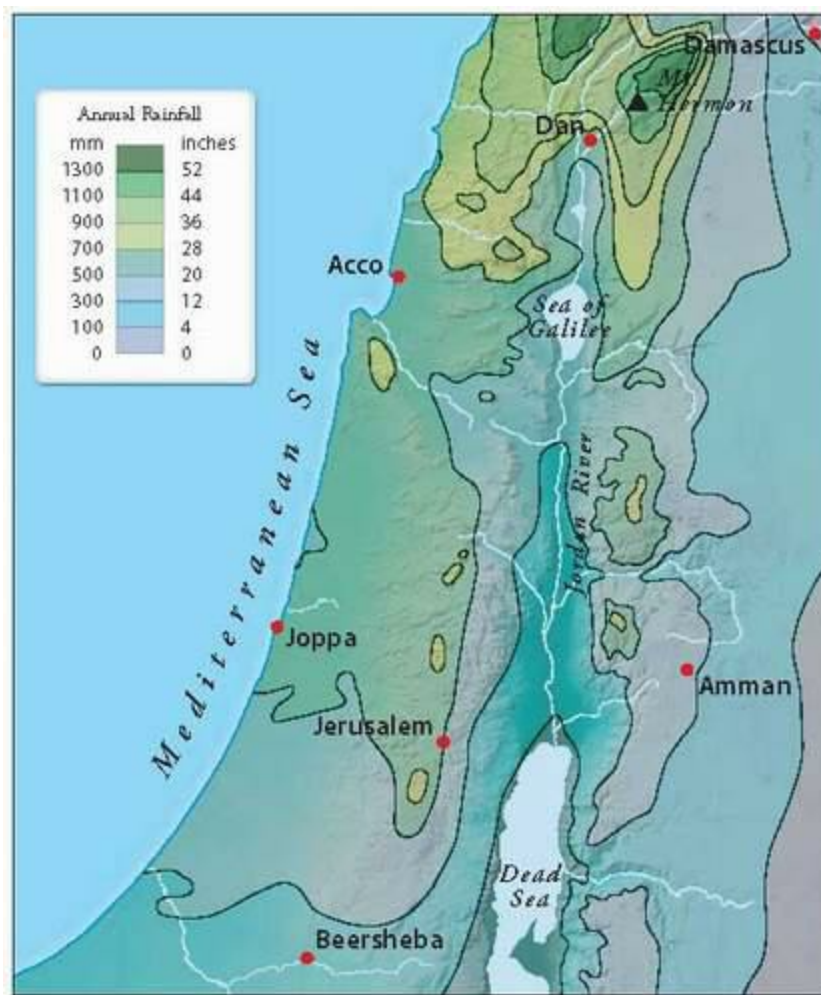
Terrified by the approach of the Israelites, she made an agreement with the spies to protect them if they would guarantee the safety of her family and herself. She concealed them from the agents of the king of Jericho, and helped them to escape through her window on the city wall. At the fall of Jericho, Joshua spared Rahab and her relatives (6:17, 22, 25). According to Matthew's GENEALOGY OF JESUS CHRIST, Rahab became the wife of Salmon (see SALMA) and the mother of BOAZ (Matt. 1:5). The author of Hebrews cites her as an example of FAITH (Heb. 11:31), and James refers to her demonstration of faith by good works (Jas. 2:25). (See M. L. Newman in *Understanding the Word: Essays in Honor of Bernhard W. Anderson*, ed. J. T. Butler et al. [1985], 167 – 81; *ISBE* rev. [1979 – 88], 4:33 – 34; *ABD*, 5:611 – 12.)

<div align="right">M. C. TENNEY</div>

Rahab (monster) ray'hab (רַהַב *H8105*, "assault, violence"). In the poetical books of the OT the name is applied to a monster or demonic power.

The allusions occur in the context of God's power in nature: he overcomes Rahab in a contest of force (Job 9:13; 26:12 [in parallel with "serpent," v. 13]; Ps. 89:10 [in parallel with "enemies"]; Isa. 51:9 [in parallel with DRAGON]). Each of these passages is connected with the providential act of God in restraining the sea, and as a demonstration of his supreme power. (See also LEVIATHAN; MYTH.) The concept was applied to the deliverance of Israel from Egypt, when God opened the waters of the sea to provide a safe passage for his people (Isa. 51:10). Possibly because of this association with the exodus, Rahab became a symbolic name for EGYPT. It is included in the list of hostile nations cited in Ps. 87:4, and it is specifically identified with Egypt in Isa. 30:7. (See AB*D*, 5:610 – 11; *DDD,* 684 – 87.)

<div align="right">M. C. TENNEY</div>

Raham ray'hum (רַחַם *H8165,* possibly "[God has shown] mercy," but this derivation is uncertain [for a meaning such as "girl-like," see BDB, 933]). Son of Shema and descendant of CALEB (1 Chr. 2:44). Some believe that Raham was the name of a town (understanding "father" in the sense of "founder").


Average rainfall in ancient Palestine.

Rahel ray'hel. KJV alternate form of RACHEL (only Jer. 31:15).

raiment. See DRESS; CLOTH.

rain. The limited rainfall in Palestine was of great importance to its inhabitants (note the various Hebrew terms used in Deut. 32:2). The annual amounts received in various parts of the country are described in the article PALESTINE (section V, "Climate"). The average figures, however, are liable to mislead, since totals vary greatly from year to year. In Jerusalem, for example, the long-term average is 26.1 in., but the maximum recorded in any one year is 40 in. and the minimum 12 in. With fluctuations of this magnitude in the total, the impact upon a society dependent for its livelihood on the land can well be imagined.

Most important to the farmer is the distribution of rainfall throughout the year. This distribution is very uneven indeed. No rain falls at all during the four hottest months of the year. The hot, dry summer is a common feature of most of the lands surrounding the Mediterranean; it is balanced by a cool wet winter, but, from the farmer's point of view, the two critical periods are the beginning and end of the wet season, when temperatures are high enough to promote growth and the soil is moist enough to work.

The farmer's year is therefore linked closely to the coming of the rains. In October these begin, generally with a series of thunderstorms, and plowing and sowing can then be started on the hard-baked soil. If the start of the rainy season is delayed, crop yields suffer; if the delay is a long one, crop failure may result. Hence, these "early rains" are of the utmost importance. At the other end of

the winter, rains continuing into late April and May, when temperatures are high, are of much more value than in January or February, when they are low; they increase yields for every day that the rains are prolonged. The farmer therefore hopes for the "latter rains."

This combination of early and late rains is referred to several times in the Bible. For example, the Lord promised the Israelites that if they obeyed his commands he would send "rain [*mātār H4764*]…in its season, the early rain [*yôreh H3453*] and the later rain [*malqôš H4919*]" so that they might have a full harvest (Deut. 11:13 – 14 NRSV [NIV, "both autumn and spring rains"]; cf. also Jer. 5:24; Hos. 6:3; Joel 2:23; Jas. 5:7). Also mentioned is the failure of the rains, as seen in the reference to FAMINE, an event never far from the thoughts of the inhabitants of Palestine, from the time of Abraham onward.

(See further N. Rosenau, "One Hundred Years of Rainfall in Jerusalem," *Israel Meteorological Service, Series A*, No. 13 [1955]; D. Baly, *The Geography of the Bible* [1957], chs. 4 – 6; G. Elbashan, "Monthly Rainfall Isomers in Israel, 1931 – 1960," *Israel Journal of Earth Sciences* 15 [1966]: 1 – 7; J. Ben-Yoseph, "The Climate in Eretz Israel during Biblical Times," *Hebrew Studies* 26 [1985]: 225 – 39.)

J. H. PATERSON

rainbow. A colorful arc formed by the prismatic refraction and reflection of sunlight in raindrops or mist. Such reflections are seen as concentric circles from an aircraft but as bows or arcs from the ground. The Hebrew word *qešet H8008* (lit., "bow") in Gen. 9:1 – 16 has been traditionally interpreted to mean the rainbow. The rabbis added the comment that the natural phenomenon was already in evidence, but that after the flood it was denoted the sign of the COVENANT (see FLOOD, GENESIS). There is some evidence that the Akkadian term *qaštu* with the determinative *kakkab* ("star") means "bow star" and is applied in the literature to the bright star Sirius, but the terms of the covenant (Gen. 9:8 – 17) lend weight to the traditional meaning "rainbow." This rainbow is a characteristic of heavenly scenes (Ezek. 1:28), and the notion is repeated in Revelation, which uses the standard Greek term for "rainbow," *iris G2692* (Rev. 4:3; 10:1).

W. WHITE, JR.

raisin cake. The Hebrew term ⟩ăšîšă *H862* (mistakenly rendered "flagon" by the KJV) refers to cakes that were formed after the grapes had completely dried; when coated, they were imperishable. More often than not such desiccated plant stuffs were soaked in water or broth and mixed with gruel made from some cereal grain for consumption. They often were compounded with other fruits, such as FIGS and DATES, and seasoned with salts or spices. Raisin cakes were used as cultic offerings by many ancient peoples (cf. Hos. 3:1) and appear in lists of commodities from various sea ports. They are mentioned as part of an offering meal for travelers and soldiers (2 Sam. 6:19; 1 Chr. 16:3). One passage (Isa. 16:7) prophesies that the Moabites will lament for the "raisin cakes" of KIR HARESETH; it is unclear whether the verse speaks of the destruction of the town's vineyards (perhaps more specifically of the loss of an important cultic food; cf. H. Wild-berger, *Isaiah 13 – 27* [1997], 146), or whether the prophet is playing on the word's similarity to the term for "man" (⟩îš *H408;* cf. NIV and note the parallel in Jer. 48:31, 36). Although frequently thought to be an aphrodisiac, there is only a remote allusion to this usage in the OT (Cant. 2:5).

Another Hebrew word, ṣimmûqîm *H7540,* which occurs four times (1 Sam. 25:18; 30:12; 2 Sam. 16:1; 1 Chr. 12:40), is translated as "clusters of raisins" by the KJV and other versions, but it too probably refers to raisin cakes (so NIV, NJPS; cf. *HALOT,* 3:1033).

Rakal ray'kuhl. TNIV form of Racal.

Rakem ray'kim. See Rekem (person) #3.

Rakkath rak'uhht (רַקַּת *H8395,* possibly "marshy bank"; cf. Rakkon). A fortified city within the tribal territory of Naphtali (Josh. 19:35). According to Jewish tradition, it was the place where later Tiberias was built, but modern scholars usually locate Rakkath a short distance NNW of Tiberias, identifying it with Khirbet el-Quneiṭireh (Tell Eqlatiyeh), a small ancient site on the W shore of the Sea of Galilee. Some believe that Rakkath and Kartan are the same place.

<div align="right">B. K. Waltke</div>

Rakkon rak'on (רַקּוֹן *H8378,* with definite article attached, meaning possibly "the narrow place" or "the shore" or "the marshy bank"; cf. Rakkath). Apparently a town near Joppa within the territory allotted to the tribe of Dan (Josh. 19:46). The location of such a town is unknown, although one proposal is Tell er-Reqqeit, c. 6 mi. N of Joppa. According to Z. Kallai *(Historical Geography of the Bible* [1986], 370), "the Rakkon" is actually a river, to be identified with modern Nahar el-Barideh. Some scholars, however, believe the text should be emended. Instead of the words "and Me [= waters] Jarkon and Rakkon" (MT, *ûmê hayyarqôn wĕhāraqqôn),* the Septuagint reads simply "and on the west *[lit.,* from the sea] Jarkon" *(kai apo thalassēs Ierakōn),* thus omitting Rakkon altogether. It is uncertain whether the original reading is preserved by the MT (in which case the Gk. translator [or the scribe of his Hebrew scroll] omitted the word by homoeoteleuton when his eye skipped from the end of *hayyarqôn* to the end of *wĕharaqqôn)* or by the LXX (in which case the MT's Rakkon should be interpreted as a scribal dittography or doublet of Jarkon). See also Me Jarkon.

ram (animal). See Sheep.

Ram (person) ram (רָם *H8226,* prob. "[God] is exalted"; Ἀράμ, *G730).* (1) Son of Hezron, descendant of Judah through Perez, and ancestor of King David (Ruth 4:19; 1 Chr. 2:9 – 10). Ram is included in the genealogy of Jesus Christ (Matt. 1:3 – 4 [KJV and other versions, "Aram"]; Lk. 3:33 [NRSV, "Arni, & following a B and other MSS]).

(2) Firstborn son of Jerahmeel and descendant of Judah (1 Chr. 2:25, 27). This Ram is apparently the nephew of #1, above (i.e., Jerahmeel's brother, 2:9).

(3) Apparently the head of a clan; Elihu, the last speaker in the book of Job, is described as belonging to "the family of Ram" (Job 32:2).

<div align="right">J. C. Moyer</div>

ram, battering. See Armor, arms.

Rama ray'muh. KJV NT form of Ramah.

Ramah ray'muh (רָמָה *H8230,* with the definite article attached [except Neh. 11:33, Jer. 31:15], meaning "the height" or "the hill"). A fairly common geographical name given to several towns in

ancient Israel; these were usually situated on some lofty perch.

(1) In NAPHTALI. This city is mentioned once (Josh. 19:36). E. Robinson *(Biblical Researches in Palestine, Mount Sinai and Arabia Petraea,* 3 vols. [1841], 3:79) was apparently the first modern scholar to note that the name is preserved in that of the village er-Rameh, about 8 mi. WSW of Safad (present-day Zefat) and 9 mi. E of ACCO. The situation of this Arab town (Christian and Druze) is topographically remarkable; it sits on the lower slope of Jebel Heider (today Har Ha,ari) near the pass that separates that mountain from the other hills in the high ridge that rises sharply from the Wadi esh-Shaghur (the Beth Kerem mentioned in rabbinic literature, e.g., *m. Middot* 3:4) to form a massive wall between Lower GALILEE on the S and Upper Galilee on the N. Thus er-Rameh stands on the natural dividing line between those two regions; it is also near the junction of the Acco-Safad road with the route leading S to NAZARETH.

The biblical context in which Ramah appears conforms to the geographical location of er-Rameh; the towns listed before Ramah are in Lower Galilee, and those that follow it are in Upper Galilee (even HAZOR, which was bound to have been more closely attached to the latter though it was in the Huleh Valley). The terms Upper and Lower Galilee are not recorded in the Bible, but the distinction is obvious in the topography; furthermore, the order of Naphtali's cities in this list certainly reflects a knowledge of the two regions. JOSEPHUS (*War* 3.3.1 §39) was well aware of that division and placed the demarcation line at the northern Beersheba, today Khirbet Abu esh-Shiba, which stands on a high hill just 3 mi. E of er-Rameh. Such a strong position would naturally be cited by the military commander of Galilee who was concerned with fortifying the strategic points. On the other hand, the rabbis, who were interested in matters of everyday life, gave as the boundary point between the two Galilees a rural center known for its market and its religious leaders, namely, Kefar Hananiah (Kefr ʿInan, a village in the valley below Beersheba, *m. šebiʿit* 9:2).

In the village of er-Rameh, the ancient remains (including an Aram. inscription "In memory of Rabbi Eleazer son of Tedeor, who built this guest house") date to the Roman and Hellenistic periods. As for the biblical Ramah, its actual site was at Khirbet Zeitun er-Rameh, also known as Khirbet Jul, an ancient mound about 2 mi. E of er-Rameh on the S side of the Safad road. It is a typical tell of Iron Ages I and II, located on a rocky outcrop in the valley. The exact limits of the ancient settlement are hard to determine today since the whole area is covered by the famous olive orchards of this region. (On the inscription, cf. J. Ben-Zvi in *JPOS* 13 [1933]: 94-96; A. Marmorstein in *PEQ* no vol. [1933]: 100-101. See further Y. Aharoni, *The Settlement of the Israelite Tribes in Upper Galilee* [1957], 2, 76, 78, 81, 86; M. Avi-Yonah, *The Holy Land* [1966], 133 – 35.)

Cities named Ramah in the Promised Land.

(2) In ASHER. The boundary description of the Asher tribe, the exact line of which is difficult to follow, apparently places the town of Ramah somewhere between Great SIDON and "the fortified city of Tyre" (Josh. 19:29). This latter place is known in nonbiblical sources by the name *Usū* (Assyrian spelling, *Ushū)* and was located at Tell Rashidiyeh, the classical *Palaityros* (Strabo, *Geogr.* 16.2.24). Therefore, this Ramah should most likely be sought in the area NW of modern TYRE, but the precise location is unknown. The oft-proposed identification with the small village of er-Ramiyeh seems out of the question because it is too far S. (See further Robinson, *Biblical Researches,* 3:64; A. Alt in *ZAW* 4 [1927]: 59–81; R. Dussaud, *Topographie histo-rique de la Syrie antique et medievale* [1927], 11; M. Noth in *ZDPV 58* [1935]: 185–255, esp. 222 – 23; Aharoni, *The Settlement of the Israelite Tribes in Upper Galilee,* 88.)

(3) In BENJAMIN (Josh. 18:25). The evidence for the identification of this town is some of the most conclusive for any site in Israel. It is clearly to be located close to BETHEL (Jdg. 4:5), the modern Beitin, on the ancient trunk road leading N from BETHLEHEM and passing to the W of JERUSALEM (19:13). Josephus *(Ant.* 8.12.3 §303–6), in discussing the events of 1 Ki. 15:16–17, places the town, which he calls *Ar[a]mathōn),* forty stades (c. 5 Rom. mi., or 4.6 Eng. mi.) from Jerusalem; whereas EUSEBIUS and JEROME put it at 6 Rom. mi. N of the Holy City *(Onomasticon,* 144.15 – 16; 145.13–14). Robinson noted that the name is preserved at the modern village of er-Ram, which is 5.5 mi. N of Jerusalem.

The prophetess DEBORAH exercised her authority as a judge in Israel at a place between Bethel and Ramah (Jdg. 4:5). Instead of turning in to spend the night at GIBEAH, the Levite from the hill country of Ephraim could have gone on a little way farther to Ramah (19:13). In addition to standing

on the N –S highway, er-Ram is also within striking distance of the E –W road from Jerusalem via GIBEON and the descent of BETH HORON to GEZER. During the monarchy, the hostile act of BAASHA consisted in the establishment of a strong point at Ramah that could effectively block traffic to and from Jerusalem along this vital route (1 Ki. 15:17; 2 Chr. 16:1). In retaliation, ASA persuaded the Syrians to attack Israel from the N; by thus relieving pressure on the front with Judah, he was able to dismantle the fortification at Ramah and to use the building blocks for constructing two new forts of his own at GEBA and MIZPAH.

Thus the boundary between Judah and Israel was fixed at a line dissecting the former tribal inheritance of Benjamin in half (1 Ki. 15:17 – 22; 2 Chr. 16:2 – 6). The partition of Benjamin in this manner is reminiscent of the division reflected in Josh. 18:21 – 28, where Ramah belongs to the southernmost district. A brief oracle by Hosea against Gibeah, Ramah, and BETH AVEN is apparently directed at Benjamin, perhaps with particular reference to this "Judahite" half of the tribe (Hos. 5:8). When one column of SENNACHERIB's army was evidently storming southward from Samaria toward Jerusalem, Ramah stood in the direct line of the Assyrian advance (Isa. 10:29). Jeremiah describes Ramah as the scene of RACHEL's weeping for her children (Jer. 31:15; cf. Matt. 2:18 [KJV, "Rama"]).

Some of Ramah's former residents were among the postexilic returnees (Ezra 2:26; Neh. 7:30; called "Kirama" [KJV, "Cirama"] in 1 Esd. 2:26). The town is also mentioned in the list of settlements (11:33), which largely pertained to places outside of the Yehud province; therefore, it might be supposed that Ramah was one of those towns in which some portion of the population had maintained a foothold during the time when the main body of Judeans were in exile. (See further Robinson, *Biblical Researches*, 1:576; H. Vincent in *RB* 16 [1907]: 410 – 12; W. F. Albright in AASOR 4 [1924]: 134 – 40; Z. Kallai-Kleimann in *VT* 8 [1958]: 134 – 60.)

It is most likely that Ramah of Benjamin was the birthplace of SAMUEL the prophet. The home of ELKANAH and HANNAH is called *hārāmātāyim ṣôpîm* (1 Sam. 1:1), but the Hebrew construction is somewhat awkward. Since Elkanah was a descendant of ZUPH, a Levite of the Kohathites (1 Chr. 6:35) who had settled in N Benjamin (1 Sam. 9:5; cf. Josh. 21:5; 1 Chr. 6:22 – 26, 35, 66 – 70), it would appear that the correct understanding of the name in 1 Sam. 1:1 is "Ramathaim of the Zuphite(s)." The *-aim* sufformative is probably to be understood as a locative rather than a simple dual suffix (cf. GITTAIM et al.). All of the other references to Samuel's home town (except 25:1 and 28:3) happen to have the locative sufformative *-ă* resulting in the form *hārāmātă*; the SEPTUAGINT renders this name *Armathaim,* or *Armathem,* even inserting it in 1 Sam. 1:3 after "his city."

The identity of Ramathaim Zophim with Ramah is confirmed by a comparison of 1 Sam. 1:1 with 1:19 and 2:11. Although Samuel was born there, he grew up at SHILOH but returned to his home when the latter was abandoned as the religious center of Israel. At Ramah he made his headquarters, and from there he went on his annual circuit to Bethel, Gilgal, and Mizpah (1 Sam. 7:15 – 17). The elders of Israel came to him at Ramah when making their request for a king (8:4). It was doubtless at Ramah in "the land of Zuph" that SAUL first encountered Samuel and was secretly anointed king (9:5—10:10). The probable association of Rachel's tomb with Ramah in Benjamin (Jer. 31:15; Matt. 2:18; cf. Gen. 35:16 – 20) suits the description of Saul's homeward journey (1 Sam. 10:2 – 5, 10). Samuel continued to dwell at Ramah even after he had severed his relations with Saul (15:34; 16:13). Here DAVID sought refuge from Saul, whose attempts to have the renegade prince arrested were brought to naught (19:18 – 24). This passage also confirms the existence of a place called NAIOTH at Ramah (19:19, 22 – 23; 20:1), which probably represented a quarter or settlement, in this case inhabited by a band of prophets. Finally, Ramah became the last resting place of the prophet Samuel (25:1; 28:3).

Noteworthy for the identification with Ramah of Benjamin is the fact that Josephus refers to Samuel's home as *Armatha* (*Ant.* 6.3.3 §35 et al., with minor spelling variations), whereas he uses *Armathōn* in the only other context where he refers to Ramah (*Ant.* 8.12.3 §303 – 6; cf. above). These forms have led to the identification by Eusebius (*Onom.* 32.21 – 23) of Ramathaim with the NT ARIMATHEA, which he located at *Remphis* (modern Rentis in the district of Diospolis-Lod; cf. *Onom.* 144.27 – 29). Eusebius did not make the connection between Ramah of Benjamin and Ramathaim-Arimathea; instead he equated the latter with the Arumah (*Rouma*, ibid.) of Jdg. 9:41 (LXX *Arima* [CODEX ALEXANDRINUS], *Arēma*). Whether Arimathea is to be placed at Rentis or not, Arumah is most likely Khirbet el-ʿOrmah (5 mi. SE of SHECHEM).

Nevertheless, Eusebius's association of Rama-thaim and Arimathea with Rentis is strengthened by the fact that a municipal district lying between Lydda (LOD) and APHAIREMA had the name *Ramathain* (Jos. *Ant.* 13.4.9 §127, where the MSS have such variants as *Ramatha* and *Armathaim*; 1 Macc. 11:34 reads *Rathamin*, but with the important variants *Ramathaim* and *Ramathem*). Thus it seems certain that a town called Haramatha(im) did exist at Rentis; the NT Arimathea may have been here (the late Medieval Christian tradition placing it at Ramleh is, of course, quite absurd, since the latter was only founded in A.D. 716 by Khaliph Suleiman; the name is derived from Arab. *raml*, "sand"), but the OT references to Samuel's home point rather to a site in the hill country N of Jerusalem, that is, to an identification with Ramah of Benjamin. (See further S. R. Driver, *Notes on the Hebrew Text and the Topography of the Books of Samuel* [1913], 1 – 4; H. W. Wiener in *JPOS* 7 [1927]: 109 – 11; F. M. Abel, *Géographie de la Palestine* [1938], 2:428 – 29.)
This minaret tower in the modern village of er-Ram identifies the ancient site of Ramah of Benjamin, the prophet Samuel's hometown.

(4) In the NEGEV. A town mentioned in the description of SIMEON's tribal inheritance (Josh. 19:8). The MT states that the towns of Simeon and their respective villages extended "as far as Baalath Beer, Ramath Negev" (*rāʾmat negeb*; KJV, "Ramath of the south"; NIV, "Ramah in the Negev" within parentheses). The Greek MSS show some confusion in the text: CODEX ALEXANDRINUS

reads, "as far as Baalath Beer Ramoth, going to Bameth towards the south," whereas CODEX VATICANUS has, "as far as Barek, going to Bameth towards the south." The SEPTUAGINT translation of the geographical term "Negev" by a directional one ("south") must be disregarded; it is more likely that the Hebrew "Ramath Negev" stands as an adverbial accusative of direction. The verse may thus be rendered: "as far as Baalath Beer (in the direction of) Ramath Negev."

Such an interpretation obviates two conjectures previously proposed, namely, that the reference is to the S boundary of Simeon's settlement (W. F. Albright in *JPOS* 4 [1924]: 161), or that Ramath Negev should be equated with Baalath Beer (F.-M. Abel, *Géographie de la Palestine* [1938], 2:258; cf. NIV). In the parallel passage (1 Chr. 4:33), the MT has simply "as far as Baal" (some LXX MSS read *Balat* or *Balaad*); and Ramath Negev is also missing from the roster of settlements in the Negev of JUDAH (Josh. 15:21 – 32), which included Simeon. On the other hand, it seems likely that this town appears as Ramoth Negev (1 Sam. 30:27), one of the places to whose elders DAVID sent some of his spoil from the Amalekites. There is no indication of its locale.

One of the OSTRACA discovered in Tell ⟨Arad (see ARAD) raises anew the whole question of the identification and location of Ramath/Ramoth Negev. The legible portion of the text (on the reverse) reads as follows: "[…] from Arad…and from […], and you [pl.] shall send them to Ramoth [or Ramath] Negev under the command of Malchiah son of Qerab,ur and he will commit them into the charge of Jeremiah the son of Elisha in Ramoth Negev lest something should happen to the city. And the king's word is stringently incumbent upon you. Behold, I have sent to admonish you. Get the men to Elisha! Lest Edom should come there." (See Y. Aharoni in *BASOR* 197 [Feb. 1971]: 16 – 42.)

The epistle is obviously a memorandum from a higher authority demanding confirmation of a previous order by the king that troops be sent from Arad and some other place to Ramoth Negev. The transfer of these forces was for the purpose of warding off an impending Edomite attack (another ostracon found earlier at Tell <Arad referred to a certain Malchiah in conjunction with Edom, the king of Judah [unnamed] and some evil that was coming upon the land; perhaps the two letters relate to the same event, but this is far from certain). The script of the Ramoth Negev ostracon dates it to the end of the Judean monarchy (i.e., it is contemporary with the LACHISH letters and the seventeen texts in the Eliashib archive found at Arad in 1964). The Edomite threat to Ramoth Negev probably corresponds to the situation depicted in Ps. 137:7 and Obad. 10 – 14, according to which EDOM took advantage of Judah's downfall in 586 B.C. to pillage the hapless settlements in Cisjor-dan. Obadiah's prophetic retribution called for a reversal of this deed: "People from the Negev will occupy the mountains of Esau" (v. 19).

Current speculation about the identification of Ramoth Negev centers on Khirbet Ghazzeh (□orvat⟨Uza) at the eastern edge of the Negev of Judah, some 20 ESE of BEERSHEBA, guarding a major route from Edom (Y. Aharoni, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 441; however, see KINAH); besides the casemate fortress there from Iron Age II, a certain quantity of Iron I sherds has also been found in the general vicinity (cf. I. Beit-Arieh, *Horvat⟨Uza and Horvat Radum: Two Fortresses in the Biblical Negev* [2007]). On the other hand, the lofty commanding position of Khirbet Gharreh (Tel⟨Ira) and its location in the center of the Negev of Judah (i.e., on the fringe of Simeon's inheritance) are strong arguments in favor of the latter's candidacy (see now Y. Aharoni et al., *The Carta Bible Atlas*, 4th ed. [2002], 216).

(5) In GILEAD. The name Ramah occurs as the short form of RAMOTH GILEAD in one context (2 Ki. 8:29 = 2 Chr. 22:6; the NIV reads "Ramoth").

A. F. RAINEY

Ramath ray'muhth. See RAMAH #4; RAMATH LEHI; RAMATH MIZPAH.

Ramathaim-zophim ram'uh-thay'im-zoh'fim. See RAMAH #3.

Ramathem ram'uh-thim. KJV Apoc. variant of RATHAMIN (1 Macc. 11:34).

Ramathite ray'muh-th*i*t (רָמָתִי *H8258*, gentilic of רָמָה *H8230*). A native of RAMAH. DAVID's vinedresser was known as "Shimei the Ramathite" (1 Chr. 27:27), but which of the several towns that bore this name is meant cannot be determined.

Ramath Lehi ray'muhth-lee'h*i* (רָמַת לֶחִי *H8257*, "jawbone hill"). The scene of SAMSON's rout of the PHILISTINES with the jawbone of a donkey for a weapon (Jdg. 15:17). See LEHI.

Ramath Mizpeh ray'muhth-miz'puh (רָמַת הַמִּצְפֶּה *H8256*, "hill of the watchtower"). A town assigned to the tribe of GAD in the division of Palestine (Josh. 13:26). It is mentioned between HESHBON and BETONIM when delineating the Gadite territory E of the JORDAN and perhaps should be identified with MIZPAH #2 (for a summary of proposals, see *ABD*, 5:617).

Rameses ram'uh-seez (רַעְמְסֵס *H8314* רַעַמְסֵס in Exod. 1:11], from Egyp. *R῾mśś*, short form of *Pr-R῾mśśw*, "[house of] Ramses"). KJV and other versions have Raamses once (Exod. 1:11; cf. also NJPS at 12:37). The usual orthographic distinction in English between the name of the city (Rame-ses or Raamses) and the name of some pharaohs (Ramesses or RAMSES) has no basis in the Egyptian language. According to Gen 47:11, JACOB and his sons were given "property in the best part of the land, the district of Rameses," apparently a term equivalent to "the region of Goshen" (45:10 et al.; see GOSHEN), where the city of Rameses was located. Rameses and PITHOM are named as the store cities that the Hebrews built (Exod. 11:1), and it was from Rameses that they began their journey out of Egypt (12:37; Num. 33:3, 5).

Rameses (Pi-Ramessē or Per-Ramesses) was the residence city of the 19th and 20th Egyptian dynasties in the NE NILE delta. Its location has been much debated: some place it at Tanis (ZOAN, S of Lake Menzaleh) and others c. 17 mi. farther S near Qantir (Tell el-Dab῾a, site of the earlier HYKSOS capital, Avaris). Tanis was advocated by its excavator P. Montet (in *RB* 39 [1930]: 5 – 28) and by A. H. Gardiner (in *JEA* 19 [1933]: 122 – 28), mainly on the sheer quantity of monuments of Ramses II found there (blocks, columns, statues, stelae, obelisks); if this was not Pi-Ramessē, what was it called in that period?

A portion of the granary excavation at Tell el-Daba. This site should probably be identified with Rameses (Pi-Ramessē), the city built by the Israelites during their captivity in Egypt.

The case for Qantir was proposed by M. Hamza on the basis of vineyard OSTRACA found there that include the name Pi-Ramessē *(Annales du Service des Antiquités de l'Égypte* 30 [1930]: 31 – 68). Subsequently, L. Habachi assembled from the Qantir district a whole series of doorways from houses of officials of Ramses II and III, and showed that the "Horbeit stelae" actually originated from Qantir, where it witnessed to a garrison and cult of Ramses II (ibid., 52 [1954]: 443–47,500, 510–14, 545–59). Then S. Adam excavated the remains of a colossus of Ramses II, appropriate to a major temple there (ibid., 55 [1958]: 318–24). Thus, like Tanis, Qantir has Ramesside remains of considerable importance, but (unlike Tanis) it has never been fully excavated.

Several factors clearly favor Qantir as the probable site of Rameses. First, nothing of Ramesside (or earlier) date at Tanis was found *in situ*—all was reused by later kings (L. Habachi, private communication; J. van Seters, *The Hyksos* [1966], 129–31). Neither palaces nor tombs were found, in contrast to Qantir, whence came a tiled palace-doorway of Sethos I (now in the Louvre), and similar tiles of Ramses II. Second, Pi-Ramessē was situated on the Waters of Ra, that is, the Bubastite-Pelusiac (old eastern) arm of the Nile, navigable from the sea—true of Qantir in antiquity, but not of Tanis. Third, the fertility of the Rameses region indicated in contemporary papyri *(e.g., ANET,* 471) agrees well with Qantir but not with the salt flats of Tanis. Fourth, Pi-Ramessē and Tanis occur as separate entities (##410 and 417) in the Onomasticon list (A. H. Gardiner, *Ancient Egyptian Onomastica,* 2 [1947], 171*ff., 199*ff.), which does not favor identifying them. Fifth, Rameses was at the head of the main route to Palestine via Sile (near modern Qantara), fitting Qantir but not Tanis. Sixth, Qantir as Rameses agrees better with other requirements of the route of the exodus, such as SUCCOTH (see EXODUS, THE). This identification is now generally accepted (cf. E. P. Uphill, *The Temples of Per Ramesses* [1984]; M. Bietak, *A varis, the Capital of the Hyksos: Recent Excavations at Tell el-Dab(a* [1996]).

K. A. KITCHEN

Ramesses ram'uh-seez. See RAMSES.

Ramiah ruh-m*i*"uh (רְמִיָה *H8243,* "Yahweh is exalted"). One of the descendants of PAROSH who agreed to put away their foreign wives (Ezra 10:25).

Ramoth (person) ray'moth (רְמִיָה H8238 [not in NIV], possibly "heights"). One of the descendants of BANI who agreed to put away their foreign wives (Ezra 10:29 KJV, following the *Qere;* NIV and other versions follow the *Ketib,* JERAMOTH).

Ramoth (place) ray'moth (רָאמוֹת H8030, "heights"). (1) Short form of RAMOTH GILEAD (Deut. 4:43; Josh. 20:8; 21:38; 1 Chr. 6:80 [Heb. 6:65]).

(2) A city in the NEGEV to which DAVID sent gifts after his devastating attack upon the camp of the Amalekites (1 Sam. 30:27).

(3) A town within the tribal territory of ISSA-CHAR that was designated a Levitical city for the descendants of GERSHON (Gershom, 1 Chr. 6:73). It is doubtless the same as JARMUTH (Josh. 21:29) because it occupies the same position in the list of Levitical cities and there are many other discrepancies between the two rosters (cf. Y. Aharoni, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 301 – 5). Moreover, Ramoth is probably the same as REMETH (Josh. 19:21). A stela of Seti I (1309 – 1290) states that the ʿApiru (see HABIRU) from Mount Yarmuta had attacked the Asiatics (*ANET*, 255). Mount Yarmuta is doubtless to be associated with Jarmuth-Remeth-Ramoth of Issachar, that is, in the elevated region NW of BETH SHAN. Thus the form Jarmuth is probably more original than Ramoth. W. F. Albright (in *ZAW* 44 [1926]: 231) suggested as the site Kaukab el-Hawa, the Crusading Belvoir, located some 6 mi. NNE of Beth Shan on a plateau 999 ft. above sea level in a region of springs.

Ramoth Gilead.

Ramoth Gilead ray'muhth-gil'ee-uhd (רָמוֹת גִּלְעָד *H8240*, "heights of Gilead"). Under Solomon's administration Ramoth Gilead was designated as the center of the district that was E of the Jordan and extended N of the Yarmuk (1 Ki. 4:13). This town was one of the cities of refuge (Deut. 4:43; Josh. 20:8) assigned to the Levites descended from Merari in the tribal territory of Gad (Josh. 21:38; 1 Chr. 6:80). A frontier town, Ramoth Gilead was a key military outpost in the wars between Aram and Israel; Ahab was killed in battle there (1 Ki. 22:3 – 40; 2 Chr. 18). Some time later, Ahab's son Joram (Jehoram) was wounded in a battle at Ramoth Gilead, then Jehu was anointed king there by one of Elisha's young prophets (2 Ki. 8:28—9:14).

The location of Ramoth Gilead has been disputed. The *Onomasticon* of Eusebius places it near the Jabbok River some 15 mi. W of Philadelphia (modern Amman, biblical Rabbah). The lists of Solomon's administrative centers and the accounts of the war with Syria suggest a site more to the N. The imposing site of Huṣn Ajlun was suggested by W. F. Albright as a possible location, and N. Glueck's surface studies seemed to support this possibility. However, the 1967 excavation of Tell Ramith (er-Rumeith) conducted by P. Lapp uncovered evidence that provides a strong case for the identification of this site with Ramoth Gilead. Ramith is c. 17 mi. NE of Jabesh Gilead, 8 mi. SE of Beth Arbel, and 3 mi. S of modern Ramtha. The continuity of the name and the geographic location have been noted as significant. The parallels between the literary record and the occupational history (as determined by excavated architectural evidence and artifacts) support the view that Ramith corresponds with Ramoth Gilead. This identification is now generally accepted. (See *NEAEHL*, 4:1291 – 93.)

H. Jamieson

rampart. This English term is used occasionally in Bible versions, primarily to render Hebrew ḥêl *H2658* (from a root meaning "to go around"). It is used of the bulwarks surrounding Zion (Ps. 48:13), and figuratively of the sea as a physical barrier protecting Thebes (Nah. 3:8 NRSV; NIV, "defense"). It is used also of a moat referring to both the walls and the water-filled ditch at Beth Maacah (2 Sam. 20:15 NRSV; NIV, "fortifications"). The northern side of ancient Jerusalem above the Valley of Hin-non was protected by such a wall (Lam. 2:8). Most of these walls, as at Jericho, were built up of tamped earth and in later periods faced with stone blocks.

W. White, Jr.

Ramses ram'seez (Egyptian *Rˁ-ms-sw*, meaning "Re is the one who created him"; cf. Rameses). Also Ramesses. The name of eleven pharaohs of Egypt; it was also the epithet of two others.

I. Nineteenth dynasty

A. Ramses I. Founder of the 19th dynasty, from N Egypt and from a military family. Elderly at accession, he reigned only sixteen months and was notable as the father of the redoubtable Sethos I.

B. Ramses II. Reigned sixty-six years (either 1304 – 1238 or 1290 – 1224 B.C.). Son of Sethos I and Queen Mut-tuy, both of military background (cf. G. A. Gaballa and K. A. Kitchen, *Chronique d'Égypte* 43/85 [1968]); and like Queen Hatshepsut and Amenophis III, he used the myth of the divine

birth of Pharaoh to emphasize the legitimacy of his kingship (cf. G. A. Gaballa, *Orientalia* 36 [1967]: 299 – 304, plates 63 – 65).

Ramses II battled long against the HITTITES in SYRIA. In his fourth year, he probably weaned the kingdom of Amurru from their sway. In year 5, he marched against KADESH ON THE ORONTES straight into a Hittite trap, but extricated himself by remarkable personal valor and the timely arrival of auxiliaries. The famous battle received epic treatment in scenes and texts on temple walls; politically, it was a setback, but it was redeemed by Ramses' personal heroism and by his subsequent campaigns (years 8, 10, etc.). His conquests also extended into SEIR and MOAB, including Dibon and (Raba)-Batora(?). The Hittites faced threats from Assyria and elsewhere, and both powers tired of the conflict. So, in his year 21, Ramses II sagely made peace with Hattusil III by a treaty of alliance faithfully honored thereafter (cf. *ANET*, 199 – 203). The peace was cemented by Ramses' marrying in year 34 a daughter of Hattusil, and still later a second Hittite princess. (See further J. A. Breasted, *Ancient Records of Egypt: Historical Documents from the Earliest Times to the Persian Conquest*, 5 vols. [1906 – 7], 3, §§410, 415 – 24, 427 – 28; K. A. Kitchen in *JEA* 50 [1964]: 68 – 69, and 52 [1966]: 47 – 70.)

In sheer quantity, the buildings of Ramses II surpass those of all other pharaohs. Suffice it to recall his ambitious capital on the NILE delta, Pi-Ramessē (biblical RAMESES), his completing the vast Hypostyle Hall (134 columns, nave 80 ft. high) at THEBES in the Karnak temple of the god Amun (see AMON #4), the erection of the Ramesseum, his funerary temple containing a 1,000-ton colossus (Shelley's Ozymandias), on the Theban W bank, and finally in Nubia the two spectacular rock temples at Abu Simbel (in modern times moved piecemeal to safety because of the new Nile high dam; see M. Peters-Destéract, *Abou Simbel, à la gloire de Ramsès* [2003]). Internally, Ramses' reign was an era of peace and considerable prosperity; the impact of his image on later Egypt may be judged from the adoption of his name by almost a dozen later kings. On the intellectual plane, literature flourished; besides stories, love lyrics, and the Kadesh battle poem, one may note the Satirical Letter (Papyrus Anastasi I) showing its author's knowledge of Canaan (*ANET*, 475 – 79). Ramses II may have been the pharaoh of the exodus; his proud self-confidence would fit the king of Exod. 5 – 12 (see EXODUS, THE). (See further K. A. Kitchen, *Pharaoh Triumphant: The Life and Times of Ramesses II, King of Egypt* [1983]; C. Lalouette, *L'empire des Ramsès* [1985]; C. Jacq, *Ramsès*, 2 vols. [1998]; J. A. Tyldesley, *Ramesses: Egypt's Greatest Pharaoh* [2000]; C. Lalouette, *Le monde des Ramsès* [2002]; M. Van de Mieroop, *The Eastern Mediterranean in the Age of Ramesses II* [2007].)

This limestone colossus of Ramses II at the Memphis museum in Egypt is over 40 ft. long.

C. Ramses-Siptah. This pharaoh, who changed his name to Mereneptah-Siptah, reigned six years at the end of the dynasty and died young. Powers behind his throne were the dowager queen Tewos-ret and the chancellor Bay (of Syrian origin, with the powers of a Joseph; see A. H. Gardiner in *JEA* 44 [1958]: 12 – 22).

II. Twentieth dynasty

A. Ramses III. Son of Setnakht, who founded the dynasty. Ramses III reigned thirty-one years and fought three epic battles to deliver Egypt from threats of invasion. In year 5, he fended off the Libyans, but indecisively. In year 8, he fought a remarkable amphibious action in S Palestine and the E delta mouths against the SEA PEOPLES including the PHILISTINES, repulsing their army and destroying their fleet. In year 11, he finally defeated the Libyans more effectively. He also found occasion to fight in EDOM (Seir, cf. *ANET*, 262a). At first, as the last great pharaoh of the empire, he outwardly maintained its façade. The end of his reign saw the onset of internal administrative decay that grew apace under his successors, and his closing years were marred by an attempted assassination. This king consciously modeled himself on Ramses II, for example, in style of titulary, and even in the names of his sons. The most important building of this reign was his great funerary temple in W Thebes (Medinet Habu, superbly published by the Oriental Institute in Chicago as *Medinet Habu*, 8 vols. [1930 – 70], and *The Excavation of Medinet Habu*, 5 vols. [1934 – 54]; outline reports in *Oriental Institute Communications*, nos. 5, 7, 10, 15, 18; historical texts are translated by W. F. Edgerton and J. A. Wilson, *Historical Records of Ramses III* [1936]).

Inside the entry hall of the tomb of Ramses III, in the Valley of the Kings.

B. Ramses IV. This pharaoh reigned only six years, though according to a famous stela from Abydos he had prayed for a reign of sixty-seven years like Ramses II. He compiled a list of his father Ramses III's benefactions to Egypt's temples to support his succession; the Papyrus Harris is the longest Egyptian papyrus known (135 ft. long; translated in Breasted, *Ancient Records*, 4, §§151ff.).

C. Ramses V. Son of Ramses IV; he reigned only four years, dying of smallpox while still but a youth. His reign is famed for the vast Papyrus Wilbour, part of a land-survey of Middle Egypt, a document of immense value for study of administration and institutions (A. H. Gardiner, *The Wilbour Papyrus*, 4 vols. [1941 – 52]).

D. Ramses VI. Reigned at least seven years; he took over and completed his nephew Ramses V's tomb in the Theban Valley of Kings with important funerary texts.

E. Ramses VII. Reigned seven years; whether he preceded or succeeded the next king is uncertain.

F. Ramses VIII. An ephemeral ruler who reigned only three years.

G. Ramses IX. Reigned eighteen years. The high-priesthood of Amun at Thebes was ruled by one powerful family; administration was now so lax that even the tombs of the pharaohs themselves were being robbed. Jealousy between the mayors of E and W Thebes brought the scandal to light, leading to a royal commission reported on in a remarkable series of tomb-robbery papyri (see T. E. Peet, *The Great Tomb-Robberies of the Twentieth Dynasty* , 2 vols. [1930]; J. Capart et al. in *JEA* 22 [1936]: 169 – 93).

H. Ramses X. Of this reign of nine years, hardly anything is known.

I. Ramses XI. Last of his line, Ramses XI reigned at least twenty-seven years. The state was troubled by Libyan marauders and by civil war involving the viceroy of Nubia and perhaps the death or exile

of a high priest of Amun of Thebes. The acute weakness of the state was outwardly resolved by appointing two high officials under the king, one each for Upper and Lower Egypt. This was marked by a new era and year count from year 19, the so-called "Renaissance." In the S, one Herihor was army commander, high priest of Amun and vizier; he aspired to royal rank but achieved it only in name. His descendants became hereditary high priests of Amun, a state within the state, during the 21st dynasty, which partly explains Egypt's quiescence in foreign affairs early in the Hebrew monarchy. In the N, one Smendes was ruler and succeeded Ramses XI as king, to found the 21st dynasty, having (it seems) married a Ramesside princess.

III. Twenty-first dynasty and after. Psusennes I, c. 1040 B.C., occasionally adopted the double name Ramses-Psusennes, to stress his link (through Smendes) with the Ramessides, and so his legitimacy of rule. His successors were the contemporaries of DAVID and SOLOMON. The title "King's Son of Ramses" was a high honorific title in this and the two following dynasties. (For this period, cf. K. A. Kitchen, *The Third Intermediate Period in Egypt, 1100 – 650 B.C.*, 2nd ed. [1986]. For general works on the Ramessides, see W. C. Hayes, *Scepter of Egypt*, 2 [1959]; W. Helck, *Beziehungen Aegyptens zu Vorderasien* [1962]; K. A. Kitchen, *Ramesside Inscriptions Translated and Annotated: Notes and Comments* [1994 –]; *SacBr*, 91 – 99.)

<div align="right">K. A. KITCHEN</div>

ram's horn. See MUSIC, MUSICAL INSTRUMENTS IV.C.

rams' skins. The tanned skins of rams (Heb. ⁽*ōrōt*⁾*êlim H6425 + H380*), dyed red, were used as the third of four coverings over the TABERNACLE proper (Exod. 25:5; 26:14; 35:7, 23; 36:19; 39:34). Sheep skin, tanned with oil, is used today by Middle Eastern shepherds. It gives good protection against wind and rain. Syrians still dye rams' skins red, rubbing the tanned skin with a red dye solution. From it colorful shoes and saddles are made.

<div align="right">L.J . WOOD</div>

ransom. As a verb, this English term means "to free someone by paying a price," and it is used in modern Bible versions primarily to render Hebrew *pādă H7009*, "to buy out, deliver" (Lev. 19:20 et al.; KJV, "redeem"). As a noun, *ransom* refers to "that which is paid for someone's release," and it translates both Hebrew *kōper H4111* (Exod. 30:12 et al.; cf. the cognate verb *kāpar H4105* piel, "to cover") and Greek *lytron G3389* (Matt. 20:2; Mk. 10:4; cf. cognates in 1 Tim. 2:6; Heb. 9:15). See ATONEMENT; DELIVER; EXPIATION; REDEMPTION.

rape. See CRIMES AND PUNISHMENTS I.B.4.

Rapha ray'fuh (רָפָא *H8325*, prob. "[God] has healed"; cf. REPHAEL). (1) Fifth son of BENJAMIN and grandson of JACOB (1 Chr. 8:2). However, the parallel lists of Benjamin's sons (Gen. 46:21; Num. 26:38 – 40; 1 Chr. 7:6) omit mention of Rapha altogether. See discussion under NOHAH #1.

(2) See BETH RAPHA.

(3) A different form of the Hebrew word (*rāpă H8335*, always with the definite article attached, 2 Sam. 21:16–22; 1 Chr. 20:6, 8) is rendered "Rapha" in the NIV (NJPS, "the Rapha"), but "giants" in the NRSV and other versions. See REPHAITES.

Raphael raf'ay-uhl (Ραφαηλ, from Heb. רְפָאֵל *H8330*, "God has healed"; see REPHAEL). (1) Son of Raguel and ancestor of TOBIT (Tob. 1:1 NRSV, following CODEX SINAITICUS).

(2) The name of an ANGEL that figures prominently in the book of Tobit (Tob. 3:17 et al.). Near the end of the book, Raphael identifies himself as "one of the seven angels who stand ready and enter before the glory of the Lord" (Tob. 12:15 NRSV; the RSV, following other MSS, reads, "who present the prayers of the saints and enter into the presence of the glory of the Holy One"). In the same passage, he says to Tobit, "…when you and Sarah prayed, it was I who brought and read the record of your prayer before the glory of the Lord…I was sent to you to test you. And at the same time God sent me to heal you and Sarah your daughter-in-law" (vv. 12, 14). Raphael thus served as a guardian angel for Tobit, protecting him from death for burying Jews who had been massacred in Nineveh, and acting as his traveling companion in his journey from Nineveh to Ecbatana. Raphael's chief function, however, was as a healer (note the meaning of his name). He cured the blindness of Tobit and expelled the demon from Sarah, the woman who later married Tobit's son Tobias.

In *1 Enoch* 20, there is a description of seven angels (six, according to the Ethiopic MSS). Earlier in that book, Raphael and MICHAEL are commissioned to punish the fallen angels who had married human wives in the time of Noah. Raphael was told to bind Azazal hand and foot and throw him into a pit (*1 En.* 10.4; cf. 2 Pet. 2:4). Even in this mission, however, Raphael is acting as a healer, for the purpose of this action was that he might heal the earth that had been defiled by these evil angels. According to the *Book of Noah*, a treatise on medicine mentioned in the Jewish midrashim, men were afflicted with various diseases after the flood, and God sent Raphael to disclose to Noah the use of curative plants and roots to heal them. Another Jewish tradition names Raphael as the third of the angels who appeared to Abraham (Gen. 18:2 – 22). Raphael imparted to Sarah the strength to conceive even though she was past the age of childbearing. He is not mentioned in the canonical books of the Bible. (See *DDD*, 688.)

G. H. WATERMAN

Raphah ray'fuh (רָפָה *H8334*, prob. "[Yahweh] has healed"). Son of Binea and descendant of SAUL through JONATHAN (1 Chr. 8:37); called REPHAIAH in the parallel genealogy (9:43; see *ABD*, 5:621 – 22).

J. C. MOYER

Raphaim raf'ay-im. See RAPHAIN.

Raphain raf'ay-in (Ραφαιν). KJV Raphaim. Son of Ahitub and ancestor of JUDITH (Jdt. 8:1).

Raphia ruh-fi'uh (Ραφία). A city on the frontier between Egypt and Palestine, about 20 mi. SW of GAZA. It was in this area that PTOLEMY IV clashed with ANTIOCHUS III (3 Macc. 1:1). Because of its strategic location, Raphia is mentioned frequently in extrabiblical documents (cf. *ABD*, 5:622).

Raphon ray'fon (Ραφων). A city in GILEAD near which the Gentile leader Timothy gathered a new army after being routed by Judas MACCABEE (1 Macc. 5:37). By crossing the ravine to encounter the enemy on the bank opposite the city, however, the Jews again routed the Gentiles. Raphon is apparently included in THUTMOSE III's list of conquered cities (#29; see Y. Aharoni, *The Land of the*

Bible: A Historical Geography, rev. ed. [1979], 160). It is identified with modern er-Rafeh, on the right bank of the Nahr el-Ehreir, c. 8 mi. NE of KARNAIM.

B. K. WALTKE

Raphu ray'fy*oo* (רָפוּא *H8336*, "healed"). Father of PALTI; the latter was one of the spies sent out by MOSES (Num. 13:9).

rapture. See SECOND COMING VIII; TRIBULATION.

Rasses ras'eez. KJV Apoc. form of RASSIS (Jdt. 2:23).

Ras Shamra rahs-shahm'ruh. The name of a Syrian mound, about 7 mi. N of Laodicea ad Mare on the Syrian coast. At this mound, beginning in 1929, archaeological finds were made that have been of enormous value for the study of Phoenician and Canaanite religion, inaugurating a new era in OT research. See UGARIT.

Rassis ras'is (Ρασσις). KJV Rasses. A place whose people were destroyed by the army of HOLOFERNES (Jdt. 2:23; instead of "the people of Rassis," the NRSV translates, "the Rassisites"). Its location is unknown, but the context in Judith would indicate the region of CILICIA. The Latin VULGATE reads Tharsis, which (if not a textual corruption of Rassis) may be the Cilician city of TARSUS. Some scholars think that Rassis is the same as Rossos, a place mentioned by Strabo (*Geogr.* 14.5.19; 16.2.8) and Ptolemy (*Geogr.* 5.14); if so, the reference may be to the modern Mount Arsus in Cilicia, near the site of Issus, where ALEXANDER THE GREAT defeated Darius III.

J. C. MOYER

Rassisite ras'i-s*it*. See RASSIS.

rat. See MOUSE.

Rathamin rath'uh-min (Ραθαμιν). KJV Ramathem. A governmental district that, along with Lydda (LOD) and APHAIREMA, was transferred by DEMETRIUS II of Syria from SAMARIA to JUDAH (1 Macc. 11:34). The name is generally considered to have suffered metathesis in the SEPTUAGINT to a form more natural in Greek (Jos. *Ant.* 13.4.9 §127 spells it *Rhamatēain* [the MSS have orthographic variants]). Most scholars equate Rathamin with Ramathaim, SAMUEL's birthplace. See RAMAH #3.

J. LILLEY

Rathumus ruh-thyoo'muhs. KJV Apoc. form of REHUM (1 Esd. 2:16 – 17 et al.).

raven. The rendering "raven" (family *Corvidae*) for Hebrew ʿōrēb *H6854* (Gen. 8:7 et al.) and Greek *korax G3165* (only Lk. 12:24) is not in doubt and it is amply confirmed by several contexts (e.g., the black color, Cant. 5:11; the reference to eyes being "pecked out by the ravens," Prov. 30:17). Palestine has six members of the crow family—raven, fan-tailed raven, hooded crow, and jay, which are all resident; and rook and jackdaw, which are winter visitors, though a colony of the latter stays to nest in a partly man-made cave in the S Judean hills. The English practice is to use

crow as a general word for the family, but in particular for the (carrion) crow. This principle seems to apply also to these Hebrew and Greek words, though the brightly colored jay is so different that this is probably excepted.

The true raven is found in suitable places over the northern half of the northern hemisphere. It is a heavy, powerful bird about 25 in. long with a massive 3-in. beak that could easily knock an eye out. The large, untidy nest is usually placed on a rock ledge but sometimes in a tree. The fan-tailed raven, of the rocky gorges, has a shorter tail and is about 18 in. long (i.e., about the same as the hooded crow). Almost any animal food, dead, dying, or weak, is acceptable, which explains why the raven that NOAH released had no need to return to the ark (Gen. 8:7). The raven family is logically included in the lists of unclean food (G. R. Driver in *PEQ* no vol. [1955]: 5 – 20). Yet God used some of them, perhaps hooded crows that are fond of storing food, to bring supplies to ELIJAH (1 Ki. 17:4, 6). The raven is often seen and its deep "pruk pruk" heard, but the commonest of the crows today is the hooded, which haunts roadsides, waiting to pick any small animals knocked down or run over by cars. (See *FFB*, 69 – 70.)

G. S. CANSDALE

Razis ray'zis (Ραζίς). An elder of Jerusalem, highly regarded by the Jews for his exemplary life, who was accused before the Syrian general NICANOR as an opponent of HELLENISM, and committed suicide in a gory manner rather than allow himself to be arrested (2 Macc. 14:37 – 46). (See discussion in *ABD*, 5:623 – 24.)

razor. A sharp-edged cutting instrument for cutting and shaving the hair or beard; referred to in the OT especially in connection with the NAZIRITE vow (Heb. *ta⁽ar H9509* in Num. 6:5; 8:7; Isa. 7:20; Ezek. 5:1; *môrâ H4623* in Jdg. 13:5; 16:17; 1 Sam. 1:11). The word is also used metaphorically of the tongue (Ps. 52:2). Razors were made of metal, and were simply or elaborately made. Many specimens have survived from antiquity. See also KNIFE.

S. BARABAS

Re ray (Egyp. *Re⁽*, meaning "sun"). Also *Ra*. The principal SUN god of ancient EGYPT, shown as a man with falcon's head, wearing the sun's disc. In very early times, Re was identified with the creator god Atum of HELIOPOLIS (see *DDD*, 119 – 19) and became chief deity there. He is commonly referred to as Re-Harakhte, "Re-Horus of the Horizon," as the morning sun in the eastern horizon.

This bronze statue of Sekhmet, Egyptian goddess of war, depicts her with the head of a lioness; the sun disk on top symbolizes the god Re.

Re first had royal patronage in the 2nd dynasty, and reached greatest prominence with the pyramid builders of the 4th and 5th dynasties (c. 2600 – 2400 B.C.), when the kings first called themselves "Son of Re"; thereafter, the funerary god OSIRIS grew in prominence. The universal claims of Re and influence of Heliopolitan theology led to combinations with other deities: Amen-Re, Sobk-Re, etc. In the 18th dynasty, AKHENATEN made the sun god—manifest in the solar disc as Aten—sole god of Egypt, but thereafter (19th and 20th dynasties) Amun of THEBES (see AMON #4), Re, and Ptah of MEMPHIS formed a trio and could be conceived of as three aspects of a single deity. Re appears in the OT only in the name of JOSEPH's father-in-law, POTIPHERA the priest of On (Heliopolis). (See *DDD*, 689 – 92.)

K. A. KITCHEN

reader-response criticism. See INTERPRETATION II.G.

Reaiah ree-ay'yuh (רְאָיָה *H8025*, "Yahweh has seen"). (1) Son of SHOBAL and descendant of JUDAH (1 Chr. 4:2).

(2) Son of MICAH and descendant of REUBEN (1 Chr. 5:5; KJV, "Reaia").

(3) Ancestor of a family of temple servants (NETHINIM) who returned with ZERUBBABEL from EXILE in Babylon (Ezra 2:47; Neh. 7:50; apparently called "Jairus" in 1 Esd. 5:31 [KJV, "Airus"]).

J. C. MOYER

reaping. The act of cutting or gathering the produce of the fields, usually in the late summer. In Bible times, as in primitive areas today, reapers cut the grain with a sickle or pulled it up by the roots. In Leviticus, there is legislation regarding reaping. The people were to leave the corners of the field for the poor to reap (Lev. 19:9; 23:22). In the seventh and fiftieth years, they were to reap none at all.

Sowing and reaping served to illustrate investment and reward. As an example, Prov. 22:8 has, "He who sows wickedness reaps trouble." Somewhat the opposite is in Ps. 126:5, "Those who sow in tears reap with songs of joy." A different figure is used in the book of Revelation, "So the one who was seated on the cloud swung his sickle over the earth, and the earth was reaped" (Rev. 14:16). See AGRICULTURE; HARVEST.

Reaping by hand in the fields near Bethlehem, a task still being performed in modern times.

R. L. ALDEN

reason. The concept of reason has taken on a life of its own in the history of ideas, particularly in the West. In some cases it has come to mean proper use of the laws of logic. In others it means the primacy of the head over the heart or other faculties—"Please be reasonable," as the saying goes. In still others it has come to refer to an area of human competency beyond which one must have faith. However, none of these notions is quite compatible with the Bible's emphasis. Admittedly, there is no single, all-inclusive biblical definition of reason. This is partly because the writers of Scripture do not distinguish between the different human faculties with the same kind of precision as modern anthropology might do. Various Hebrew and Greek words interface with our term *reason*. Still, there is a field of purported subject matter which characteristically belongs to the biblical concept of reason.

That field can best be broken down into the source and the function. The ultimate source for reason is God. Taking reason to refer to KNOWLEDGE and WISDOM, it can be considered an attribute of God, one which he graciously reveals to human beings. Job 12:13 puts it succinctly: " To God belong wisdom and power; / counsel and understanding are his." It is God himself, through his Spirit, who gives true wisdom to human beings (Job 32:8; Jas. 3:17). By contrast, Job "darkens my counsel with words without knowledge" (Job 38:2). Or, taking reason to refer to well articulated words, then

again God is the source. The second person of the TRINITY is identified as the LOGOS by John (Jn. 1:1; Rev. 19:13). Christ, come in the flesh, is the embodiment of the WORD. What is it he was personifying? In the OT the "word of the Lord" was often the speech uttered by prophets (Hos. 1:1; Joel 1:1). That word was powerful. Isaiah 55:11 compares the word to the rain and snow from heaven: they will not return without accomplishing their purposes.

Christ also personifies wisdom. True wisdom, incarnate in him who is greater than SOLOMON, is here in the world. To delight in it is the way of salvation, but to refuse it is to bask in folly (Lk. 7:35; 12:42; cf. Prov. 8:22 – 23, 31 – 36 with Jn. 1:3 – 13). It was Christ himself who opened the minds of the disciples so they could understand the Scriptures (Lk. 24:45). The wisdom of the mature can be obtained only from the source of the gospel, the God who sent his Son and now makes his REVELATION known through his HOLY SPIRIT. It is given freely, by grace, and none of the "rulers of this age" can generate it (1 Cor. 2:6 – 14; cf. Eph 1:17). What does this wisdom enable persons with the Holy Spirit to do? To have the mind of Christ, and thus make judgments about all things, without being the slaves of false wisdom (vv. 15 – 16). PAUL writes to TIMOTHY that the Lord will give him insight into all that he is saying in the inspired text (2 Tim. 2:7).

The function of reason involves several overlapping concepts. Reason can simply refer to the cause or the explanation for a state of affairs. For example, the *reason* the years of abundance would be forgotten is that the famine was so severe during Joseph's time (Gen. 41:31; cf. 47:13). Or, again, the *reason* the PHARISEES did not hear what Jesus was saying is that they did not belong to God (Jn. 9:47). Similarly, it can refer to the grounds for an action. Paul tells the Romans the *reason* God gave sinners over to their shameful lusts is that they exchanged the truth of God for a lie (Rom. 1:26).

But *reason* more especially refers to the capacity to make judgments and connections. At the divine level, it means that God is a thinking God, and that his arguments are sound. As a result, his word is truth (Jn. 17:17). Human beings are meant to live in conformity to that truth. For example, JAMES asks, rhetorically, "do you suppose it is to no purpose [*lit.*, in vain; NIV, without reason] that the Scripture says, 'He yearns jealously…?'" (Jas. 4:5 ESV). And he answers that we should submit ourselves to God (v. 7), adding that God alone is the judge and lawgiver. "When you judge the law, you are not keeping it, but sitting in judgment on it" (4:11). Another way of putting this is, we should think God's thoughts after him (as the astronomer Johannes Kepler is said to have expressed it). Our thinking is not original but derivative.

At one level, reasoning means simply to be in possession of one's rational faculties. For example, after a period of insanity, NEBUCHADNEZZAR's ability to think rationally was restored (Dan. 4:34, 36). The demon-possessed man, once healed, was at Jesus' feet, "dressed and in his right mind" (Lk. 8:35). And yet, at another level, reasoning in the Bible is almost never simply descriptive, but is also prescriptive. It almost always implies an ability to make sound judgments. To reason means to judge correctly, according to God's standards. One way of describing those norms is in terms of maturity. For example, Paul compares his present rational process to that of his childhood. He used to reason (*logi-zomai G3357*) like a child, but now he is an adult, and so has put away childish ways (1 Cor. 13:11). Another way of describing rational norms is in terms of coherence. To the Romans Paul describes the sacrificial service of believers to the Lord as "spiritual [reasonable] worship" (Rom. 12:1). The idea seems to be a systematic or whole-souled dedication. There is always a moral character in human reasoning, which is the reflection of God's standards. Rationality is never a neutral mechanism. It comes in a context, which means it can be faithful or sinful. Thus it is proper to refer to what theologians have called the "noetic effects of sin" (cf. Rom. 1:21, 28; Eph. 2:3).

Several words derived from *logos G3364* have a legal or contentious connotation. For example,

PETER tells his readers to be ready to present a defense (*apologia G665*) when someone asks what is the reason (*logos*) for the hope they possess (1 Pet. 3:15). We derive our term APOLOGETICS from this. Presenting a reasonable case for our faith means arguing properly, giving sound reasons for belief. The OT background for this concept is in the many occasions where terms like *hôkîaḥ* (hiph. of *yākah H3519*, "argue, rebuke," etc.) are used for a prosecution. JOB wishes he could "argue his case" with God (Job 13:3, 6). One of the most celebrated texts about the mercy of God in the prophetic literature begins, "'Come now, let us reason together,' says the Lord" (Isa. 1:18; in this verse the niphal of the verb is used). The idea here is of turning a legal dispute against Israel, which God would surely win, into a message of acquittal. Here, again, reasoning properly is making judgments according to God's standards.

In all these cases human reasoning is limited. Paul praises God as the one "who is able to do immeasurably more than all we ask or imagine" (Eph. 3:20). The contrast here is not between reason and FAITH, a dubious distinction and one that has troubled the church for many centuries. Faith is not a human power that rises above the rational. The contrast is between our limited power to imagine or predict and the far greater power of God to accomplish his great purposes. Similarly, when the apostle promises the Philippians that "the peace of God, which transcends all understanding, will guard your hearts and your minds in Christ Jesus" (Phil. 4:7), he is not comparing a heavenly feeling of peace to an earthly rationality. Rather, he is saying that human understanding could not have imagined a way to be kept in the PEACE of Christ. Indeed, our hearts and minds are being kept in that reconciled relationship.

It is unlikely that the Bible assigns any sort of primacy to reason, at least in the way traditional theology and philosophy has often done. It is no doubt true that our whole being, which includes emotions, will, imagination, intuitions, and so on, should conform to reason. If we understand reason to be correct judgment, according to God's standards, then all of our faculties ought to be able to conform to that norm, not just the mind. Indeed, it is not certain that the Bible separates something called the mind from the other faculties in any clear-cut manner. The greatest commandment is to "Love the Lord your God with all your heart and with all your soul and with all your mind" (Matt. 22:37). This is a way of piling up the terms and saying that our whole being should love the one God. See also APOLOGETICS.

W. EDGAR

Reba ree'buh (רֶבַע *H8064*, perhaps "fourth one"). One of five kings of MIDIAN killed by the Israelites in a battle on the plains of MOAB (Num. 31:8). MOSES was commanded by God to exact vengeance on the Midianites because they had enticed Israel with their gods. In another passage (Josh. 13:21) the kings are said to be princes of (NIV, "allied with") SIHON, the AMORITE ruler, possibly indicating that they were his vassals. Apparently Sihon had taken possession of the area of Moab and made the Midianite tribes residing there subject to him. The form *rbʿ* is attested in Arabic both as a personal and as a place name; perhaps Reba should be linked with Naqb Rubaʿi, near PETRA (see *ABD*, 5:628 – 29).

J. C. MOYER

Rebecca ri-bek'uh. See REBEKAH.

Rebekah ri-bek'uh (רִבְקָה *H8071*, possibly "cow" [*HALOT*, 3:1182; if so, an affectionate term, comparable to RACHEL, "ewe"]; Ῥεβέκκα *G4831*). KJV NT Rebecca (a spelling followed by other

versions). Daughter of BETHUEL, who was nephew to ABRAHAM (Gen. 22:23) and lived in the Aramean country near the EUPHRATES. Rebekah was LABAN's sister. She became the wife of ISAAC and the mother of ESAU and JACOB.

Rebekah's encounter with Abraham's steward (prob. ELIEZER) is remembered as a classic example of divine PROVIDENCE and guidance (Gen. 24). She met this aged traveler with his camels outside her city as she returned one evening from the well. When he asked her for a drink, she readily gave it, but she also offered to draw for his camels, and did so with good will, little knowing that the man had just prayed for this very sign. Finding that she was a relative of his master, and realizing that she was also beautiful, he recognized the abundant answer to his prayer. When Rebekah's father and brother heard what the steward had to say, they could only acknowledge the Lord's leading. They wanted her, however, to delay for a few days of leave-taking; asked to decide, she preferred to go immediately. So Rebekah was brought to Isaac, "and he loved her; and Isaac was comforted after his mother's death" (v. 67). (On the narrative qualities of the story, see *ABD*, 5:629 – 30.)

For twenty years of her marriage Rebekah had no children (see BARRENNESS); then in answer to Isaac's prayer, God gave her twins (Gen. 25:20 – 26). Her experience while carrying them foreshadowed conflict between her descendants, and she was told that God had chosen the younger twin for his blessing. Malachi cites the evidence of it in Israel's experience (Mal. 1:2 – 3), and Paul shows that God was establishing and typifying the principle of electing grace (Rom. 9:10 – 13).

Jacob, the younger son, unadventurous, always in camp, became Rebekah's favorite (Gen. 25:28); and she plotted the deception by which he gained his father's formal blessing (ch. 27). Esau then would have murdered Jacob, but God overruled in this also. Esau had married HITTITE women to the disappointment of his parents; Rebekah induced Isaac to send Jacob back to HARAN to find a wife.

According to Gen. 49:31, Rebekah was buried in the family tomb at MACHPELAH near HEBRON.

<div align="right">J. LILLEY</div>

Recab ree'kab (רֵכָב *H8209,* from a root meaning "chariot" or possibly "rider"). Also Rechab, Rekab. (1) Son of RIMMON, from the tribe of BENJAMIN; he and his brother treacherously murdered ISH-BOSHETH, their king, and met with the due reward of their deed at DAVID's hands (2 Sam. 4:2 – 12). See discussion under BAANAH #1.

(2) Father (or ancestor) of Jehonadab/JONADAB (2 Ki. 10:15, 23; 1 Chr. 2:55; Jer. 35:6 – 8, 14 – 19). See RECABITE.

(3) Father of MALKIJAH; the latter was a postexilic ruler of BETH HAKKEREM who repaired the DUNG GATE in Jerusalem (Neh. 3:14). Some speculate that he may have been a descendant of #2 above.

Recabite rek'uh-bit (רֵכָבִי *H8211* [always in the phrase בֵּית הָרֵכָבִים, "house of the Recabites"], gentilic of רֵכָב *H8209).* Also Rechabite, Rekabite. Name applied to a nomadic family that descended from RECAB (#2) and JONADAB; they were famous for their rules to abstain from WINE, build no houses, sow no seed, and plant no vineyard (Jer. 35; cf. also 1 Chr. 4:12, where some MSS of the LXX read, "the men of Recab" [see RECAH]).

I. Relationship to the Kenites. According to 1 Chr. 2:55 certain KENITES "came from Hammath, the father of the house of Recab." HAMMATH, like various other names in this genealogy, may refer to a place as well as to a person, and the preposition "from" seems to imply that the Kenites in view came

from a place Hammath. Moreover, we are told elsewhere that a Kenite named HEBER separated from the rest of the Kenites (who descended from HOBAB) and settled in KEDESH of NAPHTALI (Jdg. 4:11, 17), in the same general region as Hammath (cf. Josh. 19:35 – 37). As for the term "father" in 1 Chr. 2:55, it may indicate either that the Recabites had a blood relationship with the Kenites or that Hammath was the founder of the Recabites as a professional guild (cf. BDB, 3, s.v. *ʾāb H3*, meaning 5). In either case the text is of interest because some of the Kenites gained their livelihood in metallurgy (R. J. Forbes, *Studies in Ancient Technology*, 8 vols. [1955 – 64], 8:91 – 92), possibly the trade of the Recabites.

II. Jonadab's social and religious status. The founder of the Recabite discipline was Jehonadab/ Jonadab (2 Ki. 10:15, 23; Jer. 35:6, 14). Scholars differ in their view of his social standing. M. Ben-Gavriel described him as "a naive man of the wilderness" ("Das nomadische Ideal in der Bibel," *Stimmen der Zeit* 171 [1962 – 63]: 253 – 63), and M. H. Pope envisioned him as one of the "proto-Rechabites…a nomad clan who pastured their flocks in marginal areas of the N Kingdom" (*IDB*, 4:15).

However, F. S. Frick saw Jehonadab as a member of a guild with high social standing. He argued thus: first, the name Jehonadab combines the theophoric element (*yh*) with the root *ndb*, and the cognate noun *nādîb H5618* is used to denote a member of the ruling class of the monarchical period. Moreover, "all of the personal names in the Bible which contain the root *n-d-b*, belong to members of this class, and there is no apparent reason why Jeho-nadab should be considered an exception" ("The Rechabites Reconsidered," *JBL* 90 [1971]: 282). Second, the designation "the son of Recab" (2 Ki. 10:15) possibly does not indicate a true father-son relationship or even a descendant of one Recab. Rather "son" (Heb. *bēn H1201*; see BEN-), like the Akkadian terms *maru* and *aplu*, could indicate that he was a member of a guild named *rekab*; that is, an occupational group associated in some way with chariotry (Heb. *rekeb H8207*, "chariot"), a specialty group well attested in the ANE.

"Son of Recab" could also indicate that Jehonadab was a native of a place named Recab, possibly so-called because of its association with chariotry. According to either of these last interpretations, it may not be coincidental that JEHU took Jehonadab into his chariot for the trip to SAMARIA. Third, the dialogue between Jehu and Jehonadab serves to confirm a military alliance (cf. 2 Ki. 10:16 with 1 Ki. 22:4; 2 Ki. 3:7). JOSEPHUS (*Ant*. 9.6.6) assumed that these men may have had a prior association, which may have come about in the king's chariotry (Frick, "Rechabites," 283 – 84). One thing is clear: because of the prominent place which the new ruler gave him (2 Ki. 10:16, 23), his influence was a matter of some importance.

Modern-day bedouin tent in Jordan. The Recabites used similar dwellings and refused to build houses (Jer. 35:7 – 10).

Regarding his religious position there is no ambiguity. Like ELIJAH and ELISHA, he was a radical supporter of Yahwism in the face of the increasing threat of Baalism under the Omrides. The statement that Jehonadab "was on his way to meet" Jehu (2 Ki. 10:15) shows that Jehonadab took the initiative.

III. The purpose of Jehonadab's rules. Scholars have differed also in their understanding of the object of the rules formulated by Jehonadab for his descendants. K. Budde, followed by most moderns, held that the object of the regulations was the preservation of primitive simplicity, that is, the maintenance of nomadism because civilization and settled life inevitably leads to apostasy from Yahweh. Pope states, "The Rechabites struck at the root of the evil, the tendency to assimilate, by making the nomad mode of life a religious obligation and by rejecting virtually everything Canaanite except the language" (*IDB*, 4:15). This understanding rests on the assumption that (1) abstention from intoxicants, (2) tent-dwelling, and (3) the disdaining of AGRICULTURE are clear signs of a nomadic society (see NOMAD). This understanding is further supported by a parallel group among the NABATEANS mentioned by Diodorus of Sicily (cf. S. Cohen in *IDB*, 3:491).

Frick, on the other hand, contended that this group of Nabateans is not a valid parallel sample because it ignores the significant difference in time, the disparate purpose of the discipline in Nabatean society (to avoid conquest), and the caution urged by Cohen in the use of classical sources vis-à-vis the Nabateans ("Rechabites," 281). Moreover, he cited Albright to question whether teetotalism is a trait of nomadism at all (ibid., 285). Finally, he suggested that the Recabites' rules can be interpreted as belonging to a guild of metal-workers involved in the making of chariots and other weaponry. His arguments were as follows: (1) Metallurgists in antiquity formed proud endogamous lines of families that could account for the staying power of the Recabites. (2) In a preindustrial society, the smith had to dispose of the formidable body of technical lore that was handed down and guarded jealously from generation to generation. He noted that "like other measures designed to guard the secrets of the trade, so too might the abstention from intoxicants be another attempt to prevent 'loose lips' from 'sinking ships.'" (3) The smith's social status among

agriculturalists was an honored one. (4) Because a smith remained in one locality until the supply of ore and/or fuel was exhausted, he was prevented from establishing a permanent domicile or engaging in agriculture. (5) Whereas other craftsmen were not hindered from engaging in part-time agricultural work, the smith's work required such skill that agriculture was excluded (ibid.). See METALS AND METALLURGY.

IV. Yahweh's use of the Recabites. This much is sure: the Recabites are not commended by Yahweh for their rules as such but rather for their faithfulness to the rules. K. Budde acknowledged: "An independent value in the precepts of Jonadab is not asserted" ("The Nomadic Ideal in the Old Testament," *The New World* 4 [1895]: 727); and S. Talmon wrote: "By way of a simile the prophet had set the Rechabites before the nation as an example of steadfastness. But the *tertium comparatonis* lies in their relation to a command not in the contents of the command" ("The 'Desert Motif' in the Bible and the Qumran Literature," in *Biblical Motifs: Origins and Transformations*, ed. A. Altmann [1966], 37).

V. The survival of the Recabites. For their steadfastness, these few Recabites—who were able to fit into one chamber of the TEMPLE and all of whose names mentioned in the text contain Yahweh as a theophoric element (Jer. 35:3)—are promised that they will never fail to have a descendant to represent them (v. 19). The fulfillment of this promise is possibly reflected in several details: (1) the title of Ps. 71 in the SEPTUAGINT (= Ps. 70) reads : "…of the sons of Jehonadab and of the earliest captives"; (2) a certain MALKIJAH son of Recab who repaired the DUNG GATE in NEHEMIAH's restoration of Jerusalem (Neh. 3:14) may have been a Recabite; (3) there is a Jewish tradition that the Recabites enter the temple service by the marriage of their daughters to priests; (4) the church father Hegesippus makes the dubious assertion that a Recabite priest protested the martyrdom of JAMES (Eusebius, *Eccl. Hist.* 2.23); (5) the TALMUD states that the Recabites had a special day, the seventh of Ab, for participation in the wood festival of priests and people (*b. Ta⁽an.* 26a); (6) a Christian work known as *History of the Rechabites*, produced in the 6th cent., but probably based on earlier Jewish traditions, provides an expanded retelling of the biblical material (see *OTP*, 2:443 – 61); and (7) professed descendants of the sect still exist in Iraq and Yemen. (See further L. Gautier, *A propos des Récabites: Un chapitre de l'histoire religieuse d'Israel avant l'exil* [1927]; S. Talmon in *IEJ* 10 [1960]: 174 – 80; S. Abramsky in *Eretz-Israel* 8 [1967]: 255 – 64 [Heb. with an Eng. summary, 76*]; F. S. Frick in *ABD*, 5:630 – 32.)

B. K. WALTKE

Recah ree'kuh (רֵכָה *H8212*, meaning uncertain). TNIV Rekah. Apparently a town inhabited by some descendants of JUDAH (1 Chr. 4:12). Nothing is known about such a place, and some scholars, following a variant SEPTUAGINT reading (*Rēchab* in CODEX VATICANUS and the Lucianic recension), emend the text to RECAB.

receipt of custom. See CUSTOM, RECEIPT OF.

Rechab, Rechabite ree'kab, rek'uh-b*it*. See RECAB; RECABITE.

Rechabites, History of the rek'uh-b*it*. See RECABITE V.

Rechah ree'kuh. KJV form of RECAH.

recompense. See RETRIBUTION; REWARD.

reconciliation. The act of restoring harmony, bringing again into unity or agreement what has been alienated. According to biblical teaching, there is need for reconciliation between God and human beings because of the alienation between them, which has its source in SIN and the righteous aversion to it on the part of God. The Bible teaches that God himself has provided the means of reconciliation through the death of his Son Jesus Christ.

I. The biblical data. The Greek noun meaning "reconciliation" (*katallagē G2903*) and the cognate verb (*katallassō G2904*) occur nine times in four Pauline passages (Rom. 5:10 – 11; 11:15; 2 Cor. 5:18 – 19; in 1 Cor. 7:11 reconciliation between human beings is in view). A compound form of the verb (*apokatallassō G639*, possibly intensive in meaning) is found in two other passages (Eph. 2:16; Col. 1:20 – 22).

When reconciliation has its full biblical meaning of SALVATION, the alienation it removes is clearly the result of sin (Isa. 59:12). This is apparent from 2 Cor. 5:18 – 19, where reconciliation is brought into connection with God's not imputing trespasses; thus for PAUL reconciliation is the parallel or equivalent of JUSTIFICATION (Rom. 5:9 – 10; cf. 2 Cor. 3:9). This is not strange, because the means of reconciliation is the death of God's Son (Rom. 5:10). The purpose of sacrificial death is EXPIATION. The DEATH OF CHRIST and the IMPUTATION of his RIGHTEOUSNESS to the sinner is ground for removing the cause of alienation between God and human beings, namely, the guilt of sin. See ATONEMENT.

But reconciliation has a broader meaning than justification. The concept derives from the socioeconomic sphere (cf. 1 Cor. 7:11). It speaks in general of the restoration of a proper relationship between two parties. It refers broadly to overcoming an enmity, without specifying how this enmity is removed. In Paul's writings reconciliation is contrasted with "enmity" and "alienation" (Rom. 5:10; Eph. 2:14 – 15; Col. 1:22). In the positive sense it has the meaning of PEACE (Rom. 5:1, 10; Eph. 2:15 – 16; Col. 1:20 – 21). The removal of the reason for alienation brings about a condition of peace between the warring parties.

In its biblical sense, *peace* is the inclusive term referring to the restoration of fellowship between God and sinners. The inclusive sense of *reconciliation*, as it is used regarding salvation, that is, overcoming of enmity and alienation, is reflected in what it has in view, namely, the restoration of peace between God and the sinner. Thus Paul can exult, "Therefore, since we have been justified through faith, we have peace with God through our Lord Jesus Christ" (Rom. 5:1).

The concept of reconciliation comes up also in connection with the uniting of the GENTILES with the COVENANT line (Rom. 11:15). In this passage the characteristic traits of reconciliation are present. Paul says of the Gentiles that they were without Christ, aliens from Israel, and strangers to the covenant of promise. They were far off and foreign. Christ is the One who brings peace, who preached peace, who is our peace. He is said to have removed and abolished enmity, to have brought the Gentile near, and to have made of Gentile and Jew one. Gentile and Jew have been brought into a single commonwealth. What is in mind is not directly the removal of enmity between God and the sinner but the abolishing of the distinction in Christ of Jew and Gentile. Nevertheless, what separated them is identified as the law. It is by the cross of Christ that what separated them, the enmity, has been

broken down. Thus they could be brought together and united in one body. Christ "has made the two one," thus making peace (Eph. 2:14 – 16).

This and the other elements of reconciliation must be seen against the background of the all-embracing purpose of God to reconcile all things to himself through Jesus Christ (Col. 1:20 – 21). This indicates the scope of the idea of reconciliation. Having made peace through the blood of Christ's cross, God has the great purpose of reconciling to himself all things in heaven and in earth. Thus it is possible to speak of the GOSPEL of salvation in its broadest scope as the "ministry of reconciliation," and the appeal of the gospel to the sinner as the call to be reconciled to God (2 Cor. 5:20).

II. Doctrinal formulation. The doctrine of reconciliation brings into focus our alienation from God because of sin and his provision for restoring us to his favor. In its most embracive meaning, reconciliation has to do with the removal of that which stands in the way of the proper relationship between God and the world in the most inclusive sense of the word. Thus it must have in its purview all the facets of the restoration of the world, including the final reconciliation of all things in Christ to the Father at the last day.

The Scripture passages that refer explicitly to reconciliation invariably speak of the sinner's being reconciled to God and not of God's being reconciled to the sinner. At first sight, it might be thought that there are scriptural grounds for concluding, with classic theological liberalism, that the alienation was altogether on the human side. Liberalism would not admit that God was estranged. God remained always the same, always favorably inclined toward mankind, in spite of its weakness and sin.

That the Scriptures speak explicitly only of God's reconciling the sinner to himself does not mean, however, that it is only the sinner who has been alienated from God and not God from the sinner. Because of sin, we have come under the righteous judgment and curse of God. God is too holy to look upon sin; he recoils from it. This righteous judgment of God must be satisfied, and this satisfaction is accomplished, the Scriptures teach, by the perfect sacrifice of Jesus Christ. The idea of sacrifice involves the idea of expiation for sin, which is necessary if God is to be reconciled. Although the Bible does not refer explicitly to God's being reconciled, the scriptural teaching will not allow that reconciliation to be only on the human side. Reconciliation is of God to sinners as well as of sinners to God.

Furthermore, the alienation involves more than a sense of estrangement on our part. This can be seen from Christ's teaching in Matt. 5:23 – 24. Christ commanded one who brings his gift to the altar and there remembers that his brother has a grievance against him to postpone making his offering until he has been reconciled to his brother. This command cannot be taken to mean simply that the one offering his gift should replace an attitude of animosity toward his brother with one of good will; for this he would not have to leave the altar. It means that he should remove whatever is the ground for his brother's complaint against him. He should bring a change into the situation that occasioned alienation between them, so that he and his brother can again be in harmony. Christ teaches, therefore, that whatever is behind the alienation should be removed before the worshiper presents his sacrifice. Likewise in the relationship between God and sinners, it is not simply a question of an attitude on our part that must be changed. What must be changed is the condition of alienation that has arisen because of sin. If this alienation is to be removed, the ground of the alienation, namely, the guilt of sin, which deserves the divine wrath, condemnation, and curse, must be removed. (See J. Murray, *Redemption: Accomplished and Applied* [1955], 33 – 42.)

Since this is the case, it is not at all surprising that the scriptural teaching concerning reconciliation is brought into the most intimate connection with those of justification and the expiatory death of Jesus Christ. What effects reconciliation is the sacrifice of Christ, whereby the sinner is relieved of the guilt and the condemnation of sin and receives the righteousness of Christ imputed to him. Since release from condemnation involves also being freed from bondage by the payment of a ransom, reconciliation also has an intimate connection with REDEMPTION.

The new relationship between God and human beings, resulting from their reconciliation, is that of sonship. It is the result of ADOPTION (cf. Gal. 4:4 – 5). Adoption is the goal of the great divine purpose of reconciliation. It is a direct result of redemption, justification (Rom. 3:25 – 26; 4:25), and reconciliation (2 Cor. 5:18 – 19).

Contrary to liberalism, subsequent modern theology has had more place for the idea of divine WRATH. It has had a greater place, therefore, for the idea that reconciliation involves God as well as the sinner. Some theologians have come to assert that the divine *yes* is at the foundation of every divine *no*. Karl Barth (*Church Dogmatics* 4/1/2 [1956]) taught that all people are elected and are reconciled. They must only be brought to realize it.

Especially because of the influence of Sören Kierkegaard and Karl Marx, the idea of alienation and estrangement has become a major theme of contemporary philosophy, theology, and literature. This accounts in great measure for the importance that the doctrine of reconciliation has assumed in current theological thought. The notion is often secularized, however, referring only to a reconciliation of one with his own deeper nature. Even in contemporary theology this secularizing tendency is present. Its peculiar tendencies do not allow contemporary theology to view reconciliation in its proper relationship to the sacrificial death of Christ, expiation, and the imputation of righteousness, all of which are essential to the biblical doctrine. (See further *HDB*, 4:204 – 7; G. C. Workman, *At Onement or Reconciliation with God* [1911]; F. W. Dillistone, *The Significance of the Cross* [1944]; H. Ridderbos, *Paul: An Outline of His Theology* [1975], ch. 5.)

R. D. KNUDSEN

recorder. An important official in Israel who functioned as a herald (Heb. *mazkîr H4654*, lit., "one who causes to remember"). Although the Hebrew term occurs nine times, the precise duties of this official are never mentioned. If the term is descriptive of the office, then the recorder might have been connected with the chronicling of state events. Yet this task seems to have been the function of the royal SCRIBE or secretary.

Another possibility is that it was a vocal office parallel to the Egyptian *whm.w*, "he who repeats, calls, announces" (i.e., the pharaoh's herald). Among his tasks was that of official spokesman. This seems to be the case with JOAH son of Asaph, a recorder during the reign of HEZEKIAH; along with two other officials, Joah represented the king in negotiations with the RABSHAKEH, who in turn represented the Assyrian king, SENNACHERIB (2 Ki. 18:18, 37; Isa. 36:3, 22). Another Joah, the son of Joahaz, was recorder during the reign of JOSIAH (2 Chr. 34:8); along with Shaphan and Maaseiah, he was delegated to pay the laborers who repaired the temple during Josiah's reform. Earlier, a certain JEHOSHAPHAT was recorder during the reigns of both DAVID and SOLOMON, but the nature of his office is not indicated (2 Sam. 8:16; 20:24; 1 Ki. 4:3; 1 Chr. 18:15). The mention of recorders from David to Josiah indicates that the office continued until the end of the monarchy. (See further R. de Vaux, *Ancient Israel* [1965], 127 – 32.)

A cross-legged scribe writing under the inspiration of Thot, god of science and literature; the little shell on the left thigh was used for mixing the paint. This statue, made of black schist on a limestone base, was found in a house at Tell el-Amarna, Egypt.

J. C. MOYER

red. Out of several Hebrew words that may be translated "red," the most common root is *ʾdm* (e.g., verb *ʾādēm H131*, "to be red"; adjectives *ʾādōm H137, ʾadmônî H145*). This root is related to the noun *ʾadamă H141*, "earth, land," indicating a connection with the color of the soil in the Middle East. The root appears also in the name of the first man, ADAM, who was formed "from the dust of the [red] ground" (again, *ʾădāmă*, Gen. 2:7). The name of the nation EDOM has the same origin: not only does that nation come from the "red" man ESAU, but also the color of much of its landscape is red (cf. PETRA, "the red Rose City"). When the reference is to the color of human skin, English prefers the term *ruddy* (1 Sam. 16:12; 17:42; Cant. 5:10; Lam. 4:7).

Red was a natural color for some cereal (Gen. 25:30), wine (Prov. 23:31), a heifer (Num. 19:2), some horses (Zech. 1:8; 6:2; Rev. 6:4 [Gk. *pyrros G4794*, from *pyr G4786*, "fire"]), and the sky before fair weather (Matt. 16:2 – 3 [Gk. verb *pyrrazō G4793*]). Red spots may indicate leprosy on a person (Lev. 13:19) or in a garment (v. 49). Red or PURPLE was used on expensive things such as the ram skins for the TABERNACLE (Exod. 25:5 et al.), or war shields (Nah. 2:3). The well-known verse Isa. 1:18 uses three parallel words for "red" to describe SIN (in addition to the verb *ʾādem*, it includes the nouns *šānî H9106*, usually rendered "scarlet," and *tôlāʿ H9355*, "crimson").

Redeemer myth. See GNOSTICISM.

redemption. Redemption is deliverance from the power of an alien dominion and enjoyment of the resulting freedom (see LIBERTY). In its original sense and in its biblical usage redemption is intimately associated with the ideas of RANSOM and substitution. It often involves the concept of restoration to one who possesses a more fundamental right or interest. The heart of the biblical message of redemption is the deliverance of the people of God from the bondage of sin by the perfect substitutionary sacrifice of Jesus Christ (see ATONEMENT) and their consequent restoration to God and his heavenly kingdom. A redeemer is one who possesses the right or who exercises the right of redemption. The Bible presents Christ as the redeemer of God's elect.

I. The biblical data. The English verb *redeem* in the OT generally corresponds to two Hebrew terms. One of them, *pādă H7009*, was used for the money payments required by law in Israel for the redemption of the FIRSTBORN (Exod. 13:12 – 13), thus releasing the Israelites from the obligation imposed after the exodus that every firstborn son and male animal be dedicated to the service of God (Exod. 21:8; Lev. 25:47 – 49; 27:27; Num. 3:46 – 49; 18:15 – 16). This verb was used also of the release of persons from SLAVERY (Exod. 21:8; Lev. 25:47 – 49). The second term, *gāʾal H1457*, was used of the recovery of property that had passed into other hands (Lev. 25:26; Ruth 4:4 – 8) and also of the commutation of a VOW (Lev. 27:13, 15, 19 – 20) or a TITHE (27:31). God is spoken of as the GOEL or Redeemer especially in Isaiah (Isa. 41:14; 43:14; et al.), but in several other books as well (Job 19:25; Pss. 19:14; 78:35; Prov. 23:11 [NIV, "Defender"]; Jer. 50:34). (See further *NIDOTTE*, 1:789 – 94; 3:578 – 82.)

In the OT the idea of redemption is closely associated with the laws and customs of the Israelite people. If a life was taken, a kinsman had the right of avenging or redeeming the blood of the victim (Num. 5:8; 1 Ki. 16:11). According to the theocratic arrangement in Israel, the land belonged to God and the Israelite families only possessed the right to use the fruit of the land (*usufruct*). If a family forfeited this use because its parcel of land had to be sold or because there was no heir, the parcel was returned to the family at the JUBILEE YEAR, which came every fifty years (Lev. 25:8 – 17). Prior to this year, the nearest kinsman had the right and the responsibility to redeem the property, that is, to liquidate the debt so that the property might be restored to its original owner (25:23 – 28).

Closely related to this custom was that of LEVI-RATE marriage. The brother-in-law or other near kinsman of someone who had died without leaving a male heir was obliged to marry the widow of the deceased in order to preserve the family name and property rights. In the marriage of BOAZ and RUTH, both of the above customs were involved. The idea of redemption also appears when a person has been deprived of something that is part of his or her personal integrity. Thus NAOMI called the son born to Boaz and Ruth a kinsman-redeemer because he delivered her from the reproach she had incurred for lack of a surviving male heir (Ruth 4:14; cf. J. M. Sasson, *Ruth*, 2nd ed. [1989], 163 – 64). The birth of an heir now delivered her honor, as it were, from an alien dominion and restored it to her.

Because God spared the Israelites from the final plague in Egypt, he established a claim on the firstborn Israelite male children and cattle, which were henceforth supposed to be dedicated to God's service (Exod. 13:2). In their stead God placed the tribe of LEVI and its cattle (Num. 3:12 – 13, 41, 45). Since there was not enough of them to provide a substitute for all the firstborn, God required the Israelites to "redeem" the remaining firstborn by paying a sum of money (3:46 – 51). In this fashion

the firstborn were released from the divine claim upon them and were restored to their families. From this time the firstborn male children were redeemed by the payment of a sum of money, a firstborn donkey by the substitution of a lamb, etc. (Exod. 13:12 – 13; 34:19 – 20).

In the NT the relevant words are the verbs *agorazō G60* and *lytroō G3390*. The former, a common term meaning "to buy, purchase," is used several times with reference to the redemption of believers (1 Cor. 6:20; 7:23; 2 Pet. 2:1; Rev. 5:9; *exagorazō G1973* in Gal. 3:13; 4:5). The second verb is related to the noun *lytron G3389*, which means "ransom." The noun form appears in the NT only twice (Mk. 10:45; Matt. 20:28; the synonym *anti-lytron G519* in 1 Tim. 2:6), and it literally refers to a means of loosing, for instance, the payment of a ransom price. It was used by ancient writers almost universally to refer to a ransom paid for prisoners. The verbal form does not always include the idea of ransom in the NT (Lk. 24:21; Tit. 2:14; the same is true of the nouns *lytrōsis G3391* and *apolytrōsis G667*, Lk. 1:68; 21:28; Rom. 3:24; 8:23; et al.), but this concept is most closely associated with them (see esp. 1 Pet. 1:18). The term "redeemer," *lytrōtes G3392*, occurs in the NT only in Acts 7:35, where it is used of MOSES. (See further B. B. Warfield, *Biblical Doctrines* [1929], 327 – 98; *TDNT*, 4:340 – 56; *NIDNTT*, 3:177 – 223.)

II. Doctrinal formulation. Redemption is deliverance from a bondage, a release of someone or something from an alien power that has a claim upon it. The outstanding example of redemption in the OT was the deliverance of the children of Israel from bondage, from the dominion of the alien power of Egypt. See EXODUS, THE.

The biblical idea of redemption also involves the deliverer and what he performs to effect the deliverance. Release must be effected by someone who, for whatever reason, has a prior or more fundamental claim to what is to be delivered. According to Israelite custom, it was possible for someone to deliver himself or something for himself (Lev. 25:49); however, more characteristically, the redeemer was someone else, such as a near relative, who because of his position in the family possessed the right and the obligation of redemption. One who had the right to redeem, whether he exercised it as a matter of fact or not, was called a redeemer (*gō°ēl*). In its central reference to salvation, the Bible teaches that redemption is always by another party. In the story of the great deliverance from Egypt attention falls not only upon the act of redemption itself but upon the redeemer as well, upon God working through his prophet Moses. God had the prior claim upon Israel because he had obtained them as his people. His act of redemption liberated Israel from the alien dominion of Egypt and restored them to him who was their rightful Lord. See SALVATION.

What the redeemer does in order to accomplish redemption is not always the same. Moses was called a redeemer (Acts 7:35) because as God's prophet he was instrumental in leading the children of Israel out of Egypt. Naomi called Boaz "one of our redeemers" because his position in the family gave him the right to effect the restoration of the family property. She called the son born of Boaz and Ruth "a redeemer" because he delivered her from her reproach.

The earliest usage of the words for redemption, as we have seen, associates them with the payment of a price, a ransom. This is also true of the biblical teaching concerning redemption as it bears on salvation. The people of God are redeemed by the payment of the debt of their sin by the perfect satisfaction accomplished by Jesus Christ.

In the early church redemption was correctly associated with the idea of ransom. The notion arose, however, that Christ had redeemed his people by paying a ransom to the devil. This theory was attacked and refuted by Anselm in his *Cur Deus Homo* (*Why God Became Man*). The Scriptures are virtually silent about one to whom ransom is paid. If it is anyone, it is God himself. The focus of

attention, in any case, is not the one to whom ransom is paid but the sufficiency of the payment made by Christ. This was nothing less than the substitution of his own life for that of the redeemed (Matt. 20:28).

Modern liberal theology altogether dissociated redemption from the ideas of ransom and satisfaction, and thought of redemption simply as deliverance from the alien dominion of the world. Deliverance from the world certainly expresses an important facet of redemption. However, liberal theology erred in rejecting the scriptural teaching that the price of redemption was the satisfaction of the demands of the law and release from its guilt by Christ's substitution of his own life for that of the sinner. Liberalism maintained that the idea of substitution was unworthy of high religion, according to which everyone must stand before God in his or her own freedom and responsibility as an ethical personality.

In understanding the meaning of redemption, one should not forget that it is a deliverance or a release from a claim. The claim can be lifted only by one who has the right to do so, and he performs something to effect this release. Although it is not always present, the idea is never remote that this claim is satisfied by the payment of a price. This meaning was present in the ancient usage of the vocabulary of redemption, and it is part and parcel of the biblical message concerning redemption from SIN. Those who are under the alien dominion of sin, who are unable to deliver themselves, are delivered by the Savior Jesus Christ, who perfectly satisfied the demands of the law, thereby establishing his right to release from its claims those who are enthralled by it; who effected their release by the substitution of his own life (Gal. 3:13); and who restored them to the kingdom of their heavenly Father. The means of redemption and what it accomplishes are clearly set forth in Eph. 1:7 – 8: "In him we have redemption through his blood, the forgiveness of sins, in accordance with the riches of God's grace that he lavished on us with all wisdom and understanding" (cf. Col. 1:14).

Since redemption is a release from the bondage of sin, its meaning is as broad as the scope of sin and the evil attending it. The release falls, broadly speaking, under two heads: (1) redemption from the CURSE of the law (Gal. 3:10, 13), from the legal prescriptions of the OT dispensation (4:1 – 5), and from the requirement of obedience to the law as a way of life (3:10; 2:16, 19; Phil. 3:9); (2) redemption from the guilt and the power of sin (Tit. 2:14).

The inclusiveness of redemption from sin and from its attending evils is shown by the fact that the final consummation of the entire redemptive process is called "the redemption" (Lk. 21:28; Rom. 8:23; Eph. 1:14; 4:30 ["the day of redemption"]). The exposition of this consummation (Eph. 1:14) clearly sets forth the elements of redemption. Those who have believed in Jesus Christ have been sealed by his HOLY SPIRIT. God has placed his stamp on them as a sign that they are his and as an assurance against loss.

PAUL regards the children of God as already having been purchased and as awaiting the final redemption when they shall receive their INHERITANCE. This event is called "the redemption of the purchased possession" (Eph. 1:14 KJV). The redeemed will be freed from the sinful world under whose dominion they still remain and they will be restored to the One who has the prior claim upon them by virtue of the fact that he has obtained them for his own possession. At their redemption the entire creation will be restored to him who is its rightful Lord.

Murray, *Redemption: Accomplished and Applied* [1955]; A. J. Hultgren, *Christ and His Benefits: Christology and Redemption in the New Testament* [1987].)

R. D. KNUDSEN

red heifer. See HEIFER, RED.

Red Sea. In modern usage, this name refers to the NW arm of the Indian Ocean, separating Africa from the Arabian Peninsula; at the end it splits into the Gulf of Suez on the W and the Gulf of Aqa-bah on the E. In the OT, the name is a translation of the Hebrew phrase *yam-sûp (H3542 + H6068),* meaning literally "Sea of Reeds." The SEPTUAGINT renders it with *erythra thalassa (G2261 + G2498),* "Red Sea," a term that had earlier been used by HERODOTUS (though he applied it more generally to include even the Indian Ocean). As used in the Bible, the name appears to refer to three distinct places.

I. The waters of the exodus. From comparison of Exod. 14 with 15:22, and by noting the poetic parallelism within 15:4, it is clear that the "sea" crossed by the Hebrews in ch. 14 was the *yam-sûp.* At first sight, Hebrew *Sûp* resembles Arabic ṣ*uf,* "weeds" (including seaweed), but the difference in sibilants *(s* and the emphatic ṣ*)* makes any connection unlikely. Rather, the word *sûp* corresponds precisely to Egyptian *tw(y),* "papyrus," and *yam-sûp* to Egyptian *p⁾-ṯwf* , "papyrus-marshes," particularly in the NE delta of the NILE (see PAPYRUS). In an ancient Egyptian document, the products of *p⁾-ṯwf* are said to come to Pi-Ramessē (or Per-Ramesses; see RAMESES), and the phrase is set in parallel with SHIHOR (Papyrus Anastasi III, 2.11 – 12, trans. in *ANET,* 471b; see also R. A. Caminos, *Late-Egyptian Miscellanies* [1954], 74; A. H. Gardiner, *Ancient Egyptian Onomastica* 2 [1947], 201[*], 202[*]:418; id. in *JEA* 5 [1918]: 251–52; A. Erman and H. Grapow, *Wörterbuch der Aegyptischen Sprache,* 5 [1931, *Beleg-stellen* 1953], 359:6–10). Shihor is indubitably the northeasternmost stretch of the Pelusiac (easternmost) arm of the Nile, running from just W of the present Suez Canal (roughly the latitude of Tineh) to the Mediterranean coast in antiquity, but not extant today. Thus, *p⁾-ṯwf* would be associated with the ancient lakes and marshes corresponding approximately to the SE corner of present Lake Menzaleh and to the region S of it, such as Lake Ballaḥ and its environs southward to the Bitter Lakes. (For a different view of the relationship between the Hebrew and Egyptian terms, see J. R. Huddleston in *ABD*, 5:633 – 42, esp. 636 – 37.)

The Red Sea.

This general location on a N-S line due E of the probable site of Rameses near Qantir (and even E of Tanis, its main rival for that distinction) agrees well with Exod. 10:13, 19. A strong E wind was the means of bringing locusts into Egypt and troubling the PHARAOH at his residence; conversely, after his appeal to MOSES, a strong W wind bore them back eastward into the Sea of Reeds, implying that the latter was E from Rameses. This geographical factor thus supports an identification of the Sea of Reeds of the exodus with the area of lakes and marsh already mentioned, and not with the present-day Gulf of Suez. The very name "Sea of Reeds" would suggest waters that bordered on fresh-water marshes, etc., where papyrus and reeds might grow, again not true of the Gulf of Suez and the modern Red Sea. The foregoing philological evidence on *sûp* and the geographical factors here noted were not seriously considered by N. H. Snaith (in *VT* 15 [1965]: 395ff.); yet his views have been taken up by B. F. Batto (in *JBL* 102 [1983]: 27 – 35), who argues that *yam-sûp* has nothing to do with a reedy body of water but rather refers to a mythological "sea at the end [of the world]" (cf. Heb. *sôp H6067,* "end").

A former theory that the present Gulf of Suez may have extended much farther N in antiquity to include, for example, the Bitter Lakes, seemed to be firmly excluded by the siting of the ancient Egyptian port at Merkhah on the W coast of Sinai in the 15th cent. B.C. at levels unchanged into modern times (see W. F. Albright in *BASOR* 109 [Feb. 1948]: 14 – 15). However, J. K. Hoffmeier (*Israel in Egypt: The Evidence for the Authenticity of the Exodus Tradition* [1997], 207 – 10) has revived this theory and used it to answer Batto's objections.

Some identify the Bitter Lakes, pictured here, with the Red (or Reed) Sea which the Israelites crossed during the exodus out of Egypt.

In any case, the wilderness through which the Hebrews were to go near the *yam-sûp* (Exod. 13:18) was that of SHUR (15:22), this being roughly the N Sinai desert E of the Suez Canal and between the Mediterranean coast and about the latitude of Lake Timsah. This agrees with a Sea of Reeds in the Lake Ballaḥ area, and both locations are, in turn, readily compatible with a possible route of the exodus from Rameses (at Qantir) to SUCCOTH (prob. Tell el-Maskhuta) and then to the wilderness edge, turning back up to Lake Ballaḥ and so across a Sea of Reeds somewhere there (alternatively, the crossing may have been farther S, such as at the junction of the Great and Little Bitter Lakes; cf. C. G. Rasmussen, *Zondervan NIV Atlas of the Bible* [1989], 89). Thence, the Hebrews went S through Shur/ Etham toward the W coast of the Sinai peninsula. See EXODUS, THE.

The phenomenon of E and W winds respectively flooding and uncovering routes in these lakes and fens of the Nile delta persists even in modern times (cf. Ali Shafei, *Bulletin de la Société Royale de Géographie d'Égypte* 16 [1946]: 278 and figs. 10, 11). The deliverance of the Hebrews through their crossing of the sea was remembered forever after, under Moses (Deut. 11:4), Joshua (2:10 and 4:23, even among aliens; 24:6), among the psalmists (e.g., Pss. 78:13; 106:7, 9, 22; 136:13), and after the EXILE (Neh. 9:9) into the NT (Acts 7:36; 1 Cor. 10:1 – 2; Heb. 11:29).

In Ps. 78:12 and 43, the term "fields of Zoan" (NRSV) has long been identified with the corresponding Egyptian *sht-d⁽ (nt)*, "Field of Dja⁽" or "Field of Dja⁽net" (i.e., of Tanis, biblical ZOAN). This region was the hinterland of the 14th Lower Egyptian province in the terminology of later times (Gardiner in *JEA* 5 [1918]: 248 – 49), and this probably adjoined the lower course of the Pelusiac arm of the Nile between Qantir and near Qantara, in line with the suggested route of the exodus and location of the Sea of Reeds.

II. Gulf of Suez. After reaching the wilderness of Shur/Etham (Exod. 15:22; Num. 33:8), the Hebrews in three days (prob. on the third day, our mode of reckoning) reached MARAH, went on to ELIM, and thereafter encamped by the *yam-sûp* (Num. 33:10 – 11) before proceeding into the Desert of Sin (Exod. 16:1; Num. 33:11) en route to SINAI, which they reached after three more stops (Exod.

17; 19:1 – 2; cf. Num. 33:12 – 15). On this reckoning, the *yam-sûp* (of Num. 33:10 – 11) would be somewhere on the Gulf of Suez coast of Sinai, if Mount Sinai/Horeb is located in the S of that peninsula. (There seems no warrant for identifying this *yam-sûp* with the Mediterranean Sea, as this would bring the Hebrews along the forbidden way of the land of the PHILISTINES. To identify it with the Gulf of Aqabah would probably require a Mount Sinai located in MIDIAN to the E of that Gulf, possible but perhaps improbable because it would take the Hebrews across the howling wilderness of et-Tih instead of the wadis of south-central Sinai.) An application of the name *yam-sûp* to the Gulf of Suez may perhaps be considered as simply an extended use of terminology to include the gulf adjoining the lakes region to the S.

III. Gulf of Aqabah. From periods in Hebrew history subsequent to the exodus, it is clear that the term *yam-sûp* could also be applied to the present-day Gulf of AQABAH, along the E coast of the Sinai peninsula. First Kings explicitly locates EZION GEBER—SOLOMON's seaport settlement—beside Eloth (ELATH) on the shore of the *yam-sûp* in the land of EDOM (1 Ki. 9:26), a location which fits the Gulf of Aqabah but neither that of Suez nor of Lake Ballaḥ. Jeremiah 49:21 alludes to the *yam-sûp* in an oracle on Edom, again probably the Gulf of Aqabah. From this basis, one may work back to occasional references in the Pentateuch. Deuteronomy 1:1 locates the words of Moses "in the desert east of the Jordan—that is, in the Arabah—opposite Suph, between Paran and Tophel, Laban, Hazeroth and Dizahab." PARAN is the wilderness in the vicinity of KADESH BARNEA (Num. 10:12; 13:26; et al.), and the ARABAH is the S end of the JORDAN Rift Valley, between the Dead Sea and the Gulf of Aqabah. Hence, SUPH is some place in this vicinity, if it is not merely an abbreviation for *yamsûp*, the Gulf of Aqabah itself. (Such a place-name Suph might even be reflected also as Suphah in the poetic fragment in Num. 21:14, but this is, of course, by no means certain.)

After dwelling by Kadesh Barnea (Num. 13:26) in the wilderness of Paran (12:16), the Hebrews were commanded to go to the wilderness by the way to the *yam-sûp* (14:25; Deut. 1:40). Thereafter occurred the incident of KORAH, DATHAN, and ABIRAM, who were swallowed up by the earth with their tents (Num. 16), an incident that may have occurred among the mudflats or *kewirs* of the Arabah (on the phenomenon, cf. Greta Hort, *Australian Biblical Review* 7 [1959]: 2 – 26, esp. 19 – 26), not so far from the Gulf of Aqabah. Similarly, after the burial of AARON at Mount HOR consequent upon a further sojourn around Kadesh Barnea (20:22—21:3), Israel again went by the way of the *yam-sûp* "to go around Edom" (21:4; cf. Deut. 2:1; Jdg. 11:16), a route that would appear to take them S from Kadesh Barnea to the head of the Gulf of Aqabah as if to go past the southern extremity of Edom and then to by-pass that land northward along its eastern border, and on past MOAB (both nations refusing Israel entry, Num. 20:14 – 21; Jdg. 11:17).

In the case of Exod. 23:31, one may possibly have a SW borderline of the promised land, running from the head of the Gulf of Aqabah (*yam-sûp*) up to the Mediterranean (sea of the Philistines), that is, roughly along the course of the Wadi el-ʿArish as elsewhere attested (see EGYPT, BROOK OF). The contemporary narrow and wide uses of a term like *yam-sûp* are not so unusual (cf. Egyptian parallels for seas and eastern lands cited in *NBD*, 1004b).

<div align="right">K. A. KITCHEN</div>

reed. This English term is applied to various tall grasses that grow primarily in wet areas (see also BULRUSH). Hebrew words that can be translated "reed" include *ʾagmôn H109* (Job 41:20 et al.; cf. *ʾăgam H106*, "[reed] pond," Exod. 7:19 et al.), *ʾāḥû H286* (Gen. 41:2 et al.), *sûp H6068* (Exod. 2:3

et al., but used primarily in the combination *yam-sûp*, "Sea of Reeds"; see RED SEA), and especially *qāneh H7866* (prob. *Arundo donax,* 1 Ki. 14:15 et al.). This last term has a broad semantic range and can refer to a cane or even a beam. This can be said also for the Greek word *kalamos G2812*; the crowds smote the Lord Jesus on the head with a reed (Mk. 15:19), and someone put a soaked sponge on a reed so as to get him to drink when he was on the cross (15:36). Also, an angel is said to measure the new Jerusalem with a *kalamos* (Rev. 21:16). See MEASURING REED.

Papyrus reeds growing in wetlands.

The *Arundo donax*, also known as the "giant reed" and the "Persian reed" (used for the manufacture of woodwind instruments) is found in the JORDAN Valley and around the DEAD SEA. Sometimes confused with bamboo, it can grow to the height of 18 ft., carrying at its tip a white plume. Its unusually hard stem may have a diameter of 3 in. These thick, strong stems were used as canes or walking sticks, hence the reference in Ezek. 29:6 and 2 Ki. 18:21, where King SENNACHERIB referred to Egypt as the staff of a bruised reed. In the latter passage, the reference to the piercing of a hand refers to the fact that the hard stem of the reed can break up into sharp, thin slivers with points that can easily make holes in the flesh. (See *FFB*, 171 – 72.)

Whether the cane or rod used to convey the sponge to our Lord's mouth was the *Arundo donax* is

not important. There are experts who consider that the necessarily long stem used was that of the durra (or dhura), sometimes called the Jerusalem corn. The true durra is the Egyptian rice corn, which can grow to a height of 16 ft. Its stout stems are filled with a thick, dry pith which is never sweet. The plant grows well without irrigation.

Pens in biblical days were made from reeds; thus 3 Jn. 13—"I have much to write you, but I do not want to do so with pen and ink"—refers to a reed pen, as do the pens mentioned in 3 Macc. 4:20. These pens would normally be used to write on papyrus, while the INK might be lamp black stirred into gall juice. A special KNIFE obviously was used for making the nib of the reed pen (cf. "penknife" in Jer. 36:23 NRSV). Reed pens can be made from the tall grass, *Phragmites communis* (a perennial allied to the *Arundo*). This common reed, found in the Holy Land, has stems that can grow 12 ft. in height. The stems are much valued for thatching in Britain.

The PAPYRUS reed (*Cyperus papyrus*) grew down the NILE in the shallower parts and produced huge main, thick horizontal roots, often 20 ft. long, out of which grew shorter roots for anchorage purposes. Whole plants were dug up, the roots being used for tool handles, and the stems being made into sandals, ropes, mats, and baskets. The pith of the stems could be eaten, either cooked or raw (cf. Ezek. 3:1 – 3; Rev. 10:9 – 10), and it could be extracted to make writing material.

Sometimes the English word *rush* is used in Bible versions as roughly synonymous with *reed* (e.g., Job 8:11 KJV; Isa. 19:6 NRSV and NIV). The problem is increased because a large number of different species of rush grow in Palestine. There are some fifteen different types of club rush, such as *Scirpus maritimus* and *Scirpus lacustris,* and some twenty types of the common rush, *Juncus maritimus*, which are found at the seaside. There is also *Juncus effusus*, found in the bogs and wet places.

W. E. SHEWELL-COOPER

Reeds, Sea of. See RED SEA.

Reelaiah ree'uh-lay'uh (רְעֵלָיָה *H8305,* derivation uncertain). An Israelite mentioned among leading individuals who returned from Babylon with ZERUBBABEL (Ezra 2:2; called "Raamiah" in Neh. 7:7 and "Resaiah" in 1 Esd. 5:8 [KJV, "Reesaias"]). See also REELIAH.

Reeliah ree'uh-li'uh (Ρεελιου [the reading of most MSS]; Rahlfs and the Göttingen *Septuaginta* have Βοροολιου, following CODEX VATICANUS). An Israelite mentioned among leading individuals who returned from Babylon with ZERUBBABEL (1 Esd. 5:8 [KJV, "Reelius"]). It corresponds in position to BIGVAI in Ezra 2:2 and Neh. 7:7, but in form it seems to be the equivalent of REELAIAH.

Reelius ree'uh-li'uhs. KJV Apoc. form of REELIAH (1 Esd. 5:8).

Reesaias ree'uh-say'yuhs. KJV Apoc. form of RAAMAIAH (1 Esd. 5:8).

refine. This English term, referring to the process of eliminating impurities, is used to render the Hebrew verbs *zāqaq H2423,* "to filter, distill, purify" (1 Chr. 28:18 et al.), and *sārap H7671,* "to smelt, refine" (Ps. 12:6 et al.). In the NT, it translates Greek *pyroō G4792* (lit., "to burn with fire," Rev. 1:15 [NIV, "glowing"]; 3:18); the NIV also uses it once to render *dokimazō G1507* ("to test," 1 Pet. 1:7). The process of eliminating impurities, especially from metals.

The process of refining was quite simple. It involved heating the ore to the melting point and then extracting the metal. The metal was refined by heating it to the liquid state and then skimming or

blowing off the impurities, or dross. Naturally, such refined GOLD or SILVER was more precious and expensive. The altar of incense was made of refined gold (1 Chr. 28:18) and the Laodicean church was urged to buy such refined gold (Rev. 3:18). The Bible provides some indication of the process: there is mention of the furnace (Ps. 12:6), the chemical lye (Isa. 1:25), and the bellows used to create a draft (Jer. 6:29).

The process of refining illustrates God's dealing with his people; he is the refiner, they are the metal. So Isaiah can say figuratively, "See, I have refined you, though not as silver;/ I have tested you in the furnace of affliction" (Isa. 48:10; cf. 1:25). Malachi uses both Hebrew words together: "He will sit as a refiner *[mĕsarep]* and purifier of silver; he will purify the Levites and refine *[ziqqaq]* them like gold and silver" (Mal. 3:3). The psalmist prayed for such a process when he said, "Test me, O LORD, and try me, / examine *[srp]* my heart and my mind" (Ps. 26:2b).

R. L. ALDEN

refuge. This English term, which is especially common in the book of Psalms, is used to render a variety of Hebrew words, in particular the noun *maḥseh H4726* (Ps. 14:6 et al.); the expression "to take refuge" translates the Hebrew verb *ḥāsă H2879 (2:12* et al.). Such terms express security from danger, such as is found in a shelter during a storm. God is the shelter of the pious (Ps. 104:18; Isa. 4:6). Because a refuge is often a place to which one flees (cf. Heb. *nûs H5674),* the concept can also be expressed with the term *manôs H4960* (e.g., Ps. 59:16). Moreover, some nouns that mean "tower," "stronghold," and so on are used figuratively for "refuge" (e.g., *miśgāb H5369* in 9:9). In the case of the expression CITIES OF REFUGE, the term is *miqlāt H5236* (Num. 35:6 et al.).

Regem ree'guhm (רֶגֶם *H8084,* perhaps "friend" [BDB, 920] or "voice" [i.e., of God; cf. *HALOT,* 3:1187]). Son of Jahdai and apparently a descendant of JUDAH in the line of CALEB (1 Chr. 2:47). See discussion under JAHDAI.

Regem-Melech ree'guhm-mee'lik (רֶגֶם מֶלֶךְ *H8085,* perhaps "friend of the king" or "[the god] Milk has spoken"; see REGEM). TNIV Regem-Melek. An Israelite leader who, with SHAREZER, was sent by the people of BETHEL to the temple priests to inquire regarding the propriety of continuing to fast in commemoration of the destruction of the TEMPLE (Zech. 7:2). There is uncertainty as to whether a personal name or a title ("the king's friend" applied to Sharezer?) is intended. Some emend the text to read *rabmag melek,* thus, "The people of Bethel had sent Sharezer, Rabmag of the king." See RABMAG.

S. BARABAS

regeneration. The biblical doctrine of the new birth.

I. The biblical witness. Jesus' nocturnal conversation with NICODEMUS, a member of the SANHEDRIN, is the most important scriptural witness to the doctrine of regeneration. Representing some faction of the important religious sect of the PHARISEES, Nicodemus came to Jesus to inquire about the KINGDOM OF GOD. In addressing Jesus he recognizes him as a teacher and acknowledges the divine origin of his message. No one, he says, could have performed the MIRACLES that Jesus did unless God were with him. Himself a teacher of the Jews, he comes to Jesus, whom he believes will be able to instruct him.

In making his reply Jesus does not deny the truth of what Nicodemus has said about him. Nevertheless, he shows his dissatisfaction with the assumptions that prompted Nicodemus's visit by

abruptly changing the course of the discussion. Instead of simply giving him information, Jesus says, "I tell you the truth, no one can see the kingdom of God unless he is born again" (Jn. 3:3). Surprised, Nico-demus turns in his mind to what is familiar to him, namely, natural childbirth. "How can a man be born when he is old?…Surely he cannot enter a second time into his mother's womb to be born!" (v. 4). In answering Jesus reinforces what he has previously said, "You should not be surprised at my saying, 'You must be born again'" (v. 7).

Undoubtedly Jesus refers here to the necessity of a new birth. The very abruptness with which he breaks off the thread of the conversation shows that he wanted Nicodemus to realize that his query could not be answered properly by simply adding to his store of information or simply correcting him in one or another respect. It was not sufficient for him to carry on with the life that he already had; it was necessary for him to be born again.

That the newness of this birth is in mind here cannot be questioned; nevertheless, the Greek word *anōthen G540,* "again," should probably be translated "from above" (cf. NRSV and see Jn. 3:31). This rendering is supported by the fact that Jesus proceeds immediately to contrast the natural birth and the new birth as to their origins. "Flesh gives birth to flesh, but the Spirit gives birth to spirit" (v. 6). What is required for entering the kingdom of God is that one be born "of water and the Spirit" (v. 5). When he refers to regeneration, John always describes it as a birth from God (cf. 1:13). Thus what is in mind is not only the newness of the birth, but also its origin in the supernatural activity of the Spirit.

The source of the new birth, as Jesus' reference to the inscrutable activity of the wind shows, lies beyond the range of our earthly experience (Jn. 3:8). It is not enough, therefore, to call this a "new birth"; it is a birth "from above," by the agency of the creative activity of the Spirit of God. The ideas of newness, regeneration, and a supernatural origin in the activity of the HOLY SPIRIT are all joined together in Tit. 3:5. Here SALVATION is said to occur by means of "the washing of rebirth [*palin-genesia G4098*] and renewal [*anakainōsis G364*] by the Holy Spirit."

In salvation, therefore, there is a washing and a renewing, a change in the innermost attitudes and inclinations of the HEART. And the change is of such a nature that it can be compared only with the generation and birth of life. Unlike natural birth, however, this birth does not have its origin in the human WILL but in the sovereign power of God. It is a birth that is not of the flesh nor of blood but of the Spirit (Jn. 1:13). The analogy of birth shows that regeneration is a radical change, which brings one from an earlier condition of SIN and DEATH to a renewed state of HOLINESS and LIFE.

In the same vein the Bible speaks of one who has been regenerated as a "new creation" in Christ (2 Cor. 5:17). According to PAUL (Gal. 6:15), what really matters is a new creation. Thus the Christian is exhorted "to put on the new self, created to be like God in true righteousness and holiness" (Eph. 4:24). So also the new birth is described as an act of being brought forth (Jas. 1:18 RSV) or being given life (Jn. 5:21; Eph. 2:5). Believers are said to have been made alive from the dead (Rom. 6:13). They are also called God's "workmanship" (Eph. 2:10).

Having been dead in trespasses and sins (Eph. 2:1, 5), blind and unresponsive to the things that pertain to the Spirit of God (1 Cor. 2:14), unable to do any work that merits salvation (2 Tim. 1:9; Tit. 3:5), the person who has been corrupted in all of his powers is re-created in Christ Jesus. Even as a newborn child has had nothing to do with his or her conception and birth, the transformation of the new birth is one that cannot be accounted for by any powers resident within the person but only by the power of the Spirit that is from above.

II. The biblical theological perspective. The Greek word for "regeneration" (*palingenesia G4098*)

is found only in Matt. 19:28 and Tit. 3:5. In the first instance it refers to the restoration of the entire universe at the end time (see ESCHATOLOGY). Only in the latter case does it refer to the initiation of a new life in the believer. More commonly this new beginning is expressed by the Greek verb *gennaō G1164*, "to beget," which in the passive means, "to be born" (cf. Jn. 1:13; 3:3 – 8; 1 Pet. 1:3 and 23 [*anagennaō G335*, "to beget anew"]; 1 Jn. 2:29; 3:9; 4:7; 5:1, 4, 18). Other passages use the verb *zōopoieō G2443*, "to make alive" (e.g., Jn. 6:63; 2 Cor. 3:6; *syzōopoieō G5188* in Eph. 2:4; Col. 2:13). In one passage the Greek verb *apokyeō G652* is used, which means "to bear" or "to bring forth" (Jas. 1:18). The idea of the production of a new life is also expressed by the word *ktizō G3231*, "to create" (Eph. 2:10). The resulting work is then called a *kainē ktisis*, a "new creation" (2 Cor. 5:17; Gal. 6:15), or a *kainos anthrōpos*, a "new man" (Eph. 4:24 KJV; see MAN, NEW).

The more specific doctrine of the new birth occurs, however, in the context of the broader biblical teaching concerning *renewal*. In the NT, the verb *anakainoō G363* and its cognate noun *anakainōsis G364* appear a few times only in the Epistles (Rom. 12:2; 2 Cor. 4:16; Col. 3:10; Tit. 3:5; Heb. 6:6; in Eph. 4:23 the verb is *ananeoomai G391*). That the words themselves do not often appear does not mean, however, that the doctrine is unimportant. The biblical idea of renewal is taught at all stages of the revelation of God.

In the OT the ideas of cleansing (see CLEAN) and PURIFICATION are very prominent. In a great number of cases this cleansing is ceremonial or ritual. That is to say, it is part of a rite whose performance qualified one for something, such as participation in a religious ceremony or being publicly accepted in the tribe. Examples are the ceremonial purification of the high priest before his entering the holy place (Lev. 16:1 – 4) and the ritual cleansing of a woman after childbirth (ch. 12). These ceremonial cleansings, although they were symbolic and did not necessarily correspond with an inward holiness on the part of the one who performed them, were not purely external and devoid of ethical significance, as liberal theology has claimed. They were symbolic of the righteousness and holiness of heart that was demanded of the people of God. Thus the prophets denounced the people when these ceremonies became external and were no longer understood in their deeper significance. There was the prophecy of a new day in which the law of God would be inscribed on the heart, when there would be a people who were truly separated to God (Jer. 31:33; see COVENANT, THE NEW).

Although the element of renewal that is the new birth is not so clearly taught in the OT as it is in the NT, the OT idea of the relationship between God and his people requires a perfect standard of righteousness and holiness, and its promise of renewal is that of a renewal of the heart. The central meaning of God's COVENANT with his people was that he would be a God to them and that they would be his people (Gen. 17:1, 7 – 8). This meant that they were separated to him. It was symbolized in their being called out of the nations and their being circumcised. CIRCUMCISION signified the covenant with God in its deepest intent (17:10). It meant that they were set apart for him and for the holiness which was fitting to this union with him. Union with God was symbolized also in terms of the MARRIAGE bond, and breaking his covenant was compared with whoredom (Jer. 2:2; 3:1; Hos. 1:2; et al.).

It is to this inner relationship and to its realization that the OT symbolism refers. Indeed, this relationship had not yet been fully realized. God's people were still under age. They had to be governed by a LAW that was greatly detailed and burdensome (Acts 15:10; Gal. 3:19, 23 – 26; 4:1 – 7; 5:1), a law that often could be observed externally without any corresponding change of heart. Furthermore, access to God was through a human priesthood (see PRIESTS AND LEVITES), and God's word was received through a special group, the PROPHETS.

Nevertheless, the OT itself recognizes the temporary nature of these arrangements. It promises

that a time will come when the Spirit will be poured out upon all flesh (Joel 2:28). It also recognizes the inner meaning of the law, using its provisions to refer to the deepest meaning of the covenant. "The LORD your God will circumcise your hearts and the hearts of your descendants, so that you may love him with all your heart and with all your soul, and live" (Deut. 30:6). It also calls the people out of their indifference and rebellion to the true service of God. "I will give them an undivided heart and put a new spirit in them; I will remove from them their heart of stone and give them a heart of flesh"

This *mikveh*, uncovered at the S end of the temple mount, was used for purification rites in Jewish ceremonies. Ceremonial cleansing or washing, a key symbolic act in the ritual of the OT, formed part of the background for the theological idea of regeneration in the NT.

(Ezek. 11:19; cf. 36:26; 37:1 – 14; Jer. 31:33). In response one finds the beautiful expressions of piety of the OT saints, "Cleanse me with hyssop, and I will be clean; / wash me, and I will be whiter than snow…Create in me a pure heart, O God, / and renew a steadfast spirit within me" (Ps. 51:7, 10).

In a few passages, as we have observed, the NT speaks of renewal specifically in terms of a new birth by the power of the Holy Spirit. Even in the NT, however, the doctrine of the new birth occurs in the context of the more general teaching of renewal, which includes not only this birth itself but everything that flows out of it, namely the new life in Christ in its entirety. Regeneration in the narrow sense of the new birth may indeed be distinguished from this broader idea of renewal; but it should not be isolated from it.

III. Doctrinal development. Considering the fact that there is no elaborate body of teaching about the new birth in the Scriptures and that this teaching is set in the context of a broader teaching concerning renewal, it is not surprising that the term *regeneration* did not immediately have in the church the more precise significance it later acquired in theology.

In the early church the term was used to denote a change intimately connected with the remission of sins. No clear distinction was made between regeneration, the act of God in which a person is made holy (see also SANCTIFICATION), and JUSTIFICATION, the act of God in which a person is declared to be righteous. In his controversy with Pelagius, who taught that the human will is free to choose the good, the church father Augustine maintained that regeneration is a work of God alone that changes the heart and that makes it possible for one to understand the gospel and to be converted. There was, however, still no clear distinction made between regeneration and other doctrines pertaining to renewal.

The failure to distinguish between regeneration and justification had adverse effects in scholastic theology. Justification came to be regarded as the more inclusive notion; it was supposed to include regeneration and to be an act in which God and the sinner cooperated. According to the dominant view, that of Thomas Aquinas, justification was first an infusion of grace, that is, the birth of a new creation (regeneration) and, based upon it, the FORGIVENESS of sins and the removal of guilt. In the Roman Catholic Church there is still a certain confusion of regeneration and justification. The declarative nature of justification is lost to sight and justification is regarded to be an act or a process of renewal in which a person's subjective life is changed. The sinner, in the opinion of the Roman church, is not *declared* to be just but is *made* just.

Like the church fathers, the Reformers, including both Luther and Calvin, employed the term *regeneration* in a broad sense. Calvin used it to designate the entire process by which the believer is renewed, including not only the divine act by which the new life comes into being in the Christian, but also the conversion and sanctification that flow from it. This broad use of the word continued on even in the followers of the Reformers. It led, however, to confusion. Gradually, therefore, there arose a stricter use of the term, which came to be distinguished from, but included under, *conversion*.

Francis Turretin distinguished two types of conversion, namely, "habitual" or "passive" conversion, which is the production of a habit or disposition of the soul, and "actual" or "active" conversion, in which this inner disposition comes to expression in REPENTANCE and FAITH. The first, he said, might more aptly be called *regeneration*. Thus the meaning of this term became restricted and was distinguished from the broader conception of renewal. The word *regeneration* is presently often used to denote only the implantation of a new life, not to its manifestations.

In the theology that arose in the wake of the rationalism of the Enlightenment, there was a denial

that regeneration was an act of God renewing the heart unto salvation. Rationalism, to be exact, secularized the Christian view of regeneration. That is to say, the idea that the Holy Spirit re-creates the innermost life was transformed into the notion that there is in everyone an unspoiled creative source of REASON. The need for an inner renewal of human life was eliminated. Human beings were supposed to have a pure spring of truth and goodness already within themselves. It was only necessary to let this reason come to expression. Indeed, reason had to disentangle each individual from the web of irrational circumstances surrounding his life; but reason itself, at the very heart of the personality, had no need of regeneration. Of itself, reason was supposed to be able to change people, to redirect their will and their emotions.

In reaction to the intellectualism of rationalism, theological liberalism found a place again for the idea of regeneration. Friedrich Schleiermacher, who has been called the father of modern theology, is supposed to have reintroduced the idea of regeneration into theology. In Schleiermacher's thought, individual understanding is no longer at the center. What is now central is the divine life as it is manifested in Jesus Christ. Through a personal encounter with Christ, there is within the individual the birth of a new religious personality. His weak and suppressed God-consciousness is strengthened and made dominant, there is a break with his old situation, and there is the beginning of a new life of personal communion with God. Schleiermacher thought of regeneration as being this critical point, where the old life breaks off and a new life begins.

Although Schleiermacher broke with the rationalism and intellectualism of modernism, regeneration is for him still nothing more than strengthening and making dominant something that is already present in man. The encounter with Jesus Christ simply awakens the slumbering consciousness of the divine.

The theology of neoorthodoxy, which developed between the two world wars, protested that liberal theology had been man-centered and had allowed no real place for regeneration as truly a work of God. A point was sought from which regeneration could be viewed as a new creation, from a source which transcended anything in the human being. It had to be something more than a projection of a person's own possibilities.

Karl Barth's theology of the Word maintains that whenever the Word of God is present, in distinction from the mere words of human beings, there is revelation and a radical change from death to life. The person is transformed by the word, which uses the words of human beings breaking in as grace onto the level of human life.

Barth believed that he had corrected the man-centeredness of liberal theology and had developed a position that allowed for the radical change from death to life of the new birth. The focus is supposed to have shifted from the individual and his possibilities to God's electing love in Christ. God's grace is triumphant, making all things new.

Barth, however, has always insisted that when the saving Word of God enters history it invades a realm that is foreign to it. It must transform human words into the Word of God. As soon as it has entered history, it has already taken a form that is at the disposal of human beings. It is no longer the Word of God; it has become the words of men. God's saving revelation can be only from moment to moment. Nothing can simply be said *to be* the Word of God; the Word of God must always *become* the Word of God.

Similarly the new birth is supposed to have a transcendent source. As soon, however, as it is thought to impart a new disposition or qualities that would serve to distinguish one individual or group from another, it has become self-sufficient, Barth thinks, and is in conflict with the living confrontation with God and his revelation. To think that regeneration effects such a change is to deny

the freedom of God and his revelation and to place them at our disposal.

This view brings Barth into sharp opposition to orthodox theology. The latter saw no difficulty in holding at one and the same time to the SOVEREIGNTY OF GOD in his revelation and to the idea that regeneration implants new dispositions, principles, tastes, etc., that underlie and determine the character of a person and all of his acts. To accept the traditional position means for Barth to have reverted to the notion that human beings can be something in and of themselves, apart from their relationship to God and from their dependence upon him. For Barth the traditional position involves a denial of the biblical teaching of justification by faith. Insofar as believers are thought to live by virtue of something they possess as a quality of their life, they live by sight and no longer by grace through faith. There is an observable, describable principle within them that is supposed to result in a nearly mechanical fashion in their sanctification.

More recently Barth has emphasized the positive relation that pertains through grace between God and humanity. By the inner logic of his own position Barth has come to the view that all people are already elected in Christ. They are already in Christ; they must simply come to recognize that fact. As the more positive side of Barth's theology has gotten the upper hand—as the theme of divine judgment has been consciously subordinated to the theme of the triumph of grace—the radical change from death to life of the new birth has become indistinct. It has faded into the difference between those who do and those who do not yet acknowledge the fact that they already have been elected in Christ.

Barth believes that he has truly interpreted the scriptural teaching concerning the grace of God which is new every morning. However, this has been impossible for Barth because of his unwillingness to accept the true authority of Scripture. Instead, he has established a sanctuary for human autonomy, which can dictate how the saving revelation of God and the work of the Spirit are to appear in history.

In spite of Barth's intentions he cannot obtain, therefore, a view of regeneration that affects the very heart of human existence. In their autonomous critical powers and in their historical cultural activity, human beings are neutral. They have no need of regeneration. Indeed, here regeneration is not allowed to touch. Human autonomy is allowed to establish a realm into which the saving revelation of God cannot penetrate directly.

In contrast, the scriptural position is that human beings were created in the IMAGE OF GOD and that in their pristine goodness were given the task of subduing the world to the glory of God; that they sinned, becoming corrupted in all of their powers; and that they are in need of a regeneration that affects the very heart of their existence, a renewal that will reestablish them in the service of the Creator with all of their heart, soul, and mind.

IV. Doctrinal formulation. A survey of the idea of regeneration in the Scriptures shows that it is not sharply defined. It warrants, however, making a distinction between (a) regeneration in the sense of the initial act by which God through the power of his Holy Spirit re-creates one into the new life in Christ and (b) regeneration in a broader sense that includes conversion, sanctification, and the final restoration of all things. Regeneration in the narrower sense it has assumed in theology should not be considered in isolation from this broader context. It is, indeed, first of all a new birth; but it also has to do with the entire process of renewal both in its personal and in its cosmic dimensions.

The reason for this double meaning is likely that regeneration in the narrow sense of the new birth is not simply an act that can be set off rigidly from other acts. Instead, it is a renewal at the very root of human existence whose significance must extend to everything that falls within the scope of

divine salvation. This radical change, at the very heart of the creation, must manifest itself, therefore, throughout its entire extent. The purpose of God is the salvation of the whole person and thus of the entire cosmos over which he was made the vicegerent.

This insight was grasped and elaborated clearly by the Dutch theologian Abraham Kuyper. For him regeneration was more than one link among others in the chain of salvation. It became a universal theological principle of *palingenesis* (*palingenesia*). Kuyper grasped the radical nature of SIN. He understood that it affected the cosmos at its root and that from this center corruption spread into all of its parts. Kuyper, therefore, was able to give an equally central and decisive place to the re-creation of the cosmos in Christ Jesus. It became necessary for the Christian to be concerned not only with the question of personal holiness but also with the principles that should guide the regenerated mind in all of its activities, in society as well as in the church.

When it is viewed in this fashion, regeneration is not thought to add any new part to the person. It does not endow individuals with any new function. Regeneration is a renewal of human beings in the heart, a renovation in the deepest center of their existence. As such it differs from justification. The latter is a judicial declaration that the sinner is righteous on the basis of the righteousness of Christ, which has been imputed to him. One must, however, take into consideration not only the guilt but also the pollution of sin. It is necessary for one not only to be declared righteous, but also to be made holy. This is effected by regeneration. A principle of holiness is injected into the center of one's being. This holiness, to be sure, is not complete; nevertheless, it introduces into one's life the renewing power whose principle is nothing less than the perfect righteousness and holiness of God. The apostle John can say of the one who has been regenerated, "No one who is born of God will continue to sin, because God's seed remains in him; he cannot go on sinning, because he has been born of God" (1 Jn. 3:9).

Because regeneration affects the very heart of human existence, neither its place nor its effects can be localized. One cannot ask where it takes place, if one means one part of the human being in distinction from another. As the Scriptures teach, the work of the Spirit is inscrutable. It can be observed only in its effects. Jesus himself taught this, employing the wind as an analogy. The wind blows where it will. One observes its effects; but he cannot tell where it comes from or where it is going. So, Jesus says, is everyone who is born of the Spirit (Jn. 3:8). Likewise the scope of regeneration may not be limited. The entire person, in his or her intellectual, volitional, and emotive nature, has been corrupted by sin; therefore the entire person must be renewed according to the image of Christ.

If one understands the central meaning of regeneration, recognizing that it cannot be localized either as to its place or its effects, it will be clear that the difference between the regenerate and the unregenerate appears in an antithesis that runs through all of life. On the one hand, there will be a regenerated consciousness that seeks to subject everything to the Lordship of Christ; on the other hand, there will be a consciousness which, in the spirit of apostasy, will attempt to place creatures in their supposed independence from God at the center. One will then be obliged to bring this regenerated consciousness to bear upon all of life and its activities, not only on the study of the Bible and of theology but also on science, education, politics, and so forth.

This position, set forth by Abraham Kuyper and developed by others, provides a theological foundation for understanding the biblical doctrine that the entire creation participates in REDEMPTION. The entire creation also eagerly awaits the redemption of the children of God (Rom. 8:19 – 23). Both the human and subhuman creations are to be renewed in a new heaven and a new earth (see HEAVENS, NEW). That does not mean that every individual will be saved; nor does it mean that the works of

darkness will not be judged. Nevertheless, all things—that is, every aspect of the creation—will participate in salvation. All things will be renewed in the new heaven and the new earth.

<div align="right">R. D. KNUDSEN</div>

Rehabiah ree'huh-b*i*'uh (רְחַבְיָה *H8152* and רְחַבְיָהוּ *H8153*, "Yahweh has made wide" [i.e., has been generous]). Son of ELIEZER, grandson of MOSES, and ancestor of a leading Levite family (1 Chr. 23:17; 24:21; 26:25).

Rehob (person) ree'hob (רְחֹב *H8150*, possibly related to a root meaning "to be wide"). (1) Father of HADADEZER king of ZOBAH, whom DAVID defeated at the EUPHRATES (2 Sam. 8:3, 12). Some have taken the expression "son of Rehob" to indicate that Hadadezer was from BETH REHOB (cf. 10:6), suggesting that he united this town and Zobah under his rule (cf. the discussion in P. K. McCarter, Jr., *II Samuel*, AB 9 [1984], 248). See also REHOB (PLACE) #1.

(2) One of the Levites who signed the covenant of NEHEMIAH (Neh. 10:11).

Rehob (place) ree'hob (רְחֹב *H8149*, "broad place, open plaza"). (1) A town or district at the N end of the JORDAN Valley marking the limit of the journey of the Israelite spies (Num. 13:21). During the reign of DAVID it was one of the Aramean strongholds (see ARAM) that sent forces to the aid of AMMON (2 Sam. 10:8; called BETH REHOB in v. 6; cf. Jdg. 18:28). Its exact location is unknown.

(2) A town on the N border of ASHER, listed between ABDON and HAMMON (Josh. 19:28). In the topographical list of THUTMOSE III, this Rehob may be included (no. 87, *rḥb*). Its location is uncertain, but some identify it with Tell el-Balaṯ, some 12 mi. SE of TYRE (cf. Y. Aharoni, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 162); another possibility is Tell el-Raḥb, 4 mi. farther to the SE (S. Aḥituv, *Canaanite Toponyms in Ancient Egyptian Documents* [1984], 164). Other scholars believe that this Rehob is the same as #3 below (see discussion in *ABD*, 5:660 – 61).

(3) A town on the S border of Asher, listed after APHEK (Josh. 19:30); it was a Levitical city assigned to the descendants of GERSHON (21:31; 1 Chr. 6:75 [Heb. 6:60]). However, the people of Asher were unable to drive the Canaanite inhabitants out of the city (Jdg. 1:31). A town by the name of Rahabu is mentioned beside DOR in a list of RAMSES II (from Amara West in Nubia), and therefore many believe this Rehob should be located in the southern plain of ACCO (cf. B. Mazar, *Yedioth* 27 [1963]: 139 – 44 [in Heb.]). It is probably to be identified with Tell el-Bir el-Gharbi (also T. Berweh and T. Bira), some 6 mi. ESE of Acco (see *NEAEHL*, "Bira, Tel," 1:262 – 63). Another proposal is Khirbet Da<uk, about a mile closer to Acco (Z. Kallai, *Historical Geography of the Bible* [1986], 428).

<div align="right">B. K. WALTKE</div>

Rehoboam ree'huh-boh'uhm (רְחַבְעָם PH. *H8154,* possibly "the people have become extended" or "the [divine] kinsman has been generous" [cf. REHABIAH]; Ῥοβοάμ , *G4850).* KJV NT Roboam. Son of SOLOMON and first king of JUDAH after the division of the kingdom (1 Ki. 11:43—12:27; 14:21—

I. Family. Rehoboam was probably born before Solomon's accession to the throne; his mother was NAAMAH, an Ammonite princess (1 Ki. 11:42; 14:21). Following his father's example, Rehoboam maintained a large HAREM. Among his wives, MAHALATH belonged to DAVID's family by both parents; but he subsequently preferred MAACAH, daughter of Abishalom (ABSALOM), and nominated her eldest son ABIJAH as his successor. Several of his other sons he placed in command of fortified towns (2 Chr. 11:18 – 23).

II. Chronology. Rehoboam succeeded his father at the age of forty-one and reigned for seventeen years until his death. E. R. Thiele *(The Mysterious Numbers of the Hebrew Kings,* 3rd ed. [1983], 79 – 80) gives the dates as 931/930 to 914/913 B.C., on the basis of his analysis of the data in Kings, and working back from the battle of Qarqar in 853 (fixed by Assyrian records). Some check on this is afforded by SHISHAK's invasion in the fifth year of Rehoboam; the Egyptian evidence consists of an inscription and reliefs on the Bubastite gate of the temple of Amun at Karnak, built in Shishak's twenty-first year *(ANET,* 242 – 43). The unfinished state of these reliefs, and the apparent failure of Egypt to follow up her advantage politically, indicate that the campaign took place toward the end of Shishak's reign; and it is not mentioned in any earlier monument (W. F. Albright in *BASOR* 130 [April 1953]: 4 – 8).

Interest accordingly centers on Shishak's dates; Albright accepts a possible range from 937 to 930 for his accession, and arrives at a date for the invasion around 918, with a tolerance of five years either way. This agrees with his conclusion in an earlier article *(BASOR* 100 [Dec. 1945]: 16 – 20), relying on the synchronism in 2 Chr. 16:1 (see ASA), and on a theory that some of the figures and synchronisms given for ZIMRI, OMRI, and AHAB are secondary; he places Rehoboam's accession in 922. A. H. Gardiner, however, gives Shishak's reign as about 945 – 925 (*Egypt of the Pharaohs: An Introduction* [1961], 448), which tends to justify Thiele's conclusions.

M. Rowton (in *BASOR* 119 [Oct. 1950]: 20 – 22) supports a later date from Phoenician evidence, linking the foundation of Carthage in the seventh year of Pygmalion (for which the classical writer Timaeus gives a date equivalent to 814 B.C.) with the twelfth year of HIRAM, which would then be 959; according to JOSEPHUS, this was Solomon's fourth year, in which the temple was founded. His fortieth would thus be 923. The basic evidence is not substantial, and Rowton concedes that this is only a cross-check. Others place Rehoboam's reign in the period 926 to 910 (J. H. Hayes and P. K. Hooker, *A New Chronology for the Kings of Israel and Judah* [1988], 16 – 20). See also CHRONOLOGY (OT).

III. Revolt of Israel

A. Situation. Rehoboam came to the throne at a time of stress, due to several factors. (1) Heavy state expenditure, particularly on the court and standing army, was financed partly by taxation, which probably fell most severely on the agricultural north. This conclusion may be drawn on a priori grounds, and from the data in 1 Ki. 4 on Solomon's organization of districts (Y. Aharoni, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 315 – 17). (2) Forced labor was a standing complaint; notwithstanding a disclaimer in 1 Ki. 9:22, which may be taken to mean that there was no permanent loss of status for Israelites, it is clear from ADONIRAM's position and unpopularity (4:6; 12:18) that the precedent of the corvée for building the temple (5:13 – 17) was too regularly

followed. (3) Despite Solomon's large standing army, he had lost control of the DAMASCUS area, and the Arameans were raiding N of Israel (11:25). (4) The lax attitude to foreign religions was inviting divine judgment, expressed in AHIJAH's words to JEROBOAM (11:29 – 39). Jeroboam's position, and doubtless the prophecy itself, were known to Solomon and to Israel generally (12:3).

B. Confrontation. A national assembly was called at SHECHEM to confirm Rehoboam's accession. This apparently was not done for Solomon (the only exact precedent, since David's coronation began a fresh dynasty); such was the difference in the political atmosphere. It was not yet established that there was a hereditary right of accession apart from the wishes of the people, though there was a natural tendency to de facto hereditary succession, which might be called a presumptive right, even with the sons of GIDEON and SAUL. J. M. Myers (*II Chronicles*, AB 13 [1965], 65) notes that no question was ever made of Rehoboam's succession in Judah, and the cry of revolt was, "We have no inheritance in the son of Jesse" (1 Ki. 12:16 NRSV), that is, an assertion of tribal separatism. However, the assembly was not in itself mutinous, as R. Kittel seems to imply (*Geschichte des Volkes Israels*, 3rd ed. [1912 – 17], 2:347 – 54); otherwise the king would surely have taken military precautions.

The "assembly"—that is, the elders representing the people—demanded relief from the burdens imposed by Solomon, intimating that this would be a condition of allegiance. Rehoboam was faced with a choice: in principle, should his authority be constitutional or absolute? His older advisers (Solomon's council of state) recommended that he make concessions and win the people; but he took the advice of his contemporaries to make it clear that he would tolerate no challenge to his authority. The identity of these two groups was considered in a discussion of a paper by A. Malamat (in *BA* 28 [1965]: 34 – 65), who sees the young men as mainly of the royal family and of military rank; G. Evans (in *JNES* 25 [1966]: 273 – 79) is less sure of their official status.

The Promised Land becomes the Divided Kingdom during the rule of Rehoboam.

Rehoboam accordingly answered the assembly with the famous phrase: "My father scourged you with whips; I will scourge you with scorpions" (1 Ki. 12:14; the term "scorpions" is prob. a reference to loaded scourges, a particularly painful whip). The assembly thereupon repudiated the Davidic dynasty, raising the now traditional cry of dissolution: " To your tents, Israel!" (v. 16). It was not seriously proposed to restore the premonarchic order; the state needed a king, and Jeroboam was apparently consecrated at the same convention. The point was that Israel still claimed a freedom to which her king owed respect.

C. Aftermath. Adoniram, who controlled the labor force and was therefore directly concerned with public order, was sent to quell the riot; but he was stoned to death, and Rehoboam himself escaped to Jerusalem. There he summoned the militia of Judah and Benjamin to try to reduce Israel by force, but the prophet SHEMAIAH forbade the expedition publicly in the name of the Lord; so the assembly dispersed, and a state of hostilities ensued (1 Ki. 14:30; 2 Chr. 12:15). This is not incompatible with the avoidance of a pitched battle; indeed, it helps to explain the major clash under ABIJAH, who clearly invaded Israel (perhaps under provocation) and cherished some hope of restoring the Davidic kingdom there.

IV. Shishak's expedition. The attempt of Shishak (Sheshonq I) to reassert Egyptian authority in

Palestine is described (so far as it affected Judah) in 1 Ki. 14:25 – 28 and 2 Chr. 12:1 – 12, and represented on the wall of the temple of Amun at Karnak; it occurred in Rehoboam's fifth year (see II above). A number of correlations have been obtained between the Karnak inscription and place names occurring in the Bible, but the inscription was not properly understood until B. Mazar (in *Volume du congrès: Strasbourg 1956* [1957], 57 – 66) suggested reading alternate lines in opposite directions (*boustrophedon*). This put the recognizable names in a sequence which indicated that Shishak, after detaching a force to invade the NEGEV, came into the hills by Gibeon (N of Jerusalem), crossed into the Jordan Valley, and went through the Vale of JEZREEL and back by the coast road. Archaeological evidence illustrates his trail of devastation at GEZER, BBETH SHEMESH (if this was the Egyptian *rbt*), and MEGIDDO (K. M. Kenyon, *Archaeology in the Holy Land* [1960], 273ff.).

This wall in the temple at Karnak lists the cities conquered by King Shishak of Egypt during the reign of Rehoboam.

Doubtless Shishak's main concern was to assert suzerainty over Jeroboam, who had been a refugee at his court; also, Solomon had been Egypt's ally by marriage. The inscriptions speak of "northern rebels and aggressors of the Mitanni." Although Shishak was not so concerned with the hill state of Judah, Jerusalem might well have expected to suffer the same fate as the cities of the plain. B. Mazar (in *IEJ* 2 [1952]: 82 – 88) observes that while the account in Kings relates primarily to the replacement of the gold shields by bronze, and to the origin of the custom of carrying them in procession, Chronicles (typically) deals with the episode in the context of Shemaiah's prophecy. The king and his people, having left the service of the Lord, would now know what it was to be at the mercy of a tyrant (2 Chr. 12:8). It was a case of "the king's heart is in the hand of the LORD" (Prov. 21:1). The common source of Kings and Chronicles gives the impression that Shishak actually entered or sent officers into the city; Aharoni (*The Land of the Bible*, 326) thinks that an embassy met him at Gibeon, since the next place mentioned in his inscription is Zem-araim, to the N. These suggestions are not incompatible.

V. Defense. Two lines of evidence suggest that Shishak's force in the Negev established a buffer state under Egyptian control in the valley of GERAR: (1) the character of the forces attacking Judah about thirty years later (see ASA); and (2) the list of hill towns fortified by Rehoboam against Philistine, Egyptian, and perhaps Edomite threats (Myers, *II Chronicles*, 69 – 70). E. Junge's view, that they were fortified by Josiah (*Der Wiederaufbau des Heerwesens des Reiches Juda unter Josia* [1937]), is controlled by his theory that the Chronicler continually projects the Josianic situation into

the more remote past. A. Alt inclines to accept the Chronicler's account, and also sees in the Levitical towns of Judah a line of frontier forts (*Kleine Schriften*, 3 vols. [1953 – 59], 2:306 – 15). Even on this basis, the southern border was now withdrawn to the hills. On his northern frontier, Rehoboam did not consider himself to be on the defensive.

VI. Religious policy. Rehoboam claimed to be loyal to the Lord and to his temple; this is attested by his replacing the shields given to Shishak with replicas for the traditional ceremonies, by Abijah's speech (2 Chr. 13), and, indirectly, by Jeroboam's need to set up counter attractions to the Jerusalem temple. Many Levites moved into Judah as a result (11:13 – 17).

The Chronicler records, however, that after three years, when he felt established, Rehoboam abandoned the teaching of the Lord; and Shemaiah declared Shishak's invasion to be God's answering judgment (2 Chr. 11:17; 12:1). The king and court accepted the rebuke, but with half-hearted repentance. The episode of the invasion is introduced in Kings by a description of the backsliding, not of the king specifically, but of the people as a whole. It may be that Rehoboam was not strong-minded enough to stem the popular tide; and it should not be forgotten that Solomon had opened the door wide to foreign practices. (For the view that the Chronicler portrays Rehoboam primarily as a villain, see G. N. Knoppers in *JBL* 109 [1990]: 423 – 40.)

J. LILLEY

Rehoboth ri-hoh'both (רְחֹבוֹת *H8151*, "broad places"). (1) A well dug by ISAAC after his troubles with ABIMELECH and the herdsmen of GERAR (Gen. 26:22, where the LXX translates the name as *Eurychōria*, "open space, room"). The PHILISTINES had filled in the old well so that Isaac's servants had to dig new ones. But the herdsmen of Gerar claimed the first two for themselves (vv. 20 – 21). When a third one was uncontested, Isaac named it "Rehoboth," saying, "Now the LORD has given us room and we will flourish in the land" (v. 22). This Rehoboth has often been identified with modern Ruḥaibeh, c. 22 mi. SW of BEERSHEBA, though the narrative suggests a site farther N, between Gerar and Beersheba (cf. *NEAEHL*, 4:1274 – 77).

(2) The hometown of SHAUL, an early Edomite king (Gen. 36:37; 1 Chr. 1:48). The text names it *rĕhōbôt hannāhār*, "Rehoboth of the river," and since EUPHRATES is sometimes referred to as "the River" (e.g., Deut. 11:24; Josh. 24:3), the phrase can be translated "Rehoboth on the Euphrates" (cf. NRSV). If this is correct, the place in view may be modern Raḥba, S of the mouth of the Khabur (HABOR), a tributary of the EUPHRATES in N SYRIA. More likely, however, the site should be looked for in EDOM, in which case the river in question may be Wadi er-Riḥab (just S of the Edom-Moab border), leading to a possible identification of Reho-both with modern Khirbet ʿAin Riḥab. (See further *ISBE* rev. [1979 – 88], 4:73; *ABD*, 5:664.)

Rehoboth Ir ri-hoh'both-ihr' (רְחֹבֹת עִיר *H8155*, "broad places of the city," i.e., city squares or plazas). A city built by NIMROD in ASSYRIA (Gen. 10:11). Alternatively, it may have been built by ASSHUR, as indicated by the KJV rendering, "Out of that land went forth Asshur, and builded Nineveh, and the city Rehoboth" (cf. also NJPS). Because no such place is known from Assyrian sources, most interpreters believe the reference is to an area within (or in the environs of) NINEVEH. Thus, instead of "Nineveh and Rehoboth Ir," the words should probably be translated, "Nineveh with its city squares" (NIV mg.) or the like. It is uncertain, however, whether the Hebrew phrase should be paralleled with the Assyrian term *rêbıt Ninua,* which in later times supposedly referred to a NE

suburb of Nineveh. It has also been suggested that *rĕhōbōt⟨îr* is an epithet, so that the words should possibly be rendered, "Nineveh, the broad [*or* broadest] city," or "Nineveh, the city of open streets." (See further J. M. Sasson in *RB* 90 [1983]: 94 – 96; *ABD,* 5:664.)

Rehum ree'huhm (רְחוּם *H8156,* possibly "[God has been] compassionate"). (1) An Israelite mentioned among leading individuals who returned from Babylon with ZERUBBABEL (Ezra 2:2; 1 Esd. 5:8 [KJV, "Roimus"]; called NEHUM in Neh. 7:7). See also #4 below.

(2) A Persian officer who coauthored a letter to King ARTAXERXES opposing the rebuilding of the Jerusalem TEMPLE (Ezra 4:7 – 16). When a favorable reply came (vv. 17 – 22), Rehum, Shimshai, and their associates "went immediately to the Jews in Jerusalem and compelled them by force to stop" (v. 23; cf. 1 Esd. 2:16 – 30 [where KJV has "Rathumus"]). The NIV refers to him as "commanding officer," but the Aramaic phrase *bĕ⟨ēl-tĕ⟨em (H10116 + H10302,* lit. "lord of command") probably indicates a civil rather than military position; some think he may have been the governor of SAMARIA (however, see H. G. M. Williamson, *Ezra, Nehemiah, WBC* 16 [1985], 61 – 62).

(3) Son of Bani; he was in charge of some of the Levites who helped NEHEMIAH repair the wall of Jerusalem (Neh. 3:17).

(4) One of the leaders of the people who sealed the covenant of Nehemiah (Neh. 10:25). Some connect this Rehum with #1 above.

(5) One of the priestly leaders who returned with Zerubbabel (Neh. 12:3). Some scholars believe that here the name should be emended to HARIM (cf. v. 15).

Rei ree'i (רֵעִי *H8298,* possibly "friendly"). One of the supporters of SOLOMON at the time ADONIJAH attempted to secure the throne of DAVID (1 Ki. 1:8). He may have been an officer in the royal guard. However, the Lucianic recension of the SEPTUAGINT, evidently reading the Hebrew as *r⟨wy,* translates "Shimei and his friends," and some scholars emend the MT accordingly (cf. also Jos. *Ant.* 7.14.4 §346, "Shimei, David's friend").

reins. See KIDNEYS.

Rekab, Rekabite. TNIV forms of RECAB, RECABITE.

Rekah. TNIV form of RECAH.

Rekem (person) ree'kuhm (רֶקֶם *H8390,* pausal form Dp רָקֶם *H8388* [1 Chr. 7:16], meaning uncertain). (1) One of five kings of MIDIAN killed by the Israelites in a battle on the plains of MOAB (Num. 31:8; Josh. 13:21). See REBA. Some scholars think that the name Rekem may indicate a place rather than (or in addition to) a person, and JOSEPHUS says that it was in fact the ancient name of PETRA in Edomite territory *(Ant.* 4.7.1 §161; see also *ABD,* 5:665).

(2) Son of HEBRON and descendant of JUDAH in the line of CALEB (1 Chr. 2:43 – 44).

(3) Son of Peresh (or of Sheresh), grandson of MAKIR, and great-grandson of MANASSEH (1 Chr. 7:16 NRSV, NJPS). The KJV, NIV, and other translations, without good reason, render this name according to its pausal form, "Rakem."

Rekem (place) ree'kuhm (רֶקֶם *H8389,* meaning uncertain). A town within the tribal territory of BENJAMIN (Josh. 18:27). It was probably a few miles NW of JERUSALEM, but its location is unknown. This town is to be distinguished from Rekem in EDOM; see REKEM (PERSON) #1.

religions, ancient. See ASSYRIA AND BABYLONIA IV; CANAAN IX; EGYPT VII; FERTILITY CULTS; GREEK RELIGION AND PHILOSOPHY; MYSTERY RELIGIONS; ROMAN RELIGION.

remain. See ABIDE.

Remaliah rem'uh-li'uh (רְמַלְיָהוּ *H8248,* perhaps "Yahweh has adorned" or "Yahweh, be exalted!"; cf. J. D. Fowler, *Theophoric Personal Names in Ancient Hebrew* [1988], 135 – 36). Father of PEKAH, one of the last kings of Israel (2 Ki. 15:25 et al.).

remember. The concept of remembering plays a much more important role in the OT than it does in the NT. Though the appeal to remembrance is present in the latter, it is much more prevalent in the Hebrew Bible, particularly in the Psalter. As such, there can be no doubt that the action of remembering is quite significant for various contexts in Scripture. To remember is part and parcel of the experience of Israel as well as of the God of Israel.

It has been recognized that in the Hebrew Bible "to remember" (Heb. *zākar H2349*) is both a thought process and a way of initiating action. This means that remembering is not merely what one might term a psychological recall, or bringing something to mind. To remember also suggests activity that is quite concrete. This is particularly the case when God remembers, as we shall see below. One can suggest that in many cases in the Bible the thought of remembering is hardly ever separated from activity.

In order to better understand the verb we will look first of all at how it is used in the context of human beings, and secondly at how it is used with God as subject. In the book of Deuteronomy we find that the memory motif is present with significant force. The command is not only to remember, but also more emphatically not to forget. This emphasis is there so that the new generation of Israel will have a link to the past. The people are challenged to remember the mighty acts of God on behalf of their forefathers. It is in this way that the past can be actualized into the present. By remembering, the people of God can participate in the wonder of the exodus that was experienced by previous generations (Deut. 9:7; see EXODUS, THE). In this same book, the people are encouraged to observe the SABBATH in order to remember the past slavery and liberation from Egypt (5:12 – 15). The concern once again is to insure that the past in a very real sense becomes part of the present, for this will have an effect on the conduct and the activity of the people in the future. In this manner, remembering is a creative activity by which they create and re-create history with the hopes of creating a community that does not suffer from historical amnesia.

In the book of PSALMS, the verb *remember* appears most often in the lament or complaint psalms. Here the poet often asks God to remember the evil action of the enemies. On the other hand he may ask that God not remember his sins. In this sense, the act of not remembering is tantamount to FORGIVENESS. Finally, the poet often asks God to remember his faithfulness, steadfast love, and commitment to the individual Israelite or to the community as a whole.

God's remembering carries with it definite action or consequences. The statement that "God remembered Noah" (Gen. 8:1) does not mean that the Lord had forgotten NOAH or that he was merely

bringing Noah to mind. It means that God would take action to rescue him from the terrible flood. A similar situation is described when God "remembered" HANNAH, changing her reality of BARRENNESS and giving her a son (1 Sam. 1:19 – 20). One can argue that the remembering of God is often synonymous with his salvific activity. On the other hand, if God forgets someone, that someone for all practical purposes no longer exists. In summary, God remembers his covenant, his word, his promises, and his love for his people. In this sense, God's remembering most often implies movement towards a person. See also MEMORIAL.

<div align="right">S. VOTH</div>

remembrance, book of. See BOOK OF REMEMBRANCE.

Remeth ree'mith (רֶמֶת *H8255*, possibly variant of רָאמוֹת *H8030*, "heights"). A border town in the tribal territory of ISSACHAR (Josh. 19:21). It is probably identical with Ramoth (1 Chr. 6:73) and Jarmuth (Josh. 21:29). See RAMOTH (PLACE) #3.

remission (of sins). See FORGIVENESS.

Remmon rem'uhn. KJV alternate form of Rimmon (only Josh. 19:7). See RIMMON (PLACE) #1.

Remmon-methoar rem'uhn-meth'oh-ahr. See RIMMON (PLACE) #2.

remnant. The special theological sense of this term derives from its secular use. The common notion of "something left over" occurs in the Bible with some frequency. For example, reference is made to the remainder of the cereal offering (Lev. 2:3), or of the holy oil (14:18), or of the male prostitutes that were exterminated (1 Ki. 22:46). It is in describing political divisions of various sorts that the word *remnant* is found frequently. The remainder of the pagans in Palestine after the conquest under JOSHUA is spoken of (Josh. 23:12), and OG is described as the remnant of the REPHAITES (Deut. 3:11). Reference is made also to the remnants of various other people groups (2 Sam. 21:2; Isa. 14:22, 30; 16:14).

Many times the word *remnant* is applied to political divisions and social groupings within Israel. We read about "the rest of the populace" who were left in the city of Jerusalem after the capture of the city by NEBUCHADNEZZAR (2 Ki. 25:11); about the evil "survivors" within Judah (Ezek. 14:22); and the residue of the people in the N who were invited by HEZEKIAH to participate in the PASSOVER (2 Chr. 30:6). Later on in Jewish history the companies of ZERUBBABEL and EZRA are described as "remnants" (Ezra 9:8 et al.).

The shift from these uses to the theological meaning is easy to understand. Such a concept is of prime interest. The judgment of God upon a remnant, or, contrariwise, the manifestation of grace to them, shows how history and theology are intertwined. An example of a pertinent text is Mic. 5:3, which states: "Therefore Israel will be abandoned / until the time when she who is in labor gives birth / and the rest [*yeter H3856*] of his brothers return / to join the Israelites." In other words, God intended to give up his people into the hands of their enemies (including the Romans?) until Christ should be born of Israel (or Mary); then all his scattered brothers would return and be joined in one body.

Jews worshiping in a synagogue at the Western Wall. Some view such a scene as a sign that a remnant would return.

G. Hutcheson understands the remnant here to be elect Gentiles, then unconverted, who are brethren in respect to his eternal love in election, God's purpose being to make them brethren by conversion (*Exposition of the Minor Prophets* [1655, repr. 1962], 136 – 38). These are conjoined with Jews in one spiritual body. E. B. Pusey believes that the withdrawal of God's protection spoken of here refers to the time of the EXILE (*The Minor Prophets* [1860], 72). The context, however, would seem to require what was then a future event.

That there is a great emphasis placed upon the significance of a true spiritual relationship in the NT cannot be denied. He who does the will of God is brother and sister and mother to Christ (Matt. 12:50), and Christ is not ashamed to call them brethren (Heb. 2:11). The promise is to those who are called of God (Acts 2:39). Pusey believes that both Jews and Gentiles who respond to the gospel are in the remnant.

C. L. F. Feinberg (*The Minor Prophets* [1976], 174) sees in Mic. 5:3 a reference to the literal return of the Jews who have been scattered by the judgment of God, but F. Delitzsch feels that the returning spoken of is of a spiritual kind, that is, returning to God in conversion (*Biblical Commentary on the Prophecies of Isaiah* [1877], 1:272 – 74). That the Bible teaches a literal return to Palestine (not necessarily to be identified with the contemporary Zionist movement) seems clearly taught by such passages as Jer. 31:7 – 9 and Mic. 5:7 – 8.

Romans 9:27 – 29 is a crucial passage in the theology of the remnant (Gk. *hypoleimma G5698*, citing Isa. 10:22 – 23, where Heb. *šĕʾār H8637* is used). It states that though the number of the sons of Israel is vast, yet only a remnant of them will be saved. This is an obvious reference to the Abrahamic promise of numerous descendants. Yet from this vast number only a portion would be redeemed. In this passage PAUL is discussing the ELECTION of persons to SALVATION, persons who were chosen of God to be his spiritual children. The attempt is being made to discourage the Jews from relying upon a carnal interpretation of the promise to ABRAHAM. Natural descent from the great patriarch guaranteed nothing in terms of a spiritual INHERITANCE. God never said that being a Jew according to the flesh was enough. It was wrong for Israel to equate herself with the remnant. It is noteworthy that the remnant will include GENTILES (Rom. 9:24 – 25). God's promises are to the people of faith.

Romans 11:5 speaks of "a remnant [*leimma G3307*] chosen by grace." The passage refers to the

experience of the prophet ELIJAH, who was reminded in the time of discouragement that there were many in Israel who had not bowed the knee to BAAL. The point is that these faithful ones are parallel to a remnant of grace in the present time. Paul stresses not only the number of the faithful, but even more the fact that God has chosen them for himself (cf. J. Murray, *The Epistle to the Romans* [1960 – 65], 2:69 – 70). Sovereign election is clearly involved. While Israel was in an apostate condition, yet this remnant remained faithful, and so must all.

The principal idea in all of this is to establish clearly the fact that God has not cast away his people. God's election is not based on moral attainment but on the good pleasure of God. R. Haldane says: "It was an unconditional choice, resulting from the sovereign free favor of God" (*Exposition of the Epistle to the Romans* [1958, orig. 1859], 526). The great emphasis upon the mercy of God must be maintained in all discussions of the remnant. (See further G. F. Hasel, *The Remnant: The History and Theology of the Remnant Idea from Genesis to Isaiah*, 3rd ed. [1980]; *ISBE* rev. [1979 – 88], 4:130 – 34; *ABD*, 5:669 – 71.)

B. C. STARK

Remphan rem'fuhn. KJV form of REPHAN.

rending of garments. See MOURNING.

repentance. This concept is encountered repeatedly in both OT and NT. It is expressed in Hebrew primarily by the verbs *nāḥam H5714* (niphal), "to regret, be sorry," and *šûb H8740*, "to return." In Greek it is represented almost always by the verb *metanoeō G3566*, "to change one's mind," and its cognate noun *metanoia G3567*.

I. Repentance on the part of God. Most occurrences of this concept in the OT have to do with God's repentance. This is seen, for example, where God repented that he had made man (Gen. 6:6; NIV, "was grieved") and again repented of the judgments by which he had condemned Israel (Exod. 32:14; NIV, "relented"). Several times the Lord repented of the chastisements he had planned, that is, judgments that he had threatened to execute on his people (Jer. 18:8, 10; 26:3, 19; 42:10; cf. Amos 7:3, 6; Jon. 3:10). These are a few of many instances when the Lord is represented as having changed his mind.

Elsewhere, however, the Lord is said to be "weary with repenting" (Jer. 15:6 KJV; NIV, "I can no longer show compassion"). The consistency of the Lord in carrying out his purposes is reflected in Ps. 110:4: "The LORD has sworn and will not change his mind" (cf. Jer. 4:28). He is said to be more consistent than man for he is less likely to be changeable or vacillating (1 Sam. 15:29). Indeed there is a paradox in some of these passages. In one instance God is presented as regretting or repenting that he had set up SAUL as king (15:11, 35). In the same context, however, he is presented as unchanging and as not given to repentance (15:29—"he is not a man, that he should change his mind"; cf. Ezek. 24:14). In many instances God's change of mind or repentance is attributed to a person's intercession (Exod. 32:12, 14; Amos 7:3, 6; Jon. 3:9 – 10). In these texts the meaning obviously is that repentance means a change of plan or reconsideration of an earlier plan. It can be interpreted as a change of mind: it is a turning about and going in the opposite direction, a change of attitude.

II. Human repentance. Some instances of repentance involve human relationships, such as the change of attitude toward the tribe of BENJAMIN on the part of the rest of the Israelites (Jdg. 21:6).

With this may be compared occurrences of the Greek word *metamelomai G3564* in the NT, as in Matt. 21:29, which speaks of a disobedient son who changed his mind and obeyed. Such examples have the connotation of regret, as when Paul said he did not repent concerning his sanctions toward the Corinthians (2 Cor. 7:8).

More important, however, is the specifically theological concept, namely, a basic change in one's attitude toward God. In many OT incidents, there is apparently no provision made for a person to turn from his sin and to seek pardon. For example, the numerous plagues reported in Exodus and Numbers were the result of sin against God, for which there was no alternative but to take the punishment meted out. One exception is the last of the fourteen murmurings in the wilderness as reported in Num. 21. In this case a bronze serpent was erected by which, if people looked, they could be cured of the bite of the fiery serpents. Perhaps for the first time in biblical history the sinner's punishment could be averted simply by looking, with no suffering involved. No opportunity, however, appears to have been provided for the sinful actions of the sons of Eli or of Samuel; they were simply punished for their sin. When Achan sinned, nothing is said about his being given an opportunity to repent.

One of the earliest examples of repentance is seen in King David's reaction to Nathan's parable. Because David said, "I have sinned," forgiveness was granted: "You are not going to die" (2 Sam. 12:13). The noblest language of the repentant sinner is to be found in Ps. 51. There was something akin to repentance on the part of Ahab, when, after hearing the sentence against him, he began to go around "meekly," with the result that the Lord lessened his punishment (1 Ki. 21:27 – 29). When Amos preached to the surrounding nations, there was again no measure of hope for the sinner, only the sentence of doom. However, it is in the later chapters of his book that one finds the earliest emphasis on repentance as a means by which the sinner could avert the wrath of God. The concept often occurs in a context where the term does not.

The 8th-cent. prophets often expressed the idea by means of terms translated "seek" or "return." One of the keynotes of the prophecy of Amos is expressed in essentially two words—"seek" and "live" (Amos 5:4, 6, 14). The doctrine comes to its full flower in Hosea, whose central message was an anguished cry to Israel to repent before catastrophe fell. The people of Nineveh were accredited with having enough theology and good sense to expect that the Lord would change his mind if they changed their practices, so when they repented the Lord repented (Jon. 3:9 – 10).

The classic expression for this doctrine and the place where it is most clearly articulated is in the book of Ezekiel, where it is contrasted with the older group morality. The prophet makes it clear that the innocent suffering with the guilty (as with Achan's family) will no longer be in effect, but each person will be judged on the basis of his own conduct. This means that the sinner who changes his ways, ceases to sin, and does what is right shall escape the penalty of his sin and live (Ezek. 18; 33:10 – 20). Even Manasseh, one of the most wicked kings of Judah, is pictured as being shown mercy because he repented (2 Chr. 33:12 – 13). This so impressed a later writer that he composed the apocryphal *Prayer of Manasseh*, found in intertestamental literature (see Manasseh, Prayer of). It was a common rabbinic teaching that if a nation repented sincerely enough, the Messiah would then come.

It is into this background that John the Baptist came preaching, "Repent, for the kingdom of heaven is near." The same emphasis was followed by Jesus and still later by his disciples (Matt. 3:2; 4:17; Mk. 6:12). Indeed, repentance became the main theme of John the Baptist, and in his preaching the emphasis changed from national repentance (which Ezra and Daniel had called upon the people to render) to individual repentance. He insisted that repentance be accompanied by the fruits of

repentance in a changed life.

The Synoptic Gospels indicate that unless one repents and becomes like a child, he has no hope of heaven (Matt. 18:1 – 10). Conversely, Jesus' severest strictures were directed to the impenitent (Matt. 9:13; Lk. 18:14). The term *repentance* is absent from the fourth gospel. The Synoptic Gospels and the Acts stress repentance, often in an eschatological setting. The Epistles are addressed to believers, and repentance receives less emphasis. The doctrine seems to be minimized in the letter to the Hebrews in order to underscore the danger of apostasy. The last book in the Bible again stresses the importance of repentance in the letters to the seven churches. No hope is held out for the proud person who thinks it is beneath his dignity to express regret for his sins and mistakes, but assurance is given to the humble in heart that FORGIVENESS and cleansing are given through the blood of Jesus Christ to the sincerely penitent (1 Jn. 1:7 – 10).

G. A. TURNER

Rephael ref'ay-uhl (רְפָאֵל *H8330*, "God has healed"; cf. also RAPHAEL; REPHAIAH). Son of Shemaiah, grandson of OBED-EDOM, and a gatekeeper from the Korahites (1 Chr. 26:7; cf. v. 1). See KORAH. Rephael and his brothers are described as "leaders in their father's family because they were very capable men" (v. 6).

Rephah ree'fuh (רֶפַח *H8338*, perhaps "abundance" [cf. *HALOT,* 3:1278]). Son (or descendant) of EPHRAIM (1 Chr. 7:25). His precise place in the genealogy is not clear, and the name Rephah does not occur in the parallel list (Num. 26:35 – 36).

Rephaiah ri-fay'yuh (רְפָיָה *H8341*, "Yahweh has healed"; cf. REPHAEL). (1) A descendant of DAVID through JEHOIACHIN and ZERUBBABEL (1 Chr. 3:21). The Hebrew text is difficult. Some believe that Rephaiah was the son of Hananiah (cf. J. M. Myers, *I Chronicles,* AB 12 [1965], 22); others, the son of Jeshaiah (cf. NRSV and NJPS, following the LXX). C. F. Keil argued that the MT "is clearly corrupt" and that the connection of Rephaiah (and others in v. 21b) "with Zerubbabel is for us unascertainable" (KD, *Chronicles,* 84; for a fuller discussion that supports the originality of the LXX reading, see G. N. Knoppers, *I Chronicles 1 – 9,* AB 12 [2004], 322 – 23).

(2) Son of Ishi and descendant of SIMEON during the reign of HEZEKIAH; Rephaiah and his brothers led 500 Simeonites in an invasion of "the hill country of Seir" (1 Chr. 4:42). Because of overpopulation and the need for pasture and flocks, these Simeonites expanded in two directions: westward toward GEDOR (vv. 38 – 40; LXX, "Gerar") and eastward toward SEIR, where they displaced the Amalekite element residing among the Edomites since their dispersal in the time of Saul and David (1 Sam. 15:7 – 8; 30:18).

(3) Son of Tola and grandson of ISSACHAR, described as head of family (1 Chr. 7:2).

(4) Son of Binea and descendant of King SAUL through JONATHAN (1 Chr. 9:43); the shorter form RAPHAH is used in the parallel genealogy (9:43).

(5) Son of Hur; he ruled "a half-district of Jerusalem" and was in charge of repairing a section of the city wall near the BROAD WALL (Neh. 3:9). The Judean province of the Persian period was divided into five districts: Jerusalem, Keilah, Beth Zur, Beth Hakkerem, and Mizpah (see vv. 12 – 18).

B. K. WALTKE

Rephaim ref'ay-im. See REPHAITES.

Rephaim, Valley of ref'ay-im (רְפָאִים *H8329;* for meaning, see REPHAITE). A basin SW of JERUSALEM whose N end marked the N boundary of the tribe of JUDAH and the S boundary of the tribe of BBENJAMIN (Josh. 15:8; 18:16). This area is today called simply the *Baq(a* or "valley" and constitutes a suburb of Jerusalem. On the N it touches the Valley of HINNOM and the Valley of Deir el-Musallabeh (the Monastery of the Holy Cross).

General view of the Valley of Rephaim (looking SW). David defended his kingship against the Philistines who came up this valley twice after the death of King Saul.

After DAVID captured Jerusalem and the PHILISTINES heard about his being anointed king, they camped in the Valley of Rephaim anticipating an attack on the new capital of Israel (2 Sam. 5:17 – 21). David took up the challenge and defeated the Philistines at BAAL PERAZIM. The Philistines prepared a second attack, but this time David routed them with an attack from the E on their rear guard (2 Sam. 5:22 – 25; the account of these two episodes is expanded in 1 Chr. 11:15 – 19 and 14:10 – 17). The seventh and last mention of the Valley of Rephaim is in Isa. 17:5, where, to illustrate the survival of the idol-hating remnant, the prophet says, "It will be…as when a man gleans heads of grain in the Valley of Rephaim."

The Bible records no reason that this valley should be named after the early inhabitants of CANAAN whom the Israelites thought to be GIANTS (cf. Gen. 14:5; 15:20; Josh. 17:15). One can only guess that the people called "Rephaim" (REPHAITES) lived in the vicinity of this valley.

R. L. ALDEN

Rephaites ref'ay-*i*ts (רְפָאִים *H8328,* often with the definite article, meaning possibly "the healers" or "the weak" [see *HALOT,* 3:1274 – 75]). The Hebrew form *rĕpā'îm,* evidently the plural *of rāpā* or perhaps *rapă* (see RAPHA #3), is transliterated by the KJV as "Rephaim" when it refers to the valley of that name (see REPHAIM, VALLEY OF) but as the superfluous plural "Rephaims" on two occasions (Gen. 14:5; 15:20); elsewhere, the KJV translates "giants." The NRSV and other versions transliterate "Rephaim" throughout. The NIV uses the more natural English form "Rephaites" when the term designates a people group, but preserves "Rephaim" when the reference is to the valley.

There is a term that has the same form *(rĕpā'îm* H8327, possibly "shades") but that probably should be regarded as a distinct word (these terms may be related, though the etymology is disputed; see *NIDOTTE,* 3:1174 – 76). This second word denotes the inhabitants of the netherworld in the OT (esp. in poetic and wisdom literature), in Phoenician funerary inscriptions (Tabnith and Eshmunazar, c. 300 B.C.; cf. G. A. Cooke, *North Semitic Inscriptions* [1903], 26ff., 30ff.), and probably in a group of fragmentary and obscure Ugaritic mythological texts (*rpum, rpim*). The most that can be said with certainty about this use of *Rephaim* is that the Israelites applied the term to people who were dead and gone. The word is used in parallel with *metîm,* "dead ones" (Ps. 88:10; Prov. 2:18; Isa. 26:14), who are in SHEOL (Prov. 9:18; Isa. 14:9): they cannot praise God now (Ps. 88:10) and their case is now hopeless (Isa. 26:14). Some texts may suggest that they are conscious in their insubstantial afterlife: they tremble (Job 26:5); they welcome the newly dead to Sheol (Isa. 14:9) and constitute a united assembly (Prov. 9:18; Isa. 14:9). These texts are best interpreted by understanding the poets to be using the figure of speech called *prosopopoeia,* whereby an imaginary or absent person is represented as speaking or acting (cf. E. W. Bullinger, *Figures of Speech Used in the Bible* [1898], 861, 866). According to Isa. 26:19, these will at some future day be raised into light. There is a suggestion in the Bible (14:9; 26:14), in the Phoenician inscriptions, and in the Ugaritic texts that they are the aristocracy of the dead. See also DEAD.

Whatever the connection between these terms, the people group known as Rephaites were inhabitants of TRANSJORDAN in pre-Israelite times. The Moabites called them EMITES, while the Ammonites referred to them as ZAMZUMMITES (Deut. 2:11, 20). They were subdued by KEDORLAOMER c. 2000 B.C. in ASHTEROTH KARNAIM (Gen. 14:5). ASHTAROTH, capital of ancient BASHAN, sits on the famous KING'S HIGHWAY and is near KARNAIM, which inherited its place as the regional capital under Aramean and Assyrian rule. The Rephaites were one of ten ethnic groups whose lands God promised to ABRAHAM (Gen. 15:20). This promise, apparently, was later qualified to exclude that portion of their land that had been taken over by MOAB and AMMON (Deut. 2:9 – 12, 19 – 21), and thus it came to designate specifically the Rephaite holdings in GILEAD and the whole of Bashan (Deut. 3:13), but also the forest of Ephraim (Josh. 17:15). OG, king of Bashan, who reigned in Ashtaroth and Edrei and who was defeated by MOSES, was the last survivor of the remnant of the Rephaites (Josh. 12:4; 13:12).

According to Deut. 2:10 – 11, the Rephaites were "strong and numerous, and as tall as the Anakites" (see ANAK). Og, for example, possessed a king-size iron bed (or sarcophagus?), 13 ft. long and 6 ft. wide (3:11). Probably this information, combined with statements about the descendants of Rapha, who were giants associated with the PHILISTINES in the time of DAVID (see below), caused the occasional translation of "giants" in the SEPTUAGINT and *Targum Onkelos* (see TARGUM). G. E. Wright reasoned that "the Israelite tradition of giant Rephaim undoubtedly arose in part from the contemplation of megalithic structures especially in Transjordan." In a note he added, "comparatively few of these structures have been found in Western Palestine" ("Troglodytes and Giants in Palestine," *JBL* 57 [1938]: 37). But here Wright is inconsistent with his normal and preferred method of interpreting artifacts. Instead of regarding such artifacts as occasioning an Israelite etiology, they should be regarded as circumstantial evidence supporting the biblical narrative.

The name Rephaites is also applied to GIANTS among the Philistines who fought against David and his mighty warriors along their disputed border at both GEZER (1 Chr. 20:4) and GATH (vv. 6, 8). In the latter two verses (as in 2 Sam. 21:16–22), they are described as descendants of "the Raphah" (so NJPS; the NIV has "Rapha"; KJV, "the giant"; NRSV, "the giants"). The relationship between the ethnic Rephaites and these Philistine warriors is debated; perhaps the latter were not precisely

"descendants" but rather "devotees" of a deity named Rapha (so P. K. McCarter, Jr., *II Samuel,* AB 9 [1984], 449 – 50; but see R. F. Youngblood, *EBC,* 3:862 – 65 and 1058–61). (For further discussion and bibliography, see *ABD,* 5:674–76; *DDD,* 692 – 700.)

B. K. WALTKE

Rephan ref'uhn (Ῥαφάν *G4818,* variants Ῥεμφάν, Ῥομφάμ, etc., meaning uncertain). KJV Remphan; NASB Rompha. The name of an astral deity mentioned in Acts 7:43, which cites the SEPTUAGINT translation of Amos 5:26. In the latter, the MT has *kiyyûn H3962,* which may represent the Akkadian word *kayamānu,* a term applied to Saturn (see KAIWAN). Some have speculated that the Hebrew scribes substituted the vowels *of šiqqûs H9199* ("a detested thing") for those of the Akkadian word to reflect the detestability of the pagan god (but see S. Gevirtz in *JBL* 87 [1968]:267 – 76). How the LXX came to have the unexpected *Rhaiphan* is uncertain. It may be the result of a mistaken transliteration (Heb. *k* and *r are* sometimes confused) or it may be a form of Repa, a late Egyptian name for the god of the planet Saturn, substituted by the Alexandrian translators for the less intelligible *kiyyûn* (cf. F. F. Bruce, *The Acts of the Apostles: Greek Text with Introduction and Commentary,* 3rd ed. [1990], 204).

J. C. MOYER

Rephidim ref'i-dim (רְפִידִים *H8340,* prob. "camping [places]"). A stop in the wilderness wanderings of the Israelites (Exod. 17:1, 8; 19:2; Num. 33:14–15). The passage in Numbers locates Rephidim on the journey from ALUSH to the Desert of SINAI, but the location of these places is uncertain. On the basis of the traditional Mount Sinai, near the S end of the peninsula formed by the gulfs of Suez and Aqabah, Rephidim might be the Wadi Feiran (cf. PARAN) or the Wadi Rufaid.

At Rephidim the Israelites rebelled against MOSES because there was no water to drink. The people complained: "Why did you bring us up out of Egypt to make us and our children and livestock die of thirst?" (Exod. 17:3). God instructed Moses to strike the rock. He did, and water came forth (v. 6). Because of the attitude of the people, Moses named the place MASSAH and MERIBAH, meaning "testing" and "contention" (17:7). Moses repeatedly referred to this incident to remind the people of God's faithfulness and their faithlessness (Num. 20:13, 24; 27:14; Deut. 6:16; 9:22; 32:51; 33:8). The author of Ps. 81 also recalled this ancient site and its significance (v. 7).

Rephidim.
This area in Sinai, Wadi Feiran, may be the location of Rephidim

It was also at Rephidim that AMALEK fought with Israel (Exod. 17:8 – 13). Here it was that Israel was victorious as long as Moses' hands were held up. After JOSHUA mowed down the enemy,

Moses, obedient to God's command, built an altar and called it, "The LORD is my Banner" (v. 15; KJV, "Jehovah-nissi"). There is reason to believe that the visit of JETHRO, Moses' father-in-law, recorded in Exod. 18, also took place at Rephidim. The next chapter (19:2) records the nation's leaving Rephi-dim. It is never again mentioned in the Bible. (See E. Kraeling, *Bible Atlas* [1956], 107 – 9.)

<div align="right">R. L. ALDEN</div>

reprobate. This adjective, meaning "corrupt" or "depraved," is seldom if ever used in modern Bible versions. The KJV uses it once in the OT (but in the archaic sense "rejected," with reference to silver, Jer. 6:30), and three times in the NT (Rom. 1:28; 2 Tim. 3:8; Tit. 1:16); the noun "reprobates" occurs three times in one passage (2 Cor. 13:5 – 7). In all the NT passages, the Greek word is *adokimos G99* (which also appears in 1 Cor. 9:27 and Heb. 6:8, the latter passage referring to "worthless" land). Its basic meaning seems to be "not standing the test, and so rejected."

PAUL says of the ungodly world, "Furthermore, since they did not think it worthwhile [*ouk edoki-masen*] to retain the knowledge of God, he gave them over to a depraved [*adokimon*] mind, to do what ought not to be done" (Rom. 1:28). J. Murray paraphrases it, "To a mind that is rejected because deemed worthless" (*The Epistle to the Romans* [1960 – 65], 1:49). Paul uses athletic metaphors (1 Cor. 9:27) in calling for self-control and concludes by saying that he himself is not exempt from this need, for it is always possible that having preached to others, and not having heeded his own preaching, he might be "disqualified." On the other hand, to those at Corinth who were suggesting that Paul was a counterfeit apostle who did not measure up to the standards of an apostle, he suggested that they examine themselves to see whether Christ is in them, otherwise *they* will fail to meet the test (2 Cor. 13:5 – 7). Paul refers to some men who "as far as the faith is concerned, are rejected" (2 Tim. 3:8; NRSV, "counterfeit faith") and to others who are "unfit for doing anything good" (Tit. 1:16).

<div align="right">R. E. DAVIES</div>

reptiles. See FAUNA.

Resaiah ri-say'yuh. See RAAMIAH.

Resen ree'suhn (רֶסֶן *H8271,* possibly from Assyrian *rēš ēni,* "head of spring"). A city in ASSYRIA said to have been "between Nineveh and Calah" and to have been built by NIMROD (Gen. 10:11 – 12; the Hebrew text can be understood to mean that the builder was ASSHUR [cf. KJV and NJPS]). It is unclear whether the description "that is the great city" (v. 12b) refers to Resen, or to NINEVEH, or (most likely) to CALAH.

No city of suitable prominence has been identified in this area, and some scholars have thought Resen corresponds to one of several Assyrian places referred to as Resh-eni ("fountain head"). One such place is mentioned by SENNACHERIB in connection with his work to supply Nineveh with water, but this village was situated NE of Nineveh, whereas Calah (modern Nimrud) is to the SE. Others have identified Resen with modern Selamiyeh, less than 3 mi. NW of Nimrud, which seems more plausible (but see *ISBE* rev. [1979 – 88], 4:141). Still others consider Resen not a place name as such, but rather a parenthetical description of some impressive water installation or military construction (cf. E. Speiser, *Genesis,* AB 1, 2nd ed. [1978], 68).

<div align="right">B. K. WALTKE</div>

reservoir. A place for the storage of WATER. This English term is used by the NIV and the NRSV to render Hebrew *miqwǎ H5225,* a form that occurs only once (Isa. 22:11). However, the NIV uses it also to translate the phrase *miqwēh mêmêhem,* literally, "the gathering of their waters" (Exod. 7:19) and *běrēkôt māyim,* "pools of water" (Eccl. 2:6). The general climate of PALESTINE made it necessary to devise ways of preserving the water supply through the dry months from May through September. The rocky terrain provided convenient opportunity for water storage with minimal effort. The rain or spring water was channeled into these storage facilities (see CISTERN), and with care it could be kept palatable for a considerable time. An adequate supply of water was vital at all times, especially during siege (cf. 2 Chr. 32:3, 4). See also POOL.

Reservoir located at the NW corner of the temple mount in Jerusalem.

B. C. STARK

resh raysh (from late Heb. ריש, "head"). The twentieth letter of the Hebrew ALPHABET (r), with a numerical value of 200. It is named for the shape of the letter, which in its older form resembled a human head. Its sound corresponds roughly to that of English *r,* although in some traditions it has a uvular pronunciation.

Resheph (deity) ree'shif. Also Rashaph, Rasaph. A deity worshiped through most of the ANE and associated with pestilence, death, and the underworld. According to W. F. Albright, Resheph was closely related to the Babylonian NERGAL and was identified by the Greeks with APOLLO (*Archaeology and the Religion of Israel* [1942], 79). The very ancient documents discovered in EBLA show that Resheph was a prominent deity as early as the 3rd millennium B.C., for one of the city gates was given his name. Much pertinent information comes from Egypt, where Rephesh was a minor deity related to war and healing. In UGARIT, Resheph was more prominent and was represented both as a god of plague and as a benevolent deity. The Hebrew word *rešep H8404,* meaning "flame" or the like (Job 5:7; Pss. 76:3; 78:48; Cant. 8:6), and possibly by extension "pestilence" (Deut. 32:24; Hab. 3:5), may derive from the name of this god (although it is possible that the semantic development moved in the opposite direction). Some scholars think that the Habakkuk reference in particular ("pestilence followed his steps") ironically alludes to Resheph, the plague-god, as a

servant of the true God. (See further *HALOT, 3:1297 – 98; ISBE* rev. [1979 – 88], 4:141 – 42; *ABD, 5:678 – 79; DDD,* 700 – 703.)

<div align="right">B. K. WALTKE</div>

Resheph (person) ree'shif (רֶשֶׁף *H8405,* possibly "flame"). Son of Rephah and descendant of EPHRAIM (1 Chr. 7:25). The MT (lit., "and Rephah his son and Resheph and Telah his son") could be interpreted to mean that both Rephah and Resheph were sons of BERIAH, the son of Ephraim (vv. 23 – 24), but most modern versions insert "his son" after "Resheph" (following a few Heb. MSS and the Lucianic recension of the LXX). In any case, the specific connection of the names in v. 25 to the Ephraimite genealogy is unclear. Moreover, some scholars believe that the words in the MT, *werešep wětelah benô* ("and Resheph and Telah his son"), are a scribal error for *wesûtelah benô* ("and Shuthelah his son"; see SHUTHELAH #2).

rest. Freedom from LABOR; repose. Rest is frequently referred to in the Bible. God first set the example, and then offered it as a blessing to humans. When he finished his work of CREATION, "on the seventh day he rested from all his work. And God blessed the seventh day and made it holy, because on it he rested from all the work of creating that he had done" (Gen. 2:2 – 3). As with God, rest is a reward to human beings for their work. It is a tonic for the tired, and a release from labor. Rest restores and relieves body, mind, and soul overwrought from various burdens.

I. Physical rest. Rest is a divine institution, a natural law, and a human necessity. As God ordained work for ADAM (Gen. 2:15), he also ordained rest, patterned after the creation-sabbath. He created the day cycle for work during the day and rest during the night. Moreover, he commanded his people to rest one day in seven. "Six days you shall do your work, but on the seventh day you shall rest" (Exod. 23:12 NRSV); "the seventh day is a Sabbath of rest, holy to the LORD" (31:15). This rest included the beasts of burden, bondservants, and aliens so that all might be refreshed. This idea was extended to include the seventh or sabbatical year, in which the land also was to have rest. Both field and vineyard were to lie fallow, and their voluntary crops were to feed the poor and the wild beasts (23:10 – 11; Lev. 25:1 – 7).

Rest is nature's means of building body tissues and restoring energies. It is usually acquired in sleep, which consumes about one-third of a person's time. When JACOB fled from ESAU and night overtook him, he rested at BETHEL with his head on a stone (Gen. 28:11). ISSACHAR would see "how good is his resting place" (49:15). MOSES sought rest for the Hebrew children from their burdens of slavery in Egypt (Exod. 5:5). God's prophets and apostles needed rest from their religious services, some of which were strenuous. ELIJAH rested under a broom tree from fatigue in fleeing from JEZEBEL (1 Ki. 19:4). The wealthy Shunammite friends built a special guest room for the prophet ELISHA to rest in when passing that way on his preaching circuit (2 Ki. 4:11).

When the disciples returned from their preaching mission, Jesus said to them, "Come with me by yourselves to a quiet place and get some rest" (Mk. 6:31). In Jesus' busy ministry it was necessary for him to grasp rare moments for rest, as at Jacob's well (Jn. 4:6), and to sleep, as in a boat in a storm on Galilee (Mk. 4:38). PAUL, in his urgent mission, said, "For when we came into Macedonia, this body of ours had no rest" (2 Cor. 7:5). Contrarily, there are times to forego rest: to work (Prov. 6:9), and to watch (Matt. 26:45).

II. Social rest. A community, tribe, or nation sometimes needs rest from a common pursuit, internal turmoil, or an enemy. The Israelites anticipated rest in the Promised Land after long years of wandering and conflict with enemies (Deut. 12:9 – 10). Rest from enemies meant PEACE, freedom from war. At times in the period of the judges, "the land had rest for forty years" or "for eighty years" (Jdg. 3:11, 30 NRSV). Though DAVID was a man of war, he attained peace, that is, rest from his enemies, before his death, and received promise from God that his son would reign in peace (1 Chr. 22:8 – 9, 18). SOLOMON later was able to say, "But now the LORD my God has given me rest on every side" (1 Ki. 5:4). During the reign of ASA, "the land had rest for ten years" (2 Chr. 14:1 NRSV).

III. Spiritual rest. Natural rest is a shadow of the ultimate state of blessedness, a taste of which is experienced here. It begins with Jesus' offer, "Come to me, all you who are weary and burdened, and I will give you rest. Take my yoke upon you and learn from me, for I am gentle and humble in heart, and you will find rest for your souls" (Matt. 11:28 – 29). Long ago God had said, "In repentance and rest is your salvation" (Isa. 30:15). Rest is the tonic most sought after when sin, sickness, or separation causes frustration of the mind and anguish of the soul.

Paul said, "When I came to Troas…my mind could not rest because I did not find my brother Titus there" (2 Cor. 2:12 – 13 NRSV). Out of mortal illness David cried, "O my God, I cry by day, but you do not answer; / and by night, but find no rest" (Ps. 22:2 NRSV). But healing and rest evoke thanksgiving: "Be at rest once more, O my soul, / for the LORD has been good to you" (Ps. 116:7). Similarly, Job cried out of his misery, "I have no peace, no quietness; / I have no rest, but only turmoil" (Job 3:26). Certainly alienation from God deprives one of rest, as with the Gerasene demoniac (Mk. 5:1 – 5) and the unclean spirit (Lk. 11:24).

HEAVEN holds the fondest dreams of rest. It is the place of God's rest (Acts 7:49). John records, "Then I heard a voice from heaven say, 'Write: Blessed are the dead who die in the Lord from now on.' 'Yes,' says the Spirit, 'they will rest from their labor, for their deeds will follow them'" (Rev. 14:13). When JOB was on the brink of despair from the loss of children, health, wealth, and sympathy of friends, he visualized a state of spiritual rest. He regretted that he had been born: "For now I would be lying down in peace; / I would be asleep and at rest" (Job 3:13; cf. v. 17). Canaan, the land of promised rest (Deut. 3:20), was an earthly symbol of paradise rest, not acquired in JOSHUA's conquest (Heb. 4:8). Obviously then, "There remains…a Sabbath-rest for the people of God; for anyone who enters God's rest also rests from his own work, just as God did from his. Let us, therefore, make every effort to enter that rest" (4:9–11). So, for believers, "the promise of entering his rest still stands" (4:1). See also SABBATH.

restitution. See CRIMES AND PUNISHMENTS.

restoration. The act of bringing back to a former state. This term is especially applied to the period of Hebrew history following the EXILE. The time covered by the restoration of the Israelites will be regarded here as beginning about 515 B.C. and terminating with the time of MALACHI, about 450 B.C. Once the edict of CYRUS, proclaimed in 538, had given official permission for expatriate groups in Babylonia to return to their homelands and renew the pattern of their former ways of life, those members of the captive Jewish population who had caught the vision of a new existence in Judea along theocratic lines, as indicated by EZEKIEL, were not slow to begin the arduous journey back to

the desolated homeland. As the prophecies of HAGGAI and ZECHARIAH make plain, the initial enthusiasm which the returned exiles had manifested for the rebuilding of the ruined TEMPLE became dissipated at a comparatively early period. The most that the inhabitants of Jerusalem were apparently willing or able to do was the reconstruction of their own houses in the city. However, the situation was remedied by the timely intervention of Haggai and Zechariah in the year 520, and five years later the successor to the temple of Solomon was dedicated amid scenes of great rejoicing.

The policy of the Persian rulers was remarkable for the amount of political freedom that was given to the constituent elements of the empire. This enlightened attitude of the government presented certain difficulties for the Persians initially, for after the suicide of CAMBYSES II, son of Cyrus, in 522 B.C., some of the provinces Cyrus had conquered tried to break away from imperial rule. However, order was finally restored by the Achaemenid prince DARIUS the Great (522 – 486), but while he was regaining control of the situation, the people of Judea managed to establish some degree of independence. When Darius finally imposed imperial rule, he followed a policy of benevolence toward the returned exiles in Judea.

According to Ezra 6:13, a military governor named TATTENAI was in charge of the Persian province of Judah, and the state was encouraged to function as a religious rather than a political entity, with JESHUA appointed as high priest in the time of Haggai. Precisely what happened to ZERUBBABEL after 515 B.C. is unknown, but it has been suggested that he either died or was removed from office by the Persian government as a precautionary measure against the establishing of a Judean state independent of Persian control. From that time onward the political situation in Judah seems to have been stabilized by the formulation of a theocratic system supported by the central Persian administration.

Of the fifty-seven years that followed the dedication of the second temple, the book of EZRA has nothing to report. This situation is unfortunate, for this particular period of biblical history is lacking in extensive documentation. As far as the Persian empire was concerned, the death of Darius I in 486 B.C. was followed by the accession of his son XERXES I, who ruled for twenty years from 485. This man, to whom there is a probable reference under the name of AHASUERUS in Ezra 4:6, maintained the administration of the empire at a high level of efficiency, and crushed the political aspirations of some of his more restless subjects. An inscription from his reign, which was found in 1939 at PERSEP-OLIS, demonstrated the vigor of his rule and made clear his zeal for the Persian god Ahura-mazda: "When I became king there were among those lands…which rebelled. Then Ahuramazda helped me. By Ahuramazda's will such lands I conquered…this which I did I achieved it all by the will of Ahuramazda…" When Xerxes died in 465, he was succeeded by his second son Artaxerxes I Longimanus (464 – 424), who is evidently the Artaxerxes mentioned in Ezra 4:7 – 23.

For the inhabitants of Judea the period of the restoration was marked by a valiant struggle to overcome the poverty that was evident on every hand. The city of Jerusalem was far from being rebuilt, and though the temple had been completed, there were still no walls to protect the city dwellers from their enemies in the locality. Consequently Samaritans and Arabs could enter the city and plunder the crops whenever they chose. This dispiriting fact, along with the waning of enthusiasm for further building activity after the temple had been restored, compelled the Jews to eke out a precarious existence in and around Jerusalem.

In the midst of this forbidding situation help arrived rather unexpectedly from Jews who were scattered throughout the Persian empire and who were concerned about the welfare of the struggling repatriates in Judea. These people brought their influence to bear upon the central administration, with the result that in 458 B.C. Artaxerxes appointed Ezra the scribe, a member of a Jewish priestly

family, as a royal commissioner for Jewish affairs in Judea. Ezra arrived in Jerusalem armed with a decree that required the Jews to obey his instructions regarding the regulating of religious life. He proposed drastic measures for dissolving marriages contracted with heathen women. When he attempted to erect some kind of defensive wall around Jerusalem, his enemies both inside and outside the city allied against him and he returned to Persia in 457, doubtless to report to the central authority.

The prophecy of Malachi, dated about 450, shows the conditions of contemporary society in Jerusalem. The people were dispirited by the apparent failure of God to meet even the most pressing needs of his people (cf. Zech. 8:4 – 13), and many were openly skeptical about the value of a life lived in obedience to God. With clear contempt for the traditions of the Torah, many irreligious Jews were committing adultery, indulging in perjury, and oppressing the poor (Mal. 3:5). The priests also had become lax in their duties, manifesting boredom with their religious functions (1:13) and treating sacrificial regulations so lightly that they offered inferior animals in the service of God (1:7 – 8). Because the prophetic word was no longer taken seriously, Malachi found that he had to argue his case in a manner unknown to earlier prophets. Drastic action was clearly necessary to remedy the deterioration, and it fell to Nehemiah, who was appointed civil governor of Judea in 445 B.C., to furnish the leadership which restored the confidence of the community in the divine purpose, and made feasible the religious reforms of Ezra. See Israel, history of, XII.

<div align="right">R. K. Harrison</div>

resurrection. The divine miracle of restoring a deceased person to life in body and soul, either to temporal life, as was the case with Lazarus (Jn. 11), or more properly to eternal, glorified life, to which Christ was raised and those who are his will be raised at his return. Scripture also teaches a resurrection to eternal punishment in body and soul of those who lived and died without Christ (Matt. 10:28; Jn. 5:28 – 29; Acts 24:15; see punishment, eternal). When the word *resurrection* is qualified, as a rule the expression "the resurrection of [*or* from] the dead" is used (Matt. 22:31; Lk. 20:37; Acts 4:2; 17:32; 23:6; 24:21; 26:23; 1 Cor. 15:12 – 13). The resurrection of believers is sometimes called "the resurrection of the righteous" (Lk. 14:14; Acts 24:15) or "the resurrection of life" (Jn. 5:29 NRSV); that of the unbelievers, "the resurrection of condemnation" (Jn. 5:29 NRSV) or "of the unrighteous" (Acts 24:15 NRSV). The expression "resurrection of the body," frequently used in the church creeds, is based on Scripture (cf. Matt. 27:52; Rom. 8:11; 1 Cor. 15:35, 42 – 44; Phil. 3:21). The early fathers introduced the phrase "resurrection of the flesh," which is still found in various creeds. The church adopted this expression because many heretics, denying an eternal future for the body, understood the word *dead* as meaning "dead souls." By confessing that the flesh will be raised, the church emphasized the biblical truth that the dead will be raised in their physical bodies. Though the expression is not found in Scripture itself, there is good reason to retain it, for many explain the word *body* in the phrase "resurrection of the body" as denoting the "self" or "person," to the exclusion of the physical body (see below).

I. Known from the infallible Scriptures. Paganism was and is without the resurrection hope (Eph. 2:12; 1 Thess. 4:13). Greek philosophy taught the immortality of the soul, the soul being considered divine; whereas for the body, being matter and therefore considered evil, there was no hope. Paul's proclamation of the resurrection was ridiculed in Greece (Acts 17:32). Liberal theology, denying the infallibility of the Bible, generally reduces the resurrection hope to a modern version of the immortality of the soul; that is, man's true "self" continues to exist in an immaterial, ghostlike spirit body. To Karl Barth, who also rejects the infallibility of the Bible in the traditional sense of the

word, the end means "eternalization"; that is, after this life men and women will eternally exist in the mind of God, not in reality (*Church Dogmatics* [1964 – 82], 3/2:698ff.; 3/3:99ff.; 257ff.). According to Scripture the soul is not divine or as such immortal, nor is the body evil. Created in the IMAGE OF GOD, the man and the woman were "very good" in every aspect of their being (Gen. 1:27, 31; 2:21) and were destined to ETERNAL life in body and soul (3:22). Even after the FALL, we do not need deliverance from the body; we rather need that our body and soul be delivered from the power of SIN and DEATH, which Christ grants to believers (Jn. 6:40; 11:24 – 26; 1 Cor. 15:54 – 56).

II. The work of God and Christ. It is God who by an almighty creative act raised the dead (Matt. 22:29; 1 Cor. 6:14; 15:38; 2 Cor. 1:9; 4:14). This work, however, is mainly accomplished through agents, namely, prophets and apostles (1 Ki. 17:17 – 24; 2 Ki. 4:32 – 37; Acts 20:10), and particularly through God's Son, Jesus Christ, who is the Father's unique agent (Jn. 6:39 – 40). He himself is the resurrection and the LIFE (Jn. 11:25). He brought life and immortality to light (2 Tim. 1:10), and his own resurrection in glory guarantees the resurrection of those who are his (1 Cor. 15:20 – 23, 47 – 49; 1 Thess. 4:14 – 18). Though Christ as God's agent will also raise those who lived and died without him, their resurrection is not the result of his redemptive work, nor is it redemptive in nature. He raises them as the divinely appointed Judge (Jn. 5:26 – 30), from whose hand each person will receive "what is due him for the things done while in the body, whether good or bad" (2 Cor. 5:10).

This wall painting at the Russian Church of the Ascension on the Mount of Olives depicts the raising of Lazarus, the setting for Jesus' words: "I am the resurrection and the life" (Jn. 11:25).

III. Resurrection and resurrection hope in the OT. In the OT account three persons were raised from the dead: the widow's son at Zarephath (1 Ki. 17:17 – 24), the son of the Shunammite (2 Ki. 4:32 – 37), and the man whose dead body was cast into Elisha's grave (2 Ki. 13:21). The claim that the widow's son had not died cannot be sufficiently substantiated. Although these resurrections meant only a temporal restoration to earthly life, they undoubtedly strengthened Israel's faith in the almighty power of Yahweh as the God who was able even to raise the dead.

A. Lack of early and frequent evidences of the resurrection hope. The OT contains only a few and rather late statements that give clear evidence of an eschatological resurrection HOPE. This by no means implies that such a hope was unknown in Israel. To God's people the emphasis was upon a long life on earth (Exod. 20:12) with but a dim view of an eternal future for the whole man. This is because God's redemptive work in Christ was only gradually revealed. The full resurrection hope could therefore not be known nor enjoyed until Christ had conquered death.

The true believers in Israel must have known that their mighty God—who proclaims, "I put to death and I bring to life" (Deut. 32:39)—had more in store for them than this life and not only for their souls but also for their bodies, for the two are inseparable according to OT teachings. According to Heb. 11:19, "Abraham reasoned that God could raise the dead," and the preceding verses state that the PATRIARCHS were looking forward to "the city with foundations," desiring "a better country" than Canaan (vv. 10, 16). To these passages full justice is done only if one regards them as implying the resurrection hope, however vague in that early stage. This hope must have grown when in later days God's resurrection power was clearly shown. The fact that ENOCH (Gen. 5:24; Heb. 11:5) and ELIJAH (2 Ki. 2:11 – 12) were taken to be with God before they died must also have strengthened the hope of an eternal future for human beings in their completeness, that is, body and soul. It is, therefore, unwarranted and unnecessary to look for the source of Israel's resurrection hope in some ancient "world folktales," or to Iranian and other teachings concerning "a common eschatological event" (*IDB*, 1:41).

B. The resurrection hope expressed. The main OT passages that call for consideration are the following: HANNAH sang, "The LORD brings death and makes alive; / he brings down to the grave and raises up" (1 Sam. 2:6). Though some scholars claim that Hannah referred to a real resurrection, the context seems to exclude this interpretation, for her psalm refers to what the Lord regularly is doing on earth. This verse therefore is to be understood as stating that the Lord is able to take away human life as well as to preserve it, even before the gates of death. (For elaborate interpretations of this and other Scripture passages briefly dealt with in this article, see J. A. Schep, *The Nature of the Resurrection Body* [1964].)

JOB exclaimed, "I know that my Redeemer lives, / and that in the end he will stand upon the earth. / And after my skin has been destroyed, / yet in my flesh I will see God; / I myself will see him / with my own eyes—I, and not another. / How my heart yearns within me!" (Job 19:25 – 27). Though most modern commentators deny that Job is speaking of an eschatological resurrection and judgment, the logical line of thought seems to favor the so-called post-mortem interpretation: Job was sure that after his death God would stand up as his GOEL and vindicate him. In accordance with the RSV, the Hebrew expression *mibbĕśārî* (v. 26) is best rendered, "from my flesh." With his own eyes, out of his restored flesh, having been raised from the dead, Job will see his divine judge vindicating him. Claiming that such a resurrection hope is unthinkable at such an early stage is begging the question.

DAVID expresses this hope: "Therefore my heart is glad and my tongue rejoices; / my body also will rest secure, / because you will not abandon me to the grave, / nor will you let your Holy One see decay. / You have made known to me the path of life; / you will fill me with joy in your presence, / with eternal pleasures at your right hand" (Ps. 16:9 – 11). The *parallelismus membrorum* in v. 9 makes it necessary to understand the second line ("my body [*lit*., flesh] will rest secure") as speaking of safety in this life. Consequently v. 10, starting with "because," cannot be understood as referring to a future resurrection. The statements in this passage, however, speak in such general and absolute

terms of the complete victory of life, that David, under the inspiration of the Holy Spirit, must have had a prophetic glimpse of the everlasting, glorious life which his descendant, Jesus Christ, was to bring to light in his resurrection (Acts 2:26 – 32; 1 3:35 – 37).

ISAIAH assures us that the Sovereign Lord "will swallow up death forever" and "wipe away the tears from all faces" (Isa. 25:8a). This verse is not a gloss but quite a natural sequel to v. 7, where it is stated that the shroud (of mourning and grief, cf. 2 Sam. 15:30; Esth. 6:12; Jer. 14:3) that is spread over all nations will be destroyed. Thus Isa. 25:8a explains *why* this symbol can be destroyed: death itself will be completely destroyed by Yahweh. Within the framework of a moving description of the eschatological feast to be made "for all peoples" (v. 6), v. 8 speaks clearly of the absolute destruction of death in the great DAY OF THE LORD (cf. 1 Cor. 15:54; Rev. 21:4). In the following chapter Isaiah exclaims, "But your dead will live; / their bodies will rise. / You who dwell in the dust, / wake up and shout for joy" (26:19). In contrast to v. 14 (which does not imply that there is no future resurrection, but that Israel's oppressors are dead and therefore unable to harm God's people), v. 19 prophesies the eschatological, physical resurrection of the righteous dead, namely, those faithful Israelites who had died under the "other lords" of v. 13. That the prophet does not speak of a "general" resurrection does by no means imply that at the time such a resurrection was unknown. The comfort given to the true Israelites would rather presuppose the belief in it.

EZEKIEL portrays the vision of the valley of dry bones, lying disconnected and lifeless but revived by the almighty power of God's Spirit, this revival implying resurrection (Ezek. 37:1 – 10). According to some, this vision, which is a prophecy of Israel's restoration as a nation (vv. 11 – 14), presupposes the common belief in a bodily, future resurrection of the dead. This may be so, but it cannot be conclusively substantiated.

DANIEL clearly predicted a resurrection: "Multitudes who sleep in the dust of the earth will awake: some to everlasting life, others to shame and everlasting contempt" (Dan. 12:2). The prophet comforted the faithful Israelites for whom an unprecedented tribulation was looming in the near future (v. 1). Many of them would have to lay down their lives for Yahweh's sake. These martyrs were comforted by the assurance of a bodily resurrection in glory, whereas those who denied the Lord would be raised to "shame and everlasting contempt." A general resurrection of the dead is obviously not intended here—which is not to say that he did not believe in it, but rather that he wanted to comfort his brethren who would have to endure suffering and death for righteousness' sake. Even so, his prophecy gives unmistakable evidence of faith in an eschatological, bodily resurrection.

God promises through HOSEAH, "I will ransom them from the power of the grave; / I will redeem them from death. / Where, O death, are your plagues? / Where, O grave, is your destruction?" (Hos. 13:14). Alluding to this promise, PAUL speaks of the complete victory over death and the grave (1 Cor. 15:55). This does not imply that Hos. 13:14 predicted the resurrection of the dead. The whole context speaks of judgment on God's unfaithful people, and so the natural interpretation of v. 14 is that no one will be able to save Ephraim from destruction so that death and SHEOL could be defied. On the contrary, the Lord will have no mercy.

In conclusion it may be said that the OT teaches with varying degrees of explicitness the resurrection of the dead, a doctrine which is divinely inspired and not derived from pagan sources. It should also be noted that in Jewish noncanonical literature many references to the resurrection may be found, though conceptions and interpretations of the various passages differ widely. (Space does not permit the discussion of these passages. Cf. T. H. Gaster in *IDB*, 4:41 – 43; G. W. E. Nickelsburg in *ABD*, 5:684 – 91.)

IV. Resurrection in the NT. The primary Greek noun meaning "resurrection" is *anastasis G414* (lit., "a raising up, a rising up," Matt. 22:23 et al.), derived from the verb *anistēmi G482* ("to raise up," Jn. 6:39 – 40 et al.; intransitive, "to rise up," Mk. 9:10 et al.). Another noun, *egersis G1587* (lit., "a waking"), is used only once, with reference to Jesus' resurrection (Matt. 27:53), but the cognate verb *egeirō G1586* (lit., "to awaken") occurs frequently with the emphasis on God's initiative and activity (Acts 2:24 et al.); the passive form can have an intransitive meaning, "to wake up, rise," but when used of the resurrection it is more likely a true passive (cf. Rom. 6:4). For further discussion of these terms, see RESURRECTION OF JESUS CHRIST IV.

A. The historical record. Some of the raisings from the dead recorded in the NT were performed by Jesus himself: JAIRUS'S daughter (Mk. 5:35 – 43 and parallels), the widow's son (Lk. 7:11 – 17), and Lazarus (Jn. 11). When Jesus died, many deceased saints were raised (Matt. 27:52 – 53), whereas PETER was the agent in the raising of DORCAS (Acts 9:36 – 42), and PAUL in that of EUTYCHUS (20:9 – 12). The raisings by Jesus were signs of his messiahship. Through him the new age, bringing victory over sin and death, had come (Matt. 11:5; Lk. 7:22; Jn. 11:25). The mysterious resurrection of the "many saints" pointed in the same direction, since it coincided with Jesus' death; and also the raisings of Dorcas and Eutychus, for the apostles always acted as Jesus' agents in various acts of healing (Acts 3:6; 16:18; 2 Cor. 12:12; cf. Matt. 10:8). Since all these raisings were only signs of Jesus' resurrection power, they meant only a return to this mortal life; the final victory over death waits until the end.

Jesus' own resurrection, taking place on Sunday morning after his death and burial on Friday evening (Matt. 28:1 and parallels), differs from all other raisings as Jesus himself differs from other human beings. He is God incarnate (Jn. 1:14), the last ADAM, representing sinful and lost mankind (Rom. 5:12 – 19; 1 Cor. 15:45 – 49), the only MEDIATOR between God and man (1 Tim. 2:5); he came to destroy the works of the devil (who has the power of death, Heb. 2:14; 1 Jn. 3:8) and to save sinners (1 Tim. 1:15). In that capacity he died "for our trespasses" (Rom. 4:25 NRSV), "a ransom for all" (1 Tim. 2:6), and was "raised to life for our justification" (Rom. 4:25). Jesus "through the Spirit of holiness was appointed the Son of God in power by his resurrection from the dead" (Rom. 1:4 TNIV), raised in a "glorious body" (Phil. 3:21) never to die again (Rom. 6:9). He is the great High Priest by "the power of an indestructible life" (Heb. 7:16), the source of true, glorious, and everlasting life spiritually and physically for all who are in him (Jn. 3:16; 6:56 – 58; 11:25 – 26; 14:19; 2 Cor. 13:4; 2 Tim. 1:10; Rev. 1:18).

The earliest record of Jesus' resurrection and of some appearances of the risen Lord is given by Paul through divine revelation (1 Cor. 15:3 – 8; cf. 11:23). According to Paul the preaching of the gospel as well as faith in Christ are futile without Christ's resurrection (15:17). Further detailed descriptions of the empty tomb and the appearances, on which the church's faith in Jesus' resurrection is based (Acts 1:3), are to be found in the Gospels (Matt. 28; Mk. 16; Lk. 24; Jn. 20 – 21). For a full discussion see RESURRECTION OF JESUS CHRIST.

B. The future resurrection. Christ is to raise and judge everyone. Unequivocally the NT teaches the raising of all the dead—those in Christ as well as those without him—by Jesus Christ himself, who will judge them according to their works (Jn. 5:28 – 29; Acts 17:31; Rom. 14:10; 2 Cor. 5:10; Rev. 11:18; 20:11 – 15). The end of God's ways cannot be the INTERMEDIATE STATE, in which people exist without their bodies (Heb. 12:23; Rev. 20:4). Each human being in his or her totality was created for eternity, whereas the judgment will be concerned about what everyone has done in the body (2 Cor.

5:10); hence the necessity of a bodily resurrection, either to eternal life or to eternal judgment under the wrath of God (Matt. 10:28; 25:34; Jn. 3:36; 5:29; Rev. 20:15). Though Christ as the divinely appointed judge (Acts 17:31) will raise all the dead, only the resurrection of his believers, to life eternal, is guaranteed by Christ's resurrection (1 Cor. 15:20 – 24; 1 Thess. 4:14). From 1 Cor. 15:23 it seems clear that "all" in v. 22 denotes all who belong to Christ. Since the essence of Scripture is the gospel of salvation, little is said in the NT about the resurrection of those without Christ. All the emphasis, especially in the great chapter of the resurrection (1 Cor. 15), is on that of the believers.

When will the dead be raised? According to the general teachings of the NT and particularly according to those of Paul (1 Cor. 15:51 – 52; 1 Thess. 4:16), the resurrection of the deceased believers will take place at the SECOND COMING of the Lord when also those in Christ who at that moment are alive will be changed. All believers of all the ages constitute one company of glorified saints, who are privileged to meet their Redeemer in the air. After having first been acquitted before Christ's glorious throne and welcomed into his Father's kingdom (Matt. 25:31 – 40), they will participate in pronouncing judgment on the unbelievers and fallen angels (Matt. 25:41 – 46; 1 Cor. 6:2 – 3). Whether the unbelievers will be raised at the same time as the believers or, as some suggest, somewhat later, cannot be determined with certainty.

A controversial subject among evangelicals is the question whether there will be only one physical, general resurrection, or at first a partial one and after that a final general resurrection. Those favoring the latter opinion appeal to Rev. 20:4 – 6, which states that those who were faithful during the reign of Antichrist "came to life and reigned with Christ a thousand years. (The rest of the dead did not come to life until the thousand years were ended.) This is the first resurrection." Others, who are of the opinion that there will be only one bodily resurrection, point to the fact that apart from this controversial text, nowhere in Scripture is a first resurrection to be distinguished from a second. They therefore understand the "first resurrection" (v. 5) to be the promotion of the faithful saints to glorious life with Christ immediately after death in the intermediate state (cf. Phil. 1:23; Heb. 12:22). Space does not permit further discussion of this exegetical problem. See MILLENNIUM.

V. The resurrection body. Most present-day theologians reject the idea of a resurrection in a body of flesh, either on so-called scientific grounds, which implies a denial of God's power (cf. Mk. 12:24), or because they regard the flesh as the source or seat of sin. According to this viewpoint, people will be raised as spirits, or in an "angelic," immaterial body. Though in Scripture and particularly in Paul's writings the word *flesh* sometimes denotes the evil human nature, nowhere is the flesh-body as such proclaimed evil and the source of sin. It is the heart, the religious center of one's personality, which is evil (Gen. 8:21; Mk. 7:14 – 23; Rom. 2:5). The flesh-body is an ethically neutral medium which, as far as believers are concerned, belongs to Christ (1 Cor. 6:15); it is a temple of the HOLY SPIRIT (1 Cor. 6:19) and a means to serve God (Rom. 6:12 – 13).

The resurrected Christ ascending into heaven. Painting on the ceiling of the Church of the Ascension on the Mount of Olives.

That in Scripture the word *body* would denote the "self" or the "spiritual personality," as some aver, cannot be substantiated (see the detailed critique of this view by R. H. Gundry, *Sōma in Biblical Theology: With Emphasis on Pauline Anthropology* [1976]). The resurrection of the dead in a body of flesh is guaranteed by Jesus' resurrection in a body of "flesh and bones," with scars of his wounds visible, and capable of being touched and of eating food (Lk. 24:38 – 43; Acts 10:41). At his ascension Jesus did not discard this flesh-body, as is clear from Acts 1:11; Phil. 3:21; Rev. 1:17. Since the resurrected believers will be like the risen Christ (1 Cor. 15:49; Phil. 3:21; 1 Jn. 3:2), they too will be raised in their bodies of flesh (cf. 1 Cor. 15:35 – 42). Only in this way is a person saved in his totality, and able to live on a new earth (Isa. 65:17 – 19; 66:22; Matt. 5:5; Rev. 21:1 – 3).

Some passages are thought to deny a physical resurrection. For example, Jesus told the SADDUCEES (Matt. 22:30; Mk. 12:25) that the resurrected saints will be like angels. The context, however, makes it clear that the resemblance will lie in the fact that after the resurrection there will be no marriage. Luke recorded the reason for this change: "they can no longer die" (Lk. 20:36); in other words, reproduction is no longer needed to fill the places that have become vacant because of death. There is no reference here to the nature of the resurrection body, and the passages quoted do not even imply that the distinction between male and female will be abolished.

Again, the resurrection body is called a "spiritual" body (1 Cor. 15:44). This, however, does not mean that it will be a body consisting of spirit. Rather, the statement characterizes the resurrection body as one completely filled and governed by the Holy Spirit. Another statement by Paul, namely, that "flesh and blood cannot inherit the kingdom of God" (15:50), is often considered to exclude the idea of a resurrection body of flesh. The apostle, however, teaches something entirely different. The expression "flesh and blood" never denotes the "substance" of the body, but man in his totality as a frail and perishable creature (Matt. 16:17; Gal. 1:16; Eph. 6:12; Heb. 2:14). It has the same meaning in 1 Cor. 15:50a, shown by the fact that in the parallel clause (v. 50b) the word "perishable" is used, which obviously denotes the whole person in his corruptibility and not the substance of his body. The entire context shows that human beings, as frail, perishable creatures, cannot enter God's glorious, eschatological kingdom. They first must be made immortal, imperishable, powerful, and glorious.

There is no denial of a resurrection in a body of flesh.

Tombs (*kokhim*) at the Church of the Holy Sepulchre in Jerusalem. The resurrection of Jesus occurred in the newly hewn tomb of Joseph of Arimathea.

Though the resurrection body will be essentially identical to the present body in that it is a body of flesh, there will be a tremendous change regarding the conditions of its existence. Paul emphasized the necessity of such a change for the dead as well as for those who are living when Jesus returns (note the word "must" in 1 Cor. 15:53). This change is necessary because the resurrected believer enters upon a new world of impeccable perfection and heavenly glory (1 Cor. 15:47 – 49) like that of Christ (2 Cor. 3:18), a glory that will differ in accordance with the individual believer's dedication to the Lord in this life (Dan. 12:3; 1 Cor. 3:14 – 15; 2 Cor. 9:6). In these wonderful resurrection bodies the believers will be able to ascend to heaven and meet their returning Lord in the air (1 Thess. 4:16 – 17). The change will be so miraculous and spectacular that no one is able to form any adequate conception of it on this side of the grave, or give a trustworthy detailed description.

Resurrection, Treatise on the. The title of a brief document preserved in Coptic in the NAG HAMMADI LIBRARY (NHC I, 4). Written in the form of a letter probably in the late 2nd cent., it purports to be a response to a certain Rheginos, who is said to have inquired into "what is proper concerning the resurrection" (44.5). The author asserts that "the Savior swallowed up death" (45.14 – 15) and that therefore "we are drawn to heaven by him, like beams by the sun, not being restrained by anything. This is the spiritual resurrection which swallows up the psychic in the same way as the fleshly" (45.36 – 46.2). Toward the end of the document, he exhorts the reader not to live in conformity with the flesh, for "already you have the resurrection" (49.11 – 16). This last statement appears to provide a striking parallel to Paul's warning against the teaching of HYMENAEUS and PHILETUS (2 Tim. 2:18). The language of the treatise (e.g., "the emanation of Truth and Spirit," 45.12) reflects Valentinian influence (see GNOSTICISM), and the author also appears to have been influenced by Middle Platonism. (English trans. in *NHL*, 52 – 57.)

resurrection of Jesus Christ. After JESUS CHRIST died and was buried on Good Friday, he was raised from the dead in body and soul on the first day of the week. His resurrection was not a mere resuscitation, as was the case with LAZARUS and others whose resurrections are recorded in Scripture (see the general article on RESURRECTION). They returned to temporal life only to die again. Jesus Christ, however, was raised to life eternal and everlasting glory (Rom. 6:9 – 10; Heb. 7:16; 1 Pet. 1:21; Rev. 1:18).

    4. The truth
7. Jesus' resurrection body
    1. Spiritualizing views
    2. A real body of flesh
    3. The same body, but in a glorified condition
8. The significance of Jesus' resurrection

I. Place of the resurrection in the NT kerygma. In the KERYGMA—the NT proclamation of the good news—Jesus' resurrection occupies the central and all-important place. The GOSPELS find their climax in the description of Jesus' resurrection (Matt. 28; Mk. 16; Lk. 24; Jn. 20 – 21). In the first kerygma of the early church the resurrection is the focal point (Acts 2:24 – 32; 3:14 – 16, 26; 4:10; 5:30; 7:55 – 56; 10:39 – 43). It also has this central place in PAUL'S letters. In 1 Cor. 15:17 – 19 the

apostle states that the whole Christian faith and the salvation it brings stands or falls with the resurrection of our Lord. (See also Acts 17:31; Rom. 8:11; 1 Cor. 6:14; Gal. 1:1; Eph. 1:20; Col. 2:12.) Everywhere in the NT the resurrection is proclaimed as the decisive turning point in the life of Jesus and in the history of the world's redemption. This is due to the uniqueness of Christ's person, as being both God incarnate (Jn. 1:14), and the promised MESSIAH (4:25 – 26), and to the uniqueness of the work he had come to do, namely, to reconcile sinful mankind to God by dying an atoning death on a cross (Matt. 20:28; Rom. 5:10; 2 Cor. 5:18 – 19; Col. 1:21 – 22; 1 Tim. 2:5 – 6); while as the risen Lord he imparts to sinners the redeeming fruit of his death: JUSTIFICATION (Rom. 4:25; 5:9 – 10), SANCTIFICATION (8:1 – 2; 1 Cor. 1:30), and glorification (Rom. 8:30; 2 Cor. 3:18; 4:17).

II. The resurrection a historical fact to be accepted by faith. The sources for the knowledge of Christ's resurrection are the Scriptures, especially the Gospels, which contain the records of the experiences of eyewitnesses to whom the Lord appeared, giving "many convincing proofs that he was alive" (Acts 1:3), but also the special revelation given to Paul (Acts 9:1 – 6; 1 Cor. 15:3 – 8). These sources proclaim the resurrection as a historical fact of supernatural character.

Since the Scriptures are given by INSPIRATION and therefore can be trusted as the infallible revelation of God, the resurrection is an object of FAITH and of faith alone. Liberal theologians of older and recent schools, rejecting the infallibility of the Bible, have been trying to find out precisely what happened in connection with Jesus' resurrection by applying the historical method of higher criticism as a tool of human research and reasoning in the field of revelation. The result invariably was—and is—a denial of the resurrection as Scripture speaks of it, that is, Jesus Christ's real and literal rising from the tomb in his own body of flesh and bones (Lk. 24:39 – 40; Jn. 20:27). According to the critics, many statements in the Gospels and the rest of the NT are without proof and must be rejected as "later embellishment of the primitive tradition" (R. Bultmann in *Kerygma and Myth: A Theological Debate*, ed. H. W. Bartsch, 2 vols. [1953 – 62], 1:38).

A physical resurrection is also considered inconsistent in the 20th cent. with the findings of "the natural sciences, especially biology" (Paul M. Van Buren, *The Secular Meaning of the Gospel, Based on an Analysis of Its Language* [1963], 17). These sciences are declared to leave no place for anything supernatural. Liberal theology cannot deny, of course, that the faith in a bodily resurrection as recorded in the Gospels must be explained. According to some, it originated from the loving esteem of the early believers for their dead Master and their longing for his return from death, which led them to believe that they had seen him. Others presume that after his death Jesus actually "appeared" to his disciples, but only in a "spiritual" way. In a later paragraph these and other theories will be discussed.

At this stage it may suffice to emphasize that the resurrection of Jesus Christ, though a historical fact, cannot possibly be established by historical verification if "historical" means according to modern methods of historical research to the exclusion of faith in the trustworthiness of Scripture. Even if modern historians could prove that a certain man, Jesus of Nazareth, after his death became alive again, it would not mean a historical verification of Christ's resurrection. As has been stated, this was not merely the resuscitation of some dead person called Jesus of Nazareth, but the resurrection to eternal life and glory of God's Son in the flesh, the Messiah of Israel and the Savior of a lost world, by whose resurrection the reconciliation, which he brought about by his cross, was made effective unto eternal life for all who believe in him as he is revealed in the Scriptures.

Where this faith controls the investigations into "what happened," the Gospels provide ample "proof" that Jesus really and literally arose from the tomb in his own physical, though glorified, body.

Where such faith in the Scriptures is lacking, any attempt to "historically verify" Jesus' resurrection must of necessity fail. God does not permit man to find out his secrets by way of human research and reasoning, but only by faith in him as the revealer of truth through his word and Spirit (Matt. 11:25; 16:17; 1 Cor. 1:20 – 25).

III. Christ's resurrection and history. Claiming that the resurrection is a historical fact does not exclude that it also transcends history and may be rightly called "the beginning of a new history, which is no longer part of this our history" (K. Runia in *Reformed Theological Review* 25 [1966]: 47). By this new history is to be understood the history of human life in its immortal, glorified condition regarding body and soul. That new history is the end of God's ways for the believers. For them it will begin when Jesus returns from heaven, creating a new heaven and a new earth, which will be the suitable dwelling place for God's children in their glorified condition (Rev. 21:1 – 4; see HEAVENS, NEW). Then the river of present history, full of sin, misery, and death, will flow into the ocean of the never-ending new history of human existence in immortal glory, a history without sin, misery, or death.

It was upon that new history that Jesus entered as the "forerunner" of all believers, when he rose from the dead. From that moment on, history was affected, guided, and fully controlled by him (Matt. 28:18), but he has transcended it. That is why during the subsequent forty days Jesus, though several times appearing to his disciples, did not live with them in constant physical fellowship as before. The only reason he stayed on earth these forty days was to give convincing proof of the reality of his resurrection to the disciples, and through them to all believers (Acts 1:3). Except for that reason, he could have ascended into heaven immediately after his resurrection, as one who no longer belonged to current history but who had reached the goal of the new, eternal history of the end.

This truth Mary had to learn when she laid hold on Jesus in a way that suggested, "Master, now we shall never let you go again." Jesus' reply that she should not hold him fast because he was in the process of ascending to the Father (Jn. 20:17) makes it clear that in the resurrection he had crossed the dividing line between mankind's history and the new eternal history in IMMORTALITY and GLORY. This is also the reason he did not appear to the unbelieving Jews but only to his followers, through whose witness the unbelievers of that day and those of all ages had to be brought to faith.

IV. Raised and risen. In the Greek NT *anastasis G414* is almost always the noun employed to denote Jesus' resurrection; in one instance *egersis G1587* is used. Since both nouns can mean "rising" as well as "raising," their use is not decisive for the question whether Jesus was raised up or actively rose from the dead.

The situation is different with the related verb *anistēmi G482*: when it is transitively used, as is often the case in the Epistles (e.g., Rom. 4:24; 6:4; 8:11; 1 Cor. 15:15; Gal. 1:1), the resurrection is clearly proclaimed to be the work of the Father. Many times, however, this verb is used intransitively ("rise") especially in the Gospels but also now and then in the Epistles (e.g., Mk. 8:31; 9:9 – 10, 31; 10:31, 34; Lk. 18:33; 24:7, 46; Jn. 20:9; Acts 17:3; 1 Thess. 4:14). In such cases it is debatable whether the focus is on Jesus' actively rising from the dead. This intransitive use of the verb in itself is not sufficient proof of Jesus' rising from the dead by his own power, since the intransitive meaning is sometimes also employed to denote the resurrection of the dead (e.g., Mk. 12:25; 1 Thess. 4:16), of whom it certainly cannot be said that they will arise by their own power. Nevertheless, against the background of Jesus' own words in Jn. 10:17 – 18 that he has power to lay down his life and to take it again, the frequent use of the intransitive verb "rise" for Jesus' resurrection may be significant.

Similarly, the verb *egeirō G1586* (lit., "to awaken"), which in the active voice frequently describes God's activity (e.g., Acts 2:24), can have an intransitive meaning in the passive voice, though when used of the resurrection it is more likely that a true passive is intended, with God (the Father) as the agent, explicit or implied (Rom. 6:4 et al.). There is no inconsistency, however, between Jesus' "being raised" by the Father and his "rising" by his own power. As the obedient Servant of the Lord, who took the sinner's sins and curse upon himself, he had to wait for the Father to raise him up, thereby proving that Jesus' atoning work was indeed finished (Jn. 19:30). On the other hand, as God incarnate he had also the authority and power to take again the life he had voluntarily laid down, thus actively abolishing death, bringing life and immortality to light (2 Tim. 1:10), being "appointed the Son of God in power" (Rom. 1:4 TNIV).

V. The empty tomb as evidence of Jesus' resurrection. The fact that on Sunday morning the sepulchre was found empty is recorded in all the Gospels. According to the synoptics there were heavenly messengers in the tomb who adduced as convincing proof of Jesus' resurrection the fact that his body was not there (Matt. 28:6; Mk. 16:5 – 6; Lk. 24:1 – 5, 23). John describes how "the other disciple," obviously John himself, believed that Jesus was risen, for upon entering the sepulchre he not only found it empty, but also noticed how carefully Jesus' grave clothes had been folded and laid aside (Jn. 20:1 – 8). This detail excluded Mary's theory that Jesus' body had been taken away and buried somewhere else. John must have realized that if this had been the case, those who removed the body would certainly not have undressed it first and left the clothes lying in such an orderly condition. In the light of this, the empty tomb must certainly be reckoned among the convincing evidences of Jesus' resurrection.

Ancient and modern unbelief has tried to explain away the evidence of the empty tomb. This process began immediately after the resurrection. When the guard had informed the Jewish leaders of what had happened, the latter bribed the soldiers to spread the rumor that the disciples had stolen Jesus' body while they were asleep (Matt. 28:11 – 15). That this was an obvious lie is clear for the following reasons: (1) While the soldiers were asleep they could not possibly have seen the disciples doing their work! (2) It is unthinkable that a number of disciples could have approached the tomb through the midst of the sleeping soldiers, removed the heavy sealed stone, carried away the corpse, and so on, all without even one of the soldiers waking.

Other "explanations" are equally unacceptable and unreasonable. To mention a few of them: (1) The suggestion has been made that the women, misled by the darkness, went to the wrong sepulchre, where a young man told them that they were mistaken. In this case one must reject the words the "young man" spoke: "he is risen." Without any textual evidence these words are simply discarded as not belonging to the original text. This theory is to be rejected for the following reasons: (a) According to Mk. 16:2 the sun had risen and the women who had seen where Jesus' body was laid (Mk. 15:47; Lk. 23:55) knew the place. (b) If the theory were correct Mary Magdalene must have made the same mistake twice. (c) Not only the women but also Peter and John found the tomb empty.

(2) The so-called Swoon Theory: Jesus allegedly had not died on the cross but fainted, and in the tomb he revived. This suggestion is unacceptable on the following grounds: (a) Jesus' death was officially verified and ascertained (Mk. 15:44 – 45). (b) His side was pierced with a spear, which would have killed him had he not been dead already. (c) A cruelly wounded, crucified man would not have been able to "disentangle himself from the long windings of the grave clothes" (W. Barclay, *Crucified and Crowned* [1961], 145) nor to remove the heavy stone before the entrance of the tomb. (d) Even if he had been physically able to do all these things, the guard would have prevented his

escape.

(3) Either the disciples removed and hid Jesus' body in order to create "evidence" for an alleged resurrection, or thieves stole it. Regarding the latter suggestion, one can imagine thieves stealing the costly spices and expensive linen grave clothes (Jn. 19:39 – 40), but not a corpse which they first undressed, leaving the spices and clothing behind in the tomb, nicely folded at that. Moreover, as already indicated, the guard would have noticed and prevented all this. For these reasons alone this suggestion is simply ridiculous. Concerning the disciples' stealing the body, this theory implies that they were the most impudent deceivers. Even a Jewish scholar declares this to be impossible: "The nineteen hundred years' faith of millions is not founded on deception" (J. Klausner, *Jesus of Nazareth: His Life, Times, and Teaching* [1925], 35).

(4) Jewish or Roman authorities may have removed the body from the tomb and taken it into their own safe keeping. The main objection is that in this case it would have been very easy for the authorities to prove that the disciples were deceivers when they publicly proclaimed that Jesus was risen (Acts 2:24 – 25); the authorities could then have produced the body.

(5) The empty tomb is not explicitly mentioned in 1 Cor. 15:1 – 8, a passage that is thought to represent the earliest tradition of the resurrection. Some critics infer from this omission that the gospel stories of the empty tomb must have been created by the early church some time later in order to make the case for the resurrection stronger. Against this theory the following objections can be raised: (a) It intimates that the early church was capable of such deception that it created fancy stories and then passed them on as records of historical facts. (b) The empty tomb is clearly implied, for to the words "Christ died" Paul adds "he was buried" (vv. 3 – 4). There is a special reference to the fact that Jesus' dead body was laid in the tomb. Against this background Paul's statement, "he was raised on the third day," can only mean that Jesus came out of the tomb alive. This is confirmed by Paul's speech recorded in Acts 13:29 – 30, where the tomb is emphatically mentioned.

(6) Often the sign of the empty tomb is rejected on the ground of alleged contradictions in the stories concerned. Matthew and Mark, for example, mention only one angel, whereas Luke speaks of "two men." However, there is no reason to speak of a contradiction in this respect. Why, for instance, is it not possible that there were two angels, as Luke says, but that the one who spoke was in the foreground and made the deepest, unforgettable impression on the women? Could this not be the reason Matthew and Luke put all the emphasis on that spokesman, without thereby denying that there was another angel in the background? In general, if all the details of what happened in and around the empty tomb were known—which is by no means the case—many so-called contradictions would certainly vanish. The evangelists were not fools who contradicted each other while proclaiming the truth of Jesus' resurrection in days when eyewitnesses of the empty tomb were still alive. Such contradictions are particularly unlikely if, as most scholars claim, Matthew and Luke consulted Mark's gospel and inserted parts of it into their own.

Concluding our discussion of the empty tomb, one can say that the fact that so many different and obviously unconvincing explanations are offered by those who try to overthrow the evidence of the empty tomb strongly confirms the biblical truth that the tomb was empty solely because the Lord had actually and physically risen from the dead.

VI. The postresurrection appearances

A. The record. During the forty days after the resurrection, Jesus appeared some eleven times to his followers in order to give them "many convincing proofs" of the reality of his resurrection (Acts 1:3).

Some of these appearances took place in or near the holy city and are the so-called "Jerusalem appearances": (1) MARY in the garden (Jn. 20:10 – 17); (2) the women by the wayside (Matt. 28:9 – 10); (3) Simon PETER (Lk. 24:34); (4) the disciples on the road to EMMAUS (Lk. 24:13 – 27); (5) the company of apostles and disciples gathered in the evening of the resurrection day (Lk. 24:33 – 34; Jn. 20:19 – 25); (6) THOMAS a week later (Jn. 20:26 – 29); (7) the disciples, who saw Jesus ascend into heaven from the MOUNT OF OLIVES (Lk. 24:50 – 51; Acts 1:9).

Other appearances occurred in GALILEE and are the so-called "Galilean appearances": (1) The seven disciples on the seashore (Jn. 21); (2) Jesus' followers gathered on the mountain (Matt. 28:16), which appearance in all probability was the same as that to the 500 brethren, recorded by Paul (1 Cor. 15:6). In addition to these Jerusalem and Galilean appearances, the risen Lord showed himself to JAMES (1 Cor. 15:7) and finally to Paul on the road to Damascus (Acts 9), an event that Paul puts on a par with all the other appearances (1 Cor. 15:8).

B. The appearance narratives under attack. The reliability of the appearance narratives has been denied mainly on the following grounds: (1) In the earliest record (1 Cor. 15:5 – 8), Paul mentions only five appearances. One of these is not even found in the Gospels. The critics conclude that at a later stage the church must have "created" some extra "stories" for apologetic purposes. This suggestion is unacceptable for two reasons: (a) without any ground, it accuses the early church of committing "pious fraud"; (b) the alleged incongruity between the two records can easily be explained. Paul apparently related only "those incidents that were of special force, appearances to leaders of the community or to a number of witnesses" (E. L. Allen in *NTS* 35 [1956 – 57]: 350). The evangelists strengthened this early evidence by adding other material gathered from eyewitnesses and therefore equally true.

(2) The critics assume an irreconcilable conflict between Matthew's record of a Galilean appearance and Luke's tradition of Jerusalem appearances. Here, however, there is no conflict but only a difference that can easily be explained. A comparative study of the Gospels shows clearly that each evangelist made his own selection from the material he collected from his sources, in accordance with the special aim he had in view. Luke restricted himself to the appearances in Jerusalem because it was the main center (Lk. 24:47), without thereby denying that Jesus also appeared elsewhere, as Matthew and John record.

The Church of the Primacy of Peter (Tabgha, SW of Capernaum) is the traditional site where Jesus met with Peter after his resurrection.

(3) The narratives allegedly contradict each other. Mary, for instance, is not permitted to touch Jesus (Jn. 20:17), whereas Thomas is invited to do so (20:27). Here again there is no conflict. The situations were different. Mary, as has been discussed already, wanted to keep Jesus on earth, in continuous physical fellowship with the disciples as before. She was not forbidden to touch but only to hold him. Doubting Thomas, however, was a future apostle on whose witness depended so much for the spread of the gospel. He had to be able to convince himself fully of the reality of Jesus' resurrection.

C. Various theories. Most theologians who reject a physical resurrection admit that "something happened" that created the Easter faith of the church. Regarding the question, "What happened?" they suggest various theories. The most important are the following:

(1) The Subjective Vision Theory, which suggests that the disciples, as a result of their extremely strong longing for their dead Master, imagined that they saw him and heard him speak to them. Some writers speak of hallucinations, others of illusions or visions, but they agree that the experience was completely subjective, taking place not in reality but in the excited minds of the disciples. This theory is unacceptable for the following reasons: (a) Hallucinations of this kind always "happen as the climax to a period of exaggerated wishful thinking" (John R. W. Stott, *Basic Christianity* [1958], 55). The disciples, however, instead of being "on the lookout" for Jesus' resurrection, disbelieved or doubted when they were told about it—and even when they saw the risen Lord himself (Matt. 28:17; Mk. 16:8, 11, 14; Lk. 24:11, 37; Jn. 20:24 – 25). (b) The sober, detailed, matter-of-fact appearance narratives exclude the idea of hallucinations as the source of the Easter faith.

(2) The Objective Vision Theory, suggesting that Jesus' immortal soul or the spiritual Christ who was the continuation of Jesus of Nazareth (P. Tillich, *Systematic Theology*, 3 vols. [1951 – 63],

2:156 – 57) granted the disciples some objective but immaterial vision, showing that the Lord was still spiritually alive. This theory founders on the fact that the appearance narratives place special emphasis on the reality of Jesus' resurrection body and its identity with the body that was buried; an identity of which Jesus himself gave ample proof (Lk. 24:39, 41; Jn. 20:17, 18; 21:9 – 14). The Gospels offer no ground whatever for discarding these parts of the records as pious frauds, created by the early church.

D. The truth. There can be no doubt then that the appearances were real and that Jesus showed himself to the disciples in a risen, physical body of "flesh and bones" (Lk. 24:39), the same body in which he had died, with even the scars of the wounds still visible (Jn. 20:25 – 27). On the ground of these appearances the church may have absolute certainty that her Saviour really conquered death in all its horrible aspects, including its disastrous effect on our physical body.

VII. Jesus' resurrection body

A. Spiritualizing views. All through history there have been opponents of the idea of a real physical resurrection, either of Christ or of the dead in general. Many of them were, and are guided by the ancient Greek conception of the BODY as intrinsically evil, the soul being by nature divine and therefore immortal (see DUALISM). Recent liberal theologians reject the Greek concept as far as the terms are concerned. They speak of the resurrection of the body. However, to them the latter is not the physical body, for which they say there can be no hope in the light of our modern world view: "A resurrection which consists of a dead man being raised to physical life is crudely mythical" (E. Brunner, *Das Ewige als Zukunft und Gegenwart* [1953], 26, 122).

To such theologians the term *body* denotes "the person," "I," or "Self" (e.g., J. A. T. Robinson, *The Body* [1952], passim). This "body" exists after death in an immaterial state, and its continued existence is called its "resurrection." It is obvious that there is hardly any essential difference between this widespread theory and the Greek concept. "While its advocates speak of Jerusalem, one suspects that the accent is Athenian" (E. E. Ellis, *Paul and his Recent Interpreters* [1961], 48). Little wonder that some of them declare that the only physical resurrection body of Christ is the church. Jesus' personal resurrection body is considered completely nonmaterial or consisting of some ghost-like "spirit-matter." (For a full discussion and critique of this understanding of "body," see R. H. Gundry, *Sōma in Biblical Theology: With Emphasis on Pauline Anthropology* [1976].)

B. A real body of flesh. All spiritualizing concepts of Jesus' resurrection body are contrary to the clear teaching of Scripture. There is first the fact that often his followers recognized him by his face and voice (Matt. 28:9; Lk. 24:31; Jn. 20:16, 19 – 20; 21:12). Furthermore several of them touched his body or were invited to do so (Matt. 28:9; Lk. 24:39; Jn. 20:17, 27), whereas he also ate before their eyes and had a meal with them (Lk. 24:30, 42 – 43; Jn. 21:12 – 13; Acts 10:40 – 41). In addition, Jesus himself declared emphatically: "A ghost does not have flesh and bones, as you see that I have" (Lk. 24:39). There can be no doubt that Scripture teaches the physical reality of Jesus' resurrection body.

C. The same body, but in a glorified condition. That Jesus' resurrection body was the same in which he had been buried is proved by the fact that he showed the disciples his hands, feet, and side, in which the scars of the cross were still visible (Lk. 24:39; Jn. 20:20). Thomas was even summoned

to touch these very scars for the purpose of identification. It is obvious that "those marks were the infallible proof that his body risen was identical with his body buried" (M. L. Loane, *It is the Lord* [1965], 17).

All this does not exclude the tremendous change brought about in the condition of Jesus' body at the moment he was raised from the dead. There are mysterious elements in the appearance narratives, as, for instance, that the risen Lord could appear and disappear at will in a surprising way. He "disappeared" out of the sight of the men at Emmaus (Lk. 24:31), clearly a supernatural act. The statement that "Jesus himself stood among them" (v. 36) also suggests a sudden and miraculous appearance, which perhaps was the reason the disciples supposed they saw a spirit (v. 37). Recording the same event, John states that Jesus came and stood among them "with the doors locked" (Jn. 20:19).

Since Scripture does not tell how Jesus overcame the obstacle of the closed doors, one cannot be dogmatic about it. To conclude from such mysterious and miraculous features that from the time of the resurrection the Lord's human nature partakes of the divine omnipresence (cf. R. C. H. Lenski, *The Interpretation of St. John's Gospel* [1931], 1340 – 41) seems unwarranted. This interpretation contradicts the continuous teaching of Scripture that Christ, though true God, was also true man, and that he still is man (1 Tim. 2:5). In his human body as man, Jesus was not divinely omnipresent, nor could he ever become that. It would cast serious doubts on his true humanity and render the ASCENSION meaningless.

Another mysterious element is the fact that Jesus was often not recognized at first sight. "Some doubted" (Matt. 28:17), a statement that is best understood to mean that they doubted Jesus' identity. Mary Magdalene mistook Jesus for the gardener and did not even recognize his voice (Jn. 20:14 – 15). While this may have been caused by Jesus himself, as was the case with the disciples at Emmaus (Lk. 24:16), it is equally possible that the change which the resurrection had brought about in Jesus' body also played a role. "None of the disciples dared ask him, 'Who are you?'" (Jn. 21:12). They knew it was the Lord. One may conclude that Jesus' appearance was more or less unusual and made some disciples uncertain as to his identity.

All these mysterious and miraculous elements, together with the miraculous ascension, show that Jesus' body, though consisting of flesh and bones, was now in a glorified condition and capable of acting independently of the laws of time and space. This does not imply that he himself was beyond time and space, for this again would mean a denial of his true humanity. His body was what Paul called a SPIRITUAL BODY, the pattern for the believers' resurrection body (1 Cor. 15:44; Phil. 3:20). The word *spiritual* in this connection does not mean "immaterial," as those who adhere to spiritualizing views understand it. In Paul's vocabulary the word *spiritual* invariably means Spirit-controlled, that is, controlled by the HOLY SPIRIT. A spiritual body is thus a body that is able to do all that the Spirit of God wants it to do, with unlimited possibilities. Such was and is the resurrection body of the Lord, imperishable, glorious, powerful, incorruptible, immortal, and victorious, as Paul describes the spiritual body (1 Cor. 15:42 – 50). It is impossible to explain such a glorified, mysterious body of flesh and bones in scientific terms. We must believe the Word and leave to God the things we cannot understand.

VIII. The significance of Jesus' resurrection. Because Jesus' person and work are unique, his resurrection is therefore of unique and paramount significance. Jesus' resurrection in glory is a most wonderful manifestation of the power of God, who raised him from the dead. The believer may rest assured that this same power is also working in him unto salvation (2 Cor. 13:4; Eph. 1:19 – 20; 1

Pet. 1:5 – 7). By his resurrection Jesus was "appointed the Son of God in power" (Rom. 1:4 TNIV). The Jewish leaders had condemned him to death because he claimed to be the Son of God and equal to God (Matt. 26:63 – 65; Mk. 14:61 – 64; Lk. 22:70 – 71). By raising him from the dead the Father gave undeniable evidence that Jesus is indeed the Son of God.

Jesus' resurrection was the beginning of his EXALTATION as Lord and Christ, God's anointed King, Prophet, and Priest on the heavenly throne (Acts 2:29 – 36; Phil. 2:9 – 11), in accordance with Jesus' own proclamation: "All authority in heaven and on earth has been given to me" (Matt. 28:18). By the power and in the name of the risen Savior the apostles performed miracles as a sign of his lordship (Acts 4:17 – 18). There is no salvation but for those who confess with their mouth that he is Lord and believe with their heart that God raised him from the dead (Rom. 10:9). By raising Jesus from the dead, God proclaimed him to be the divinely appointed judge of the world (Acts 17:31), according to our Lord's own words (Jn. 5:22, 27). Since the salvation of the world depends solely and completely on Christ's death and resurrection, our attitude to him is decisive for our eternal condition (Jn. 3:16, 19, 35 – 36).

In Jesus' resurrection, the believer has the divine guarantee of his justification and reconciliation. The ground for these fundamental blessings is to be found in Christ's atoning death (Rom. 5:10, 17 – 19), but without the resurrection that death would have had no atoning power. The CROSS without the resurrection would mean that God had not been satisfied by Jesus' death. The resurrection is God's "Amen" to Jesus' loud cry: "It is finished," and therefore the guarantee that by Jesus' death the believer has indeed been reconciled to God and made righteous. For this reason Paul can suggest that the fact that Christ has been raised is of greater importance than his death (8:34).

When Christ was raised, the believers whom he represented in his death and resurrection were raised with him (Col. 3:1). His death meant the end of the burden of sin that was upon him, and when he arose he entered upon a life without that burden. From now on he lives to God in freedom and glory (Rom. 6:9 – 11). Because of their UNION WITH CHRIST, believers must reckon themselves dead to sin, and putting to death all sin, they must live the new resurrection life in fellowship with their risen Lord (Rom. 6:5 – 6, 12 – 14; Col. 3:5). Moreover, Jesus' resurrection in a glorious, immortal, powerful, spiritual body of flesh guarantees to believers their future resurrection in a similar body (Rom. 6:5; 1 Cor. 15:47 – 48; Phil. 3:21; 1 Jn. 3:2).

(In addition to the works already referred to in this article, the following selection from the numerous books dealing with Christ's resurrection is presented: R. S. Candlish, *Life in a Risen Saviour* [1858]; W. Milligan, *The Resurrection of our Lord* [1890]; E. McCheyne, *The Gospel of a Risen Saviour* [1892]; H. Latham, *The Risen Master* [1901]; B. F. Westcott, *The Gospel of the Resurrection* [1906]; K. Lake, *The Historical Evidence for the Resurrection of Jesus Christ* [1907]; J. Orr, *The Resurrection of Jesus* [1909]; C. H. <div align="right">J. A. SCHEP</div>

retribution. The act of paying back to someone according to that person's just deserts. Retribution is usually, although not exclusively, considered in terms of punishment for wrongdoing. In systematic theology, the distinction is sometimes made between God's *remunerative justice*, in which he distributes REWARDS, and his *retributive justice*, in which he expresses his hatred of sin by inflicting penalties.

I. Biblical words used. The English term *retribution* is not used in the KJV, but it is found occasionally in modern versions. For example, the NIV uses it to render Hebrew *gĕmûl H1691* (as in Isa. 35:4; NRSV, "recompense," following KJV) and other words. In the NRSV it appears several times in the book of Jeremiah as the rendering of Hebrew *nĕqāmă H5935* (Jer. 11:20 et al.; NIV, "vengeance," following KJV). Both the NIV and the NRSV use it once to render Greek *antapodoma G501* (Rom. 11:9). In addition, there are several verbs—*render, repay, requite, reward*—used by the KJV and other versions to represent the same idea, particularly when God is said to deal with someone according to that person's actions (e.g., Ps. 62:12b; Jer. 51:56; 2 Tim. 4:14; Rev. 22:12).

The idea of retribution certainly has a prominent place in the Bible, as is indicated by the frequent use of additional words, such as WRATH (Ps. 2:12 et al.) and VENGEANCE (Isa. 34:8 et al.). In Eden one sees the retribution of God against ADAM, EVE, and the serpent (Gen. 3:14 – 19). The punishment of CAIN (4:11, 12), the flood (6:5 – 8; see FLOOD, GENESIS), and the destruction of SODOM and GOMORRAH (18:20 – 21; 19:15, 24 – 29) are examples of retribution. When Israel entered the Promised Land by divine instruction, the nation was clearly confronted with promises of blessings that would result from obedience and threats of retributive punishment that would result from disobedience (Deut. 27:14 – 26; Josh. 8:34). The many promises and warnings of the prophets and of Christ are also indicative of the fact of retribution.

II. Biblical principles

A. The nature of God. As can be seen from the above discussion, the doctrine of retribution flows from the very nature of God. The God of Scripture is a God clearly characterized by righteousness, justice, and omnipotence. Therefore, he desires to, and is able to, punish evil and reward righteousness. Because he is such a God, people receive exactly what they deserve, except when his justice is tempered by his MERCY, in which case he treats people better than they deserve. The retributive nature of God is revealed in Scripture. Mercy is not simply a matter of ignoring evil; rather, God in Christ crucified takes the just deserts of sin upon himself rather than letting sin go unpunished (cf. 2 Cor. 5:21).

B. The inevitability of retribution. Because retribution is founded on the very nature of God, the Bible pictures it as inescapable: "Do not be deceived: God cannot be mocked. A man reaps what he

sows. The one who sows to please his sinful nature, from that nature will reap destruction; the one who sows to please the Spirit, from the Spirit will reap eternal life" (Gal. 6:7 – 8). This is only a reflection of the teaching already found in the OT: "But you have planted wickedness, / you have reaped evil, / you have eaten the fruit of deception" (Hos. 10:13). The use of this parallel to sowing seed indicates that punishment is an inner necessity and a natural consequence and yet is also a result of the action of God. Not only special REVELATION but also human CONSCIENCE is deeply imbued with the conviction that people will be punished according to their deeds. The whole order of the natural world is one in which the violation of physical laws produces inescapable disaster. Every action produces exact and inescapable reaction.

C. The suitability of punishment. The Bible stresses the idea that there is a "poetic justice," a punishment that exactly fits the crime. As Jesus taught, "For in the same way you judge others, you will be judged, and with the measure you use, it will be measured to you" (Matt. 7:2). The writer of Proverbs states: "If a man digs a pit, he will fall into it; / if a man rolls a stone, it will roll back on him" (Prov. 26:27). The last book of the Bible asserts, "because they shed the blood of saints and prophets, you have given them blood to drink. It is what they deserve!" (Rev. 16:6 NRSV; see also Rom. 1:27; Rev. 18:6 – 7).

D. Apparent contradictions. The OT deals with the problem of the apparent contradictions to the principle of retribution. The book of JOB especially considers the fact that the superficial application of this idea is false. Job seems to be suffering out of all proportion to his sin, and in spite of his outstanding godliness, while many ungodly men prosper. Other sections of the OT also deal with this problem. "This is what the wicked are like—/ always carefree, they increase in wealth. / Surely in vain have I kept my heart pure; / in vain have I washed my hands in innocence. / All day long I have been plagued; / I have been punished every morning" (Ps. 73:12 – 14). "Like cages full of birds, / their houses are full of deceit; / they have become rich and powerful / and have grown fat and sleek. / Their evil deeds have no limit" (Jer. 5:27 – 28a).

The book of Job indicates that the problem is more complex than it had been thought to be, and that God has other purposes for suffering besides punishment. The book of PSALMS sometimes expresses the conviction that although there seems to be a contradiction, this condition is only temporary and the ungodly who are prospering will surely yet be punished. Note especially Ps. 37:1 – 2, "Do not fret because of evil men / or be envious of those who do wrong; / for like the grass they will soon wither, / like green plants they will soon die away." The final answer to this apparent contradiction to the doctrine of retribution, however, comes in the NT, which places its stress on retribution in the world to come.

III. Retribution in this life. The OT emphasizes the fact of retribution in this life. For example, this is the basic theme of Ps. 1 and is also mentioned in many other passages such as Prov. 11:31, "If the righteous receive their due on earth, / how much more the ungodly and the sinner!"

Statue on Mount Carmel depicting Elijah's retribution on the prophets of Baal.

In Scripture as a whole, there is considerable emphasis on retribution being administered to the collective group. Paul shows that the sin of ADAM had its effects on all human beings (Rom. 5:12 – 19). The obedience of ABRAHAM had an obvious effect on his seed as well as upon himself. The entire family of ACHAN was punished for his sin (Josh. 7:10 – 26). When, however, the people of Judah used the sins of their forefathers as the excuse for their troubles, the prophets Jeremiah and Ezekiel stressed the fact that the individual will be punished for his own sins: "whoever eats sour grapes—his own teeth will be set on edge" (Jer. 31:30; cf. Ezek. 18:4 – 20).

Sometimes God uses human instruments to carry out his retribution. For example, Babylon was the instrument of God to punish wicked Judah. When Habakkuk complained of the fact that the sins of Judah went unpunished, God said, "I am raising up the Babylonians, / that ruthless and impetuous people, / who sweep across the whole earth / to seize dwelling places not their own" (Hab. 1:6). But, in turn, God used other nations to punish wicked Babylon, for when Habakkuk complained that Babylon was even more ungodly than Judah, God's answer concerning Babylon's fate was: "Because you have plundered many nations, / the peoples who are left will plunder you" (2:8).

Individual Christians, however, are not to take the administration of retribution into their own hands. They are not to operate on the OT principle of "Eye for eye, and tooth for tooth" (Matt. 5:38 – 39). In fact, believers can dare to live on a higher plane because they are assured of the just administration of retribution on the part of God. "Do not take revenge, my friends, but leave room for God's wrath, for it is written: 'It is mine to avenge; I will repay,' says the Lord" (Rom. 12:19).

IV. Retribution in the world to come. God used the tribulations of his people to cause them to realize that retribution only begins to operate in this life and that its perfect fulfillment is to be looked for in the world to come. Seeing great injustice in the world, but convinced of the justice of God, the HOLY SPIRIT convinced them that God would vindicate his cause in the eternal future. The many passages of Scripture about the judgment day (2 Cor. 5:10; 2 Pet. 2:9; 3:7), about a RESURRECTION to condemnation or to blessing (Dan. 12:2 – 3; Jn. 5:29), and about the anguish of HELL (Matt. 8:12; 10:28; 13:42) all demonstrate this fact. While some writers unwisely use the term retribution as almost exclusively dealing with the world to come, it is true that this is the main focus of the NT. In accordance with Scripture, orthodox theology teaches that retribution in the world to come is not confined to a limited time but is unending (see PUNISHMENT, ETERNAL).

God's people are not to be surprised when in spite of their righteousness they suffer a great deal in this life, for the promise is not that godliness will result in ease in this life: "Dear friends, do not be surprised at the painful trial you are suffering, as though something strange were happening to you" (1 Pet. 4:12). All of this will be taken into account by God in distributing the eternal reward. "For our light and momentary troubles are achieving for us an eternal glory that far outweighs them all" (2 Cor. 4:17). Conversely, although the wicked seem to prosper, the Bible teaches that they will be fittingly punished by God for all eternity. It is then that the ungodly will suffer the full effects of God's retributive justice.

Buis, *The Doctrine of Eternal Punishment* [1957]; B. E. Kelly, *Retribution and Eschatology in Chronicles* [1996]; O. W. Allen, *The Death of Herod: The Narrative and Theological Function of Retribution in Luke-Acts* [1997]; K. L. Wong, *The Idea of Retribution in the Book of Ezekiel* [2001]; K. Cooper and J. Gregory, eds., *Retribution, Repentance, and Reconciliation* [2004]; *NIDOTTE*, 4:1140 – 49.)

H. BUIS

Reu ree'y*oo* (רְעוּ H8293, possibly short form of רְעוּאֵל H8294, "friend of God" [see REUEL]; Ῥαγαύ G4814). Son of PELEG and descendant of SHEM (Gen. 11:18 – 21; 1 Chr. 1:25); included in Luke's GENEALOGY OF JESUS CHRIST (Lk. 3:35; KJV, "Ragau"). Attempts to identify the name Reu with a geographical area in MESOPOTAMIA have not been successful.

Reuben r*oo*'bin (רְאוּבֵן H8017, "See! A son!"; gentilic רְאוּבֵנִי H8018 [always with def. article], "Reubenite"; Ῥουβήν G4857). Firstborn son of JACOB and LEAH; the name is also applied to the Israelite tribe that descended from him. According to the biblical text, Jacob loved RACHEL more than Leah, but "the LORD saw that Leah was not loved," and thus "he opened her womb" (Gen. 29:30 – 31). When her son was born, she named him Reuben "because the LORD has looked [*rāʾă*] on my affliction [*bĕʿonyî*]" (v. 32 RSV). The etymology of the name has caused considerable debate (cf. J.

Skinner, *A Critical and Exegetical Commentary on Genesis*, ICC, 2nd ed. [1930], 386), but it is now generally recognized to be made up of the imperative of the verb *rā'ă H8011* ("See!" or "Behold!") and the noun *bēn H1201* ("A son!"). The name thus welcomes the arrival of a male child. If so, Leah's explanation (NIV, "the LORD has seen my misery") involves a wordplay; also playful—but no less serious for that reason—is her further comment, "my husband will love me [*ye'ĕhābanî*] now" (cf. G. G. Nicol in *JTS* 31 [1980]: 536–39).

The tribal territory of Reuben.

As a child (but evidently old enough to be around the field workers), Reuben on one occasion brought some MANDRAKES to his mother. The fruit apparently was thought to be an aphrodisiac or to aid in conception, so when Rachel asked Leah for some of the mandrakes, the latter used the occasion to regain her conjugal rights (Gen. 30:14–16). As the FIRSTBORN, Reuben would rightly have become the leader of the sons of Jacob, but he lost his ascendancy by an illicit affair with his father's concubine, BILHAH (35:22; 49:4). Subsequently, the narrative places him in a more favorable light. When the other sons of Jacob plotted against JOSEPH, Reuben interceded with them and prevented his murder by suggesting that they imprison him in an empty cistern instead (37:21–22). Years later, when Joseph incognito confronted his brothers in Egypt, Reuben reminded them that he had urged them not to harm Joseph (42:22). Upon their return to Canaan, he offered his sons to Jacob as surety to guarantee the safety of BENJAMIN, whom he needed to take to Egypt on a second trip for grain. When the family finally migrated to Egypt with Jacob, Reuben had four sons of his own (46:8–9). (See further F. M. Cross in *ZAW* 100 [1988 Suppl.]: 46–65.)

The tribe of Reuben is mentioned first in some lists (Exod. 1:1–4; Num. 1:5, 20–21), but not always (cf. Num. 2:10); the leadership now belonged to JUDAH (2:3). In the line of march through the wilderness, the tribe of Reuben led the second division that followed the Levites, who transported the TABERNACLE (Num. 10:17–18). When KORAH rebelled against MOSES, he was joined by three

Reubenites (DATHAN, ABIRAM, and ON, Num. 16:1), and some scholars believe that this action reflects an attempt to bring the tribe of Reuben back into a position of greater prominence.

At the time of the conquest the tribe of Reuben, along with the tribe of GAD and the half-tribe of MANASSEH, petitioned for the right to remain on the high plateau E of the Jordan where there was ample room for grazing cattle. The permission was granted on condition that they would give military support to the tribes on the W bank of the river until the latter had completed the subjugation of the land (Num. 32:1 – 32; Josh. 4:12 – 13). In Moses' final partition of the land this agreement was confirmed, and the E bank of the Jordan became the heritage of the tribes of Reuben, Gad, and Manasseh (Josh. 13:8 – 23; 18:7). See TRIBES, LOCATION OF, I.A.

Severed from the other tribes by the valley of the Jordan, the tribes of Reuben, Gad, and the half-tribe of Manasseh felt alienated from the others and wanted to have a center of worship for themselves. They eventually established an altar of their own, which the western tribes interpreted as a move toward religious secession. The latter threatened war, but the eastern tribes disavowed any desire to desert the worship of Yahweh. On the contrary, they did not wish to be excluded from the united worship of the nation. A war was averted, and the issue was closed (Josh. 22:10 – 34).

The tribe of Reuben was not involved in the struggles with the Canaanite kings subsequent to the days of JOSHUA (Jdg. 5:15, 16), though it may have participated in the civil war with the Benjamites (Jdg. 20:10; 21:5), since "all the tribes" are mentioned. Reubenites served in the army of DAVID (1 Chr. 11:42; 12:37), and the tribal group was incorporated into the political structure of David's realm (26:32; 27:16). In the period of the divided kingdom it seems to have been less active in the affairs of the nation, and finally its territory passed under the domination of Syria (2 Ki. 10:32, 33). Some vestiges of the tribe must have persisted until the Assyrian captivity, since it is mentioned in conjunction with the tribe of Gad and the half-tribe of Manasseh when the latter were deported to Assyria by TIGLATH-PILESER (1 Chr. 5:26).

The name of Reuben occurs only once in the NT in the enumeration of the tribes comprised in the sealing of the 144,000 (Rev. 7:5).

M. C. TENNEY

Reuel r*oo*'uhl (רְעוּאֵל *H8294*, "friend of God"). KJV also Raguel (only Num. 10:29). (1) Son of ESAU by BASEMATH daughter of ISHMAEL (Gen. 36:3 – 4, 10; 1 Chr. 1:35). His four sons became clan chiefs in EDOM (Gen. 36:13, 17; 1 Chr. 1:37).

(2) Priest of MIDIAN and father-in-law of MOSES (Exod. 2:18; Num. 10:29), usually referred to as "Jethro." Some scholars connect the use of the name Reuel with the Edomite tribe (above, #1; cf. *ABD*, 5:693 – 94). See discussion under JETHRO.

(3) Father of ELIASAPH; at the time of the census in Sinai, Eliasaph was appointed leader of the tribe of GAD (Num. 2:14 KJV and most versions, following MT). Instead of Reuel, the NIV reads DEUEL because that is the form used in every other reference to this individual (Heb. *dĕ⁽û⁾ēl H1979*, Num. 1:14; 7:42, 47; 10:20). The difference no doubt resulted from the common scribal error of confusing the Hebrew consonants ד and ר. The SEPTUAGINT reads *Ragouēl* in all five passages, and on that basis some scholars argue that Reuel is the original form.

(4) Son of Ibnijah, descendant of BENJAMIN, and ancestor of Meshullam; the latter is listed among the Benjamites who resettled in Jerusalem (1 Chr. 9:8).

B. K. WALTKE

Reumah r*oo*'muh (רְאוּמָה *H8020, derivation uncertain). The concubine of NAHOR, brother of ABRAHAM (Gen. 22:24). Her four sons probably became ancestors of Aramean tribes who lived in the environs of DAMASCUS. See ARAM (COUNTRY).

revelation. God's disclosure of himself through CREATION, HISTORY, the human CONSCIENCE, and SCRIPTURE. Revelation is given both in event and word. There is no technical term for the concept in Scripture, although the NIV uses "revelation" to render two Hebrew words meaning VISION (2 Sam. 7:17; 1 Chr. 17:15; Prov. 29:18; Hab. 2:2 – 3); moreover, most versions use it to translate the Greek noun *apokalypsis G637* ("unveiling, disclosure"), which seems to have a specialized theological meaning in PAUL (Rom. 16:25 et al.; cf. also Rev. 1:1 and see REVELATION, BOOK OF). It should also be noted that the common Hebrew verb *gālă H1655* ("to uncover") is frequently used of God's self-disclosure (Gen. 35:7 et al.). Similarly, the Greek verbs *apokalyptō G636* and *phaneroō G5746* are often employed in a strong theological sense (e.g., Matt. 11:25; Jn. 1:31; Rom. 1:17; 16:26).

I. The twofold aspect. Theologians generally distinguish between *general* (natural) and *special* revelation. General revelation is God's witness to himself toward all through creation, history, and the conscience (e.g., Ps. 19; Acts 14:8 – 18; 17:16 – 34; Rom. 1:18 – 32; 2:12 – 16). Certain basic views on general revelation may be noted. First to be stated is that of Roman Catholicism, with which many Protestants agree. Those who adopt this view argue that general revelation provides the basis for the construction of a natural theology. (Natural theology refers to the effort to construct a doctrine of God in which his existence is established without appeal to faith or special revelation but solely through reason and experience.)

This view holds that theology is two-storied. On the first level a natural theology is built from the building blocks of general revelation cemented into place by REASON. This natural theology includes proofs for the existence of God and the IMMORTALITY of the soul. It is insufficient for a saving knowledge of God, but it is essential for one who would rise to that level. Admittedly, most people do not arrive at even this first level through reason but by FAITH; nevertheless it is thought imperative that the theoretical possibility of such a rationalistic approach be held. On the second level a revealed theology is built from the building blocks of special revelation cemented into place by faith. This revealed theology includes all the distinctive beliefs of the Christian faith, such as the DEITY OF CHRIST, substitutionary ATONEMENT, the TRINITY, etc. Only on this level is one brought to a redemptive encounter with God in Christ. This approach has led to a rationalistic apologetic and is built upon a largely Arminian theology.

Second to be outlined is the position of Karl Barth, who denies both natural theology and general revelation. According to Barth, revelation is given exclusively in the Christ-event. The Bible is the fallible but authoritative pointer to him. From a Scriptural perspective it would appear that Barth overreacted to the exponents of a natural theology and threw out the baby with the bath water. This forced him to interpret in a contrived fashion those Scripture passages which speak of general revelation and brought him to a falling out with his friend Emil Brunner (see their interchange in *Natural Theology: Comprising "Nature and Grace" by Emil Brunner and the Reply "No!" by Karl Barth* [1946]).

Third, we note the position of John Calvin, who maintained that general revelation may be correctly understood only through the lenses of special revelation. Following the lead of PAUL in Rom. 1, those who adopt this position contend that while one could find a natural theology in v. 20, the apostle goes on to show that fallen men and women engage in a suppression of and substitution for

the truth. Even in regard to the so-called "Nature Psalms" it must be remembered that these were the expressions of godly people who therefore viewed nature through the perspective of special revelation. This approach has led to a revelational apologetic and is built upon a largely Reformed theology.

Special revelation is God's disclosure of himself in salvation history (revelation in reality) and in the interpretive word of Scripture (revelation in Word). Quantitatively this encompasses more than we have in Scripture. In contrast, neoorthodox theology maintains that revelation is never propositional; that is, it does not consist of words but only of events. The Bible is therefore viewed as only a record of revelation; it represents merely a human attempt to understand and bear witness to the revelatory works of God. For Barth, revelation occurs when God's disclosure of himself in the Christ-event is responded to by faith. According to this viewpoint, the Bible may be the authoritative pointer to this experience but not revelation itself.

II. Features of a biblical concept of revelation. The *ultimate* object of all God's revelation is to bring us to himself. It is not creedal formulations or doctrinal statements but personal encounter with God that marks the ultimate goal of his revelation. The biblical concept of TRUTH is not merely that of detached critical reflection but also of subjective, even passionate involvement with the God of truth himself. Revelation provides the answer to the sinner's twofold predicament: (1) ignorance of God and therefore of himself, and (2) guilt before God. God has revealed himself in Christ not only to make us knowledgeable but also to make us holy.

Biblical revelation is by divine acts of history. God accomplishes his plan for mankind in connection with specific, temporal events. The historical skepticism of Rudolf Bultmann can never gain acceptance by those who maintain a consistently biblical view of faith. There is no Christ of faith without the Jesus of history. The whole course of biblical history is the story of what God has done for his people; it is a record of "the saving acts of the LORD" (Mic. 6:5 NRSV). Christ is the mid-point of this saving history; it is in him that the decisive word was spoken.

Biblical revelation culminates in JESUS CHRIST. The INCARNATION is the supreme act by which God reveals himself. Christ is the center of the GOSPEL (Rom. 1:3, 16; 1 Cor. 15:1 – 4; Gal. 4:4; Heb. 1:1 – 2; et al.). The OT is revelation in anticipation of the Christ; the NT is revelation in reflection on the Christ. Barth wrongly asserts that God reveals himself solely in Christ (Christomonism). We cannot argue from the fact of exclusive salvation in Christ to that of an exclusive revelation in Christ. Scripture will not permit this. In Heb. 1:1 – 2 it is stated that God has spoken not only in his Son but also in the PROPHETS. This passage would seem to teach that although God's special revelation of himself has come most *fully* in his Son, it was not given only in him. In addition to this passage, there is the fact of God's having revealed himself in creation, history, and the conscience (general revelation).

Biblical revelation is also divine interpretation of meaning (revelation in word). The biblical narration of the divine saving events includes the divine communication of the meaning of those events. Specifically, the basis of the NT message is the narration of interpreted events. In the NT the events are mainly recorded in the Gospels; the interpretation of these events is found mainly in the Epistles. (As an illustration of these two elements, historical event and interpretive word, see 1 Cor. 15:3 – 4.)

The NT account of saving events is integrally connected with the OT by the first Christians. In 1 Cor. 15:3 – 4, Paul ties in the death, burial, and resurrection with OT Scriptures—"according to the Scriptures." Note that this phrase is used twice. Paul was keenly conscious of the *continuity* of the

two covenants. He viewed the NT salvation-historical KERYGMA as the completion of a process begun in the OT.

All revelatory events—past, present, and future—are summed up in the CRUCIFIXION and RESURRECTION OF CHRIST, which are to be viewed together as one event. The God of the future has revealed himself climactically in his Son; according to Heb. 1:2, the incarnation ushered in the last days, the eschaton. Past and present can be properly understood only in terms of the future as already revealed in the incarnate Christ. See ESCHATOLOGY.

This revelation is brought to human beings by the Bible. The redemptive acts of God together with their divine interpretation were recorded by the inspired apostles and prophets. The Bible thus becomes the means in conjunction with the inner witness of the Spirit whereby revelation given directly to prophets and apostles becomes revelation to needy sinners of every succeeding generation. The Bible is not only a pointer to revelation but is itself also revelation.

Revelation must be understood in terms of three factors: (1) *The revealer*—in this case God. (2) *The instruments of revelation*—the Scripture speaks of various modalities such as vision, dream, deep sleep, URIM AND THUMMIM, the lot, theophanies, angels, divine speaking, historical event, and the incarnation, resulting in *a product*, namely, the Word of God (the BIBLE). Up to this point we have revelation only objectively conceived. (3) Finally, we have *the receiver*—people who respond in faith to the One of whom the message testifies. This is revelation subjectively conceived.

The Bible as the product of God's revealing activity is the means whereby the redemptive work of Christ is communicated to sinners, though communication is ultimately achieved only when there is a response of FAITH on the part of the receiver. Thus, revelation must be subjectively appropriated. The objective side of the divine work of revelation (terminating in a record) needs to be supplemented by an internal subjective work of the HOLY SPIRIT. This inner work of the Spirit has classically been spoken of as illumination. The point here is well illustrated by the experience of young SAMUEL, of whom it is said at one point: "Now Samuel did not yet know the LORD: The word of the LORD had not yet been revealed to him" (1 Sam. 3:7). From the context we learn that God spoke to Samuel four times, but only in the last instance did that which was objectively the word of the Lord become the word of the Lord to Samuel (v. 10). PAUL speaks of this distinction when describing the result of his ministry among the Thessalonians: "And we also thank God continually because, when you received the word of God, which you heard from us, you accepted it not as the word of men, but as it actually is, the word of God, which is at work in you who believe" (1 Thess. 2:13). The word translated "received" (*paralambanoō G4161*) may indicate outward hearing, for it is contrasted with "accepted" (*dechomai G1312*), which here clearly refers to a response from the heart. Truth known must become truth accepted.

The authority of the Bible is derived from its divine INSPIRATION. The Bible is profitable for teaching, reproof, correction, and training in righteousness because it is God-breathed (2 Tim. 3:16 – 17); that is, it is divine in origin. Though God employed the personalities of the human authors, the message is ultimately from God himself. A proper view of inspiration can be obtained only in the context of a correct view of revelation.

An adequate view of revelation will also recognize that the Bible must be rightly interpreted. There must be a proper methodology employed in an effort to understand the Scriptures. Hermeneutics is a crucial area of concern today. See INTERPRETATION. Traditionally a conservative hermeneutic maintained that the proper approach to the study of the Bible is a historical-grammatical one. The movement known as the "New Hermeneutic" argued that the primary task of the interpreter is that of translating the biblical message into contemporary terms, often, it seems, at the expense of

the original message itself. A consistently biblical view of revelation cannot condone any hermeneutic which in the name of relevancy relieves the interpreter from a responsible handling of the text.

Whenever one approaches the Scripture to ascertain its message, the first aim must be to understand what the author is intending to say to his readers. In other words, one must first *listen.* One must be very cautious so as not to read his own existentially laden views into the text of Scripture. If this danger is not continually guarded against, one may hear a false address. In other words, individual understanding and experience must be seen not only as possible exegetical aids but also as possible sources of error. After carefully ascertaining what the original message was, one must then go on to ask how that message may relate to the reader and contemporary culture. The *ultimate* goal of exegesis is only fully achieved when the NT faith is appropriated, but this is the second step, not the first.

Revelation must be carefully differentiated from two other concepts: inspiration and illumination. Whereas revelation has to do with the communication of information as regards what God has done for and said to sinners, inspiration has to do with that act whereby God through his Spirit employed his servants to record authoritatively this information. Revelation has sometimes been defined in such a way as to suggest that although all of Scripture is inspired not all is revelation. It would seem preferable, however, to view all of Scripture as revelation, that is, as giving us that information which is deemed divinely essential for our good and God's glory. Illumination, on the other hand, has to do with the work of the Spirit whereby the reader is enabled to understand the record (1 Cor. 2:13, 14). Whereas revelation is *objective* disclosure, illumination has to do with *subjective* apprehension. In revelation God uncovers the truth; in illumination the believer comes to understand it.

These three concepts form essential steps in God's communicating to his creatures. Revelation has to do with *what* is communicated; inspiration with *how* it is communicated; illumination with *why* it is communicated.

<div align="right">C. M. HORNE</div>

Revelation, Book of the. The last book of the NT, frequently called *The Apocalypse of John* from the use of the Greek word *apokalypsis G637* ("unveiling") in Rev. 1:1. This book is unique as the sole totally apocalyptic work in the NT. In its literary genre it resembles strongly portions of the OT books of EZEKIEL, DANIEL, and ZECHARIAH; and, like them, it is the product of a writer belonging to a minority group that was either threatened with PERSECUTION or actually suffering under it. Revelation belongs to the latter part of the 1st Christian century, when the Christian church had withdrawn from JUDAISM and was initially recognized as a separate movement by the Roman state.

I. Background

A. Historical. The milieu of the book of Revelation seems to be largely the cities of the Ionian coast belonging to the Roman province of ASIA. There numerous cults flourished, all of which would have been hostile to the ethics and theology of the Christian church. Its denunciation of their IDOLATRY and its insistence on MONOTHEISM, together with the strict moral code it advocated, would have created antagonism instantly. Its rapid growth jeopardized economic prosperity, since it emptied the temples of their worshipers and so deprived the image-makers and vendors of sacrificial animals of their living. During this period also the emperors, particularly NERO (A.D. 54 – 68) and DOMITIAN (A.D. 81 – 96), had expected a degree of popular adulation that was little short of worship (see EMPEROR WORSHIP). The Christians refused to accord that sort of homage to the emperors, and thus exposed themselves to the charge of being unpatriotic, if not actually subversive.

B. Social. The pressures which these religious, social, and political differences exerted on the Christian church produced a definite reaction. In order to maintain their identity they were compelled to take a stand. The author of Revelation himself was apparently exiled for his faith, and it is no surprise that his writing reveals the hostility to the prevailing corruption of the Roman state. Its character is stigmatized as a prostitute clothed in scarlet and purple, "drunk with the blood of the saints, the blood of those who bore testimony to Jesus" (Rev. 17:6). While the prophecies of the book may not be confined in their application to events contemporaneous with the author, they certainly relate to them and draw their imagery from the circumstances of the church of that day.

C. Religious. The severance of the church from Judaism probably was completed after the fall of

Jerusalem in A.D. 70. By that time the church and synagogue had developed in two different directions. The doctrine of JUSTIFICATION by faith apart from the works of the law had driven a wedge between the advocates of orthodox Judaism and the community of Christian believers. The destruction of the TEMPLE had broken whatever slight connection might have remained between the church and the center of the Jewish faith in which it had been cradled. The antagonism to the church from some in Philadelphia "who claim to be Jews though they are not" finally brought the accusation that they were "the synagogue of Satan" (Rev. 3:9) and resulted in a complete breach between the two.

Within the church itself there were signs of declension that are reflected in the letters to the seven churches of Asia. Initial fervor had cooled, immoralities and heresies had infiltrated the ranks of teachers and communicants alike, and an increasing laxity prevailed. Revelation represents an attempt to revive zeal by portraying the tensions of the time and by summoning its readers to a preparation for the return of Christ in judgment.

II. Unity. R. H. Charles, whose voluminous commentary deals with the composition of the Apocalypse in detail, proposed that this author died after he had finished writing Rev. 1:1—20:3, "and that the materials for its completion, which were for the most part ready in a series of independent documents, were put together by a faithful but unintelligent disciple in the order which he thought right" (*A Critical and Exegetical Commentary on the Revelation of St. John*, ICC, 2 vols. [1920], 1:l). Charles asserted that the Apocalypse exhibited a general unity of style, diction, and dramatic progress that marked it as one production, though he insisted that the author used "sources" that were not his own creation.

The structure of the Apocalypse indicates the work of one mind rather than of several, and such apparent incongruities as Charles cites for evidence of "sources" (*Revelation*, 1:lxxxixff.) may be explained at least partially by the circumstances of its production. The character of the visions and the exile of the author would account for minor digressions, repetitions, and lack of polish in the language. Furthermore, every writer uses "sources" to some degree in composing an extensive work, whether those "sources" are drawn from memory, from personal contacts, or from documents. The unity consists in one's original integration and interpretation of the material. If the writer weaves it into a new fabric of ideas, it can have a real unity; any connection with its former usage becomes a secondary consideration.

If the consecutive heptads of Revelation indicate anything, they imply a central organization emanating from one mind. The parentheses and apparent irregularities of construction can be attributed to the author's exile and to the character of the visions which he recorded.

Furthermore, the internal structure of Revelation argues for unity. The introduction of each of the letters to the seven churches contains an allusion to the initial portrait of Christ; the final promises to the overcomers anticipate the coming of the City of God. Throughout the narrative beginning with Rev. 4, the centrality of the throne of God is marked, so that it becomes the focus of all the visions. A definite progress appears in the development of the successive judgments, so that they may be regarded as a continuous sequence from the opening of the seals in ch. 5 to the consummation of judgment in ch. 20. There are some digressions and parenthetical episodes, but these do not disrupt the fundamental unity of the book.

The island of Patmos as it looks today. It was here that John received his visions and wrote the book of Revelation.

III. Authorship. According to the statements of the author, his name was John. He professed to be a "servant [*lit.*, slave]" of Jesus Christ, a "brother" of the people to whom he wrote, and a sharer in their trials and spiritual privileges (Rev. 1:1, 9). The visions comprised in the book had been received while he was on the island of PATMOS, presumably exiled for his Christian faith. He was well known among the churches of Asia, and was classed as a "prophet" (22:6, 9, 19) to whom revelatory visions had been imparted.

External tradition identifies him with JOHN THE APOSTLE, the son of ZEBEDEE, to whom the fourth gospel and the Johannine epistles were likewise ascribed. JUSTIN MARTYR (c. A.D. 150) stated that the Apocalypse was written by "a certain man with us, whose name was John, one of the apostles of Christ" (*Dialogue with Trypho* 81). IRENAEUS, Bishop of Lyons, on various occasions refers to the Apocalypse as the work of "John," by which he means Jesus' disciple (*Against Heresies* 4.20.11; cf. also 4.14.2; 4.17.6; et al.). TERTULLIAN (c. A.D. 200) ascribed the Revelation to John (*Against Praxeas* 17; *On the Soul* 55.8.1; *Answer to the Jews* 9; *Against Marcion* 2.5; 3.14 – 15; *Against Heretics* 23; *Scorpiace* 13), and specifically identified John as the apostle. ORIGEN (c. A.D. 225) also attributed the Apocalypse to John (*De principiis* 1.3.10; *Against Celsus* 6.6.; 6.32; 8.17). From the middle of the 2nd cent. to the middle of the 3rd cent. the Johannine origin of Revelation seems to have been generally accepted by the churches of the W and also in ALEXANDRIA.

Definite objections to the Johannine authorship were first raised by Dionysius of Alexandria, who contested the traditional opinion on the following grounds: (1) the Apocalypse claims John as its author, whereas the Johannine gospel and epistles were written anonymously; (2) the vocabulary of the Apocalypse differs radically from the acknowledged Johannine writings; (3) the grammar of those writings is generally good Greek whereas the Apocalypse abounds in solecisms.

Dionysius's arguments were reproduced by EUSEBIUS, who followed his lead in questioning the authority of the book (*Eccl. Hist.* 7.24 – 25). In essence they are identical with those advanced against the Johannine authorship of Revelation, and they are not conclusive. The statement that the gospel and epistles are anonymous while the Apocalypse names its author is somewhat misleading. It is true that the gospel and the epistles do not *name* their author, but he was evidently well known to the readers and was presumably one of the Twelve. He certainly claimed to be an eyewitness of Christ. The writer of the Apocalypse calls himself John, and claims that he bore witness to "the word of God and to the testimony of Jesus Christ" (Rev. 1:2), phraseology that recalls distinctly the language of the fourth gospel (Jn. 1:14; 21:24). While identity of authorship cannot be proved on this basis, it is not impossible. There is no compelling reason to conclude that the author of the gospel could not have written the Apocalypse simply because he named himself in the latter work and not in the former.

The difference in vocabulary may be explained by the difference in subject matter. The gospel is a quiet and meditative account of the life of Jesus, drawn from the memories of many years and viewed from the perspective of Christian experience. The Apocalypse is the record of visions received under stress while in exile, and probably transcribed without the aid of an AMANUENSIS. The gospel deals with familiar sights and sounds connected with a normal human life in Palestine; the Apocalypse is filled with symbolic visions, peopled with strange beings, and placed in a totally supernatural panorama. Notwithstanding these disparities, there are some resemblances. In both writings Jesus is called by similar titles: "the Word of God" (Jn. 1:1; Rev. 19:13), "the Lamb" (Jn. 1:29 [*amnos G303*]; Rev. 5:6 [*arnion G768*]), the "Shepherd" (Jn. 10:11; Rev. 7:17). In both the activity of Satan is prominent (Jn. 8:44; 13:2, 27; 14:30; Rev. 2:10; 12:9; 20:2, 7, 10); and the climactic quality of the death of Christ is emphasized (Jn. 12:32; Rev. 1:5; 5:6). The parallels are not

always exact, but they are sufficient to warrant the conclusion that between the acknowledged Johannine writings and the Apocalypse there is a noticeable verbal accord.

The so-called grammatical anomalies can be explained on the basis of the apocalyptic quality of the writing or upon the attempt of the writer to render into Greek Semitic idioms foreign to its structure. The well-known example, "from him who is, and who was, and who is to come," involving the substantival use of a finite verb and the use of a preposition with a nominative case (Rev. 1:4), is simply an attempt to express in Greek a title that could only be translated literally from a Semitic language. Beneath the Greek of both John and Revelation is an undercurrent of Aramaic or Hebrew. Perhaps the Gospel of John was smoothed out somewhat by an assistant or an amanuensis who added the final comment (Jn. 21:25).

While the evidence for the Johannine authorship of Revelation may not be absolutely complete, the evidence to the contrary is by no means conclusive. The weight of early testimony favors the view that the Apocalypse was written by John son of Zebedee, and there is no proof that he could not have done so. Obviously the writer was highly respected by the churches of Asia and was regarded as an authority whose writings deserved the status of Scripture.

IV. Date. Three possible dates have been suggested for the Apocalypse. EPIPHANIUS (*Pan.* 51.12, 32), writing in the 3rd cent., stated that John wrote the Apocalypse upon his return from Patmos, which took place in the reign of CLAUDIUS (A.D. 41 – 54). The date is too early, for the churches of Asia probably had not been founded at that time, and the tension between Christians and the Roman state had not developed to the point reflected in this book. It is possible that Epiphanius was referring to NERO, who also was named Claudius.

An argument for a date during the administration of Nero (A.D. 54 – 68) has been constructed from the statement in Revelation that the number of the beast is 666 (Rev. 13:18). That sum is realized by adding together the numerical values of the Hebrew letters that correspond to Caesar Nero (*qsr nrwn*, with the following values: $q = 100$, $s = 60$, $r = 200$, $n = 50$, $r = 200$, $w = 6$, $n = 50$). Two major objections can be raised against this view. There are several other combinations of letters that will yield the same result, and furthermore it is very unlikely that Hellenic provincials of Asia would have reckoned ciphers in Hebrew equivalents.

© Dr. James C. Martin

The declaration concerning the "mountains" that support the woman of Rev. 17 has been adduced to support a date in the time of Nero: "The seven heads are seven hills on which the woman sits. They are also seven kings. Five have fallen, one is, the other has not yet come; but when he does come, he must remain for a little while. The beast who once was, and now is not, is an eighth king. He belongs to the seven and is going to his destruction" (vv. 9 – 11). If this passage be interpreted to mean the successive rulers of the Roman state, the first five could be Julius CAESAR, AUGUSTUS, TIBERIUS, CALIGULA, and CLAUDIUS. On this reckoning, if the first five had "already fallen," then the sixth who "is" would be Nero, thus placing the writing of Revelation in his reign.

This interpretation is too uncertain to warrant any final conclusion. One cannot be sure that the five "heads" begin with Julius Caesar. If they refer to the emperors, they probably commence with Augustus. Nero would then be the fifth; VESPASIAN would be the sixth, since the three emperors following Nero did not reign long enough to be important to the provinces. TITUS would be the seventh, and DOMITIAN the eighth. Since the eighth is said to be "of the seven," the allusion may pertain to Domitian, for he seemed to reincarnate the tyranny and brutality of Nero. Furthermore, the Asian churches had not reached their full development in Nero's time.

The traditional view ascribes the Revelation to the reign of Domitian on the testimony of Irenaeus (*Against Heresies* 5.30.3; see also Euseb. *Eccl. Hist.* 3.18; 4.8). CLEMENT OF ALEXANDRIA agreed (*Quis Dives* 42), and Victorinus, in his *Commentary on the Apocalypse* (17.10), confirmed the statement.

This traditional date is probably the best of the options. It allows for the growth and incipient decline of the churches of Asia. E. Stauffer (*Christ and the Caesars* [1955], 179) has pointed out that the mysterious cipher of 666 will apply to the standard abbreviation of Domitian's imperial title: *A[utokrator] KAI[sar] DOMET [ianos] SEB[astos] GER[manikos]*. By adding the numerical values of the abbreviated Greek letters of which the English transliteration is given above, the sum of 666 is obtained. While the sole applicability of this cipher to Domitian cannot be proved, it fits his name as well as that of Nero. In addition, some have pointed to ancient reports that Domitian demanded to be worshiped as *dominus et deus*, which would accord with the description of the "beast" that wielded political power and exacted universal worship (Rev. 13:15); more recent research, however, has cast doubts on the reliability of that evidence.

V. Place of origin. The visions were received in PATMOS, a small rocky island in the AEGEAN SEA off the coast of ASIA MINOR, on which a penal colony was located. Political prisoners were sent there for exile or for forced labor in the mines. John states that he was in Patmos for "the word of God and the testimony of Jesus" (Rev. 1:9). Whether these visions were recorded at Patmos (or perhaps later in Ephesus) is uncertain, though probably no long time elapsed between receiving them and reducing them to writing. In any case they reflect the language and atmosphere of the Roman province of Asia from which the writer had come and to which he belonged. Stauffer (*Christ and the Caesars*, 166 – 91) suggests that the Apocalypse expresses the apprehensiveness prevailing among the Asian churches during the last years of Domitian's reign, when the emperor's fear of revolt and invasion from the E exposed the Christian church to suspicion.

VI. Destination. The churches to whose leaders the book of Revelation was addressed were situated

on a roadway that ran N along the coast from EPHESUS to PERGAMUM via SMYRNA. From Pergamum another road ran southward farther inland, touching THYATIRA, SARDIS, PHILADELPHIA, and LAODICEA, and thence back to Ephesus. A messenger carrying this document could make a complete circuit, passing through all of these cities. Ephesus was the seat of the magnificent temple of ARTEMIS; Smyrna was the chief seaport of Asia; at Pergamum were located the colossal altar of ZEUS, the temple of Aesculapius (ASCLEPIUS), and the seat of provincial government. Thyatira was a center of agriculture and of a textile industry. Sardis, a city of declining fortunes, was one of the most ancient settlements and had been the capital of LYDIA. Philadelphia was the gateway to the fertile plains of the inner plateau. Laodicea was a prosperous center of banking, wool growing, and the manufacture of medication for eyes. Paul wrote to Ephesus and Laodicea; IGNATIUS was familiar with several of these cities. They included most of the leading centers of the Asian province and probably represented the strongest churches with which the writer was acquainted.

VII. Occasion. Domitian's reign had begun in troubled times. The destruction of Pompeii and Herculaneum by the eruption of Vesuvius in A.D. 79 was followed by a disastrous fire that devastated Rome and by a plague of disease that ravaged the city until 81, the year of Domitian's accession.

Domitian was an egomaniac who demanded abject worship from the Roman people. He claimed the title of *Dominus et Deus* (Lord and God) and was the first of the emperors to assume the status of deity, though others had received worship unwillingly during their lifetime and had been deified by the senate after death. When his small son died in the year 83, Domitian had him proclaimed to be a god, and his mother Domitia a goddess. A coin issued in memory of the child represented him as sitting on the orb of the world, with the moon and planets around him. The apotheosis of the mother and child, the deification of the emperor and, in his person, of the state, the acclamation which ascribed to him extravagant titles and impossible powers—all this may be mirrored in the imagery of Revelation. The arrogant and blasphemous claims of Domitian are countered by the apocalyptic honors given to Christ as Sovereign and Saviour.

Roman historians do not chronicle a widespread persecution of the church under Domitian. He executed his cousin, Titus Flavius Clemens, and banished his wife, Domatilla, on grounds of "atheism," that is, the adoption of Jewish customs and treason. Possibly these charges reflect Christian faith, since Clemens, if he were a Christian, would worship no visible god, would accept the Hebrew Scriptures, and would refuse to worship the emperor. Eusebius (*Eccl. Hist.* 3.17) says that Domitian "established himself as the successor of Nero, in his hatred and hostility to God. He was the second that raised a persecution against us." Eusebius also quotes Hegesippus's testimony that John returned to Ephesus upon being released from exile after the accession of NERVA in A.D. 96 (*Eccl. Hist.* 3.20).

The seven churches of Revelation 2 and 3.

VIII. Purpose. Revelation, then, was written for churches that were under the shadow of imperial persecution, whether or not it was a general policy. The imminent danger of official repression was a continued threat to their existence. Because of the prevailing uncertainty, they needed both encouragement and warning: encouragement to keep them from despair and consequent abandonment of faith, and warning to make them alert to the dangers of external attack and of internal apostasy. Both of these elements, together with a general reflection of prevalent conditions in the empire, appear in the Apocalypse.

The encouragement of the churches was focused on the coming of Christ to judge his enemies, to deliver the church from peril, and to establish the City of God. In almost every one of the letters to the churches occurs some phrase relating to Christ's expected appearance (Rev. 2:5, 16, 25; 3:3, 11, 20), and the phrase "I am coming soon" (3:11) is reiterated three times in the epilogue (22:7, 12, 20). Preparation for the second advent is the dominant theme of Revelation.

IX. Canonicity

A. Early recognition. According to available patristic testimony, Revelation was not at first universally accepted as authoritative by the church. There are possible allusions to the Apocalypse in the *Shepherd of Hermas* (c. 140), but no extended quotations. According to JEROME, Melito of Sardis (c. 160 – 190) wrote a commentary on it. Justin Martyr (c. 135) stated categorically that it was written by John, one of the apostles of Christ (*Dial. Trypho* 81), and Irenaeus, Bishop of Lyons, was equally emphatic concerning its apostolic origin and genuineness (*Against Heresies* 4.20.11). The

early testimony of Asia Minor as given above was supported by the opinion of the Gallic churches, probably because of the influence of Irenaeus, who had come to Gaul from Ephesus. Phrases in the *Epistle of the Churches of Vienne and Lyons* indicate that their author(s) must have known and used Revelation. See CANON (NT).

B. The Western church. The Alexandrian church was also acquainted with the Apocalypse. Clement regarded it as Scripture (*Paidagogus* 11.119), and his pupil Origen accepted it (*In Joannem* 5.33; Euseb. *Eccl. Hist.* 6.25.9). Though Dionysius of Alexandria rejected it as non-Johannine, he was aware that it had been received by the church.

The Roman church, represented by the MURATORIAN CANON (c. 170) included it, and Hippolytus (fl. 190 – 235) quoted it frequently. The church of Carthage, which owed its origin to Rome, also accepted it, for Tertullian (fl. 190 – 220) quoted from eighteen of its twenty-two chapters.

The Western church of the 2nd cent. almost unanimously accepted Revelation. The only two dissident voices were those of MARCION, who was biased against any writing that he thought was Jewish, and the Alogi (mentioned by Epiphanius, *Pan.* 51, and by Irenaeus, *Ag. Her.* 3.11.9), who repudiated any work that gave support to the idea of the perpetuation of the gift of prophecy. By the 3rd cent. its place in the Western canon was fully established.

C. The Eastern church. The Eastern churches were almost unanimously committed to the rejection of the Apocalypse. Dionysius, the bishop of Alexandria, had repudiated its canonicity, and Eusebius (260 – 340) followed his lead. The latter, in his classification of the canonical books, was uncertain whether to list it with the disputed works (*antile-gomena*) or with those termed spurious (*notha*; cf. *Eccl. Hist.* 3.25). Possibly he was influenced by his reaction to PAPIAS'S interpretation of the MILLENNIUM. Eusebius's influence was powerful. Cyril of Jerusalem (315 – 386) later forbade churchmen to read it in public from the pulpit, and even depreciated it for private devotions. The later churches of Asia Minor did not utilize it, for it is not mentioned in the Canon of the Synod of Laodicea (c. 360) nor in the *Apostolic Constitutions*, nor in the list of Gregory Nazianzus (d. 389).

Theodore of Mopsuestia (c. 340 – 428) rejected the Apocalypse in company with the CATHOLIC EPISTLES. His lead was followed by the Nestorian church, as well as by the Antiochian school of the 4th cent. By the 6th cent., however, the Apocalypse was accepted into the Eastern church. Andrew of Caesarea in Cappadocia wrote a commentary on it, and Leontius, a scholar in Jerusalem, said that it was the last canonical book in the NT.

D. Full acceptance. Full acceptance in the canon was recognized in the Festal Letter of Athanasius, written from Alexandria in 367. The Damasine Council of 382 and the Council of Carthage (397), which certified the officially recognized list of NT Scriptures for the W, both included it. In the Western church its position was firmly established from the 2nd cent.; in the Eastern church its authority was acknowledged much later.

X. Text. The Apocalypse is contained wholly or in part in CODEX SINAITICUS (א, 4th cent.), CODEX ALEXANDRINUS (A, 5th cent.), CODEX EPHRAEMI RESCRIPTUS (C, 5th cent.), and several other uncials (e.g., P 046 051 052 0207 0229). Two papyrus MSS, P[18] (Oxyrhynchus 1079, 3rd/4th cent.) and P[47] (Chester Beatty, 3rd cent.), also contain sizable fragments. Numerous cursive MSS contain significant readings that vary from the TR, but since none of these is earlier than the 11th cent., the chief weight of textual evidence lies with the uncial and papyrus MSS. As might be expected, the bulk of the

cursives contain the Byzantine type of text. The two papyrus MSS mentioned agree strongly with ℵ A C P 0207, while 046 together with 1 and some other cursives constitute a third group.

There are a few important variants: in Rev. 1:5, the TR reads *lousanti*, "washed," and the Alexandrian text reads *lysanti*, "loosed"; in 5:9, *hēmas*, "us," is omitted by A; 15:3, *ho basileus tōn ethnōn*, "the king of the nations," is supported by ℵ[1] A P 046 051 1 and numerous other cursives against *ho basileus tōn aiōnōn*, "the king of the ages," supported by P[47] ℵ[*] C 94 and other cursives; in 19:13, *bebammenōn*, "dipped," is found in A and the Byzantine text, while *errantismenōn*, "sprinkled," in P and 2329. A large number of small but relatively unimportant variants occur, most of which are probably alterations for the purpose of interpreting seemingly awkward expressions or clarifying grammatical difficulties. There are no major omissions or gaps in the text.

XI. Content. Although the Revelation seems to be a medley of weird imagery, it does evince an orderly structure. It can be divided into six main sections by the repeated phrase, "I was in the spirit." Each recurrence of this phrase introduces a section of the book that deals with some particular aspect of the apocalyptic manifestation of Christ. The key to Revelation lies in its CHRISTOLOGY rather than in its chronology, though there is a progressive development of action that pervades it from beginning to end. It may be outlined as follows:

1. Prologue: Christ communicating (Rev. 1:1 – 8)
    1. The title (1:1)
    2. The agent (1:1 – 2)
    3. The blessing (1:3)
    4. The destination (1:4)
    5. The greeting (1:4 – 5)
    6. The motto (1:5 – 7)
    7. The authorization (1:8)
2. Vision I: Christ and the churches (1:9—3:22)
    1. The portrait (1:9 – 20)
    2. The letters (2:1—3:22)
        1. To Ephesus (2:1 – 7)
        2. To Smyrna (2:8 – 11)
        3. To Pergamum (2:12 – 17)
        4. To Thyatira (2:18 – 29)
        5. To Sardis (3:1 – 6)
        6. To Philadelphia (3:7 – 13)
        7. To Laodicea (3:14 – 22)
3. Vision II: Christ and the cosmos (4:1—16:21)
    1. The scene in heaven (4:1—11:19)
        1. The worship before the throne (4:1 – 11)
        2. The commission of the Lamb (5:1 – 14)
        3. The opening of the seals (6:1—8:5)
            1. Seal 1: conquest (6:1 – 2)
            2. Seal 2: war (6:3 – 4)
            3. Seal 3: famine (6:5 – 6)

XII. Interpretation. The interpretation of Revelation is difficult and uncertain, and no two interpreters agree fully on all details. The symbolic character of the language and the obscurity of many of its allusions render dogmatic finality on all points impossible to attain. In general there are four main types of interpretation that appear in the historic attempts to explain this book.

The first of these is the *preterist* interpretation, which regards the Apocalypse as descriptive of the historic conditions of the Asian churches at the end of the 1st cent. Virtually all of the symbolism is therefore to be understood in terms of the conditions contemporaneous with the writing of the book and in no way predictive of the future. Babylon and the beasts refer to the Roman state; the woman of Rev. 12 represents the persecuted church; the various judgments are highly colored representations of natural calamities that occurred within the lifetime of the seer. This interpretation, which is held by many recent commentators, has the advantage of viewing the Apocalypse in the light of the times in which it was written, and of reproducing the probable initial reaction of its readers to its teachings. It does not, however, do justice to the predictive element which it contains.

The second type of interpretation is the *historicist* position, which assumes that the book of Revelation depicts the entire course of Christian history from the time of the writer until the consummation of the ages. The various seals, trumpets, and bowls are regarded as chronologically successive, marking significant stages in the development of the Christian church, particularly in the west. Since the Revelation begins with the status of the churches of Asia, which were obviously contemporaneous with the date of writing, and ends with the final conflict with evil and the establishment of the City of God in the indefinite future, it seemed only reasonable to conclude that the material between these two termini should deal with the intervening historical process. The chief difficulty with this view is that the intervening period is of undefined length, and that the identification of any one of the symbols with a particular historical event must necessarily be uncertain. It might be possible to establish a connection between each symbol and certain known events only to have subsequent years prove that the identification was erroneous.

Furthermore, the *historicist* view, by attempting to interpret the Apocalypse through the development of the church in the last nineteen centuries, seldom if ever takes cognizance of the church outside of Europe. It is concerned mainly with the period of the Middle Ages and the Reformation and has relatively little to say of developments after A.D. 1500. If the Revelation really purports to provide a symbolic picture of the development of the church between the end of the 1st cent. and the PAROUSIA of Christ, one would expect a full representation of that period.

A third interpretation, called the *futurist*, assigns all of the Revelation following the third chapter to the end of the church age. The letters to the churches of Asia thus become representative either of seven distinct types of churches persistent throughout the period preceding Christ's coming

or else seven successive periods of church history during that same interval. According to this scheme, none of the action depicted in Rev. 4 – 22 is applicable to the present; it is really a preview of the end. The seals, trumpets, and bowls are a literal description of the final tribulation that will seize the wicked inhabitants of earth prior to Christ's return, and the vision of the City of God refers to the eternal state of the righteous.

The fourth interpretation is the *idealist*, which assumes that the visions of the Apocalypse are in no sense literal. They represent only the general conflict of good and evil under the apocalyptic figures that were familiar to Jews and Christians in the 1st cent. For this reason the Apocalypse is equally applicable to all ages of the church, since it belongs exclusively to none.

Each of these views, divergent as they are, contains some element of truth. The preterist view asserts rightly that Revelation must have some bearing on events contemporary with its production, else its imagery would be foreign to its readers and its teachings would seem irrelevant. Undoubtedly they could see the persecuting Roman state and the seductive prevailing paganism portrayed in the figures of the beasts and the harlot (Rev. 13 and 17). On the other hand, the City of God was not established in the world, nor was paganism abolished in the 1st cent.

The historicist can argue with some plausibility that if the first chapter of Revelation begins with the lifetime of the writer, "what is now" (Rev. 1:19), and ends with the eternal state, the intervening symbols must be concerned with the historical development that lies between the two termini. The question then arises whether these symbols deal with *events* or *principles*. If they deal with events, by what rule can the important events typified be distinguished from those of lesser significance, and how can we be sure of the individual correspondence so that we can determine which have already been fulfilled in the series and which are yet to be realized? No two historicists agree exactly in equating the symbols with history, and some of their interpretations seem forced to the point of being ludicrous.

Remains of a Byzantine church at Philadelphia. The 1st-cent. Christian congregation in this city was one of the churches addressed by Jesus in the book of Revelation (Rev. 3:7 – 13).

The futurist position has the advantage of consistency in connecting the major events of the Revelation with Christ's return. Since his second advent has not yet occurred, there can be little

controversy over fulfillment, for none of the book has taken place except for the existence of the seven churches. Undoubtedly a large segment of Revelation was intended to describe the future, for the voice from heaven speaking to the Seer said, "Come up here, and I will show you what must take place after this" (Rev. 4:1). On the other hand, "after this" is ambiguous, for "this" could refer to the church age if the first three chapters were so interpreted; or it might mean simply "this present moment." Moreover, "after" could refer to the future of the Seer, which would include our "present," or it could mean the eschatological events which accompany the second coming of Christ.

The idealist interpretation emphasizes the spiritual conflict that underlies the Apocalypse and renders the book immediately relevant to all periods of the Christian church. Unquestionably, Revelation is not simply a map of history written in advance; it is rather a philosophy of history written from the standpoint of heaven. Nevertheless, if the idealist position be carried to its extreme conclusion, one might argue that the Revelation is only a collection of myths that embody spiritual teaching but that have no relation to any actual happenings in heaven or on earth. The book thus becomes a flexible symbolism that can be adjusted to the circumstances and whims of the latest reader.

Perhaps the fairest solution to the problem would be to say that all elements may be incorporated in a final exegesis of Revelation. Undoubtedly its thought is often couched in symbolic terms that originated in the OT Scriptures and in the current imagery of the late 1st century. The intent of the book was to cultivate spiritual life and to lay down principles for conduct rather than to predict particular historical occurrences. It does, however, mark the trends of history as God's redemptive purpose moves on to its future climax and consummation. The predictive aspect of Revelation cannot be denied without destroying the real thrust of its message.

XIII. History of interpretation. Although Melito of Sardis (c. 170), Irenaeus (c. 180), and Hippolytus (c. 220) are credited with writing on the Revelation, the earliest extant commentary was composed by Victorinus (d. 303). It is homiletical rather than technical, and somewhat fanciful in its interpretations. Victorinus's exposition was not systematic, but it indicated that the Revelation must have been used extensively in the Western church during the 3rd cent. It is possible that the work attributed to Victorinus was heavily corrected by some disciple of AUGUSTINE, who edited it in accordance with his master's views. In that case the *Commentary* is not a reliable witness of the actual teaching of Victorinus. The text follows a symbolical and amillennial pattern similar to that of Augustine, but Jerome (*De viribus illustris* 19) classed Victorinus as a chiliast, along with Tertullian and Lactantius.

Tyconius, a leader of the African church (c. 390), wrote a commentary on the Apocalypse that followed the "spiritualizing" tradition. His work is no longer available except as quoted by others, but the wide range of authors who cited him—including Augustine of Africa, Primasius of Spain, and Bede of England—shows that it was influential. The methodology of Tyconius was followed by numerous subsequent expositors, chief among whom was Augustine. His treatise, *De civitate Dei*, identified the kingdom of God and the City of God with the church visible and invisible, and fostered an allegorical interpretation of the Apocalypse. In the Western church Augustine's teaching strengthened the growth of the papacy, which assumed political sovereignty on the ground that the kingdom of God should rule the world.

Primasius (c. 550) adopted the allegorical method of Tyconius. He was followed by Autpertus (c. 775), a Benedictine monk of southern France, who made a digest of Victorinus, Tyconius, and Primasius. Alcuin (735 – 800), the great teacher of Charlemagne's court and an Englishman by birth,

perpetuated the allegorical method of his predecessors.

Rabanus Maurus (775 – 836), the pupil of Alcuin, and his disciple, Walafrid Strabo (807 – 849), maintained the same tradition. Walafrid introduced a *Glossa ordinaria*, a set of marginal or interlinear notes, which were frequently incorporated in Bibles of the Middle Ages.

No great change from the method or content of Tyconius and his successors took place during the Middle Ages. In the writings of Anselm of Havelberg (1129 – 1155) the broad allegorical interpretation was changed to a more concrete historicism. Rupert of Deutz (fl. 1111 – 1129) attempted to interpret Revelation on the basis of biblical history. Although much of his explanation seems strained, he tried to establish a connection between prophecy and secular history so that some sort of continuity might be preserved.

Rupert's procedure was later used significantly by Joachim of Floris (1130 – 1201), who introduced a new concept into the interpretation of the Apocalypse. In place of the predominantly mystical and allegorical approach, he emphasized a chronological division of the book. He drew a parallel between the seven seals and seven divisions of the Christian era, ending with a consummation that should follow immediately his own times. He broke from the system of Tyconius and became the protagonist of a new trend in interpretation. He proposed that history should be divided into three ages: the age of the Father, extending from the creation to Christ; the age of the Son, from Christ to his own day; and the age of the Spirit, of indefinite length terminating with the day of judgment. He thus introduced a type of dispensationalism which indicated that the age of the Son, in which the medieval church flourished, was not final. This concept contributed to the rise of the Reformation.

Renewed interest in the Apocalypse was stimulated by the controversial atmosphere of the Reformation. The concepts of the antichrist beast (Rev. 13) and of the harlot on the beast (chs. 17 – 18) were applied to the papacy and to Rome. Although neither Luther nor Calvin wrote commentaries on Revelation, their polemic literature employed the apocalyptic denunciations of evil in conflict with papal power. By so doing they conveyed the impression that the antichrist or beast denoted the papacy, and that with the overthrow of the papacy the consummation of the kingdom of God would be achieved.

The Roman Church responded by counterinterpretation. Francisco Ribera (1537 – 1591), a Jesuit scholar of Salamanca, published a 500-page commentary on the Apocalypse in 1591 which was later reproduced in several revised editions. He argued that the Antichrist was not the Roman papacy but an individual ruler whose appearance lay still in the future. Bellarmin, the most learned apologist for Catholicism in the Reformation (1542 – 1621), held essentially the same position, as did numerous other apologists. Luis de Alcázar (1554 – 1613), a Spanish Jesuit of Seville, advocated the preterist position, and asserted that the Apocalypse applied chiefly to the events preceding the fall of Rome in 476.

The controversies of the Reformation crystallized these three chief systems of interpretation. In subsequent Protestant theology the futuristic system was widely developed by the Fifth Monarchy men in the 17th cent. Their excesses brought it into disrepute, but it was renewed in the 19th cent. by the early teachings of the Plymouth Brethren and by the Bible Conference movement in the 19th – 20th cent. The Roman Church in general followed Augustine in identifying the church with the kingdom of God, and by asserting that the millennium is the interval between the ascension of Christ and his future advent.

Commentaries on Revelation written within the Protestant church in modern times have been divided between a few preterists like Moses Stuart of the 19th cent. and James Snowden of the 20th,

the historicists represented by E. B. Elliott and by A. J. Gordon, and the futurists such as J. A. Seiss, whose work on the Apocalypse (first published in 1865) was one of the first popular presentations of this view and one of the most influential. For a fuller list of more recent authors, see the subjoined bibliography, which represents differing periods and schools of thought in the modern era.

XIV. Theology. Although the Apocalypse is not intended to be a treatise on theology, it contains a very definite scheme of doctrine, more often reflected in its assumptions than expressed by its declarations. Its obvious emphasis is ESCHATOLOGY. Confronted by a hostile world and by threats of repression if not extermination, the seer deals with the future of the church in the divine plan for the ages.

Relief on the altar of Domitian.

His first assumption is the personality and SOVEREIGNTY OF GOD. The centrality of the throne in the book of Revelation is a continual reminder of the superiority of God to all circumstances and persons. He is greater than the menace of imperial Rome; his power transcends that of the persecuting state. His will determines when and how judgment will be inflicted, and his plan must triumph irrespective of human wickedness and rebellion. He is called "Almighty" (Rev. 4:8; 11:17; 15:3; 16:7, 14; 19:6, 15; 21:22) and is depicted as creator of all things (4:11; 14:7) and judge of every human being (20:11 – 15).

The triunity of God is hinted at in Rev. 1:4 – 5, which speaks of the one "who is, and who was, and who is to come, and…the seven spirits before his throne, and…Jesus Christ." Reference to the three persons of the TRINITY persists through the rest of the book, though they are not always mentioned in the same context. Revelation is strongly Christological. The historical character of Jesus is asserted unequivocally. He is a member of the Jewish people (5:5); has twelve apostles (21:14); was crucified in Jerusalem (11:8); and rose from the dead (1:5, 18). His present exaltation (3:21) is depicted by the portrait of ch. 1.

His authority over the progress of history (Rev. 5:6 – 12) is one of the keys to the action of the entire book. He is depicted as the Lamb, slaughtered as a sacrifice (5:6); as the Lion of Judah, heir to the throne of David (5:5); and as the conquering Son of Man, who appears in the clouds to complete the harvest of earth (14:15). He is called the "Word of God" (19:13), a title elsewhere applied to him only in the Gospel of John. He is the guardian and critic of the churches (1:12 – 20), and the final judge of earth (22:12). The main theme of the Apocalypse is the return of Christ and the establishment

of his kingdom (11:15), and he is portrayed as the light of the final City of God (21:23).

The work of the HOLY SPIRIT is mentioned, though its place in individual spiritual experience is not stressed. The Spirit is represented by "the seven spirits before his [God's] throne" (Rev. 1:4). He provided the atmosphere in which the seer received his visions (1:10; 4:2; 17:3; 21:10), although the use of the expression "in the Spirit" (*en tō pneumati*) possibly may be interpreted to refer to a mystical experience rather than to a person. The Spirit with the bride of Christ issues the command to come and partake of the water of life (22:17).

The status of the sinner before God is clearly defined. Those who are apart from God are afraid of him (Rev. 6:16 – 17); they are the easy prey of demonic forces (9:4; 13:3, 14; 17:8) and are destined to be judged for their deeds (20:12 – 13). Salvation is guaranteed to believers (7:3). The destinies of both believers and unbelievers are clearly defined; the rebellious and unbelieving are doomed to the lake of fire (21:8), while the redeemed become the inhabitants of the eternal City of God (22:14).

The theological aspect of personal spiritual experience is stressed mainly in the first three chapters, which deal with the seven churches of Asia. Personal love for Christ, loyalty under suffering, tenacity of faith, are the major qualities stressed by this book.

The demonic world of evil under the domination of SATAN is clearly recognized (Rev. 9:4 – 11). The entire conflict of which Revelation speaks is spiritual, and the warfare on earth is preceded by warfare in heaven, in which Satan is vanquished by the angelic hosts of righteousness (12:7). The antagonist of God will finally be overcome (12:9), will be bound for an interval (20:1 – 3), and will finally be remanded to the LAKE OF FIRE (20:10). The oppressive and persecuting politico-religious complex, represented by the "beasts" of Rev. 13, will likewise be destroyed.

In similar fashion angelology plays a larger part in Revelation than in the other books of the NT. To each of the seven churches is assigned an ANGEL to whom the message for the church is addressed. Throughout the book angels appear as messengers, or as executors of the divine will (Rev. 5:2; 7:2, 3; 8:2; 10:1; 12:7; 14:6 – 9, 17; 15:1; 17:1; 18:1, 21; 19:17; 20:1; 21:9; 22:8). The "living creatures" of Rev. 4:6 – 8 parallel the seraphim of Isa. 6 and presumably constitute an angelic order of beings. Both angels and demons belong to a realm of conscious spiritual beings, divided between good and evil (Rev. 12:7).

Obviously the emphasis of Revelation is eschatological. All other aspects of doctrine are related to the divine program of history. The letters to the seven churches focus on the future; the final promise to each of the churches begins with "I will" and alludes to some reward or retribution yet to come (Rev. 2:7, 10, 17, 28; 3:5, 12, 20).

The main section of the book professes to deal with "what is to take place after this." The character of God is disclosed in the light of his plan for the future and for the new creation; the work of Christ is related to judgment more than to his present soteriological function. His ultimate triumph over the forces of evil and the establishment of the City of God, the eternal state of God's redeemed people (Rev. 19 – 22), constitute the goal of the eschatological process.

M. C. TENNEY

revenge. See AVENGER OF BLOOD; VENGEANCE.

reverence. Profound respect felt and shown to someone, especially God. The English term is used a number of times in Bible versions to render several Hebrew and Greek terms. Reverence consists of fear, awe, and deference in worshipful tribute paid to God (or some other deity) and to things sacred. Various OT references are related to contrasts between the WORSHIP of Yahweh with that of other gods. Among a series of prohibitions in LEVITICUS against the religious practices of magic and witchcraft of other peoples are also commands for the Israelites to worship the true God. One of them appears twice: "Observe my Sabbaths and have reverence for my sanctuary. I am the LORD" (Lev. 19:30; 26:2). These texts use the Hebrew verb *yārē* H3707, "to fear," which can also be used with reference to pagan gods (e.g., those of the Amorites, Jdg. 6:10 [NIV, "do not worship"]; cf. the cognate nouns *yir'ă* H3711, Ps. 5:7, and *môrā'* H4616, Mal. 2:5). The corresponding Greek noun, *phobos* G5832 ("fear"), is sometimes used in the NT in a similar way (e.g., "reverence for Christ," Eph. 5:21). A different term, *eulabeia* G2325 ("circumspection, piety"), can also be translated "reverence" (cf. Heb. 5:7; 12:28). See FEAR.

G. B. FUNDERBURK

reward. Something given in return for an action, whether good or evil; recompense, requital. In the preponderance of biblical citations, it is the reward of good for good deeds that is in evidence. In the T the obedience of the people of God to their COVENANT obligations resulted in both spiritual and physical benefits. The OT threefold blessing of (1) the continuance of the descendants of ABRAHAM, (2) the settlement in Canaan, and (3) the final culmination of the covenant in the MESSIAH—all were included as aspects of the reward for the faithfulness of Israel. Spiritual blessings were uppermost, while, as in all God's providential dealings with his people, obedience to the law and its structure of the spheres of life brought about material well-being.

The glory of the OT conception was that God in his mercy substituted another vicarious offering for the sins of his people in the ritual of the SACRIFICE, and finally in the accomplishment of redemption in his servant: "But he was pierced for our transgressions, / he was crushed for our iniquities; / the punishment that brought us peace was upon him, / and by his wounds we are healed" (Isa. 53:5). This same concept is reaffirmed in the NT, although by the end of the 1st cent. B.C. much of JUDAISM had already fallen prey to the "legalism" that is demonstrated in the notion of "reward" in the APOCRYPHA and PSEUDEPIGRAPHA as well as the DEAD SEA SCROLLS. The NT presents two separate levels of reward: the spiritual, which results only from faith in Christ, and the physical, which accrues to all who follow God's creation ordinances (e.g., the laws of hygiene).

The classic theological distinction that grew out of this insight was between "special grace" and "common grace." The liberal and existential theological constructions rejecting the biblical concept of CREATION and FALL have become involved in the inscrutable problem of human responsibility. Paul makes this clear in regard to all rewards: "It does not, therefore, depend on human desire or effort, but on God's mercy" (Rom. 9:16 TNIV). The Scripture teaches degrees of rewards dependent upon the individual's faithfulness to God's commands. Such rewards are like all others in Scripture, promised both for the present life and for the glorification of the believer in the world to come. "As the outcome of your faith you obtain the salvation of your souls" (1 Pet. 1:9 RSV). The ultimate reward of the Christian is to be in the presence of Christ.

W. WHITE, JR.

Rezeph ree'zif (רֶצֶף *H8364*, meaning uncertain). A city in MESOPOTAMIA conquered by the Assyrians (2 Ki. 19:12=Isa. 37:12). When SENNACHERIB was threatening to crush Jerusalem, he sent a message to HEZEKIAH in which he asked, "Did the gods of the nations that were destroyed by my forefathers deliver them: the gods of Gozan, Haran, Rezeph and the people of Eden who were in Tel Assar?" The identification of Rezeph is uncertain because several places in the general area bear a similar name. One likely candidate is the Raṣappa of Assyrian records, identified with modern Reṣafeh (several variant spellings), some 80 mi. NNE of Palmyra (TADMOR) and 15 mi. S of the EUPHRATES. How or when the city of Rezeph fell is unknown, but in 701 B.C., when mentioned in this passage, it had been in Assyria's possession for at least a century. CUNEIFORM texts mention several governors during the period between 839 and 673, so it probably first came under Assyrian domination during the reign of SHALMANESER III. (See further *ISBE* rev. [1979 – 88], 4:180; *ABD*, 5:708.)

J. C. MOYER

Rezia ri-zi'uh. KJV form of RIZIA.

Rezin ree'zin (רְצִין *H8360*, possibly "delight" or "[God] is pleased"; the Akk. form, *Raḫ(q)ianu*, may indicate that the name was written in Old Aram. as רקין, representing the pronunciation *raḍyān* [cf. *ABD*, 5:708; but *HALOT*, 3:1284, suggests *ra⟨yān*]). (1) King of ARAM (SYRIA) who supported PEKAH king of Israel in his fight against Judah (2 Ki. 5:37; 16:5; Isa. 7:1). Rezin is also credited with recovering ELATH (2 Ki. 16:6, but see below). He was the last Aramean king to rule DAMASCUS, for in 732 B.C. TIGLATH-PILESER III conquered the city and put him to death (16:9). Tiglath-Pileser's *Annals* refer to Rezin's "father's house" as being at Ḥadara, 30 mi. SW of Damascus; and M. Unger infers that Rezin's father was a local prince (*Israel and the Aramaeans* [1957], 172 n. 31).

At one point JEROBOAM II of Israel had reconquered Damascus (2 Ki. 14:28), so Rezin may have taken the throne by force. The first clear knowledge of his position is that he, along with MENAHEM, paid tribute to Tiglath-Pileser in 740, after the fall of ARPAD, and at some time between 743 and 739 (*ANET*, 282 – 83). During the Assyrian campaign against Urartu (737 – 735), Rezin and Pekah—the latter having usurped the throne of Israel—made an alliance, seeking to organize a coalition against ASSYRIA. When AHAZ of Judah refused to be drawn in, these "two smoldering stubs of firewood" (Isa. 7:4) tried to bring Judah into line by military pressure and to set up a puppet king identified as "the son of Tabeel." E. Kraeling's view (*Aram and Israel, or, The Aramaeans in Syria and Mesopotamia* [1918], 117) that Rezin himself is meant is unlikely (see B. Mazar in *IEJ* 7 [1957]: 237). Rezin drove S to the Red Sea, always a direction of Syrian interest, and captured the port Elath, which he handed over to the Edomites (2 Ki. 16:6, emending MT ʾrn to ʾdm). J. A. Montgomery (*A Critical and Exegetical Commentary on the Book of Kings*, ICC [1951], 458) emends the verse so as to avoid mentioning Rezin (cf. also NRSV), but his involvement is not improbable. Seals found at Tell Kheleifeh bear witness to alternate Israelite and Edomite occupation.

The northern allies had to be content with the knowledge that Judah, beaten into her defenses and beset by Edomites and Philistines (2 Chr. 28:18), was powerless to interfere. In 734 the Assyrian answered his vassal's call for help. He struck through GALILEE at PHILISTIA, returned to mop up N Israel, and extracted tribute from TYRE. Rezin was thus isolated in Damascus and was killed when the city fell after a two-year siege; so the Aramean empire of Damascus came to an end. (See further W. F. Albright, *BASOR* 87 [Oct. 1942]: 22 – 23; A. Alt, *Kleine Schriften zur Geschichte des Volkes Israel* 2 [1953], 150 – 62; D. W. Thomas, ed., *Documents of Old Testament Times* [1958], 54, 57; W. Hallo in *BA* 23 [1960]: 47ff.; B. Mazar in *BA* 25 [1962]: 98 – 116; H. Tadmor in *IEJ* 12 [1962]: 114 – 22; H. Donner, *Israel under der Völkern* [1964], 59 – 63; E. Vogt in *Bib* 45 [1964]: 348 – 54; Y. Aharoni, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 370 – 76; W. T. Pitard, *Ancient Damascus* [1987], 181 – 89; E. Lipiński, *The Aramaeans: Their Ancient History, Culture, Religion* [2000].)

(2) Ancestor of a family of temple servants (NETHINIM) who returned from the EXILE (Ezra 2:48; Neh. 7:50).

J. LILLEY

Rezon ree'zuhn (רְזוֹן *H8139*, "dignitary, ruler"). Son of Eliadah and king of ARAM (1 Ki. 11:23 – 25). Rezon began his career in the service of HADADEZER, Aramean king of ZOBAH. Probably at the time when DAVID defeated Hadadezer (2 Sam. 8:3), Rezon forsook his master, gathered men about him, and became a captain of freebooters. It was possibly years later, during the reign of SOLOMON, that he occupied DAMASCUS and founded there the dynasty which created the most powerful of the Aramean kingdoms. This ordering of events is necessary to allow time for David's establishment of

garrisons among the Arameans from Damascus and his putting them under tribute after his victory over Hadadezer c. 984 B.C. (2 Sam. 8:5 – 6). After Rezon's seizure of Damascus he became an adversary against Solomon (1 Ki. 11:23). Many scholars identify him with HEZION, grandfather of BEN-HADAD I (1 Ki. 15:18), and suggest that "Rezon" was a title (cf. *HALOT*, 3:1210; but see W. T. Pitard, *Ancient Damascus* [1987], 96 – 106).

<div align="right">B. K. WALTKE</div>

Rhegium ree'jee-uhm (Ῥήγιον *G4836*). A town on the toe of the Italian peninsula opposite Messana; modern Reggio di Calabria. The spelling of the name is disrupted and complicated by naive ancient ideas of etymology. The Greeks, thinking of Sicily as "broken" from Italy by the 7-mi.-wide Messina strait, derived the word from *rhēgnymi G4838*, "to break," whereas Italians favored the Latin root *reg*-meaning "royal"—hence the *h* or the absence of it. The name is probably pre-Greek, and if one derivation is to be preferred to the other, the Latin or Italian origin of the word is the more likely.

Rhegium was a Greek colony founded in 720 B.C. by Chalcis with a strong infusion of citizens from Messenia, which itself was a colony only a few years older. Rhegium was originally an oligarchy, but little is known of the first two centuries of its history. It was the birthplace of the poet Ibycus (mid-5th cent. B.C.). Anaxilas is named as its "tyrant" (in the Greek sense of that word) in the generation of 494 to 476 B.C., and he led the city into an era of imperialism. Thus involved in Sicilian politics, Rhegium met destruction at Syracuse's hands in 387. Rebuilt, it is found later in control of Campanian mercenaries (280 to 270), and successfully resisted the two conquerors Pyrrhus and Hannibal in the same century. As the occupant of a strategic watch-point opposite the Sicilian bridgehead into Italy, Rhegium was especially cultivated by Rome, and proved a loyal ally, receiving municipal status in 90 B.C.

Rhegium was a safe haven in a strait notoriously difficult for ancient ships to navigate (see the legends of Scylla and Charybdis). PAUL'S ship, having tacked widely to make Rhegium (Acts 28:13), waited under the lee of the Italian shore for a funneling S wind to drive her through the strait with its complex currents, en route to PUTEOLI. Rhegium remained a Greek-speaking city throughout imperial times, taking the name Rhegium Julium under AUGUSTUS. (See further Strabo, *Geogr.* 6.257 – 58; Herodotus, *Hist.* 6.23; 7.165, 170; Thucydides, *Hist.* 4.24 – 25 et al.; Polybius, *Hist.* 1.7 et al.; Livy, *Hist.* 23.30; 36.42.)

<div align="right">E. M. BLAIKLOCK</div>

Rheims Version. See VERSIONS OF THE BIBLE, ENGLISH, IV.

Rhesa ree'suh (Ῥησά *G4840*). Son of ZERUBBABEL, included in Luke's GENEALOGY OF JESUS CHRIST (Lk. 3:27). Because this person is otherwise unknown, some have proposed that the name reflects the Aramaic word for "the prince" (*rēʾšāʾ* or *rêšāʾ)* and that in an earlier form of the genealogy it was intended as the title of Zerubbabel (cf. J. Jeremias, *Jerusalem in the Time of Jesus* [1969], 296; but see D. L. Bock, *Luke*, BECNT, 2 vols. [1994 – 96], 1:354).

rhetorical criticism. Also *rhetorical analysis*. Although this label can be used broadly of any interpretation based on literary theory, it is specifically applied to the study of texts from the perspective of classical oratory and rhetoric (the art of effective and persuasive communication). The development of rhetorical techniques can be traced back to the 5th cent. B.C., and their analysis is

associated especially with later Roman writers, such as Cicero (106 – 43 B.C.) and Quintilian (c. A.D. 35 – 100). The term *rhetorical criticism* is sometimes applied to the literary study of the OT (cf. *ABD*, 5:712 – 15; *DBI*, 2:396 – 99), but it is in connection with NT scholarship, and particularly the Epistles, that this discipline has flourished in recent decades.

Notable early exponents include the classicist George A. Kennedy (*New Testament Interpretation Through Rhetorical Criticism* [1984]) and the NT scholar H. D. Betz (*Galatians: A Commentary on Paul's Letter to the Churches in Galatia*, Hermeneia [1979]). This approach focuses on methods of argumentation and figures of speech. Subsequent writers have sought to ground their work on modern rhetoric, which pays greater attention to the audience and thus the broad social context of the speech. (See D. F. Watson and A. J. Hauser, *Rhetorical Criticism of the Bible: A Comprehensive Bibliography with Notes on History and Method* [1994]; R. D. Anderson, *Ancient Rhetorical Theory and Paul*, rev. ed. [1999]; C. J. Classen, *Rhetorical Criticism of the New Testament* [2000]; S. E. Porter and D. L. Stamps, eds., *Rhetorical Criticism and the Bible* [2002]; D. E. Aune, *The Westminster Dictionary of New Testament and Early Christian Literature and Rhetoric* [2003]; D. F. Watson, *The Rhetoric of the New Testament: A Bibliographic Survey* [2006].)

Rhoda roh'duh (Ῥόδη *G4851*, "rose"). The name of a slave girl in the house of MARY, the mother of John Mark, who came to answer the door when PETER arrived there after his miraculous deliverance from prison (Acts 12:13). She recognized Peter's voice and joyfully announced to the company gathered there for prayer that Peter was at the door; she was accused of being mad but persisted in her claim (vv. 14 – 15). Nothing more is known of her. The name was common, especially among slave girls.

G. H. WATERMAN

Rhodes rohdz' (Ῥόδος *G4852*, "rose"). Modern Ródhos, a large island of the Dodecanese group, over 500 square mi. in area, 12 mi. off the coast of ancient CARIA in SW ASIA MINOR (modern Turkey). Rhodes is hilly, but cut by fertile and productive valleys. Its name may be an assimilated formation, for roses are not—and, to the best of modern knowledge never were—a characteristic flower of the island. The name is also applied to its capital city.

The island was originally settled by Dorian Greeks, and three city states emerged originally from the occupation. In the 5th cent. B.C. these states were members of the Athenian Confederacy with, presumably, democratic constitutions. Strife with ATHENS broke out in 411 and lasted for five years. The result was the federation of the three states into one unit with a new capital, Rhodes. The three constituent city-states appear to have retained a large measure of autonomy, and kept democratic institutions—a situation interrupted, in the second half of the 4th cent., by a period of Persian domination.

After the conquests of ALEXANDER THE GREAT, Rhodes, aided by her advantageous position and her maritime skill, captured and held a considerable carrying trade with the E end of the Mediterranean, which had been opened by Alexander to the commerce and penetration of the western world. Rich, powerful, and naturally garrisoned by the sea, she maintained her independence under the "successors" of Alexander, policed the seas against the perennial piracy of the Asiatic coast, and functioned, as Athens had once done, as a center of exchange and capital. Generally in the Hellenistic period, Rhodes sided with Egypt rather than with Syria.

Shrewdly appraising the rise of Roman power, Rhodes assisted the Republic in the wars against Philip V of Macedon and ANTIOCHUS of Syria (201 – 197 B.C.), and was rewarded with territory in Caria and LYCIA. In the third war with Macedon (see MACEDONIA), Rhodes angered ROME by an attempt at neutrality, and in spite of a vigorous oration by Cato, the famous censor—an oration that survives in part as the earliest sample of Latin oratory—Rhodes was punished by the institution of Delos as a rival port (166 B.C.). It was a shrewd economic blow, and this, with the amputation of the mainland territories in Caria and Lycia, went far to destroy Rhodes' commercial prosperity.

Rhodes regained some of her standing as a Roman ally by withstanding a siege by Mithridates when that dynamic king of PONTUS all but destroyed Rome's position E of the AEGEAN in 88 B.C. Rhodes assisted POMPEY with a fleet when he cleared the E end of the Mediterranean of pirates in 67 B.C., and later when he fought against CAESAR. After Caesar's victory in the Civil War, Rhodian ships assisted him in the siege of ALEXANDRIA. Later it became the place of self-exile of TIBERIUS when AUGUSTUS rejected him as his successor.

Aerial view of the harbor in Rhodes.

© Dr. James C. Martin

It is generally thought that the inhabitants of Rhodes are meant by the term RODANIM (Gen. 10:4; 1 Chr. 1:7). The island is probably mentioned by EZEKIEL as one of the places that had commercial dealings with TYRE (Ezek. 27:15; here the MT has DEDAN, but LXX reads *Rhodiōn*). When PAUL passed that way, traveling from TROAS to CAESAREA (Acts 21:1), Rhodes was little more than a port of call with a degree of prosperity and distinction as a beautiful city, but no more than that. It is still a beautiful city, full of ancient and Crusader remains, on a lovely island. (See further *ABD*, 5:719 – 20; *OCD*, 1315 – 16.)

E. M. BLAIKLOCK

Rhodocus rod'uh-kuhs (Ροδοκος). A Jewish traitor who disclosed to the Syrians the plans of Judas MACCABEE concerning the fortress of BETH ZUR, which Judas had strengthened. When discovered, Rhodocus was found guilty and imprisoned (2 Macc. 13:21).

Ribai ri'bi (רִיבַי H8192, possibly short form of יְרִיבַי H3744, "[Yahweh] contends [for me]"; see JERIBAI). Father of ITHAI, one of DAVID'S mighty warriors (2 Sam. 23:29 [MT "Ittai"]; 1 Chr. 11:31).

Riblah rib'luh (רִבְלָה H8058, meaning uncertain). **(1)** A town said to be "in the land of Hamath" (2 Ki. 23:33 et al.). It is possibly the same as Shabtuna, included in the topographical list of THUTMOSE III (Y. Aharoni, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 161 [#73], 441; however, see *SacBr*, 97a). The town was some 50 mi. SSW of HAMATH and less than 7 mi. S of KADESH on the ORONTES; its ruins are just ENE of the modern village of Ribleh (near the border between Syria and Lebanon).

When Pharaoh NECO made a campaign through Palestine, JOSIAH king of Judah lost his life (2 Ki. 23:29). In his stead, the people made Josiah's younger son, JEHOAHAZ, king. This popular choice did not please Neco, who put Jehoahaz in bonds at Riblah "so that he might not reign in Jerusalem"; he then made Jehoahaz's older brother, Eliakim, king, but changed his name to JEHOIAKIM (vv. 30 – 34). Neco had apparently reached the ORONTES River by that time and was making Riblah his headquarters. Topographically and geographically, it is well situated, and one can understand why a military monarch would have chosen it for a base of operations.

In 605 B.C., about five years after Neco's campaign, NEBUCHADNEZZAR and the Babylonians gained the upper hand and made Riblah their staging ground for operations against Palestine. ZEDEKIAH, the new king whom Nebuchadnezzar had put on the throne in Jerusalem, resisted such vassalhood and rebelled against the king of Babylon. When Jerusalem was besieged, Zedekiah fled. Nebuchadnezzar's army captured him near JERICHO, took him to Riblah, and put out his eyes just after making him witness his sons' execution (2 Ki. 25:1 – 7; cf. Jer. 39:1 – 7; 52:1 – 11). Later, other rebellious Israelite leaders lost their lives at the same town (2 Ki. 25:18 – 21; Jer. 52:24 – 27). The town is probably mentioned also in a prophetic oracle where God says he will make the land desolate "from the wilderness to Riblah" (Ezek. 6:14 NRSV; the NIV, following the MT, has DIBLAH).

Riblah.

(2) An unidentified place somewhere E or NE of the Sea of Galilee, included in a description of the boundaries of the Promised Land (Num. 34:11, here used with the definite article, "the Riblah"). The view that this Riblah is the same as #1 above creates confusion in the text. The town was evidently a short distance E of AIN, which also is unidentified, though some think it is the modern Khirbet ʿAyyun, c. 3 mi. E of the S tip of the Sea of Galilee. (The LXX reads *Arbēla*, but ARBELA was prob. W of the Sea of Galilee.)

riddle. Throughout the biblical world the use of riddles was common. One may somewhat arbitrarily distinguish a riddle from a fable or enigma, the primary point in a riddle being its intention to puzzle the hearer. Enigmas may be conceived of as utterances which, though difficult to understand, are not difficult by design; it may be only a lack of information on the part of the interpreter that makes it a puzzle. A FABLE is simply a fictitious story (often involving members of the plant and animal kingdoms), told to convey a certain spiritual idea; it is not necessarily difficult of understanding though it may be so. The principal word to be treated is Hebrew ḥîdă *H2648*, which occurs seventeen times in the OT (eight of these in one passage, Jdg. 14:12 – 19). It is usually translated "riddle" (in several instances with the cognate verb ḥûd *H2554*), though occasionally one finds such

renderings as "dark sayings" (Ps. 78:2 KJV, NRSV; "hidden things," NIV) and "hard questions" (1 Ki. 10:1=2 Chr. 9:1).

MOSES is stated to have communed with God "face to face," and this is contrasted with "dark speech" (Num. 12:8 KJV). The word is used of a fable in one passage (Ezek. 17:2; NIV, "allegory"); here and in another verse (Ps. 49:4) it is parallel to *māšāl H5442* (meaning PARABLE or PROVERB). SAMSON'S riddle (Jdg. 14:12 – 19) is the most notable example of a riddle in the OT. In alluding to experiences of killing a lion and later finding honey in its carcass, Samson said, "Out of the eater, something to eat; / out of the strong, something sweet" (Jdg. 14:14; see P. Nel in *Bib.* 66 [1985]: 534 – 45; O. Margalith in *VT* 36 [1986]: 225 – 34). The QUEEN OF SHEBA came to SOLOMON "to test him with hard questions" (1 Ki. 10:1), and according to JOSEPHUS (*Ant.* 8.5.3 §§148 – 49), Solomon and HIRAM engaged in a contest of riddles, the latter with some help coming out victor (cf. also Sir. 47:15). In view of this it is surprising that the Hebrew word for "riddle" is found only once in the book of Proverbs (Prov. 1:6), but there are sections of the book that might well qualify for that designation. (On the cryptograms in Jer. 25:26 and 51:1, see ATBASH.)

A true riddle is found in Rev. 13:18, where the number 666 is apparently an obscure reference to some individual. The attempts to interpret it are legion and no consensus reigns. We know from the SIBYLLINE ORACLES that such numerical references were common. The Greek word *ainigma G141* (used in the LXX sometimes to render *hîdă*, e.g., Num. 12:8) appears in the NT only once in the phrase "now we see through a glass, darkly" (1 Cor. 13:12 KJV]); it has been suggested that the translation "through a mirror, by means of an enigmatic word," might be better (cf. M. S. Terry, *Biblical Hermeneutics* [1890], 183). Some of Jesus' sayings qualify as enigmas (Lk. 22:36; Jn. 3:1 – 3; 4:10 – 15; 6:53 – 59). Great caution needs to be exercised in interpreting the "dark sayings" of the Scripture. Special care should be given to understand exactly what the words in the original language meant. Due regard to context, always important, is especially called for in such instances. (See further A. B. Mickelsen, *Interpreting the Bible* [1963], 199 – 211; *ABD*, 5:721 – 23.)

B. C. STARK

ridge of Judea. See JUDEA, RIDGE OF.

rie. KJV spelling of "rye"; see SPELT.

righteousness. Morally right behavior or character. In the Bible and theology, this term has broad and profound significance. The Hebrew word translated "righteousness" is ṣĕdāqă H7407 (Gen. 15:6 et al.), which can also be rendered "justice, honesty, loyalty" (verb ṣādaq H7405, "to be right" [hiphil, "to declare as in the right"]; adj. ṣaddîq H7404, "righteous, just"). The NT uses Greek *dikaiosynē G1466* (Matt. 3:15 et al.), sometimes rendered "justification" (verb *dikaioō G1467*, "to do justice, vindicate, deem or declare righteous"; adj. *dikaios G1465*). In its general use, *righteousness* represents any conformity to a standard, whether that standard has to do with the inner character of a person or the objective standard of accepted law. J. H. Thayer (*Greek-English Lexicon of the New Testament* [1889], 149a) suggests the definition, "the state of him who is such as he ought to be." In the wide sense, it refers to that which is upright or virtuous, displaying integrity, purity of life, and correctness in feeling and action. In negative terms, it means faultlessness or guiltlessness; with reference to a person, it has to do with his conformity to God's HOLINESS. In a false sense, it may refer to those who pride themselves on their own virtues—sometimes real, sometimes imaginary—and such "righteous" ones are really under the condemnation of a righteous

God (cf. Matt. 9:13; Mk. 2:17; Lk. 5:32; 15:7).

1. Righteousness in the OT
   1. As related to the nature of God
   2. As related to the covenant
2. Righteousness in the NT
   1. The idea in the Gospels
   2. The crucial treatment in Paul
3. Righteousness in the modern world
   1. The existential emphasis
   2. The abiding nature of law
4. Righteousness in world religions

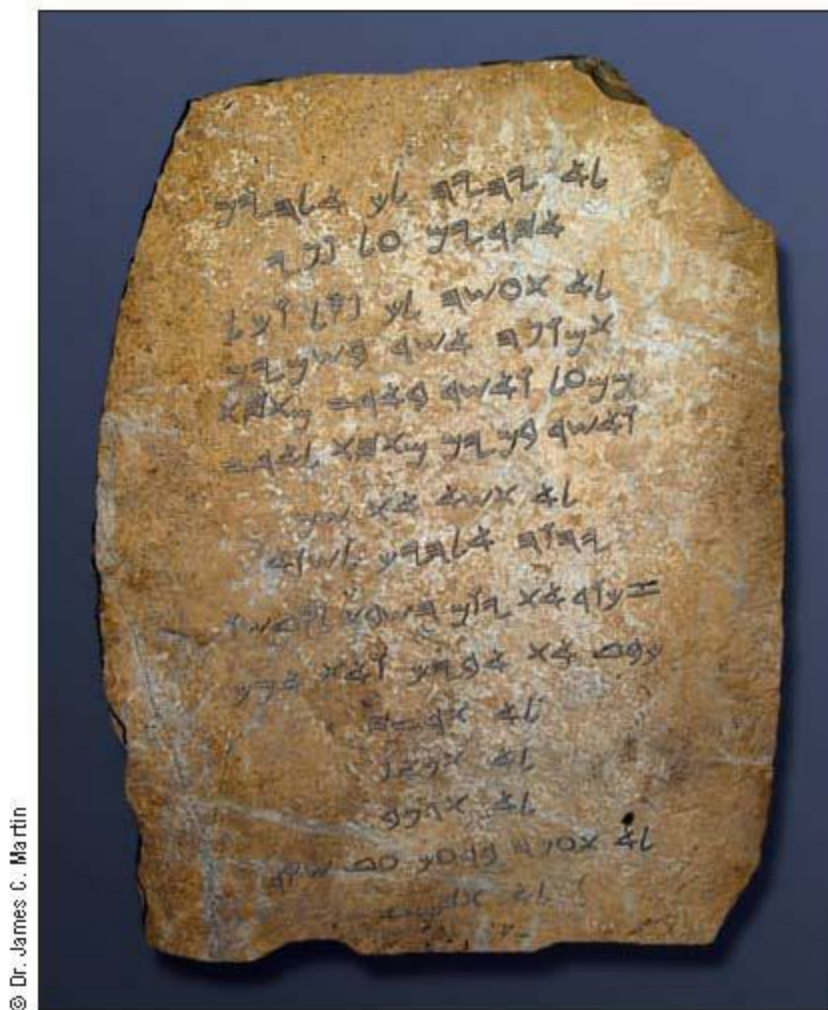
I. Righteousness in the OT. The biblical approach preeminently concerns itself with the person whose way of thinking, feeling, and acting is wholly conformed to the righteousness of God. (In this sense, only Christ can be called "righteous" [cf. Acts 7:52; 22:14; 1 Pet. 3:18; 1 Jn. 2:1], which raises the theological question that is the burden of the NT: if God requires righteousness and if no one is righteous [Rom. 3:10, 26], how may a person be "justified," i.e., "declared righteous"?) Righteousness is also closely associated with the theme of God's COVENANT with his people.

A. As related to the nature of God. The center of reference in biblical theology is first of all the righteousness of God. The fundamental idea, a starting place for any biblical view of righteousness, is very simply this: there is no law *above* God, but there is a law *in* God. Holiness is of his essence, and righteousness is a mode of this holiness. L. Berkhof speaks of righteousness as "transitive" holiness (*Systematic Theology* [1941], 74 – 75; cf. also A. H. Strong, *Systematic Theology*, 3 vols. [1907], 1:290). What is being clearly said is that God is, in his essence, by his very nature, holiness itself; and righteousness is the mode or way by which his essence is expressed toward his created world or toward anything apart from himself. See GOD, BIBLICAL DOCTRINE OF.

To take a clue from Paul Tillich and his discussion of "Being" or his very useful expression, "Ground of Being," then what God *is* (his aseity) is the basis or ground upon which existence and creation rest. Everything apart from God's essence is dependent and contingent upon what he is himself; he is what holiness and righteousness must be. Righteousness is "rectitude of the divine nature by virtue of which God is infinitely righteous in himself…, that perfection of God by which he maintains himself over against every violation of his holiness." In other words, there is a sense in which God cannot help himself when he resists anything in the universe contrary to his own nature. Evil can no more survive in the presence of God than a microbe can survive in the light of the sun. However one might wish it otherwise, this is something which is of the nature of ultimate reality. It cannot be swayed or tampered with any more than the nature of God can be changed. When this has been said, not everything has been said; for no mention has yet been made of the LOVE of God nor of his GRACE (which are also of his essence). Theological discussion insofar as it is biblical and Christian may be reduced to superficial sentimentalism unless the absolute holiness of God and the perfect coincidence which exists between his nature and his action are made clear and strong at the outset.

At this point there can be no caprice or passion, no shiftiness in absolute standards. In the

infinite depths of reality there is the automatic, essential revolt against moral evil. It is not a matter of arbitrary will; it is a necessary moral requirement of the essence of God. God being God, he is what he is, and he is bound by his nature to do what his nature requires. If God is big enough, that is, infinite and eternal, there is no other source of righteousness, justice, law, or integrity.

On the face of it, this looks narrow and harsh, and the religion of the Jews, reflected in the OT, is criticized as being legalistic; moreover, any phase of the Christian religion that appears to rest on the OT, such as Calvinism or Puritanism, is also condemned as legalism or harsh moralism. Apparently the Jews believed not only that they were a people chosen of God, but also that they were directed by REVELATION from God. Perfectly clear in this revelation is God's absolute righteousness. By means of revelation, the righteousness of God was made known through such prophets as MOSES, was codified basically in the Decalogue (see TEN COMMANDMENTS), became relevant to the complexities of living in the Levitical code and the Deuteronomic code, and is also basic to the proper WORSHIP of God as seen in the symbols and activities of the TABERNACLE and the TEMPLE. The basis of operation for both the nation and the individual is clearly set before them in the Holy Writings. Thus the whole system is rightly criticized as legalistic if one may assume that things having a legal character ought to be criticized.


A representation of what the Decalogue might have looked like in paleo-Hebrew script. The righteousness required by God was codified in the laws given to Moses.

What shall be done, then, with the strange gladness with which the whole LAW is treated in the OT? If one may generalize, the law of God, as it reflects the righteousness of God, is the gift of God. It is not a series of harsh demands, but a joyous reality which not only makes his people different

from the other nations, but somehow makes them better; and by this he means that somehow it makes them happier. The law is something to share with one's children, to talk about with one's friends, to carry when walking abroad, to meditate on "day and night." "Oh, how love I thy law!" is a frequent theme of the psalmist. It is something to sing about, and the singing in the great temple choirs were frequently shouts of joy.

It needs to be said very strongly, therefore, in this day when the law of God is made subservient to the love of God (and such love can be sentimentalism apart from law), that the Hebrews saw no conflict between the two concepts. How else could God love his people more than by being always and forever himself? How could a universe possibly hang together without absolute rectitude at its core? How could a nation survive without some dependence on absolute righteousness? How could a people be happy where the lines of truth were anything less than perfectly clear? What physics means to the scientist in the 20th cent., moral law meant to the ancient Jew. What is "fit-for-man" is "well-for-man." What the Hebrews discovered—or better, what they knew had been revealed to them providentially—was that it is only in conformity to God's righteousness that human beings can possibly experience the highest felicity for which their nature has been created. To bring one's self into conformity with God's righteousness is to righten one's self, and so discover harmony and peace. The laws of God are the directions on the package of life. To disobey means confusion; to obey means fulfillment.

Perhaps some light on this—for it does seem a strange doctrine in the 20th cent.—will be shed if one glances at another world religion, Taoism, the religion of the Way. Significantly, Christians were first called "those of the Way." Jesus said of himself, "I am the way" (Jn. 14:6). Taoists sought what was called "The Way of the Universe" and attempted to harmonize their lives with the law of the heavens. The STOICS, with all their Greek sophistication, were speaking of the same kind of harmony through self-control and endurance in accord with the order of the universe. Any approach to life that demands conformity to nature recognizes this theme. The Roman Catholics historically have emphasized natural law—a built-in truth in the universe that is equally built into human nature; and human beings simply destroy themselves and lose any hope of fulfillment when they go against natural law.

The decisive factor in the OT is that Tao, Way, Truth, Law are superseded by Person. God is a living God who created and sustains everything in his own universe according to his own need and will. His own need and will are absolute holiness reflected in righteousness and codified, finally, in human laws. It is the benevolence in his holiness that leads to his condescension in revealing his holy will.

It is easy to be repelled by certain expressions such as appear in the Ten Commandments, such as, "I, the LORD your God, am a jealous God" (Exod. 20:5). At first glance this seems small-minded in anyone who could be thought about as God almighty. But JEALOUSY goes hand and hand with love and need not be small-minded. One who really loves, for that very love's sake simply cannot suffer the presence of anyone or anything that will harm or destroy or even so much as mar the beloved. This is the jealous concern for a child by a parent who keeps putting the best before him or her and who is constantly fearful of even the smallest thing that can undermine the child. Even in Camelot, Arthur's love for Guinevere was not great enough to exclude Lancelot, and so his wife, his family, his kingdom, and the hope of humanity in that generation were destroyed. When God said, "You shall have no other gods before me" ("in my presence"—Exod. 20:3), it was not because the almighty God was afraid of the competition. He feared what any perfect lover would fear, that anything less than God which could become a god would be a destroyer. The danger of false gods is finally a false life.

When the *summum bonum*, the highest good, is not perfection, then the lesser values become less than they should be.

Even in retributive justice, the Jews saw the healing of discipline. Sometimes an arm has to be broken to be reset. Sometimes an athlete has to unlearn to learn correctly. Only thus is he set free. How many times must humanity go through the fires of judgment before there is found freedom in the righteousness of God?

Basically, and in summary, OT biblical thought is completely dominated by its theocentric norm. It rests on the fact that God is absolute holiness in essence, a fact established by special revelation. The demands on human beings for their righteous living, therefore, are never relativistic. The demands are absolute. One may count on God's being fair in his dealings, but the frightful thing is that he must be, by his nature, absolutely fair. Since he is the center of all reality and existence, then everything in his universe is related to him in these same absolute demands. The conclusion of the matter is, as Paul underscores in Romans, "There is no one righteous, not even one" (Rom. 3:10). In the presence of God, "who can stand"? The answer is perfectly plain: no one! There are no rewards for obedience, no claims for recognition, and finally, no excuses, because unholiness cannot exist in the presence of holiness. Absolute cleanliness has no spots.

The Roman Catholics have found some relief in the idea of "original righteousness" (*justitia originalis*). According to this view, God graciously imparted to human beings a perfect rectitude in their original condition before the FALL. This was supposed to have included freedom from concupiscence, bodily immortality, and impassibility. Also, happiness seems to have been a guarantee. It is difficult to see on what authority this position rests. But even if it be true, it is irrelevant and incomplete—irrelevant because people no longer live before the fall, and incomplete because one of the greatest problems in righteousness, as will appear upon examining the NT, is the problem of *positive* righteousness. For someone to be free from overt sin is one problem; to fulfill the demands of love is a much greater problem.

As one follows the efforts of the ancient Israelites to live up to the demands of absolute righteousness, one is struck with the hopelessness, not only of their attainments, but also of the direction of their efforts. Immediately after the Ten Commandments (Exod. 20), there is a section known as the Little Book of the Covenant (21:1—23:19). This is a first effort to translate the Decalogue into rules and regulations. Some of it seems of extremely minor importance, and some of it is simply quaint. The same efforts are reflected in the books of Leviticus, Numbers, and Deuteronomy. Much of what is recorded there no longer speaks to the human condition, since it is culturally restricted. The whole Jewish effort of obedience degenerated into what became true legalism under the PHARISEES. Although one must be careful not to paint all Pharisees with the same brush, nor to suggest that they had no positive qualities, the group as a whole was severely criticized by Jesus. They were the experts in the law—people who spent full time on righteousness, and yet Jesus insisted that the righteousness of his followers must exceed that of the scribes and Pharisees. Their demands on their fellow-Jews became, as Paul recognized, "a yoke of slavery" (Gal. 5:1). Something had gone dead wrong in their approach to righteousness.

B. As related to the covenant. It is clear from what has been said that righteousness has to do with the fulfillment of the demands of relationships, whether with other people or with God. It is also clear that we fail in these relationships. This being so, what approach does OT religion have in the face of the absolute demands and the insufficient responses? The burden of the OT message, and this fits exactly into the NT development, is that righteousness must be considered in ways other than absolute

obedience. Though human righteousness fails, God's endures. This is the meaning of mercy, steadfast love, or the "grace" of the Christian message. In spite of the sinner's failures, the righteous God is as Isaiah described him, "a righteous God and a Savior" (Isa. 45:21). God intervenes on behalf of his own to save them from the disintegrating effects of SIN, forgiving their sin and justifying them before himself and before all the world.

The connection of all this with the NT message is quite obvious: "While we were still sinners, Christ died for us" (Rom. 5:8). The movement of the Scriptures is all the way from the revelation of a God who stands for the right, through the OT where he battles for the right, to the climactic revelation of a God who receives in himself the heaviest shocks of the battle against evil. *Christus Victor* (the great title of G. Aulén's book on the atonement) means that God himself entered into the lists until the victory was won. "God was reconciling the world to himself in Christ" (2 Cor. 5:19). The NT problem for Paul in the crucial verses in Romans (Rom. 3:25 – 26) is how God may be "just and the one who justifies." One must recognize that this process already begins by way of OT COVENANTS.

The OT may well be looked upon as a series of fresh starts. A righteous God does not give up on his wayward people. There was a covenant with ADAM having to do with absolute obedience. The turning point is reached with ABRAHAM, for in Gen. 12:1 – 3 there begins a series of covenants by the God and Father of the faithful. God drew near also to ISAAC, and he set up agreements with a man called JACOB, whom normally one would not have thought of as even the object of God's concern. Yet Jacob became Israel, the father of the Jewish nation, prince of God. Under MOSES, God came with the law; he came to DAVID; and gloriously he spoke to the Hebrews, and through them to the world, in the great prophets of the 8th cent. B.C. and following.

Grace is rightly defined as the "unmerited favor of God." There would be no OT story apart from the initiative of God's unmerited favor. Even after Adam's first sin, God came seeking when Adam was hiding. This is the plot of the Scriptures. The "Hound of Heaven" never leaves off his pursuit; "in these last days he has spoken to us by his Son" (Heb. 1:2).

What is clearly evident is that in spite of what must be said about God's absolute holiness and righteousness, both in essence and in his inability even to look upon sin or to touch the untouchable, the OT is already insisting that the righteousness of God, however pure, moves constantly in love toward the sinner. Note the NT development: "God made him who had no sin to be sin for us." God's righteousness in the OT is his own fulfillment of the demands of a relationship which, if one may speak in human terms, he himself simply cannot drop. Out of this idea there is evident throughout the whole of the OT that what appears in God as a responsibility because of a relationship may also become the mark of a person's righteousness. Our sin may despoil our relationship to God, but we may also sin in our irresponsibility toward other relationships. If one could read this background, it would be clear that, for the Jew, God's righteousness is not so much a matter of purity, although this is never minimized, as it is his refusal ever to let go of his responsibility. "O Love that wilt not let me go." We are to practice the same kind of righteousness.

Each person is set within a multitude of relationships: king with people, judge with complainant, priests with worshipers, common people with their families, tribesman with community, community with resident alien and poor, and all with God. Righteousness is the fulfillment of the specific demands of the specific relationships. An excellent illustration of all this appears in the life of DAVID, a "man after [God's] own heart," who was "righteous" because he refused to slay SAUL, with whom he stood in a covenant relation (1 Sam. 13:14; 24:17; 26:23), and he condemned those who murdered ISH-BOSHETH (2 Sam. 4:11). After the downfall of Saul's house, MEPHIBOSHETH had no right to expect kindness from King David (19:28). The demands of righteousness change with the relationship.

David's righteousness is illustrated by his refusal to kill King Saul when he had the opportunity to do so near the oasis of En Gedi. (View looking W from the shores of the Dead Sea.)

As in Jewish literature, the "Wise Man" was the one who could best see life from God's viewpoint (cf. Spinoza: *sub specie aeternitatis*), so the righteous person was the one who best understood and preserved God's relationships. The book of JOB is usually considered to be WISDOM Literature. It is also, if one may use the term, "righteous" literature. In defending himself, Job defended the OT view of the righteous in their relationships with God: "I was eyes to the blind / and feet to the lame. / I was a father to the needy; / I took up the case of the stranger. / I broke the fangs of the wicked / and snatched the victims from their teeth" (Job 29:15 – 17; cf. also 31:13 – 23). The book of Proverbs also reflects the righteous in their communal relationships (Prov. 10:7; 11:10; 12:10; 14:34; 16:8; 21:26; 23:24; 29:7; 31:9; et al.).

In the wider contexts, what is demanded of the private citizen is the requirement of king and judge. In Western law, the emphasis is on forensic justice in which there is an impartial decision for the two parties based on some legal standard. For the judge in Israel, righteousness is more the fulfillment of the demands of the community for balance and harmony. The judge wishes to restore the righteousness of the community, and in some cases may therefore give one of the parties not his due, but his overdue. Righteous judgments are protective and restoring. This helps to give an

understanding of the outcries of the prophets, especially in behalf of the disinherited and the downtrodden. An illustration in modern society would be the "righteousness" of programs in which the disinherited are given schooling according to their need, not according to their "right." The principle of "separate but equal" in this approach to righteousness cannot restore equality until something has been done about centuries of inequality.

One of the most interesting creations of the OT economy is the SABBATICAL YEAR , coupled with the JUBILEE YEAR. The sabbatical year may be interpreted as a means of conservation for the land similar to the modern ideas of rotation of crops. Nevertheless, as the land lay fallow during the sabbatical year, the poor had certain rights on the land. The Year of Jubilee, however, was more to the point. After seven sabbaticals, for a total of forty-nine years, the fiftieth year was then declared a Year of Jubilee, in which all lands returned to their original family holdings, and everyone had a fresh start.

One could hear it argued vociferously in contemporary America that this is unjust, unfair, and that people and their descendants ought to "get what's coming to them." According to OT concepts of justice, "what's coming to them" is a fresh opportunity, in spite of the mistakes, bad investments, and poor judgment of their parents in the use of the family inheritance. Even those sold into slavery for indebtedness were set free. No family (and this is the communal emphasis again) can be totally and finally disinherited. That this system did not work very well in ancient Israel is an illustration of human selfishness and covetousness, but the prophets cried constantly for restoration of the inheritance, making it plain what was considered righteousness in OT law. The social sensitivity of the OT prophets (esp. Amos and Isaiah) is as plain as any emphasis on personal salvation in relation to God's holy demands. How far this idea of righteousness can be removed from what is generally thought of as being "religious" is illustrated by the unhappy story of JUDAH and TAMAR, where the whole concept of righteousness is plainly related to the use and misuse of proper family relationships (Gen. 38).

What is true of the judge is true also of the king. It was his responsibility to establish a kingdom of righteousness, and the emphasis is not on forensic righteousness but on communal cohesion and stability. Psalm 72 is a picture of peace and prosperity established by a king who judges righteously. The appeal of Jeremiah is that Jehoiakim is king for justice and righteousness (cf. Jer. 22:3, 15). Significantly, prophetic passages concerning the MESSIAH speak of a kingdom in which there shall be righteousness and peace, and where the king shall establish the kingdom against all enemies. (Cf. Isa. 9:7; 11:3; 16:5; 32:1 – 8; Jer. 23:5, 6; 33:14 – 16.)

What is true of citizens, judges, and kings reflects what must be true of the righteousness of God. The covenant relationship is prior to law. Much is made by Paul in the NT of the fact that the faith of Abraham preceded the law of Moses. Abraham was chosen of God, not because of his righteousness —surely he was a sinner like any other person—but because God chose to establish a people through him by which he could bring his saving power to bear upon all. Abraham "believed the LORD, and he credited it to him as righteousness" (Gen. 15:6). By the same token, Habakkuk established the commanding principle of Pauline and Reformation theology with his dictum, "the righteous will live by his faith" (Hab. 2:4).

Thus the righteous God, with no one to deal with except sinners, draws near with his covenant promises, initiates the process by which sinners may be brought into a saving relationship, sustains them in this relationship by his power and not theirs, and forgives and restores those who by faith accept these promises and return in repentance when they have broken the covenant. It is not what people are, but what they may become as God holds them and as they respond, which makes the

covenant possible. It is not a question of their attainments or perfections, it is a question of a saving relationship provided for by a merciful, infinitely patient God.

What began with Abraham in Mesopotamia was established again in Egypt, and the psalmists never tired of telling what God did "with a mighty hand," with a people lost in helplessness and even ignorant of their own religious inheritance. "You yourselves have seen what I did to Egypt, and how I carried you on eagles' wings and brought you to myself. Now if you obey me fully and keep my covenant, then out of all nations you will be my treasured possession. Although the whole earth is mine, you will be for me a kingdom of priests and a holy nation" (Exod. 19:4 – 6). Notice God's initiatory act, even against all human expectancies; and notice, too, the future reference, not to what they are but to what they are to become. Israel could suffer the wrath of God, but they could not fall out of his hands. As H. H. Farmer once put it, "We may sin ourselves into the wrath of God, but we cannot sin ourselves out of the love of God" (cf. Ps. 89:28 – 37, esp. vv. 32 – 33).

What, then, is the function of the law in a covenant relationship of grace? It is to set the norm, establish the right, speak a word of judgment on anything less than the best, and lead one to the almighty God who can enable one increasingly to fulfill the requirements of holiness. The law has no power in itself to make a good life. It establishes what the good life ought to be and may be by the power of God. One further truth: the law (which Paul says "was put in charge to lead us to Christ," Gal. 3:24) is the guide for those within the covenant. Only inside the covenant do individuals really care what response they shall make to the God who has called them to be his children.

To the OT Jew, then, the law is a part of the whole gift of grace. Hear the psalmist sing: "The law of the LORD is perfect, / reviving the soul…The commands of the LORD are radiant, / giving light to the eyes…The ordinances of the LORD are sure / and altogether righteous. / They are more precious than gold, / than much pure gold; / they are sweeter than honey, / than honey from the comb" (Ps. 19:7 – 10). Apparently, for the Jew, although the law was binding, it was far from oppressive. On the contrary, how happy he was that his God had made plain to him how to live a life of stability and satisfaction.

One other help in the understanding of this whole covenant relationship is to see how God acted in behalf of his people against their enemies. From the vantage point of the Christian era it is hard to discern the viewpoint of the chosen people as against "the other nations," the GENTILES. It looks narrow and provincial now, but from the OT viewpoint it makes good sense. How else could God who has entered into his covenant act expect to protect his own from "the others"? This would be expected of the father of a family, of a king, and surely of a person's God. Perhaps the Hebrews missed some points that one can see now from a perspective they did not have. For one thing, they were chosen of God, not because they were something special, but in order that they might become the channel of something special. God said to Abraham, "I will bless you…so that you will be a blessing" (Gen. 12:2 NRSV). The Jews lost their way when they thought the blessing ended with them.

There was not one iota of selfishness in one's being chosen of God. The NT concept of ELECTION has in it the same danger unless it is seen that one is "elected" as an agent of God toward others. For another thing, the channel of blessing was to be universal, not narrow. Perhaps God's great protection of the Jew, which seems to be narrow and provincial, is offensive because of the fact that people do not understand the problem and so they make the same mistake that the Jew made—they consider election an end in itself. God had to start somewhere, he had to choose someone; he had at all costs to protect his investment in his plan of salvation. That only a REMNANT remained as a channel for his blessing is indicative of the high cost of this whole process, even in the OT. The Gentiles had to be

left out at the outset, but most of the Jews had to be left out, too, before some of them were fit channels for a salvation that has to come to all. The servant of God in the covenant eventually had to become the suffering servant, and yet, in the whole process, the absolutely holy God, for love's sake, was working out a way by which sinners would become "heirs of God." What is difficult to see in the OT is not necessarily easier to see in the NT. Israel, the suffering servant, is replaced by *the* Suffering Servant, who in perfect obedience "fulfilled all righteousness." It is the burden of Paul's approach to Christianity to reveal how this was done. See SERVANT OF THE LORD.

II. Righteousness in the NT. It is an assumption of all NT studies that the epistles of PAUL chronologically preceded the records of the four GOSPELS. As the CANON OF THE NT appears in our hands, however, the Gospels precede the other writings, and this of course makes its own good sense, because the life and teachings of Christ preceded the explanations and commentaries of the other documents in the treatment of righteousness.

A. The idea in the Gospels. Our understanding of righteousness in the NT comes primarily out of the writings of Paul rather than from the Gospels. As R. W. Dale so nicely put it, "Christ did not come to preach the gospel; he came that there might be a gospel to preach." It is true that he came "to fulfill all righteousness" (Matt. 3:15), but what he had to say on the subject specifically does not begin to touch the full explication which appears in the Pauline letters. He was not a theology, he was a person. The theology followed the exhibition of righteousness in his person. With this in mind, therefore, the expectancy regarding righteousness in the Gospels, at least insofar as Jesus taught on the subject, is not great.

The term *righteous* is used in the Gospels to mean a "pious" person, or a "religious" person, or one regarding whom, in a popular sense, it might be said that he lived a "good" life. JOSEPH was called a "righteous" man, and this was the reason he would not turn Mary over to the authorities when she was found to be pregnant. Strict construction of Jewish law would have demanded that Mary be stoned to death, but Joseph, being "righteous," planned to put her away out of sight (Matt. 1:19). He was evading the demands of the law and refused to make out of his betrothed a public spectacle. As a just man, he would be, in the terminology of our day, a kind or sensitive man.

In a stricter sense the Pharisees made an appearance of "righteousness" (Matt. 23:28), and surely in such passages the idea is that of formal righteousness in keeping the meticulous requirements of the Jewish law. ABEL was regarded as righteous (23:35); the heroes of the past were righteous (23:29); and the promise of the messianic kingdom was that the righteous would in due time enter it (13:43 – 49; 25:37 – 46). Popular usage makes it impossible to draw out any sharp distinction or definition. The situation is akin to Jesus' strange answer to the rich young ruler: "Why do you call me good?…No one is good—except God alone" (Lk. 18:19). This was not Jesus' denial of his own goodness, but a concern that the rich young ruler should use the term in a strict rather than in a popular sense. The whole burden of their exchange had to do with real goodness, and Jesus was insisting that the word *good* applied to God alone and that he and the young ruler, if they were to talk about goodness at all, should talk about it in the absolute sense. Thus the Gospels reflect the popular use of the word *righteous* even though in careful conversation one could insist that only God is righteous.

Much the same sort of popular usage is reflected in the other Gospels. Neither Mark nor Luke records any new statement of Christ containing the term *righteousness*. Mark's use of the term (Mk. 2:17) is parallel to Matthew's usage (Matt. 9:13) and adds nothing to one's understanding of it (cf. also Lk. 5:32 with Matt. 9:13). The description of Christ by the centurion as "a righteous man" (Lk.

23:47), and the statement that Joseph of Arimathea was "a good and righteous man" (23:50 NRSV) add nothing to the clarification of this term, for these are all popular usages.

Such data as appear in the teachings of Jesus occur seven times in the first gospel, twice in the fourth gospel, and no more (Matt. 3:15; 5:6, 10, 20; 6:1 [piety], 33; 21:32; Jn. 16:8, 10). The passages in Matthew give some variety to the interpretations of righteousness, although those in the SERMON ON THE MOUNT show a basic similarity. The two references to JOHN THE BAPTIST (Matt. 3:15; 21:32) raise the general question of the practice of righteousness under the impetus of Levitical law. In the first instance occurs the rather puzzling answer of Jesus when JOHN THE BAPTIST hesitated to baptize him. John recognized in every way his inferiority to Jesus; he never went beyond the bounds of the forerunner. He saw the difference between his BAPTISM and that of the Lord, and indeed, part of his message was the infinite distance that separated him and his ministry from that of Christ. He said to Jesus, "I need to be baptized by you" (3:14), thinking surely of baptism as a sign of REPENTANCE. John needed the baptism of repentance as all sinners do, and the difference was that Jesus did not. In answer to John's demurrer Jesus answered, "Let it be so now; it is proper for us to do this to fulfill all righteousness" (3:15).

Assuming then that Jesus did not need the baptism of repentance, the question before all commentators, therefore, is what righteousness, or what kind of righteousness, was to be fulfilled in this act? It is well to remember, as Paul expressed it, that Jesus was "born of a woman, born under the law" (Gal. 4:4). He was circumcised the eighth day; an offering was made for him in the temple according to Jewish custom; and at the age of twelve, on his trip to Jerusalem, he became "a son of the law" (*bar mitzvah*). He grew up in a normal Jewish home, obedient to his parents. According to Levitical customs, any man going into the service of God was subjected to baptismal rites. It seems the best interpretation, therefore, that righteousness refers simply to a continuance of Jesus' obedience to the laws of his people, both civil and canonical. The meaning generally given is that John's baptism of Jesus was "to fulfill every righteous ordinance."

This interpretation is supported by the other reference to John the Baptist in Matthew, where Jesus was engaged in conflict with his enemies, and as he sometimes did, he was forcing his opponents to consider their reaction to him in terms of their reaction to John, "For John came to you to show you the way of righteousness, and you did not believe him, but the tax collectors and the prostitutes did" (Matt. 21:32). He is here concluding the thrust of his parable of the two sons, the better of whom said he would not do the will of his father, but nevertheless did it. For the purposes of interpretation one need not dwell on the parable, but what does "the way of righteousness" here mean? Again it is to be interpreted as a continuity from OT law and custom. John was, in some sense, the last of the OT prophets, and his "way of righteousness" concluding the OT dispensation was at the threshold of the new righteousness, which was to come in Christ in the new dispensation.

Remains of the Byzantine Church of John the Baptist in Samaria (Sebaste) where, according to tradition, John's body was buried. Jesus said that John had come "to show…the way of righteousness" (Matt. 21:32).

Turn to the passages in the SERMON ON THE MOUNT. Three of these may be construed as having to do with the righteousness of God—absolute, essential righteousness, ideal and perfect righteousness (Matt. 5:6, 10; 6:33). There are those who hunger and thirst for righteousness (5:6) and are persecuted for their righteousness (5:10) but who are, nevertheless, to continue to seek the Father's kingdom and his righteousness (6:33). The first of these, "Blessed are those who hunger and thirst for righteousness, for they will be filled" (5:6), is paralleled by another BEATITUDE: "Blessed are the pure in heart, for they will see God" (5:8). Kierkegaard's insight is helpful when he suggests that to be "pure in heart" is to will *one thing*—namely the will of God. A person's eye is to be "single" and not "evil." Jesus described his own "meat and drink" as doing the will of his Father. When, therefore, he said that there is satisfaction for those who "hunger and thirst for righteousness," he was not speaking of attainment or victory, but of the set of the life.

True satisfaction comes in the constant vision and in the direction in which a person is moving. The whole inclination of one's life is described as a hunger and a thirst; and yet, strangely, this very constancy of hunger and thirst is its own satisfaction. Literature is replete with illustrations of some variation of the search for the Holy Grail. Apparently there is no greater description of a worthy and satisfying venture than that of a continuing searching-and-finding. How interesting it is that the Promised Land for the Israelites was set before them as a land "flowing with milk and honey." Honey by itself cloys and satiates. Milk clears the taste. A promised land is one in which the endless delights are constantly opened up again to greater delights. The hungering and the thirsting continues even while one is being filled. "A man's reach should exceed his grasp, or what's a heaven for?" (R. Browning, *Andrea del Sarto*, line 97).

As is truly the case, the seekers after righteousness are the objects of PERSECUTION in every generation. Consequently, Jesus' word is pertinent: "Blessed are those who are persecuted because of righteousness" (Matt. 5:10). Indeed, "great is your reward in heaven, for in the same way they persecuted the prophets who were before you" (5:12). Those who hunger and thirst for righteousness may be persecuted for this strange difference in their lives; yet they find themselves in the great

company of those who constantly held out for a better day—"the prophets who were before you."

In the great passages on anxiety (Matt. 6:25 – 34), Jesus draws the line between those who are anxious about many things ("What shall we eat?…What shall we drink?…What shall we wear?" [v. 31]) and those who accept the necessity of such things, but are concerned for greater needs. "Seek first," he says, "his kingdom and his righteousness, and all these things will be given to you as well" (6:33). Jesus is not denying the necessity of "these things." What he knows is that unless the foundations are established in righteousness, the "things" also will disappear. All materialistic societies fall away to the dust heaps of history when they play fast and loose with the foundations of righteousness. In this verse (6:33) righteousness means the will of God brought to bear on the affairs of life. This was the ideal of the OT theocracy, which never quite matured. Jesus again was speaking of the righteousness of God. Throughout these three passages, therefore (5:6, 10; 6:33), the absolute righteousness of God, with which the OT begins, is confirmed.

In two other passages in Matthew the old question of formal righteousness is again raised. Significantly, Jesus not only speaks of this righteousness but also illustrates it; and in his illustration he makes out of the whole subject of righteousness an "openended" possibility. "For I tell you that unless your righteousness surpasses that of the Pharisees and the teachers of the law, you will certainly not enter the kingdom of heaven" (Matt. 5:20). As is well known, the SCRIBES, and especially the PHARISEES, were experts in religious disciplines. The scribal movement arose after the return of the Jews from EXILE. By that time in their history the Jews had nothing to recommend them except their religion. They had no political power, no military might, no economic significance. Caught in the midst of tremendous world powers, and existing only as a remnant, their contribution to history was to be a religion through which salvation would come to all people. But this religion had to be hedged about, and the scribes arose as a class to protect in the strictest possible ways the *differentia* of their faith. At this stage they were a necessary disciplinary force, but by the time of Jesus their concern for the minutiae of JUDAISM had almost made a mockery out of their religion. The "burden" of the law (Acts 15:28) could not possibly be borne by the ordinary man in his daily walk. These experts, therefore, not only satisfied what they considered to be all the demands of the law, but by such exercises they often satisfied themselves, and some finally took cold hard pride in their attainments.

Jesus' contribution at this point on the subject of righteousness was to move from the form of the law to its spiritual content. The question now became not so much a matter of action as of motive, the one great commandment being to LOVE God and to love one's neighbor as oneself. Only thus could the righteousness of Jesus' followers exceed "that of the Pharisees and the teachers of the law." In the Sermon on the Mount Jesus illustrated how this should be so. It is not a question of murder so much as a question of anger in the heart. It is not so much adultery as the eye of lust. The framework of the law must abide insofar as it is God's law, but one is not "righteous" in Jesus' way of thinking unless his motives rest in love.

A turn on this same approach is illustrated in the next chapter of Matthew. "Be careful not to do your 'acts of righteousness' in front of others, to be seen by them" (Matt. 6:1 TNIV). Jesus accepted the so-called "exercises" of religion—almsgiving, prayer, fasting. He assumed that a religious person will engage in such practices. But T. S. Elliott says it well in *Murder in the Cathedral* when he writes, "a Pharisee is a man who does the right thing for the wrong reason." Again it is a question of motive, and Jesus criticized harshly those who perform their religious exercises to be seen of others.

When the move is made to John's gospel the theological climate changes. Matthew's gospel was aimed at the Jew with all the background assumptions of centuries of Judaism. The "most theological

of the Gospels," namely John's, includes only two verses—actually only one record—of Jesus speaking of righteousness. In his farewell discourses Jesus was speaking of the deepest things of the Christian faith, and in the sixteenth chapter there is a very different and a very involved discussion of the person and the action of the HOLY SPIRIT. It is impossible to treat the subject of the Holy Spirit with any completeness at all in this context, so it must be limited to straightforward statements without support or commentary.

From the best available evidence, therefore, one may conclude that when Jesus says that the Holy Spirit "will convict the world of guilt in regard to sin and righteousness and judgment:…in regard to righteousness, because I go to the Father…" (Jn. 16:8, 10), he is looking forward from this quiet meeting to what surely must appear later in the instructive writings of the apostles as they are recorded in the remainder of the NT. It is surely evident that what Jesus was and what he did, and what is yet to transpire because of the living Christ, were nothing but questions and doubts to the disciples on the eve of the crucifixion. The function of the Holy Spirit was to inspire truthfully what the apostles must say regarding the fact and the meaning of Christ. Righteousness, therefore, in these two verses, is the complete righteousness of God, completely portrayed in the life and teachings of Jesus, which the apostles came to understand and which they shared with mankind.

The word *righteous* is used elsewhere in John's gospel three times but not as Jesus' own teaching: as a description of Christ's righteous judgment (Jn. 5:30), as a description of human judgment (7:24), and as a description of God the Father (17:25). These usages do not concern the argument at this point because in one form or another they have already come under discussion. The next crucial question, in regard to the whole subject of righteousness is what the apostles, especially Paul, would do with the absolute righteousness of God, the portrayal of that righteousness in Christ, the failure of the righteousness of human beings, and the whole question of how unrighteous people may stand in the presence of the righteous God.

B. The crucial treatment in Paul. The key to Paul's view of righteousness, as it is basic to an understanding of the whole gospel of Christ, is found in his major treatise, the letter to the ROMANS. There is no question but that Paul studied closely the structure and content of this masterpiece. It is here, if anywhere, that we have his "theology," and with the possible exception of EPHESIANS, it is the finest creation of this first mind of the first century.

The theme of Romans is "Righteousness." After his usual formal introduction, and in Romans this is well structured and quite extensive, he announces his thesis: "I am not ashamed of the gospel, because it is the power of God for the salvation of everyone who believes: first for the Jew, then for the Gentile. For in the gospel a righteousness from God is revealed, a righteousness that is by faith from first to last, just as it is written: 'The righteous will live by faith'" (Rom. 1:16 – 17, citing Hab. 2:4). The fundamental problem in this thesis is what Paul called "a righteousness of God" (*dikaiosynē theou*). The question of interpretation is concerned with the genitive *theou*, for the form allows three possible interpretations.

First, it may be taken as a simple possessive, a common use of the genitive. In this usage it would refer to an attribute of God's own character. This reverts to the beginning of this discussion, which concerned the very essence of God. The righteousness of God is a part of him, an essential of his nature. There is no question that the Greek form used allows for this interpretation, and whatever other meaning one brings to bear on it, this view cannot be ruled out. The whole discussion of righteousness in the OT and in the Gospels has either emphasized or assumed this approach as the ground of any understanding of the word.

Second, the "righteousness of God" may carry the secondary meaning discussed above (I.B). It is that righteousness of God which shows itself in his relationships to his covenant people, in which righteousness is self-imparting rather than distributive. By this is meant throughout the discussion that whereas righteousness might require some bill of rights and wrongs in judgment, some expression of LEX TALIONIS (the law of retaliation), or even some display of the wrath of God in punishment, the enthusiasm of the Jew for the righteousness of God rested in the covenant relationship God had initiated. In this they thought of his righteousness as supporting his own people—what a king would be expected to do. In the OT, generally, it is understood that when a king judged, he did so to preserve and enhance the life of the whole community, and thereby make possible a better life for the individual. He is conceived of as helping people to their rights. His righteousness was an overflow rather than a balance, just as one would expect to do something extra for a person with a broken leg on a safari.

In the Psalms and Isaiah, the people of God are vindicated by God, who shows his righteousness by delivering them from their enemies. Inside the community of Israel, the righteousness of God is on the side of the poor rather than the rich, the weak rather than the strong. His righteousness is thus manifested not only to his own people but to the nations, and one of the great appeals of the prophets was that God's glory is known to the nations because in righteousness he established his own people (Pss. 35:24, 28; 51:14; 71:2 – 6, 24; Isa. 51:5; 54:17; 56:1).

It is quite evident that this kind of righteousness is communal rather than individual. The OT, while insisting that the "people of God" are supported by God's righteousness, also makes very clear that individuals within the community may very well experience a sense of sin and the threat of the righteous judgment of God. An interesting example of this combination of national righteousness and individual sin appears in Ps. 143:1 – 2. It is evident in this communal use of the idea of righteousness that God's nation can be justified, but if the sinful individual who cannot face God's judgment is to be justified, the process must be different. National and individual sins and successes seem to be sorted out in the OT.

Third, Paul's understanding of "righteousness" is crucial. Paul's preaching of the gospel in the context of the primitive church cannot possibly be a message to a national group such as that seen in the nation of Israel. God is not rescuing his oppressed people in any communal sense; he is preaching to individual sinners, Jews and Gentiles alike, whose only community is their common need of salvation. His message, therefore, must make clear that the altogether righteous God, who cannot act against his own nature, must somehow remain righteous while at the same time accepting the unrighteous. As Paul classically expresses it, the purpose of the gospel was "to demonstrate his justice at the present time, so as to be just and the one who justifies [declares to be righteous] those who have faith in Jesus" (Rom. 3:26).

After announcing the theme of the righteousness of God (Rom. 1:17), Paul took great pains to show that no human righteousness has worked nor will work. He illustrated this truth first from the pagan world, where he allowed for "natural theology." He put it this way: "For since the creation of the world God's invisible qualities—his eternal power and divine nature—have been clearly seen, being understood from what has been made" (1:20). The pagan world, therefore, is "without excuse," because the natural world, the created world, is a revelation of the power and deity of God. People everywhere, however, have stopped short with the created world and have worshiped the creation rather than the Creator, and this, in whatever form it takes, is IDOLATRY. It follows, therefore, that men and women practicing idolatry have in the worship of things constantly demeaned themselves by worshiping what is lower even than a human being. It is the sort of thing that can happen now when a

person stops with the symbols of his faith—bread, wine, beauty, a holy place—and forgets the reality which is symbolized. An observer may stop with the technique of a painting, or even its beauty, whereas the height of the esthetic experience should be to have spirit meet spirit with the artist himself. The remainder of Paul's declaration of pagan disintegration vividly portrays in the background of Roman culture how idolatry eventually goes through perversion to decay.

Paul then took up the failure of the Jews who have had the gift of greater light. "What advantage, then, is there in being a Jew, or what value is there in circumcision? Much in every way! First of all, they have been entrusted with the very words of God" (Rom. 3:1 – 2; cf. 2:17 – 29). The Jews' highest claim has been that they have received a revelation of God, especially through the Torah. Knowing the law, however, they have failed to keep the law. Paul quoted their own psalmists against them. "There is no one righteous, not even one; / there is no one who understands, / no one who seeks God. / All have turned away, / they have together become worthless; / there is no one who does good, / not even one" (3:10 – 12; cf. Pss. 14:1 – 2; 53:1 – 2). Paul's summation is clear enough; he is referring to both pagan and Jew (from the Jewish viewpoint: the "outsider" and the "insider") and says that "no one will be declared righteous in [God's] sight by observing the law" (Rom. 3:20). Or again, "There is no difference, for all have sinned and fall short of the glory of God" (vv. 22 – 23). And since he has already said in the announcement of his theme that "the wrath of God is being revealed from heaven against all the godlessness and wickedness of men" (1:18), the human condition in the presence of a holy, righteous God is hopeless. It is only with this hopelessness established that Paul was ready to present the good news.

If one may assume then that whatever righteousness a person has is a gift of God, then one is forced to face the question of how God's righteousness becomes a person's righteousness; in addition, it is necessary to portray how such righteousness shows itself in the life of individuals, and perhaps also in their society. Paul, in writing of righteousness in Romans, says first of all that a righteousness of God has been revealed through faith for faith (Rom. 1:17); he then goes on to say that this righteousness of God is the righteousness of Christ, who has been set forth as a PROPITIATION for sin, and that the right attainment of the righteousness of Christ is dependent upon faith (3:26). What, therefore, actually transpires?

From God's standpoint the simple, yet profound problem is how God may be "just and the justifier," or in other words, how his holiness may be kept inviolate while he is engaged in accepting a person who is unholy. By the very essence of his nature, his WRATH is against all unrighteousness (Rom. 1:18). He cannot "look upon," let alone participate, in sin (cf. Hab. 1:13 NRSV). His solution, then, is to set forth Christ who in human flesh "fulfills all righteousness." It is awkward for modern theology to accept the language and sometimes the crude mechanisms of medieval theories of ATONEMENT; yet, whatever the language, the truths involved must not be lost—vicarious ATONEMENT, RANSOM, and the like must be preserved.

Christ took on humanity, human nature. In human flesh he lived without sin, so that it can be said that if one human being was ever sinless, then at one point in history human nature was sinless. In perfect obedience a life was lived in which human nature was untainted. What is difficult is to understand the nature of *humanity* as against individual human beings. Perhaps a simple illustration will help. When fifty people are in a room there are fifty human beings, and there surely is humanity. If fifty more people are brought into the room there are more human beings, but not necessarily more humanity. This becomes clear when everyone is put out of the room except one person. Although there is now only one human being, there is nevertheless complete "humanity" in that one person. This is the kind of concept that is recognized in a word like *love*. It represents the kind of reality that can

neither be divided nor multiplied. A woman who has twelve children does not love each child one-twelfth; nor does a woman with twelve children necessarily have more love than a woman with six. Such ideas as humanity and love will not subject themselves to multiplication and division. We repeat, therefore, that "humanity," as it appears in Jesus, is pure, sinless, and an example of perfect obedience.

Following the thinking of Anselm, there is set forth in the sacrifice of Christ on the cross the death of the God-man. Because of his identity as God, this sacrifice is of infinite value; because of his identity as man, it is the death of an innocent person. The perfect humanity of Christ thus blocks off the necessary judgment of God against the humanity of other men and women, and at the same time an infinite price is being paid for what Anselm considered an infinite sin, that is, sin against God. The limitations of human language are inescapable, but several things are said very clearly: Christ did for human beings what they could not do for themselves. With his perfections he offered up a perfect humanity. He died in our stead. Whatever was accomplished satisfied the infinite demands of the holiness of God. There are those for whom this description satisfies; as Paul says in Romans, "Christ was a propitiation" for sin. In other words, the death of Christ "satisfied" God. A ransom was paid, or as Denney so nicely suggests, the satisfaction of God's holiness released his love.

But there is more. "God was reconciling the world to himself in Christ" (2 Cor. 5:19). This carries thought into the structure of the TRINITY, which happily is not the problem here. It is not likely that anyone will completely unravel what transpired in the Godhead; but this much must be maintained: whatever price Jesus was paying on the cross was paid by God himself. One cannot contrast a loving Jesus with a wrathful Father. Even if this were the solution, any father worthy of the name would necessarily suffer in the suffering of his son. But this split in the Godhead is not at all necessary. "God *was in* Christ." The agonies of the cross are a revelation of the heart of God, and they reveal that God, who makes the demands of holiness, in the last analysis pays those demands for those incapable of making the payment themselves. Therefore, the law of God is established, and the love of God finds its fullest expression in the one offering. Thus the cross becomes the symbol of the Christian faith in exhibiting what sin really is from God's viewpoint, and what God is willing to do about it for his lost creation. In this one event God is surely "just and the justifier." He maintains the demands of his law and justifies the sinner because he himself has paid the price to maintain the law. See further JUSTIFICATION.

Now comes the question of the application of this righteousness. God has dealt with sin for its complete removal, and this is all of grace. The Lamb "was slain from the creation of the world" (Rev. 13:8). God in his almighty holiness and everlasting love has made provision for opening up the way of salvation. It is a way in which God gets the sinner right with God himself; he justifies him. From the human viewpoint, we lay hold on this offered salvation by faith. The word FAITH is maligned, misunderstood, limited, and yet Paul offers no other way except through the attainments of God's free gift through faith.

It is sometimes claimed that it is sufficient to think of the cross as the setting of a standard which we can imitate. The death of Christ is an "example" and those who would follow Christ (because they call themselves Christians) ought to follow his example. The climax of his exemplary life is complete self-giving all the way to death. As is said in three of the four Gospels reflecting the words of Jesus, "If anyone would come after me, he must deny himself and take up his cross and follow me" (Matt. 16:24 et al.). Such devotional literature as Thomas a Kempis's *Imitation of Christ* follows this idea. It must be maintained that such an idea is solid and true and has a certain saving force in a person's life. This is not to say, however, that this interpretation is sufficient. The righteousness of God, which

is to be our righteousness, does not come by imitation. More significantly, we are moved to imitate Christ because in some sense "the righteousness of God" has already been given to us.

One other very widespread interpretation of the cross is that which describes the crucifixion as an exhibition of God's amazing love. How can anyone, therefore, once he sees such love expressed in his behalf, fail to respond in newness of life? This sounds reasonable, but as George Adam Smith reflects in speaking of Hosea, "love stands defeated on some of the greatest battlefields of life." The candle that stays burning in the window gives no assurance that the prodigal will ever come home. A love that "will not let me go" will not necessarily save me. What is needed, therefore, is the gift of FAITH (and the NT surely says that even faith is a gift) which will enable a sinner to respond to the example and answer to the love. Just how does one go about this?

Faith means that one accepts Christ, and this in turn means accepting the fact that what he has done for mankind needed to be done. We are not simply repeating statements of faith; we are being totally converted in the happening of three things: (1) We accept God's view as our own on the true nature of our need. (2) We accept his solution to the problem. (3) We accept the fact (and this is where pride, the deadliest of the sins, is broken) that there is no hope at all in any of our own righteousness which we might wish to bring forward—and so we rest, or trust entirely, on the finished work of Christ. We have no negotiations to carry on, nothing to offer to the whole transaction except our sin; we do not argue our worthiness, and in the last analysis a Christian is one who accepts Christ as the Word (LOGOS) on all things. This is what had to be done; this is what was done; where do I will to stand in relationship to it? Thus a person believes and accepts. Whereas JUSTIFICATION is the act, SANCTIFICATION becomes the process as Jesus' pure humanity becomes a part of ours, increasingly. As John says, "the blood of Jesus, his Son, purifies us from all sin" (1 Jn. 1:7).
Jewish man praying at the Western Wall in Jerusalem. Prayer may be viewed as an "act of righteousness," but one that can be misused (Matt. 6:1, 5 – 6).

What, then, is righteousness in the Christian interpretation of the word? It is primarily and basically a relationship, never an attainment. It may be said of Jesus, but never of any other human being, "in him all righteousness dwelt." The condition of any and every person is always the same—

one of total dependence. Faith really means that sinners have no security except as they hold on, or better, are held on to. As John Oman expresses it, "It is not so much a question of the rung of the ladder which we occupy, but whether we are climbing or falling." Christian righteousness is never an attainment; it is a direction, a loyalty, a commitment, a hope—and only someday an arrival.

How beautifully this dismisses all pride, all Pharisaism, all judgmental accusations toward one's brothers. How beautifully this creates humanity, understanding, and in the right sense, meekness. How beautifully this says that righteousness is through faith for faith, or that the righteous shall live by faith.

III. Righteousness in the modern world. It is evident that throughout the Bible there is development in the concept of righteousness. This is not to say that one concept of righteousness was replaced by another or a better one; the growth is not of that sort. It is a matter of addition rather than correction.

In the beginning the idea of righteousness was rooted and grounded in the very nature of God. His essence, consciously or unconsciously, became the touchstone of every righteous act by human beings. At the same time it was clearly understood that the righteousness of God, with such corollaries as holiness and justice, constituted not only the proper ground of human action, but the very integrity of the physical universe and the material world.

It is easy to criticize, as many noted scholars do, the unusual ways in which the Hebrew Scriptures (e.g., the laws in the Pentateuch) seek to express the righteousness of God. The modern temptation is to make a claim that the expression of righteousness in the Bible is simply a reflection of cultural pressures. As must be said so many times in such a superficial analysis, there is no question that there was a cultural milieu out of which certain social practices did arise. But the point is missed if we do not understand that there was a fixed element at the basis of the variety of expression. For the Hebrews there was no doubt that the righteousness of God had been revealed in the Torah, that the righteousness of God was even revealed in the minutiae of the Levitical codes. It is impossible to understand both the OT and the NT apart from this deep concern to honor the righteousness of God by expressing it in daily living. It is this concern which is the fixed element in all the rich variety of expression that has followed in the Bible, in the life of the church, and, one may hope, in the unsettled ethical expressions of the present.

What came next in the growth of the Hebrew concept was the belief that God's righteousness included a certain covenant demand that could be made on God's people. The Hebrews belonged to Yahweh because he had chosen them and had initiated a covenant to "carry them through." For this reason he would protect them from their enemies, he would lead them into the good life, he would restore them after sin and repentance. If necessary (and it became necessary), he would save them, even if only through a remnant. The righteousness of God thus not only became the source of unchangeable holiness, but also gave rise to the need of a Savior and Redeemer.

By the time of Hosea and Isaiah, God the Savior and Redeemer is a Suffering Servant. Such a concept is a study in itself, but in this context it is an inescapable fact that the cross is already necessitated in the visions of the great prophets. Thus, in brief, the OT idea of righteousness has moved from a standard of conduct to a King who cares for his subjects, to a Savior who finally gave himself for their salvation.

In the NT it is Christ who is set forth as "the righteousness of God." What was once law has become a person. What was foreseen as a way of redemption is now illustrated in a redemptive life. The cross of Christ became the climax of a life that was always the way of the cross.

Paul then formally asserted what was latent in the OT and patent in the NT, that the righteousness

of God is now poured out through the life and death of Christ; first for the redemption of sinners and second as a source of newness of life in them. What started as a code of ethics based on the nature of God ultimately became a source of life and the power to grow into the very nature of God. Another code of ethics or another standard of righteousness could simply break the human heart in its constant failure; Christian righteousness is (and how often this is missed) a power more than a standard, a life more than a code, a loyalty and a saving relationship for everyday living.

A. The existential emphasis. The modern emphasis in the treatment of righteousness has been dominated by the rise of existentialism in philosophy. This approach focuses on the "moment of existence" in which a decision is made, emphasizing that any decision is determined by the stance of the person making the decision and the total situation in time in which the decision is made. In moral decision, for example, it is possible for two different people in what looks like the same situation to come up with what look like diametrically opposed decisions, and it is possible at the same time that each can be right. It is also possible for the same person to make a correct moral decision on one day and on the next day do just the opposite and still be morally right. This approach has sometimes been referred to as "situational ethics."

The classic example of this viewpoint grows out of the commandment "Thou shalt not kill" (more correctly translated "Thou shalt do no murder"). It is highly probable that an individual citizen would find no occasion where he could kill another citizen as a righteous act. The issue becomes a different kind of problem in warfare or in judicial action, especially when a servant of the state serves as the hangman or the man who pulls the lever for the electric chair. These questions are highly debatable, of course, but they are illustrative. With regard to the private citizen himself, he might justify as a righteous act the killing of someone for the defense of one of his children. What is conceivable, and what must be understood, is that general circumstances would never allow a person to kill for righteousness' sake, whereas particular occasions could arise where killing is the only righteous act.

Recalling now the absolute righteousness of the OT, which became colored in time by the social righteousness of the OT prophets, where the absolute demands of the law became a definite series of adjustments within the demands of a person's social relationships, one sees that such an existential approach can be biblical. Even more so the NT emphasis on a person's relationship to God as determinative of his righteousness brings one to this same approach. When there is added to this the idea of obedience in the daily walk; supreme loyalty to a living, dynamic, and personal Master; a recognition that no one completely fulfills the law; and that "all our righteous acts are like filthy rags" (Isa. 64:6), there is justification for those who find an existential approach a satisfactory one in their Christianity. Modern theology, as defined by Karl Barth and illustrated by Reinhold Niebuhr, has touched every facet of ethical decision. Barth's insistence that one should "walk by faith," and always in a "crisis" situation, and always with incompleteness in the positive righteous acts, is biblical, and certainly basic as far as it goes. Niebuhr's insistence that all are sinful and in a sinful society and therefore are never capable of absolute righteous judgments can also be easily established.

B. The abiding nature of law. The question therefore naturally arises whether or not the ethics that grow out of modern theology have destroyed any absolutes in righteousness. When it is remembered that the whole idea of righteousness in the Hebrew background grew out of the recognition of necessary obedience to an absolutely righteous God, it looks as if all that kind of righteousness has been badly clouded. Moral decisions are made, apparently, without any fixed point of reference, and

with an easy acceptance of the theory that any perfection in righteousness is impossible and therefore irrelevant. "Situational ethics" can lead, and often does lead, to ethical relativism. With such fears the critics of the "new theology" must deal.

The answer of modern theology is that there is one absolute—namely love. It follows, therefore, that in any existential situation where the issues are bound to be ambiguous, the fixed point is the absolute of love, and the apologists for this position are quick to point out that when love is spoken of as an absolute, it is defined by the love of God, which is revealed in Jesus Christ. This becomes the control, and it is argued that basically and finally, in such love, there is no relativism. The "righteousness of God" of which Paul wrote is revealed "through faith for faith," and the righteous do indeed "live by faith." In this relationship of faith, a person's first concern should be for the love of God, and a "righteous" decision is made on that basis alone.

The first thing that must be said is that, properly construed, it cannot be faulted. Anyone living under the direction of the power of the love of God will be "righteous" because of a right relationship to God showing itself in obedience—faith will be shown by works. Since the love of God, of which the Scripture speaks, is *agape* love, it will not run off into sentimentalism or emotionalism.

The other thing that must immediately be said, however, is that in spite of a simple absolute, there still remains the necessity for laws for control. Such laws relate to the law of Scripture and eventually, and certainly, to the Decalogue, and beyond that to the righteous essence of God. After all that has been said for existentialism, why is this true? Primarily for one reason: if moral action is based on the absolute of love, it is not yet evident that anyone knows enough or is morally equipped enough, free of prejudice and pressure, to recognize the answer of love in a decision and then to follow specifically the right that he or she sees. It can be assumed that an altogether righteous person would do nothing less than what absolute love would dictate, but how is a person to act short of such attainment in his moral life?

Paul wrote, "the law was put in charge to lead us to Christ" (Gal. 3:24). To follow his thinking, and to allow to situational ethics everything possible, there must be agreement that in Christ there is no longer the necessity for law, but that no one is in that perfect relationship and that, therefore, the law is his control until such time as he reaches perfection. The idealists, or the perfectionists, are right when they argue that traffic in cities would be no problem if people were only more thoughtful, more unselfish, kinder, in other words, if people were more nearly perfect or more "Christian." People being as they are, the only possible freedom in heavy traffic grows out of the control of the law. "The counsel of perfection" will not do in a sinful society, and the law takes God's people on the way toward a perfection and a maturity where the "schoolmaster" (KJV) has worked his way out of a job. The road to freedom is always by way of discipline. "If you hold to my teaching,…you will know the truth, and the truth will set you free" (Jn. 8:31 – 32).

IV. Righteousness in world religions. Not much is gained by a study of righteousness beyond the biblical presentation. All that can be said is that a survey of world religions brings to the fore the same emphases as the Bible does. Such general agreement points toward the Roman Catholic emphasis on natural theology and, of course, raises pressing questions for students of comparative religions. It is instructive that every facet of the subject of righteousness appears somewhere in some other religion. Perhaps the remark of Herbert H. Farmer of Cambridge University is germane: "The Christian religion brings to definition what is found in other religions, and it contains the totality of the best they have to offer." Those who support the Christian faith find fulfillment in Christ.

Judaism. Fundamentally, the Jews related righteousness to the Torah. A person was righteous

in proportion to his obedience and conformity. In the intertestamental period the Pharisees were in the ascendancy, and their meticulous obedience is reflected in the Gospels, where they are the objects of Jesus' fiercest invective. Unfortunately, Jesus' attack on the Pharisees is thought to apply equally to JUDAISM in its subsequent history. The popular Christian position condemns Judaism for its legalism. This is to be blind to the great development of Judaism following the beginning of the Christian era. Such an attitude is superficial when one takes seriously the great spirits who arose and even now appear in Judaism. Righteousness, according to the Jews, never lost its OT interpretation of righteousness in relationships. Righteousness always meant and still does mean for the Jew, not merely the following of the rigid letter of the law nor a ritual holiness tied down to a sacred scroll; more than most, the Jews were concerned with efforts toward self-sanctification. They were concerned with character and good living, but they never lost sight of equity as well as law, or of the mercy and long-suffering reflected in the Psalms that have given heart to Judaism in every generation. Righteousness in Judaism, from the Christian viewpoint, lacks only one thing; namely, the necessity of the righteousness of God imparted to us through faith in Christ.

Buddhism. Buddha is the "Savior" for Hinduism, and as such, offers the best way of salvation possible to that subtle and confused faith. If one begins with the wheel of life, in which a person is caught eternally; and if one believes in the transmigration of souls, by which the unfortunate human being keeps returning to life over and over again; and if one accepts life as miserable, as it is easy for a Hindu to do; and if one is never sure whether acts in this life are sufficient or proper enough to raise or lower one's entrance into life the next time around—what can be done to rescue such a person? Strange to Western ears is the salvation offered by Buddha, namely a careful discipline in this life, not to improve one's condition in the next life, but to assure his complete escape from the wheel of existence. Salvation means to be blotted out or to lose oneself in the vast ocean of being. Buddhism is basically a life-denying religion. The solution to life is to escape it, either by exercises in mysticism now or through a break from existence at death. Whereas Christianity says, "This is the victory that has overcome the world" (1 Jn. 5:4), Buddha would say, "This is the victory that *escapes* the world." Where, then, is the place for righteousness? Theoretically, at least, there is no place. Actually, and practically, Buddhism teaches that one must align himself with the order of the universe—that wrongdoing leads to punishment and right conduct leads to reward. Such teachings, however, are merely for the tyro in the faith or the unconverted person. For the mature Buddhist, works of righteousness have no meaning in the final renunciation of life.

Egyptian religion. It is not surprising that the Egyptian concept of righteousness is at least akin to that of the ancient Hebrews. Moses was educated in all the arts of the Egyptians at the time when they were a world power. There was in ancient Egyptian religion a keen appreciation of the final judgment based on righteousness, truth, and justice. The righteous person was one who lived according to truth and justice. More surprising was their great emphasis on generosity, kindness, deference to superiors, and hospitality. Perhaps the odd emphasis, although characteristic of Egyptian theology, was a whole series of demands with reference to the care of the dead. This is a striking difference in the Egyptian viewpoint which does not find its way into other religions, with the possible exception of Confucianism, which, however, is concerned more with ancestor worship than with the eternal felicity of the dead.

Islam. Righteousness is looked upon in the usual way: concern for one's character, honesty in human relationships, and a serious approach to one's own rights and the rights of others. These things are highly regarded in the lands dominated by the religion of Islam, but find very little place in their writings. Righteousness is tested out primarily in justice, and this justice is directed toward social

action. Two things characterize the Islamic approach: (1) Righteousness expressed in justice is a concern primarily toward those who are of the same tribe or religion; this reflects something of the early OT approach. (2) Questions of righteousness and justice have a way among the Muslims of becoming vaguely discolored by primary considerations for good manners, "white lies," or any action governed by the belief that the end justifies the means. At first glance, Islamic righteousness looks like the same rigorism of righteousness reflected by the Jew and his Torah, or the Christian Puritan and his Decalogue, but such considerations as hospitality can well work havoc with awkward and austere demands of the law. Generosity, chivalry, and heroism seem more important to the Muslim, especially where family and tribe cloud the issues, than the absolute demands of the law.

(See further J. Denney, *Studies in Theology* [1902], 109 – 24; A. H. Strong, *Systematic Theology*, 3 vols. [1907 – 09], 1:290 – 95; A. R. Gordon et al., *ERE*, 9:780 – 92; N. H. A. H. LEITCH

Righteousness, Teacher of. See DEAD SEA SCROLLS VI.

Rimmon (deity) rim'uhn (רִמּוֹן *H8235*, "pomegranate," possibly an alteration of Akk. *Rammānu*, "the thunderer"). An Aramean representation of HADAD, the god of storm, rain, and thunder. In SYRIA (ARAM) this god is called BAAL that is, the lord par excellence, and to the Assyrians he was known as Rammānu, "the thunderer." J. Gray noted: "The identity of Rimmon with Hadad…is confirmed by the fact that 'Hadad' occurs as an element in the theophoric name Ben-hadad borne by several kings of Syria, and Tabrimmon, the father of Ben-hadad, the contemporary of Asa of Judah" (*IDB*, 4:99). NAAMAN, the commander of the Aramean army, worshiped in the temple of this deity at DAMASCUS (2 Ki. 5:17 – 19). D. J. Wiseman concluded: "The temple [of Rimmon] was probably on the site in Damascus [subsequently] occupied by the Roman temple of Zeus, whose emblem, like Rimmon's, was a thunderbolt. The famous Umayyad mosque now stands there" (*NBD*, 1021). See also HADAD RIMMON.

B. H. WALTKE

Rimmon (person) rim'uhn (רִמּוֹן *H8233*, "pomegranate"). A Benjamite of BEEROTH whose two sons, BAANAH and RECAB, guerrilla captains, assassinated SAUL'S son, ISH-BOSHETH (2 Sam. 4:2 – 9).

B. H. WALTKE

Rimmon (place) rim'uhn (רִמּוֹן *H8234*, "pomegranate"). A common place name that presumably reflects the existence of pomegranate trees in the respective locations. The name is also used as a compound (see EN RIMMON; GATH RIMMON; RIMMON PEREZ).

The area around "the rock of Rimmon," usually identified with the modern-day village of Rammun.

(1) A town in the NEGEV by the border of EDOM at first assigned to the tribe of JUDAH (Josh. 15:32) and later assigned to SIMEON (Josh. 19:7 [KJV, "Remmon"]; 1 Chr. 4:32). In these texts Rimmon is preceded by AIN, and some believe these two names should be read as one; the reference is probably to EN RIMMON, a village resettled after the EXILE (Neh. 11:29). According to Zech. 14:10, Rimmon marked the S extremity of the land, to be turned into a plain with Jerusalem towering over it when Yahweh comes. Its location is uncertain, but some scholars identify it with modern Tell Khuweilifeh (Tel Ḥalif), some 9.5 mi. NNE of BEERSHEBA; the nearby site of Khirbet Umm er-Rammamin may preserve the name. (See *NEAEHL*, 4:1284 – 85, s.v. "Rimmon, Ḥorvat.")

(2) A town along the NE border of the tribe of ZEBULUN (Josh. 19:13; KJV, "Remmon-methoar," taking the difficult word *hammĕtōʾār* ["which curved"?] as part of the name). This city was assigned to the Levites descended from MERARI (1 Chr. 6:77, where it is called "Rimono" [*rimmônô* H8237]; the parallel passage, Josh. 21:35, reads *dimnă*, probably a scribal error for *rimmōnă* [see DIMNAH]). This Rimmon is located on the S edge of the Sahl el-Baṭṭof (Valley of Bet Netofa), at modern Rummaneh, a village 6 mi. NNE of NAZARETH.

(3) Six hundred survivors of the Benjamites took refuge for four months at "the rock of Rimmon" when pursued after the slaughter at GIBEAH (Jdg. 20:45, 47; 21:13); this Gibeah is thought by some to be the same as GEBA (modern Jebaʿ, which is c. 3 mi. NE of the site usually thought to be Gibeah of Benjamin/Saul, namely, Tell el-Ful). Ever since E. Robinson identified the rock of Rimmon with modern Rammun (*Biblical Researches in Palestine, Mount Sinai and Arabia Petraea*, 3 vols. [1841], 1:440), most scholars have followed his lead. Rammun is located on a lofty, conical chalk hill c. 6 mi. NNE of Jebaʿ and 3 mi. E of BETHEL. This hill is visible in all directions, protected by ravines on most sides, and contains many caves. Some have argued, however, that the narrative suggests a location in a wilderness area closer to Gibeah and that the hill where Rammun sits would probably not be described as a "rock" (cf. *ISBE* rev. [1979 – 88], 4:196; *ABD*, 5:773 – 74). Alternate proposals include a cave in Wadi es-Suwe-iniṭ (c. 1 mi. E of Jebaʿ and 1 mi. S of MICMASH) and a rocky plateau 4 mi. E of Rammun. (A few scholars have thought that the word for "pomegranate tree" in 1 Sam. 14:2 is in fact a reference to the rock of Rimmon. In addition, the NRSV, following an old conjecture, reads "He has gone up from Rimmon" in Isa. 10:27; see discussion in H. Wildberger, *Isaiah 1 – 12: A Commentary* [1991], 447.)

B. H. WALTKE

Rimmon, rock of. See RIMMON (PLACE) #3.

Rimmono ri-moh'nuh (רִמּוֹנוֹ *H8237*, "pomegranate"). A city within the tribal territory of ZEBULUN that was assigned to the Levites descended from MERARI (1 Chr. 6:77). See RIMMON (PLACE) #2.

Rimmon Perez rim'uhn-pee'riz (רִמֹּן פֶּרֶץ *H8236*, "pomegranate breach," probably referring to a pass where POMEGRANATE trees were found). KJV Rimmon-parez. One of the stopping places of the Israelites in their wilderness journey (Num. 33:19 – 20). It was located between Rithmah and Libnah, but the precise location of all these places (prob. somewhere in the general area of PARAN) is unknown.

ring. A circular ornament worn mainly on the finger. Rings were used in great antiquity, as archaeologists have discovered among Assyrian, Babylonian, and Egyptian artifacts. The PATRIARCHS probably wore them. Rings for costume were usually of SILVER or GOLD, but BRONZE rings were added to these in furniture. The SIGNET ring, probably the earliest form, may have been used first to replace the neck cord in bearing the SEAL (Gen. 38:18; the Heb. for "seal" here, ḥōtām *H2597*, is used later with reference to the signet ring worn on a finger on the right hand, Jer. 22:24). The Egyptians, who used rings in profusion, wore them on the finger. PHARAOH gave his signet ring to JOSEPH as a symbol of authority (ṭabbaʿat *H3192*, Gen. 41:42). Ahasuerus (XERXES) gave his to HAMAN to seal a royal decree (Esth. 3:10, 12; later it was taken from him and given to MORDECAI, 8:2, 8, 10). Seals were of a variety of emblems, such as lion, bull, scarab, alligator, and royal designs. (Cf. also Aram. ʿizqă *H10536*, Dan. 6:17.)

Gold ring of Tutankhamen of Egypt found at Tell el-ʿAjjul (enlarged impression on the right).

A costly ring was of special importance to royalty, nobility, and social station (Jas. 2:2; Gk. *chrysodaktylios G5993*, "gold ring"). The returning prodigal received a ring from his father as a symbol of dignity (Lk. 15:22; *daktylion G1234*). Besides finger rings, EARRINGS also were worn by women and children (Gen. 35:4; Exod. 32:2), as discovered at GEZER, MEGIDDO, and TAANACH. Nose rings (Heb. *nezem H5690*) were also quite popular among feminine paraphernalia (Gen. 24:22, 30, 47; Isa. 3:21; see NOSE JEWELS).

The Hebrew term ṭabbaʿat also occurs numerous times with reference to the ornaments made for the TABERNACLE (Exod. 25:12 et al.): MOSES gave instructions for their use on the ARK OF THE COVENANT, the CURTAINS, the BREASTPIECE and EPHOD of the high priest, and the ALTARS of incense

and burnt offerings. In addition, rings could be used as a medium of exchange. See further JEWELS AND PRECIOUS STONES.

<div align="right">G. B. FUNDERBURK</div>

ringstraked. An archaic English term meaning "marked with circular stripes." It is used by the KJV to describe the marks on the livestock that became JACOB'S while working for his uncle LABAN (Gen. 30:35, 39, 40; 31:8, 10, 12). Modern versions have "streaked" or "striped."

Rinnah rin'uh (רִנָּה H8263, prob. "jubilation"). Son of Shimon and descendant of JUDAH (1 Chr. 4:20).

Riphath ri'fath (רִיפַת H8196, meaning unknown). Son of GOMER and grandson of JAPHETH (Gen. 10:3; in 1 Chr. 1:6 the MT has "Diphath," evidently a scribal error due to the similarity between the Heb. consonants ד and ר). His name, like those of his brothers ASHKENAZ and TOGARMAH, appears to be non-Semitic and probably Anatolian. Riphath has been identified with the Riphaean mountains (Knobel, who identified the latter with the Carpathian range in the NE of Dacia), the river Rhebas in Bithynia (Bochart), the Rhibii, a people living eastward of the Caspian Sea (Schulthess), and the Ripheans or Riphasians, the ancient name of the Paphlagonians (Jos. *Ant.* 1.6.1 §126). This last view is favored by their contiguity with Ashkenaz, that is, the SCYTHIANS. (See *A Dictionary of the Bible*, ed. W. Smith [1863], 1045.)

Key rivers in the Promised Land.

Rissah ris'uh (רִסָּה *H8267*, derivation uncertain). A stopping place in the wilderness wanderings of the Israelites (Num. 33:21 – 22). It was between Libnah and Kehelathah, but the location of these places is unknown.

Rithmah rith'muh (רִתְמָה *H8414*, possibly "[place of the] broom trees"). A stopping place in the wilderness wanderings of the Israelites (Num. 33:18 – 19). It was located between HAZEROTH (possibly ʿAin Khadra, c. 30 mi. NE of Jebel Musa) and RIMMON PEREZ (unknown). Proposals for the identification of Rithmah include a valley E of AQABAH named er-Retame and a wadi S of KADESH BARNEA named Abu Retemat (see NUMBERS, BOOK OF VII.C).

river. The lands of the Bible include the two great areas of riverine civilization of the ancient world —those of the NILE and the EUPHRATES. In these regions, where the river was the life-giver and was worshiped as such, it formed the main geographical feature in the consciousness of the people. It is not surprising that the Bible sometimes refers to the Euphrates simply as "the River" (Josh. 24:3; Ps. 72:8; et al.). Hence the basic image of the river as a source of LIFE, and consequently of comfort and PEACE, which is so frequently encountered in Scripture (e.g., Isa. 48:18; 66:12).

PALESTINE never possessed a riverine civilization comparable to those of the great valleys to the N and S of it. The JORDAN is too small in volume, and too entrenched in its deep valley, to provide the kind of irrigation AGRICULTURE that supported EGYPT or MESOPOTAMIA. Indeed, in biblical times the valley of the Jordan was sparsely inhabited, filled with dense vegetation, and the home of wild animals. Only in Ezekiel's vision does there appear a river large enough to flow down into the Jordan rift and support widespread cultivation (Ezek. 47): a river of life entering the DEAD SEA at the precise point where the Jordan—so often the Bible's symbolic river of death—enters it in reality, at a point due E of the temple in Jerusalem. The same visionary image reappears in the NT (Rev. 22).

Once the Israelites left Egypt and its stable civilization by the Nile, rivers appear more often as boundaries or as milestones in their career than as a source of satisfaction or supply. In an age when there were no bridges, the crossing of even so relatively minor a river as the Jordan was a major hazard, in the case of the Israelites requiring divine intervention (Josh. 3). Once the people were across the river, they were in a sense cut off from their past: even to return briefly to the E bank of Jordan they would most probably have had to wait for the low water season. In the same way, Joshua reminded them of the step their ancestor ABRAHAM had taken when he crossed "the River" (24:3, 14 – 15, meaning the Euphrates) on his way to the land of promise; it was a symbolic step, cutting him off from a past to which he would never return.

The Jordan, with its E-bank tributaries, forms the only major river system of Palestine, although the mountains of LEBANON to the N feed numerous streams from their snowfields. Many of the smaller rivers of the land flow only seasonally. See BROOK; VALLEY.

J. H. PATERSON

river of Egypt. See EGYPT, RIVER OF.

Rizia ri-zi'uh (רִצְיָא *H8359*, possibly "pleasing"). Son of Ulla and descendant of ASHER, included among the "heads of families, choice men, brave warriors and outstanding leaders" (1 Chr. 7:39 –

40).

Rizpah riz'puh (רִצְפָּה *H8366*, "glowing coal"). Daughter of Aiah and a concubine of SAUL (2 Sam. 3:7). After the death of Saul, his son ISH-BOSHETH, now king in name only, accused ABNER of sleeping with Rizpah. If true, this act would have amounted to a claim to the throne (cf. 2 Sam. 16:20 – 22; 1 Ki. 2:22). In response to this probably false accusation, Abner promptly proffered the northern kingdom to DAVID (c. 997 B.C.).

Later (c. 970) a three years' famine was divined to the displeasure of Yahweh at the slaughter of the Gibeonites by Saul in violation of the covenant Israel had made with them (2 Sam. 21:1; cf. Josh. 9:3, 15 – 20). When David inquired of the Gibeonites what atonement he should make, they refused monetary compensation in accordance with the Mosaic law (Num. 35:33), but demanded seven sons of Saul to expose before Yahweh. The king gave them two of Rizpah's sons and five of MERAB'S (2 Sam. 21:7 – 8; the MT has MICHAL instead of Merab). Then Rizpah spread sackcloth on the rock—a sign that the land repented—and began her heroic vigil by the bodies, keeping off the birds and beasts of prey (cf. Ps. 79:2) from the beginning of barley harvest (c. April) until the anger of Yahweh relented and "the rain poured down from the heavens" (2 Sam. 21:10; it is unclear whether the reference is to an unusual late spring RAIN or to the "early rains" of the fall). For her devotion David had their bones with the bones of Saul and Jonathan buried in the tomb of Saul's father, Kish (vv. 11 – 14).

I. Roads in antiquity. The oldest trails ever found are the tracks of ancient hunters following and pursuing migrating game. The earliest domestication of sheep had certainly occurred by 9000 B.C., and the ground beaten down by continual moving of the flocks from fold to pasture has left primitive road beds in the oldest village sites. The establishment of townships, which marks the Neolithic era

in the ANE, also brought about the purposeful improvement of road surfaces, even though this may have been nothing more than the leveling of natural faults and the removal of large stones. There is no doubt that ancient prehistoric peoples did trade goods and materials over long distances. These routes followed the natural courses of travel, rivers, streams, valleys, and plains. There can be no doubt, however, that ideas and artifacts were handled over long distances by nomadic groups for many millennia. By the time writing and recordkeeping spread across the ANE, the notions and habits of road building were already well developed. The nation-building process that arose soon after the Neolithic era was extended throughout the Eurasian land mass by an international system of roads. With the centralization of authority and economic power, which produced the archaic religious state, road technology became basic to survival. In time the building and upkeep of roads became a central task of government and passed into the realm of juridics, philosophy, and literature.

Three key roadways in the Promised Land.

A. Archaeological remains of roads. Artifactual evidence of roads falls into four classes: (1) road beds; (2) fill; (3) piles of materials for building beds and fill; (4) markers and distance posts. Roadbeds were originally compacted by the continual passage of feet either human or animal, the single innovation being the driving of domestic flocks over a path or precinct. The "threshing floors" of the patriarchal period (cf. Gen. 50:10; Heb. *gōren H1755*) were compacted in this fashion. Fills were composed of transports of material from former buildings of clay or stone. The erection of wayside markers to indicate lines and distances is a complex subject. There is no doubt that they must have had a cultic significance. Roadside shrines are known from almost all ancient cultures. The

PILLARS or stone cairns erected by the PATRIARCHS were no doubt similar in nature (Gen. 28:18 et al.; Heb. *maṣṣēbă H5167*). Elaborate road markers with extensive inscriptions came into use after the beginning of the 2nd millennium B.C. Greek and Roman sources frequently mention such constructions. It is exceedingly difficult to trace a mere dirt track by archaeological means unless it alters the speciation or condition of the plants growing over it. In such cases it may be detected by aerial photography. A few ancient tracks were built over repeatedly through the centuries and may be detected by the course of modern roadways.

B. Trade and commerce on ancient roads. It is now supposed that the making and use of TOOLS is one of the surest signs of human civilization. This was the main impetus to the TRADE in basic materials and simple manufactures that sprung up in antiquity.

A section of the famous silk road in Turkey, a route used in ancient times for trade and commerce.

Lapis lazuli, gold, silver, electrum, iron, amber, and tin were probably the earliest trade goods. There is clear evidence that some of these items were traded from group to group across Europe and the Middle E by the time of the last glaciation. It may be safely assumed that the germinal collections of human groups were in the sheltered areas below the mountains and around the shores of the great fresh-water lakes of the Eurasian continent. From Switzerland through Palestine and Turkey and on across Russia a number of these bodies of water are located. Certainly Neanderthals and their predecessors foraged and hunted from one such locus to another, virtually following the same track with each season. The similarity of Paleolithic art and tool-making industries across this region demonstrates the degree of trade. With the rise of the Proto-Euphratean townships, barter turned to commerce. The rivers were not sufficient to carry trade across the deserts and the hills of N Iraq, and so ancient caravan trails were developed. Generally the northern tribes traded animals, asses, horses, and mules to the southerners for the products of the River Valley civilizations.

C. Defense and extension of roads. The lack of natural boundaries and defenses for overland TRAVEL rendered the CARAVANS vulnerable to attacks from bands of marauding tribes people. The earliest political unions of Sumerians and Semites had to deal with defense and extension of the roads. To defend a road and the terrain adjacent meant to set up garrisons along its length. To punish and discourage raiders necessitated extending military expeditions ever farther from the homeland.

The earliest evidence for prepared roadbeds and construction over them has been found in S Mesopotamia and in two of the Minoan centers of culture. In both cases there was no planning of the town, only the paving over of the crisscrossing streets around the market plaza that stood in front of the palace or temple complex. The ever-needed task of widening and repairing the processional and market streets is frequently recorded in CUNEIFORM tablets of all ages. There is substantial extrabiblical textual evidence of transport and travel in the ANE. Sumerian, Babylonian, Egyptian, and Hittite myths and legends all involve characters who go wayfaring, in fact this is the common literary device, as in the GILGAMESH cycle, to connect discrete legends into a literary framework. Texts from Egypt tell of trips to Syria-Palestine (e.g., Sinuhe, c. 1960 B.C.), and tablets from Assyria speak of road-building corvées sent in advance of the army (e.g., Tiglath-Pileser I, c. 1115 B.C.).

Although ridgeways, trackways, and fords were continually improved after the horse and cavalry were introduced about 2000 B.C., paved roads and streets were still confined to towns. The processional streets of ASSYRIA were set on roadbeds of gravel that were overlaid with burnt brick. A mastic or bitumen substance was employed as a binder. Carefully dressed and sized slabs of flagstone or gypsum were fitted between heavy curbing to form a street surface. In many towns cart tracks were cut into the street surface to act as guides, almost like rails, which guided the heavily loaded ox carts through the narrow streets. These grooves are normally 4 – 5 ft. in width, providing a two-ox gauge standard. Log or plank roads were suitable in areas where there was sufficient timber and a cold enough winter to retard rotting, but only in the most northern areas of Palestine were such roadways possible. STONE, the ever-present material of ancient humans, was the most widely utilized.

Across the great deserts of SINAI and ARABIA there were no roads at all, only well-worn caravan tracks. Bridges and causeways of compacted stones were widely built around towns; and the foundations of such in and near Jerusalem, Jericho, Hazor, and elsewhere are no doubt from the 2nd millennium B.C. Since water travel was limited to the rivers and coastal navigation until the time of Rome and Carthage, no open quays fed by networks of roads, a common Roman plan, have been unearthed. No doubt the coming of the CART and afterward the CHARIOT and the mounted horseman impelled the improvement of roads. The exceedingly rough terrain of the Palestinian hill country retarded this technical development, just as the lack of natural harbors never allowed Palestine to be a natural theater for Greek colonization or trade.

D. Religious and political uses of roads. The religious texts of the Sumerians, Akkadians, Babylonians, Elamites, Persians, Egyptians, and Hittites all include details of religious processions and festivals in which the idol of the city-cult was manifest to the populace. Since the precincts of the various gods were clearly defined in the archaic-religious states, the traveler was at a grave disadvantage. This was the more perilous because of the frequent attacks by raiders and highwaymen common to all the thinly populated areas of the ANE. It is for this reason that the patriarchs traveled in small squads of armed men (Gen. 14:14 – 15).

In the early dynastic inscriptions from Mesopotamia, the maintenance and safety of the roads was a boon from the tutelary deity; it was also a sign of the king's prowess and a surety of his legitimacy to rule (e.g., SENNACHERIB'S boasting of the roads he built in NINEVEH). However, the excavations at NIMRUD and elsewhere demonstrate that these paved and arched roads did not proceed far beyond the city walls. The W Semitic ruler Azitawadda speaks in terms of security on the roads: "In my times there were in all the borders of the Plain of Adana, from the rising of the sun to the setting, peaceful pursuits [*lit.*, work of spinning] even in places where previously a man was fearful to walk, but in my days even a woman could go, through the favor of Baʿal and the gods" (Phoen. and

Hitt. bilingual from Karatepe, c. 9th cent. B.C.).

Although the Assyrians and their allies certainly improved and employed roads for military transport, the principal motivation for land travel beyond the narrow confines of the TIGRIS and EUPHRATES toward the W was the Old Babylonian *tamkārum* or merchant, whose trading posts were spread across the ANE no later than the early 2nd millennium. However, it was the HURRIANS and the HITTITES who seemed to have held their confederacies together by the use of Babylonian cuneiform writing and military roads. It was the Greek cities of the coast of ASIA MINOR where town planning and access roads were first tried; and it was the Persian royal house which instituted road and postal systems as necessities for administration. In the closing centuries of the ancient world, Rome was to embrace both innovations and weld from the ancient states a world empire. Ultimately the processional street of the capital served not only to disseminate the state cult, but also to draw pilgrims from across the empire into it. This simple situation did as much as anything to erode the archaic religious states and bring about the rise of individualism in the Hellenistic age.

II. Roads in OT times. Roads play an important part in the narrative and instruction of the OT. The water courses of Palestine are in no case suitable for the purposes of trade or conquest, and its position between Anatolia to the N and Egypt to the S determined the central highland route and the coastal route to be the most heavily traveled in the country.

A. Terms. In keeping with the Semitic custom of using relatively few adjectives and a great many specific nouns, the OT references to roads contain many terms usually derived from the topographic features through which the road or track passed. Hebrew *ʾōraḥ H784* appears over fifty times in the OT, almost exclusively in poetic passages (e.g., Gen. 49:17). Since at no point is it used in any passage involving the construction of roads or the preparation of roadbuilding materials, the meaning must be limited to "path" and "pathway." The verbal form *ʾāraḥ H782*, meaning "to be on the road, to wander," is found in a few passages (e.g., Job 34:8); its participle occurs in the OT exclusively in the sense of "wanderer" or "wayfarer" (Jdg. 19:17 et al.).

The most frequent term, *derek H2006*, appears over 700 times in the OT, most often in the simple sense of "way" (Gen. 3:24 et al.). By extension the term means "direction" (1 Ki. 8:44 et al.) and "distance" (Gen. 30:36 et al.). The verbal development of the same root means variously "to tread down," "to march to some place," and is extended to mean "press down, bend down" (Jdg. 9:27 et al.). The noun is important in the biblical theology of the OT because of its use in the sense of "conduct" (Gen. 6:12) and "custom" (19:31). In ANE literature the idea of "road of life, philosophical and moral course of action" does occur. The most striking example of this type of usage is in the poem *Ludlul bēl nēmeqi*, "Who has learned the plan of the heavenly gods? Who knows the scheme of the Nether World? Where have mortals comprehended the road of the gods?" (W. White, *A Babylonian Anthology* [1966], 32ff.).

However, the fact that such language in the OT is an inherent part of the concept of SIN and RIGHTEOUSNESS demonstrates the vast difference between the biblical notion and those common in the cultures round about Israel. To wend one's way wickedly was a totally foreign notion to the ancient world. This is the reason for its being used in the introduction to the Psalms as the second degree of wickedness in which the ungodly delight (Ps. 1:1). The forsaking of the wicked way is at the center of the OT concept of REPENTANCE (Isa. 55:7 – 9 et al.). In the OT, the idea of turning down a road is used specifically of one's willful decision: "Leave this way, / get off this path, / and stop confronting us / with the Holy One of Israel" (30:11). In similar fashion, to follow the commands of the covenant

God is to be taught in "his ways" and to "walk in his paths" (2:3). Moreover, the doctrines of dispersed people, wayfaring prophets, and a messenger-Messiah are found in the OT alone. The "way of the LORD" is of prime importance because it encompasses the route of MESSIAH (40:3 – 4 et al.).

The noun *môrād H4618*, "slope, precipice" (from the common verb *yārad H3718*, "to go down"), can be used of a "descent" taken by travelers: "on the road down from Beth Horon to Azekah" (Josh. 10:11; similarly Jer. 48:5; contrast *ma⁽ăleh H5090*, "ascent" [from ⁽*ālă H6590*, "to go up"], 2 Sam. 15:30 NRSV et al.). The reference is possibly to wadis or dry valleys left on Palestinian hillsides by quick, seasonal floods; when these natural declinations were used as paths the term was generated. More common is the noun *mĕsillă H5019*, "track, highway" (Num. 20:19 et al.; from *sālal H6148*, "to pile up," as in building a road [cf. Jer. 18:15]); it can also be used figuratively with reference to the course of the stars (Jdg. 5:20) and to the conduct of life (Prov. 16:17 et al.). Several other terms meaning "road" or "path" are used occasionally (cf. the lexical variety in Jer. 18:15).

B. International roads. Most of the road network from the E coast of the Mediterranean to the N TIGRIS Valley ran far to the N of Israel. Even the Assyrian invaders headed across the hinterlands of Syria before turning S just E of the springs of the Jordan and falling on the borders of Samaria. No doubt an early road ran through the Judean desert from the Jebusite fortress of Jerusalem down to the oasis of JERICHO. From there it probably ran over the desert to the cities of inner Jordan.

However, the three major international trade routes ran from N to S through the three zones of Palestine: the coastal plain, the central mountain range, and the Jordan Rift Valley. The first of these is referred to once as "the way of the sea" (Isa. 9:1). This road ran the length of the country from TYRE southward through ACCO and MEGIDDO, APHEK to JOPPA and GAZA, and finally across the salt water marshes to the borders of Egypt. A main trunk ran off this route to the NE through the wide plain of JEZREEL and on up to DAMASCUS and then to the EUPHRATES. It is thought that the term "the way of the sea" meant not that the route followed the seacoast but that it was the way "to the sea." Two Egyptian sources list the towns along this route: the earlier one is the series of bas-reliefs of Seti I (c. 1381 B.C.), while the later is the 19th-dynasty papyrus of Hori (Papyrus Anastasi I), both of which give reliable details of the roadway. They follow the lead of the much earlier *Tale of Sinuhe*, which describes it as "the way of Horus." The towns of the more northern sector of the sea road were listed in the inscriptions of THUTMOSE III (c. 1490) and often were copied or rewritten in the annals of later Pharaohs. Assyrian sources from SENNACHERIB (c. 704) list the cities of the road, and Megiddo its hub. In later times it became known as the VIA MARIS.

The key international road in ancient times known as the Via Maris (Way of the Sea) came along the NW shore of the Sea of Galilee through the plain N of Magdala. (View to the N, with Mount Hermon at the top left; Magdala is off the bottom right.)

The second great road, the KING'S HIGHWAY (*derek hammelek*, Num. 20:17; 21:22), ran the length of the TRANSJORDAN highlands. It was used for caravan travel from S Arabia to Damascus. It is alluded to as the route of the invading Elamite princes (Gen. 14:5 – 7), and the southern section is mentioned on the Israelite march to MOAB from KADESH BARNEA (Num. 20). Most of the highland towns were strung out along its length, but the terrain crisscrossed by deep wadis and high hills was not easily invaded and so few campaigns were fought along its length. Two periods of flourishing towns were marked along this route, at the end of the 3rd and early 2nd millennium and again from the 18th cent. to the beginning of the Israelite Bronze Age.

The innermost series of roads along and across the Jordan is marked only by the remains of settlements mostly on the W side of the river. Unlike either of the other two great roads, this network was used primarily for internal travel. Its course from HAZOR through JERUSALEM and then to BEERSHEBA marked it as the path of pilgrimage to Jerusalem and the chief highway of Jewish trade. The section near BETHLEHEM is called "the way to Ephrath" (Gen. 35:19; 48:7).

C. Internal roads. Some roads that linked the various regions of Palestine crossed longitudinally through natural valleys or gaps in the mountains between the two great international routes. Specific routes in the N and S had been avenues of commerce in the most ancient times for the Canaanites in the N and the Midianites in the S. These were the routes leading out of the central hilly country into the plains and desert. Needless to say, many routes must have tied together the small towns of the NEGEV but are simply omitted from the written records extant. The following list is based on the work of Y. Aharoni (and summarized in his book, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 57 – 62, and map 3 on p. 44).

(1) "The road to Beth Haggan" (2 Ki. 9:27), a segment of a road that goes from SHECHEM to the Plain of JEZREEL via the ascent to GUR.

(2) "The road toward Bashan" (Num. 21:33; Deut. 3:1), actually a northern section of the king's highway, from HESHBON to ASHTAROTH.

(3) "The way [NIV, from the direction] of the soothsayers' tree" (Jdg. 9:37; the NRSV and NJPS

have, "from the direction of Elon-meonemim"), a minor local route near Shechem.

(4) "The way of the plain" (2 Sam. 18:23), a Transjordanian road that ran parallel to the Jordan River, going through such towns as Adam (see ADAM (PLACE)) and SUCCOTH.

(5) "The way to the Jordan" (Josh. 2:7 NRSV), a road that went from Jericho to Transjordan.

(6) "The Ophrah road" (1 Sam. 13:17 NJPS), a local route from MICMASH through OPHRAH and on to BAAL HAZOR.

(7) "The way of the wilderness" (Josh. 8:15; Jdg. 20:42 KJV), leading from BETHEL to the vicinity of Jericho; probably the same as "the way of the wilderness of Gibeon" (2 Sam. 2:24 KJV).

(8) "The way to Beth Horon" (1 Sam. 13:18; cf. KJV), a steep road leading to GIBEON and JERUSALEM; it was the northernmost road ascending into the Judean hill country, thus referred to also as "the ascent/descent of Beth Horon" (Josh. 10:10 – 11).

(9) "The way of the Arabah" (2 Sam. 4:7; 2 Ki. 25:4; Jer. 39:4; 52:7), that is, the familiar road from Jerusalem to Jericho of the NT. It crossed through the narrow valley of dunes to the Pass of ADUMMIM (Josh. 15:7; 18:17), and on into Transjordan.

(10) "The way of Beth Shemesh" (1 Sam. 6:12 KJV; cf. v. 9), the western sector of a road going up to Jerusalem via the Valley of SOREK and the Valley of Rephaim (see REPHAIM, VALLEY OF); possibly the same as "the road to Timnah" (Gen. 38:14).

(11) "The way to Beth Jeshimoth" (Josh. 12:3 KJV), a Transjordanian road that connected BETH JESHIMOTH and HESHBON; it joined the road from Jericho.

(12) "The route of the nomads" (Jdg. 8:11; KJV, "the way of them that dwelt in tents"; NRSV, "the caravan route"), probably referring to the Wadi Sirḥan, a bedouin route going E from the king's highway.

(13) "The desert road of Moab" (Deut. 2:8), evidently a route E of the king's highway and parallel to it, but joining it at RABBAH (AMMON).

(14) "The way of Edom" (2 Ki. 3:20 KJV), taken by some authors to be a mistake in the MT for the longer form of the name, "the way of the desert of Edom" (v. 8 Heb.). The question asked by JEHORAM, however, indicates that a choice of routes was open to the allied kings; parallel longitudinal routes are in evidence in these and similar passages.

(15) "The road to Horonaim" (Isa. 15:5; cf. Jer. 48:5), which extended from ZOAR to KIR HARESETH.

(16) "The road to Atharim" (Num. 21:1), extending from KADESH BARNEA N through AROER to ARAD, and continuing on to HEBRON (see ATHARIM).

(17) "The road to Shur" (Gen. 16:7), taken by HAGAR on the way to Egypt (see SHUR).

(18) "The way to the hill country of the Amorites" (Deut. 1:19 NRSV), a caravan route connecting Kadesh Barnea with the ARABAH.

(19) "The Mount Seir road" (Deut. 1:2), possibly part of one of the great international highways, connecting the Sinai desert to Edom through ELATH.

III. Roads in NT times

A. Terms. Unlike the OT, the Greek NT has a very restricted vocabulary for "road" and the like (possibly reflecting the fact that the Greeks of classical antiquity were a seafaring rather than a caravaning people). Virtually the only noun used, common since Homeric times in all dialects, is *hodos G3847*, which appears nearly a hundred times in the NT, both literally (e.g., Mk. 11:8) and figuratively (e.g., Matt. 21:32). The term *trochia G5579*, meaning literally "wheel-track," occurs

only once, and then in an OT citation that uses it in a figurative sense, "Make level paths for your feet" (in Heb. 12:13, quoting Prov. 12:13). The NT does use a variety of verbs to express such meanings as "go," "walk," "travel," and so forth. Special note should be taken of the common term *anabainō G326*, "to go up, ascend," used in particular of the ascent to Jerusalem, sometimes with a theological nuance (e.g., Lk. 19:28; cf. the "songs of ascents," Pss. 120 – 134, and see MUSIC VI.D).

B. Persian and Hellenistic roads. The fine road system inherited by the Herodian rulers was built by the Hellenistic rulers under Persian influence. Herodotus, Xenophon, and other Greek writers of the classical period found the efficiency of the Persian posts and their elaborate system of desert tracks to be a source of admiration. However, there is no evidence that the Persians of the Achaemenid regime ever actually built a "high" or paved road between towns. The archaeological evidence points to the fact that they paved only the royal and ceremonial avenues around the capital cities.

No Persian roads actually entered Palestine, but they went due W from Khorsabad to the northeasternmost tip of the Mediterranean and then on to Ephesus. The Hellenistic rulers utilized this main highway across the desert and added to it trunks connecting the Via Maris. The Persians continued the Babylonian practice of building roadways with burnt bricks and bituminous mortar. The inherent efficiency of the satrapical system, with its semiautonomous governors, kept the transportation system in operation long after the central royal authority had been swept away. The Hellenists thus inherited a system after 322 B.C. which functioned well and which needed little attention if allowed to repair itself through tax levies. In Egypt the postal system was maintained up to Roman times. A road was built from ALEXANDRIA to the RED SEA. Even after the harbors on the coast of Turkey were abandoned, the roads still bore their share of traffic well into Byzantine times.

C. Roman roads. The origin of the Roman road technology lies in the mists of Etruscan antiquity. It is basic to Roman engineering that the rudiments of drainage, embanking, and paving were all well-developed before the Romans built their roads. The essence of the roads was the fact that they were designed and built with all three of these other aspects in consideration. Town planning, hilly terrain, and a sense of communal organization all combined to motivate the building of firm road beds with carefully graded paving. The web of Roman roads began in the 3rd cent. B.C. and spread out a little more each decade until it encompassed Europe, Britain, North Africa, Greece, and the Middle East. It was under AUGUSTUS that the roads of Syria-Palestine were paved for the usual Roman reasons: to drain the economic riches of the area by taxation and franchise, and to protect Roman interest against robbers and independent hill people. The executors of this Roman policy were the Herodians.

Roman milestone located along a road passing through the Shephelah of Judah.

D. Herodian roads. Both the NT and JOSEPHUS bear witness to the building enterprises of HEROD the Great and his successors. The great TEMPLE in Jerusalem, the palaces in Galilee, and the many fortifications (e.g., MASADA) were built with Roman engineering and Jewish craftsmen. The magnificent royal causeway across the valley from the palace to the temple has been unearthed at its foundations by Israeli archaeologists. The plazas and palaces of the sea coast and the fortifications inland, all ordered by Herod, lend evidence to his fame and ability as a builder. However, it is implicit in the gospel narratives that Jesus and his disciples stuck to the footpaths and country tracks on foot, rather than travel the main roads. This can be deduced from the names of the hamlets and villages through which they passed. The towns in most cases have disappeared, and the actual courses of the paths can only be surmised.

E. Internal roads. The NT contains no road names but only general references, such as "the road—the desert road—that goes down from Jerusalem to Gaza" (Acts 8:26). Surely the roads mentioned in the OT were as a rule those traveled in NT times. The severity of the terrain is such that in many places no other ascent, descent, or passage is possible. The chief postcommonwealth development in Palestinian roads was in the area of GALILEE; none of the common places of Jesus' northern ministry are mentioned in the OT, and all the trackways and pathways are new. It was not until TRAJAN (A.D. 98 – 117) that the Jordanian road system was built and the bedouins employed as police. The Judea of Jesus' time was an underdeveloped rural area pressured by a mighty external empire that renovated, rebuilt, and exploited with relentless precision, holding materialism as its highest good. The OT economy and community perished from Palestine by being rendered obsolete.

F. International roads. The roads that brought Rome's imperial designs to Palestine were destined to carry the gospel out. The Roman army built in excess of 50,000 miles of roads in the area of Syria-

Palestine and banished by the sword the robbers who had troubled Israel from patriarchal times. The Christians were not blind to this fact and many gave Roman statecraft its due: "The Romans have given the world peace, and we travel without fear along the roads and cross the seas wherever we wish" (Irenaeus, *Adv. Haer.* 4.30.3).

<div align="right">W. WHITE, JR.</div>

robbery. See CRIMES AND PUNISHMENTS.

robe. A long loose outer garment, usually elegant and rich in texture, color, and style. A robe is therefore the dress of royalty and stately rank, ecclesiastical eminence, and social distinction. The primary term in Hebrew is *mĕ'îl H5077*, used for example of the robes worn by King SAUL (1 Sam. 24:11) and his son JONATHAN (18:4). The robe for religious rank was prescribed by MOSES, particularly for the PRIESTS (Exod. 28:4, 31, 34), a precedent that was followed by SAMUEL (1 Sam. 28:14). Other terms are used with reference to the "richly ornamented" robes worn by JOSEPH and by DAVID'S daughter, TAMAR (Gen. 37:3; 2 Sam. 13:18; see SLEEVE), the royal robes of AHAB and JEHOSHAPHAT (1 Ki. 22:10), and those worn in the royal court of PERSIA (Esth. 5:1; 6:8 – 11; 8:15).

In the NT, the Greek term *stolē G5124* is used with reference to the garments worn by the SCRIBES and priests in Jesus' time (Mk. 12:38; Lk. 20:46). It was also the apparel of the angel at the empty tomb (Mk. 16:5) and of the angels at the ascension (Acts 1:10). In John's vision a robe is worn by the exalted Jesus (Rev. 1:13), and a white robe was given to each of the martyrs (6:11). A more general term, *himation G2668*, is used of the purple or scarlet robe put on Jesus, probably a cape or cloak such as worn by a king or general (Jn. 19:2; Matt. 27:31 [in v. 28, *chlamys G5948*, a military mantel]); the same word is used with reference to his "robe dipped in blood" (Rev. 19:13). See also DRESS.

<div align="right">G. B. FUNDERBURK</div>

Robinson's Arch. Name given to a structural feature of the W wall of the Jerusalem TEMPLE. This arch, which is over 50 ft. wide and projects W out over the Tyropoeon Valley, is located 39 ft. N of the SW corner of the temple area; it spanned a paved road running along the foot of the Western Wall (see diagram under TEMPLE, JERUSALEM). "Four layers of large blocks have remained in the arch, which originally came to rest on a tremendous pier built parallel to the Western Wall and at a distance of about forty-two feet from it" (B. Mazar, *The Mountain of the Lord* [1975], 132). The earlier view that the arch was only the first of a series "has now been disproved completely"; rather, the arches graded downward in height and formed "part of a monumental stairway system" (ibid.; see

reconstruction on p. 112 and photo opposite p. 128; cf. also J. Wilkinson, *Jerusalem as Jesus Knew It* [1978], 61, with illustrations 37, 61, 62; and the drawings in M. Ben-Dov, *Historical Atlas of Jerusalem* [2002], 109 – 10).

Coronel Charles Warren estimated the width of the span, then sank a shaft looking for the pier that would mark the other end of the arch. He located it c. 50 ft. from the temple wall. Between the pier and the wall he also located some of the voussoirs of the arch where they had fallen upon a contemporary paved street some 40 ft. below the bridge. After breaking through that street, Warren found a second paved street some 18 ft. still farther down, and upon it a voussoir from an earlier bridge (C. Warren and C. R. Conder, *Survey of Western Palestine*, 9 vols. [1881 – 88], 5:176 – 83). JOSEPHUS wrote that this earlier bridge was built by the HASMONEANS. They later destroyed it lest it be of assistance to POMPEY in his attack on the temple area in 63 B.C.
This protrusion jutting out from the W wall of Herod's temple is known as Robinson's Arch; it is all that remains of a monumental stairway that led into the temple.

HEROD the Great erected a new bridge in connection with his rebuilding of the entire temple area. This bridge was destroyed with the temple itself in A.D. 70. The spring of the arch of that Herodian bridge in the temple wall is called Robinson's Arch. It is named after the great Palestine geographer Edward Robinson, who discovered it in 1838.

Roboam roh-boh'uhm. KJV NT form of REHOBOAM.

rock. The two Hebrew terms for "rock" are not easy to distinguish, but *sela(H6152* often refers to a high, cliff-like feature, while ṣ*ûr H7446* seems to indicate a crag or slab of rock. Both types of features abound in the Bible lands, where centuries of forest destruction and soil erosion have removed the vegetation cover even from those areas that originally possessed any. In particular, Israel in the desert wanderings for forty years must have spent much of their lives among the bare outcrops of the Wilderness of SINAI and southern PALESTINE. Within the land itself, the "bare bones" of rock are almost constantly visible in the landscape as the scarps and projections of the underlying limestones and sandstones, while the world-famous city of PETRA in EDOM was carved out of the rock —in this case the red Nubian sandstone.

As a result, the rocks of Palestine repeatedly play a part in the Bible story, and the book is also rich in metaphors that follow from the first biblical reference to God as "the Rock" (Deut. 32:4). At least three reasons may be adduced. (1) In the unsettled state of this region in OT times, it was a sensible precaution to use the natural defensive quality of rocky sites to build fortress cities. So great were the natural advantages of such sites for defense that many of these fortresses were to all intents impregnable, given the military techniques of the period; siege or treachery offered the only hopes of capture. (2) The rock offered shelter from the storm (whether actual or figurative). The limestones of Palestine are full of CAVES, and thus we find DAVID hiding from SAUL in the cave of ADULLAM (1 Sam. 22:1) or the rocks around EN GEDI (24:1 – 3). (3) The rock served as a source of water to Israel in the wilderness (Exod. 17:6; Num. 20:11). It is a well-known feature of limestone terrain that water seeps down through crevices to break out at unexpected points in the form of springs; God evidently guided Moses to points where this could take place.

The NT transfers the symbolic image of the OT to make Christ "the spiritual rock" from which his people drank (1 Cor. 10:4). Various rabbinic sources refer to a movable well in the form of a rock that followed the Israelites in the wilderness, although interpreters are divided regarding the relevance of this tradition for Paul's statement (see discussion by P. E. Enns in *BBR* 6 [1996]: 23 – 38). Some commentators have also suggested that when John reports the piercing of "Jesus' side with a spear, bringing a sudden flow of blood and water" (Jn. 19:34), he is alluding to MOSES' act of striking the rock on which God stood (Exod. 17:6; see G. M. Burge, *The Anointed Community: The Holy Spirit in the Johannine Tradition* [1987], 93 – 95). Just as in the wilderness that act caused physical water to flow and thus met the needs of God's people, so at the CRUCIFIXION the striking of God who had come in the flesh made possible the granting of living water—that is, the HOLY SPIRIT—to believers (cf. Jn. 1:1, 14; 4:10 – 14; 7:38 – 39).

rocks. See STONES.

rod. A length of tree limb or bush stock, employed at first for support or weapon. It was fashioned distinctively for individual use, straight with a thick end or with the shepherd's crook. Little distinction is drawn between the Hebrew words used for "rod" or "staff." The term *maqqēl H5234* apparently meant "twig" or "branch" or "sucker," as that of the poplar which JACOB stripped in breeding cattle (Gen. 30:37 – 41) or of the almond which God used as an object lesson (Jer. 1:11). A more common word, *maṭṭeh H4751* (apparently from a root meaning "to stretch out, lengthen"), is most frequently used of a rod in the hand, as the staffs of MOSES and AARON (Exod. 4:2; 7:9; et al.). The noun *šēbeṭ H8657* refers to any kind of rod (e.g., Exod. 21:20), but since a stick can be used as a weapon or as an instrument of punishment, this term came to mean "[authoritative] scepter" (e.g., Amos 1:5). Finally, *miš(enet H5475* (from a root meaning "support") can refer to a cane used by someone that has been injured or by someone elderly (Exod. 21:19; Zech. 8:4), but it has a general meaning as well (e.g., 2 Ki. 18:21). The NT term is Greek *rhabdos G4811*.

For DAVID, the staff was a symbol of divine guidance and care: "your rod [*šēbeṭ*] and your staff [*miš(enet*], / they comfort me" (Ps. 23:4). The rod also became the symbol of authority and rule prevalent in Bible use: Moses "took the staff of God in his hand" (Exod. 4:20); and he and Aaron wrought numerous miracles with rods (Exod. 8:5 – 6; 14:16; Num. 20:11). See AARON'S ROD, STAFF. "The rod of discipline" was for a child (Prov. 22:15) or a fool (14:3) or a slave (Exod. 21:20). The rod as a symbol of God's anger and chastisement occurs in numerous passages (2 Sam. 7:14; Job 9:34; 21:9; Isa. 9:4; 10:5; 30:31; Lam. 3:1; 1 Cor. 4:21). That Jesus would rule all nations "with a rod of iron" was foretold in Ps. 2:9 (NIV, "iron scepter") and seen in Rev. 2:27; 12:5; 19:15. The rod was used in counting sheep (Lev. 27:32), and symbolically in numbering God's chosen (Ezek. 20:37). Finally, the rod was used for measuring, as the new Jerusalem (Rev. 11:1; 21:15 – 16 [here Gk. *kalamos G2812*]).

Rodanim roh'duh-nim (רֹודָנִים, pl. of the unattested form רֹדָן *H8102*). TNIV, "the Rodanites." Son of JAVAN and grandson of JAPHETH (Gen. 10:4 [KJV, "Dodanim," following most Heb. MSS]; 1 Chr. 1:7). However, since the name is in the plural form, the reference is evidently to a people group descended from Javan (who is associated with GREECE and surrounding areas). The SEPTUAGINT reads *Rhodioi* ("Rhodians"), and most scholars believe that indeed the Rodanim were thought to be inhabitants of the island of RHODES. On the other hand, some have argued that the spelling "Dodanim" is original (cf. *ABD*, 5:788).

<div align="right">H. A. HOFFNER, JR.</div>

Rodanites roh'duh-n*i*ts. TNIV form of RODANIM.

roe, roebuck. The smallest deer native to Europe and SW Asia (*Capreolus capreolus*). Modern versions use "roe deer" or "roebuck" to render Hebrew *yaḥmûr H3502* (which occurs only in Deut. 15:5 and 1 Ki. 4:23), though some scholars believe this word refers to the fallow deer (see DEER for general discussion; cf. also *FFB*, 26). The KJV uses both "roe" and "roebuck" to translate other terms that probably refer to the GAZELLE (Deut. 12:15 et al.).

Rogelim roh'guh-lim (רֹגְלִים *H8082*, prob. "[place of] those who tread," referring to fullers who cleaned textiles). A town in TRANSJORDAN identified as the home of BARZILLAI (2 Sam. 17:27; 19:31), who along with others befriended DAVID when the latter arrived in MAHANAIM in his flight from ABSALOM; he later escorted David back over the Jordan. The location of Rogelim is unknown. The description of Barzillai as "the Gileadite from Rogelim" may suggest a place in GILEAD, but even this is uncertain. F.-M. Abel (*Géographie de la Palestine* [1933], 2:437 – 38) suggested the identification of Rogelim with a site near Wadi er-Rujeileh called Tell Barsina (or Bersinya, c. 16 mi. SE of the Sea of Galilee and 25 mi. N of Mahanaim), based on the similarity of these names to Rogelim and Barzillai. This proposal was questioned by N. Glueck (*Explorations in Eastern Palestine*, 4 vols. in 5, AASOR 25 – 28 [1934 – 51], 4/1:176 – 77), who found no evidence of settlement there before the Roman period; Glueck proposed instead Zaharet (Dhaharat) Soqʿah, which is just to the SE of Bersinya.

<div align="right">B. K. WALTKE</div>

Rohgah roh'guh (רֹהְגָּה *H8108* [*Ketib* הֹגָּה], meaning unknown). Son of Shomer (KJV, "Shamer"; NRSV, "Shemer") and descendant of ASHER (1 Chr. 7:34).

Roimus roh'i-muhs. KJV Apoc. form of REHUM (1 Esd. 5:8).

roll. See SCROLL.

rolling thing. See TUMBLEWEED.

Romamti-Ezer roh-mam'ti-ee'zuhr (רֹמַמְתִּי עֶזֶר *H8251*, "I have lifted help" or "I have exalted [my] helper"). Son of HEMAN, the king's seer (1 Chr. 25:4). The fourteen sons of Heman, along with the

sons of ASAPH and JEDUTHUN, were set apart "for the ministry of prophesying, accompanied by harps, lyres and cymbals" (v. 1). The assignment of duty was done by lot, and the twenty-fourth lot fell to Romamti-Ezer, his sons, and his relatives (25:29).

Roman empire. The word *empire* requires definition, for it is used in two distinct senses, geographical and political, and both are applicable to the Roman empire. Geographically, an empire is an aggregation of territories under a single absolute command. Until comparatively recently, Great Britain held a world empire, and one of Disraeli's dramatic political coups was to dub Queen Victoria the Empress of India. Similarly, Rome ruled a ring of territories around the Mediterranean, a widening area of command and authority acquired by a long historical evolution that began when the Latin tribes by the Tiber broke the encirclement of the hinterland hill tribes and continued to expand until Rome's frontiers rested on Hadrian's Wall in far Northumberland, on the long riverline of the Rhine and the Danube, on the Black Sea Coast of Asia Minor, on the Sahara, and on indeterminate eastern and northeastern lines which wavered with Roman policy toward Parthia, and which, apart from the Arabian desert, found no clear-cut southeastern definition on the Red Sea coasts and in the valley of the Nile.

All this area had fallen under the Roman *imperium* or command by the long process by which first the republic, and then the principate, probed for a stable frontier, a quest that was never ended and that paused only when out-reaching power touched its limits. Those limits were on the longest river line in Europe, and were without sharp and secure finality around the whole arc of the eastern provinces. The empire was a hard won and not readily defensible mass of territory, destined to divide down its middle line and succumb, first in the W, and then in the E, to the pressures engendered in the more remote land masses of Europe and Asia, from whose tribal incursions Rome had sought for long and significant centuries to protect the culture and civilization of the Mediterranean. With the Roman empire went the "Roman Peace," coterminous and coextensive. Within these frontiers the church first found root and growth, and when the vast mass disintegrated, it proved to be the historical link that tied a crumbling world to its successor, the new Europe which arose when the torpor and confusion of the Dark Ages passed.

The term *empire* is used most commonly in a political sense to distinguish between the republic and the principate, between the rule of the senate and the rule of the constitutional autocrats who were called, in view of their exercise of supreme military command, by the term *imperator* (whence *emperor*). The Roman empire, in this sense of the word, is that period of Roman history that begins with the final victory of Octavian in the republic's last civil war and ends with the collapse of all Roman authority, first in the W and then in the E—the final termination of the great historical movement that began with the coherence of the tribes of the Latin enclave around the fortified hills of the Lower Tiber River valley. The term *imperator* was not originally prominent among the various titles available to the ruler. AUGUSTUS (as the senate, conferring an honorific title, called the victorious Octavian) preferred to be called *princeps,* or first citizen; hence, the preferable term *principate* for the empire politically considered. See also ROME.

I. The transition. It must not be supposed that the Roman people at large saw in the Battle of Actium (31 B.C.) that decisive watershed in their history which historians find it convenient to mark today. The accumulation of power in the hands of one man, power constitutionally conferred, was no new phenomenon over the half century of tense and troubled politics that preceded the emergence of Augustus as the giver of peace and order. Inevitable strains and stresses—which the possession of provincial responsibility and the inexorable extension of territory that was regarded as necessary to security brought to bear upon Rome's ruling class—were partial causes behind faction, division, and civil strife. Again and again, distracted and confused within, under the continual threat of revolt and a military coup, the ruling oligarchy had resorted to autocracy in their endeavor to retain control of the city, Italy, and the menaced provinces.

The great POMPEY, for example, enjoyed two periods of extraordinary command in the sixties of the 1st cent. B.C. During the first he cleared the E Mediterranean of the Cilician pirate fleets which, in the midst of Rome's civil troubles, had gained control of the seaways and had interrupted the food supplies on which the urban proletariat, a sinister force in Rome's confused political situation, depended. During the second period, Pompey pacified and organized the whole provincial complex of the E, a contribution to the future Roman Peace that it would be difficult to overestimate. Both of Pompey's commands involved overriding authority and an adaptation of republican forms to monarchical rule—the very pattern of the coming autocracy, which was Augustus's clever solution to the problem of Rome's anarchy.

Had Pompey not been a loyal and responsible servant of the senate, he might easily have retained the powers conferred constitutionally upon him. Using a devoted army, backed and financed by the immense resources of the E which he had organized, might have dictated his own terms to the helpless senate. He might thus have arranged his own succession and have been marked by historians as the first of the "emperors." As it was, Pompey duly surrendered his military and legislative power, and the senate, now visibly unable to manage the resurgent problems of power, blundered on toward civil war.

Julius CAESAR was not as honorable a man as Pompey was. His rise to power followed directly that of Pompey. Twelve years after 62 B.C., when Pompey dutifully resigned his great power, Julius Caesar had become the problem to the senate which they had long helplessly foreseen. He had beaten Gaul into submission, demonstrated Roman power across the channel, and presented a challenge to

the divided oligarchy which they could meet in their political bankruptcy only by resorting to their old champion Pompey, the one man around whom some show of strength might rally, the one soldier able to meet the military genius of Caesar—hence the Civil War, described in a self-justifying book by Caesar himself. The decade is, thanks to Cicero's speeches, letters, and the abundance of other material of historical worth, a well-documented period, and it is possible to follow week by week the events of portent and significance that saw the death throes of republican Rome.

The Civil War, with Caesar and Pompey as the great opponents, was the senate's last attempt to control the military command. From the duel of the two dynasts, Caesar emerged as victor. The decisive battle was fought at Pharsalus on the Thessalian plain on 9 August 48 B.C. Pompey was murdered in Egypt before the year ended. By March of the year 45, Caesar's swift decisive strength had broken up and subdued the remaining pockets of senatorial resistance. In Egypt, Queen CLEOPATRA, last of the great line of the Ptolemies, secured her personal fortunes by snaring Julius Caesar, the conqueror.

Caesar then turned his undoubted genius to the restoration of law and order in Rome, and of peace throughout the Roman world. His power was absolute and unchallenged, and he exercised it with firmness, clemency, and contempt for opposition, qualities that might have marked him as the first "emperor," had he also possessed political subtlety, some measure of patience, and even a simulated show of respect for the discredited republican regime. It is unwise to despise an enemy, however discredited, and the famous Ides of March in 44 B.C. saw Caesar fall under the daggers of a diehard group of senatorial conspirators who had no alternative policy or program with which to replace his firm, efficient dictatorship. The republic was dead, and no act of violence could bring the corpse to life, for all the magnificence of the eloquence with which Cicero, the great orator and political archaist, sought to stir it to movement and activity.

Remains of the house of Julius Caesar located in the Roman forum.

Nor had anyone remembered Caesar's adoptive son and heir—a member of the *gens Octavia,* and after Caesar's adoption called Octavianus Caesar—a lad of nineteen years who was studying in Greece. With sublime audacity young Octavian came to Italy and claimed his heritage. The young man had a flair for diplomacy, a genius for picking and choosing men to help him, and a sense of timing in political affairs that matched both qualities. Octavian, however, for all these personal advantages that

were conspicuously lacking in the great and independent Julius, could hardly have achieved the astounding success which crowned his audacious venture, had not vast moral forces awaited his clever manipulation. Rome was not spared a second civil war, and in 42 B.C. PHILIPPI followed Pharsalus of six years before as another decisive place and date in Roman history. Allied with Antony, Caesar's one-time lieutenant, Octavian broke the remaining forces of reaction.

The Mediterranean world, nonetheless, amid Rome's preoccupation with civil strife, approached close to disaster. The PARTHIANS, whose perennially hostile presence was the problem of Rome's eastern frontier, were menacing Palestine and Egypt. Antony proceeded E to gain control of the threatened provinces, but proved to be no Caesar. The E was in turmoil when Cleopatra, one of the most dynamic women of that age, gained control of Antony, and with her schemes for an eastern Roman empire almost anticipated history by four centuries.

Octavian had chosen with his usual unerring deliberation to remain in Italy. He held there Rome's true strength, and the challenge from ALEXANDRIA was one that Rome could not ignore. War came again, but was concluded at Actium in 31 B.C. when Octavian and his able commanders broke the power of those who challenged peace. Peace was all that a sadly tormented world asked, and Italy and all the provinces were ready to confer divine honors on the man whose genius had brought the boon it so desired. In 27 B.C., after a semblance of "restoring the republic," celebrated in coinage and inscription, Octavian received the title of AUGUSTUS. He succeeded where Julius had failed because he paid lip service to the forms of constitutional and republican government. He called himself *princeps*, or "first citizen," a popular-sounding title that claimed little. He was *imperator* by virtue of the fact that, like the President of the United States, he was in supreme command of all the troops. It was a title used only in rare military contexts.

Concentrated in Augustus's hands were also the old powers of the republic. There were still CONSULS, but he was one of the two. He also held the "tribunician power," that is, all the rights, privileges, and functions of the old plebeian magistrates, the "tribunes," which had been once a bulwark of the dispossessed, but had found strange and potent misuse in the century of constitutional strife which had destroyed the republic. When he would, he also assumed the power of the censors, those old custodians of honor and piety.

But all these powers Augustus held, just as others had at times held them, by the senate's or the people's gift. Elections of a sort were held. The senate still functioned, and provincial administration was shared by the prince (i.e., the *princeps*) and the senate, the former retaining command of all those frontier regions that required the presence of an army. Augustus could read history too well not to have marked the role which a century of commanders had played in Roman revolution through the use of the military forces they had bound to themselves by advantages conferred or by personal magnetism.

II. Augustus (emperor from 27 B.C to A.D. 14). So it was that the first Roman emperor—who ordered "that a census should be taken of the entire Roman world" (Lk. 2:1)—entered history. Those who blessed the peace he gave to a weary world were not aware that a sharp change had taken place. A leader, to be sure, had appeared, and he was indeed one of the great men of all time, but his powers, autocratic in sum and total, bore ancient and familiar names. Only the farseeing knew that the old regime was dead, and, if they knew, grieved little for it.

The new regime sought to revive the virtues of the old, just as it had remedied its vices. Augustus promoted religious revival. As far as legislation could effect that end, he sought to restore the old standards and old moralities. A great outburst of literary activity, some of it promoted

effectively by Augustus's "Minister without Portfolio," Maecenas, gave Latin letters their golden age. Augustus knew how to use the ability of great poets to establish his peace and add power and persuasion to his rehabilitation of law and order. The world at large, scarcely believing that an evil age of breakdown and war was ending, was willing to barter liberty for peace. No wonder that a highly sensitive spirit like Vergil the poet, looking back over the history of Rome, saw a mighty destiny working to a beneficent end that found final expression in the work and person of one man. He wove the thought into his epic poem, the *Aeneid.*

Augustus did much to establish the geographical boundaries of the empire. His work is not well documented, but twenty years of planning and petty warfare were devoted to the security of the frontiers. He had no zest for conquest. Consolidation was his aim. Ambitious plans for the subjugation of Parthia, Julius's unfinished project, were abandoned, and until the age of TRAJAN, who effected brief conquest, diplomacy was the attempted Roman solution of the intractable problems of that troubled frontier. GALATIA was made a province in 25 B.C., and Judea in A.D. 6. Spain was pacified, Gaul reorganized. The hill tribes of the northern Alpine areas, like those of Asia Minor, were brought laboriously under subjection. Rhaetia, Noricum, Pannonia, and Moesia were established along the Danube and Balkan frontiers, essential buffers against the tribal hinterlands of Europe. Disastrous defeat, and Varus's loss of three legions in A.D. 9, caused Augustus to abandon what might have been the salutary establishment of a frontier on the Elbe, instead of along the nearer and longer line of the Rhine. All was a vast contribution to the peace of the Mediterranean. It is small wonder that, in the newly prosperous provinces, the imperial cult grew apace (see EMPEROR WORSHIP).

III. Tiberius (A.D. 14 – 37). By good fortune, the canny choice of loyal men, and perhaps the immense weight of popular desire for peace, Augustus had no trouble from one of Rome's two unsolved or insoluble problems. One was the effective and permanent control of the army commanders, men whose abilities and eminence were necessary for the defense of long and menaced frontiers, but whose ambitions and independence were destined to play a disastrous part in four centuries of history.

The other problem was the succession. Augustus is a prime illustration of the decisive role of personality in the processes of history, and as the revered person of the man who founded the Roman Peace moved toward old age and death, people wondered who would replace him. TACITUS captures the atmosphere of the occasion well in the opening chapters of his *Annals*. No one was better aware of the problem than Augustus himself, who, by misfortune, had no male offspring of his own. His efforts to secure the succession in the direct line of the Julian house were cruelly thwarted by the premature deaths of promising young men on whom he had pinned his hopes: Marcellus, his nephew, subject of Vergil's moving tribute (*Aeneid* 6.882 – 86); Gaius and Lucius, his grandsons; and Drusus, his favorite stepson.

TIBERIUS, his other stepson, was eventually left as the sole successor, but not until he had become an embittered man by the spectacle of Augustus's visible attempts to find an alternative. Tiberius was fifty-six years of age when Augustus died in A.D. 14. He was a tried and able commander, but, as a Claudian on his mother Livia's side, possessed of all the notorious pride of that ancient and distinguished family, and rendered the more dour by the rejection from which he had suffered. Perhaps Augustus, so able a judge of human nature, had marked his innate sourness and suspicion and foreseen those defects that brought so much unpopularity to Tiberius during and after the twenty-three years of his principate.

It was no doubt Tiberius's defects of character that led him to place such misguided trust in Aelius Sejanus, the prefect of the PRAETORIAN GUARD, the emperor's Household Corps, and to whose influence and ascendancy during Tiberius's absence from Rome some of the tyrannous acts of the reign may be ascribed. It was Tiberius's suspicious nature which betrayed him into the too common use of "delation"—treason trials, reminiscent of those of some modern autocracies, and based on the evidence of common informers (*delatores*). This became a practice loathed by its perennial victims, the old senatorial aristocracy, and later resorted to by every weak or suspicious emperor, notably DOMITIAN. It was Tiberius's misfortune that Tacitus, one of the most powerful writers of Rome, was a chronicler for his reign. Modern historians, emancipating themselves from the long influence of the mordant Tacitus, have done more justice to Tiberius's real abilities.

Tacitus wrote in Rome as a Roman senator, and it is a little difficult when reading him to remember that, over Tiberius's considerable reign, the frontiers still endured as Augustus had fixed them, and that even the Parthians were held in check. The organization of CAPPADOCIA into a province was the only innovation Tiberius made to the Augustan system. Portents, however, were gathering. Senatorial administration was clearly more subject to the will of the *princeps*; Sejanus showed what a local military commander could do, and the possibilities of personal tyranny were obvious.

IV. Caligula (A.D. 37 – 41). The young madman who followed Tiberius underlined the latter lesson. Hereditary succession invariably produces sooner or later the incompetent, the foolish, or the bad. It produced all these qualities in the person of Gaius, nicknamed CALIGULA, or "Little Boots," by the troops on the Rhine who had known him as the son of the popular Germanicus. Mercifully, he was assassinated before he provoked a Jewish revolt.

V. Claudius (A.D. 41 – 54). It was a sinister fact that, when Gaius fell under the sword of an officer of the praetorian guard, the same military group drew from obscurity Gaius's uncle, CLAUDIUS, a man of fifty years, who, even more than Tiberius, had suffered a lifetime of rejection and humiliation. He suffered from some form of cerebral palsy, which at times made him physically repulsive, but like many victims of a spastic condition was none the less an able man, certainly the most learned ever to hold the principate. Enforced withdrawal from society had driven Claudius to low companions and to study. The influences of both were apparent in his reign.

Claudius sensibly developed the imperial civil service, using the abilities of the freedman class. Pallas and Narcissus, and Pallas's brother Felix, were his appointments, and the personal faults and vices of these men were not an indictment of the fundamental good sense of Claudius's governmental innovations. He sought also salutarily to extend the Roman franchise. He embarked on a vigorous frontier policy, and the two Mauretanias in A.D. 42, Britain and Lycia in 43, and Thrace in 46, were added to the empire. Claudius died by poison, on the threshold of premature dotage, at the hands of his evil wife Agrippina, who was anxious to secure the succession for Nero, her son by an earlier marriage. Claudius's death was concealed until the praetorian guard, firm in the hands of Afranius Burrus, Agrippina's nominee, and conciliated by the now customary donation, brought Nero to power at the immature age of seventeen.

VI. Nero (A.D. 54 – 68). It was NERO'S youth and his artistic and hedonistic preoccupations that left the bluff Burrus, and the famous philosopher SENECA, Nero's tutor, free to manage the world's affairs for five years. The *quinquennium Neronis*, as this period was known, became a proverb for happy conditions in the provinces. The young prince deserved no credit. Agrippina had cleared the way for

Nero with murder and intrigue. Her plotting continued. Unpitied victims were Pallas and Narcissus, but Seneca and Burrus became frightened when the ambitions of Agrippina took a wider reach. How far they sanctioned Nero's turning on the woman who had helped him to power can never be known, but the end was matricide.

Nero was clearly beyond control, and the tool of the unscrupulous. Burrus died, and Seneca was ultimately driven to suicide, but the details of a lamentable reign, which included the first PERSECUTION of the Christians, need not be followed. There was deterioration around the frontiers. Only the able Corbulo held the security of the Parthian frontier, while the equally able Suetonius subdued Britain aflame with Boudicca's revolt, in which London and Colchester were burned and the new province all but lost. In A.D. 66 the long threat of the Jewish rebellion became a reality (see WARS, JEWISH). Vindex rebelled in Gaul, and Galba in Spain, grim portents of the tragic year 69. Universal hatred surrounded Nero in Rome. The Julio-Claudian house, in short, came to an end amid turmoil on the frontiers, disaffection in the armed forces, and the first major threat to the Roman Peace. The wonder is that so much of Augustus's work, and Claudius's wise innovations, survived.

VII. The year of the four emperors (A.D. 69). The Christians who had survived Nero's purge, and who now labored under legal proscription, could have seen in the horrors of this year of anarchy a divine judgment. The wonder was that Rome again survived. The "beast" appeared wounded to death, "but the fatal wound [was] healed" so that the "whole world was astonished and followed the beast" (Rev. 13:3). Vindex had demonstrated the disaffection in Gaul, and when Galba, the aristocratic governor of Spain, made common cause with the Gallic rebel, the legions on the Rhine became aware of their insecurity, crushed Vindex, and tried to set up their commander Verginius Rufus as emperor. The "secret of empire," as Tacitus put it, was out. It was that "an emperor can be made elsewhere than in Rome." It was never to be forgotten. The praetorian guard declared for Galba. Nero fled, and died a suicide in a Roman suburb.

A year of complex civil war followed. By January 15 Galba was dead, killed by the praetorians who had declared for him. Otho, another Spanish governor, and first husband of Poppaea, Nero's wife, knew how to court the household troops and was set up as emperor. The Rhine legions set up Vitellius and marched on Italy. It was the opportunity of the German tribes, but was never taken.

The "beast" was to survive. By April 17, Otho

A Roman coin minted with the image of Emperor Galba.

was dead and Vitellius supreme, but the eastern provinces proclaimed Vespasian, the able general who was in the midst of fighting down the ghastly and expensive Jewish rebellion. Vespasian sent his able deputy, Mucianus, to Italy at the head of a legionary force, retaining enough strength in Palestine to hold the turbulent forces loose there. In a battle near Cremona, where Otho had been beaten by Vitellius and driven to Nero's resort of suicide, the Syrian legions triumphed. Before the year's end, Vitellius was destroyed, and by right of survival Vespasian became the ruler of Rome. The Flavian dynasty was born and endured for a generation. The continuing strength or good fortune of Rome was demonstrated by the fact that, through such civil turmoil, the frontiers held and the Jewish war continued. The Apocalypse quoted popular amazement. People were saying: "Who is like the beast? Who can make war against it?" (Rev. 13:4).

VIII. Vespasian (A.D. 69 – 79). VESPASIAN was a rough and able soldier. It was the achievement of his decade of rule that peace and prosperity were restored to the troubled frontiers, the finances of the realm brought to order, and the essential character of the principate retained. Like many a soldier, Vespasian was a born organizer, and his careful restoration on the frontiers, especially in Britain, were to stand Rome in good stead for many years. It is to Vespasian's credit, and later to Trajan's, that the first serious barbarian challenge was postponed for a century. When Vespasian died, Agricola was feeling his way toward a frontier on the Tyne, Parthia was screened by new defenses, and Palestine left devastated by atrocious war. In Rome there was something like an Augustan Age in new building. Vespasian's decade is not a well-documented age.

IX. Titus (A.D. 79 – 81). Vespasian's popular son TITUS, the able young soldier who had finished the Jewish war when his father was called to the duties of the principate in Rome, ruled for less than three years after Vespasian's death and left the high office, because of his premature death at the age of forty years, to the execrable Domitian, his younger brother. Pompeii, buried by Vesuvius in August

79, is a tremendous document of Titus's Italy.

X. Domitian (A.D. 81 – 96). DOMITIAN was thirty years of age when he unexpectedly succeeded to the principate. His personal history bore some resemblance to that of Tiberius, a fact which he recognized, for Tiberius's memoirs were Domitian's favorite reading. Vespasian and Titus, both capable soldiers, had held the younger brother of their house in some contempt. His awareness of that fact did not improve his personality or enhance his fitness to rule. Suspicious, cruel, and by nature tyrannical, Domitian filled his reign with treason trials, political murder, and persecution. Senators suffered along with Christians. Tacitus, enraged and embittered by the decimation of his class in this unhappy fifteen years, turned with hatred on Tiberius, whose concept of princely power provided the hated Domitian with so many precedents. The gentle PLINY the Younger, as well as the bitter Juvenal, agreed with Tacitus in this estimate of Domitian's evil principate and of the Reign of Terror which finally brought him down. With Domitian's death in A.D. 96, which must have nearly coincided with that of JOHN THE APOSTLE, last survivor of the original disciples, the NT century, which began with Augustus's census (perhaps 5 B.C.), ended. This article need not follow its history much further.

XI. Five good emperors. NERVA (A.D. 96 – 98), TRAJAN (98 – 117), HADRIAN (117 – 138), Antoninus Pius (138 – 161), and MARCUS AURELIUS (161 – 180) cover almost a century, the "Indian Summer," as Arnold Toynbee has called it, of Roman greatness. Edward Gibbon regarded this era as the happiest known to mankind. The famous passage in his *Decline and Fall of the Roman Empire* (vol. 5, ch. 1, par. 1) runs: "In the second century of the Christian era the empire of Rome comprehended the fairest part of the earth, and the most civilised portion of mankind. The frontiers of that extensive monarchy were guarded by ancient renown and disciplined valour. The gentle but powerful influence of laws and manners, had gradually cemented the union of the provinces…The image of a free constitution was preserved with decent reverence…During a happy period of more than fourscore years the public administration was conducted by the virtue and abilities of Nerva, Trajan, Hadrian, and the two Antonines. It is the design of this and the two succeeding chapters to describe the prosperous condition of their empire; and afterwards, from the death of Marcus Antoninus to deduce the most important circumstances of its decline and fall, a revolution which will ever be remembered and still is felt by the nations of the earth."

Over this period urbanization proceeded apace; the warrior prince Trajan extended the frontiers to their widest yet; Hadrian, most traveled of all the emperors, consolidated them; the great wall across Britain is the lasting monument to his work. Portents, however, gathered, and the philosopher ruler Marcus Aurelius was hard pressed to beat back a Teutonic incursion into the Danubian provinces.

Hadrian's principate saw the second rebellion of the Jews and the virtual destruction of the Jews as a nation. Those who seek information on the collapse and recovery of Rome's power, which covered the years 180 to 330, the final eclipse of the W, the transfer of power to Byzantium or Constantinople, and the 1,000 years of the Eastern empire should seek the information in the comprehensive works listed below.

Roman law. The legal system of ROME throughout the whole range of its 1,000 years of development, from the *Duodecim Tabulae*, "Twelve Tables," until the *Codex Iustinianeus*, "Code of Justinian," and the subsequent fall of the Eastern empire; and connoting, in addition to this primary meaning, the actual Code of Justinian itself.

Evolved by the decemvirate about 451 – 449 B.C., the Twelve Tables formed a code of rules to meet the exigencies of regulating the day-to-day affairs of ordinary citizens following the successful ascendancy of the plebs over the populus. Consisting of equal representation by patricians and plebeians alike, the decemvirs codified and published those parts of the old customary law essential for administration of justice in the reorganized condition of the civil law and government. The extant fragments of the Twelve Tables scarcely justify Cicero's eulogistic reference to their being almost the perfection of human wisdom. Indeed, the Tables were anything but a *corpus juris* of the law previous to the irruption of the Gauls, being merely short statements of points of law which, however, provided the substratum on which the whole future complex of Roman law was structured.

The nascency of the formulary system is perceptible in the recognition by the Tables of the important early forms of action: *sacramentum*, a protean procedure for the enforcement of practically every right; *manus injectio*, symbolizing self-help; *judicis postulatio,* a process for settling boundary disputes; and *pignoris capio*, dealing with the satisfaction of debt by hypothecation or pledge. (See Livy, *Hist.* 3.31 – 37; Cicero, *Leg.* 11; *Rep.* 2.37, 63; Gaius, *Dig.* 10.1; 47.22; H. J. S. Maine, *Ancient Laws* [1861]; W. A. Hunter, *Introduction to Roman Law*, new ed. rev. A. F. Murison [1994]; E. A. Meyer, *Legitimacy and Law in the Roman World: Tabulae in Roman Belief and Practice* [2004].)

Outlined in Justinian's *Digest* (1.2, *de origine iuris*, etc.), the germination and growth of Roman law as a system found its first written expression in the Twelve Tables, and owed its initial development to the exertions of private *jurisconsults* whose writings and views were not infrequently adopted by the *praetors* in their annual edicts. The earlier law, or *ius civile,* had hardened into a rigid and rigorous formalism, and it was to this praetorian law, which in the early empire was formulated in a perpetual edict, that the *ius honorarium* owed its softening application of principles of equity and natural justice. It was at this stage that legal rights emerged out of legal remedies, because the *ius honorarium* mainly operated as a rule regulating civil actions. The Twelve Tables operated for over 1,000 years down to the Theodosian Codex (A.D. 438) and the *Corpus iuris civilis* of Justinian, during which time the laws of Rome were never codified. (See T. Mommsen and P. M. Meyer, *Theodosiani libri* 16 [1904 – 05].)

The Institutes of Justinian finally cast the laws of Rome into a shape convenient to the practitioner as well as the student of law. Even when the barbarians ruled the W, Roman law was the personal law for Romans, and, in the E, under Justinian. They were largely superseded by imperial constitutions, and while obscured by Greek commentaries, the principles of Roman law were to some extent restored by a restatement known as *The Basilica* in 887, and were revised by order of

Constantine VII about 945. The Basilica does not contain the whole of the Justinian Code, but includes some materials not in the Code. It comprises the Institutes, the Digest or Pandect, Code, Novellae, and the Imperial Constitutions made after Justinian's reign. (See E. Gibbon, *Decline and Fall of the Roman Empire*, ch. 44.)

A recognition of the doctrines of the old system, which was swept away in the later days of the empire, is essential to an appreciation of Roman law as it applies to the NT background. The chief of the elementary doctrines of the *ius civile* were the peculiar principles determining the situation of the *pater familias* or the head of the family. The agnatic rule of descent (i.e., through males) regulated kinship in the fundamental social unit that was the patriarchal family, outside of which was the *gens* or class with which the family unit was linked by common ancestry. The law of the Twelve Tables recognized testamentary disposition, namely by will, as already in existence. Intestate succession by agnation was *per capita*, not *per stirpes*, all agnates of equal degree taking equally.

At the other end of the historical spectrum, it is noteworthy that the most important accretion to Roman law was the concept of *lex naturae*, borrowed from the STOICS, by which was meant the principle that the actions of human beings were to be guided by the same law which directed the universe. The *ius gentium* emerged from this, so that, with the *ius naturae*, these two agencies ameliorated and enlarged the *ius civile*, a process analogous to the modifying influence of equity on the common law of England centuries later, although, in fact, the development of common law owed little to Roman influences, which, however, have permeated most other legal systems of the civilized world.

Bronze vessel from the 1st cent. used as a dry measure. It may have been used by Roman tax collectors to extract 5 percent tax from a commodity producer.

It is appropriate at this point to comment on the *ius gentium*, or law of nations, administered by the praetors and applied to nations under Roman dominion. The *ius gentium* was the common law for all people, the word *ius* expressing legal rights as well as rules of law. Roman jurists regarded the *ius gentium* as based on consent, because of its inherent reasonableness and appeal to the conscience.

The supremacy of Rome in the affairs of JUDEA is marked by the rule of HEROD, who was confirmed by AUGUSTUS in the possession of the entire HASMONEAN kingdom. His salutary exertions on behalf of the people were climaxed by reconstruction of their temple, but personal blemishes of ambition and cruelty stamped Herod as a despot and a tyrant whose efforts failed to "romanize" the Jews.

Interesting aspects of Roman law reflected in the NT include references to ADOPTION in PAUL'S epistles (Rom. 8:15, 23; 9:4; Gal. 4:5; Eph. 1:5). In Roman law, adoption was a very ancient institution rooted in ancestor worship, the maintenance of the family *sacra* being such that an old man dying without issue was permitted to arrogate some citizen as *pater familias* and so make him a son. Similarly, another mode of adoption by which *filii familias* could be adopted was devised. The *adoptatus* was absorbed into the family where he was equated to a natural child.

Paul speaks of "heirs of God and co-heirs with Christ" (Rom. 8:17; Eph. 3:6), and it is noteworthy that these references to the Roman system draw upon the feature that the main function of the will was not the disposition of property, but the appointment of a successor, the *heres,* who was not simply an heir, but the actual representative of the deceased. Even where the *heres* or *heredes* were appointed *heredes* only to a half, their appointment would be construed as covering the whole estate. The common law knows no concept such as that of the *hereditas*, an entity coming into being by the death of the *de cuis* (predecessor) and then merging into the personality of the *heres* or actual successor. Whether the ancestor and *heres* had one *persona*, or whether the *hereditas* was the *ius,* or legal situation, of the deceased, does not really affect the aptness of the Pauline allusion.

Under the Roman law of persons, all people were either free or SLAVES. A slave was legally both a thing and a person, and he could be freed by manumission, a process whereby the slave was touched with a wand (*vindicta*) by the plaintiff (*adsertor liberatis*) in the course of a fictitious lawsuit and thereupon became a freedman in contradistinction to his former condition of bondsman. A freedman owed his patron *obsequium* (complaisance).

Roman law, like any other legal system, could not and did not remain unaffected by social, cultural, political, and economic influences. However, Roman law was neither orientalized nor hellenized, but retained its essentially national character. Some institutions of later Roman law, such as the family and slavery, were influenced by Christian principles of humanity and benignity, thus enlarging the Roman concept of equity as the realization of plain natural justice in accord with everyone's conscience. Christianity did not greatly alter the framework of Roman law. This was accomplished by Justinian, whose great codification will be discussed in some detail shortly.

The civil law and procedure against their historical setting having been outlined, some comment on *interpretatio* is appropriate. From the outset, the interpretation of the law and of the actions founded upon it were the responsibility of the college of pontiffs. About the 3rd cent. B.C. the administration of the law became secularized, and plebeians were admitted to the college. The early jurists were termed *veteres* who advised both clients and judges. Another class, referred to as advocates, undertook forensic argument. About 242 B.C. the *praetor urbanus* and the *praetor peregrinus* came into being as magistrates who at the commencement of their term issued edicts stating the procedural rules they intended to follow, hence the *edictum perpetuum* in contrast to edicts of an occasional nature. A body of precedent, or *edictum tralaticium,* was built up, any new matter

being called *edictum novum.* The *praetor* was not necessarily a skilled lawyer, but would consult his *considium,* or body of expert advisers. He was also amenable to public and professional opinion.

The *praetors* enjoyed a limited sphere of power. Their office was elective. They were subject to consular *intercessio,* or veto. On the other hand, the two consuls, elected by the *comitia centuriata,* exercised unlimited *imperium* derived from the monarchy. In fact, in a time of grave crisis, either consul might appoint a dictator to exercise supreme authority for up to six months.

The *aediles* were magistrates of the Roman people charged with the police of the city and control of the markets.

The censorship office was for roll-taking and tax-gathering and had great dignity. The censors (two in number) also administered governmental business. Later in their history, they determined the composition of the senate, and exercised a general control over public morals.

Quaestors (two annually) were nominated by the consuls to assist them in fiscal matters.

Tribunes (up to ten) enjoyed enormous power. The tribunate was a plebeian office, the person of the tribune being sacrosanct. They had power of veto over the acts of other magistrates and could even hold the state to ransom in the furtherance of partisan interests.

Mention must be made of the *responsa prudentium*, or opinions of professional jurists, which by the time of Augustus were issued by the emperor's authority under seal. Such weight was attached to the *responsa,* or answers, of eminent jurists, that Gaius enumerated the *responsa* among the sources of written law.

As a result, the law had to be extracted from a mass of legal literature which served as a foundation of Justinian's *Digest.*

The Institutes of Justinian form the principal source of the knowledge of Roman law. Beginning with a definition borrowed from Ulpian, the first book begins, "Iustitia est constans et perpetua voluntas ius suum cuique tribuens" ("Justice is a set and constant purpose giving to everyone his due"). This is justice in the sense of a moral virtue, or attribute of human character, not a legal standard. According to Justinian, legal study comprised two branches: public law, dealing with the constitution of the state, and private law, concerned with individuals. The Institutes are preoccupied with private law, there being only a closing title on criminal law (*ius publicum*).

The *ius privatum* is subdivided into the *ius naturale* (natural precepts), *ius gentium* (precepts of universal law), and *ius civile* (civil law).

The law of nature is described as "the law which nature has taught all animals…This is the source of the union of male and female, which we call matrimony, as well as of the procreation and rearing of children." The civil law is defined as the rules of law, "which each people makes for itself." The universal law is defined as "the law which natural reason has prescribed for all mankind held in equal observance amongst all people."

Justinian distinguishes between *ius scriptum* (written law) and *ius non scriptum* (unwritten law). The sources of the written law, according to Justinian, are *lex plebiscitum, senatu consultum, magistratuum edicta, responsa prudentium, principum placita.* Repeating the language of Gaius, Justinian says, "The whole of our law relates either to persons, or to things or to actions."

Summarizing, the Institutes deal with free men and slaves, persons of independent and dependent status, juristic persons, the modes of acquisition of property, gifts, servitudes, leases, real securities, possession, succession, wills, contractual obligation, sale, hire, partnership, pacts, agency, quasi-contract, theft, delicts, debt, assignments, the law of actions, the formulary procedure, summons, trial, execution, and interdicts. The Institutes were published on November 21, A.D. 533, with statutory force, along with the Digest, from December 30 of that year. Justinian also fixed, at the same time, the

course in legal education at five years. (See J. B. Moyle, *Imperatoris Iustiniani Institutiones libri quattuor*, 5th ed. [1912]; R. W. Lee, *The Elements of Roman Law, with a Translation of the Institutes of Justinian*, 4th ed. [1956].)

From the Twelve Tables to the Institutes the Romans did not establish a systematic body of criminal law, the Roman jurists being not so much interested in the distinction between the violation of public and private interests, as with *iudica publica* and private *actiones poenales*. The state did not concern itself with robbery (*rapina*), theft (*furtum*), property damage, and assault (*iniuria*), the procedure being by way of private suit. Certain crimes were, however, prosecuted by public organs in *iudicia publica*, namely, treason (*perduellio*), desertion to the enemy, certain types of murder (*parricidium*). Special criminal courts were later set up to deal with the more grave offenses against life and personal fame, adultery, and falsification of documents. Juries were introduced by Augustus, but they had no jurisdiction over Roman citizens. The state of the delinquent's will (*dolus*) was taken into account in criminal trials. Roman penology was concerned with the vindictive and deterrent aspects of penalties rather than the reformatory aspects.

What of the trial and death of Jesus? There is no dispute that the trial was before PILATE, and thus, at that stage, a Roman trial. Jesus was brought before Pilate by the Jewish authorities. Pilate asked him if he was King of the Jews, to which Jesus replied, "You say so" (Matt. 27:11 NRSV; NIV, "Yes, it is as you say"), which was tantamount to a plea of guilt of revolt against the Roman emperor and the king recognized by him. Such a confession would have been sufficient in Roman law for conviction of the defendant. Against this view, the Jewish trial theory is historically and theologically more widespread, and the whole complex question is exhaustively discussed by Haim H. Cohen, Justice of the Supreme Court of Israel, in an article in *Israel Law Review* [1967], 332.

What is the comparison between the common law of England with its adaptation to the United States of America and the law of the Romans? The method of both systems is casuistic. Generalizations and definitions are avoided. Both systems proceed from case to case in quest of a utilitarian set of rules, even at the price of some logical incoherence. There are noticeable differences, for example, in the notion of the family. The common law looks upon the family as a natural conception based upon marriage and consanguinity. The Romanist sees the family as a purely civil entity, into which, from antiquity, strangers could be admitted by adoption. Again, the sharp Roman distinction between possession and ownership is unknown to the common law. We have already noted that the concept of *hereditas* had the connotation almost of a person. The *heres* as a universal successor finds but faint resemblance to the common law executor or administrator. The Romans had no general theory of contract, but a law of contracts. Delictal liability is closer to the idea of vengeance than our criminal and tortious liability. But in both systems a developing trend toward equitable principles is discernible.

(See further A. Borkowski and P. du Plessis, *Textbook on Roman Law* [2005]; C. Ando and J. Rüpke, eds., *Religion and Law in Classical and Christian Rome* [2006].)

Roman religion

I. Italic foundations. The basic indigenous religion of ROME first took shape in the primitive and patriarchal agricultural community from which the nation emerged. Its form and nature were similar to those of the religions of neighboring Italic peoples, the Oscan and Umbrian tribes, which hemmed in

the enclave around the Tiber occupied by the Latin people. The primitive Roman religion may be glimpsed in Ovid's monumental *Fasti* and in parts of Varro, Livy, Macrobius, and Aulus Gellius. It was animistic, recognizing deity in spiritual presences rather than in the persons of anthropomorphic gods. Such spirits dwelt in and about natural features, rivers, woods, springs. Prospero's "elves of hills, woods, standing lakes and groves" (*Tempest* 5.1) touches the thought. They had power to aid or harm, and their presence was felt in the sense of awe that pervades the human spirit before nature's strength, beauty, power, or beneficence. As one stepped into the woods (*silva*), the heart might be lifted in prayer to Silvanus. Neptunus derives his name in like fashion from a primitive Italic word for water. Portunus was the tutelary spirit of harbors (*portus*). AUGUSTINE, in a satiric passage (*The City of God* 4.8), makes fun of this Roman faculty for coining names of deity, and no doubt in the strict sense of the word it was polytheistic; but it is a little less than just to the religious sense of the early Italian, who thought thus to address a power of which he was aware, and with which he sought contact, but which he could not envisage or wholly understand.

There was some concept of a supreme deity. Jupiter, or Diespiter, as he was primitively called, was the spirit of the sky (*diei pater,* father of day or of daylight) and was adapted to this role, but the early Italic farmer was more preoccupied with the spirits of his environment. These concerns account for such periodic festivals as the Saturnalia at the time of sowing (*sero satum*) and the Robigalia, which sought to avert blight (*robigo*) from the crop. The house was full of such spirit presences. Ianus was the spirit of the door (*ianua*), Vesta of the hearth (the primitive root means "to burn"), and the Penates the guardians of the stored food (*penus*). The *Lar familiaris* probably protected the slaves.

"In its sphere," wrote Cyril Bailey, "the functional will is powerful. It must be approached with a sense of awe—for this is what *religio* appears first to mean—but its normal relation to men is kindly, and its goodwill may be kept by the offering of appropriate gifts at the appropriate time" ("Religion and Philosophy," in *The Legacy of Rome* [1923], 240). Moreover these cults of the countryside persisted long after Roman religion was overlaid and transformed by importation from Greece and the E, even after the coming of Christianity. Augustine's attack was delivered not on the Greco-Roman pantheon, but on the little gods of the ancient litanies. In cults of local saints and rural rituals and feasts, it is possible to this day in country districts of Italy to find traces of the ancient religions absorbed into the practices of Christianity.

II. The religion of the city. The rural festivals, when Rome became the absorbing and central scene of Latin life, were maintained with appropriate new significance. Cyril Bailey, in the essay already quoted, summarizes well (pp. 243 – 44):

> The old rustic spirits took on new functions in their new surroundings: Iuppiter, the sky-spirit, and therefore the god of oaths sworn under the vault of heaven, becomes the deity of internal justice; Mars, in the main at any rate an agricultural deity in the earlier stage, becomes now the god of war. In this stage there are from our present point of view two features of special note. In the first place we have the gradual but unmistakable establishment of a state religion. The old cults had been in the hands of individual households: the state now takes them over and consecrates them to its own uses. A great temple is built on the Capitoline Hill—the centre of the new Rome—and in it is established the worship of a divine triad symbolizing the religious majesty of the state, at first Iuppiter, Quirinus, and Mars, symbol no doubt of the union of the two old settlements on the Palatine and Quirinal hills, and then, after Etruscan influence had made itself felt, Iuppiter, Iuno, and Minerva. A priestly hierarchy too was created, *flamines* for the

principal deities, and the college of *pontifices*, associated with many of the minor rites presided over by the *pontifex maximus*, who becomes the repository of sacred law and keeps the secret of the festival calendar, which he only reveals to the people month by month. The vague contract-notion in the earlier relation between god and man is embodied now in the juristic system of the state: the *ius divinum* becomes a department of the *ius civile*.

Just as the cults of the country permeated daily life, so the same beliefs and practices penetrated and infused the life of the larger household, the state. Augury and auspices, adopted from those experts in ritual and divination, the Etruscans of central Italy, dominated all the affairs of state. A real institutional religion with colleges of pontiffs and priests grew around such practice and provided model and framework for the church.

It was at this time that Rome also developed her practice of absorption. It was part of the spirit of the old Italian religion that it saw and recognized divine life everywhere—hence, the readiness to assimilate the cults and deities of subjected peoples. Minerva appears to have come from Falerii to be the patroness of trade guilds, Castor and Pollux from Tusculum, and Hercules, the Italian form of Heracles, from the southern Greek communities. It was a trait of Roman character, visible in the infinite adaptations of local government to serve the ends of her imperial control, that she found herself able so to assimilate. Hence, the clash of state and church when Christianity, which refused all compromise, demanded full commitment and an unchallenged monopoly over life.

III. The Greek invasion. "Captive Greece," wrote Horace, "led captive her fierce conqueror" (*Epistle* 2.1.156). This was true of religion as well as of literature and art. Rome's willingness to accept and receive met its most transforming challenge when the republic, becoming a Mediterranean and imperial power after the Punic wars that filled the second half of the 3rd cent. B.C., made wider contacts with the Greeks in Sicily and their own Hellenic homeland. Roman belief ran strongly in the direction of Greek ANTHROPOMORPHISM. Her native deities fused with the gods of the Greek pantheon. Jupiter was ZEUS; Hera, Zeus's consort, was therefore Juno. Neptune was Poseidon; Mars, Ares; Minerva, Athena; Diana, ARTEMIS; Mercury, HERMES; while Bacchus or DIONYSUS found his counterpart in the old nature spirit Liber.

The lesser deities were not omitted. Faunus, the old patron of agriculture and shepherding, became Pan. Curiously, APOLLO found no parallel. He was an early introduction from Etruria, in fact, and was accepted as a god of healing as early as 433 B.C. Games for Apollo, the *ludi Apollinares*, were established in 212 B.C. In AUGUSTUS'S day his cult, thanks to the enthusiasm of the prince for the god whose aid he had evoked at the decisive climax of Actium, was widely extended. The young bright god was, in the mind of Augustus, a symbol of hope for the new Rome he sought to create, and a central figure in the revival of old worship sponsored by the prince.

In Ennius (239 – 169 B.C.) and Plautus (251 – 184 B.C.), two of the earliest extant writers of Rome, one sees the process of identification almost complete. Perhaps the need to translate aided the process, a curious convention that extended its influence as far as the translators of the KJV, who, in the story of PAUL and BARNABAS at Lystra (Acts 14:12), render the Zeus and Hermes of the original as Jupiter and Mercury. Ennius (*Ann.* 1. frag.) gives the full list of the Greek deities under their Latin titles. This list falls into two hexameters: "Iuno Vesta Minerva Ceres Diana Venus Mars / Mercurius Iovis Neptunus Volcanus Apollo." Plautus does the same, adding Latona, Spes, Ops, Castor, Pollux, Virtus, Hercules, Summanus (identified with Pluto), Sol, and Saturnus, all of whom, except Latona and Summanus, had temples in Rome.

In the midst of this wholesale identification of Roman cults and deities with those of Greece, Italian cults of primitive antiquity were maintained in Rome itself and served by aristocratic priesthoods.

The Romans absorbed Greek deities like Nike, goddess of victory, pictured here on one of the buildings at Ephesus.

There is, for example, the priestly college of the Arval Brethren, an ancient agricultural cult that was restored by Augustus as part of his great religious revival in 21 B.C. A hymn of this primitive ritual dating back to the 5th cent. has been preserved, almost unintelligible in its ancient Latin, but significantly addressed to Mars, still an agricultural deity.

It is possible therefore to picture the religion of Rome in the 2nd and 3rd centuries B.C. as a composite and intermingled phenomenon, with ancient country cults in city dress, old deities—transformed and hellenized—worshiped in temples like those of the Greek world, Italian rituals of divination tangled with obscure Etruscan practice and attached to the worship of various deities in the service of the state, in all an astonishing syncretism of past and present, race and race. It was without doubt a vast confusion that contributed heavily to the prevailing skepticism in urban society in matters of religious belief—that skepticism which marked Roman society at the end of the republican era.

The result was that the gods of the pantheon became little more than the devices and ornaments of literature. The practice of official cults continued with little meaning, and under the protection of Roman conservatism was fed by a measure of superstition. In the countryside the old cults continued almost in their ancient forms. In the private practice of individuals religion took what form it could. Cyril Bailey concludes: "So beneath the surface of the Graeco-Roman religion the old faith survived: in the houses at Pompeii we find small shrines peopled with statues not of the Graeco-Roman hierarchy but of little Lares and Penates, and the real religious affection of Virgil—the most truly Roman of the poets for all his Greek culture—lies not with the gods of Olympus, but with the *di agrestes* of the Roman countryside. And if the common people thus possessed their souls in the old faith, salvation came also to the educated from the source which at first sight seemed the most destructive influence of all—Greek philosophy" (p. 247).

There is no doubt that, with the collapse of religious belief, philosophy provided a religion and a way of life for more thoughtful Romans (see GREEK RELIGION AND PHILOSOPHY II.C). Stoicism was

undoubtedly such a force for many Romans in the last century of the republic and the opening century of the empire. Epicureanism, in the minds of characters as varied as Cicero's friend Atticus and the poet Lucretius, also became a way of life and a system of belief. Cicero, Horace, Seneca, all in their different ways and to different depths of personal experience eclectics, found in philosophy the comfort and the steadying strength which an outmoded paganism denied them. But there was another outcome, for the starved Roman spirit sought satisfaction (see below).

Roman group statue representing the deities Ariadne, Bacchus, and Pan. (Terra-cotta, made in Tunisia, 2nd cent. A.D.)

IV. Eastern cults. The Roman faculty for adaptation and absorption of alien religions has already been noted. As the expansion of the geographical empire continued, more and more foreign deities confronted the Romans, and more and more of them found acceptance in her hospitable pantheon. The Greek gods moved in on the strength of Greek culture. They were part of the expanding empire of HELLENISM. Beyond Greece lay Asia with its vast complex of MYSTERY RELIGIONS and FERTILITY CULTS, and from Asia came the next great inflow of religious lore and experience into Rome. The situation indicates a vacuum in the Roman spirit that some sought to fill with philosophy, others with the exotic religions of the alien.

The state itself, in fact, once gave a lead. In one of those moods of collective self-condemnation that occasionally mark her history, as early as 204 B.C. at the end of the second war with Carthage, Rome had introduced from PHRYGIA in ASIA MINOR the cult of the Great Mother or Cybele. It was an

orgiastic cult, served by dancing drum-beating eunuch priests, with strange and horrible rites of mutilation and ecstatic experience. Such emotional refuge has been sought by certain types of mind in all ages in revolt against formalism and frigidity in accepted religion. The worship of Cybele in Rome became so popular that the senate was constrained to regulate it. It inspired the most weird of Catullus's poems (63).

Later, in the Mithridatic wars of the first half of the last pre-Christian century (88 – 63 B.C.), legionaries found the Cappadocian goddess Ma with its ritual of the *taurobolium,* or baptism in bull's blood, a path to "eternal rebirth." Later the conquest of Egypt brought the cult of Isis to Rome with its fastings and resurrection-drama (see OSIRIS). Such cults were entrenched before the end of the republic, and Augustus, endeavoring to restore the earlier Greco-Roman and more primitive Italian cults, found it impossible to suppress them. With similar urgency, and no doubt with no greater real success, the senate had sought, as early as 186 B.C., to crush the orgiastic rites of Dionysus in southern Italy where, through the influence of worshipers in the Greek communities, they had gained a foothold (Livy, *Hist*. 39.8 – 18; the senatorial decree, put out on this occasion, is a precious example of early Latin, *CIL*, 1.196). Habitually, such cults meet suppression by going underground.

By the 3rd cent. many other eastern cults, those of the Syrian ATARGATIS, the Phrygian Sebazios, and the Persian Mithras, were widely established. MITHRAISM may, indeed, be traced back to Sulla's day, but the 2nd and 3rd cent. A.D. were its heyday, chiefly in the Roman army. Mithraea are found in London and on Hadrian's Wall, and the cult of the god, not an ignoble one, was a serious rival of Christianity.

V. Caesar-worship. The worship of the spirit of Rome and the emperor has been dealt with under a separate heading (see EMPEROR WORSHIP). Suffice it to point out in conclusion that its concept, though finding origin in the deification of the rulers of the E, had roots in the old Italian concept of deified abstractions. If the mystery cults met the challenge of Christianity on the emotional level, and the monotheistic speculations of such writers as Cicero, Seneca, Epictetus, and Marcus Aurelius on the philosophical level, Caesarism met it on the social and political level. The Christian faith came to a world hungry, insecure, and unsatisfied, to a morally disintegrating society, and to utter religious confusion.

7. Text
8. Canonicity and authority

I. Authorship. If one disregards certain erratic schools of thought (such as the Dutch school of W. C. van Manen at the beginning of the 20th cent.) that have denied apostolic authorship to any of the documents in the *corpus Paulinum*, the Pauline authorship of Romans is uncontested. With GALATIANS and the two letters to the CORINTHIANS, Romans belongs to the four "capital epistles" (*Hauptbriefe*) that are basic material for determining the main lines of Paul's teaching. In one sense it is otiose to speak of the Pauline authorship of Romans and its three companion letters, since for most theological purposes "Paul" and "the author of Romans, Galatians, and 1 and 2 Corinthians" are synonymous terms.

II. Destination. In the opening salutation the addressees are denoted as "all in Rome who are loved by God and called to be saints" (Rom. 1:7; for the textual problem of the phrase "in Rome" see section VII below). The fact that Paul did not speak of the "church" in ROME may be significant; perhaps at this time there was no city-wide church in the city with a community consciousness of its own, as there was, for example, in CORINTH, where Paul himself had planted and tended the church. On the other hand, the fact that Paul can address a letter to all the Christians in Rome implies some assurance on his part that they would all have access to it. Even if the only church life in Rome was found in decentralized groups or household churches, the fact of their common faith in Christ would tend to give them a sense of fellowship one with another.

III. Christianity in Rome. There is no record of the planting of Christianity in Rome. The position of the city as the center of communications throughout the Roman empire would insure that Christianity, once it was securely established in the eastern provinces, would reach the capital sooner rather than later. The mention of "visitors from Rome (both Jews and converts to Judaism)" (Acts 2:10 − 11) as the only European contingent in the list of those present in Jerusalem at the first Christian PENTECOST may suggest that some of these, impressed by what they heard, carried the message back to Rome. In the 4th cent. the Latin writer conventionally called "Ambrosiaster," in the preamble to his commentary on this epistle, says that the Romans "had embraced the faith of Christ, albeit according to the Jewish rite, without seeing any sign of mighty works or any of the apostles." These words

probably preserve a sound tradition. What he wrote about the "Jewish rite" reflects the probable truth of the matter, that it was Jewish Christians who first carried the gospel to Rome. As late as the time of Hippolytus, early in the 3rd cent., Christian worship at Rome retained some elements derived from JUDAISM, and from "nonconformist" rather than normative Judaism (e.g., the preliminary bath of purification that converts were required to undergo on the Thursday preceding Easter, by way of preparation for their baptism on Easter Day itself, according to the Hippolytan APOSTOLIC TRADITION). That the base of Roman Christianity was Jewish—although when Paul wrote it comprised more Gentile than Jewish believers—is a natural inference from Rom. 11:13 – 24.

The Jewish colony that existed in Rome as early as the 2nd cent. B.C. was greatly augmented from 63 B.C. onward, after JUDEA was incorporated into the Roman empire; Cicero in 59 B.C. represented it as large, clannish, powerful, and influential. The city authorities from time to time tried to evict masses of undesirable immigrants, and occasionally the Jewish colony attracted their unfriendly attention in this regard. In A.D. 19, when TIBERIUS was emperor, there was a large-scale expulsion of Jews from Rome because of a financial scandal (Jos. *Ant*. 18.3.5ff.), but in a decade or two they were back in larger numbers than ever. CLAUDIUS, at the beginning of his principate (A.D. 41), took some steps to restrict them (Dio Cassius, *Hist*. 60.6), but about eight years later he resorted to the more drastic course of expulsion. This expulsion, mentioned in Acts 18:2, is ascribed by SUETONIUS (*Claudius* 25) to the Roman Jews' "constant indulgence in riots at the instigation of Chrestus." These last words are enigmatic; it is conceivable that at this time there was in Rome a Jewish agitator named Chrestus of whom nothing else is known. It is more likely that Suetonius reproduced a garbled version of the rioting which repeatedly broke out within the Jewish colony as a result of the introduction of Christianity. That on this occasion the expelled Jews included some who acknowledged Jesus as the Messiah is evident from the fact that Aquila and his wife Priscilla were among them; they appear to have been Christians before they met Paul in Corinth, for Paul never refers to them as though they were converts of his (see PRISCILLA AND AQUILA).

The expulsion under Claudius was no more durable than that under Tiberius. The edict may have been allowed to lapse with Claudius's death (A.D. 54), if not earlier; a few years later the Jewish colony in Rome was as flourishing as ever, and as before it included Jewish believers in Jesus. By the time Paul wrote the letter to the Romans, not more than eight years after the edict of expulsion, the Christian community in the capital comprised a considerable Gentile element which probably by that time outnumbered the Jewish membership. At any rate, Paul could assure his readers that their faith was "being reported all over the world" (Rom. 1:8).

The letter to the Romans was sent from Corinth to Rome.

Some idea of the composition of the Roman church at this time may be gathered from the greetings in Rom. 16, if one regards this chapter as destined for Rome (on this question see section VII below). Many people whom Paul had met at various places in the eastern provinces from time to time were then resident in Rome, so that he had many friends there, although thus far he had never visited the city. They included members of the households of certain scions of the HEROD family, and also two of Paul's kinsmen and fellow prisoners who, he says, "are outstanding among the apostles" (v. 7) and were Christians before he himself was, with one or two others like RUFUS (prob.), whose association with the Christian movement went back to the earliest days. The presence of such men and women in the Roman church, even if they were a handful in proportion to the total membership, must have contributed greatly to its strength.

It may be that by the time this letter was written Christianity was beginning to make its way into the upper strata of Roman society. In A.D. 57 the wife of Aulus Plautius (who had added Britain to the Roman empire fourteen years before) was accused before a domestic court of having embraced a "foreign superstition" which, from the description of her way of life, might have been Christianity (Tacitus, *Annals* 13.32). She was acquitted, and continued for the rest of her life to enjoy the esteem of her friends in spite of her retiring ways, which presented a sharp contrast to the social frivolity of many of her contemporaries. Some color is given to the view that her "foreign superstition" was Christianity by archaeological evidence for the prevalence of Christianity in her family in the following century.

By the time of the first great persecution of Roman Christians, which broke out as the sequel to the fire of A.D. 64, they were so numerous that a pagan historian (Tacitus, *Annals* 15.44) and a Christian father (*1 Clement* 6.1) both described the martyrs on that occasion as "a huge multitude." The Roman church survived the ordeal and continued to increase and enjoy the esteem of Christians throughout the world as a church "worthy of God, worthy of honour, worthy of praise, worthy of success, worthy in purity, pre-eminent in love, walking in the law of Christ and bearing the Father's name" (Ignatius, *To the Romans*, preface). See further ROME, CHURCH AT.

IV. Occasion, purpose, and date. The writing of this letter is a milestone in the course of Paul's ministry as apostle to the GENTILES. In Acts 19:21 LUKE says that toward the close of his three years' evangelization of EPHESUS and the province of ASIA, Paul planned to visit MACEDONIA and ACHAIA, the theater of an earlier phase of his ministry, and then go to JERUSALEM, adding, "After I have been there…I must visit Rome also." Luke puts the matter from his own perspective: Rome is the goal of his narrative, and when he has brought Paul there some years later and portrayed him preaching the gospel unhindered at the heart of the empire, under the eyes of the highest authorities, he has achieved his purpose. Paul's perspective was different; to him, Rome was not a goal but a place he must visit in transit, or at best a base from which he could set out on a further phase of his ministry, with a view to repeating in the western Mediterranean the program which (at the time indicated in Acts 19:21) he had almost completed in the eastern regions. That Paul's plan for this westward advance was conceived around the time indicated by Luke may be gathered from this letter.

With the evangelization of the province of Asia, Paul had completed his program of missionary pioneering in ASIA MINOR and the AEGEAN world. The gospel had been preached and churches had been planted in the principal cities and along the principal roads of Galatia, Asia, Macedonia, and Achaia. During the brief visit to the Balkan peninsula which followed his Ephesian ministry, Paul carried the gospel farther W than he had previously done, at least as far as the border of ILLYRICUM (Rom. 15:19), the province on the eastern shore of the Adriatic. In his own words, "there is no more place for me to work in these regions" (15:23). His missionary zeal had not weakened through the arduous experiences of the past years; there were other non-Jewish lands to be won for the gospel, and the responsibility of evangelizing them rested peculiarly on Paul as the Gentiles' apostle par excellence. Some lands along the Mediterranean seaboard had, however, been evangelized already by others than Paul; he looked for virgin soil, for territory where the name of Christ had never been heard. SPAIN, the oldest Roman province in the W and an important bastion of Roman civilization, was such a place; to Spain, then, Paul decided to go and continue his apostolic service there.

Aerial view of the remains of ancient Rome. (View to the NNE.)

First, however, he determined to go to Jerusalem and give an account of his stewardship thus far —not his stewardship to the church of Jerusalem or its leaders, for he denied that he had in any sense

been commissioned by them, but to the risen Christ. One may ask why he should have thought it necessary to go to Jerusalem for this purpose; could he not have accomplished it in Ephesus or Corinth? Perhaps he could have done so; but a consideration of his reason may help to understand the place which Jerusalem held in Paul's thinking. Although it was in DAMASCUS that he first began to preach the gospel, he describes the first stage of his mission as having been fulfilled "from Jerusalem all the way around to Illyricum" (Rom. 15:19), as though Jerusalem were his point of departure. It was in Jerusalem many years before that Paul had a vision of the Lord in the temple and heard his command: "Go; I will send you far away to the Gentiles" (Acts 22:21). To that same spot he would return and present to his Master as a spiritual sacrifice the fruit of his "priestly duty of proclaiming the gospel of God" (Rom. 15:16).

He planned also to take with him to Jerusalem delegates of the Gentile churches he had founded in the Aegean provinces, bearing gifts from their churches as a contribution to relieve the poverty of the mother church in Jerusalem; thus, he hoped, the bonds of fellowship would be more securely forged between those churches and the headquarters of Jewish Christianity, where the Gentile mission in general, and Paul's activity in particular, tended to be viewed with misgivings and suspicion. When this service had been completed, and not before, he would be free to turn his steps in the direction of Spain. On the route to Spain he would have an opportunity of realizing an ambition cherished for many years—the ambition of seeing Rome. Roman citizen though he was from birth, he had never visited the city. It was, therefore, in large measure to prepare the Christians of Rome for his projected visit that he sent them this letter.

The date of the letter is probably to be fixed at some point in the winter of A.D. 56 – 57. The chronology of this phase of Paul's career can be determined to some degree by the inscriptional evidence from Delphi dating GALLIO'S entry on the proconsulship of Achaia (cf. Acts 18:12) in the summer of the year 51 (or, less prob., 52), and by the numismatic evidence pointing to 59 as the year of FELIX'S supersession by FESTUS in the procuratorship of Judea (cf. 24:27). In terms of the narrative of Acts, the writing of the letter may be placed during Paul's three months in Greece (20:3). The reference to his host GAIUS (Rom. 16:23, valid evidence whatever the destination of this chapter may have been) points to Corinth as the city where Paul was resident at the time (cf. 1 Cor. 1:14); so does the reference to "Erastus, the city treasurer" (Rom. 16:23 NRSV)—if, as seems likely, this ERASTUS is to be identified with the man of that name mentioned as curator of public buildings in a Corinthian inscription uncovered in 1929 (cf. NIV, "the city's director of public works").

In addition to paving the way for his visit to Rome, Paul hoped to secure the good will of the Roman Christians to such an extent that they would provide him with a forward base for his Spanish mission—in the way, for example, that ANTIOCH OF SYRIA had served as a base for BARNABAS and himself when they evangelized CYPRUS and the cities of S GALATIA. (This element is perhaps taken too far by R. Jewett, *Romans: A Commentary* [2007], who argues vigorously that the primary purpose of the letter is "to gain support for a mission to the barbarians in Spain, which requires that the gospel of impartial, divine righteousness revealed in Christ be clarified to rid it of prejudicial elements that are currently dividing the congregations in Rome" [p. 1].)

Paul knew that outside his own mission field (and even to some degree inside it) his reputation suffered from the criticisms of his opponents. Therefore he availed himself of the opportunity to place before the Roman Christians a systematic statement of the GOSPEL as he understood and proclaimed it, and of his policy as apostle to the Gentiles. He does not impose his authority on these readers as he does when he writes to his own converts; yet he makes it plain that the authority by which he carries on his ministry is imparted to him by the risen Christ, who called him to be his apostle.

The gospel expounded in this letter is recognizably "the gospel according to Paul" as known from his other letters, and especially from Galatians. Whereas Galatians was an urgent response to a critical situation in Paul's mission field, Romans is a more dispassionate and orderly unfolding of the same theme to which Galatians is related "as the rough model to the finished statue" (J. B. Lightfoot, *St. Paul's Epistle to the Galatians*, 10th ed. [1890], 49; for current debate on the purpose of Romans see the bibliography at the end of the article). A great deal of the present letter was therefore of general interest, and it is probable that from the first, at Paul's own instance, copies of it were circulated to other churches as well as to that in Rome (see section VII below).

How well the letter accomplished its immediate purpose is uncertain; not for three years was Paul able to visit Rome, and when he came it was not as a free agent but as a prisoner under armed guard to stand trial before Caesar, to whose supreme court he had appealed from the jurisdiction of the procurator of Judea. The reception of the letter may have had something to do with the welcome he received from some Roman Christians as he approached their city along the Appian Way, when he was still some 40 mi. distant. "The brothers there," says his companion Luke, "had heard that we were coming, and they traveled as far as the Forum of Appius and the Three Taverns to meet us. At the sight of these men Paul thanked God and was encouraged" (Acts 28:15).

V. Outline

1. Prologue (Rom. 1:1 – 15)
    1. Salutation (1:1 – 7)
    2. Introduction (1:8 – 15)
2. The foundation of Christian doctrine (1:16—8:39)
    1. The theme of the gospel: the righteousness of God revealed (1:16 – 17)
    2. Sin and retribution: the universal need diagnosed (1:18—3:20)
        1. The pagan world (1:18 – 32)
        2. The moralist (2:1 – 16)
        3. The Jew (2:17—3:8)
        4. All mankind under condemnation (3:9 – 20)
    3. The way of righteousness: the universal need met (3:21—5:21)
        1. God's provision (3:21 – 31)
        2. An OT precedent (4:1 – 25)
        3. The blessings that accompany justification: peace, joy, hope (5:1 – 11)
        4. The old and the new humanity (5:12 – 21)
    4. The way of holiness (6:1—8:39)
        1. Freedom from sin (6:1 – 23)
            (1) A supposed objection (6:1 – 2)
            (2) The meaning of baptism (6:3 – 14)
            (3) The slave market analogy (6:15 – 23)
        2. Freedom from the law (7:1 – 25)
            (1) The marriage analogy (7:1 – 6)
            (2) The dawn of conscience (7:7 – 13)
            (3) The conflict within (7:14 – 25)
        3. Freedom from death (8:1 – 39)
            (1) Life in the Spirit (8:1 – 17)

VI. Contents

A. Prologue (Rom. 1:1 – 15). Paul expands the opening salutation (Rom. 1:1 – 7) to emphasize his special calling and the nature of the gospel which he has been commissioned to proclaim. The gospel has God as its author and his Son Jesus Christ as its subject matter; it is no innovation, but was promised of old by the prophets. Jesus Christ traced his human lineage from King DAVID (this is part of the early Jewish KERYGMA, calculated to show that Jesus possessed the genealogical credentials for the Davidic messiahship); but his RESURRECTION, accomplished by the power of the HOLY SPIRIT, set him forth "with power" as "Son of God." To bring the nations under the Son's obedience Paul, his servant, had been chosen by him and endowed with apostolic grace. Since Rome belongs to the Gentile world it falls within the sphere of Paul's apostleship, and to the Christians of Rome he

addressed himself with his customary greeting of "grace and peace."

The introduction to his argument (Rom. 1:8 – 15) assures his readers that he regularly prays for them and thanks God for them, since he is well acquainted with their good reputation, and explains that his reason for not having visited them was lack of opportunity, since he has often planned to see them, in order to preach the gospel at Rome as elsewhere in the Gentile world and enjoy mutual fellowship and refreshment in their company. The preaching of the gospel is for him an obligation he will never have fully discharged as long as he lives.

B. The foundation of Christian doctrine (Rom. 1:16—8:39). The main section of the letter begins with a brief statement of the nature and theme of the GOSPEL: it is God's mighty means for the salvation of all believers, Jew and Gentile alike, and it displays the RIGHTEOUSNESS of God—not merely God's righteous character but his gracious bestowal of a righteous status on believers, in accordance with Hab. 2:4, which Paul possibly construes to mean, "he who through faith is righteous shall live" (Rom. 1:16 – 17).

The necessity for sinners to receive God's righteousness by faith if they are to receive it at all is then unfolded (Rom. 1:18—3:20). Stage by stage the moral bankruptcy of humanity is demonstrated. A somber backdrop to the GRACE of God in the gospel is the WRATH of God manifesting itself in human history: wrong ideas of God lead to wrong ways of life. The indictment of the pagan world (1:18 – 32) was not only common form in Jewish literature of the time; it could also be corroborated in the judgment of many Gentile writers. The repeated "God gave them over" (vv. 24, 26, 28) bespeaks the working of divine RETRIBUTION in history. The statement that people had the knowledge of God at their disposal in his works of creation (vv. 19 – 20) is paralleled by Paul's speech to the Athenian AREOPAGUS (Acts 17:24 – 31); the differences of perspective between the two passages are due to the different audiences addressed. The moral argument of these verses had already been summarized in Jewish literature: "For the idea of making idols was the beginning of fornication, and the invention of them was the corruption of life" (Wisd. 14:12).

Paul then envisages a bystander applauding this denunciation of pagan immorality and turns on him to assure him that he is in no better case (Rom. 2:1 – 16). Such denunciations can be paralleled among pagan moralists as well as among Jews of that period, and although Paul had a Jewish critic in mind from the outset of ch. 2, his language through v. 16 would be largely applicable to such a pagan as SENECA. It is not enough to avoid the grosser forms of immorality if one is involved in the society which fosters them or practices essentially the same vices in a more refined way. The JUDGMENT of God is completely impartial; it is proportioned to the works of each person, whether Jew or Gentile, moralizer or libertine. If some people presume that since divine retribution has not manifested itself in their lives in the manner detailed in ch. 1, they are exempt from that judgment, let them thank God for his goodness, and reflect that this goodness is a sign of God's patience, giving them opportunity to repent. If Jews break the LAW of Moses, they must repent of their transgression, but the fact that Gentiles have not received that law does not exempt the latter from the necessity of REPENTANCE: they have a divine law written in the conscience; when they break it they know that they are doing wrong, and will be judged in the light of it at the last judgment.

A marble statue of Emperor Claudius, who ordered the expulsion of Jews from Rome in the early 50s.

Turning more directly to the Jews (Rom. 2:17 – 29), Paul writes that they have no cause to suppose that they enjoy a position of special favor before God because of the privileges God has lavished on the nation. It is not the knowledge but the doing of the law that is important. The Jew who knows the will of God by REVELATION is more guilty if he disobeys it than the Gentile who has no such knowledge. There are many ways of breaking the divine commandments, and when Paul applied to the reputation of Jews in the Roman empire the words of Isa. 52:5—"God's name is blasphemed among the Gentiles because of you" (Rom. 2:24)—he said something that found corroboration in both Jewish and Gentile writers of the period. What is of primary importance is that a person's heart must be right with God; apart from that, the knowledge of the law and the covenant of CIRCUMCISION are valueless. God will accept an uncircumcised Gentile who does his will rather than a circumcised Jew who does not. It is the circumcision of the heart that matters (cf. Deut. 10:16); by etymology the true Jew is the person whose life wins "praise" from God (Rom. 2:28 – 29; cf. Gen. 29:35; 49:8), and such praise is not confined to people of any one race.

If this is so, someone may ask, is there any advantage in being a Jew? This quotation of a question or objection by someone breaking into Paul's argument is a feature of the DIATRIBE style of Greek rhetoric, repeatedly used by the apostle in this letter. Paul's reply is that there is great advantage in belonging to the people to whom the oracles of God were committed, in order that they

might be the instrument for the accomplishment of his purpose in the world. It is true that some of them proved unfaithful to their trust, but since God is God, no imperfection in the instrument can thwart his purpose. Nor can he be blamed for not foreseeing such imperfection: no lawsuit against God can ever succeed. Nor can those who have been unfaithful to their trust claim indulgence because their unfaithfulness has been overruled by God for his glory: the doing of evil that good may come is always to be condemned (Rom. 3:1 – 8).

Despite the advantages inherited by Jews, their failure to treat these advantages responsibly means that before God they have no claim to favor over Gentiles. A CATENA of OT passages, establishing the sinfulness of all mankind, applies to Gentiles but in the first instance to Jews, since they were the people with whom the sacred writers were primarily concerned. The whole world is bound to plead guilty at God's tribunal; no one can expect to be justified there on the ground of his works or his obedience to God's law; the law which sets forth God's will reveals in the event the sinner's inability to do that will (Rom. 3:9 – 20).

Every attempt of human beings to establish their own righteousness before God being ruled out of court, the way is open for the introduction of God's way of righteousness, and to this Paul devotes the crucially important passage which follows (Rom. 3:21 – 23). The first part may be paraphrased thus:

> But now a way to get right with God has been revealed, apart from the righteousness prescribed in the law. This way, which is attested by the law and the prophets, is provided by God through faith in Jesus Christ, for all who believe in him. There is no difference: Jew and Gentile alike have sinned, and all fall short of God's glory; but Jew and Gentile alike can be brought into a right relationship with God and secure his pardon. This they receive freely, by his pure grace, because of the redemptive work accomplished by Christ Jesus. He has been set before mankind by God as the One whose sacrificial death has made atonement for sin, and what he has procured becomes effective in a person through faith. God's righteousness has been demonstrated; in his forbearance he passed over sins committed before Christ came, instead of exacting their proper penalty, and he did so in prospect of the demonstration of his righteousness in this present epoch. While remaining perfectly righteous, he pardons those who believe in Jesus and brings them into a right relationship with himself.

The "sacrifice of atonement" (Rom. 3:25) provided in Christ averts the wrath mentioned earlier (1:18) and wipes out the sinner's guilt. It is not an act by which the sinner attempts to placate God (as if such a thing were possible) but an act in which God graciously takes the initiative. The phrase "sacrifice of atonement" renders one Greek word, *hilastērion G2663*, used elsewhere in the Greek Bible for the MERCY SEAT where God assured his people, when they confessed their sin through their sacerdotal representative, of his forgiveness and acceptance. What was done by a ritual object lesson has now been accomplished effectively in Christ "by his blood"; and all may share in its benefits by resting their faith in him. See also ATONEMENT; EXPIATION; PROPITIATION.

If this is God's way of justifying men and women, it affords them no opportunity of taking any credit to themselves; it springs from his grace, not their merit. It is a way open on equal terms to Jew and Gentile, since God is the God of both; therefore neither has now any advantage over the other. Moreover, far from setting the law aside, it vindicates the law (Rom. 3:27 – 31). (Since the publication of E. P. Sanders, *Paul and Palestinian Judaism: A Comparison of Patterns of Religion* [1977], there has been considerable debate regarding Paul's view of "works of law" and related

topics. See the essays in D. A. Carson et al., eds., *Justification and Variegated Nomism*, 2 vols. [2001 – 04].)

To show how the principle of JUSTIFICATION by FAITH vindicates the law, Paul returns to the account of ABRAHAM in Genesis (Rom. 4:1 – 25). If obedience to God's will were the ground of justification, Abraham could make a good case for himself (cf. Gen. 26:5). According to the record, the ground of Abraham's justification was his simply taking God at his word: "Abraham believed God, and it was credited to him as righteousness" (Rom. 4:3, quoting Gen. 15:6). The place which this OT text already occupied in Paul's thinking may be seen from his use of it in Gal. 3:6. When he proceeds to speak of God as he "who justifies the wicked" (Rom. 4:5), the apostle boldly declares that God in the gospel does the very thing which in the law he says he will not do (cf. Exod. 23:7, "I will not acquit the wicked," where LXX has the same verb and noun as Paul uses).

Before developing the argument about Abraham, Paul looks at another OT use of the Hebrew verb ḥāšab H3108 ("credit, reckon, count"): "Blessed is the man / whose sin the LORD does not count against him" (Ps. 32:2; cf. Rom. 4:6 – 8). The nonreckoning of sin to the sinner is equivalent to his being reckoned righteous. Abraham's case was not isolated; DAVID'S testimony was similar.

Reverting to Abraham, Paul asks whether his faith was reckoned to him as righteousness before or after he was circumcised (Rom. 4:9 – 10), but the apostle has no need to labor the point: Abraham was justified by faith while he was uncircumcised, years before he received the covenant of circumcision (Gen. 17:24). In this fact Paul finds a charter admitting Gentile believers, equally with Jewish believers, to the status of Abraham's heirs. It is faith, not circumcision, that is relevant. Abraham's spiritual fatherhood of Gentile as well as Jewish believers was adumbrated when God gave him a new name and said, "I have made you the father of many nations" (Rom. 4:17, quoting Gen. 17:5). His faith was no easy faith: it was faith exercised in the face of an overwhelming weight of circumstances that for most people would have made such faith seem ridiculous. But in Abraham's eyes the promise of God absolutely outweighed all those circumstances, making them of no account; he believed the bare promise before there was any external sign or likelihood of its coming to pass, and this was counted to him for righteousness. In the same way, God confers a righteous status on all who believe the Word he has spoken through the crucified and risen Jesus.

Having thus demonstrated the biblical foundation of the good news of justification by faith, Paul proceeds to describe the blessings that accompany it in the believer's life (Rom. 5:1 – 11). A textual problem arises in v. 1 because of the common confusion between the vowels *omicron* (Gk. o) and *omega* (■ or "long" *o*) in the copying of MSS: the first variant (*echomen*) yields the rendering "we have peace" and suits the context better than the somewhat more strongly attested "let us have peace" (*echōmen*). PEACE, JOY, and HOPE are the boons which the justified enjoy, no matter what afflictions they have to endure. Their endurance produces strength of character, but best of all, the Holy Spirit whom they have received, and who conveys these boons to them, has poured the love of God into their hearts. The saving work that has been so effectually inaugurated in their lives will continue until its consummation at the end time; when the eschatological wrath is poured out, they will be delivered from it by the Savior who has already procured their justification by the shedding of his blood. This is their hope, both sure and joyful; meanwhile they "rejoice in God through our Lord Jesus Christ, through whom we have now received reconciliation" (v. 11).

Paul's account of God's way of righteousness concludes with a parallel drawn between the old humanity and the new (Rom. 5:12 – 21). ADAM, head of the old CREATION, who involved his posterity in SIN and DEATH through his disobedience, is set over against Christ, Head of the new creation, who brings his people into righteousness and life through his obedience. This is one of the two classic

passages where Paul develops the concept of Christ as the second Adam (the other is 1 Cor. 15:20 – 23, 45 – 49). This concept can be traced elsewhere in his letters and may be linked with teaching associated in other parts of the Bible with the figure of the SON OF MAN. By the redemptive work which the gospel proclaims, the old "Adam-solidarity" of guilt and despair is shattered, to be replaced by the new "Christ-solidarity" of pardon and hope. For the saving effects of Christ's obedience (his lifelong obedience culminating in the crowning obedience of his submission to death) are much more comprehensive and far-reaching than the ruinous effects of Adam's disobedience.

If it be asked what place the law has in this concept, the answer is that it does not affect the great issue of death in Adam versus life in Christ; the law was introduced to bring to light the sin that was already latent. This it did, and at the same time it stimulated an increase in acts of sin. "But where sin increased, grace increased all the more" (Rom. 5:20).

From his exposition of the way of righteousness (Rom. 3:21—5:21), Paul continues in chs. 6 – 8 to speak of the way of HOLINESS, and he introduces this subject by supposing a questioner who, having heard him say that "where sin increased, grace increased all the more," asks why one should not go on sinning in order that grace may continue to abound (6:1). The question was probably not an imaginary one; Paul knew some members of the Gentile churches whose conduct seemed to be based on just such an argument. He replies that there can be no peaceful coexistence between death to sin and life in sin and shows what he means by two arguments: (1) he brings out the practical implication of BAPTISM (vv. 3 – 14), and (2) he draws an analogy from the institution of SLAVERY (vv. 15 – 23).

Baptism "into Christ Jesus" betokens incorporation into him, so that henceforth baptized believers are "in Christ Jesus"; sharing Christ's death they have died to the old way, and sharing his resurrection they live in the new way (see UNION WITH CHRIST). To live in sin would be, for such persons, a contradiction of their life in Christ; it would be repudiating their BAPTISM, severing themselves from Christ. As it is, the persons they once were (the "old self" of Rom. 6:6) are no more; the life they now live is the life which the risen Christ lives out in them. Christ died once in relation to sin (as the sin-bearer) but death has no more power over him; similarly, those in Christ are "dead to sin but alive to God" (v. 11) and are no more compelled, as they once were, to let their limbs and faculties be used for sin. They should therefore dedicate them to God as instruments to do his will, and they will find themselves liberated from the dominion of sin. The phrase "not under law, but under grace" (v. 14) in this context underscores the close association in Paul's mind between law and sin (cf. 7:4 – 13).

Sin, in other words, can be personified as a slave owner. The slave is forced to do his master's bidding. If the slave dies, his master has no further power over him. Similarly, those who are in Christ have died as far as their relation to sin, their former slave-owner, is concerned. Or, to change the figure somewhat, if the slave becomes the property of another master, he is henceforth bound to obey the new master, not the old one. So believers, formerly slaves of sin, have now been liberated into the free service of God. Their former master paid them the wages of death; their new Master gives them life in Christ—not as a reward for service rendered, but as a free gift.

Law, which is good, nevertheless stimulates sin, which is bad. Law reveals and denounces sin but cannot bring deliverance from it. To be liberated from sin to righteousness is one side of a coin, the other is liberation from law to grace. From the subject of freedom from sin (Rom. 6) Paul turns to its cognate: freedom from law (ch. 7). To illustrate this aspect of Christian freedom he has recourse to another legal relation: that between husband and wife. By law a wife is bound to her husband so long as he lives; only if he dies is she free to marry another man. (Whether Paul is thinking of Roman or Jewish law makes little difference.)

In the application of the analogy the husband is the law and the wife is the believer, but it is not the law that dies, but the believer who has died with Christ. The point, however, is that, as death breaks the marriage bond, so the believer's death with Christ breaks the bond that bound him to the law and sets him free to be united "to him who was raised from the dead" (v. 4). Union with the law stimulated sinful passions and produced fruit for death; union with Christ enables one to deny those passions and bring forth fruit for God. One may surmise that Paul's Jewish-Christian readers understood his argument better than the Gentile Christians, whether they approved of it or not. Admittedly, Paul's language about the law runs counter to the traditional testimony of Jewish piety, but he spoke out of the experience of one who had exchanged the bondage of the old "written code" for "the new way of the Spirit" (v. 6).

Romans 7:7 – 25 is written in the first person singular, but the first part of the passage uses the past tense, giving way in v. 14 to a section written in the present tense. Ostensibly both sections are autobiographical, and although the view that they are truly autobiographical has been relegated by some "to the museum of exegetical absurdities" (P. Demann, cited in F. J. Leenhardt, *The Epistle to the Romans* [1961], 181), the poignancy of much of the language still compels some readers to discern no "abstract argument but the echo of the personal experience of an anguished soul" (M. Goguel, *The Birth of Christianity* [1953], 213 – 14). Perhaps one can say that "here Paul's autobiography is the biography of Everyman" (T. W. Manson in *Peake's Commentary on the Bible,* ed. M. Black [1962], 945). At one level Paul describes his innocent boyhood and the growing sense of bondage after he assumed personal responsibility to keep the law, finding that it tempted him to do the very thing it forbade. At another level he probably was describing Adam before and after the prohibition to eat of the forbidden tree; at still another he recapitulates the history of the human family —before the giving of the law ("from Adam to Moses," 5:14), after the giving of the law (cf. 5:20), and then freed from the law in Christ (7:25a; cf. 5:21).

After this portrayal of the dawn of conscience, Paul continues in the present tense to describe the inner conflict experienced by one who approves the divine law and desires to keep it, but is prevented from doing so by "another law" which forces him against his will to do the evil that he loathes. "I myself in my mind am a slave to God's law, but in the sinful nature a slave to the law of sin" (Rom. 7:25b); a person's own resources, for all the excellence of his intentions, are inadequate for doing the will of God and defying the power of evil. Only "through Jesus Christ our Lord" (v. 25a) comes the strength for this.

Such strength is available for all "who are in Christ Jesus" (Rom. 8:1); there is no reason why they should go on in a state of penal servitude (which may be the meaning of "condemnation" in 8:1). A new principle has begun to live within them, "the law of the Spirit of life" (8:2), and liberates them not only from the thraldom of sin and the bondage of the law, but from death itself. This is the theme of ch. 8, where the mainspring of the way of holiness—the presence of the life-giving Spirit in the believer—is fully unfolded.

Life in the Spirit (Rom. 8:1 – 17) enables the believer to fulfill "the righteous requirements of the law" (v. 4) as life under the law could not, because of the unsatisfactory human material with which the law had to operate. The Son of God, bearing our humanity, presented himself as a sin offering (v. 3), and carried that humanity into death and out of it into resurrection: now "the Spirit of him who raised Jesus from the dead" dwells in his people (v. 11) and imparts new life and resurrection power to them. Christian holiness is not a matter of painstaking conformity to an external code; it is rather a matter of the Spirit's producing in the believer's life those graces which were seen in perfection in the life of his Lord. The possession of the Spirit of Christ is the Christian's

indispensable hallmark (v. 9). It is the Spirit who enables us to realize our heritage as sons of God and to acknowledge this by calling God ABBA ("father") as Jesus himself did (vv. 15 – 16). The Spirit, moreover, conveys the assurance of the future quickening of this mortal body and of the glory to be shared with Christ by those who suffer for him now (vv. 11, 17).

This coming glory (Rom. 18 – 30) will not only compensate the believer for the trials endured in the present age; it is something to which all creation eagerly looks forward, for when the sons of God are revealed in glory, all creation will be released from the frustration under which it has labored since the fall (vv. 19 – 22). This investiture with glory will coincide with the day of resurrection, "the redemption of our bodies" (v. 23), when the saving effect of the PASSION of Christ will be consummated and believers will be manifested as sons of God. Till that day dawns, the Spirit helps them in their weakness, intercedes on their behalf, and cooperates with them in everything for good (vv. 26 – 28). When it dawns, it will be recognized as the fulfillment of God's eternal purpose, conceived when he foreknew and foreordained his people in Christ before the world's foundation (vv. 29 – 30). The verb "glorified" in v. 30 is in the past tense because, although it refers to a future experience, its accomplishment is settled already in the counsel of God.

With such a hope, the believer may well exult in God (Rom. 8:31 – 39). Though all things seem to be against him, God is for him; though men condemn him, Christ at God's right hand is his all-prevailing advocate and intercessor. Neither earth's privations nor hell's hostility can separate believers from the love of God, manifest and active in Christ.

C. The righteousness of God in history (Rom. 9:1—11:36). This section may seem to be a parenthesis in the argument of the letter, but in Paul's mind they were crucially necessary. The fact that the people who had been specially prepared for the gospel declined for the most part to believe it, although it was from their midst that the Christ himself came "according to the flesh" (9:5 NRSV), presented Paul and no doubt many of his contemporaries with a problem in THEODICY. Had God's purpose gone awry? Was he lacking in foresight? Surely, if Paul's claims were valid, his own kith and kin would have been the first to acknowledge them. Paul appreciated the problem all the more because in his earlier days he himself had been involved in Israel's unbelief. As he faces the problem, he begins with the particular issue of Jewish resistance to the gospel and ends with an exposition of the divine purpose in history.

The first two answers he gives to the problem are these: (1) The Jewish resistance to the Gospel has come about in the unchallengeable ordering of God's electing purpose (Rom. 9:6 – 29). (2) In resisting the gospel Israel is following a precedent repeatedly shown throughout her history (9:30—10:21). To these Paul adds two more, much more hopeful in tone: (3) The fact that a REMNANT of Israel has believed the gospel is the token that Israel as a whole will yet do so (11:1 – 16). (4) If Israel's present rejection of the gospel has meant so much blessing for Gentiles, Israel's future acceptance of the gospel will mean even greater blessing for the world (11:17 – 32).

(1) God's sovereign choice (Rom. 9:6 – 29). Throughout sacred history God has chosen one and set aside another. Of the sons of ABRAHAM, God chose ISAAC and not ISHMAEL; in the next generation, of the two sons of Isaac, he chose JACOB and not ESAU, giving notice of his choice before either Jacob or Esau was born, in order to establish his sovereignty in ELECTION (9:6 – 13). Even those who have been set aside promote his purpose, whether willingly or not: PHARAOH, so stubborn of heart, was a signal instrument in God's hand for the display of his power and the exaltation of his name: "Therefore God has mercy on whom he wants to have mercy, and he hardens whom he wants to harden" (9:14 – 18).

To the complaint that God is unjust in acting thus, since no one can resist his decree, the

uncompromising answer is given, following the precedent of OT prophets (cf. Isa. 29:16; 45:9), that the pot has no right to complain of the potter's workmanship. What if God chose to make some "vessels," from Gentiles as well as from Jews, to be recipients of his mercy, and others to be destroyed, object lessons of his judgment? Paul did not say that God has in fact done this latter thing, but argued that, if he chose to do so, no one is competent to call him to account (Rom. 9:19 – 24).

What God in fact has done, says Paul, is to display his mercy in uncovenanted fashion, by calling as his people those who had no claim to be so designated (in accordance with a principle revealed in Hosea) and preserving only a remnant of his former people Israel (in accordance with a principle emphasized in Isaiah). So the apostle concludes his first exposition of God's way of election (Rom. 9:6 – 29), but he will revert to this subject before the end of his present argument.

(2) Israel's responsibility (Rom. 9:30—10:21). If on the one hand Israel's unbelief exemplifies divine election, it has to be seen on the other hand in terms of human responsibility. The stone of stumbling described in Isa. 28:16, realized in Christ and the gospel, had tripped them up, because they did not entrust themselves to it and so avoid being put to shame (9:30 – 33).

With a further confession of his heartfelt longing and prayer for his kinsmen's salvation, Paul ascribes their present unbelief and unenlightened zeal to their ignorance of God's way of righteousness (Rom. 10:1 – 3). They pursued the righteousness based on the law, in terms of Lev. 18:5 (living by doing), not knowing that with the coming of Christ an end has been put to the age of law, so that now it is every believer who is justified. This way of righteousness by faith was foreshadowed in Deut. 30:11 – 14, here interpreted as teaching that righteousness and salvation come to those who confess Jesus aloud as Lord and believe in him inwardly as the risen One (Rom. 10:4 – 8). To the same effect is the assurance of the passage about the stone of stumbling already quoted: "Anyone who trusts in him will never be put to shame" (10:11; cf. 9:33). This assurance applies equally to Jew and Gentile: "There is no difference" between them because all have sinned (3:22 – 23), but also "there is no difference" (10:12) because all receive God's abundant mercy on an equal footing: "every one who calls upon the name of the Lord will be saved" (10:13).

They had to hear his saving name proclaimed before they could believe in him, but there was ample opportunity for this: the preachers had sped far and wide with the joyful news, and in every part of the world where there were Jewish communities it had now been made known (cf. Ps. 19:4). If Israel did not believe, it was not for lack of hearing; their refusal to pay heed to what they heard gave substance to the prophet's complaint: "Lord, who has believed our message?" (Rom. 10:16, citing Isa. 53:1). In the gospel God's hand had been stretched out "to a disobedient and obstinate people" (Rom. 10:21, citing Isa. 65:2), whereas the Gentiles, who previously had had no relationship with the God of Israel, seized eagerly on the gospel blessings when they first heard of them, thus for their part fulfilling other OT prophecies. Among these is the passage in the Song of Moses where God tried to make Israel jealous by means of "those who are not a nation" (Deut. 32:21, interpreted of the Gentiles in Rom. 10:19). The nature and effect of this jealousy will appear in ch. 11; meanwhile, Paul has made his point that Israel refused the gospel in spite of every opportunity to accept it (10:14 – 21).

(3) Israel's alienation not final (Rom. 11:1—16). It must not, however, be thought that Israel's present unbelief and setting aside are permanent. As in OT days the preservation of a remnant carried with it hope for the future, so now the existence of "a remnant chosen by grace" (to which Paul himself belongs, 11:5) contains promise of the ultimate salvation of all Israel. For the present, Israel has stumbled, but has not fallen irrevocably. Their temporary "transgression" has meant blessing for the world; their restoration will mean far greater blessing (11:1 – 16).

(4) The parable of the OLIVE tree (Rom. 11:17 – 24). Paul, as apostle to the Gentiles, thinks highly of his ministry, not only because of the blessing it brings to Gentile believers but also because, in the purpose of God, the conversion of the Gentiles will, in fulfillment of Deut. 32:21 (quoted in Rom. 10:19), provoke Israel to jealousy and stimulate them to demand a share in those blessings that are their natural heritage. The history of the people of God is portrayed in terms of an olive tree from which some of the original branches have been lopped off to make way for the grafting in of branches from a wild olive (a process which in 11:24 Paul rightly says is "contrary to nature"). The lopped-off branches are Jews, separated from the stock of the people of God because of unbelief; the ingrafted branches are Gentiles, incorporated into the people of God through faith. But—and here one may detect a warning to the Gentile Christians in Rome and elsewhere—the ingrafted branches may in their turn be lopped off through unbelief and the severed branches may through faith be reunited with the parent stock. By faith Jew and Gentile alike stand; by unbelief they fall (11:13 – 24).

God's purpose for blessing mankind far exceeds anything that human beings could have hoped. If he has found all people, Jew and Gentile alike, guilty of disobedience and has pronounced this verdict on them, it is not that he may sentence them to the appropriate penalty, but "that he may have mercy upon all" (Rom. 11:32). When the Deliverer comes from Zion (cf. Ps. 14:7) and banishes ungodliness from Jacob, mankind will enjoy undreamed-of bliss. Who could have supposed that Israel's unbelief was to become God's instrument for good to such an overwhelming degree? God's wisdom cannot be compared with the human mind; he is the source, guide and goal of all (11:25 – 36).

D. The Christian way of life (Rom. 12:1—15:13). The proper response to the gospel of grace that has been unfolded in the foregoing chapters is the yielding of the believer's life to God as a "living sacrifice," presented in the course of one's "spiritual act of worship," so that the mind henceforth may be transfigured to conform with the will of God (12:1 – 2). This change will manifest itself, among other things, in the common life of the Christian fellowship. The figure of the body and its limbs, already used in this way (1 Cor. 12:12 – 27) and destined to be developed further in COLOSSIANS and EPHESIANS, is introduced here to illustrate the interdependence and cooperation of all for the good of the whole; and whatever service each one does should be done with a ready heart (Rom. 12:3 – 8).

The life of the Spirit will manifest itself outwardly in acts of love to fellow members of the Christian brotherhood and to all people. The SERMON ON THE MOUNT may not have been written down at this early date in the form in which we know it, but its contents were familiar in the church and formed the basis of the "law of Christ" (cf. Gal. 6:2), which Paul here applied. Revenge must never occur to a believer's mind. Paul quoted in this regard the passage from Prov. 25:21 – 22, beginning, "If your enemy is hungry, give him food…"; but he omitted the clause "and the LORD will reward you" and added the injunction, "Do not be overcome by evil, but overcome evil with good" (12:19 – 21).

The passage about the Christian and the state (Rom. 13:1 – 7) has given rise to long debate (see GOVERNMENT). Its spirit and tone can no doubt be linked with Paul's happy experience of Roman law and order, as reflected in the narrative of Acts; but the permanent teaching is plain. So long as the civil authorities remain within their divinely given commission, they can command the believer's obedience and cooperation; only when Caesar demands the things that are God's must the believer say "No" (cf. Acts 4:19; 5:29). Such a demand on the part of the state is not contemplated here; there is a great difference between Rom. 13 and Rev. 13, although the Roman empire is the supreme worldly authority in both places. It is very unlikely that the "governing authorities" (Rom. 13:1) are angelic principalities and powers; the latter do not receive taxes, and the Bible, far from counseling

believers to submit to them, portrays them as servants to the people of God.

Apart from his special duty to the powers that be, the Christian has the general duty of love to all people. Believers may be dead to the law in the sense of Rom. 7:4, but the whole OT law is summed up in the commandment of LOVE (as Jesus had affirmed in Mk. 12:29 – 31); from this law the Christian is never set free (Rom. 13:8 – 10).

Opening of Paul's letter to the Romans in a parallel Greek/Latin edition published in 1835.

The days are critical; Christians must be vigilant. Already coming events were casting their shadows; with hindsight one can think of the persecution of A.D. 64 and the revolt of A.D. 66. However, Paul looked beyond intervening woes to the fullness of salvation that would attend the advent of Christ. In language reminiscent of the idiom of Qumran (see DEAD SEA SCROLLS), he enjoins his readers to put on the "armor of light" in readiness for spiritual conflict and to live lives worthy of Christ. It is striking that, when the apostle commends the cultivation of those virtues that grace the character of Christ in the Gospels, he does so in the words, "clothe yourselves with the Lord Jesus Christ." One recalls how Augustine's conversion followed immediately upon his reading Rom. 13:13 – 14.

In Rom. 14:1—15:6 Paul deals with the apparently conflicting demands of Christian liberty and Christian charity. He had to deal with this issue in the churches he had founded, such as CORINTH (cf. 1 Cor. 8:1 – 13; 10:23 – 33); he expounds the general principles for the benefit of the Roman Christians. In most Christian communities there would be some people whose CONSCIENCES, like the apostle's, were completely emancipated in neutral matters such as food and sacred seasons, but they had to live alongside others who religiously avoided eating certain things and doing ordinary work on special days. "Each one should be fully convinced in his own mind," says Paul (14:5). The emancipated Christian must not despise brothers or sisters who are more scrupulous than he in such matters; the scrupulous Christian must not condemn believers who cheerfully do things of which his own conscience disapproves. Each believer is the Lord's servant, whether in life or in death; it is to the Lord that he must render account at the last.

So far so good; but Paul knew from his experience elsewhere that Christians with tender consciences were easily upset and likely to be tripped up in their spiritual progress. Those who had

robust consciences like himself had a duty to consider their weaker fellow Christians. Paul would have refused to listen to any attempt to place limitations on his freedom, and warned his converts, as in Galatia and at Colosse, against listening to any such attempts directed toward themselves. But it was possible, while refusing legal restrictions, to accept voluntary limitations on one's freedom of action in the interests of a brother "for whom Christ died" (Rom. 14:15). Such a spontaneous gesture of Christian charity would be in fact one way of exercising Christian liberty. Truly emancipated believers are not in bondage to their emancipation: they can choose to indulge and they can choose to refrain. Their choice will be determined by the Lord's glory and the spiritual welfare of others. If scrupulous Christians are encouraged by the example of one with a more robust conscience to do something of which their own conscience disapproves, their conscience is damaged by their doing so, and the damage will be debited by the Lord to their insufficiently considerate fellow Christian.

It is the privilege of the strong to help the weak and be patient with them; the example of Christ is sufficient argument. Instead of living for his own interests, he lived for others and endured reproach for his Father's sake, as OT Scripture had foretold (Rom. 15:3, quoting Ps. 69:9). This quotation of OT Scripture reminds Paul that all Scripture was given for the instruction and encouragement of the people of God, and he prays for such harmony among his readers so that their lives would redound to the glory of God.

Continuing the theme of the example of Christ (Rom. 15:7 – 13), Paul states that Christ became a servant to Jews and Gentiles alike—to the former, to fulfill the promises made to the patriarchs, and to the latter, that they too might "glorify God for his mercy" (v. 9). There follows a catena of OT Scriptures, drawn from all three divisions of the Hebrew Bible (Law, Prophets, and Psalms), showing that the Gentile mission was foretold in them. (The means by which the Gentiles' ingathering would be accomplished, by their incorporation as fellow members of the body of Christ on an equal footing with Jewish believers, was a MYSTERY first revealed in NT times, but the fact of their ingathering had been predicted.) With a benediction echoing the wording of the final quotation, Paul closes this division of the letter.

E. Epilogue (Rom. 15:14—16:27). In 15:14 – 33 Paul tells his readers about the present position of his apostolic program. His work in the eastern Mediterranean area is finished, and he looks forward to visiting Rome on his way to Spain (see section IV above), once he has presented the fruit of this work in Jerusalem and handed over the Gentile churches' CONTRIBUTION for the relief of the believers there. Meanwhile, he requests their prayers; he is well aware of the hazards that the immediate future might have in store for him.

PHOEBE, a "deaconess" of the church at CENCHREA (the eastern seaport of Corinth), will carry the letter to its destination; Paul commends her to his readers' fellowship (Rom. 16:1 – 2). He then sends greetings to a number of his friends. Although Paul had not previously visited Rome, it was not surprising that there were many people there whom he had met elsewhere during his journeys; indeed, precedent suggests that he was more apt to send individual greetings of this kind in a letter to a church with which he was not acquainted at first hand, than to one where he knew practically everybody (in the latter case, if he singled out a few for special mention, others might ask, "Why leave me out?"). The mention of EPENETUS, his first convert in the province of Asia (v. 5), and of PRISCILLA AND AQUILA (v. 3), who were last mentioned as being in Ephesus (Acts 18:26; 1 Cor. 16:19), has suggested to many commentators that this list of greetings may have been appended to a copy of the letter sent to the Ephesians; most of the names however, have Roman rather than Ephesian affinities (Rom. 16:3 – 16).

The exhortation of Rom. 16:17 – 20 is more urgent and personal than anything appearing earlier

in the letter; Paul was afraid that the Roman Christians might be visited by troublemakers such as those who had upset churches of his own planting, and he warns against them. Satan, the author of discord, will be crushed under their feet if they remain true worshipers of the God of peace. Paul has already sent greetings from the Gentile churches (v. 16); he then sends greetings from some of his personal friends who are with him at the time of writing (vv. 21 – 23). Paul regularly dictated his letters to amanuenses, but TERTIUS is the only one of these whose name is known (v. 22). The doxology of 16:25 – 27 recapitulates the main themes of the letter, as they have been introduced in the opening salutation (1:1 – 7).

VII. Text. There are two sets of textual problems in Romans that require special attention, one at the beginning and the other at the end. Apart from these, the text of the letter is reasonably straightforward, although F. G. Kenyon concluded—from the pattern of agreement and disagreement in the various Pauline epistles between P^{46} and the other early witnesses to the text—that the textual tradition of Romans might go back to a time before the publication of the *corpus Paulinum*, when the letters circulated separately. (If copies were in fact sent to various churches to begin with, the history of textual variation could have started as early as A.D. 57.)

The words "in Rome" are omitted from Rom. 1:7 in the Greco-Latin Codex G and also in the texts on which the commentaries on Romans by Origen and Ambrosiaster were based; moreover, G omits them in 1:15 as well. This textual form, together with adjustments of such an abridged text in companions of G, can best be accounted for in terms of their absence from the archetype of the "Western" text of the Pauline letters. (Their absence from a text used by Origen indicates that this shorter reading was not exclusively Western.)

At the end of the letter, indications of three distinct editions are provided by the varying position of the final doxology in the authorities for the text. In P^{46}, the oldest Pauline manuscript (end of 2nd cent.), it is placed at the end of Rom. 15. Although the doxology is then followed by 16:1 – 23, the implication is that there was in antiquity one form of the text that ended with 15:33 and the doxology (and that to this shorter text 16:1 – 23 was subsequently added from a copy of the longer text). The simplest explanation of this phenomenon is that copies of the letter were sent not only to Rome but also to other places—the personal greetings being omitted from copies sent to churches other than that in which the persons named were present. Whether the copy including the personal greetings was intended for Rome (so C. H. Dodd, *The Epistle to the Romans*, MNTC [1932], xviiff.) or Ephesus (T. W. Manson, *Studies in the Gospels and Epistles* [1962], 234ff.) cannot be decided by textual criticism (to the present writer the Roman destination of the greetings seems more probable).

There is, however, much more abundant evidence for an even shorter edition of the letter which terminated at the end of Rom. 14. The Byzantine text-type has the doxology there instead of at the end of ch. 16; a few witnesses (A P 5 33 et al.) have it at the end of ch. 14 and also at the end of ch. 16; the original "Western" text of Paul appears to have lacked the doxology altogether. The origin of this shortest edition is hardly in doubt; Origen states what is antecedently probable in any case when he deals with the final doxology in his commentary on Romans: "Marcion, who introduced interpolations into the evangelic and apostolic scriptures, removed this section completely from this epistle, and not only so, but he cut out everything from that place where it is written 'whatsoever is not of faith, is sin' [14:23] right to the end" (English trans. from Rufinus's Latin version of Origen). The ancient chapter summaries in Codex Amiatinus and some other VULGATE MSS, which were taken over from a pre-Vulgate Latin version, indicate a text in which 14:23 was followed immediately by the doxology; Tertullian and Cyprian of Carthage also seem to have known this short edition.

In this respect, as in several others, MARCION'S text of the Pauline letters appears to have influenced the transmission of their text in circles that were far from subscribing to Marcionite views. Why Marcion should have brought the text of Romans to an end with 14:23 is plain if one looks at the OT quotations in 15:3 – 12, or the statement in 15:4 that "everything that was written in the past was written to teach us," or the description of Christ in 15:8 as "a servant of the Jews…to confirm the promises made to the patriarchs." These passages were contrary to Marcion's view that the OT was irrelevant to Christ and the gospel, and were probably regarded by him as Judaizing intrusions into the pure apostolic text.

The omission of "in Rome" in Rom. 1:7 and 15 belongs not (as might have been expected) to the textual tradition which omits only the personal greetings of ch. 16 and thus generalizes the letter, but to the textual tradition which brought the letter to a close at 14:23—that is, to the tradition stemming from Marcion's text. Why Marcion should have omitted these two references to Rome is uncertain; perhaps, since the Roman church repudiated his teaching as unacceptable, he judged that church to be unworthy to be named as a recipient of a letter from Christ's one true apostle. (Although Marcion's text did not include the doxology at the end, it was added to his text later, possibly from the long edition.)

There remain some unresolved problems, but the conclusion in general is that there were in antiquity three recensions of the letter: (1) the long recension, including the personal greetings and the doxology, which was probably the recension found in the first edition of the *corpus Paulinum*; (2) a shorter recension, lacking the personal greetings, derived from an early copy sent to another church than that primarily addressed (P^{46} would in this case preserve a textual tradition antedating the publication of the first *corpus Paulinum*); and (3) a still shorter recension, lacking ch. 15 as well as ch. 16 (and also in some of its forms lacking the references to Rome in 1:7, 15); this recension, while widely attested in orthodox circles, can be ascribed to Marcion's dogmatic interference with the apostolic text.

VIII. Canonicity and authority. The canonicity of Romans was never an issue in the church. From the earliest beginnings of the formation of the CANON its place within it has been secure, both among heretical groups like the Valentinians and Marcionites, and in the Catholic Church.

Behind canonicity lies intrinsic authority, and in this regard the record of Romans is impressive. Time and again in the course of Christian history it has liberated the human mind, brought people back to an understanding of the essential gospel of Christ, and started spiritual revolutions. One has only to think of the part played by the letter in the careers of leaders like Augustine, Luther, John Wesley, and Karl Barth, and in the movements associated with their names, to appreciate its enduring evangelical dynamism.

Rome (Ῥώμη *G4873*; Ῥωμαῖος *G4871*, "Roman"; cf. Ῥωμαϊστί *G4872*, "Roman [*i.e.*, Latin] language" [Jn. 19:20]). A city-state in the Italian peninsula (see ITALY). Located on the Tiber River some 15 mi. from the W Mediterranean, it became the capital of the ROMAN EMPIRE.

The origins of the Roman people can be traced back to the 2nd millennium B.C., often regarded as a time of "folk-wandering." The Indo-European tribes who were to form the ethnic pattern of Europe until modern times were on the move, and a strong drift in the tribal movement was toward the warmer lands of the Mediterranean basin. The Iberian, Italian, and Greek peninsulas were infiltrated in successive waves, and the language map of Italy reveals something of the process of occupation. It would appear that one tribal group moved down the W coast, left a group of its nationals around the mouth of the Tiber, and proceeded to found settlements in Sicily. Linguistic correspondences between Latin and Sicilian dialects prompt this conjecture.

Tribes speaking a distinct but allied dialect, either following the same invasion routes or crossing the Adriatic, enfolded the enclave by the Tiber mouth. These were the Umbrian- and Oscanspeaking peoples. In the middle of Italy lay the cities of an alien race from ASIA MINOR, the Etruscans, whose name survives in modern Tuscany. These non-Europeans, still imperfectly known to history, had a higher culture than the incoming nomads, and during the first half of the 1st millennium B.C. they held an empire which extended to the northern Lombardy plains. They dominated Rome

itself in its early years. Add the Greek settlements all around the coast of the southern half of the land mass, and the picture of the Italian peninsula about the 8th and 7th centuries, the traditional period of Rome's first appearance, begins to emerge. It was an enclave of Latin-speaking tribesmen around the lower Tiber valley, a dominant Etruscan empire in the Upper Tiber and Arno valleys and in the north. Indo-European tribesmen established themselves throughout the mountain spine of the long peninsula, and in the Campanian plain and Greek cities in an irregular chain around the southern coastline from Cumae to Tarentum.

Alien occupation of the arc of hill country that fenced off the area of the Tiber mouth, the effective barrier of Etruscan occupation to the N, and the Oscan possession of Campania to the S, imposed a certain unity on the Latin-speaking agriculturalists who held the narrow enclave by the river. Their scattered groups cohered into various leagues and communities. There was also the need for common defense against the mountaineers, those traditional raiders of adjacent lowlands in all historical contexts. It was the fashion to build stockaded retreats, preferably on an outcrop of rock like the ACROPOLIS of ATHENS or some similar eminence to which the plainsmen could retreat with flocks and families, while a fighting task force dealt with the raiding hillmen.

In such fashion Rome came into existence. The Palatine hill was probably the first "acropolis" of the shepherds and peasants of the fertile plain. Where the Tiber pursues its lower westward course to the sea, the river valley forms a deep trough, averaging a mile in width, and cuts into the soft volcanic tufa which at this point floors the river basin, the same geological material that made it so easy to cut the hundreds of miles of catacomb galleries running beneath the city. The edges of this wide depression were eroded in prehistoric times by tributary waterways to shape the famous group of eight hills on which Rome stood: the Capitol, the Palatine, the Aventine, the Caelian, the Oppian, the Esquiline, the Viminal, and the Quirinal. The Vatican might be added, making nine, rather than the traditional seven, but some of them were no more than flat-topped spurs.

In modern Rome it is difficult to distinguish the group. Twenty-seven centuries of continuous human occupation have filled valley bottoms, cut away edge, escarpment, and eminence, and leveled down what once must have been a striking group of strongholds, each the fort and stockaded retreat of some family group of the peasant community which occupied the adjacent territory.

Through this irregular terrain the Tiber makes an "S" curve, shallows, and divides to form an island. At this point is found the only practicable fording place between the river mouth and the upper reaches of its waterway. Thus it was that geography played its eternal role in history, because, as the population of Italy matured and grew, the occupants of the hills by the ford found themselves in natural control of the trade and communications between the higher civilizations of the Etruscans to the N of them, and the Greek cities to the S. Another road, perhaps a "salt route," ran from the sea up the valley to serve the highland tribes.

Cities set on a crossroads of trade are inevitably cast for a role of greatness. They attract immigration and form strong outward-looking communities with some interest in a larger world. Archaeological evidence, the sole source of the knowledge of primitive Rome, suggests that the hill forts by the Tiber coalesced to form a federation by the 6th cent. B.C. Burials from the Capitoline and Palatine hills on the edge of the marshy valley bottom which was to be the Forum cease about this time, and the Cloaca Maxima, the Great Sewer, the first of the vast engineering works that were to be a major Roman contribution to the world, seems to have been started about the same time to drain the now common territory of the united community.

It would therefore appear that Rome found her name and unity in the half-legendary period of her kings, whose rule, encrusted though it became with Roman folklore, is established fact. The famous

foundation legends, such as the tales of Aeneas coming from far Troy to father a new race, and of Romulus and Remus suckled by the wolf, are inventions on the model of Greek foundation myths, perhaps actually the inventions of canny Greeks of the S Italian Greek cities that marked the rising power on the Tiber.

The later kings were certainly Etruscans, and Tarquin is an Etruscan name. The story of "false Sextus" and "Tarquin the Proud," and their expulsion from Rome, with Horatius Cocles holding the bridge against their counterattack, are parts of a saga of the Latin city's struggle for liberation from alien rule. There is fact in the stories; the battle for Latin independence was an experience that hardened and consolidated the young city, and left a horror of royal rule so strong that Julius CAESAR was forced at the height of his power to refuse the title of king. Fragments of the Servian Wall reveal that Rome at this time was a fortified city, able to close its gates against the stranger and resist alien domination.

The traditional date for the founding of the republic is 510 B.C., and at that point in time the tremendous story of Rome's move to world empire began. A. J. Toynbee (in his famous *Study of History*, 10 vols. [1947 – 57], 1:271 – 355) develops the thesis of "Challenge and Response." All human progress, the historian avers, is the result of a successful reaction to some confrontation with difficulty, danger, or hardship. The story of Rome's expansion provides a striking illustration. The population that now filled the hills and valley floors was a composite community, gravely divided, as the old stories of patricians and plebeians indicate, over questions of status and privilege. She was also an upstart among Italy's peoples, holding coveted advantages, and still hemmed in by the powerful empire of the Etruscans to the N, whose powerful stronghold, Veii, was only 12 mi. distant, by the more remote but rich Greek colonies to the S, and by the tough Oscan and Umbrian tribes of the hinterland and central Italy.

Remains of the ancient Forum in Rome.

Perhaps it was the military menace from without which imposed unity within and prompted that resourcefulness which traditionally, in early Rome, solved political problems without bloodshed. It is part of the wonder of Roman history that, until the onset of the intractable constitutional problems of the two centuries B.C. which finally brought the republic to ruin, Rome resolved the vast tensions of her class struggle by debate, wise compromise, and a legal inventiveness that laid the foundations

for another tremendous contribution of Rome to human history—ROMAN LAW. By the middle of the 4th cent. B.C., the republic had solved the problems of internal schism, economic, ethnic, or whatever tension it was which divided "the orders," and was reacting to that long quest for a stable frontier which took her first to the Alps and the surrounding seas and finally to the Tyne, the Euphrates, and the Red Sea.

By this time, too, Rome was large and populous. The valleys and levels between the ancient hills afforded a natural road-building pattern that remained recognizable through all the history of Rome, even to the present day, vast though the accumulation of human debris is on the site. The story of building, rebuilding, destruction, and reconstruction is one which, on a site so securely occupied, archaeology will never have the opportunity fully to investigate. When the city began to build her brief stretch of underground railway a generation ago, construction proceeded at a snail's pace as the tunnelers passed through the rubble and ruin of centuries of republican Rome.

The adjective *republican* must be used with some reserve. Theoretically, a species of democracy and popular voting existed, and there was wide privilege of office. In practice, however, the ancient families, not all of whom the Romans called *patrician*, dominated the senate and provided the sort of leadership which Britain knew in the days of her ruling aristocracy. It was, in fact, an oligarchy of blood, wealth, and experience that functioned well and guided Rome through two vital centuries. It is probably true to say that the common people had in practice no great power or influence, but their sovereignty was legally recognized. To rest on the letter of the law was a Roman instinct which bypassed and modified much social stress.

Those two vital centuries saw the dynamic republic break the encirclement of the hill tribes, reduce the Etruscans to impotence, dominate S Italy with its Greek cities and tribal hinterland, and become a world power. Egypt, under the Ptolemies of Alexandria, signed a treaty with Rome in 273 B.C., and it was not long after this that Rome discovered that the central Mediterranean itself was too small for one power based in Italy, and another, of alien breed, based in Africa across the narrow waist of the Inland Sea, especially since Sicily lay as a bridgehead of contention between the two. The Carthaginian wars filled half a century and left Rome established in Spain, S Gaul, and Africa, and led to a confrontation with the Hellenistic monarchies of the E Mediterranean, an encounter which, little by little, with the decline of Greek power, took Rome to the destiny of Middle Eastern empire.

As empire in the geographical sense of that word grew, so the city by the Tiber expanded. A city is a magnet, and it draws in a varied population. The second clash with Carthage had seen Hannibal's invasion of Italy, and the peninsula did not really recover from the burning and devastation of that decade of disaster. The small peasantry suffered, and with the simultaneous flowing into Rome of tribute and loot from abroad, as history moved on through the 2nd cent. B.C., a change came over the land utilization of Italy. The rich landholders bought out the independent farmers, who had once been the backbone of the land; and the dole-fed urban mob—that tool and weapon of the demagogue through the century of constitutional strife and city disorder which destroyed republican Rome—was daily swollen by new accretions from the countryside. Add to these the drifters who always congregate where wealth, vice, opportunity, and entertainment are plentiful, and the pattern of Rome's urban growth may be guessed from the analogy of many a modern city.

As early as the 3rd cent. there is evidence of the great *insulae*, the "islands," or huge tenement houses, which were a feature of later Rome, and suggest the overcrowding, the squalor, and the slums that were creeping around and amid the mansions of senator, aristocrat, and "knight," the term applied to the new class of business men and tax farmers, the hated *publicani*, whose exploitation of the

provinces was another factor in the decay of republican Rome.

Amid squalor there was also magnificence, and it is possible from the records to piece together the story of varied building activity. At the end of the 2nd cent. B.C., when Rome was penetrating the Hellenistic lands of the E Mediterranean, there was a tremendous influx of wealth and capital from the newly constituted provinces, and the opportunities for exploitation their government afforded the new ruling class. Much of this new wealth found expression in architecture. POMPEY, the great soldier who organized the eastern provinces into ordered and coherent form in the sixties of the 1st cent. B.C., also did much to adorn and beautify Rome.

AUGUSTUS, the first of the emperors, whose leadership and diplomatic genius gave peace to Rome after the ordeal of her two civil wars and century of strife, also gave attention to the restoration of the damaged city and to its further adornment. In an inscription discovered on the wall of a temple built in his honor at Ancyra, Augustus boasts that he "found Rome built of brick, and left it built of marble." Augustus also made a bold and farsighted attempt to give life again to Rome's old religion, and to establish above all the worship of APOLLO, whose youthful godhead was a symbol to him of the restoration he sought for the sorely damaged state. See ROMAN RELIGION. The architectural consequence was a great upsurge in temple building, and most notably a magnificent library and shrine dedicated to the ruler's favorite god, a building of which remnants still stand.

Augustus thus set the fashion for the emperors who came after him, and it is, in fact, from the early centuries of the Christian era that most of Rome's surviving ruins date: the great baths of Caracalla and Diocletian, for example, and those of Constantine; columns and triumphal arches; and the most striking of all the city's surviving memorials, the Flavian Amphitheater, still called by its medieval name of Colosseum.

A vivid picture of life in Rome at the end of the 1st cent. is found in the third satire of the embittered poet Juvenal, a mordant description imitated for Paris by Boileau, and for London by Samuel Johnson. Juvenal knew Rome from the slum pavement, from the viewpoint of the poor and the underprivileged, and he wrote savagely of the poverty and the inhumanity of the great metropolis with its cruel inequalities between the absurdly rich and the shockingly poor.

Aerial view of Rome (looking W), with St. Peter's Church (background, center top) and the Colosseum (left foreground).

The population probably passed the million mark about this time, and the city was as

cosmopolitan as New York and London. "The Syrian Orontes is now a tributary of the Tiber," shouted Juvenal in the satire quoted, and in his list of the pains and misfortunes of his small world he included the foreign rabble with the perils of fire, traffic, assault, and battery, and the collapse of jerry-built slum hovels.

PAUL found a Christian church already active in Rome when he arrived under escort, probably in March, A.D. 59. See ROME, CHURCH AT . Perhaps CLAUDIUS'S expulsion of the Jews a decade earlier marked some of the tensions in the ghetto associated with the first Christian intrusion into the synagogue. It is a fair guess that the Christian gospel was preached there first in the latter half of the fifth decade of the century. The strength of the Christian population may be calculated from the burials in the catacombs. Reliable calculations suggest that the vast tangle of the catacombs contains up to 600 mi. of galleries. The lowest estimate of the graves they contain is 1,750,000; an admissible probability is something like 4,000,000. This is obviously a question that could be settled quite conclusively. At any rate, some ten generations of Christians are buried in the catacombs, so that, on the second figure, there was a Christian population in and about Rome of 400,000 for one generation. On the smaller computation the number would be 175,000.

Such averaging, of course, is not good statistical method, for the number of Christians was smaller in the earlier and larger in the later generations of the period concerned. If the figure of 175,000 is taken as representing a middle point in that period, perhaps about the middle of the 3rd cent. A.D., those who remember E. Gibbon's estimate of the Christian population of Rome will immediately mark a huge discrepancy.

Gibbon's guess, recorded in his *Decline and Fall of the Roman Empire*, was that the Christians at the end of the 3rd cent. numbered something like one-twentieth of the population of Rome. That population is reliably estimated at something like one million. The most conservative interpretation of the catacomb burial figures would, therefore, suggest that not one-twentieth but one-fifth of Rome's people in the middle empire were Christians, and it is possible that the proportion was at times much greater. To quote in conclusion the present writer's *Cities of the New Testament* (p. 87):

> Rome, like Babylon, became an image of carnal, organized paganism. In the lurid poetry of the document of protest which closes the canon of the New Testament, empire and city are mingled as symbols of sin. Chapters 17 and 18 of the Apocalypse look grimly forward to just such a fate for Rome as Rome had wreaked on Jerusalem, on Corinth, on Carthage, and many another city of her foes, just such a fate as Rome did in fact suffer under the fire and sword of Alaric the Goth. The former oracle, passionate in its imagery, pictures Rome sitting like a woman of sin on her famous seven hills, polluting the world with her vice. The second of the two chapters, cast in the form of a Hebrew "taunt-song," and imitating Ezekiel's chapter on Tyre, pictures the galleys loading cargo for Rome in some eastern port. There was "merchandise of gold, and silver, and precious stones, and of pearls, and of fine linen, and purple, and silk, and scarlet, vessels of ivory, and precious wood, and of brass, and iron, and marble, cinnamon, and frankincense, beasts, and sheep, and horses, and chariots, and slaves, and the souls of men."
>
> The climax is shocking, as the writer pictures Ostia, the Tiber port of Rome, in the stark ruin which, indeed, it may be seen today, its great warehouses empty shells revealed by the archaeologist's spade, its streets empty, and its courtyards desolate. Amid all the voices of praise from the first century one alone cried protest against Rome's domination of the souls of men. That voice was a Christian voice, and history took heed of it.

M. BLAIKLOCK

Rome, church at. The Christian community in the capital city of the ROMAN EMPIRE. See also ROME; ROMANS, EPISTLE TO THE.

I. Origin. When and by whom Christianity was first introduced at the imperial city is, as P. Schaff states, an "impenetrable mystery" (*History of the Christian Church*, vol. 1, 3rd ed. [1890], 366). A significant Christian community had already existed in Rome for a considerable time before PAUL wrote his epistle to this church (c. A.D. 58), as evidenced by Rom. 1:8 – 13; 16:19. The biblical account, however, does not record any apostolic visits until c. A.D. 62 (Acts 28:15). At the time Paul wrote the epistle he had not been to Rome (cf. Rom. 1:13; 15:22). Therefore it is very improbable that Paul had any *direct* role in founding the church there. Several other sources have been suggested, as follows.

A. "Visitors from Rome." Present in JERUSALEM on the Day of PENTECOST were Jews and converts to JUDAISM from many parts of the ancient world, including "visitors from Rome" (Acts 2:9 – 11). The latter are thought to have been numbered among the 3,000 converted that day (v. 41) and to have established the church in Rome when they returned home. Although this possibility cannot be eliminated, many consider it improbable. If accepted, it would not provide an adequate explanation for the Gentile nature of the church nor for evident organization separate from the synagogue.

B. Peter. The traditional Roman Catholic position is that the church was first founded by the apostle PETER, its first bishop. Frequently based upon the tradition of an early visit (A.D. 42) and either twenty or twenty-five years of continued ministry ("a long exploded fable," Schaff, *History*, 1:366 – 67), or a return just prior to Paul's first visit, appears to have little basis in fact. There is no scriptural evidence for direct Petrine origin.

It is well argued that Paul would not have interfered with a church begun by Peter because of his stated position of not actively ministering in another's field of labor (Rom. 15:20). At the time of the Roman epistle Paul declares his intention of ministering at Rome (1:10 – 13; 15:22 – 24), a desire which evidently was well known (Acts 19:21). Furthermore, if there had been the slightest possibility of Peter's being connected with the Roman church, Paul would have either greeted his fellow apostle by name or referred to his esteemed ministry, neither of which he does—a curious oversight in light of the fact that he makes a special point of mentioning ANDRONICUS and JUNIAS as "outstanding among the apostles, and they were in Christ before I was" (16:7). Certainly if the praiseworthy reputation of the Roman Christians (1:8) was the result of Peter's influence, Paul could not possibly have been

ignorant of the fact.

It ought to be noted that even the sources upon which the tradition is based make *both* Peter and Paul responsible for the establishment of the Roman church. IRENAEUS says, "That tradition derived from the apostles of the very great, the very ancient and universally known church founded and organized at Rome by the two most glorious apostles Peter and Paul, as also (by pointing out) the faith preached to men, which comes down to our time by means of successions of the bishops… committed into hands of Linus the office of the Episcopate" (*Haer.* 3.3.2 – 3).

To deny Peter the role of founding the church in Rome does not preclude his later visit and martyrdom in that city. Peter probably came to Rome late in Paul's second imprisonment and was later martyred at "about the same time" as Paul, according to EUSEBIUS (*Eccl. Hist.* 2.25, citing an address to the Romans by Dionysius, Bishop of Corinth: "Flourishing seed that had been planted by Peter and Paul at Rome and Corinth…they suffered martyrdom about the same time"). Eusebius also cites Tertullian, Gaius, Irenaeus, Origen, and others attesting Peter's martyrdom in Rome.

Schaff (*History*, 1:370 – 72) surmises that, if Peter came to Rome c. A.D. 63, the two apostles would have ministered to different spheres, Peter to the Jew and Paul to the Gentile, and would have mutually promoted harmony. It is in this sense that they may have been "joint founders." It is further surmised that their martyrdom would have drawn the two communities together. The final "consolidation" of the Jewish and Gentile sections, Schaff suggests, was the work of Clement of Rome after the fall of Jerusalem (see CLEMENT, EPISTLES OF).

C. Pauline converts. A more probable explanation of the origin of the church in Rome is to be found in the Christian converts who carried the gospel to the capital of the empire. The members of the Roman congregation(s) were well known to the apostle. He makes specific reference to twenty-six individuals and no less than five groups by name (Rom. 16:3 – 16). Not only did Paul know them by name, but he also comments on their faith and activity for the gospel. Apparently some were converted through his ministry (cf. v. 5).

It is suggested that since the gospel was carried as far as "Phoenicia and Cyprus and Antioch" during the persecution following STEPHEN'S death (Acts 11:19), it is reasonable to suppose that some would have found their way to Rome also. Although possible, no historical evidence exists to support this conclusion. While not entirely free from problems, the more probable origin of the organized church in Rome was the converts and contacts Paul made with those who were exiled from Rome during the reign of CLAUDIUS, c. A.D. 50 (18:2 – 3).

The pagan historian SUETONIUS (*Claudius* 25) reports that "since the Jews were continually making disturbances at the instigation of Chrestus, he [Claudius] expelled them from Rome." Writing seventy years after the event, Suetonius apparently used a variant or incorrect spelling for *Christus* to describe a controversy between Jewish and Christian leaders. Christians would have been included in the edict as a "Jewish" sect and have thus been exiled, providing Paul's first contact with PRISCILLA AND AQUILA in CORINTH. Luke's identification of Aquila as a "Jew…a native of Pontus, who had recently come from Italy" (Acts 18:2 – 3; cf. 2:9) is no proof that he was not a Christian, but rather classifies him as one of "all Jews" who were expelled. The fact that Paul took up residence with him, with no indication that Aquila was converted

Aerial view of St. Peter's Church at Rome. (View to the NW.)

at Corinth, suggests the strong probability that he was already a Christian from Rome.

That Priscilla and Aquila became trusted cola-borers is evidenced by their accompanying Paul to EPHESUS. They ministered to APOLLOS and were residents there when Paul wrote 1 Corinthians (Acts 18:18, 26; 1 Cor. 16:19). At the time of the Roman epistle, the apostle refers to them prominently as "fellow workers" at Rome (Rom. 16:3). It is likely that others among Paul's converts migrated or returned to Rome and that these contacts explain the origin of the organized church in the imperial city.

II. Composition. The composition of the church at Rome has been the subject of much speculation and debate (for a helpful summary of recent views, see T. R. Schreiner, *Romans*, BECNT [1998], 10 – 15). Paul addresses the believers there as Gentiles (Rom. 1:5, 6, 13; 11:13; 15:16), though it is unlikely that it was a *totally* Gentile church. Schaff (*History*, 1:372) suggests the possibility that there were two groups, Jewish and Gentile, and that they "may have formed distinct communities, or rather two sections of one Christian community."

It is estimated that the Jewish population at Rome during the apostolic period was between 20,000 to 30,000. They worshiped in seven well-established synagogues and owned three cemeteries. Most of these Roman Jews were the descendants of slaves captured during the campaigns of Pompey, Cassius, and Antony. That many of these freedmen Jews were wealthy is evident from the large sums annually sent to Jerusalem. The influence this community exerted upon Roman population was significant: "The very passages [and they are numerous] which express hatred of the Jews imply a sense of their influence" (W. J. Conybeare and J. S. Howson, *The Life and Epistles of St. Paul*, 2 vols. [1869], 2:369 n. 5; see further H. J. Leon, *The Jews of Ancient Rome*, updated ed. [1995]). During the early years before they were distinguished from the Jews, the Christians shared in the complete toleration which the Jews enjoyed in Rome. Just when Christianity became officially a *religio illicita* is treated below.

The mere presence of Jews in Rome, however, does not argue for a Roman church that was primarily Jewish (as argued by some scholars). When Paul ministered to the Jewish leaders (Acts 28:21 – 22), they appeared to be ignorant of any firsthand information about Christian beliefs. It would appear from the Romans epistle that the church Paul addressed was primarily though not entirely Gentile in composition. It seems unlikely the "apostle to the Gentiles" would have addressed

any other than Gentiles as he does, for that would have violated the supposed apostolic division of labor (cf. Gal. 2:7 – 10). In addition, history has not preserved any Pauline epistle to a non-Pauline church.

It is sometimes argued that Paul's frequent appeal to the law (cf. Rom. 7:1) is evidence for a significantly large group of Jewish believers in the church. To this, many scholars rightly respond that the OT was the channel through which the church understood Christian truth.

III. Reputation and growth. Paul states in his letter that the Roman church had established a reputation for: (1) faith "reported all over the world" (Rom. 1:8); (2) individuals whose spiritual influence went beyond the local setting (16:3 – 7); (3) obedience that was widely known and thus sufficient maturity to be the source of the apostle's rejoicing (16:19). That there were some problems and dissensions is also evident (16:17). The Roman believers' loyalty and affection for the apostle is attested by their journeying some distance to meet him when they heard he was approaching the city (Acts 28:14 – 16).

Paul's reference to "Caesar's household" (Phil. 4:22), probably during his Roman imprisonment, is often thought to have included some of the people mentioned in Rom. 16 and to be an indication that high-ranking individuals had become converts. Although possible, Lightfoot states that the term used comprised "all persons in the emperor's service, whether slaves or freemen, in Italy and even in the provinces" (*St. Paul's Epistle to the Philippians* [1868], 171). Just how many adherents the early Roman church had is unknown and no statistical sources are available. Apparently the church was not a large one at the time of the Roman epistle (c. A.D. 57), but by the year 64, during the persecution under Nero, the Christians had grown sufficiently to be known, arrested, and martyred in sufficient numbers to have occasioned public sympathy (cf. *1 Clement* 6.1; Tacitus, *Annals* 15.44).

E. M. Blaiklock surmises that on the average one-fifth of the Roman population were Christians over the period of the ten generations the church was underground (from Nero to the early 4th cent.). Numerically this would mean that each generation numbered between 175,000 and 400,000 believers buried in the catacombs. The great variation allows for the lowest to the highest estimates of burials in the more than 350 mi. of catacombs beneath the city (*Cities of the New Testament* [1965], 86). Once the church went underground, the growth and size of the Roman congregation are impossible to ascertain.

IV. Persecutions. Just when Christianity became a *religio illicita* is unknown. At the time Paul was acquitted by Nero it was no crime to be a Christian. Even during the first recorded state PERSECUTION, Nero's charge against the Christians was not their faith but their alleged plot to burn the city (Tacitus, *Annals* 15.44). By then Christians were a recognizable group. Tradition places the martyrdom of Peter and Paul at Rome under Nero, c. A.D. 67 (Euseb. *Eccl. Hist.* 2.25.5 – 8). The next persecution occurred during the reign of DOMITIAN, c. A.D. 95, when the Christians received the same treatment as the Jews who refused to pay a tax levied for the temple dedicated to Jupiter. Tradition identifies this as the occasion for the exile of JOHN THE APOSTLE to the Isle of PATMOS (Rev. 1:9).

The first discernible policy of persecution took place in BITHYNIA under the governorship of PLINY the Younger, c. A.D. 112, during the reign of TRAJAN. Correspondence between Pliny and Trajan evidences a governmental policy that made being a Christian a crime punishable by death except for recantation (Pliny, *Ep*. 10.96 – 97). IGNATIUS was martyred during this persecution. Although the official edict defining the state position is lost, it is evident that by the early 2nd cent. the

imperial policy regarded it a crime to be a Christian.

The subject of persecution beyond the apostolic period is outside the scope of this article but it is necessary to point out that persecution to the time of Decius (c. 250) was generally local and sporadic. After that the imperial policy sought to eliminate Christianity empire wide. The most intense period came under Emperor Diocletian in 303 and 304, during which believers suffered extensively and so crowded the prisons that "there was no room left for those condemned for crime" (Euseb. *Eccl. Hist.* 8.6.9). In 311 Emperor Galerius issued an Edict of Toleration from his deathbed which permitted Christians to exist providing they did not violate the peace of the empire. Persecution did not universally cease until Constantine issued the Edict of Milan in 313.

V. Place in history. That the church at Rome should gain a prominence very early is to be expected since it was located in the imperial city, the capital of the whole Mediterranean basin. That it should retain and increase in prestige and power after Constantine moved the capital to Byzantium/Constantinople is explained by: (1) a firmly established episcopacy in the Western church concerned about apostolic succession; (2) long-standing tradition of privilege associated with the names of Peter and Paul; (3) relative freedom from the doctrinal errors that generally plagued the Eastern church; (4) declaration of the doctrinal supremacy of the Bishop of Rome by the First Ecumenical Council of Constantinople in 381 and by Emperor Valentinian III in 445; (5) ever-growing acceptance of the Petrine theory of apostolic succession; (6) an organizational structure that, built by capable leaders, expanded to assume increasing temporal authority in a declining empire. It is thus that by the end of the 6th cent. the old Roman church had become the Roman Catholic Church and the Bishop of Rome had become the pope.

Rompha rohm′fuh. Variant form of REPHAN.

roof. The top of a HOUSE or other building, accessible by outside stairs. Occasionally pitched roofs were used, but most were flat, usually formed of clay packed with stone rollers, supported by mats of rushes or branches across wood beams or palm tree trunks. In Babylonia and Egypt mudbrick arches or vaults sometimes formed the substructure, and the top surface was leveled off with clay or brick fill. The roof (Heb. *gāg H1511*) was commonly occupied (Deut. 22:8), used for storage (Josh. 2:6), for rest in the evening (2 Sam. 11:2), and was even used in idolatrous worship (Jer. 19:13). An uncommon Hebrew word for "beam" or the like (*qôră H7771*) is used in Gen. 19:8 with reference to a roof structure, describing the latter in terms of one supporting member. In this passage the term is idiomatic for "house" or "home," a use reflected also in the phrase "under my roof" (Gk. *stegē G5094*, Matt. 8:8). The roof was not a hindrance to securing healing for the paralytic (Mk. 2:4). H. G. STIGERS

A basalt roof roller used to pack on mud thatched roofs of buildings.

room. See ARCHITECTURE.

rooster. The adult male of the common domestic CHICKEN. It may be the bird mentioned in 1 Ki. 4:23 (Heb. *barbur H1350*) as part of SOLOMON'S daily fare. It is not unlikely that Solomon, who had extensive commerce with the E, should have imported poultry from that region. Proverbs 30:31 includes the "strutting rooster" among "things that are stately in their stride" (v. 29), although the meaning of the Hebrew (*zarzîr H2435* + *motnayim H5516*) is uncertain.

Domestic poultry originated in Asia, although the precise location is unknown. One breed came from Malacca and one from Java. The rooster or cock was known in India, but not in Egypt, during ancient times. Pisthetaerus called it the Persian bird, and it is probable that the Greeks obtained these domestic birds from Persia. They were perhaps introduced into Palestine by the Romans, who prized them both for food and for cock fighting. The MISHNAH says that the people did not rear roosters at Jerusalem because of the holy things. This restraint could not have applied to foreigners, and many Jews must also have kept them.

Except for one reference to the rooster's crowing (Gk. *alektorophōnias G231*) as a designation for early morning (Mk. 13:35), all the NT occurrences of the Greek word for "rooster" (*alektōr G232*) are in connection with PETER'S denial of Christ (Matt. 26:34, 74 – 75; Mk. 14:30, 68 [lacking in some important textual witnesses], 72; Lk. 22:34, 60 – 61; Jn. 13:38; 18:27). In each of the gospel

accounts, Jesus predicted at the Last Supper that Peter would disown him three times "before the rooster crows"; and in all four accounts it is recorded that the cock crowed immediately after Peter had denied Christ. Luke says that the cock-crowing reminded Peter of Jesus' words and prompted him to go out and weep bitterly (Lk. 22:61 – 62). In Mark's account a second crowing is mentioned (Mk. 14:30, 72). This no doubt refers to the same general time as the crowing of the other Gospels, that is, just before dawn. The first crowing, usually unnoticed, may have occurred shortly after midnight.

Tradition has grown up around this incident, leading to the belief that there was one particular rooster that God used to awaken Peter's conscience. There is even a church in Jerusalem named the Church of St. Peter in Gallicantu built in memory of Peter's repentance on this occasion. It is probable that there was a whole chorus of roosters crowing and that the reference is not to a specific bird but only to the time when cocks crowed.

G. H. WATERMAN

root. That part of the plant which penetrates the soil and draws up sap and nourishment for the plant. The numerous references to roots in the Bible (Heb. *šōreš H9247*; Gk. *rhiza G4844*) are mostly figurative, drawn from the important relation which the root bears to the plant. Roots near water symbolize prosperity (Job 29:19; Ezek. 31:7); the opposite is a "withered" root (Hos. 9:16). A root growing old in the ground (Job 14:8) signifies loss of vitality, while "to take root" or "be rooted" denotes becoming or being firmly established (2 Ki. 19:30; Eph. 3:17). Judgment upon sinners is pictured as rottenness of root (Isa. 5:24), roots drying up (Job 18:16; Isa. 14:30), or being uprooted in destruction (Ezek. 17:9; Lk. 17:6; Jude 12). The ax lying at the root of the tree indicates impending judgment (Matt. 3:10).

The root is the source of a moral or spiritual condition. Thus the love of money is pictured as "a root of all kinds of evil" (1 Tim. 6:10), while a "bitter root" causes the defilement of apostasy (Heb. 12:15; cf. Deut. 29:18).

The root of a family or nation is its progenitor (Rom. 11:16). MESSIAH as "the Root of Jesse" (Isa. 11:10) is not a mere shoot from the root but himself the origin and strength of the messianic line; "the Root and the Offspring of David" (Rev. 22:16; cf. 5:5) denotes Christ's divine-human nature as the source and descendant of DAVID. The messianic Servant's appearance as a "root out of dry ground" (Isa. 53:2) depicts his lowly surroundings in contrast to his inner vigor.

D. E. HIEBERT

rope. See CORD, ROPE.

rose. This term is used by the KJV to render Hebrew ḥăḇaṣṣelet H2483, which occurs twice: in Cant. 2:1 ("the rose of Sharon") and in Isa. 35:1 ("the desert shall rejoice and blossom as the rose"). The identification of the plant is disputed, however. Although it cannot be what we normally mean by "rose," the NIV and other modern versions follow this traditional rendering in the former passage; they use a different term, CROCUS, in the latter.

The plant should not be confused with what is today called the "rose of Sharon" (*Hibiscus syriacus*, an Asian shrub that produces bell-shaped flowers of different colors). The reference in Cant. 2:1 could be to *Hypericum calycinum* (sometimes called "Aaron's beard"), which is not sweet-smelling; known to grow in W ASIA MINOR and in the SHARON Valley, it is more or less evergreen, and its golden, powder-puff flowers are seen for four long months. This plant will grow almost anywhere, even under trees. It could therefore have succeeded in the Plain of Sharon, even if it had to grow among different vegetation. Other suggestions include the following: *Tulipa montana,*

which, as its name suggests, is a tulip that grows happily in the mountains; *Tulipa sharonensis*, a red flower found growing abundantly around Sharon; *Narcissus tazetta*, a scented plant of the LILY family that grows plentifully in Palestine, bearing on one stem clusters of cream-colored flowers with a yellow cup; and *Asphodelus*, also a kind of lily (*HALOT*, 1:287). It is uncertain whether Isa. 35:1 refers to the same plant.

In the APOCRYPHA, roses are mentioned several times. The Greek term for "rose," *rhodon*, occurs in the book of ECCLESIASTICUS (Sir. 24:14; 39:13; 50:8; the latter text is preserved in Heb., which has *nēṣ H5890*, "blossom"). It is unlikely that these refer to the wild rose (*Rosa canina*), for this plant would not flourish by wadis and brooks. More probably the reference is to *Nerium oleander*, a shrub 4 – 12 ft. tall that does very well by water, and especially in the Jordan Valley; the flowers may be pink or white, and when these are double they do look like the rose. See FLORA (under *Apocynaceae*). The Latin *rosa* in 2 Esd. 2:19 is thought to be the Phoenician rose, which grows 8 – 9 ft. high, and produces sweet-smelling white single flowers, plus many golden stamens; it will grow at elevations as high as 5,000 ft. and therefore fits into the picture of the "seven mighty mountains" mentioned in the context.

W. E. SHEWELL-COOPER

Rosetta stone. A bilingual stela of basalt inscribed in Egyptian and Greek, with Egyptian written in both the hieroglyphic and demotic scripts (see LANGUAGES OF THE ANE I.B; WRITING). The text is a decree promulgated by the Egyptian priesthoods in honor of PTOLEMY V Epiphanes in his 9th year, 196 B.C. The monument was unearthed in 1799 by Lieutenant Bouchard of Napoleon's army, when consolidating a fort near Rosetta (hence the name); after the British defeat of Napoleon's forces, the stone reached the British Museum in 1802. Along with an obelisk and its plinth from Philae (inscribed in Egyptian and Greek respectively), the stone's bilingual text played a vital role in the initial decipherment of the ancient Egyptian writing systems attempted by Thomas Young (Britain) and achieved by Jean François Champollion. The latter's brilliant success was confirmed by the German scholar Lepsius, and the way was opened into the entire written patrimony of ancient EGYPT, covering 3,000 years of history and civilization of the utmost value for the humanities in general, and for biblical backgrounds in particular. (See J. D. Ray, *The Rosetta Stone and the Rebirth of Ancient Egypt* [2007].)

K. A. KITCHEN

Rosh rosh (רֹאשׁ *H8033*, "head, chief"). Son of BENJAMIN and grandson of JACOB (Gen. 46:21). The name does not appear in the parallel lists (Num. 26:38 – 39; 1 Chr. 8:1 – 5; see BEKER #1), and the SEPTUAGINT of Genesis lists Rosh as son of BELA and grandson of Benjamin. It has also been conjectured that the names "Ehi and Rosh, Muppim and Huppim" (*ʾḥy wrʾš mpym wḥpym*) in the Genesis passage are a textual corruption of "Ahiram and Shupham and Hupham" (*ʾḥyrm wšwpm wḥwpm*; cf. Num. 26:38 – 39).

(2) According to some scholars, the Hebrew words describing GOG as "chief prince of Meshech and Tubal" (Ezek. 38:2 – 3; 39:1) should rather be translated "prince of Rosh [*nĕśyʾrōš*], Meshech, and Tubal" (cf. ASV; also NIV mg.). A people or country named *Rosh* is impossible to identify, although Russia and Rasu (in Assyria) have been suggested. Russians, however, are mentioned for the first time in the 10th cen. A.D. by Byzantine writers under the name of *Rhōs*, and by Ibn Fosslan under the name of *Rus*, a people dwelling on the river Volga. It is therefore unlikely that the prophet could be referring to them. S. BARABAS

row, rower. See SHIPS.

ruby. A relatively rare and costly precious stone, generally red to deep crimson in color, but sometimes with pale rose or purple tints. Like SAPPHIRE, it is a variety of corundum (aluminum oxide), which next to diamond is the hardest known naturally occurring mineral. The red color of ruby is thought to be due to the presence of traces of chromium. Rubies occur in crystalline limestones and in gem-bearing gravels derived from these rocks, the best gems coming from Burma. Several Hebrew words possibly refer to this precious stone: *kadkōd H3905* (Isa. 54:12; Ezek. 27:16), *pĕnînîm H7165* (Job 28:18 et al., where the reference may be to [pearls of] CORAL), and *)ōdem H138* (Exod. 28:17 et al., where NRSV and NJPS have CARNELIAN). D. R. BOWES

rudder. See SHIPS.

ruddy. See RED.

rude. This English term, in the sense "untrained, unskilled," is used by the KJV in 2 Cor. 11:6, where PAUL concedes that he was inexpert and lacking in technical training. The NIV and other versions use the same term, but in the sense "discourteous," in 1 Cor. 13:5, where the apostle states that LOVE "is not rude" (KJV, "doth not behave itself unseemly").

rue. A strong-scented woody herb. The term correctly translates Greek *pēganon G4379*, which occurs only once (Lk. 11:42, "you give God a tenth of your mint, rue and all other kinds of garden herbs"; the parallel passage, Matt. 23:23, mentions MINT, DILL, and CUMMIN). The ordinary rue grown today in herb gardens is *Ruta graveolens*, the leaves of which are gray-green and produce a pungent odor. The biblical passage could refer to this species, for it did grow in Palestine. It could, however, equally be *Ruta chalepensis latifolia*, which has less deeply divided foliage. This species is also found in Palestine, growing naturally. In addition to being used as a condiment, rue has some medicinal value.

W. E. SHEWELL-COOPER

Rufus r*oo*'fuhs (Ῥοῦφος *G4859*, hellenized form of the common Latin name *Rufus*, "red"). (1) Son of SIMON of Cyrene (who was forced to carry Jesus' cross) and brother of ALEXANDER (Mk. 15:21). Mark's mention of Alexander and Rufus suggests that these brothers may have been known to his readers; and since his gospel is usually thought to have a Roman origin, it is possible that this Rufus is the same as #2 below.

(2) A Christian in ROME to whom PAUL sent greetings (Rom. 16:13). The apostle refers to him as "chosen in the Lord" (prob. suggesting, "a genuine believer" or the like) and states that his mother "has been a mother to me, too." We may infer that this family was originally from the eastern part of the empire and had there hosted or otherwise helped Paul. In the 2nd cent., POLYCARP *(Phil.* 9.1) refers to a certain Rufus who, along with IGNATIUS and Zosimus, was a model of spiritual endurance (presumably an allusion to martyrdom), but there is no reason to think this Rufus is the same individual mentioned by Paul.

rug. See CARPET.

Ruhamah r*oo*-hay'muh (רֻחָמָה [from רָחַם *H8163],* "pitied, loved"). A symbolic name given to Israel to indicate the return of God's mercy (Hos. 2:1; NIV, "My loved one"). There is a play on words involved, for the second child of GOMER, Hosea's wife, was called LO-RUHAMAH, "not pitied" (Hos. 1:6, 8), to indicate that God had turned his back on Israel because of her apostasy. See also AMMI; LO-AMMI.

Rule of the Community. See DEAD SEA SCROLLS IV.

ruler. This English term, referring to someone who governs, but without clear indication of the specific office involved, can be used to render a variety of Hebrew words, such as the noun *nāśî) H5954* (Gen. 17:20 et al.), the participle of the verb *māšal H5440* (45:8 et al.), and others. The common Greek term used in the NT is *archōn G807* (Matt. 9:18 et al.), but *hēgemōn G2450* appears frequently as well (Matt. 2:6). The various terms may refer to a king (1 Ki. 1:35; 11:34; Ps. 105:20, 21; Ezek. 19:14; Mic. 5:1, 2; Matt. 2:6), a prince (Jer. 30:21), a prime minister (Gen. 45:8, 26; Dan. 2:48; 5:7, 16; 11:43), a head of a tribe (1 Chr. 9:20), a deputy (Jdg. 9:30), a judge (Jn. 7:27, 35), a member of the SANHEDRIN (Jn. 3:1), the high priest (Acts 23:5), SATAN (Jn. 12:31; 16:11; Eph. 6:12), Jesus Christ the king (Rev. 1:5). See also RULER OF THE SYNAGOGUE.

<div align="right">S. BARABAS</div>

ruler of the synagogue. This phrase, or the simpler "synagogue ruler," is used to render Greek *archisynagōgos G801*, referring to the person chosen to care for the physical arrangements of the SYNAGOGUE services ("president of the synagogue" would be the equivalent designation today). Several men serving in this capacity are named or mentioned in the NT. They include JAIRUS, the father of a twelve-year-old girl whom Jesus raised from death (Mk. 5:22 – 43; cf. Matt. 9:18 – 26; Lk. 8:40 – 56); an unnamed man who became indignant because Jesus healed a crippled woman on the SABBATH (Lk. 13:10 – 17); those who permitted PAUL and BARNABAS to speak in the synagogue at ANTIOCH OF PISIDIA (Acts 13:15); CRISPUS, the ruler of the synagogue at CORINTH, who believed in Christ as a result of Paul's preaching there (18:8); and SOSTHENES, also a synagogue ruler at Corinth, who was seized and beaten when GALLIO refused to hear charges brought against Paul (Acts 18:7; cf. 1 Cor. 1:1). (For a discussion of synagogue officers in NT times, see *HJP*, rev. ed. [1973 – 87], 2:433 – 39.) See also ELDER (NT).

This 1st-cent. inscription describes the building of a synagogue in Jerusalem by Theodotus, "synagogue ruler." His name occurs at the beginning of the first line; the Greek word for "synagogue ruler," ΑΡΧΙΣΥΝΑΓΩΓΟΣ, occurs at the beginning of the second line (except for the first two letters, which come at the end of the first line).

<div align="right">G. H. WATERMAN</div>

Rumah r*oo*'muh (רוּמָה H8126, "height"). A town that was the home of a certain Pedaiah and/or his daughter Zebidah, who was the wife of JOSIAH and the mother of JEHOIAKIM (2 Ki. 23:36). The site has been variously located. Some suggest that it is identical with DUMAH (#1), one of the towns in the mountains of Judah, near HEBRON (Josh. 15:52), not far from LIBNAH, the native town of another of Josiah's wives (2 Ki. 23:31). Although the consonants d and r are easily confused in all stages of the Hebrew text, the suggestion is unlikely because the SEPTUAGINT, though deriving from a historically distinct text type, reads *Rouma*. Others suggest that it is to be identified with ARUMAH, a place mentioned in the vicinity of SHECHEM (Jdg. 9:41). This suggestion finds support in JOSEPHUS, who says that Zebidah's hometown was *Aboumas*, no doubt a scribal error for Arumah (*Ant.* 10.5.2 §83). But elsewhere Josephus refers to a *Rouma* that was apparently in GALILEE (*War* 2.7.21 §233). Probably this town, modern Khirbet er-Rameh in the Sahl el-Baṭṭof (Valley of Bet Netofa), near RIMMON in Galilee, is in view. In the *Annals* of TIGLATH-PILESER III it is called Arumah (*ANET*, 283). If this location in Galilee is correct, the notice that one of Josiah's wives came from here is of interest because it shows that the dense Israelite population was not removed completely by Tiglath-Pileser when he conquered this area and deported its occupants (cf. Y. Aharoni, *The Land of the Bible: A Historical Geography*, rev. ed. [1979], 371 – 74). B. K. WALTKE

rush. See REED.

rust. A brittle coating that tarnishes the surface of metals, especially iron, due to oxidation or corrosion. The few biblical references to rust are all figurative. In one of Ezekiel's parables, the thick rust or deposit in a cooking pot of bronze became symbolic of the unpurged wickedness of the inhabitants of Jerusalem (Ezek. 24:6 – 13 [Heb. ḥelʾă H2689]). In two NT passages a similar type of indictment, using the symbolism of the rusting of silver and gold, is pronounced against those who accumulate WEALTH (Matt. 6:19 – 20 [Gk. *brōsis G1111*]; Jas. 5:3 [NIV, "corroded" and "corrosion," translating *katioō G2995* and *ios G2675*]). In both cases the question arises whether the rust testifies to the impermanence of the wealth or whether it witnesses against the rich who prefer to hoard the wealth and let it rot rather than use it for benefiting others. The latter may better suit the context, for in the apocalyptic imagery rust is almost a living avenging force (cf. *TDNT*, 3:335). A. JOHNSON

Ruth, Book of (רוּת H8134, possibly "refreshment" or, less likely, "[female] companion"). One of the historical books of the OT in the English Bible. In the Hebrew Bible, it is found among the Writings (HAGIOGRAPHA or KETUBIM) and grouped with the Five MEGILLOTH (Scrolls). Each of the Megilloth was associated with one of Israel's principal feasts, and Ruth was read at the Feast of Weeks (PENTECOST).

1. Background
2. Authorship
3. Purpose
4. Date
5. Literary value
6. Contents

I. Background. The setting of the book of Ruth, "the loveliest complete work on a small scale" (Goethe), is the period of the judges, c. 1200 – 1020 B.C. (see JUDGES, BOOK OF; JUDGES, PERIOD OF). In contrast to the international background of the book of Judges, which traces the moral, religious, and political decline of Israel on a broad scale, Ruth throws light upon a domestic scene where the standards of loyalty and integrity were still high.

II. Authorship. Jewish tradition maintained that SAMUEL wrote the books of Ruth, Judges, and 1 – 2 Samuel. Since the death of this leader is noted in 1 Sam. 25:1, he could not be the author of 1 – 2 Samuel (regarded as one book in the Hebrew Bible). Similarly, the genealogy of Ruth 4:17 – 22 implies that DAVID had already been crowned king, so it is unlikely that Samuel was the author of Ruth, at least in its present form. The book itself contains no clue concerning its authorship.

III. Purpose. Since an understanding of the book's purpose and character is determinative of the date, it must be considered first. There is no other short book in Scripture to which so many widely divergent motives have been attributed. The chief of these are the following:

(1) A postexilic tract produced to combat the narrow exclusivism said to have been introduced by EZRA and NEHEMIAH, in particular their legislation on mixed marriages (e.g., Neh. 10:30; 13:23 – 27). But apart from a stress on Ruth's foreign origin (Ruth 1:22; 2:2, 6, 10, 21; 4:5, 10), such a purpose is far from obvious. The canonicity of the book of Ruth was dependent, humanly speaking, on Jews who were the spiritual heirs of Ezra. Moreover, in the TALMUD the first place in the Writings was given to Ruth, which indicates an absence of tension between the attitude of the book and that of traditional JUDAISM. The possibility of a literary warfare on ideological issues at this early date is questionable.

(2) A document designed to show how a Moabite woman was included in the ancestry of David. The tracing of NAOMI'S line through OBED and JESSE to David (Ruth 4:17) provides a climax to the story, and the connection with Israel's greatest king may account in measure for its preservation. But this falls short of providing an adequate motive.

(3) A plea for an extension of the practice of LEVIRATE marriage, thus averting the tragedy of a family line being extinguished. The purpose then would be one of encouraging humanity toward the childless widow.

(4) A moral fiction. The idyllic nature of the story and the seemingly metaphorical names of its characters—Naomi ("pleasant"), Ruth ("companion"?), MAHLON ("sickly"), KILION ("frailty"?), ORPAH ("stiff-necked"?)—have led to its being described as a "*Novelle*" (Gunkel) or "an interesting tale of long ago" (R. H. Pfeiffer, *Introduction to the Old Testament* [1941], 719). These names, however, conform to common Hebrew patterns, and the name of Naomi's husband, ELIMELECH ("my God is king"), already attested in the TELLEL-AMARNA tablets of the 14th cent. B.C., is typical of early compounds (e.g., ABIMELECH, AHIMELECH). In any case, the narrative itself purports to be historical (Ruth 1:1), and there is no evidence of anachronisms.

(5) A book intended to present Ruth as the perfect PROSELYTE. According to the later rabbis, the point of the story was that she made a clean break with her own people and was completely loyal to the nation and religion of her adopted family.

(6) Perhaps one should not look for a single, all-embracing motive for the book. Surely its preservation is due to the fact that it enshrines so much of what is basic in human relationships and in true Israelite religion. It is the story of a loyal, disinterested relationship that secured its just reward.

The upright, considerate, and industrious BOAZ was a model Israelite. It demonstrates an overruling PROVIDENCE and the all-embracing LOVE of God, illustrating the fact made explicit in Acts 10:34 – 35. Its simplicity and domesticity—it is a story of ordinary people—make their appeal to the heart. It speaks a word of hope to the hopeless, the desolate, and the bereaved.

IV. Date. It is evident that the book of Ruth may be dated on a priori grounds, in relation to the ideological views of the preceding section. Here one considers the more objective evidence. The inclusion of Ruth among the Hagiographa, the third section of the Hebrew Scriptures, is not necessarily determinative of a late date (see CANON OF THE OT). It may have been placed there because of its association with the other books of the Megilloth. Certain Aramaisms and late forms have led some scholars to accept a postexilic date, but the issue is contested by others who maintain that "Aramaisms" (whether real of apparent) occur in Hebrew from the Mosaic period onward. There is also the possibility of minor modifications of language to make the text intelligible to successive generations. Those who accept a 7th-cent. B.C. date for DEUTERONOMY maintain that the book of Ruth must predate the law of Deut. 23:3. The dating of the laws in relation to their observance or nonobservance is hazardous. Accepting a Mosaic origin for the PENTATEUCH, it is evident that many of its provisions were inoperative in the period of the judges.

From Bethlehem to Moab and back.

The purity of style and the classical Hebrew text argue strongly for a preexilic date, but certain features show a gap between the events themselves and the story in its present form. The mention of David in Ruth 4:17, the genealogy of 4:18 – 22, and the explanation of an ancient custom in 4:7 all point to a period after the accession of David. The lack of hostility toward MOAB is compatible with the early years of David (1 Sam. 22:3 – 4; contrast 2 Sam. 8:2, 12) but not with the later period of the monarchy, when Moab frequently fell under the prophetic condemnation (e.g., Isa. 15 – 16; 25:10; Jer. 9:26; 25:21; 27:3; Ezek. 25:8 – 11). No certain date can be given, but a provisional date for the final composition of Ruth during the early monarchy seems not unreasonable.

V. Literary value. Universal assent would be given to the statement that Ruth is a veritable masterpiece of the storyteller's art. The briefest of introductions sets a scene of hopeless desolation

(Ruth 1:1 – 5). Naomi's consideration for her daughters-in-law and Ruth's absolute loyalty, even to the point of accepting a strange and possibly hostile environment, are made clear (1:6 – 22). An apparently fortuitous encounter with Boaz (2:1 – 19) leads Naomi to plan for Ruth's future (2:20—3:5). The story unfolds with a rare delicacy, suspense being maintained until the last—for one breathtaking moment it seems that Boaz was destined not to be Ruth's husband (4:4). All worked out happily and the line of Elimelech was not extinguished. A simple climax, without any embellishment, came when David was named as a descendant of this union (4:17). Naomi, Ruth, and Boaz, the main characters, are skillfully portrayed, and the scene throughout is a simple one, easily comprehended, with two main locations, namely, a roadside in Moab, and Bethlehem during the barley and wheat harvests. The fact that this short story is true makes for an even greater impact.

The fields E of Bethlehem to which Naomi returned with her daughter-in-law, Ruth. (View to the N.)

VI. Contents

A. A Disastrous expedition (Ruth 1:1 – 5). An approximate date for these events, working back from the genealogy of 4:17 (which may be selective), is 1100 B.C. A famine in Judah drove Elimelech and his family to Moab as sojourners, and as such they had no legal rights there. No direct judgment is given on their departure from their own land (which God had given them) or on the foreign marriages contracted by Mahlon and Kilion, but this may be implicit in the triple disaster that struck the family. Moreover, the lament of 1:21 suggests the loss of considerable material possessions brought from BETHLEHEM, possibly before the full effect of the famine was felt.

B. Return to Bethlehem-Judah (Ruth 1:6 – 22). Clearly there was a deep affection between Naomi and her daughters-in-law. But their future prospects of marriage would be remote if they journeyed, as aliens, to Judah. Nor was there any hope through the custom of levirate marriage (Ruth 1:11 – 13; cf. Deut. 25:5 – 6), for Naomi had little chance of bearing further children. Orpah accepted the wisdom of Naomi's advice and returned. There may be an evidence of territorial henotheism in Ruth 1:15, with the gods being limited to the territory of their worshipers, but this is not certain. Ruth's love and loyalty, however, were such that she was prepared to leave her parents (2:11), her people, and their god. Possibly, as her vow seems to indicate (1:17), she was a worshiper of Yahweh before this decision was made. Her magnificent utterance (vv. 16 – 17) may be compared with the blunter,

soldierly protestation of loyalty by Ittai the Gittite, another foreigner (2 Sam. 15:21). So Naomi and Ruth traveled the 50 mi. to Bethlehem, where the stir among the women folk suggests that the family of Elimelech had enjoyed considerable standing in the community. Now Naomi had been brought low, a fact which she attributed to the Almighty.

C. A chance encounter (Ruth 2:1 – 19). The measures Boaz took for Ruth's protection (v. 8; cf. v. 22) show the danger that she, an alien young woman, faced in such a situation. In addition, there was the prospect of hard toil in the heat of the sun for scant reward, in spite of the provisions of Lev. 19:9 – 10 (cf. Deut. 24:19 – 21). Ruth was prepared to accept this, toiling indefatigably (Ruth 2:7) to support Naomi in her penury. Boaz, whose introduction as a man of substance (v. 1) gives point to the whole narrative, was aware of the details of the return from Moab (vv. 11 – 12), but appears to be moved by nothing more than charitable and humane considerations. So a day of drudgery was transformed into a pleasant and fruitful experience. Naomi was quick to realize that such a harvest was an indication of extraordinary events (v. 19).

D. The plan of Naomi (Ruth 2:20—3:18). The reference to the dead (2:20) shows that a plan was already in process of formulation, although Naomi took time to work out the details. Meanwhile Ruth enjoyed security and relative prosperity among the harvesters of Boaz. There are seasonal variations in Palestine but, in general, the barley HARVEST began in mid-April and the wheat harvest ended in the first weeks of June. The suggested course of action (3:1 – 5), springing from Naomi's desire to provide for her daughter-in-law, constituted a direct appeal to Boaz to accept the obligation of the next of kin. It may be assumed that it was the customary course of action in such a situation. Sleeping by the gathered grain (3:7) would be a normal precaution against marauders. Events proceeded with reserve and no hint of any impropriety, and Boaz, who appears as an older man (cf. his address in 2:8 – 9) and a bachelor, was obviously delighted at the prospect of marriage to such an attractive person as Ruth. But before the marriage could be realized a practical difficulty had to be overcome: there was a relative who had a prior claim. Two problems in the narrative were easily resolved: (1) Naomi herself had a greater claim than Ruth upon any near kinsman; this she voluntarily relinquished in favor of her daughter-in-law; (2) Naomi must have known that Boaz was not the next of kin, but in all probability he was the one she preferred and so she placed the responsibility for making the necessary arrangements upon him (3:18).

Gleaning in the fields in modern-day Israel, depicting what this task was like during the time of Ruth.

E. Events in the gate (Ruth 4:1 – 12). The gate, together with the open space immediately inside the city, was the traditional place of justice, commerce, and everyday encounter. There the elders, whose influence in local matters was paramount, were to be found. See ELDER (OT). There Boaz contrived a meeting between himself, the next of kin, and the requisite number of elders. There would be no lack of witnesses among the bystanders. The procedure followed combined elements from the law of levirate marriage (Deut. 25:5 – 6) and the law governing REDEMPTION of property (Lev. 25:25 – 34). When a man died, his brother was required to marry the widow, and the first son born would then perpetuate the name and the line of the deceased. Boaz and the unnamed next of kin were not, however, the brothers of Mahlon, but as the proceedings were regarded as legal, this incident may be an evidence of a pre-Mosaic custom which extended the scope of levirate marriage to include the nearest relative.

As well as having the duty of marrying the widow of the deceased and redeeming the family property, the redeemer-kinsman (see GOEL) was also the AVENGER OF BLOOD (Deut. 19:6, 12). Boaz had first to ascertain the willingness, or otherwise, of the next of kin to fulfill his obligations. The initial willingness of the next of kin (Ruth 4:4) was modified when he was informed that a necessary condition was marriage to Ruth, possibly because the redeemed land would be lost to him if a son, reckoned legally as the son of the dead, should be born (or perhaps he was already married). The ancient custom of drawing off the shoe (vv. 7 – 8) signified an abandonment of the obligation of the next of kin, probably by the acceptance of the shoe as a token payment from the next in succession. The good wishes of the witnesses reflect the prevalent view that prosperity in marriage was measured in terms of children, who would guarantee the permanence of the family line. An incidental difficulty is that the son born was reckoned to Mahlon (v. 10), Elimelech (v. 17, by implication), and Boaz (v. 21). An answer to this problem is not immediately apparent, but it probably lies in the type of levirate marriage contracted, the details of which are lost in the mists of antiquity. The concern of the author is to demonstrate the successful conclusion, and to trace the connection with David.

Origin of the Sabbath

Theories of origin

1. Planetary theory. It is generally agreed that the origin of the Sabbath is closely related to the origin of the week. In the 19th cent. it was commonly believed that the use of a seven-day week arose out of the ancient veneration of the seven planets. In ancient Babylonian ASTROLOGY these included the sun and the moon, and five of the heavenly bodies known as planets today—Mars, Mercury, Jupiter, Venus, and Saturn. The days of the week then were named after the planets or the gods associated with the planets.

The names of the days of the week used today reflect this ancient regard for the planets. Sunday is named for the Sun; Monday for the Moon; Tuesday for Mars (Old Eng. *Tiw,* god of war, like Roman Mars; cf. French *mardi*); Wednesday for Mercury (Old Eng. *Woden,* i.e., Odin, supreme god; cf. French *mercredi*); Thursday for Jupiter (Thor, Norse god of thunder; cf. French *jeudi*); Friday for Venus (Frigga, Norse goddess of love; cf. French *vendredi*); and Saturday for Saturn.

There is no proof, however, that the names of the planets were applied to the days of the week prior to the beginning of the Christian era (Willy Rordorf, *Sunday: The History of the Day of Rest and Worship in the Earliest Centuries of the Christian Church* [1968], 24 – 27). Besides, there is no certain knowledge that the recognition of these seven "planets" led to the formation of a seven-day week. Consequently, this theory has long been abandoned.

2. Pan-Babylonian theory. The most popular theory at the close of the 19th cent., especially among the more liberal historical critics, was that the Hebrew institution of the Sabbath was directly traceable to Babylonia. During that century there were discovered a large number of Babylonian CUNEIFORM tablets, in several of which the word *šsabattu(m)* appears. The word was used to designate the fifteenth day of the month, or the time of the full moon in the Babylonian lunar month. In one tablet it is described as the *um nuḫ libbi*, which has been interpreted to mean "a day of appeasement of the heart," or a day of pacification of the god.

Other Babylonian tablets indicate that the seventh, fourteenth, twenty-first, and twenty-eighth days of certain months were observed as unlucky or evil days. On these days the king was forbidden to eat meat roasted on coals or any food touched by fire. He was also forbidden to ride in his chariot, to change his clothes, or to discuss affairs of state. On these days the priests were not to consult the oracles, and the physicians were not to treat the sick. On these days, according to another series of Babylonian clay tablets, special sacrifices were offered to the gods (John R. Sampey in *ISBE* [1929], 4:2630; A. E. Millgram, *Sabbath: The Day of Delight* [1944], 340 – 41).

While there are remote resemblances between the dietary and travel restrictions imposed on the Babylonian king on these days and some of the biblical laws regarding the Sabbath, the differences between them far outweigh any resemblances. The Babylonian days were reckoned from the beginning of the month; the Hebrew Sabbath was observed every seventh day. The Babylonian restrictions applied to only certain classes of the population; the Hebrew Sabbath was a day of rest for all the people. There was no cessation of business transactions on the Babylonian days, but they were considered more favorable for such activity; no work of any kind was permitted on the Hebrew Sabbath. Furthermore, the term *šabattum* was not applied to these days, but was restricted to the fifteenth day of the month.

The Pan-Babylonian theory of the origin of the Sabbath was based not only on the alleged resemblances between the Babylonian evil days and the Sabbath, but also on alleged similarities between the Babylonian creation tablets and the biblical account of creation. Alexander Heidel has shown that the Babylonian epic ENUMA ELISH, while presenting a number of analogies to the first two chapters of Genesis, is essentially different from the biblical story of CREATION, and concludes that no incontrovertible evidence can be produced for any Babylonian borrowings in the biblical record (*The Babylonian Genesis* [1942], 117). Walter Maier is more positive and emphatic: "If there is any connection between the Babylonian epic and the first chapter of Genesis, then the cuneiform poem must be a demoralized, degenerate, vague, and mythological reëchoing of the revealed truth of the Bible" ("Mimeographed Notes on Genesis," 14).

3. Lunar festival theory. The ingenious theory (closely related to the Pan-Babylonian) that the Hebrew Sabbath is a survival of an ancient lunar festival, which may or may not have been derived from Babylonia, seems to have some support in the Bible. The Bible frequently associates together the Sabbath and the NEW MOON, in each case mentioning the latter first (2 Ki. 4:23; Isa. 1:13; Amos 8:5). A passage from the Pentateuch seems to lend support to this theory. In Lev. 23:11, 15 the Hebrews are commanded to begin the counting of the wave offering from "the morrow after the Sabbath" (KJV), and Jewish tradition interpreted this phrase to mean the morrow after the first day of the PASSOVER, which always fell on a day of the full moon. If this tradition is correct, the word "Sabbath" here refers, not to the weekly Sabbath, but to the day of the full moon. (The Qumran community, however, had a different understanding of Lev. 23:10 – 11; see 11QTemple [= 11Q19] XVIII, 11 – 12.)

Each of the four phases of the MOON occurs approximately seven days after the previous phase. It was thought that the days on which the new moon, the full moon, the half moon, and the waning moon appeared were observed by sacrifices to the lunar god, and later by rest from work (R. J. Floody, *Scientific Basis of Sabbath and Sunday* [1906], 44 – 45). Several considerations support the idea that there was some kind of relation between the observance of the moon phases and the observance of the weekly Sabbath. (1) Ancient CALENDARS were based on the movements of the moon. (2) The Jews celebrated the day of the new moon by sacrifice and feasting and probably by the suspension of everyday occupations (1 Sam. 20:18 – 34; 2 Ki. 4:23). (3) The Jews had certain fixed Sabbaths which fell on the day of the full moon, namely the Passover, the feast of Tabernacles, and the feast of Purim. (4) The Babylonian *šabattum*, which was used to designate the fifteenth day of the month, or the time of the full moon in the Babylonian lunar month, is equivalent etymologically to the Hebrew *šabbat*.

The Hebrew Sabbath, however, was not connected with the phases of the moon. It occurred at the end of a seven-day periodic week that was independent of both the lunar month and the solar year. Millgram (*Sabbath*, 342) concludes: "The question still remains—how could or how did the ancient Semitic observance of the new moon and the full moon, or the observance of the four phases of the moon as evil days, become the *periodic* week with its *humanitarian* Sabbath? This question cannot be answered satisfactorily. The only conclusion that may be drawn is that the seven-day Hebrew week, with its humanitarian rest day as we have it now, is a unique creation of the Hebrew religious

genius, and is one of the most valuable Hebrew contributions to the civilization of mankind."

B. Teaching of the Bible

1. Sanctification of the seventh day at creation. The Hebrews did not claim to be the creators of this unique institution. They affirmed that God himself was its creator. The record of its origin which they preserved for us is in the opening chapters of Genesis. These chapters describe God's creative activity during six days and his sanctification of the seventh day by his cessation from his creative work (Gen. 1:1—2:3). The word *šabbāt* is not employed, but it is certain that the author meant to assert that God blessed and hallowed the seventh day as the Sabbath.

The grouping of the creation narrative into six periods called days, followed by a seventh day of rest, seems to have been done purposefully to establish a weekly sacred day. Later scriptural teaching on the Sabbath seems to corroborate this. The fourth commandment of the Decalogue, as recorded in Exodus, gives as the reason for the Israelites' observance of the Sabbath the fact that God "made the heavens and the earth, the sea, and all that is in them, but he rested on the seventh day. Therefore the LORD blessed the Sabbath day and made it holy" (Exod. 20:11). The words of Jesus, "The Sabbath was made for man, not man for the Sabbath" (Mk. 2:27), point back beyond the Mosaic command to the original purpose and will of God.

It seems clear, therefore, that the divine origin and institution of the Sabbath took place at the beginning of human history. At that time God not only provided a divine example for keeping the seventh day as a day of rest, but also blessed and set apart the seventh day for the use and benefit of human beings. There is no mention of the observance of the Sabbath by the PATRIARCHS, although a period of seven days is mentioned several times in the account of NOAH and the flood (Gen. 7:4, 10; 8:10, 12), and a week is mentioned in the story of JACOB and RACHEL (29:27). Whether the patriarchs had knowledge of or observed the Sabbath does not matter; the revelation of God to Moses was that he had instituted the Sabbath at the close of creation.

2. The ordinance concerning the manna. The first mention of the word *šabbat* is in Exod. 16:23, which gives certain regulations concerning the gathering and preparation of the MANNA, when the Israelites were in the Desert of Sin. At the command of the Lord, Moses told the people to gather and prepare twice as much manna on the sixth day as on other days (Exod. 16:5). When the leaders of the congregation reported to Moses that the people had done so, Moses replied, "This is what the LORD commanded: 'Tomorrow is to be a day of rest, a holy Sabbath to the LORD'" (16:23). The next day Moses commanded the people to eat what had been kept over, and added, "…today is a Sabbath to the LORD. You will not find any of it on the ground today. Six days you are to gather it, but on the seventh day, the Sabbath, there will not be any" (16:25 – 26). Some of the people, notwithstanding this explicit command, went out to gather manna on the seventh day (16:27). At this point the LORD said to Moses, "How long will you refuse to keep my commands and my instructions? Bear in mind that the LORD has given you the Sabbath; that is why on the sixth day he gives you bread for two days. Everyone is to stay where he is on the seventh day; no one is to go out" (16:28 – 29).

This passage shows that the Sabbath was certainly made known to Israel before the giving of the law at Sinai. The Israelites did not arrive at Sinai until the following month (Exod. 16:1; 19:1). The passage also shows that this was not the first institution of the Sabbath. The incidental manner in which the matter is introduced and the remonstrance of the Lord for the disobedience of the people both imply that the Sabbath had previously been known. The Lord's inquiry, "How long will you

refuse to keep my commands and my instructions?" (16:28), sounds as if it had long been in existence. In fact, the equation of the Sabbath with the seventh day, the statement that the Lord gave the Israelites the Sabbath, and the record that the people, at God's command, rested on the seventh day, all point unmistakably to the primeval institution of the Sabbath.

3. The fourth commandment of the Decalogue. The fourth commandment itself does not purport to be the first promulgation of the Sabbath. Its introductory words, "Remember the Sabbath day" (Exod. 20:8), suggest that the Sabbath had been previously known but either forgotten or neglected. The reason given in the commandment for the sanctification of the Sabbath day was the example of God at the close of creation (20:9 – 11). The commandment pointed back to the original institution of the Sabbath.

The fourth commandment made the Sabbath a distinctive Hebrew institution. It formed an integral part of the COVENANT God made with Israel at Sinai. The covenant consisted of the TEN COMMANDMENTS uttered by the Lord himself from the mount (Deut. 4:13; 5:2 – 21). The fourth commandment has a central place in that covenant, serving as the connecting link between those instructions having to do with duties toward God and those having to do with duties toward others.

The Ten Commandments are prefixed by a declaration that God had brought Israel out of the land of Egypt (Exod. 20:2; Deut. 5:6). These words can apply in their literal sense only to the children of Israel. The wording of the commandments themselves also indicates that they were given specifically to the Israelites. The fifth commandment contains a promise of long life in the land which the Lord was about to give to Israel (Exod. 20:12; Deut. 5:16). Similarly, the Deuteronomic version of the fourth commandment gives the deliverance of Israel from bondage in Egypt as the primary reason for the observance of the Sabbath (Deut. 5:15). The keeping of the Sabbath is elsewhere declared to be the sign of Israel's allegiance to God (Exod. 31:13; cf. Neh. 9:14). It served to distinguish Israel from the other nations. There can be no doubt that in its original setting and application the fourth commandment was a law intended specifically for the people of Israel.

At the same time it is evident that the fourth commandment contains principles that are applicable to all people. It recognizes the moral duty of human beings to WORSHIP their Creator, for which stated times and places are needed as well as surcease from the ordinary employments of life. It recognizes also the basic human need for a weekly day of rest. History has demonstrated the need of human beings for the recuperation of physical and mental energies once in every seven days as well as the need for a day of the week set apart for spiritual devotion and instruction. The Sabbath command provided for these needs of the ancient Israelites. Moreover, the appeal to God's own rest indicates that observance of the Sabbath mirrors God's behavior and character. In this sense, the fourth commandment is a specific instance of the broader command, "Be holy because I, the LORD your God, am holy" (Lev. 19:2).

II. History of the Sabbath

A. Mosaic legislation. The regulations for the observance of the Sabbath in the Mosaic legislation are relatively simple. The Sabbath was to be observed on every seventh day; it was to be observed by all: the servants, the humble beasts of burden, the members of the Hebrew household, and the guests who were staying within their gates were all commanded to cease from labor on that day (Exod. 20:8 – 11; Deut. 5 :12 – 15).

The humanitarian aspect of this freedom from toil on the Sabbath is especially emphasized in

DEUTERONOMY, where the deliverance of Israel from the oppressive bondage of Egypt is given as the reason for the keeping of the Sabbath (Deut. 5:14, 15). The gathering of manna on the seventh day had been expressly forbidden (Exod. 16:27 – 29). Likewise, the kindling of a fire on the Sabbath was banned (35:3). The penalty for profaning the Sabbath by doing any work on it was death (31:14). In one specific case, a man who was found gathering sticks on the Sabbath day was stoned to death (Num. 15:32 – 36).

The Sabbath, however, was not a day of total inactivity. The priests carried on their duties about the TABERNACLE. The bread of the Presence (see SHOWBREAD) was to be set on the table in the holy place on the Sabbath day (Lev. 24:8). A special sacrifice, in addition to the ordinary daily sacrifice, was to be offered on the Sabbath day (Num. 28:9 – 10). The rite of CIRCUMCISION was performed on the Sabbath if that was the eighth day after the child's birth (Lev. 12:3; cf. Jn. 7:22). The Sabbath is listed among the sacred festivals, that is, "the appointed feasts of the LORD" (Lev. 23:2 – 3). It, like them, was proclaimed to be "a holy convocation" (23:3). This can only mean that it was regarded as a day for the calling together of the congregation of Israel to worship. In the early history of the Israelites, the Sabbath was a day of welcome rest from labor and of solemn worship at the sanctuary of God.

B. Historical and prophetical books of the OT. The first mention of the Sabbath in the historical books is found in a question uttered by the husband of the Shunammite woman at whose home ELISHA had been entertained. She had asked for one of the servants and one of the donkeys that she might go to see the prophet (2 Ki. 4:22). Her husband expressed surprise at her request and said, "Why go to him today?…It's not the New Moon or Sabbath" (v. 23). His mention of the Sabbath was incidental, but his remark plainly infers that it was customary to suspend work and to visit the prophet on the Sabbath.

Visiting a prophet on the Sabbath would necessarily be limited to the few. There is evidence that visiting the TEMPLE on the Sabbath was a more widespread custom. There are a number of references in Chronicles to the ritual performed in the temple on that day (1 Chr. 9:32; 23:31; 2 Chr. 2:4; 8:13; 23:4; 31:3). The prophet Isaiah, in his condemnation of the hypocrisy of the worshipers, seems to indicate that assemblies took place in the temple on that day (Isa. 1:13).

Isaiah denounced the formalistic Sabbath observance of his time (Isa. 1:12 – 13), and defined true Sabbath-keeping as turning from one's own ways and from one's own pleasures, and taking delight in the Lord (58:13 – 14). Other prophets raised their voices in protest against the abuse of the Sabbath (Jer. 17:21 – 22; Ezek. 22:8; Amos 8:4). They regarded the destruction of Jerusalem and the captivity of the Jews as due, at least in part, to the desecration of the Sabbath (Jer. 17:27; Ezek. 20:23, 24). Hosea predicted that God would make Israel's Sabbaths to cease because of her unfaithfulness (Hos. 2:11); but that this cessation of Sabbath observance was not meant to be permanent is made clear by Isaiah and Ezekiel (Isa. 66:23; Ezek. 44:24).

During the period of the EXILE, the Sabbath rose in prominence as compared to the other religious festivals of the Jews, since it was independent of the temple in Jerusalem, whereas the other festivals were in part dependent on that religious center. In the period of the return from exile, Sabbath observance was revived in Palestine, in large measure through the reforms of NEHEMIAH. On his return to Palestine, he was shocked to see the widespread desecration of the holy day. People labored in the fields, gathered the harvests, and bought and sold publicly on the Sabbath day. Nehemiah rebuked the nobles of Judah and ordered the gates of Jerusalem closed during the Sabbath (Neh. 13:15 – 22). His vigorous efforts were largely responsible for the establishment of the Sabbath

as a day of universal rest among the Jews of Palestine.

C. Intertestamental period. In the years following the reforms of Nehemiah and Ezra, their successors, the SCRIBES, developed an elaborate code of regulations and restrictions governing Sabbath observance. These were intended to safeguard and preserve the spirit of the Sabbath, just as the shell protects the kernel. They were an attempt to "make a fence around the Torah" (cf. *m. ʾAbot* 1:1) so that its proper observance would be guaranteed. The discussion of actual or hypothetical cases led to the formulation of thirty-nine articles that prohibited all kinds of ordinary agricultural, industrial, and domestic work, unless it was by its nature, or in the circumstances of the case, necessary (G. F. Moore, *Judaism in the First Centuries of the Christian Era: The Age of the Tannaim*, 3 vols. [1927 – 30], 2:27 – 30).

The efforts of the scribes to promote a regard for the Hebrew Sabbath were successful. The Sabbath became so deeply rooted in Jewish consciousness and so treasured by individual Jews, that in the days of the Maccabees many chose to die rather than desecrate it. The Jews refused to engage in battle, even in self-defense, on their holy day. Later, however, MATTATHIAS, the leader of the revolt against the tyranny of ANTIOCHUS IV, ruled that it was permissible to take up arms in self-defense on the Sabbath (1 Macc. 2:41; see MACCABEE).

The ruling of Mattathias is significant because it was the first of many such rulings designed to liberalize the restrictions of Sabbath observance. Many ways were found to get around the letter of the law. The motive for the extended casuistry on the Sabbath was undoubtedly to make the law more practicable, but it led to many fanciful and far-fetched interpretations. For example, from the rabbinical interpretation of the command in Exod. 16:29 ("Everyone is to stay where he is on the seventh day"), it was determined that a SABBATH DAY'S JOURNEY might not exceed 2,000 cubits beyond one's dwelling. However, if a person had deposited at that distance on the day preceding the Sabbath enough food for two meals, he thereby constituted it his dwelling, and hence might go on for another 2,000 cubits. Similarly, if families living in private houses that opened into a common court deposited food in the court before the Sabbath, thereby establishing a "connection" between the houses and making them one dwelling, they were permitted to carry things from one house to another without breaking the law (A. Edersheim, *The Life and Times of Jesus the Messiah*, 2 vols. [1889], 2:777).

One of the outstanding features of this period was the rise of the SYNAGOGUE. This institution became the center of the religious life of JUDAISM, not only in those places that were far removed from Jerusalem, but also alongside the temple in Jerusalem. Attendance at the synagogue became customary on the Sabbath day (cf. Lk. 4:16). The Hebrew Sabbath became distinctively a day of worship, a worship connected largely with the synagogue.

D. NT period

1. Jesus and the Sabbath. At the beginning of the NT period, the true meaning of the Sabbath had been obscured by the multitudinous restrictions laid upon its observance. Sabbath observance had largely become external and formal. Many people had become more concerned for the punctilious observance of a day than for the poignant needs of human beings. It was inevitable that Jesus should come into conflict with the Jewish leaders over this issue. It was Jesus' custom to attend the synagogue on the Sabbath (Lk. 4:16; cf. Mk. 1:21; 3:1; Lk. 13:10). In his teaching he upheld the authority and validity of the OT law (Matt. 5:17 – 20; 15:1 – 6; 19:16 – 19; 22:35 – 40; Lk. 16:17).

His emphasis, however, was not on an external observance of the law, but on a spontaneous performance of the will of God that underlay the law (Matt. 5:21 – 48; 19:3 – 9). Jesus sought to clarify the true meaning of the Sabbath by showing the original purpose for its institution: "The Sabbath was made for man, not man for the Sabbath" (Mk. 2:27).

On six different occasions Jesus came into direct conflict with Jewish prejudices in regard to the Sabbath. He defended his disciples for plucking grain on the Sabbath by alluding to the time when DAVID and his men ate the bread of the Presence (Matt. 12:1 – 4; Mk. 2:23 – 26; Lk. 6:1 – 4). By so doing, Jesus placed the Sabbath commandment in the same class as the ceremonial law that prohibited the eating of this sacred bread by others than the priests, and taught that human need had precedence over the legal requirements of the Sabbath. He also reminded his critics that the priests in the temple desecrated the Sabbath and were guiltless (Matt. 12:5). He may have been referring to the weekly performance of worship rituals or more specifically to the practice prescribed by the law of circumcising a male child on the Sabbath if that were the eighth day after his birth (Lev. 12:3; Jn. 7:22 – 23). It was on this same occasion that Jesus said that the Sabbath was made for man, and not man for the Sabbath (Mk. 2:27), indicating that he regarded the Sabbath as a provision for human need and welfare and not as a burdensome legal requirement. It was also on this occasion that Jesus asserted his lordship over the Sabbath (Matt. 12:8; Mk. 2:28; Lk. 6:5).

Jesus expressed anger over those Jews at the synagogue in CAPERNAUM who showed more concern for the punctilious observance of the Sabbath than for a human being who was deprived of the use of a hand; he then proceeded to heal the man before them all (Mk. 3:1 – 5). On another occasion, when the ruler of the synagogue became indignant because Jesus healed a woman who had been crippled by an evil spirit for eighteen years, he defended his action by appealing to the common practice of untying one's domestic animals to lead them to water on the Sabbath (Lk. 13:10 – 17). Again, when Jesus, under the critical eye of the PHARISEES, healed a man on the Sabbath who had dropsy, he defended his action by asking if his critics would not rescue an ox or a donkey that had fallen into a well on that day (14:1 – 6).

The remaining two occasions when Jesus' action on the Sabbath brought him into conflict with the Jewish leaders are recorded by John. One was the healing of the impotent man at the pool of BETHESDA (Jn. 5:1 – 18); the other was the healing of the man born blind (9:1 – 41). On the first of these occasions Jesus defended his right to heal on the Sabbath on the grounds that his Father did not suspend his beneficent activity on that day (5:17), and on the second occasion he condemned the spiritual blindness of the Pharisees (9:40, 41).

In all of these instances, Jesus showed that he placed human need above the mere external observance of the Sabbath. Jesus never did or said anything to suggest that he intended to take away the privileges afforded by such a day of rest. On the other hand, it cannot be said that Jesus intended to perpetuate the Hebrew Sabbath or extend its application to all people. As far as the record of the Gospels is concerned, he never made explicit mention of the fourth commandment. By emphasizing the principles that lay back of the law, the spirit and purpose of the law instead of its formal and external regulations, he prepared the way for the abolishing of all the external laws and ordinances of the OT.

Reconstruction of an ancient synagogue in Capernaum. This may have been the site where Jesus was criticized for healing on the Sabbath (Mk. 3:1 – 6).

2. Paul and the Sabbath. The early Christians were loyal Jews. They worshiped daily in the temple at Jerusalem (Acts 2:46; 5:42). They attended services in the synagogue (9:20; 13:14; 14:1; 17:1 – 2, 10; 18:4). They revered the law of Moses (21:20). The Jewish Christians undoubtedly continued to observe the Sabbath. When Gentiles were brought into the Christian community, a problem arose with regard to their relation to the Jewish law. There were those who insisted that it was necessary for them to submit to the rite of circumcision and keep the law of Moses, which would, of course, include the Sabbath command (Acts 15:1, 5; Gal. 2:3 – 5). Others, of whom PAUL became the leader, affirmed that it was not necessary for the Gentile converts to accept the religion of Judaism. Paul argued that, since they had received the Spirit without observing Jewish law, they were not obligated to adopt Jewish ceremonial in order to live righteously (Gal. 3:2 – 3; c f. A cts 15:7 – 10).

The apostle Paul regarded the law as a yoke of bondage from which the Christian had been set free (Gal. 5:1). In his "revolt against external law" (P. Cotton, *From Sabbath to Sunday* [1933], 11), Paul made no distinction between moral and ceremonial law (although many believe that some such distinction is reflected in 1 Cor. 7:19 and elsewhere). It was all a part of that old covenant which was done away in Christ (2 Cor. 3:14). It was a set of regulations "that was against us and that stood opposed to us," but God canceled it and "took it away, nailing it to the cross" (Col. 2:14). In this context, Paul mentions the Sabbath along with festivals and New Moon celebrations, all of which are declared to be "a shadow of the things that were to come" (2:16 – 17). To observe "special days and months and seasons and years" is to be slaves to "the weak and miserable principles" (Gal. 4:9 – 10; cf. Col. 2:20). The observance of days, along with the avoidance of certain foods, is a characteristic of someone "whose faith is weak" (Rom. 14:1 – 6).

Paul provides no grounds for imposing the Hebrew Sabbath on the Christian. The Christian is free from the burden of the law. The Spirit of Christ enables him to fulfill God's will apart from external observance of the law's demands. The author of Hebrews likewise speaks of the Hebrew Sabbath only as a type of "God's rest," which is the inheritance of all the people of God (Heb. 4:1 –

10). He does not tell his readers to keep the Sabbath, but rather urges them to "make every effort to enter that rest" (4:11).

E. Post-NT period. The early church fathers of the 2nd and 3rd Christian centuries were practically unanimous in their view of the Hebrew Sabbath. Some insisted that it was completely abrogated, while others emphasized its typical character, but all agreed that it was not binding on the Christian.

IGNATIUS, disciple of the apostle John and bishop in ANTIOCH OF SYRIA, wrote to the Magnesians in the early years of the 2nd cent.: "Be not deceived with strange doctrines, nor with old fables. For if we still live according to the Jewish law, we acknowledge that we have not received grace"; and then goes on to categorize his readers as "those who were brought up in the ancient order of things" but who "have come to the possession of a new hope, no longer observing the Sabbath" (*Magn*. 8.1; 9.1; see *ANF*, 1:62, 63).

JUSTIN MARTYR, the first great Christian apologist around the middle of the 2nd cent., explains in his *Dialogue with Trypho* why the Christians do not keep the law of Moses, submit to circumcision, or observe the Sabbath. He asserts that (1) true Sabbath observance under the new covenant is the keeping of a perpetual Sabbath which consists of turning from sin; (2) the righteous men of old, Adam, Abel, Enoch, Noah, and the like, pleased God without keeping Sabbath; and (3) God imposed the Sabbath upon the Israelites because of unrighteousness and hardness of heart (*ANF*, 1:199 – 200, 204, 207).

IRENAEUS, Bishop of Lyons during the latter part of the 2nd cent., viewed the Sabbath as symbolical of the future kingdom of God, "in which the man who shall have persevered in serving God shall, in a state of rest, partake of God's table" (*Against Heresies* 4.16; see *ANF*, 1:481). He cites Abraham as an example of one who believed God "without circumcision and without observance of Sabbaths" (ibid.).

CLEMENT OF ALEXANDRIA, writing around the close of the 2nd cent., says: "The Sabbath, by abstinence from evil, seems to indicate self-restraint" (*Stromata* 7.12; see *ANF*, 2:545).

TERTULLIAN, at the beginning of the 3rd cent., says: "We have nothing to do with Sabbaths or the other Jewish festivals, much less with those of the heathen" (*On Idolatry* 14; see *ANF*, 3:70). In another work he says that those who would contend for the continued obligation of Sabbath-keeping and circumcision must show that Adam and Abel, Noah and Enoch, and Melchizedek and Lot also observed these things. He goes on to say that the Sabbath was figurative of rest from sin and typical of man's final rest in God. It, together with the other ceremonial regulations of the law, was intended to last only until a new Lawgiver should arise who would introduce the realities of which these were shadows (*An Answer to the Jews* 2; see *ANF*, 3:153, 155 – 56).

The Hebrew Sabbath has, of course, continued to be observed by non-Christian Jews to the present time. During the first centuries some Jewish Christians also continued the practice of observing the seventh day of the week as well as the assembly for worship on the first day of the week. But their influence on Christianity, though discernible for several centuries, especially in the E, dwindled rapidly after the destruction of Jerusalem in A.D. 70 (Cotton, *From Sabbath to Sunday*, 58 – 63). The testimony of the ante-Nicene fathers is that for the vast majority of Christians, the Sabbath was a Jewish institution that was not binding on Christian believers.

III. Views of the Christian's obligation to keep the Sabbath

A. The "Christian Sabbath" view. This view holds that Sunday is the Christian Sabbath, the

observance of which is a moral obligation based on the fourth commandment of the Decalogue. Church historian Philip Schaff calls it the "Anglo-American theory" because it has been so widely held in Great Britain and the United States. He traces its origin to the Puritans at the close of the 16th cent. (*History of the Christian Church,* vol. 7, 4th ed. [1903], 493 – 94).

This view emphasizes the divine institution of the Sabbath at the close of creation. God's blessing and sanctification of the seventh day is taken to mean that he intended one day in seven to be observed by all people in all ages as a sacred day of rest and worship. The fourth commandment of the Decalogue, which alludes to the primeval institution of the Sabbath, is regarded as a moral command, and therefore of universal and perpetual obligation. It is argued that the day of the week on which the Sabbath is to be kept was not of the essence of the law, but rather the observance of one day in every seven. Jesus affirmed that he was "Lord even of the Sabbath" (Mk. 2:28) and therefore had the authority to change the day of its observance. It usually is held that this change took place during the forty days between Christ's resurrection and ascension, when he spoke to them concerning the kingdom of God (Acts 1:3).

A modern synagogue in Cairo, Egypt, where Jews today still worship on the Sabbath.

Sabbatarians insist that Jesus intended to perpetuate the Sabbath and extend its application to all people. Much stress is laid on the statement of Jesus, "The Sabbath was made for man, not man for the Sabbath" (Mk. 2:27), as evidence that Jesus regarded the Sabbath as an institution that is grounded in the very constitution of man, and which was instituted by God from the very beginning not only for Israel but for the whole human race (W. F. Crafts, *The Sabbath for Man* [1885], 366). The teachings of Paul regarding the Sabbath are taken to refer only to the Jewish Sabbath and not to the "Christian Sabbath."

This view has appealed to many Christians because it seeks to establish a firm scriptural basis for the observance of Sunday. The Bible does teach that God instituted the Sabbath at the close of creation, but it is identified as "the seventh day" (Gen. 2:3; Exod. 16:29; 20:10; Deut. 5:14), not as one day in seven. There is a moral element in the fourth commandment, for it provides for the worship of God. There are, however, also ceremonial elements in the commandment which applied only to the Israelites. While this command is included among the moral laws of the Decalogue, it is also included

among those civil and religious observances that were obviously temporal and provisional. It can be argued that Jesus himself treated the Sabbath law as ceremonial when he defended his disciples for plucking grain on the Sabbath, for a moral law could never be suspended by circumstances of hunger or by the requirements of a merely ceremonial regulation. Paul made no distinction between ceremonial and moral requirements when he declared that Christians are freed from the law.

The basic weakness of this theory is the teaching that a change was made in the day of the week to be observed as the Sabbath. There is no indication in the NT that Jesus transferred the Sabbath to another day of the week, nor that anyone else did so (although it is argued that the change is suggested by Jesus' meeting the disciples on the first day of the week [Jn. 20:19, 26], by the significance of that day in the life of the early church [Acts 20:7; 1 Cor. 16:2], and by the expression "the Lord's Day" [Rev. 1:10]). Furthermore, if one insists on the perpetual and universal obligation of the fourth commandment, and at the same time recognizes that there is no NT ground for a change in the day of its observance, the only logical position to which he is forced is to maintain that the seventh day of the week, and not the first day, should be observed as the Sabbath, as the fourth commandment stipulates. This is precisely the position taken by the seventh-day sabbatarians. See also LORD'S DAY.

B. The seventh-day Sabbath view. This view, held by the Seventh-day Baptists who originated in England in the 17th cent., and by the Seventh-day Adventists who originated in America in the 19th cent., insists that Christians are obligated to keep the seventh day of the week as the Sabbath. In support of this position, they appeal largely to the OT, especially to the language of the fourth commandment, which, they point out, clearly states that the seventh day is the Sabbath, appointed by God to commemorate his work of creation. The Ten Commandments are referred to as "the law of God," to be distinguished from the ceremonial and civil laws which are called "the law of Moses" (A. L. Baker, *Belief and Work of Seventh-Day Adventists* [1942], 74).

The seventh-day sabbatarians also find evidence for the observance of the seventh day in the NT. They appeal to the practice of Jesus and the apostles of attending the synagogue on the Sabbath (Lk. 4:16; Acts 13:14, 42; 16:13; 17:1 – 2; 18:4). They appeal to Jesus' prophecy regarding the destruction of Jerusalem and his exhortation that his disciples pray that their flight should not be on the Sabbath (Matt. 24:20). They even contend that the reference in Rev. 1:10 to "the Lord's Day" is a reference to the seventh-day Sabbath (Baker, *Belief and Work*, 73 – 74).

Since, according to Seventh-day Adventists, it is useless to search for the change from seventh-day observance to first-day observance in the NT, they assert that this change was made by the Roman Catholic Church. They teach that, during the early centuries of the church, a great apostasy set in, in which the pagan festival of Sunday was gradually substituted for the ancient Sabbath by "unconsecrated leaders of the Church" and by the half-pagan emperor Constantine (E. G. White, *The Great Controversy* [1926], 58 – 59).

The insistence of seventh-day sabbatarians on the wholly moral character of the fourth commandment and on its perpetual and universal obligation is based upon statements that find no support in the Bible. They ignore the clear statements that the fourth commandment was addressed to the Israelites whom the Lord had delivered from Egypt. Moreover, the distinction they make between "the law of God" and "the law of Moses" is not supported by Scripture. Likewise, their interpretation of the words of Christ and of Paul that are quoted in defense of the perpetuity of the Sabbath command, if pressed to its logical conclusion, proves too much. The word *law* as used by Jesus and Paul refers to more than just the Ten Commandments. Seventh-day sabbatarians do not insist that all the laws of the Mosaic legislation are meant to be observed by Christians in this age, but they fail to

see that Paul definitely included the Sabbath command among those ordinances which were done away in Christ. Their claim that the Roman Catholic Church changed the Sabbath from the seventh day to the first day of the week is without foundation. In spite of some Roman Catholic writers that claim that such a change was made by "the Catholic Church," the evidence from the early church fathers is conclusive that these early church leaders did not regard Sunday as a continuation of the Hebrew Sabbath.

While later writers came to think of Sunday as bearing some analogy to the Hebrew Sabbath, and others called the Christian holy day a Sabbath (Eusebius, *Commentary on the Ninety-first Psalm*, quoted by J. A. Hessey, *Sunday: Its Origin, History and Present Obligation* [1889], 299 – 300; Alcuin, *Homily* 18, *post Pentecost*, quoted by A. E. J. Rawlinson, *The World's Question and the Christian Answer* [1944], 78; P. Alphonsus quoted by Hessey, *Sunday*, 903), they grounded its observance more on the authority of the church than on the fourth commandment. The Reformers, although they advocated the Christian observance of Sunday, did not base its observance on the Sabbath command.

G. H. WATERMAN

Sabbath canopy. According to 2 Ki. 16:17 – 18, King AHAZ removed certain items from the TEMPLE, apparently in fear of, or to be sent as tribute to, TIGLATH-PILESER III. One of these items is described as *mûsak haššabbat*, an architectural term of uncertain meaning. The noun *mûsak H4590* is usually derived from the verb *sākak H6114* ("to block, cover"), leading to such renderings as "covert for the sabbath" (KJV), "covered portal for use on the sabbath" (NRSV), and "Sabbath canopy" (NIV). The same verb, however, can mean (in the hiphil) "to hedge in, shut off" (cf. Job 3:23; 38:8), and since Ezek. 46:1 speaks of a gate in the temple that was to be kept closed except on the Sabbath and on the day of the New Moon, some think the item in question may have been a barrier or grille (cf. NJPS, "sabbath passage"). Another proposal is to derive the noun from the verb *nāsak H5818* ("to pour") and to read the second noun as *šebet H8699* ("seat"), which might yield the translation, "cast-metal seat" (see M. J. Mulder in *Von Kanaan bis Kerala*, ed. W. D. Delsman et al. [1982], 161 – 72; note

that the LXX has *ton themelion tēs kathedras*, "the foundation of the throne," apparently understanding the Heb. as *mûsad haššebet*).

<div align="right">F. G. CARVER</div>

Sabbath day's journey. The Greek expression *sabbatou echon hodos* occurs in the NT only once (Acts 1:12; NIV, "Sabbath day's walk") referring to the distance from the MOUNT OF OLIVES to JERUSALEM. This unit of measure (somewhat similar to the Egyptian unit of 1,000 double steps) evidently served to indicate the limit of travel on the SABBATH, but the phrase became a common expression for a relatively short distance. From the Eastern Gate of Jerusalem to the present site of the Church of the Ascension on Mount Olivet, the distance is slightly over half a mile, and indeed a Sabbath day's journey was reckoned by the rabbis as 2,000 cubits (c. 3,000 ft.; see C. K. Barrett, *A Critical and Exegetical Commentary on the Acts of the Apostles*, ICC, 2 vols. [1994 – 98], 1:85).

It is assumed that the regulation had its origin in the Mosaic period in the injunction to the Israelite not to leave camp to collect MANNA on the Sabbath (Exod. 16:29). In the Jerusalem TARGUM this command reads: "Let no man go walking from the place beyond 2,000 cubits on the seventh day." There are other regulations to which appeal is made in an effort to locate the origin of this practice or precept. One is the provision that the area belonging to the Levitical cities included land that extended from the wall 2,000 cubits on every side (Num. 35:5). Another is the supposed distance that separated the ARK OF THE COVENANT and the people both on the march and at camp (Josh. 3:4). As far as this specific regulation is concerned, it applied only to leaving the city, the prescribed distance being measured from the city gate. Within the city proper, no matter how large it might be, there was no such limitation.

The original intent of the provision was to insure a quiet, leisurely Sabbath and to keep it from becoming a harried and busy day (Exod. 16:29). It was also designed to keep the Israelite worshiper in the area of the center of his worship. The motive was noble but, unfortunately, it resulted in a barren legalism. As a consequence, there were casuistic schemes to circumvent it. It did, however, permit a legitimate exception. If one were caught at a distance on a journey, he might travel to the nearest shelter for safety. But there were deliberate schemes to by-pass the rule. One such method was to go out on Friday and establish a residence somewhere by depositing at least two meals there; from that site, the person was allowed to travel an additional 2,000 cubits on the Sabbath (*m. ʿErubin* 8:1 – 2; several chapters in this tractate deal with other ways of combining Sabbath-limits). The QUMRAN community had stricter limits: according to the *Damascus Covenant* (CD X, 21), a person "is not to walk more than 1,000 cubits outside his city."

<div align="right">J. H. BRATT</div>

Sabbatheus sab'uh-thee'uhs. KJV Apoc. form of SHABBETHAI (1 Esd. 9:14).

sabbatical year. The final year in a cycle of seven years within the Hebrew CALENDAR, set aside as a year of rest for the soil, care for the poor and for animals, remission of DEBTS, and manumission of Israelite SLAVES. The year following seven such sabbatical years was known as the JUBILEE YEAR, during which the soil was given another year of rest, and during which there was also the manumission of Israelite slaves and the reversion of landed property to the original owner or his heirs.

The Book of the Covenant, which refers to the sabbatical year merely as "the seventh year," provided for the automatic release of Hebrew slaves in the seventh year (Exod. 21:2). It should be

pointed out, however, that this may simply mean that an Israelite could serve as a slave to a fellow Israelite only for six years, and was freed after that time, whether or not the seventh year fell on a sabbatical year. The Book of the Covenant did provide for the land to remain uncultivated during the sabbatical year, so that the poor people and the wild animals might eat from it (Exod. 23:10 – 11; cf. Neh. 10:31).

In the Holiness or Priestly Code (Lev. 17 – 26), the seventh year is designated as "a sabbath of rest [*šabbat sabbatôn*]" for the land (25:4). During that year, the Israelites were not to sow their fields or prune their vineyards (25:4). Moreover, they were not to reap any harvest that grew of itself, nor gather any grapes from the undressed vine, but such spontaneous fruitage was to be for the poor people and the animals, both domestic and wild (25:5 – 7). A close parallel should be noted between the regulations with regard to the sabbatical year and those with regard to the weekly SABBATH (25:2 – 7; Exod. 20:8 – 11; Deut. 5:12 – 15).

The Holiness Code also provided special observance of the seventh year in a series of seven sabbatical years (Lev. 25:8 – 9) and the observance of the fiftieth year as the year of Jubilee, during which the land was also to remain untilled and the vines undressed, and during which everyone should return to his family estate and all Hebrew slaves serving other Hebrews should be set free (25:10 – 55). The only properties exempt from this law were (a) houses within walled cities that were not redeemed within one year (25:29-31), and (b) the houses of the Levites (25:32-34).

In the Deuteronomic Code, the sabbatical year is called "the year for canceling debts" (Deut. 15:9; NRSV, "the year of remission" [Heb. *šenat hassemitâ*, lit., "the year of dropping"]). This code provided for the cancellation of all debts owed by one Israelite to another at the end of the sabbatical year (15:1-3), adding a warning against unwillingness to lend to a poor neighbor in view of the nearness of the sabbatical year (15:7 – 11).This code also provided for the manumission of Israelite slaves held by fellow-Israelites during the sabbatical year (15:12-15). A further provision was made in the Deuteronomic covenant for the reading of the law at the Feast of Booths during that year (31:10-13).

It is not known how well the Israelites observed the sabbatical years, but 2 Chr. 36:21 implies that they failed to do so, hence were taken into captivity "until the land had made up for its sabbaths" (NRSV; cf. also Lev. 26:34). The gathering of the returned exiles to hear EZRA read the law was undoubtedly in fulfillment of the Deuteronomic covenant (Neh. 8:1 – 8) and must, therefore, have been in the sabbatical year. One of the reforms instituted by NEHEMIAH was the enforcement of the observance of the sabbatical year (10:31).

There is evidence from extrabiblical literature that the Jews observed the sabbatical year after the exile. According to the first book of MACCABEES, BETH-ZUR fell to ANTIOCHUS IV because the food supply of the garrison was quickly exhausted, since the siege took place during a sabbatical year (1 Macc. 6:49-54). JOSEPHUS relates that during the reign of John Hyrcanus (see HASMONEAN II.A) the Jewish nation refrained from aggressive warfare during the sabbatical year (Jos. *Ant.* 13.8.1; *War* 1.2.4). He also relates that Julius CAESAR remitted the annual tribute from the Jewish people in the sabbatical year, since in it the people did not till their fields or gather their fruit *(Ant.* 14.10.6). In the book of JUBILEES, Enoch is said to have "recounted the sabbaths of the years" *(Jub.* 4.18).

The QUMRAN community seems to have observed the sabbatical year by noncultivation of the soil and cancellation of debts. Rabbinical writers refer to a similar observance, but the absence of detailed discussion of such observance in the TALMUD bears witness to its gradual discontinuance. There is no evidence that it was ever observed outside of Palestine. Even in Palestine, it became meaningless, impractical, and eventually obsolete. (See further *ABD,* 5:857-61.)

Sabbeus sa-bee'uhs. KJV Apoc. form of Sabbaias (1 Esd. 9:32).

Sabean suh-bee'uhn (סְבָאִי *H6014* [Isa. 45:14; cf. Ezek. 23:42]; שְׁבָא *H8644* [Job 1:15]; שְׁבָאִים *H8645* [Joel 3:8]). Also Sabaean. This name occurs three (possibly four) times in the Bible as the rendering of three Hebrew forms. In Isa. 45:14, the term *sĕbā'îm* is used with reference to a tall people in a context that also speaks of Egypt and Cush, suggesting that these Sabeans were from SE Africa. It is possible that the same form occurs in Ezek. 23:42 (*Ketib = sôbā'îm, Qere = sābā'îm*, "drunkards"?) with reference to certain people "from the desert," but the meaning of this text is very uncertain. In Job 1:15, we read that Job's oxen and donkeys were carried off by the Sabeans; here the name *šĕbā'* is used, and the context of the story appears to be N Arabia. Finally, in Joel 3:8 the Phoenicians and Philistines are told: "I will sell your sons and daughters to the people of Judah, and they will sell them to the Sabeans, a nation far away"; in this ambiguous reference, the form used is *šĕbā'îm* (a gentilic from *šĕb*ā').

The Sabeans lived in the land of Seba (Sheba).

The matter is further complicated by the fact that the Bible distinguishes between a son of Cush named Seba and a grandson of Cush named Sheba (Gen. 10:7; 1 Chr. 1:9; the names Cush and Seba occur together in Isa. 43:3, while Seba and Sheba are associated in Ps. 72:10). Moreover, there were two additional people by the name of Sheba who were descended not from Ham (father of Cush) but from Shem, namely, Sheba son of Joktan (Gen. 10:28) and Sheba son of Jokshan (25:3); the latter was a grandson of Abraham and brother of Dedan.

According to some scholars, a genetic distinction should be made between northern Sabeans (descended from a Semitic Sheba) and southern Sabeans (descended from a Hamitic Sheba or Seba; see W. S. LaSor in *ISBE* rev. [1979 – 88], 4:255). Others argue for a common progenitor, partly on the (questionable) grounds that the discrepancy between the Hebrew consonants *samek* (ס) and *sin* (

ᴡ̌) can be explained from phonetic correspondences between Epigraphic South Arabian and Hebrew. And the possibility must be left open either (a) that at some point the southern Sabeans colonized some regions of N Arabia or (b) that the Sabean state began in N Arabia, with a movement toward, and settlement of, the southern part of the country during the middle of the 2nd millennium B.C. (Cf. I. Eph̔al, *The Ancient Arabs: Nomads on the Borders of the Fertile Crescent, 9th-5th Centuries B.C.* [1982], 88 – 89, 227 – 29; K. A. Kitchen in *The Age of Solomon: Scholarship at the Turn of the Millennium*, ed. L. K. Handy [1997], 126 – 53.) See also NATIONS II.A.2.

Be that as it may, the name Sabeans normally refers to the people of Saba (Sheba), a kingdom in S Arabia in the area presently known as Yemen and Ḥaḍramaut; its capital was Marib. Their position at the end of the Arabian peninsula was of twofold advantage: (1) they were remote from the powers to the N, and so relatively secure; and (2) they were centrally located with respect to merchandising goods from nearby Africa and India. These included gold, incense, gem stones, probably ivory, etc. (Ps. 72:15; Isa. 60:6; Jer. 6:20; Ezek. 27:22; 38:13), giving rise to a great caravan industry (cf. Job 6:19). Evidently trading in slaves was also carried on (Joel 3:8; cf. Job 1:15). Fertile land and an extensive irrigation system, illustrated by the dam and sluices seen at Marib, made the country fairly self-sustaining.

The history of Saba is extensive, including not only the biblical references, but also a strong pre-Islamic tradition. The biblical narrative suggests that the Sabeans were established prior to the 10th cent., for their queen journeyed to Jerusalem to visit SOLOMON (1 Ki. 10:1 – 13; 2 Chr. 9:1 – 12), probably to confer with him concerning his probable infringement of the Sabean trading hegemony. See QUEEN OF SHEBA. Assyrian CUNEIFORM inscriptions mention Sabean kings as givers of tribute (these date as early as 715 B.C.), and the OSTRACA from SAMARIA list contributions of oil and wine sent by the Sabeans to JEROBOAM in the first part of the 8th cent. From the 3rd cent. B.C. there appear references to these people in the works of historians and geographers, and in some Syriac and Ethiopic religious texts. By the 3rd cent. A.D., S Arabia had been consolidated into a strong state which continued until the rise of Islam. (See further G. Van Beek, "Recovering the Ancient Civilization of Arabia," *BA* 15 [1952]: 1 – 18; A. V. Korotaev, *Ancient Yemen: Some General Trends of Evolution of the Sabaic Language and Sabaean Culture* [1995]; K. Schippmann, *Ancient South Arabia: From the Queen of Sheba to the Advent of Islam* [2001].)

There is strong evidence to suggest that the Sabeans of Marib were closely related to some people groups in SE Africa (the linguistic connection between Ethiopian and Epigraphic South Arabian is well established). Some scholars believe that the initial migration was from the horn of Africa to Arabia (cf. LaSor in *ISBE*, 4:254); others suggest that the Sabeans from Arabia established a trade colony in Nubia (cf. G. A. Herion in *ABD*, 5:861). Either theory would account for JOSEPHUS'S reference to Saba as "a royal city of Ethiopia," later named Meroē (*Ant*. 2.10.2 §249; cf. also Strabo, *Geogr*. 16.4.10) and for the apparent association of the Sabeans with Cush/Ethiopia in Isa. 45:14. (The name *Sabean* or *Sabaean*, as used in the present article, is to be distinguished from the use of the same name with reference to the *Sabians*, a religious group mentioned in the Koran; the term is sometimes also applied to the MANDEANS.)

M. H. HEICKSEN

Sabi sa'b*i* (Σαβει, Σαβιη). (1) Variant form of SHOBAI (1 Esd. 5:28; cf. ASV and see the LXX at Neh. 7:45).

(2) According to CODEX ALEXANDRINUS, Sabi was a servant of SOLOMON whose descendants returned from Babylon with ZERUBBABEL (1 Esd. 5:34; cf. KJV). Most MSS, however, join this name

with the preceding one; see POKERETH-HAZZEBAIM.

Sabta, Sabtah sab'tuh (סַבְתָּא *H6029* [1 Chr. 1:9], סַבְתָּה *H6030* [Gen. 10:7], derivation unknown). Son of CUSH and grandson of HAM, included in the Table of NATIONS (Gen. 10:7; 1 Chr. 1:9). The view that the text should be emended so that the name corresponds with that of Shabako, an Egyptian PHARAOH who ruled in the 8th cent. B.C. (see M. Astour in *JBL* 84 [1965]: 422 – 25), has not been widely accepted (see also SABTECA). Presumably, Sabta(h) is also a place name. If the Cushites settled in the area occupied by ETHIOPIA, the name may correspond to one of several places mentioned by Greek authors (e.g., Strabo, *Geogr*. 16.4.8, refers to a lake named *Saba*). It is possible, however, that the Cushites extended across the RED SEA from Nubia northeastward over the Arabian peninsula, and some scholars prefer a location in S ARABIA, in particular Ḥaḍramaut (HAZARMAVETH), which Strabo refers to as *Sabata* (*Geogr*. 16.4.2; see further *ABD*, 5:861 – 62).

Sabteca sab'tuh-kuh (סַבְתְּכָא *H6031*, derivation unknown). KJV Sabtecha; TNIV Sabteka. Son of CUSH and grandson of HAM, included in the Table of NATIONS (Gen. 10:7; 1 Chr. 1:9). Sabteca is also very likely the name of a place in ARABIA, although its identification is uncertain (for possibilities, see *ABD*, 5:862). Some scholars identify Sabteca with Shabataka, an Egyptian PHARAOH from ETHIOPIA at the beginning of the 7th cent. B.C. (see SABTA).

Sabtecha sab'tuh-kuh. KJV form of SABTECA.

Sabteka sab'tuh-kuh. TNIV form of SABTECA.

Sacar say'kahr (שָׂכָר *H8511*, "reward"). NRSV Sachar; TNIV Sakar. **(1)** A HARARITE who was the father of Ahiam, one of DAVID'S mighty warriors (1 Chr. 11:35; called SHARAR in the parallel, 2 Sam. 23:33).

(2) Fourth son of OBED-EDOM, included in the list of divisions of the Korahite doorkeepers (see KORAH) in the reign of David (1 Chr. 26:4).

Sachar say'kahr. See SACAR.

Sachia suh-ki'uh. See SAKIA.

sackbut. See MUSIC, MUSICAL INSTRUMENTS IV.D.

sackcloth. Strong, rough cloth woven from the long, dark hair of the oriental GOAT or the CAMEL. The Hebrew word *śaq H8566* (as well as the loanword in Greek, *sakkos G4884*) can refer both to the cloth itself and to a bag (sack) made from it. When large, such a bag was used at times as a container for grain (Gen. 42:25). On some occasions it was utilized for saddlebags (Josh. 9:4) and provided a common bedding material (2 Sam. 21:10). Its main use, however, was as an article of clothing and as such it was somewhat similar to the *cilicium* of the Romans.

It appears that since it was made of cheap and durable material, sackcloth served the purpose of an ordinary item of garb. Palestinian shepherds wore it in the exercise of their pastoral task. At times it seems to have served as the distinctive garb of the prophets (Isa. 20:2; Zech. 13:4), but gradually it came to bear a primarily symbolical meaning. On some occasions it took the form of a loincloth and served as an undergarment (2 Ki. 6:30). In most cases, however, it was the chief article of clothing.

See DRESS. Women as well as men wore it (Jdt. 9:1), and in exceptional instances it was even placed on animals (Jon. 3:8).

The wearing of sackcloth was regarded as proper garb for serious and sober occasions. Since it was dark in texture, it was deemed fitting in times of grief and sadness. JACOB clothed himself in it at the report of the death of his favorite son JOSEPH (Gen. 37:34), and DAVID commanded JOAB and the other mourners to wear it upon the death of ABNER (2 Sam. 3:31).

Sackcloth was also a mark of abject penitence. When JEREMIAH called Judah to repent of her sins, he urged them to put on sackcloth (Jer. 6:26). The penitent Jews wore it in the great reformation of NEHEMIAH (Neh. 9:1), and Jesus told the citizens of CAPERNAUM and BETHSAIDA that if the mighty works done in their environs had been done in TYRE and SIDON, the latter would have repented in sackcloth and ashes (Matt. 11:21). The rough and itchy texture served as an aid to self-chastisement, and tossing ashes over the sackcloth ensemble was the sign of the accentuation of their distress (Isa. 58:5; Dan. 9:3). Its use as an indicator of penitence was not restricted to Israel. It also found place in the cultures of MOAB (Isa. 15:3), AMMON (Jer. 49:3), TYRE (Ezek. 27:31), and as has been noted, Nineveh (Jon. 3:5).

There was reference to sackcloth in times of national calamity and danger, as when King HEZEKIAH heard the Assyrian threat (Isa. 37:1). Similarly, when the servants of BEN-HADAD asked for mercy from the king of Israel after the Arameans had been disastrously defeated, they made their plea with sackcloth around their wastes (1 Ki. 20:32). In summary, it was deemed the most suitable garb for times of distress, danger, grief, crisis, and national emergency. (See H. F. Lutz, *Textiles and Costumes among the People of the Ancient Near East* [1933], 25 – 26, 176 – 77.)

J. H. BRATT

sacrament. A term applied primarily to the Christian rites of BAPTISM and the LORD'S SUPPER.

I. The meaning of the term. The Latin noun *sacramentum* (from the verb *sacrō*, "to set apart as sacred") was originally used in a variety of secular contexts with such meanings as "guarantee" and "oath." In a religious context, however, the term would refer to something sacred or consecrated, and in the VULGATE it translates the Greek word *mystērion G3696*, "mystery" (cf. Eph. 1:9; 3:2 – 3, 9; Col. 1:26 – 27; 1 Tim. 3:16; Rev. 1:20; 17:7). In a wide sense it came to designate any sign which possessed a hidden meaning. Religious rites and ceremonies such as the sign of the cross, anointing with oil, preaching, confirmation, prayer, aid to the sick, etc., were equally called sacraments. Adolph Harnack indicates that TERTULLIAN "already used the word to denote sacred facts, mysterious and salutary signs and vehicles, and also holy acts. Everything in any way connected with the Deity and his revelation, and therefore, for example, the content of revelation as doctrine, is designated 'sacrament'; and the word is also applied to the symbolical which is always something mysterious and holy" (*History of Dogma*, 7 vols. [1897 – 99], 2:138 – 39).

It became increasingly evident that the religious significance of the term was too free and broad for careful biblical precision, although the word itself is not used in the Bible. For this reason theologians early endeavored to assign definitions to the word that would reflect a more scriptural exactness. As might be expected, however, such efforts brought agreement neither on the essence nor on the number of the sacraments.

In modern times Gerardus van der Leeuw and Edward Schillebeeckx have argued that the Christian sacraments receive their meaning from the background of a general sacramentology. Such a general sacramentology is said to be a providential precursor of the Christian sacraments, a tutor to

bring us to Christ. One of the difficulties with this view is that it raises the problem of "pansacramentalism" with its anthropologically rather than biblically anchored general sacramentology.

Conservatives maintain that sacraments exist because of a divine signifying. Not every sign is a sacrament, and therefore it is impossible to base the Christian sacrament on a phenomenological analysis. The sacraments of the church are those appointed by Christ in the NT. They are signs and seals of the COVENANT between God and his people. They are visible and outward attestations of the covenant entered into between them. As signs they represent the blessings of the covenant of redemption; as seals they ratify and confirm its validity.

II. The relation between the Word and sacrament. Priority is to be given to the Word, written and preached. The Word can exist in completeness without the sacraments, but the sacraments cannot exist in any meaningful way without the Word. The interpretive Word of God is of decisive significance for the power and the understanding of these visible signs of his redemptive work.

There are certain points of similarity between the Word and sacraments. (1) Their author is the same, and God has decreed that they should both be means of grace. (2) Christ is their focal point of meaning; he is their center. (3) They both must be accepted in faith, as Calvin rightly stated, "They avail and profit nothing unless received in faith." (4) Both are instruments used by the HOLY SPIRIT, who alone makes both real to the Christian.

There are also certain points of dissimilarity between the Word and sacraments. (1) They differ in their necessity. The Word is indispensable to salvation; the sacraments are not. Some have been redeemed without the use of sacraments (e.g., believers before the time of Abraham, the penitent thief on the cross). The Christian is under a compelling moral obligation to obey his Master's commands respecting the sacraments unless external circumstances make it impossible, but this necessity of precept is not to be confused with a necessity of means. The sacraments are nothing less but nothing more than a *visible* sign of the Word. Faith alone (*sola fide*) is the instrumental cause of salvation (Jn. 5:24; 6:29; Acts 16:31 et al.).

(2) They differ in their application. The Word is to be preached to everyone (Matt. 28:18 – 20), whereas the sacraments are to be administered only to those who profess faith and, as held by a large segment of Protestants, to those within the covenant relationship, as infants in the case of baptism. The sacraments are meaningless to those who are not within the CHURCH. In the case of the Lord's Supper, PAUL even indicates that professing Christians should be warned lest they partake unworthily (1 Cor. 11:27 – 32).

(3) They differ in their object. The Word is designed to initiate and strengthen faith, whereas in the Protestant tradition the sacraments are understood to contribute either solely or principally to its strengthening. There is some difference between the Lutheran and Reformed perspective on this point.

Baptismal font in the Church of the Nativity (Bethlehem, c. 5th cent.).

(4) They differ in their medium of expression. The Word expresses itself most powerfully through the medium of sound (preaching), whereas the sacraments do so through the medium of sight, in association with taste and touch. The sacraments are a *visible* Word; a sacrament is "a visible form of an invisible grace."

III. The number of the sacraments. The question concerning the number of sacraments is integrally bound to the matter of their essential nature. The Roman Catholic Church maintains that their essential nature is that of an infusion of supernatural grace into all of life from beginning to end. With appeal to the selective principle of divine appointment and tradition, to the harmony and beauty which they display, and to the doctrinal authority of the church, the number of sacraments was inviolably fixed at seven: (1) baptism (Matt. 28:19; Jn. 3:5); (2) confirmation (Acts 8:14; 19:6); (3) Eucharist (Matt. 26:26 – 29; Mk. 14:22 – 25; Lk. 22:15 – 20; Jn. 6:1 – 71; 1 Cor. 11:23 – 25); (4) penance (Jn. 20:21 – 23); (5) extreme unction (Jas. 5:13 – 15); (6) orders (Lk. 22:19; 1 Cor. 11:26); (7) matrimony (Matt. 19:4 – 9; Eph. 5:21 – 32).

In sharp contrast to this multiplicity of sacraments stands the Protestant doctrine with but two: (1) baptism and (2) the Lord's Supper (Eucharist). It should be noted that such diverse ceremonies as orders, matrimony, and extreme unction may all be biblical in their own way, but they were clearly not directly instituted by the Lord himself as uniquely signifying the saving work of Jesus Christ and therefore they do not qualify as sacraments. Jesus calls his death a baptism and a cup (Matt. 20:22), and unlike the other observances these actions themselves directly reflect the redemptive work which Jesus Christ accomplished. By their very nature, therefore, these two sacraments stand in a class by themselves and cannot simply be included with other ecclesiastical ceremonies; they are unique.

IV. The efficacy of the sacraments. The question as to the efficacy of the sacraments has been argued around the concept of symbolism (Reformation) versus realism (Rome). It should be clearly understood however, that symbolical does not mean without real efficacy. Symbol is not opposed to

reality (see SYMBOLISM). The real question concerns the manner in which this reality is represented.

According to Roman Catholic theology, the sacraments work *ex opere operato*; that is, the working is *objective* and does not depend in any way upon the recipient. The sacrament is an instrument of God and the cause of redemptive grace. This idea has led some to see in Roman Catholic sacramentality a certain magical quality. This *ex opere operato* was understood as a matter-of-fact working from above in which there was no element of human subjectivity. To view the Roman Catholic sacramental doctrine as *magical* would be too simplistic. In addition to her appeal to the objectivity of the sacraments, Rome has maintained that a certain subjective disposition is necessary for the working of the sacraments—a disposition that simply presents no opposing obstacle. The problem then becomes one of understanding how this necessary disposition may be harmoniously connected with the *ex opere operato*, that absolutely objective structure of the sacrament which works independently of the recipient.

Representative of the Reformed Protestant position on the efficacy of the sacraments is the statement of the *Westminster Shorter Catechism* (answer to question 91), "The sacraments become effectual means of salvation, not from any virtue in them, or in him that doth administer them; but only by the blessing of Christ and the working of his Spirit in them that by faith receive them." The efficacy thus is not found in the sacraments themselves as outward acts but rather in the blessing of Christ and his Spirit conditioned upon faith in the recipient.

Reformed theology maintains that the efficacy of the sacraments is seen in three ways: (1) as *representative* of the benefits of the new covenant; (2) as *seals* of the same; and (3) as the *application* of the same. As *seals* the sacraments constitute outward signs of an already established inner spiritual relationship with Christ through faith. They are presumptive evidence for the validity of the divine redemptive covenant; that is, they are applied subsequent to the time when the individual is presumed to be regenerate. The sacraments in no way accomplish that of which they are a sign. As seals they are applied in obedience to the command of Christ, as an outward *sign* of the inward grace that is confidently expected in the case of infant baptism, or believed to have been actually received in the case of adults.

When the sacraments are viewed as applying grace, what is meant is that they are a means of actually bringing us grace. They do not simply portray something in order to bring to remembrance but they also do something in order to bring spiritual strength. This is not to contend for a special sacramental grace but rather for the idea that the working of the sacraments rests essentially on saving grace.

Representative of the Lutheran Protestant position on the efficacy of the sacraments is the statement of the *Augsburg Confession* (article 5), "For the obtaining of this faith, the ministry of teaching the Gospel and administering the Sacraments was instituted." According to the conservative Lutheran theologian Francis Pieper (*Christian Dogmatics*, 3 [1953], 111), the Lutheran symbols stress the fact that the sacraments and the Word of the gospel have the same purpose; namely, that of the attestation and conferring of the forgiveness of sins and the strengthening of faith in this forgiveness. Lutherans agree with Reformed Protestants in affirming the necessity of faith, but they tend to ascribe the efficacy of the sacraments to a real objective virtue of grace resident in the elements.

(See further G. C. Berkouwer, *The Sacraments* [1969]; C. K. Barrett, *Church, Ministry, and Sacraments in the New Testament* [1985]; L. D. Bierma, *The Doctrine of the Sacraments in the Heidelberg Catechism: Melanchthonian, Calvinist, or Zwinglian?* [1999]; J. F. White, *Sacraments as God's Self Giving* [2001].)

sacrifice and offerings. Religious ritual was a major expression of ancient Israel, especially the rites of animal sacrifice with their accompanying libations, effusions, sacred meals, etc. Such liturgical acts have their parallels in the contemporary cultures of the ANE, but this is not to say that biblical sacrifice was merely an imitation of neighboring cultures. It is the ideology expressed in the ritual complex as a whole that makes the Israelite religion unique. The presentation of sacrificial rituals in OT passages furnishes a counterpart to the more hortatory proclamations of the prophets. The concepts and ideology of OT ritual underlies NT theology regarding the problem of SIN and the sinner's RECONCILIATION to God by means of ATONEMENT.

I. Introduction. The older approach to the study of sacrifice as a religious phenomenon was usually based on some 19th-cent. concepts of cultural progress. The source of rituals was sought among primitive societies; the rites of the BEDOUIN were taken as normative for explaining the development of OT sacrifice. Today, the comparative study of tribal customs in underdeveloped areas is the domain of the anthropologist; its main contribution is the interpretation of the preliterary cultures of Palestine (e.g., the Chalcolithic).

Even though the Bible also affirms that sacrificial practices go back to the dawn of civilization (Gen. 4:3 – 4), the terminology used in the PENTATEUCH for describing the earliest rituals is that of LEVITICUS. In other words, even the most ancient examples of sacrifice are depicted by means of a nomenclature rooted in a highly developed, well-organized sacerdotal framework. Certain schools of biblical criticism have asserted that the ritual system embodied in the Pentateuch cannot be earlier

than the postexilic period. However, archaeological discoveries pertaining to the sacrificial systems of Mesopotamia and the Levant in the 3rd and 2nd millennia B.C. have shown that very complex rituals were practiced all across the FERTILE CRESCENT long before the entry of the Israelites into Canaan. Since the biblical claim is quite explicit to the effect that the patriarchal culture, especially in the sphere of religion, sprang from the great centers of civilization, Mesopotamia and Egypt (cf. Joshua's unequivocal statement, Josh. 24:2, 14), there is no reason to doubt that even the Israelites could have known and also practiced a sophisticated order of ritual.

For the study of sacrifice in the ancient world, modern investigators may avail themselves of both the material remains of TEMPLES and other cultic centers, including the bones of sacrificial animals found in association with them. Many such installations have been found in MESOPOTAMIA, N SYRIA, and even in PALESTINE, as well as EGYPT, Anatolia (ASIA MINOR), and the AEGEAN region. Some date to the prehistoric era, that is, before the use of writing, whereas many are from the richly documented 2nd and 1st millennia B.C. The only real temple found thus far in a true context of a fortified center from Israelite times is that at ARAD, though Iron Age "high places" and "cultic centers" of various types have been discovered elsewhere (e.g., HAZOR, LACHISH, MEGIDDO).

On the other hand, the main source for the elucidation of ancient sacrificial ritual consists of collections of written documents now at our disposal. Today it is customary to classify these texts of a ritual nature according to the manner in which the rite is depicted (cf. B. A. Levine's articles in *JAOS* 85 [1965]: 309 – 18; *Lešonenu* 30 [1966]: 3 – 11 [in Heb.]). A definite set of instructions for the conduct of rituals, including the implements, materials, actions, prayers, and incantations to be performed, is called a *prescriptive* ritual. Such contexts were composed and preserved for the guidance of the PRIESTS or other functionaries in the conduct of their duties.

A written source that tells how and when a certain rite or series of rites was performed is referred to as a *descriptive* ritual. Under this latter category are two subclasses. Narratives, whether historical, mythological, or legendary, may include the description of a sacrifice made by the leading personage in the story; quite often they go into considerable detail to stress that the rite was performed according to regulations. This was a literary means of teaching the reader or hearer about the necessity and propriety of fulfilling one's sacrificial obligations. The "narrative *descriptive* rituals" form this class. The second is comprised of a much more prosaic, often boring type of documents, namely, the laconic temple records of expenditures and income in terms of the required ingredients for rituals performed. In some cases they represent a sort of accountant's journal of the sacrifices made during a specific period of time. Mesopotamia and Ugarit (cf. below) have produced many such records, but their analysis for the purpose of defining ancient sacrificial ritual is only beginning. The usefulness of this terminological classification of the sources will be obvious in the ensuing discussion.

II. The ancient world. The following is not meant to be definitive for any of the cultures dealt with; only salient features that by comparison or contrast shed light on the sacrifices of the OT will be pointed out.

A. Mesopotamia. The dominant idea of sacrifice in the "Land of the Two Rivers" was that of provision for the gods. In the Creation Epic (see ENUMA ELISH), Marduk is said to have created mankind (the black-headed ones) for this purpose: "Verily, savage-man will I create. / He shall be charged with the service of the gods / That they might be at ease" (*ANET*, 68a). The other deities of the pantheon, grateful for Marduk's deliverance from chaos and provision for their needs, expressed

their devotion and adoration: "May he shepherd the black-headed ones, his creatures…/ May he establish for his fathers the great food-offerings. / Their support they shall furnish, shall tend their sanctuaries. / May he cause incense to be smelled…/ May food-offerings be borne for their gods and goddesses. / Without fail let them support their gods! Their lands let them improve, build their shrines, / Let the black-headed wait on their gods (ibid., 69a-b).

The dependence of the deities upon the food provided by man is further illustrated by a narrative description of the sacrifice offered by the flood hero, Utnapishtim, after his escape from the deluge: "I poured out a libation on the top of the mountain. / Seven and seven cult vessels I set up, / Upon their pot stands I heaped cane, cedarwood, and myrtle. / The gods smelled the savor, / The gods smelled the sweet savor, / The gods crowded like flies about the sacrificer" (ibid., 95a). This picture of the gods famished by hunger because mankind had been destroyed and was no longer providing their meals, swarming around the offerer like flies, may reveal a touch of humor but it also brings home the pathos of Mesopotamian religion. The gods were subject to the same appetites as mortals; therefore they had enslaved the human race and required of them that they furnish their meals as the fruit of human toil on the earth. The parallel with Gen. 8:20 – 22 is quite striking, but the difference is even more so. (For the significance of the "pleasing odor" [KJV "sweet savor"] in Israelite ritual, see below.)

This central idea is also reflected in the social organization of ancient Sumerian society (see SUMER). Each deity in the pantheon had his own estate, consisting of a city and its adjacent territory. He was the lord of his manor, and the priest-king, the *ensi*, was the manager of his estate. The temple was the central institution to which all products due to the deity were brought. By the Old Babylonian period (19th – 18th centuries B.C.), the monarchy and the palace had come to overshadow even the temple as a social, economic, and political institution, but the kings were always concerned with providing the gods their due.

The role of sacrifice was inextricably bound up with prayer and supplication in the attempt of the individual to obtain health, prosperity, and well-being from his deity. Copies of prayers to be offered were concluded by a special section addressed either to the supplicant or to the priest—the expert who must perform the rites with precision if the prayer was to be effective. The so-called Babylonian "Righteous Sufferer" described his miserable state as that of one who had failed to carry out his ritual obligations to his god and goddess; such neglect consisted of not praying (with the lack of accompanying rituals), of neglecting the holy days, of failing to teach his people reverence and obedience, of eating without the proper blessings, of neglecting to bring cereal offerings to his goddess, of forgetting his lord and of taking his oath frivolously (*BWL*, 39, lines 12 – 22). On the contrary, he claimed: "For myself, I gave attention to supplication and prayer. To me prayer was discretion, sacrifice my rule" (ibid., lines 23 – 24). After his restoration to health, he resumes his worship: "I persisted in supplication and prayer before them [the gods]. Fragrant incense I placed before them. I presented an offering, a gift, accumulated donations. I slaughtered fat oxen and butchered *fattened sheep* (?). I repeatedly libated honey-sweet beer and pure wine" (ibid., 60, lines 91 – 95).

Although animals were habitually slaughtered, no evidence has been produced for any special attention being paid to the blood as an element of ritual. The beast itself was food for the deity, but its blood was evidently allowed to return to the earth. The ancient hero Etana, who earnestly besought the sun god (Shamash) to grant him an heir, said: "Thou hast consumed, O Shamash, my fattest sheep, / The earth drinking the blood of my lambs. / I have honored the gods and revered the spirits; / The oracle priestesses have done the needful to my offerings. / The lambs, by their slaughter, have done

the needful to the gods" (*ANET*, 117a-b). The earth's drinking of the blood is a natural expression for death by slaughter, and is also applied to warriors (cf. Code of Hammurabi, reverse xxviii.10; *ANET*, 179b).

Of special significance, however, was the use made of the entrails. The lungs, intestines, and, above all, the liver were utilized in the determination of oracles. There was even a special set of oracular conditions that could be determined by the behavior of the sacrificed lamb in its death throes. A vast literature grew up in the form of collections of events, historical or theoretical, that were indicated by markings, indentations, holes, and other features of the organ being examined. The offerer frequently made his sacrifice with the express purpose of gaining supernatural insight into the future. Thus the king of Babylon resorted to just such a practice in the course of his campaign in the Levant that resulted in the attack on Jerusalem (Ezek. 21:21).

The most widely known prescriptive ritual text from Mesopotamia is that for the New Year Festival at Babylon (*ANET*, 331 – 34). It gives the order of events, including sacrifices and the recital of prayers and other texts, as required for each day of the celebration. One of the most relevant for comparison with OT ritual is the act of purification performed on the fifth day. The officiating priest "shall call a slaughterer to decapitate a ram, the body of which the *mašmašu*-priest shall use in performing the *kuppuru*-ritual for the temple." After the necessary incantations and purifications have been performed, the *mašmašu*-priest takes the lamb's carcass and the slaughterer takes its head; both of them proceed to the river and throw their gory burdens into it. Then they remain in the open country for seven days from the fifth to the twelfth of Nisan. The parallel with the "scapegoat" ritual of the OT is only general and not in details. There was no act of confession for sin; instead, the expulsion of demons was the goal of this rite, as is clearly seen in the incantation that follows it (ibid., 333b – 334a).

Megiddo temple complex with a large round altar used for blood sacrifices by ancient Canaanites (c. 2200 – 1500 B.C.).

Presenting the food prepared from sacrificial cereals, animals, spices, and liquids before the deities was a central feature of the Mesopotamian cultus. After the god, in the form of an idol, had viewed the foodstuffs, they were taken away to be eaten by the king (contrast the well-known passage

in the APOCRYPHA, Bel 3 – 22). The principle seems to have been that the god had obtained the necessary nourishment by gazing upon the food or having it passed before his eyes. In turn, his doing so imparted a special blessing to it that was passed on to the king.

B. North Syria and Anatolia. One of the most striking allusions to sacrifice from the AMORITE kingdom of MARI is the description of the ritual for making peace by slaying a donkey foal. An official reported: "I went to GN to kill a donkey foal between the Khaneans and Idamaras. They brought forth a puppy and a goat and, my lord, I was afraid. A puppy and a goat I would not give. I caused to be slain a donkey foal the offspring of a she-ass; I made peace between the Khaneans and Idamaras" (*ARM*, 2, no. 37, 11.5 – 14). Apparently two rituals were known to them, and the official insisted on the donkey sacrifice (the word rendered "goat" was formerly misunderstood as "lettuce").

A text from ALALAKH (Level VII) records the sacrifices to be offered in connection with an oath in the name of Adad and Ishtar by the king and his brother. The W Semitic emphasis upon burning the animals (instead of cooking them as food for the deity) is expressed by the prescription: "The fire will consume the lambs and the birds" (Alalakh Text no. 126.15, 19).

The HITTITE rituals with their detailed prescriptive texts (e.g., *ANET*, 346ff.) have many suggestive parallels to OT passages. Most interesting is the ceremony in which one of the sacrificial animals, such as a dog, is cut into pieces and placed on either side of an improvised gate through which the participants have to pass. A similar rite using the bodies of prisoners of war is also attested. Whether there is any connection between the Hittite practice and the ritual acts of ABRAHAM (Gen. 15:10 – 11, 17) or of the leaders of Judah (Jer. 34:18 – 20) is impossible to say (cf. Ezek. 16:3, 45).

C. Ugarit and Phoenicia. The tablets from UGARIT furnish some important ritual texts of both prescriptive and descriptive types. The literary pieces give special attention to the enactment of sacrificial rites at crucial points in the narrative. The legendary King Keret conducted a special sacrifice to invoke blessing upon an impending military expedition: "He washed and rouged himself…He entered the shade of the tent. He took a sacrificial lamb in his hands…its commensurate loaves as food offering, he took the…of sacrificial bird(s); he poured wine in a silver cup, honey in a golden bowl; he went up to the top of the tower…He lifted his hands heavenward; he sacrificed to the Bull, his father El; he invoked Baal with his sacrifice, the son of Dagon with his victuals" (*Krt* 11.156 – 71). A mythological selection contains the enigmatic statement: "Two sacrifices does Baal hate, three the rider of the clouds, the sacrifice of shame, and the sacrifice of fornication, and the sacrifice of abuse of handmaidens" (*UT*, 51: III, 17 – 21).

The word rendered "sacrifice" (*dbḥ*) may also be "festival," as proven by a syllabary tablet where Akkadian *isinnu,* "festival," is equated with Ugaritic *dabhu.* The translation of entries in accounting records such as ḫmšy. bd/bḥ mlkt / mdrʿ, "five (jars) of wine for the *sacrifice* of the queen in the sown land" (*UT*, 1090:14 – 16) may have to be altered to "the *festival* of the queen, etc." Nevertheless, the prosaic ledgers of the palace and temple library at Ugarit contain both descriptive (accounts of supplies issued) and prescriptive ritual texts.

The sacrificial terminology applied to animals designated for the various gods include ,*atm*, "guilt offering," and *šrp,* "peace offering." The animals offered were the sheep, male (*š*) and female (*dqt*), the cow (*gdlt*), the bull (*ʾalp*), and also fowl (*ʿsr*); incense (*qṭr*), and libations of wine (*yn*, ḫ*mr*, *trt-*) and honey (*nbt*) were also utilized. The occasions recorded are usually calendrical, for example, *ym* ḥ*dṯ*, "day of the new (moon)," and the magic, mythological, or ethical significance is

generally impossible to determine (except for narrative passages). One broken tablet listing sacrifices begins by an allusion to *slḥ . npš*, "forgiveness of soul" (*UT*, 9:1).

These Ugaritic texts, dating from at least as early as the 14th – 13th centuries B.C., show how the technical terminology of the OT was already in wide use during the 2nd millennium. For the Canaanite practices of Israel's contemporaries in PHOENICIA, we are dependent upon OT allusions. ELIJAH and the prophets of BAAL evidently prepared their sacrifices in the same manner (1 Ki. 18); common sacrificial terms were applied to the customs at the temple of Baal in SAMARIA (2 Ki. 10:24), as well as to the Aramean rites of NAAMAN (5:7). Two Punic (i.e., late Phoenician) lists of prices for sacrificial animals, one found at Carthage and the other at Marseilles (whence it had been carried), reveal a nomenclature very much like that of the OT, though scholars are in disagreement about the exact comparisons. The main terms in those lists are *ṣwʿt* ("sin offering"?), *kll* ("whole [burnt] offering"), and *šlm* ("peace offering"). The distribution of the meat varies according to the type of sacrifice; even from the *kll,* a small portion was given to the priest (contrast the "whole burnt offering" in Israel, below). There are differences between the two lists; therefore, one need not be surprised that the regulations do not match exactly those of the OT.

D. The Hellenic world. The common Mediterranean practice of burning the offering (unlike Mesopotamia) is also reflected in Greek sources. The Homeric epics describe in some detail the typical sacrifice to an Olympian god (e.g., *Iliad* 1.446 – 74). After the washing of hands, grain was scattered about; then the animal's head was drawn back so as to face upward, its throat was slit and afterward it was flayed. Slices from the thighs wrapped in fat were burned on the altar amid libations of red wine. Next the offerers tasted the inner parts (*splanchna*, pl. of *splanchnon G5073*), contrary to Israelite practice (see below), and carved the rest of the meat into small pieces, which they roasted for themselves on skewers. Thus, a sacred meal was even part of the sacrifice meant to appease an angry god.

Sacrifices to the Olympians of heaven bore some sharp contrasts to those made for the underworld deities of the earth. The animal was usually a white ox for the former, a black ram (or pig) for the latter; the throat was turned upward to the Olympian, downward to the earth deity for whom pains were taken to see that the blood soaked into the earth. The heavenly gods were worshiped in their splendid classical temples and the sacrifice made on the raised altar (*bōmos G1117*; cf. Heb. *bamâ H1195*, "high place"); the chthonian deities received their homage in caves of underground shrines, and the offering was laid either on a low "hearth" altar or in a pit. The proper time for sacrificing to the Olympians was morning, but to the underworld gods it was at evening or late at night. A good example of the rites for an earth deity is that for the dreaded Hecate, goddess of demons and phantoms, who normally received sacrifices of dogs, black female lambs, and honey (Apollonius Rhodius, *Argonau-tica* 3.1029 – 39).

Descriptive ritual texts of the nonnarrative class include not only inscriptions from the classical period, such as the sacrificial calendar (4th cent. B.C.) from Cos, but also some of the clay tablets in the Linear B script from 14th – 13th cent. B.C. Pylos and Knossos. The classical graphic representations can also be supplemented by the sacrificial rite portrayed on the sarcophagus from the Late Bronze Age Cretan town of Agia Triada. The underworld nature of the ritual (funerary) is the reason for the collection of the victim's blood as it flows from its slashed throat.

This monument from Ephesus shows a worshiper taking a ram for sacrifice.

III. Biblical data

A. Vocabulary. The act of sacrificing is expressed by a special group of Hebrew verbs that had doubtless obtained their technical meanings through centuries of usage. The most common is *zābaṣ H2284*, "to slaughter for sacrifice." Its general meaning was probably "to slaughter an animal for food" (cf. Deut. 12:15 et al.; the Arab. cognate *ḏdabaṣa* is widely used for acts of slaughtering, besides those explicitly pertaining to sacrifice). The semantic relationship to the act of slaughtering is illustrated by Isa. 34:6, "For the LORD has a sacrifice [noun *zebaṣ H2285*] in Bozrah / and a great slaughter [*ṭebaḥ H3181*] in Edom." In spite of the superficial resemblance of the two nouns used here, they are not etymologically related (their Semitic roots were *ḏbṣ* and *ṭbḫ* respectively). The Hebrew verb often takes a cognate accusative (e.g., *wayyizbĕhû zĕbāḥîm*, lit., "and they sacrificed sacrifices," 1 Sam. 6:15).

The slaying of the sacrificial animal can be portrayed by the use of a more common verb for slaughtering, *šāḥaṭ H8821* (Exod. 29:16; Ezek. 44:11 et al.). One could also speak simply of "making" a sacrifice (Heb. *ʿāśâ H6913*, Exod. 10:25; 1 Ki. 12:27; Jer. 33:18). Other aspects of the sacrificial act could be highlighted by the use of different verbs; for example, one might "bring" the offering (*bô, H995* hiphil, Amos 4:4) or "present" it (*nāgaš H5602* hiphil, 5:25).

The idea of "presenting" or "offering" the sacrifice to God is most often expressed by the verb "to bring near" (*qārab H7928* hiphil), which appears profusely in ritual contexts (Lev. 7:16; 22:26; cf. also Exod. 29:3 et al.). The cognate noun from the same root is *qorbān H7933*, meaning literally "that which is brought near" (the verb and noun are used as a phrase twenty-five times in the ritual

passages from Lev. 1:2 to Num. 31:50). It is this term that appears as CORBAN (*korban G3167*) in Mk. 7:11, where it is explained as *ho estin dōron*, "which is a gift [for God]" (the LXX also renders the Heb. term by *dōron G1565*, Lev. 1:2 et al.; cf. Jos. *Ag. Apion* 1.22; *Ant.* 4.4.4). An inscription on the fragment of a stone vessel discovered in the excavations of NT Jerusalem consists of the word *qorbān*. Just above the word appears a symbol (like a trident) that occurs on small offering plates from the preexilic temple at Arad; the symbol is preceded by the letter *qoph* (q), evidently an abbreviation for the noun.

Other aspects of the process are reflected in such verbs as "to prepare" (Zeph. 1:7), "to cook" (Ezek. 46:24), and "to bless" (1 Sam. 9:13). The standard verbs for the incineration of sacrificial materials on the altar are the hiphil of <*alâ H6590* ("to offer up [*lit.*, cause to go up]," Lev. 17:8 et al.; cf. the term for "burnt offering," (*ōlâ H6592*) and the hiphil of *qāṭar H7787* ("to vaporize, to cause to go up in smoke," Lev. 1:9 et al.). This latter verb, in the hiphil or causative stem, is the normal form from that root for reference to Israelite offerings; the piel or factitive stem is almost always used for non-Israelite forms of worship (e.g., 2 Ki. 17:11; the only exception is Amos 4:5). The common verb for "to burn" (*śārap H8596*) is never used of burning on the altar but only of incinerating those parts of the sacrifice that had to be disposed of "outside the camp" (e.g., Lev. 4:12; contrast from the same root the Ugar. noun *šrp*, "burnt offering," mentioned above).

The concept that the offering was in effect a gift from the offerer to God is also made explicit in the phrase *mattěnōt qodšêhem*, literally, "the gifts of their holy things" (Exod. 28:38; NIV, "sacred gifts"). Furthermore, the special feature of being "set apart, made holy" is closely tied in with the view that the sacrifice is a gift. For discussion of such terms as the verb *qādaš H7727* and its cognates, which often pertain specifically to sacrifices or parts thereof (e.g., Lev. 27:9), see the article HOLINESS.

B. Materials. The various materials and elements that comprised the sacrifices and the offerings of ancient Israel will be reiterated in detail below. Certain general observations are necessary, however, in anticipation of the discussion regarding specific offerings. For example, the thing offered had to be the property of the offerer (Lev. 1:2); he might purchase it or bring it from his home. The agricultural nature of all the elements is obvious; except perhaps for the INCENSE, all of the items were edible. Unlike the Mesopotamian view (discussed above) that the sacrifices were necessary to the gods as essential food (cf. Deut. 32:37 – 38), the God of Israel is only said to enjoy the "pleasant aroma" of specific kinds of offering (see below). Even so, the sacrifices are called by the Lord, "my offering [*qorbānî*], my food [*laḥmî*] for my offerings by fire, my pleasing odor" (Num. 28:2, lit. trans.), and "my food, the fat and the blood" (Ezek. 44:7 NRSV). However, these were consumed or effused on the altar and not arrayed before him in the manner of the Mesopotamian divine meal.

On the other hand, the PRIESTS received certain portions that they were required to eat in a sacred place (Lev. 6:26 et al.), and sometimes the offerer was allowed to take part of the animal home for a meal of communal nature (see below, IV.C). The acceptable animals were of domesticated varieties raised for the purpose of providing food (and other products); work animals such as the donkey, which were not eaten, were not used for sacrifice (contrast the allusions to slaying an ass at Mari, above). Throughout the Levitical regulations it is stressed that the sacrificial animal had to be without physical "blemish" or "defect" (*mûm H4583*; LXX *mōmos G3700*, "blame"). Such disqualifying blemishes are defined and summarized in Lev. 22:17 – 25. The minimum age for any animal offered was eight days (vv. 26 – 30).

Altar found in Megiddo, most likely used for burning incense or as a stand for grain or meal offerings.

Although libations of wine and cereal offerings played a prominent role in the rituals, the most important sacrifices were those of animals. The surrender of a living victim was a major factor in nearly every kind of sacrificial ritual; that the life was being forfeited was signified by the extraction of the animal's BLOOD: "For the life of a creature is in the blood, and I have given it to you to make atonement for yourselves on the altar; it is the blood that makes atonement for one's life" (Lev. 17:11). The people were therefore forbidden to eat the blood (Lev. 17:10; also Gen. 9:4; Lev. 3:17; 7:26; Deut. 12:16, 23; 15:23; 1 Sam. 14:31 – 34), since LIFE belongs only to God.

The very careful attention paid to the use and disposal of the blood in the various kinds of sacrifices indicates that, even with nonexpiatory offerings, the principle of blood atonement was not entirely absent. In fact, the role of the blood in the different rituals is one of the unifying features in all of Israelite sacrifice. The ancient meaning of "to make atonement" in this context (*kāpar H4105* piel, Lev. 17:11 et al.) was apparently that the sin of the offerer was "wiped away," not in the literal sense of being ritually purified only, but in the ethical sense that it no longer interfered with the offerer's relationship to God. See ATONEMENT; EXPIATION.

Certain other parts of the animal, in particular the inner organs and the fat attached to them (see below), were always burned on the altar; they were considered to belong exclusively to God. By contrast, some of these very parts were eaten by the sacrificer(s) in Greek epic literature, as mentioned above. The skins were most often given to the priest (Lev. 7:8).

C. Sources. The OT passages pertaining to sacrifice can also be classified according to the categories utilized for other ancient texts.

1. Prescriptive. The principal source for specific instructions concerning the correct performance of Israelite sacrificial ritual is the opening section of Leviticus (Lev. 1 – 7). It consists of two separate treatises. The first (1:1—6:7) is didactic in nature and discusses the sacrifices under two categories:

(a) those of a "pleasing aroma" (*rêaḥ-nîḥōaḥ* H8194 + H5767; LXX, *osmē euōdias* G4011 + G2380 [cf. Eph. 5:2; Phil. 4:18]; KJV, "sweet savor"), namely, the *burnt* offering (Lev. 1:3 – 17), the *grain* offering (2:1 – 16; KJV, "meat"; RSV, "cereal"; NJPS, "meal"), and the *peace* offering (3:1 – 17; NIV, "fellowship"; NRSV and NJPS, "well-being"); and (b) those pertaining to expiation, namely, the *sin* offering (4:1—5:13) and the *guilt* (KJV, "trespass") offering (5:14—6:7 [Heb. 5:1 4 – 26]).

The order in which the various sacrifices are treated reflects a pedagogical classification for the training of the sacerdotal specialists. Great attention is paid to the minute details of each ritual; the different offerings are grouped according to their logical, or conceptual, associations. The grain offering appears immediately after the burnt offering because it was always presented with the latter in actual practice (not stated in this context, but cf. Num. 15:1 – 21; chs. 28 – 29 passim); it also accompanied the peace offering (Lev. 7:12 – 14; Num. 15:3 – 4). In all three of these sacrifices, special attention is paid to the incineration of the inward parts on the altar to produce an "aroma pleasing to the LORD" (Lev. 1:9, 17; 2:2, 9, 12; 3:5, 11, 16); therefore they represent an expression of right relationship with him. The divine favor was bestowed when "the LORD smelled the pleasing aroma" (Gen. 8:21); displeasure was followed by refusal to smell the offerings (Lev. 26:31). There must have been some observation or sign by which the officiating priest announced to the offerer that his sacrifice had been accepted (1 Sam. 26:19; cf. Amos 5:21 – 23).

The other category was comprised of two sacrifices, both of which were for making atonement to gain forgiveness for the offerer (Lev. 4:20 et al.). The occasions demanding such offerings are defined (viz., sin on the part of individuals of various ranks or of the whole congregation), and special attention is paid to the ritual handling of the blood. The sin and guilt offerings are thus in the same class and bear a close relationship to one another (for the unique features of the latter as a specialized sin offering, see below).

The second treatise (Lev. 6:8—7:38 [Heb. 6:1—7:38]) concentrates mainly on certain administrative details pertaining to each offering. It consists of a series of paragraphs, each giving the instructions for one type of sacrifice; these latter have to do with the disposal of the materials presented some parts being allocated to the priest(s), some to the offerer, whereas others were either consumed on the altar or disposed of outside the camp. The designation "most holy" (*qōdeš qādāšîm*, with the second word traditionally pronounced *qodāšîm*) in reference to sacrifices had a practical, administrative significance; it pertained to those offerings, or portions thereof, that were to be eaten only by qualified members of the priesthood (Lev. 2:3, 10; 10:12 – 17; 14:13; Num. 18:9). Therefore, in the administrative treatment of the sacrifices, the offering that was wholly consumed (and thus not eaten by priests) came first, followed by those allotted to the functionaries (Lev. 6:17, 25, 29 [Heb. MS vv. 10, 18, 22]; 7:1, 6) and concluded by the peace offerings, large parts of which were returned to the offerer.

The order also corresponds to their relative frequency in the rituals of the sacred calendar (Num. 28 – 29; 2 Chr. 31:3; Ezek. 45:17a): burnt offering (Lev. 6:9 – 13), grain offering (6:14 – 23), sin offering (6:24 – 30), and finally the guilt offering (7:1 – 6); the latter, though it was not prescribed for holy days, is included here because it had the same set of instructions as the sin offering (v. 7; the term used here and in the other paragraphs is *tôrâ* H9368, lit., "law"). Each paragraph concludes with a statement about the logistic or administrative detail peculiar to the offering discussed; next comes a brief summary of the items treated thus far (7:7 – 10), followed by an additional section giving the instructions of the peace offerings (7:11 – 36). These latter had no special function in the sacred calendar except at the Feast of Weeks (23:19 – 20); otherwise their offering was purely voluntary and therefore not subject to any fixed reckoning (other sacrifices could also be made by

individuals and groups as the occasion demanded). The difference between the fixed "income" from the calendrical offerings and the sporadic presentation of others is clearly reflected in the closing verse of the roster prescribing the daily and periodic sacrifices (Num. 29:39).

The same general order is followed, namely, burnt, cereal (and drink), sin (or guilt), and sometimes peace offerings in other "bookkeeping" contexts. The most illuminating study is that by Levine (in *JAOS* 85 [1965]: 309 – 18, esp. 314 – 18) on the list of donations made by the tribal leaders for the dedication of the altar (Num. 7). He has shown that this narrative is structured like an everyday ledger from a sanctuary; the summary lists the animals as burnt, grain, sin, and peace offerings (7:87 – 88), following the pattern of the respective entries for each donor (7:15 – 17). The "two-dimensional" nature of this record, as defined by Levine, is also quite understandable. The Levitical scribe had to use such a record for two purposes: (1) to credit the offerers and (2) to keep track of the treasures and food supplies coming in, the latter being especially important logistically, since they were the rations for the officiating priests and Levites (Num. 18:8 – 11; 2 Chr. 31:4 – 19).

The same administrative sequence is almost invariably used whenever prescriptions are made concerning the type and number of offerings *to be brought* (e.g., Num. 15:24). Such was the case with each of the festivals and holy days (the daily sacrifice was only a burnt offering of two lambs with their grain and drink offerings, one in the morning and the other in the evening 28:1 – 8); on the SABBATH, two additional male lambs with their grain and drink offerings were added (28:9 – 10). Burnt offerings with their associated grain offerings and libations were listed, followed by an additional notation prescribing a sin offering for each of the following: NEW MOON (28:11 – 15), each day of PASSOVER (28:19 – 22), Weeks (28:26 – 30; Lev. 23:15 – 19; see PENTECOST), Trumpets (Num. 29:1 – 5), Day of Atonement (29:8 – 11a; see ATONEMENT, DAY OF), and each day of the Feast of Booths (29:12 – 16 et passim; see FEASTS).

For specific acts of ritual sacrifice, such as the purification of a woman after giving birth (Lev. 12:6, 8), the same order appears in the instructions as to what offerings to bring. The best case in point is the list of required sacrifices for the successful termination of a NAZIRITE vow; the Nazirite was to furnish a burnt, sin, and peace offering (with some special grain offerings, Num. 6:14 – 15). However, a striking point emerges from the actual conduct of the ritual. The priest carried out the sacrifices in a different order, namely, the sin offering and then burnt offering followed by the peace offering (6:16 – 17). In the case of a broken VOW, the first step was also the sacrificing of a sin offering and then a burnt offering (6:11) to renew the vow; the reconsecration of the votary's head was accomplished by a separate guilt offering, which was already a second and distinct ritual act (6:12). The Nazirite passage thus points up the difference between (a) the "bookkeeping" order in which offerings were prescribed and later entered into the sanctuary records, and (b) the "procedural" order in which the rites were actually conducted.

The contrast between the two orders is most striking in the prophetic prescriptive text concerning the prince in the apocalyptic restoration. We first read that his duty involved "the burnt… grain…and drink offerings" at the calendrical holidays; but then the text states that he was to "provide" (lit., "he will make," *hûʾ–yͨăsͨeh*) "the sin…grain…burnt…and fellowship [peace] offerings" (Ezek. 45:17). That there was a fixed order for carrying out the sacrifices different from that in which they were furnished and audited is obvious.

A strikingly similar picture is reflected in another prescription, namely, Ezekiel's vision of the liturgy by which the altar was to be reinstituted (Ezek. 43:18 – 27). A sin offering was to be made on the first (vv. 18 – 21) and second days (v. 22) of the ceremony. The latter was immediately followed by a burnt offering (vv. 23 – 24); the sin and burnt offerings of the second day were repeated for

seven days (vv. 25 – 27). From the eighth day on, the way was clear for burnt and peace offerings (v. 27).

Further examples of the "procedural" sequence include the ritual purification of a leper (guilt and sin offering, which belong to the expiatory category, followed by the burnt offering [Lev. 14:12, 19 – 20]), of the man with a discharge (sin, burnt [15:15]), and of the woman with a hemorrhage (also sin, burnt; 15:30). The same order prevails in the various sacrifices for the Day of Atonement (16:3, 6, 11, 15, 24). Thus the prescriptive ritual texts cited above are seen to reflect three methods of recording the sacrifices: (1) didactically/conceptually, (2) administratively, and (3) procedurally.

The instructions for ordaining AARON and his sons preserve the procedural order of sacrifices in the prescriptive text (Exod. 29), and the same order is confirmed in the narrative descriptive text (Lev. 8). First, the sin offering was made (Exod. 29:10 – 14; Lev. 8:14 – 17) and then the burnt offering (Exod. 29:15 – 18; Lev. 8:18 – 21); the climax of the altar rites was the sacrifice of ordination (*millu,îm H4854*, lit., "setting in, installation," Exod. 29:19 – 34; Lev. 8:22 – 29), which was in fact a specialized form of communal or peace offering.

2. Descriptive. Numbers 7 (discussed below) shows that a descriptive text, that is, one that tells what was offered, need not always reflect the "procedural" order of the sacrifices. If the descriptive text is in the form of a temple ledger, as Levine has shown, then it is more likely to be composed according to the administrative order. Such is the case with this chapter.

On the other hand, the narrative descriptions normally follow the procedural sequence. Leviticus 8, which describes the installation ceremony for Aaron and his sons, has been discussed above. This was followed by the formal inauguration of the whole Israelite sacrificial system as portrayed in ch. 9. The initial offerings for Aaron followed the order: sin offering, burnt offering (9:7 – 14). The sequence of the people's offering that followed was: sin, burnt, grain, and peace offerings (9:15 – 22). Even the narrative prescription, the command from the Lord, is given in the same functional order (9:2 – 4).

The great cleansing and restoration of the temple and its ritual in Jerusalem was conducted in the reign of King HEZEKIAH according to the same pattern (2 Chr. 29:20 – 36). An extensive sin offering was made first (vv. 20 – 24); next followed the burnt offering, the ritual of which was accompanied by elaborate acts of worship in music and song (vv. 25 – 30). At this stage the king announced that the people had consecrated themselves "to [a state of holiness vis-à-vis] the LORD" (v. 31); they were therefore in a state of purity that qualified them to engage in further sacrifices (vv. 31 – 35) of devotion (burnt offerings) and thanksgiving (peace offerings).

In view of the preceding passages, it seems most likely that the same ritual sequence was followed at the dedication of Solomon's temple. Unfortunately, 1 Ki. 8:5 (cf. 2 Chr. 5:6) is ambiguous; it only states that the king and the people were "sacrificing." Later, the burnt, grain, and peace offering sequence is maintained (1 Ki. 8:64; 2 Chr. 7:7). These latter probably correspond to the voluntary sacrifices offered after the conclusion of the atonement ritual proper (cf. 2 Chr. 29:31 – 35; Ezek. 43:27). By analogy, one may assume that 1 Ki. 8:5 refers to the atonement ritual of sin, burnt, and grain offerings (cf. 2 Chr. 29:20, 31; Ezek. 43:18 – 27).

The "procedural" sequence of the offerings, that is, the actual order in which they were offered on any occasion that demanded more than one type, provides the key to understanding the religious (spiritual) significance of the sacrificial system. First of all, sin had to be dealt with; the appropriate offering (sin or guilt) had to be made. This was closely linked with a burnt offering that followed it immediately (with its accompanying grain offering in many cases) and thus completed the self-

committal (2 Chr. 29:31) that qualified the supplicant(s) for the last stage of the liturgy. The crowning phase was the presentation of burnt and peace offerings, the former including both the voluntary gifts of individuals and the calendrical offerings symbolizing the constant devotion of the people as a whole, the latter representing the communal experience in which the Lord, the priest, and the worshiper (along with his friends and the indigent in his community, Deut. 12:17 – 19) all had a share.

IV. Types of sacrifices. By describing the various types of offering in their "procedural" order, the significance of their respective ritual acts as expressions of OT ethical MONOTHEISM can be placed in its proper perspective.

A. Expiatory offerings. Two offerings fall in this category. The particular aspect of conduct for which they were required will be discussed after the liturgical details have been summarized for both of them.

1. Sin offering (ḥaṭṭāʾt H2633; LXX *hamartia G281*; Lev. 4:1 – 35; 6:24 – 30 [Heb. 16:17 – 23]). The type of animal required was suited to the rank of the offerer. The high priest brought a young bull (Lev. 4:3), as did the congregation (v. 14) except, apparently, when a ritual infraction was involved (Num. 15:24). A ruler brought a male goat (Lev. 4:25), but a commoner could furnish a female goat (v. 28; Num. 15:27) or a lamb (Lev. 4:32). A poor person could bring two doves or two young pigeons (one of the pair served as a burnt offering, Lev. 5:7), or in extreme cases he might even substitute a tenth of an ephah of fine flour (vv. 11 – 13; cf. Heb. 9:22).

This altar found in Miletus would have been used for various kinds of sacrifices.

The offerer brought the animal and executed the symbolic act of laying his hand on it (Lev. 4:4 et al.). In this way he identified the offering with himself. He did not confess his sin in this act because the animal was not being sent away (cf. the goat for AZAZEL, 16:21). It was also his duty to slay the animal (on the N side of the altar, 4:24, 29; cf. 1:11).

The priest collected the blood; when the sacrifice was a bull for himself or for the congregation, he took some of it into the shrine to sprinkle before the veil (Lev. 4:5 – 7) and put some on the horns

of the incense altar there (vv. 16 – 18). On the Day of Atonement, he took his and the people's sacrificial blood into the Holy of Holies (16:14 – 15). From all the other animals the blood was applied to the horns of the altar of burnt offering (4:7, 18); that of the birds was effused on the side of the altar (5:9). Finally, the remaining blood from every type of offering was poured or drained out at the base of the altar (4:7).

The choice parts of the viscera—the fatty tissue over and on the entrails, the two kidneys and their fat, and the appendage to the liver—were all consumed on the altar (Lev. 4:8 – 10). The carcass and the remaining entrails were disposed of as refuse by burning outside the camp in the case of a bull for the priest or the people (vv. 11 – 12, 21). This rule prevailed for the bull in the ordination rites of Aaron and his sons (Exod. 29:10 – 14; Lev. 8:14 – 17). Otherwise, the priest received the edible flesh for food; it was to be eaten within the sacred precincts and very strict rules of ritual purity governed its handling (6:25 – 30; cf. 10:16 – 20).

A sin offering of one male goat was required at each of the sacred festivals: the New Moon (Num. 28:15), each day of Passover (vv. 22 – 24), Weeks (v. 30), Trumpets (29:5), Day of Atonement (v. 11; besides the special sin offerings for that day), each day of Booths (v. 16, 19). The high priest brought a bull for himself and then offered one of the two goats on the Day of Atonement.

Rites of PURIFICATION called for lesser sin offerings, namely, lambs or birds after childbirth (Lev. 12:6 – 8), leprosy (14:12 – 14, 19, 22, 31), abscesses and hemorrhages (15:15, 30), or defilement during the period of a vow (Num. 6:10 – 11). (The strictly individual cases requiring sin offerings are discussed following the guilt offering below.)

2. Guilt offering (ʾāšām H871; LXX *plēemmeleia* ["fault, offense"]; Lev. 5:14—6:7 [Heb. 5:14 – 26]; 7:1 – 7). The guilt (KJV, "trespass") offering was a specialized kind of sin offering (cf. 5:7) required in cases when someone had been denied his rightful due; reparation of the valued amount defrauded was required plus a fine of 20 percent (Lev. 5:16; 6:5 [Heb. 5:24]). The animal prescribed was usually a ram (Lev. 5:15, 18; 6:6 [Heb. 5:25]; 19:20); the cleansed leper and the defiled Nazirite were to bring a male lamb (14:12, 21; Num. 6:12). The offerer's part in the ritual was probably identical to that of the sin offering; however, the priest was to sprinkle the blood around the altar (Lev. 7:2). The choice viscera were consumed on the altar as usual (7:3 – 5). In the case of the cleansed leper, some of the blood was then applied to the tip of his right ear and to his right thumb and his right big toe (14:14). As with the sin offering, the animal went to the priest as food (7:6 – 7; 14:13).

The guilt offering was commanded in instances when another party had suffered some deprivation. Ritual infractions, such as eating unlawfully of the "holy things" (Lev. 5:4 – 19; 22:14), required payment of the sum (or commodity) that had rightfully belonged to God plus another one fifth of the amount concerned; the fine was given to the priest (5:16; 2 Ki. 12:16). The case of the leper can be assigned to this category in that the Lord was deprived of the service due from the infected person so long as his disease kept him outside the pale of the ritually clean society (Lev. 14:12 – 18). Likewise, the Nazirite who became defiled during the course of his period of separation to God had to bring a guilt offering as reparation for what he had pledged and not fulfilled (Num. 6:12).

Altar dedicated to Zeus and used in sacrificial ritual; found in Hierapolis.

On the social plane, violation of property rights through defraudation could be atoned for only by the guilt offering and its 20 percent fine. Such acts included cheating in matters of deposit or security, robbery or oppression, failing to report the finding of lost property, or false swearing or failing to testify (Lev. 6:1 – 5 [Heb. 5:20 – 25]). Seduction of a betrothed slave girl (19:20 – 22) was also a violation of property rights.

In every case, the guilty party must confess his sin, make full restoration plus the fine of one fifth, and offer the guilt offering. If the offended party was no longer alive and there were no surviving relatives, the payment went to the priests (Num. 5:5 – 10).

3. Efficacy. The obligatory sin and guilt offerings for ritual infractions (Lev. 4:14; 5:2 – 3; 22:14; Num. 15:22 – 29) illustrate that in antiquity the morals and ethics of every society were closely integrated into a framework of ritual observance. The OT ideal saw the ritual acts as expressions of faith and devotion; the universal human inclination (not confined to Israel) is to substitute the outward act for the concomitant inward attitude (Hos. 6:6).

Both ritual and ethical sins committed inadvertently (*bišgāgâ*) could be atoned for by sacrifice (Lev. 4:2, 13, 22, 27; 5:14), but only after the offender had come to the realization of his fault (4:13 – 14; cf. 5:17; 14:23, 28; Num. 15:24). Other offenses that were committed consciously and with real intent included acts of dishonest dealing (Lev. 6:1 – 5; cf. Exod. 22:7 – 15 [Heb. 22:6 – 14]) and failure to comply with rules of testimony, etc. (Lev. 5:1, 4).

However, sins committed "with an upraised hand" (*bĕyād rāmâ*; NIV, "defiantly") could not be atoned for by sacrificial ritual (Num. 15:30 – 31). To this latter category belong all offenses requiring

the death penalty. In general, these can be classified as violations of the TEN COMMANDMENTS: the second commandment forbids IDOLATRY (Lev. 20:2; Deut. 13:6; 17:2 – 7), offering children to MOLECH (Lev. 20:3), witchcraft, and false prophesying (Exod. 22:18; Lev. 20:6, 27; Deut. 13:5; 18:20; 1 Sam. 28:9); the third consists of BLASPHEMY (Lev. 24:14, 16, 23; 1 Ki. 21:10); the fourth involves violation of the Sabbath (Exod. 31:14; 35:2; Num. 15:32 – 36) and probably also the ritual infractions discussed below; the fifth, striking or reviling a parent (Exod. 21:15, 17); the sixth, murder (Lev. 24:17, 21) and kidnapping (Exod. 21:16); the seventh, adultery (Lev. 20:10; Deut. 22:22), incestuous and unnatural sexual relations (Exod. 22:19; Lev. 18:29; 20:11, 14), unchastity (Lev. 21:9; Deut. 22:21, 23), and rape (22:25); and the ninth, false witness in capital cases (19:16, 19).

The precedent case concerning violation of the Sabbath (Num. 15:32 – 36) required an explicit oracle before the penalty could be imposed. The offense incurred the supreme penalty whenever it constituted rejection of the COVENANT as embodied in its principal sign (Exod. 20:8 – 11; Deut. 5:12 – 15; and esp. Exod. 31:12 – 17). The various laws against violation of the ritual calendar and related statues can probably be seen as extensions of this concept—disregard for the sacrificial system could be tantamount to rejection of the covenant, which was itself instituted by a sacrifice (24:3 – 8). Such infractions included the following: nonobservance of the Passover or eating leavened bread during this feast (Exod. 12:15, 19; Num. 9:13); nonobservance of the Day of Atonement (Lev. 23:29 – 30); eating blood or the choice viscera of the sacrifices (7:25 – 27; 17:14); failure to slaughter burnt or peace offerings at the proper sanctuary (17:4, 9); eating sacrifices while in an unclean state (7:20 – 21; 22:3 – 4); eating the remainder of a peace offering too late (19:8); touching holy things illegally (Num. 4:15, 18, 20); defiling the sanctuary by personal uncleanness (19:13, 20); misuse of the holy ointment (Exod. 30:32 – 33) or perfume (30:38).

The second illustration of "high-handed sin" was KORAH'S rebellion and the subsequent bitterness on the part of the people (Num. 16). In this case, the offense was so great that atonement could not be obtained by a sin offering; nevertheless, by intercession and the symbolic burning of incense, atonement for the people was achieved (16:46 – 47). Likewise, Moses had interceded for them and gained at least partial atonement in the incident of the golden calf (Exod. 32:11 – 13, 30 – 35). Forgiveness could be granted to one of "a broken and contrite heart" even when the offenses (adultery and murder) were too great for atonement by sacrifice (Ps. 51:16 – 17 [cf. the superscription to this psalm and 2 Sam. 12:13]). When the prophet ISAIAH and his people were defiled by moral uncleanness beyond the limits of restoration by ritual (Isa. 6:5; cf. 1:10 – 17), guilt could still be taken away and sin forgiven by application of a coal from the incense altar, symbol of prayer and intercession (6:6 – 7).

In short, the sin and guilt offerings were efficacious for less serious violations against the eighth and ninth commandments and for certain ritual infractions, but in every case the offender had to be fully aware of his responsibility and to make reparation when necessary. For greater sins, ritual was to no avail, but the forgiveness and atonement could be granted on condition of true REPENTANCE.

B. Consecratory offerings. The sacrifices in this category reflect the more universal idea of *offering*. The emphasis is on surrender of the gift to God (though only a handful of the grain offering was consumed on the altar). They represented the act of committal that should accompany the repentance expressed by the sin and guilt offerings. They also opened the way to the fellowship of communal sacrifices that could follow.

1. Burnt offering (ʿōlâ *H6592* [lit., "that which goes up"]; LXX *holokautōma G3906* and other terms; Lev. 1:3 – 17; 6:8 – 13 [Heb. 6:1 – 6]; note also the apparent synonym *kalîl H4003*, Ps. 51:19 [Heb. 51:21], and Phoen. *kll*, mentioned above). The ritual of the burnt offering called for a bull (Lev. 1:3 – 5), a sheep or a goat (v. 10), or a bird (v. 14). The offerer brought the animal, laid his hand on it and slew it on the N side of the altar (vv. 3 – 5, 11); the bird was simply handed over to the priest (v. 15). The priest collected the blood, presented it before the Lord, and sprinkled it around the altar (vv. 5, 11); in the case of a bird, he wrung off its head and drained the blood out on the side of the altar (v. 15). Thus, the burnt offering was linked to the blood atonement concept by the attention paid to the blood, but that was not the central feature of the rite. The stress was placed instead on the flaying and dissection of the animal, the washing of its unclean parts, and the careful arrangement of all the pieces (except the crop and feathers of the bird) on the altar (vv. 6 – 9, 12 – 13). The consumption of the whole was meant to be "a pleasing aroma" to the Lord. Only the animal skin was left for the priest (7:8); the main administrative concern was for constant maintenance of the fire (thus the need for an uninterrupted supply of fuel) and the proper attire of the officiating priest during the ritual of renewing the fire each morning (6:8 – 13 [Heb. 6:1 – 6]).

As mentioned above, the burnt offerings were by far the most frequent sacrifices at the Israelite sanctuary and were therefore listed first in administrative prescriptions and descriptions. This is due to their central role in the rites for holy days. The "continual" or "regular" (*tāmîd H9458*) burnt offering was made twice daily, a male lamb morning and evening (Exod. 29:38 – 42; Num. 28:1 – 8). The entire procedure for the morning sacrifice is vividly described in the MISHNAH (tractate *Tamid*). Two additional lambs were offered each Sabbath (28:9 – 10). No sin offerings accompanied these sacrifices.

On the other hand, a sin offering of one goat was required along with the burnt offerings on the other holy days. At the beginning of each month (the New Moon), a set of two young bulls, one ram, and seven male lambs were sacrificed (Num. 28:11 – 14). The same number of animals was required for each day of the Passover and Unleavened Bread Festival (vv. 19 – 24) and again on the Feast of Weeks (vv. 26 – 29). For the Festival of Trumpets and the Day of Atonement the standard was one bull, one ram, and seven lambs (29:2 – 4, 8), besides the special burnt offerings for the atonement ritual itself, which consisted of one ram for the high priest and one for the people (Lev. 16:3, 5, 24).

The climax of the annual festivals, the Feast of Booths, was marked by a series of elaborate burnt offerings (plus one goat per day as a sin offering). On the first day, the regulations called for thirteen young bulls, two rams, and fourteen male lambs (Num. 29:12 – 16). Each day thereafter, the increment of bulls was decreased by one until on the seventh day there were only seven (the number of rams and lambs remained the same, vv. 17 – 35). The eighth day saw a return to the amounts designated for Trumpets and the Day of Atonement, namely, one bull, one ram, and seven lambs (vv. 35 – 38; for the associated grain and drink offerings, see below).

Various purification rituals also called for burnt offerings as well as sin offerings: after childbirth (Lev. 12:6 – 8), abscesses (15:14 – 15), and hemorrhages (15:29 – 30), or after defilement during a Nazirite vow (Num. 6:10 – 11). Though not specified in these cases, there were grain offerings for the cleansing from leprosy (Lev. 14:10, 19 – 20, 22, 31) and the completion of a Nazirite vow (Num. 6:14, 16).

The burnt offering, signifying complete surrender to God, was therefore associated with the sin offering in the process of atonement (as in the purification rites above; cf. also 2 Chr. 29:27). They were also coupled with the peace offerings as an expression of devotion and committal (29:31 – 35; 1 Ki. 8:64; 2 Chr. 7:7). This latter aspect typifies the function of the burnt offerings in Genesis (e.g.,

Gen. 8:20); it is also the key to its requirement as a continual, daily sacrifice.

2. Grain offering (*minḥâ H4966* ["gift, offering"]; LXX *thysia G2602* ["sacrifice"]; Lev. 2:1 – 14; 6:14 – 23 [Heb. 6:7 – 11]). A regular concomitant to the animal sacrifices was an offering of food (KJV, "meat"; RSV, "cereal"; NJPS, "meal"; NIV and NRSV, "grain"). Outside the ritual codes, the term *minḥâ* could refer to any kind of gift, including animals (Gen. 4:3 – 5; Jdg. 6:18; 1 Sam. 2:17); but in prescriptive texts it signifies a concoction of fine flour (see BREAD II), olive OIL, and FRANKINCENSE. Its form could be baked cakes, wafers, or morsels (Lev. 2:4 – 6). The offering of FIRSTFRUITS was to be "heads of new grain roasted in the fire" (v. 14). No leaven or honey was permitted on the cakes being offered (v. 11), though these commodities were acceptable as a firstfruits offering (v. 12), in which case they went to the clergy but not on the altar.

The offerer was responsible for bringing the prepared loaves or wafers to the sanctuary. The priest burned one handful on the altar as its "memorial portion" (Lev. 2:2), and the rest was his to eat (6:16 [Heb. 6:9]; 7:9). When the priest made a grain offering for himself, the whole was burnt on the altar (6:22 – 23 [Heb. 6:15 – 16]).

The grain offering normally accompanied every burnt offering, especially those in the sacred calendar (Num. 28 – 29). The quantities of fine flour and oil were fixed according to the animal being sacrificed; for example, a ram offering required twice as much flour as a lamb, and a bull required three times as much (15:2 – 10). Other joyous occasions included the cleansing of a leper (Lev. 14:10, 20 – 21, 31; unspecified quality for a bird) and the successful consummation of a Nazirite vow (Num. 6:15, 19). Perhaps a grain offering was understood, though not mentioned, in the rites for cleansing after childbirth (Lev. 12:6 – 8), abscesses (15:14 – 15) or hemorrhages (15:29 – 30). One has the impression, however, that the omission was intentional; note that no grain offering went with the burnt offerings for the high priest and the people in the special ritual for the Day of Atonement (16:3, 5, 24). Perhaps sacrifices of a more somber nature were intentionally made without a grain offering.

Conversely, peace offerings were always accompanied by grain offerings (Lev. 7:12 – 14; Num. 15:4): one of each from the cakes and wafers went to the priest, while the rest was to be eaten with the flesh of the sacrificial animal. A special use of the grain offering was the one-tenth of an ephah of barley meal required in the jealousy ritual; it was to have no oil or frankincense (5:15, 18, 25, 26). A very poor person could bring one-tenth of an ephah of fine flour, also without oil or frankincense, as a sin offering (Lev. 5:11 – 13).

3. Drink offering (*nesek H5821*; LXX *spondē*). A libation normally accompanied burnt and peace offerings (Num. 15:5, 7, 10); the standard was one-fourth of a hin of wine for lamb, one-third for a ram, and one-half for a bull. The expression "fermented drink," used with reference to the drink offering (28:7; Heb. *šēkār H8911* [NRSV, "strong drink"]), is apparently only a synonym for WINE (*yayin H3516*, Exod. 29:40). The use of wine was probably a conscious substitute for the blood used by the heathen (Ps. 16:4). The libation was considered as an additional "pleasing aroma" offering (Num. 15:7). Like the burnt offering, all was expended, nothing was given to the priest; the entire libation was poured out in the sanctuary (28:7).

Drink offerings are specifically mentioned with the daily offering (Exod. 29:40 – 41; Num. 28:7), and with that for the Sabbath (28:9) and for the New Moon (28:14). Likewise, reference is made to them in connection with the second and following days of the Feast of Booths (29:18, 21 et al.); for the first day (vv. 12 – 16) their absence is probably unintentional. The same may hold true for

the Passover, First Fruits, and Feast of Trumpets rituals (28:16—29:11; cf. Ezek. 45:17). A libation was specified for the Nazirite's concluding rites (Num. 6:17), but not for the cleansing of the leper (Lev. 14:10 – 20). Perhaps the drink offering was such an integral part of the burnt offering ceremony that it could be taken for granted; still, it is not impossible that it was purposely excluded from certain rites. It never accompanied a sin or guilt offering alone.

C. Communal offerings. This latter category consists of those offerings that expressed a voluntary desire on the part of the offerers. They were not required (except in the case of the Nazirite and the Feast of Booths [Num. 6:17; Lev. 23:19 – 20]) by explicit regulations, but were permitted on condition that the offerer had met the requirements of expiation and consecration. Burnt offerings could accompany these sacrifices as an additional expression of devotion (see above).

1. Peace offering (*šelem H8968*, usually in the phrase *zebaḥ šelāmîm* [NIV, "fellowship offering"; NRSV and NJPS, "sacrifice of well-being"]; LXX *thysia sōtēriou* ["sacrifice of salvation," but in 1 Sam. 10:8 et al. the term *eirēnikos*, "peaceful," is used]; Lev. 3:1 – 16; 7:11 – 36). This is the basic sacrifice of all communal offerings; the others are simply different types of the peace offering. In terms of "holiness" (i.e., restrictedness), they were not so strictly defined as those discussed above. Animals from the herd or flock, male or female (3:1, 6, 12), were permissible. The usual rules of physical perfection were in force except for one relaxation in the case of the *freewill* offering, which could have one member longer than the other (22:23). Unleavened cakes were also stipulated, at least for the *thank* (7:12 – 13) and *votive* (Num. 6:15, 17, 19) offerings. These three types are discussed below with regard to their special features.

The presentation and laying on of the hand were the same as for other offerings; but instead of slaughtering the animal on the N side of the altar, it was done at the door of the sanctuary, that is, at the entrance to the outer court (Lev. 3:1 – 2, 7 – 8, 12 – 13; 7:29 – 30). The priest collected the blood and threw it against the altar as with the burnt offering (3:2, 8, 13). The choice viscera were burnt for a "pleasing aroma" (3:3 – 5, 6 – 11 [including the fat tail of the sheep], 14 – 16 [cf. 7:22 – 25]; 7:30 – 31).

Certain portions of the offering were also allotted to the priest; he was permitted to eat it in any ritually clean place and to share it with his family (Lev. 7:14, 30 – 36; Num. 6:20). He received one of the cakes and the breast as a *wave offering* (see below), and the right thigh as the offerer's "contribution" (*tĕrûmâ H9556*, Exod. 28:27 – 28; Lev. 7:32 [KJV, "heave offering"]; the term literally means "a lifting," but it did not refer to a special type of presentation ceremony).

The culmination of every peace offering was the communal meal. Except for the portions burned on the altar or assigned to the priest, the body of the sacrificial animal was given to the offerer. He used it as food for a communal meal that would include himself, his family, and also the Levite in his community (Deut. 12:12, 18 – 19). This had to be at the divinely appointed sanctuary (12:6 – 7, 11, 12, 15 – 19, 26; cf. 1 Sam. 1:3 – 4), and very strict rules of purity were observed by the participants (Lev. 7:19 – 21; 19:5 – 8). One may contrast the ritual slaughtering of animals for a banquet, which was permitted at any local altar (Deut. 12:16, 20 – 22).

The meat of a *thank offering* had to be eaten on the same day as the sacrifice (Lev. 7:15), whereas that of the *votive* or *freewill offering* could be finished on the next day (7:16 – 18). Whatever was left over from either kind had to be burned before the time limit on its consumption had expired.

The peace offering was only specified in three instances, namely, in the celebration of the Feast

of Weeks (Lev. 23:19 – 20), in the ritual for completion of a Nazirite vow (Num. 6:17 – 20), and at the installation of the priesthood (cf. the *ordination offering*, below). Other public ritual occasions included the inauguration of the Tent of Meeting (Lev. 9:1 – 21) and of the temple (1 Ki. 8:63; 2 Chr. 7:5). National events that called forth the peace offering included the following: successful conclusion of a military campaign (1 Sam. 11:15), cessation of famine or pestilence (2 Sam. 24:25), acclamation of a candidate for kingship (1 Ki. 1:9, 19), and a time of national spiritual renewal (2 Chr. 29:31 – 36). At the local level they were sacrificed for the annual family reunion (1 Sam. 20:6) or other festive events, such as the harvesting of the firstfruits (Exod. 22:29 – 31; 1 Sam. 9:11 – 13, 22 – 24; 16:4 – 5).

2. Wave offering (*těnûpâ H9485* [NRSV and NJPS, "elevation offering"]; the LXX translates with a variety of terms; Lev. 7:30 et al.). The priest's portion of the peace offering was "waved" before the Lord as a special act signifying that it was his (the motion may have resembled the wielding of a saw or a staff, Isa. 10:15; according to a different understanding, the motion was simply one of "raising" the item, thus the rendering "elevation offering" [see discussion in *HALOT*, 4:1762 – 63]). Then it went to the officiant as his personal share. The presentation of the ceremonial food to the Mesopotamian deity, after which it was given to the king, immediately comes to mind. The basic difference seems to be that the deity there was considered to have partaken of the food and to have added his "radiance" to it, whereas in Israel the priest ate the divine portion as God's representative, thus showing that the food was being shared by him.

The same technical term was applied to offerings other than the communal sacrifices: the precious metals given for the construction of the sacred artifacts (Exod. 35:22; 38:29), the guilt offering of the cleansed leper (Lev. 14:12, 21, 24), the sheaf of firstfruits (23:15), the two loaves at the Feast of Weeks (vv. 17, 20), and the Levites themselves (Num. 8:11, 13, 15, 21). In the latter case, it is evident that no physical waving or lifting was involved, so the term probably could refer to a particular type of offering even if the original gesture was not used. (See further J. Milgrom, "The Alleged Wave-Offering in Israel and in the Ancient Near East," *IEJ* 22 [1972]: 33 – 38.)

3. Thank offering (*zebaḥ hattôdâ H2285 + H9343*; LXX *thysia tēs aineseōs* ["sacrifice of praise"]; Lev. 7:12 – 15; 22:29). This is the most frequently mentioned type of peace offering. It represented an act of thanksgiving for blessings already bestowed (Pss. 56:12 – 13; 107:22; 116:17; Jer. 33:11). In many contexts, the term *thank offering* is the virtual synonym of *peace offering* (e.g., 2 Chr. 29:31; Jer. 17:26; cf. 2 Chr. 33:16).

4. Votive offering (*nēder H5624*; LXX *euchē G2376*; Lev. 7:16 – 17 et al.). This kind of sacrifice was a ritual expression of the VOW, which covered a wider range of practices. It was usually a peace offering, and the flesh could be eaten on the second day but not on the third (Lev. 7:16 – 17). However, it could also be a burnt offering (22:17 – 20). A specific example was the vow of a Nazirite that was consummated by a peace offering (Num. 6:17 – 20). In the broadest sense, the vow included any kind of offering or gift promised to the Lord (e.g., Num. 30).

5. Freewill offering (*nedābâ H5607*; LXX *hekousios G1730*; Lev. 7:16; 22:18, 21, 23; 23:28; Num. 15:3; 29:39; Deut. 12:6, 17). This was the minimum offering that one could bring to the holy convocations, which took place thrice a year (Exod. 23:16; 34:20; Deut. 16:10, 16 – 17; 2 Chr. 35:8; Ezra 3:5). Like the votive offering, it could consist of burnt as well as peace offerings (Lev. 22:17 –

24; Ezek. 46:12); and if it were the latter, the flesh could be consumed on the second day but had to be burned before the third (Lev. 7:16 – 17). Unlike the other peace offerings, the animal for a freewill sacrifice could have one limb longer than the other (22:23).

6. Ordination offering (*millu'îm H4854* [lit., "setting in, installation"; KJV, "consecration"]; LXX *teleiōsis G5459* ["perfection"]; Exod. 29:19 – 34; Lev. 8:22 – 29). This offering was intimately related to the concept of "filling the hand" (*millē'yad*, Exod. 29:9 et al.), which meant consecrating someone to divine service (cf. 32:29 et al.) and required a state of ritual purity and spiritual devotion (2 Chr. 29:31).

The details of the ritual are in a prescriptive text (Exod. 29:19 – 34) and in a narrative descriptive passage (Lev. 8:22 – 32). Moses appears in the role of the officiant, since Aaron and his sons were obviously not qualified to serve in their own ordination. He brought the ram of consecration and the priests laid their hands on it. Then Moses slew it and handled the blood in a special manner. It was applied by him to the tip of the right ear, thumb, and big toe of Aaron and of each of his sons; then the rest was thrown about the altar. The wave offering was also unique in its execution; the choice viscera, three of the accompanying cakes, and the right thigh were all placed in the hands of the candidates for priesthood and waved before the Lord; then they were all consumed together on the altar as a "pleasing aroma." Though Moses did not receive the thigh, he was granted the breast, which he waved himself and took as his portion. Finally, the anointing oil, mixed with blood from the altar, was sprinkled upon the candidates and their garments. They were thus prepared to eat the remaining flesh of the ordination offering, which they had to boil at the entrance to the court of the sanctuary. Like the votive offering, none was allowed to remain until the following day.

V. Redemptive history

A. Pre-Mosaic. The terminology used with regard to the patriarchal age is that of the Torah as a whole; it is unlikely that the same words in Genesis mean something different from the other books of Moses. Thus, CAIN and ABEL each brought a "gift" (Gen. 4:4 – 5), which was usually of a grain nature as brought by Cain (Lev. 2 et al.) but could also refer to an animal offering (1 Sam. 2:17; 26:19). NOAH offered up "burnt offerings," and the pleasing odor of the sacrifice is stressed (Gen. 8:20 – 21). JOB is also depicted as making "burnt offerings" periodically (Job 1:5) and for specific purposes (42:7 – 9).

The PATRIARCHS normally are said to have "called on the name of the LORD" (e.g., Gen. 12:8; 13:4; 21:33; 26:25). The association of this phrase with the building of an altar shows that it refers to the approach to God through sacrifice. With JACOB, the naming of the specific altar is also stressed (33:20; 35:7). ABRAHAM is said to have offered a "burnt offering" (ch. 22) but Jacob offered "sacrifices" (31:54; 46:1). The most unusual sacrifices in Genesis are the covenant ritual with the divided carcasses (15:9 – 11; cf. Jer. 34:18 – 20), and the almost consummated sacrifice of ISAAC (Gen. 22).

B. From Moses to Samuel. The covenant sacrifice inaugurating the relationship between the Lord and his people (Exod. 24:3 – 8) is not paralleled by specific rituals in the Mosaic liturgy. Burnt and peace offerings were first offered and then the blood from them (not from a sin offering) was thrown, half against the altar and half upon the people.

In the land of Canaan, the Israelites made sacrifices at various places, such as BOKIM (Jdg. 2:1 –

5) and OPHRAH (6:24 – 26). The human sacrifice of JEPHTHAH'S daughter (11:30 – 40) was hardly normative; instead it is pointed out as evidence of Israel's low spiritual state at that time.

The main center for sacrificial ritual was at SHILOH (1 Sam. 1:3), where faithful Israelites came for an annual festive offering. That the ritual there was highly developed and complex in detail is proven by the explicit description of malpractice on the part of ELI'S sons (2:13 – 17) in taking their portion of the meat before the viscera were burned. Shiloh was not, however, the only legitimate place of sacrifice; others included BETH SHEMESH (6:14 – 15), MIZPAH (7:9), RAMAH (7:17; 9:11 – 24), GIBEAH (10:5), and GILGAL (10:8; 11:15; 13:9). Family and clan sacrifices were commonplace (16:2 – 5).

C. During the monarchy. Under SAUL, the main center of worship was evidently NOB (1 Sam. 21:1), though private offerings were made at Shiloh (2 Sam. 15:12). Saul's and DAVID'S families made peace offerings and held family feasts at the time of the New Moon (1 Sam. 20:5, 24 – 25).

David inaugurated a new cult center in Jerusalem at the threshing floor at Ornan (ARAUNAH, 1 Chr. 21:23 – 26), to which he moved the ARK OF THE COVENANT (2 Sam. 6:17 – 18; 1 Chr. 16:2, 40). The horned altar had been located at GIBEON (1 Chr. 21:29; 2 Chr. 1:6) but was soon moved to JERUSALEM (1 Chr. 22:1). David is credited with a complete reorganization of the ritual and the attendant personnel (23:28 – 31).

With the construction and dedication of the TEMPLE under SOLOMON, Jerusalem became the main focus of sacrificial ritual (1 Ki. 8:5, 62 – 65; 2 Chr. 5:6; 7:4 – 8; cf. discussion above). Nevertheless, HIGH PLACES continued in use locally (1 Ki. 3:2; 13:1 – 5; 18:30 – 32; 19:10; 2 Ki. 14:4; 15:4, 35 et al.). JEROBOAM I of the northern kingdom established shrines at DAN (PLACE) and BETHEL (1 Ki. 12:27, 28); besides these famous sites in Israel, BEERSHEBA may have enjoyed a similar status in Judah (Amos 5:5). Various references show that sacrifices were offered regularly at Jerusalem (2 Chr. 13:10 – 11; 23:18; 24:14; 2 Ki. 12:4 – 16; 16:13 – 15). Sacrificing on the high places was also tolerated in Judah (2 Chr. 15:17; 20:33); HEZEKIAH abolished many of them (2 Ki. 18:4) and seems to have reconstituted the temple as the sacrificial center (2 Chr. 29:21 – 35; 32:12). The high places returned under MANASSEH (33:3 – 4) and were again removed by JOSIAH (35:6 – 14).

D. Postexilic period. Offerings were reconstituted soon after the return (Ezra 3:2 – 7), and when DARIUS authorized building the temple he ordered that provisions be furnished for the cultus (6:9 – 10). Henceforth, the second temple remained the center for Judean sacrificial ritual (6:17; 7:17; 8:35; 10:19; Neh. 10:33 – 37; 13:5, 9).

At ELEPHANTINE in Egypt, a colony of Jewish mercenaries had maintained their own temple, replete with meal offering, incense, and burnt offering. It had been standing since before 525 B.C. when CAMBYSES invaded Egypt and was destroyed by jealous opponents in 410. In 407, the priest of this temple and his colleagues wrote to Bigvai/ Bagohi (see BAGOAS), governor of Judah, as well as to Delaiah and Shelemiah, sons of SANBALLAT, asking them to exert their influence toward having the ruined temple rebuilt. Though they pointedly yearned for restoration of the entire sacrificial cultus, the reply suggests that they apply to Arsames, their governor, for resumption of the meal offering and the incense—which they did (*ANET*, 492). This tendency to permit worship at local shrines but without animal sacrifice may be reflected in the fact that the Jewish temple at LACHISH (so-called Solar Shrine) had no altar for burnt offering whereas its preexilic counterpart at Arad did. The Lachish temple was evidently built in the Hellenistic period (prob. under John Hyrcanus, late 2nd cent. B.C.; see Y. Aharoni in *IEJ* 18 [1968]: 157 – 69).

E. Prophets, sages, and poets. The prophets of the first temple period often spoke out against sacrificial ritual (Amos 5:21 – 27; Hos. 6:6; Mic. 6:6 – 8; Isa. 1:11 – 31; Jer. 6:20; 7:21 – 22). Righteous and just behavior, along with obedience to the Lord, are contrasted with the conduct of rituals unaccompanied by proper ethical and moral attitudes (Amos 5:24; Mic. 6:8; Isa. 1:16 – 17; Jer. 7:23). It has thus been assumed by many scholars that the prophets condemned all sacrificial rituals. Roland de Vaux (*Ancient Israel* [1961], 454) has shown the absurdity of such a conclusion, for Isa. 1:15 also condemns prayer. No one holds that the prophets rejected prayer as such; it was prayer offered without the proper moral commitment that was being denounced, and the same holds true for the oracles against formal rituals.

Sacrifices are still preformed today by the Samaritans here on Mount Gerizim.

Certain other statements (e.g., Amos 5:25; Jer. 7:22) have been taken to mean that the prophets knew nothing of a ritual practice followed in the wilderness experience of Israel. De Vaux (*Ancient Israel*, 428) has noted that Jeremiah clearly knew Deut. 12:6 – 14 and regarded it as the law of Moses. The prophetic oracles against sacrifice in the desert are really saying that the original Israelite sacrificial system was not meant to be the empty, hypocritical formalism practiced by their contemporaries. The demand by Hosea for "mercy, not sacrifice, and acknowledgment of God rather than burnt offerings" (Hos. 6:6; cf. Matt. 9:13; 12:7) is surely to be taken as a relative statement of priorities (cf. also 1 Sam. 15:22). The inner attitude was prerequisite to any valid ritual expression (Isa. 29:13).

Foreign elements that had penetrated the Israelite sacrificial system were, of course, roundly condemned by the prophets. Such was especially the case in Israel (Amos 4:4 – 5; Hos. 2:13 – 15; 4:11 – 13; 13:2) but also in Judah (Jer. 7:17 – 18; Ezek. 8 et al.).

The wisdom literature sometimes reflects the same concern for moral and ethical values over empty sacerdotal acts (Prov. 15:8; 21:3, 27). A similar attitude is expressed in the Psalms; some passages might be taken as a complete rejection of sacrifice (e.g., Pss. 40:7 – 8; 50:8 – 15), but they actually express the same demand for a correct inner attitude as the prophets do (for the special significance of 51:18 – 19, see above).

F. The NT. Jesus took for granted the sacrificial system in effect in his own time and did not call for its abolition (Matt. 5:24). He even enjoined cleansed lepers to fulfill their ritual obligations (8:4; Lk. 17:14). He also spoke at least twice of his own impending death as a sacrifice (Mk. 10:45 and Matt. 20:28; Lk. 22:20 and Mk. 14:24; Matt. 26:28). In the fourth gospel, JOHN THE BAPTIST refers to him as the "Lamb of God" (Jn. 1:29, 36; cf. Rev. 13:8).

Even PAUL, the apostle to the Gentiles, took part in the sacrificial ritual pertaining to some Jewish Christians who had taken a vow (Acts 21:26). He thus acted in harmony with accepted Christian practice of that day. In his epistles he expressed a highly developed and sophisticated interpretation of Christ's crucifixion as an expiatory sacrifice (Rom. 3:25; 5:9; also 1 Cor. 10:16; Eph. 1:7; 2:13; Col. 1:20). He identified the Messiah with the sin offering (Rom. 8:3; 2 Cor. 5:21) and the Passover Lamb (1 Cor. 5:7). He obviously expected his readers to be knowledgeable with regard to the OT ritual system. The "pleasing aroma" sacrifices, especially the whole burnt offering, provided the basis for his plea "to offer your bodies as living sacrifices, holy and pleasing to God" (Rom. 12:1).

PETER states that the believers are redeemed by the blood of Christ (1 Pet. 1:18 – 19; cf. 1:2; 3:18). First John also ascribes to it propitiation for and cleansing from sin (1 Jn. 1:7; 2:2; 5:6, 8; cf. also Rev. 1:5). The epistle to the Hebrews deals in great detail with various aspects of sacrificial ritual, especially that for the Day of Atonement. All are viewed as earthly "shadows" of spiritual realities (Heb. 8:5; 10:1). The Messiah's sacrifice of himself is efficacious because it was made in the "eternal Spirit" (9:14) and thus he has entered eternally into the presence of the Father.

sacrilege. The KJV uses the expression "commit sacrilege" once to render the Greek verb *hierosyleō G2644*, which more probably means "to rob temples" (Rom. 2:22; cf. the noun *hierosylos G2645* in Acts 19:37, and cognate terms in 2 Macc. 4:39; 13:6). In Roman law the term *sacrilegium* was applied to the removal of a sacred object from a sacred place, and carried severe penalties. Cicero

wrote: "Let him be treated as a parricide who steals or carries off ought sacred or what is entrusted to a sacred person" (*Leg.* 2.9). The NRSV uses "sacrilege" to render *bdel-ygma G1007* ("detestable thing"), but only in the expression "desolating sacrilege" (Matt. 24:15; Mk. 13:14); see ABOMINATION OF DESOLATION.

Saddeus sad'ee-uhs. KJV Apoc. variant of IDDO (1 Esd. 8:45).

saddle. A seat for riding an animal. Perhaps an early invention of the Persians, the saddle served both as a carriage for riders and as a covering to prevent the animal's back from chafing. The Hebrew noun *merkāb H5323* is used in the former sense in Lev. 15:9, where the rule on uncleanness extends also to the "saddle" (KJV, NRSV), though the precise meaning of this term is uncertain. Ordinarily, as is indicated in the record of ABRAHAM's going up to Mount Moriah with ISAAC (Gen. 22:3) and of BALAAM's setting out to curse Israel (Num. 22:21), it was the donkey that was saddled (in both of these passages the verb *hābaš H2502* is used). In one instance (Gen. 31:34), reference is made to the saddle (*kar H4121*) of a camel, probably a basketlike seat.

Sadducee sad'joo-see (Σαδδουκαῖος *G4881*, derivation uncertain). A member of an important Jewish sect, more political than religious, which arose among the priestly aristocracy of the HASMONEAN period, but which ceased to exist with the demise of the aristocracy after the destruction of Jerusalem (A.D. 70). The Sadducees are perhaps today best known for their opposition to the popular party of the PHARISEES, with whom they differed on various doctrinal and political questions.

I. Name. The derivation of the name *Sadducee* has been the subject of considerable discussion but has not been established with any certainty. If one may bypass some of the more ingenious guesses (e.g., that it derives from the STOICS, or from the Persian word for "infidel," or from the hypothetical name of a now unknown person), there are left three significant possibilities.

(1) Since in Hebrew the name consists of the same three radicals (ṣdq) as the word for "righteousness," it has been argued that *Sadducees* means "righteous ones." This account, however, leaves unexplained the necessary vowel shift from the *i* of ṣaddîq *H7404* ("righteous") to the *u* of ṣĕdûqî ("Sadducee"). Moreover, although this explanation of the name was accepted by certain of the early fathers of the church (cf. Epiphanius, *Panarion* 14.2.1), it is not at all clear in what sense "righteousness" could be attributed to, or even claimed by, the Sadducees as their distinguishing characteristic.

(2) An explanation that has gained popularity in modern times and is held by the majority of contemporary scholars, traces the word back to the proper noun ṣādôq *H7401* (Gk. *Sadōk G4882,* sometimes spelled *Saddouk* in the LXX) . *Sadducee* thereby becomes the equivalent of *Zadokite* ("descendant of Zadok"), the ZADOK in question being the descendant of AARON who became a leading priest under DAVID (2 Sam. 8:17; 15:24 – 29), and chief priest under SOLOMON (1 Ki. 1:32; 2:35). The priestly line begun by Zadok continued to the Babylonian EXILE and was reinstituted after

the exile in the person of Joshua ben-Jehozadak (Hag. 1:1; see JESHUA), coming to an end only when the unscrupulous ANTIOCHUS IV installed MENELAUS as high priest in 171 B.C. The line of authentic Zadokite priests nevertheless continued until around A.D. 70 at the rival sanctuary at Leontopolis in Egypt (cf. Jos. *Ant*. 13.3.1 §§65 – 73). The Zadok priesthood itself remained highly honored in Israel (cf. Ezek. 40:45 – 46; 44:15 – 16), as is evident from ECCLESIASTICUS (Sir. 51:12, Heb. [missing in the LXX]), and the writings of the QUMRAN Community (e.g., IQS V).

Since in JOSEPHUS and the NT the Sadducees are closely associated with the high priesthood, it has been argued that the use of the name *Sadducee* was an attempt to legitimatize the Jerusalem priesthood by associating it with the line of Zadok. But, in point of fact, the Jerusalem priesthood of the Hasmonean period was manifestly not of Zadokite lineage, so that on the other hand it has been suggested that the use of *Sadducee* or *Zadokite* in referring to *that* priesthood could be derogatory— that is, an ironical reference to the disreputable (although legitimate) priesthood of the pre-Hasmonean era.

(It is, of course, not impossible that the name may trace back to a Zadok other than the high priestly Zadok. There is actually a late 9th-cent. rabbinic tradition, the ‚*Abot de Rabbi Nathan*, which derives *Sadducee* from an obscure Zadok of the 2nd cent. B.C. who was a disciple of Antigonus of Socoh. However, since a second disciple of Antigonus, a certain Boethus, is said by R. Nathan to have originated the sect known as the Boethusians, it is generally held that with respect to *Sadducee* the tradition is merely a late etymological guess. If the word is derived from the name Zadok, almost certainly it would go back to Zadok the high priest.)

(3) In light of the difficulty of using *Zadokite* to refer to a non-Zadokite priesthood, T. W. Manson (in *BJRL* 22 [1938]: 144 – 59) rejected the previous explanation and suggested in its place that the Aramaic/Hebrew word is a transliteration of the Greek word *syndikoi*, meaning "syndics, judges, fiscal controllers." The use of this term can be traced back to 4th cent. B.C. Athens. It came during the Roman period to refer to individuals having responsibilities and authority quite similar to that held by the Sadducees in Jerusalem (i.e., serving in somewhat of a mediatorial role between the Roman authorities and the local or national community). Thus the word was used also to refer to members of the Jewish senate, the SANHEDRIN. Besides avoiding the major problem intrinsic to the previous explanation, Manson notes that his theory is more consistent with the fact that among the Sadducees were many laymen, for whom a priestly designation (such as *Zadokite*) would be meaningless. Thus the word is said by Manson to have originally denoted the "syndics" or Jewish officials of the Hasmonean era; the Sadducees themselves, however, may well have preferred the etymology which designated them as "righteous."

Looked at objectively, Manson's explanation seems to possess more plausibility than the first two proposals. Etymology, however, is often notoriously unpredictable, and it is thus easily possible that, even with their respective difficulties, one of the other explanations is really the correct one. It would seem safe to say that soon after the word achieved currency and its referent was established, its real etymology became unimportant (and may even have been forgotten), and that alternative etymological possibilities sprang readily to mind.

II. Origin and history. We are limited in our knowledge of the Sadducees to the indirect information Josephus provides, supplemented by what can be learned from the NT and the MISHNAH. Unfortunately, the precise origin of the Sadducees cannot be determined from these sources. The first mention of the Sadducees by Josephus (*Ant*. 3.5.9 §§171 – 73) refers to the period of Jonathan MACCABEE, successor to his brother Judas. He states, "At this time there were three sects among the

Jews, who had different opinions concerning human actions: the one was called the sect of the Pharisees, another the sect of the Sadducees, and the other the sect of the Essenes." Something of the respective tenets of these three schools is given, but Josephus provides no account of their origin. Quite probably, however, the Sadducees or their precursors are to be identified with the aristocratic members of the early senate or Sanhedrin of Israel, which began prior to the Maccabean revolt and continued through the Hasmonean period.

Josephus next relates how the high priest John Hyrcanus (135 – 104 B.C.) was cajoled into transferring his allegiance and favor from the Pharisees to the Sadducees (*Ant*. 13.10.5 – 6 §§288 – 98). This is the apparent beginning of the close connection between the Sadducees and the high priesthood that continues into the NT period. A natural alliance between the two existed on the basis of the political interests of the aristocratic Sadducees and the eminent position of the Hasmonean princes. However, the privileged status which the Sadducees began now to enjoy was abruptly lost when Salome ALEXANDRA, succeeding her husband Jannaeus as monarch (76 B.C.), acted upon his advice and granted considerable power to the Pharisees, who were so influential among the masses. See HASMONEAN II.

When Alexandra died (67 B.C.), her two sons quarreled over the succession. Aristobulus II, backed by the Sadducees, eventually won out over Hyrcanus II, the contender supported by the Pharisees. But Hyrcanus, at the instigation of Antipater, continued in a struggle for the crown that was brought to an end only by an appeal to Rome. POMPEY eventually invaded Jerusalem (63 B.C.) and installed Hyrcanus II as high priest by way of reward for his assistance. Much later (40 B.C.), the Sadducees were probably supporters of Antigonus, son of Aristobulus II, who succeeded in wresting the high priesthood from Hyrcanus II. When HEROD the Great captured Jerusalem three years later, he took vengeance on the "partisans of Antigonus" (Jos. *War* 1.18.4 §358; cf. *Ant*. 15.1.1 §2) who had opposed Hyrcanus II, among whom were doubtless a large number of Sadducees.

With Herod the standing of the Sadducees declined appreciably (cf. Jos. *Ant*. 14.9.4 §§171ff.). He diminished the power of the Sanhedrin and hereditary high priesthood with a disconnected succession of high priests of his own choosing. (Josephus counts, in the period of 107 years from Herod to the fall of Jerusalem, no less than 28 high priests, *Ant*. 20.10.5 §250.) Not only was the high priesthood as an institution degraded under Herod, but the Sadducees (who remained closely associated with the high priests) themselves suffered an increasing decline in the public opinion. The frequent linking of the Sadducees with the Boethusians—the high-priestly house of Boethus, appointed by Herod (cf. Jos. *Ant*. 15.9.3 §§320 – 22; 19.6.2 §§297 – 98)—attests to this low esteem of the Sadducees. (On the basis of ascriptions of legal rulings in the rabbinic literature, a recent analysis has given fresh support to the view that the Sadducees and the Boethusians constituted one group. See E. Regev, *Ha-ṣeduqim ve-hilḥatam: ʿal dat ve-ḥevrah bi-yeme bayit sheni* [The Sadducees and Their Halakah: Religion and Society in the Second Temple Period, 2005].)

Stone weight inscribed in Aramaic, found in the so-called Burnt House of Jerusalem, and bearing the name Bar Kathros. The Babylonian Talmud refers to "the house of Kathros" as a priestly family who probably belonged to the Sadducean party (*b. Pesaḥhim* 57a).

When in A.D. 6 JUDEA became a Roman province, the Sanhedrin, and with it the Sadducees and the high priest, were able to exercise more control in governing the country, but always of course under the watchful eye of the Roman governor. From this time onward the high priests were aristocratic Sadduceans, and the majority of the members of the Sanhedrin were Sadducees (cf. Acts 4:1; 5:17; Jos. *Ant*. 20.9.1 §199). Yet the Pharisees, though a minority in the Sanhedrin, were highly influential in that body because of their popularity with the masses. As Josephus puts it, "they accomplished nothing," having to go along with the Pharisees, "since otherwise the masses would not tolerate them" *(Ant*. 18.1.4 §17). With the fall of Jerusalem and the end of the second temple in A.D. 70, the Sadducees disappear from history. Their existence was inextricably tied to their political and priestly power, and when that came to an end they, unlike the Pharisees, were unable to survive.

III. Composition and character. The determinative trait of the Sadducean party seems not to have been its priestly associations, as is commonly believed, but rather its aristocratic character. While it is true that the high priesthood and the chief priests consisted almost exclusively of Sadducees, there were many Pharisees among the priests, and probably even among the upper priestly classes. More important, however, many Sadducees were to be found among the lay nobility who exercised important authority as members or "elders" of the Sanhedrin. Accordingly, that which was common to the Sadducees was not clerical status, but aristocratic eminence. It is natural then that the Sadducean circle was a very exclusive one, remaining closed to the populace as a whole. Josephus states that only a small number of people knew the doctrine of the Sadducees, that these were "men of the highest standing" (*Ant*. 18.1.5 §§16 – 17), and that the Sadducees had "the confidence of the wealthy alone" (13.10.6 §298).

It is unfortunate that the Sadducees have usually been understood only by way of their contrast to the Pharisees, for this has led to oversimplification and misunderstanding. Thus facile dichotomies have become popular, such as the view that the Sadducees represented the clergy and temple, but the Pharisees the laity and synagogue; that the Sadducees were the proponents and the Pharisees the resisters of hellenization; that the Pharisees were the urban bourgeoisie, the Sadducees the rural landowners; that the Pharisees were concerned with religion and the Sadducees with politics. It is undeniable that there is some truth in these various assertions, but none of these contrasts should be absolutized and made alone to account for the peculiar character of the Sadducees. The latter were what they were due to a subtle combination of many factors, in varying degree. The Pharisees and the Sadducees were clearly opposed on certain issues, yet the difference between them is usually not absolute.

The aristocratic makeup of the Sadducees, together with their power in the Sanhedrin and their control of the high priesthood, made it inevitable that their dominating interests should be political in nature. Their wealth and position on the one hand, and on the other hand the fact that their power was delegated to them by the Roman occupation, combine to account for the most outstanding trait of the Sadducees, their rigid conservatism. This conservatism, of course, was inevitably tempered by the dictates of the Romans. Since their political involvements were conditioned by their vested interests in the preservation of the status quo, it follows that they pursued policies designed to appease the governing authorities of Rome.

A sample of 1st-cent. ceremonial or priestly stone vessels unearthed in Jerusalem at the Burnt House.

Thus, paradoxically, the Sadducees were seen to be in line with the hellenizing tendencies of their predecessors, and the populace hated them for their accommodation to the Romans, based as it was on private expediency.

The primary concern of the Sadducees in all of this was to keep the nation peaceable and thereby to avoid trouble for the Romans and, in turn, themselves. In their administration of the internal justice of the country, the Sadducees were exceptionally strict in matters of law and order. Josephus refers to the party of the Sadducees as being "more heartless [*or* fierce; Gk. *ōmos*] than any of the other Jews when they sit in judgment" (*Ant.* 20.9.1 §199; in 13.10.6 §294 he refers to the Pharisees as being "naturally lenient in the matter of punishments" compared to the Sadducees). Similarly, any popular movement was a potential threat to the Sadducees, especially any that could be regarded as in any sense an "uprising." This accounts for their diligence in attempting to suppress the Christian movement by disposing of Jesus. The chief priests undoubtedly express the Sadducean viewpoint (which here coincided with that of the Pharisees) when they warn, "If we let him go on like this, everyone will believe in him, and then the Romans will come and take away both our place [*i.e.*, the temple] and our nation," to which CAIAPHAS the high priest, unwittingly prophetic, adds, "it is better for you that one man die for the people than that the whole nation perish" (Jn. 11:48 – 50).

As to their behavior in interpersonal relationships, Josephus says that they were far inferior to the Pharisees. While the latter were affectionate one to another and lived harmoniously, the Sadducees, he says, are "boorish," and with their "peers" (*tous homoiousi*) they are "as rude as to aliens" (*War* 2.8.14 §166). This has been seen by some as consonant with the sociological explanation of the Sadducees as crude, unpolished, provincial landowners (in contrast to the urbane Pharisees). To be sure, Josephus has a decidedly negative view of the Sadducees (whom he left to become a Pharisee), yet there are also some indications in the NT that the Sadducees were less than refined (cf. Matt. 26:67 – 68; Acts 23:2). Josephus also represents the Sadducees as inclined toward argumentation to the extent that they "reckon it a virtue to dispute" with their teachers (*Ant.* 18.1.4 §16), and probably Josephus means this in a derogatory sense. Thus the Sadducees, with all the advantages of higher culture that wealth brings, nonetheless were apparently lacking in the elements of refinement and decency that one usually tends to associate with the aristocracy.

The Sadducees, then, by virtue of their peculiar position, were preeminently concerned with politics and the stability of the state. But while these secular concerns were dominant, it cannot be denied that there was also a clearly religious aspect to the Sadducean viewpoint, and it especially is in the realm of their religious teaching that the conservatism of the Sadducees is apparent.

IV. Teaching. For the most part what we know of the religious teaching of the Sadducees we know only indirectly, that is, only in its negation of certain Pharisaic doctrines. The Sadducees, having rejected a great amount of the Pharisaic teaching as innovative, are properly seen as the conservative religious party; they appear to have regarded themselves as the stalwart guardians of the "pure faith" of the past. (Of course, from the point of view of modern "conservative" thought, the Sadducees appear "liberal," as in their rejection of the resurrection.)

Unquestionably the most important denial on the part of the Sadducees was that of the Pharisees' oral law, "the tradition of the elders" (see discussion under MISHNAH). Some scholars argue that this only states the obvious, namely, that the Sadducees were not Pharisees. However, understanding how the oral law functioned and why the Sadducees opposed it throws considerable light on the conflicts between these two groups. In particular, the Sadducees denied that the oral law of the Pharisees traced back to Moses and that it was authoritative and binding. Josephus gives explicit information on

this point, informing us not only of the fact that the Sadducees abrogated the regulations of the Pharisees, but also giving the reason for this as the absence of these regulations from the "laws of Moses" (*Ant*. 13.10.6 §297). Josephus, indeed, seems to attribute the controversies and differences between the Pharisees and Sadducees to this fundamental disagreement. The Sadducees were probably in agreement with some parts of the oral law, but nonetheless rejected any suggestion that observance of the oral law was obligatory. With regard to matters not specified in the written law, the Sadducees seemed concerned to protect the right of private opinion. It may well be that behind this Sadducean viewpoint lay the vital concern of preserving the traditional priestly prerogative of interpreting the law, to which the Pharisaic structure of oral law posed no small threat.

To the Sadducean mind, the Pharisaic attempt to "build a hedge" around the Torah—i.e., to protect against transgression by detailed regulations—was mistaken and unnecessary. Indeed, the Sadducees seemed to perceive that such legal stipulation could have the effect of annulling the Mosaic law itself. Paradoxically, however, the Sadducees too had a tradition of "decrees" or interpretation of the law of Moses that was, in principle at least, indistinguishable from the HALAKAH, or legal tradition, of the Pharisees (cf. Matt. 16:12; *m. Makkot* 1:6). On the whole, the Sadducees appear to have interpreted the Mosaic law more literally than did the Pharisees. While they tended to scoff at the scrupulousness of the Pharisees, they themselves were very exacting in matters of Levitical PURITY, doubtless in keeping with their concern for the prestige of the priesthood and the temple ritual. Needless to say, however, the Pharisees regarded the Sadducees as sinners of the worst kind who by their immoral conduct prostituted the sacred ritual of the temple (cf. the Pharisaic PSALMS OF SOLOMON, where the "sinners" spoken of are to be identified with the Sadducees).

Turning to specific doctrinal beliefs of the Sadducees, one may begin by looking at what Josephus tells us of their view of free will and predestination (or Fate, as he calls it, using the Greek concept). Whereas the Pharisees apparently tried to synthesize the two, the ESSENES leaned to the one extreme of attributing all to Fate, while the Sadducees were at the other extreme of attributing all to free will. "They do away with Fate altogether" and throw everything back upon the free will and responsibility of man (*Ant*. 13.5.9 §173; *War* 2.8.14 §164). For the Sadducees a person's own decision accounted for his well-being or misfortune. This belief of the Sadducees has rightly been taken as implying a certain feeling of self-sufficiency on their part and a repudiation of any dependence upon divine PROVIDENCE.

A second negation further removed from God any effective relevance by arguing that there is no RESURRECTION of the dead, nor any future life whether of bliss or sorrow. For the Sadducean denial of the resurrection of the body, NT evidence is plentiful (cf. Mk. 12:18 – 27 and parallels; Acts 23:8; cf. 4:2). From Josephus we learn that the Sadducees believed that the SOUL perishes with the BODY (*Ant*. 18.1.4 §16) and therefore can receive neither penalties nor rewards in an afterlife (*War* 2.8.14 §165). It is immediately obvious how this denial intensified an already this-worldly perspective which the Sadducees had by virtue of their position. If a person must be content with the present life alone, he is bound to capitalize on any present advantages he may enjoy. And this appears, in fact, to have been the practical philosophy of the Sadducees. It may be added that the messianic hope appears to have played no role in the Sadducean perspective.

Along with the resurrection and the IMMORTALITY of the soul, the Sadducees appear to have rejected the belief in angels and demons. In contrast to the Pharisees, who held to these doctrines, the Sadducees, we are told, "say that there is no resurrection, and that there are neither angels nor spirits" (Acts 23:8). The idea of a spiritual world containing elaborate hierarchies of angels and demons flourished particularly in the intertestamental period. This probably gave the Sadducees a basis for

rejecting such notions as innovative, although it must be admitted that angels and thus the spiritual world are encountered in the OT—even in the Pentateuch, which for the Sadducees was finally authoritative. See ANGEL; DEMON.

The doctrinal stance of the Sadducees as we have outlined it raises questions concerning their view of the Bible. Are not most of the doctrines the Sadducees rejected to be found within the OT? How then can we explain that the Sadducees rejected them? Confronted with this question, some of the early church fathers (e.g., Hippolytus, Origen, Jerome) concluded that for the Sadducees only the books of Moses were canonical Scripture. At the same period of time the SAMARITAN community held to a canon consisting exclusively of the Pentateuch. However, the Samaritans were only half-Jews, and it is difficult to believe that evidence of the Sadducees' rejection of the non-Mosaic writings would not have been noted either by Josephus or in the NT. Moreover, the church fathers may well have been speculating concerning the answer to the above questions.

A more probable solution would seem to lie along the following lines. The Sadducees accepted the CANON OF THE OT commonly received by the Jews, with the one reservation that the authority of the later writings was necessarily subordinate to that of the books of Moses. It was probably the allegedly immoderate development of specific doctrines in the intertestamental period that caused the Sadducees to overreact as they did in denying these doctrines altogether. Their final appeal was doubtless to the Pentateuch, but even here, as we have noted, they were inconsistent. Nor can we deny that their doctrinal views were tempered by the "common sense" of contemporary secular thought, such as it was, in the realms of REVELATION and ESCHATOLOGY. In their reactionary conservatism the Sadducees attempted to capitalize on their selfmade image of themselves as the protectors of the pure and true religious tradition which alone went back to Moses.

V. Sadducees in the NT. The Sadducees are referred to by name only in the Synoptic Gospels and Acts, and then not very often. To these references may be added those places where the "chief priests" are mentioned, for these were surely of the Sadducean stripe. It must be admitted, however, that by comparison with the Pharisees, the Sadducees seem insignificant in the Gospels. This may be plausibly explained by considering several factors. In the first place, unlike the Sadducees, the Pharisees enjoyed the esteem of the masses and professed a special concern for righteousness as manifested in their careful allegiance to the oral law. This made them natural targets of Jesus. The Sadducees, on the other hand, had influence only among the aristocracy, a segment of society with which Jesus had little to do, and were mainly concerned with their political interests. The Sadducees were, moreover, restricted for the most part to Jerusalem, whereas the Gospels center on the Galilean ministry of Jesus.

Early in the gospel narratives, the Sadducees have almost no role to play. They do make an appearance along with the Pharisees at the Jordan, where John castigates them as a "brood of vipers" (Matt. 3:7), but they do not seem to have been particularly interested in the early ministry of Jesus. The next reference to the Sadducees in the chronology of the synoptics occurs when they, again accompanied by the Pharisees, ask Jesus for a "sign from heaven" (16:1). Just after this, Matthew records Jesus' warning concerning the "yeast of the Pharisees and Sadducees" (vv. 6, 11) which is "the teaching of the Pharisees and Sadducees" (v. 12). The word "Sadducees" does not occur in the parallels to this passage, although Mark does refer to "the yeast of the Pharisees and that of Herod" (Mk. 8:15), the latter quite probably referring to the Herodians, who would certainly appear analogous to the Sadducees in many ways. The Matthean passage should not be interpreted to mean that the teaching of the Pharisees was identical to that of the Sadducees. The warning concerns the

teaching of each group, which was in its own peculiar way corrupt and contrary to the message of Jesus.

The most significant mention of Sadducees in the Gospels concerns an interview with Jesus in Jerusalem, at the end of his ministry, in which they tried to trap Jesus with a crafty question concerning the resurrection (Matt. 22:23 – 33; Mk. 12:18 – 27; Lk. 20:27 – 38). In his answer, Jesus accused them of knowing neither the Scriptures nor the power of God, and he then proceeded to cite the Pentateuch (Exod. 3:6) in support of the doctrine of the resurrection.

The Sadducees appear to have been unconcerned about Jesus early in his career. Only as it became clear that he posed a threat to their security and position (as in his cleansing of the temple; cf. Mk. 11:18) did they begin to become alarmed and decide to take action (cf. Jn. 11:47 – 53). Indeed, confronted with Jesus and his claims, the Sadducees were able to unite with the Pharisees, their traditional enemies, for the purpose of disposing of Jesus. Both parties collaborated in his arrest and "trial" by the Sanhedrin (Mk. 14:53 – 65).

The Sadducees were agitated by the preaching of the apostles in the early church. The book of Acts records that they arrested Peter and John for "proclaiming in Jesus the resurrection of the dead" (Acts 4:2). Some time later, the Sadducees were "filled with jealousy" at the abundance of signs and wonders wrought by the apostles and arrested them again (5:17). This action of the Sadducees is consistent with both their character and special interests. Josephus, indeed, implicates the Sadducees in the death of JAMES, the half-brother of Jesus (*Ant*. 20.9.1 §§199 – 200; cf. Acts 12:1 – 2). The final reference to the Sadducees in Acts (and in the NT) occurs in the trial of PAUL before the Sanhedrin, where in almost humorous fashion Paul is able to get the Pharisees and Sadducees into an intramural battle on the question of the resurrection, which brings the meeting to an end in a great clamor (Acts 23:6 – 10).

The NT evidence, while not of considerable extent, is nonetheless valuable in itself and consistent with the picture of the Sadducees that can be gleaned from the writings of Josephus. It may finally be remarked that the evidence of Jewish oral tradition as codified in the Mishnah and other rabbinic compilations tends on the whole to support that same picture, whether on the Sadducean aversion to Pharisaic scruples (e.g., *m. Parah* 3:3; *Yadayim* 4:6 – 7) or concerning the question of life after death (e.g., *m. Berakot* 9:4). At the same time, the rabbinic literature must be used somewhat judiciously; produced from the later standpoint, it views the Sadducees as heretics and virtual enemies of Israel (cf. *m.* (*Erubin* 6:2; *m. Niddah* 4:2), and thus its references to the Sadducees often are highly polemical.

(See further W. O. E. Oesterley, *The Jews and Judaism During the Greek Period* [1941]; J. Z. Lauterbach, *Rabbinic Essays* [1951]; T. W. Manson, *The Servant-Messiah* [1953]; L. sadhe sah'day. See TSADHE.

Sadoc say'dok. KJV NT form of ZADOK.

saffron. An aromatic plant used for producing condiment and perfume, and for other purposes. The Hebrew term *karkōm H4137*, used in the SONG OF SOLOMON to describe the bride (Cant. 4:14), could be Indian saffron (*Curcuma longa*) or crocus saffron (*Crocus sativus*), the latter name indicating the plant from which the flavoring powder is derived. Saffron comes from the upper end of the style of the flower. Over 4,000 crocus flowers are needed to produce 1 oz. of saffron. The flowers must be picked early, just as they start to open, and the pistils are then carefully removed. These are then dried in a portable kiln, so as to evaporate the moisture. In hot countries, the stigmas can be dried in the sun. The powder is used for flavoring cakes, stews, and curries. The plant is a native of Palestine and would have been known to SOLOMON. (See *FFB*, 174 – 75.)

W. E. SHEWELL-COOPER

Sahidic version suh-hid'ik. See VERSIONS OF THE BIBLE, ANCIENT, IV.A.

sail. See SHIPS.

sailor. The Hebrew expression "men of ships" (*'anšê 'ŏniyyôt H408 + H641*) occurs once with reference to HIRAM'S sailors who served in SOLOMON'S fleet (1 Ki. 9:27). Otherwise, Hebrew uses the noun *mallāḥ H4876* to express the meaning "sailor, mariner" (Ezek. 27:9, 27, 29; Jon. 1:5; additional terms variously translated "oarsman, pilot, seaman, shipwright" are used in Ezek. 27:26 – 29). The NT uses the Greek noun *nautēs G3731* (Acts 27:27, 30; Rev. 18:17; the latter verse includes other related terms). The Acts passage contains the most graphic maritime account in Scripture: a record of PAUL'S voyage to Rome when the sailors conspired to desert the ship and were forcibly dissuaded by Paul and the centurion. See also PILOT; SHIPS

saint. A person sacred to God; the term is applied to members of the Jewish and Christian congregations. This English word is used to render several terms. One of them is the Hebrew adjective *qādôš H7705* (Aram. *qaddîs H10620*), which means "set apart, consecrated, holy." When the plural is used substantivally, it is translated "holy ones" or "saints" (Ps. 16:3 et al.; Aram., Dan. 7:18 et al.). The focus of this term is on the CONSECRATION of the subject involved rather than upon moral purity. Of course, all things and people consecrated to God are ideally to be free from moral and ceremonial defilement. God himself is the thrice-holy One (Isa. 6:3). See further HOLINESS.

Another Hebrew word, *ḥasîd H2883*, has stronger moral overtones ("faithful, pious, godly, kind"). Related to *hesed H2876* (see LOVINGKIND-NESS; MERCY), it is never applied to objects used in worship, but only to people (twice to God). The Psalms use the term with special frequency (e.g., Ps. 30:4). In the intertestamental period it was applied to a strictly orthodox party that may have become the precursors of the PHARISEES (see HASIDEAN; MACCABEE).

In the NT the adjective *hagios G41*, when used as a noun, usually refers to members of the Christian church. It is used once in the Gospels (Matt. 27:52) of the saints of the former age. The other references are in Acts, the Epistles, and Revelation. *All* believers are called "saints," even when their character is dubiously holy. The term is applied usually to the group of Christians constituting a church, rather than to one individual Christian (e.g., Acts 9:13; Rom. 8:27; Rev. 5:8). The reference is to those who belong to God as his own. In some instances, however, their saintly character becomes prominent (e.g., Rom. 16:2; Eph. 5:3).

It is easy to see how the term *saints* would inevitably take on an ethical and moral meaning. If a person belonged to Christ, showed Christian character by an exemplary life, and made notable progress in sanctification, so that his or her reputation as a good, moral, and spiritual Christian became widely spread among the churches, people would begin to speak of that person's exceptional "saintly" character. In that way the term would gradually be used only of such persons who were outstanding in spirituality.

That is probably the origin of the Roman Catholic custom of restricting the usage of the term to notable persons like the apostles and those whom the church selected and honored officially as "saints." The fact that most Christians still have sinful characteristics, even though they are genuine Christians, would cause the church gradually to withhold the term from ordinary Christians and apply it only to such especially spiritual individuals. Even the restriction of the use of the term to those whom the church hierarchy selected can be explained by the difficulty of selecting the best individuals to whom it could be applied. There would have to be a final authority to decide such a selection, and during the lifetime of those who knew the saint personally, it would be difficult to cover up minor defects of character. That is probably the reason why people must be dead many years before they can even be considered by the Roman Catholic Church as suitable saintly material.

According to Roman Catholic theology, individuals can store up a reservoir of merit by good deeds and blameless lives. That reservoir becomes available to other humble Christians in answer to prayers offered to the saint. Those who feel themselves particularly in need of merit would then pray to the saint for help and merit.

The worship of the saints would easily develop from such a doctrine. If a saint could really give his or her merit to any person, would not that saint be likely to give special favor to those who burned candles and brought special offerings to the saint? Would not the saint be more likely to give greater favors to those who brought better offerings? Gradually prayers and petitions would be offered almost exclusively to the saint, and the honor and worship which belongs to God alone would be transferred almost exclusively to the alleged saint. Because of the danger of such a situation arising, one can readily understand why God forbade all PRAYERS and WORSHIP to anyone but to God himself. All so-called "aids to worship" have that danger intrinsic in them.

Among Protestants today, the word *saints* has almost totally lost its original denotation, that is, of being set aside for the exclusive ownership and use of the Triune God. Very few people in the Christian church would consider themselves to be "saints," for the original meaning of the word, unfortunately, has largely fallen into disuse.

<div align="right">F. E. HAMILTON; R. L. HARRIS</div>

Sakar say'kahr. TNIV form of SACAR.

Sakia suh-ki'uh (שָׂכִיה *H8499,* possibly "Yahweh has fenced in"). KJV Shachiah; NRSV Sachia; NJPS Sachiah. Son of SHAHARAIM and descendant of BENJAMIN; a family head (1 Chr. 8:10; many Heb. MSS have *šibyâ,* reflected in LXX *Sabia).* Sakiah was one of seven children that were born to Shaharaim in MOAB by his wife HODESH after he had divorced Hushim and Baara (vv. 8 – 9).

Sakkuth sak'uhth. Also Sikkuth. This name is used by some versions to represent the Hebrew word *sikkût* in Amos 5:26: "You shall take up Sakkuth your king, and Kaiwan your star-god" (NRSV). Such a rendering assumes that the Hebrew term is a loanword from Akkadian *sakkud,* and it is often thought that both this name and Kaiwan are references to the planet Saturn as a deity. The evidence

for this interpretation, however, is not strong (see bibliographical refs. under KAIWAN and cf. *DDD,* 722-23). Accordingly, the NIV understands the word as a form of *sukkâ H6109,* "tent, tabernacle" (cf. also *skēnē G5008* in LXX, quoted in Acts 7:43; and among the DSS see CD VII, 14 – 16), yielding the translation, "You have lifted up the shrine of your king, the pedestal of your idols." See also REPHAN.

Sala say'luh. (1) KJV NT form of SHELAH.
   2) NT variant of Salmon; see SALMA, SALMON.

Salah say'luh. KJV form of SHELAH.

Salamiel suh-lay'mee-uhl (Σαλαμιήλ). Son of Sarasadai and ancestor of JUDITH (Jdt. 8:1; KJV, "Samael"). The reference is probably to SHELUMIEL (Num. 1:6 et al.).

Salamis sal'uh-mis *(*Σαλαμίς *G4887).* A harbor on the E coast of the island of CYPRUS. The ancient site, N of modern Famagusta, has been completely silted in by the River Pedias. According to Greek mythology it was founded after the Trojan war by Teucer (son of Telamon), who was from the island of Salamis near ATHENS. However, there is archaeological evidence of an earlier Mycenean settlement. It traded actively with Phoenicia, Egypt, and other countries of the ANE. The sources of commerce were grain, wine, olive oil, and salt.

The city is mentioned as a tributary of ASHURBANIPAL of Assyria in 668 B.C. Assyrian influence is evident from terra-cotta figures found on the site. Salamis took part in the revolt of the Ionian Greeks against Persia in the 5th and 4th centuries. Demetrius I Poliorcetes, in quest of all of Alexander's empire, defeated Menelaus, the brother of Ptolemy I, off Salamis in 306 B.C. The Egyptians recovered the island in 295, and a large number of Jews were encouraged by the Ptolemies to settle in the city.
The civic center of the Roman city of Salamis. On the left is the wrestling ground of the gymnasium, with the theater on the right.

The Romans annexed the island in 58 B.C. in repayment for loans made to Ptolemy Auletes. At first, Cyprus was part of the province of CILICIA, but in 31 B.C. it became a separate imperial province. In 22 B.C. it became a senatorial province; hence, Sergius PAULUS is correctly identified as PROCONSUL (Acts 13:7). Salamis was greatly damaged by a Jewish revolt in A.D. 116 – 117 and by earthquakes; subsequently, it was rebuilt by Constantius II and renamed Constantia.

PAUL and BARNABAS, assisted by John Mark (see MARK, JOHN), preached in the synagogues there on the first missionary journey (Acts 13:5). From Salamis they proceeded across the island to PAPHOS. Barnabas was a Cypriot. His reputed tomb, discovered in A.D. 477, is located near the monastery of Ail Barnaba. EPIPHANIUS, bishop of Salamis (A.D. 367 – 402), was a strong supporter of the monastic movement and a rigorous opponent of the followers of ORIGEN.

A. RUPPRECHT

Salasadai sal'uh-sad'*i*. KJV Apoc. form of SARASADAI (Jdt. 8:1).

Salathiel, Salatiel suh-lay'thee-uhl, -tee-uhl. See SHEALTIEL.

Salcah, Salchah sal'kuh. KJV forms of SALECAH.

Salecah sal'kuh (סַלְכָה *H6146*, derivation unknown). KJV Salcah and Salchah; TNIV Salekah. A town that defined the eastward extent of BASHAN (Deut. 3:10; Josh. 12:5; 13:11; 1 Chr. 5:11). Taken from King OG, Salecah was apparently assigned to the eastern part of MANASSEH (Josh. 13:29 – 31), but was later inhabited by Gadites (1 Chr. 5:11) see GAD, TRIBE OF. Its identification is not certain. A suitable site with a similar name is modern Salkhad (the name is not etymologically equivalent, however; cf. Nabatean ṣlḥd, Arabic Ṣalḥad). Located on an extinct volcanic cone 8 mi. S of Jebel ed-Druze, this site controls the SE approach to the fertile HAURAN Valley (biblical Bashan), the

southern approaches to DAMASCUS, and the western end of the desert route to the Persian Gulf. The old E-W Roman road is still visible. Its location and importance make it the proper eastern extremity of Bashan. The chief remains are those of the citadel, the present form of which is Ayyubid although some elements are Roman. Coins of ARETAS, king of the NABATEANS (9 B.C. TO A.D. 40), also have been found there.

<div align="right">A. BOWLING</div>

Salem say'luhm *(שָׁלֵם H8970,* "complete, safe"). An abbreviated form of JERUSALEM. Though occurring only four times in Scripture, Salem is the city's first designation (Gen. 14:18) and, along with ZION, identifies the place of God's dwelling (Ps. 76:2). The title given to MELCHIZEDEK, king of Salem (Heb. 7:1), is understood by the writer of Hebrews as "king of peace" (v. 2), in its sense of security, prosperity, and well-being (see PEACE). The name Salem/Shalem may also have connoted to Jerusalem's original Jebusite inhabitants (see JEBUS) a "prospering" Canaanite deity of that name (see *ABD,* 5:1152 – 53; *DDD, 755 – 57).*

In Gen. 33:18 the LXX renders Hebrew *šālēm H8969* (prob. meaning "safely") as a proper name *(Salēm;* cf. also Vulg. and Syr., as well as KJV's SHALEM). On that basis, some have associated Salem with SHECHEM (see SALIM; the reference to the "valley of Salem" in Jdt. 4:4 is unclear). In addition, a few scholars have either emended Gen. 14:18 or interpreted the name there as a common noun, yielding such translations as "a king allied with him" or "a submissive king" (see discussion in H. Vincent, *Jérusalem de l'Ancien Testament* [1956], 2:612 – 13; *HALOT,* 4:1539).

<div align="right">J. B. PAYNE</div>

Salim say'lim *(Σαλίμ G4890,* also *Σαλείμ,* prob. from Heb. *שָׁלֵם H8970* [see SALEM]). A place used to specify the location of AENEON, where JOHN THE BAPTIST was baptizing (Jn. 3:23). Salim must have been a well-known site, but it has not been identified with certainty. Three suggestions merit discussion: (1) EUSEBIUS *(Onom.* 40, followed by JEROME) located it at Salumias c. 7.5 mi. SSE of Scythopolis (BETH SHAN). Salumias is probably modern Tell er-Radghah (Tell Sheikh es-Selim), and there are several springs nearby, next to the ruins of Umm el-ʿAmdan. This territory could well have been part of the DECAPOLIS rather than part of SAMARIA. (2) W. F. Albright *(The Archaeology of Palestine,* rev. ed. [1960], 247) suggests the well-known site of Salim that is a few miles E of Nablus (ancient SHECHEM). This is the town nearest to the springs of Wadi Fariʿa (Farah), though some have argued that John was unlikely to minister in Samaria. (3) Another proposal is Wadi Saleim, only about 6 mi. NE of Jerusalem (cf. *IDB,* 4:166), but this identification has not gained favor.

<div align="right">A. BOWLING</div>

Sallai sal'*i* *(סַלַּי H6144,* meaning uncertain). **(1)** One of the leaders from Benjamin who volunteered to settle in Jerusalem after the return from the Exile (Neh. 11:8). The Hebrew text is difficult; see discussion under GABBAI.

(2) See SALLU #2.

Sallu sal'*oo* *(סַלֻּא H6132* [Neh. 11:7], *סַלּוּ H6139* [Neh. 12:7], *סָלוּא* [1 Chr. 9:7]; possibly "[God] has returned [*or* restored]"; see SALU). (1) Son of MESHULLAM; mentioned in a list of Benjamites who resettled in Jerusalem after the EXILE (1 Chr. 9:7; Neh. 11:7). It is possible that Sallu was a family name rather than the name of an individual.

(2) A priest who returned with ZERUBBABEL from the exile (Neh. 12:7). Later, in the days of the high priest JOIAKIM, the head of Sallu's family was Kallai (v. 20, where most versions, following the

MT, read "Sallai," an alternate form or a textual corruption).

Sallumus sal'uh-muhs. KJV Apoc. form of SHALLUM (1 Esd. 9:25).

Salma, Salmon sal'muh, sal'muhn (שַׂלְמָא *H8514* [1 Chr. 2:11, 51, 54], שַׂלְמָה [Ruth 4:20], שַׂלְמוֹן *H8517* [Ruth 4:21], all of these alternate spellings possibly meaning "mantle" or "spark"; Σαλμών *G4891* [Matt. 1:4 – 5], Σαλά [Lk. 3:32]). **(1)** Son of HUR, grandson of CALEB, and descendant of JUDAH; he is described as the "father" (i.e., founder) of BETHLEHEM and as the ancestor of several important clans (1 Chr. 2:51, 54).

(2) Son of Nahshon and father of BOAZ (Ruth 4:20 – 21); included in the GENEALOGY OF JESUS CHRIST (Matt. 1:4 – 5; Lk. 3:32 [NRSV, "Sala"]).

S. BARABAS

Salmai sal'mi. See SHALMAI.

Salmon. See SALMA, SALMON.

Salmone sal-moh'nee (Σαλμώνη *G4892;* outside the NT spelled variously, Σαλμώνιον, Σαμμώνιον, etc.). A promontory, now called Cape Sidero, constituting the most easterly portion of CRETE. When PAUL and company boarded ship at MYRA in LYCIA, they had to cope with strong northwesterly winds. Hugging the shore, they reached CNIDUS in SW ASIA MINOR with some difficulty. There the land protection ceased. It would have been possible to lie at anchor in that harbor awaiting a fair wind, but because of their urgent desire to reach ROME the only course was to tack to the S and sail "to the lee of Crete, opposite Salmone" (Acts 27:7). Luke added, "We moved along the coast with difficulty and came to a place called Fair Havens, near the town of Lasea" (v. 8).

J. H. BRATT

Salom say'luhm. KJV Apoc. form of SHALLUM (Bar. 1:7) and SALU (1 Macc. 2:26).

Salome suh-loh'mee (Σαλώμη *G4897*, possibly "peaceful"). (1) One of the women who followed and ministered to Jesus in GALILEE, were witnesses to the CRUCIFIXION, and afterwards went to the tomb to anoint his body (Mk. 15:40 – 41; 16:1). A comparison between these passages and Matt. 27:56 identifies her as the wife of ZEBEDEE, and therefore mother of James and John (see JAMES I; JOHN THE APOSTLE). Her request for prominence for her sons in the kingdom was rebuked by the Lord and drew the indignation of the other disciples (Matt. 20:20 – 24; Mk. 10:35 – 41). Many infer from Jn. 19:25 that she was the sister of MARY, MOTHER OF JESUS, but others take the phrase "his mother's sister" as a reference to "Mary the wife of Clopas" which follows.

(2) The daughter of HERODIAS and Herod Philip (Jos. *Ant*. 18.5.4 §§136 – 37); her name is not given in the Gospels. Because her dancing before Herod Antipas, her father's half-brother, pleased him so much, he promised to grant her whatever request she might make. Prompted by her mother, she asked for the head of JOHN THE BAPTIST, who had rebuked the marriage of Herodias and Anti-pas (Matt. 14:3 – 11; Mk. 6:16 – 28). See discussion under HEROD V.B.2. Salome became wife first to her uncle Philip, tetrarch of Traconitis (Lk. 3:1, not to be confused with Herod Philip), and then to her cousin Aristobulus, son of Herod king of Chalcis.

A. M. ROSS

salt. A white, crystalline compound known chemically as sodium chloride. Found in great quantity in the DEAD SEA area and purchased by the Jews from traders in the N, salt served various purposes. It was used as a condiment to season food for humans (Job 6:6) and beasts (Isa. 30:24), and to preserve it from putrefaction (Exod. 30:35). It was the mandatory accompaniment of some of the SACRIFICES, notably the grain (Lev. 2:13) and burnt offerings (Ezek. 43:24). Because of its medicinal values, newborn babies were bathed in it and rubbed with it (16:4). That it was regarded as of great value is indicated by its inclusion with WINE and OIL as the basic staples of life (cf. Jos. *Ant*. 12.3.3 §140). It may also have served a destructive purpose: when ABIMELECH captured SHECHEM, he sowed the ground with salt as punishment on them (Jdg. 9:45; cf. the Romans' treatment of Carthage). It is possible, however, that this simply indicated the placement of a ban upon them or that it symbolized desolation.

The figurative usage is indeed common. On the one hand, heaps and pits of salt conveyed the picture of barrenness and sterility (Deut. 29:23; Ps. 107:34; Zeph. 2:9). On the other hand, salt symbolized the valuable and the virtuous. A pact of friendship was sealed with the gift of salt (still observed by Arabs today), and the agreement between God and his people was termed a COVENANT OF SALT (Num. 18:19; 2 Chr. 13:5), salt being emblematic of loyalty and perpetuity. In the SERMON ON THE MOUNT the Lord implies the wholesomeness and vitality of Christians when he calls them "the salt of the earth" (Matt. 5:13). The idea of purification is prominent in Mk. 9:49, where the Lord says that in the final judgment "everyone will be salted with fire." The apostle PAUL urges wisdom, prudence, and wholesomeness in the Christian's conversation when he says, "Let your conversation be always full of grace, seasoned with salt, so that you may know how to answer everyone" (Col. 4:6).

J. H. BRATT

Salt, City of (עִיר־הַמֶּלַח *H6551 + H4875*). One of six cities allotted to JUDAH in the desert (Josh. 15:62). Four of these—MIDDIN, SECACAH, NIBSHAN, and the City of Salt—are often identified with four Iron II settlements in el-Buqe<ah, a valley SW of JERICHO (see ACHOR), and many have thought that the City of Salt in particular is the same as Khirbet QUMRAN (though some recent writers believe that Qumran should rather be identified with Secacah; cf. Z. Kallai, *Historical Geography of the Bible* [1986], 396 n. 143). Alternate proposals include <Ain el-Ghuweir (c. 9 mi. S of Qumran) and even Tell el-Milḥ (much farther away, c. 14 mi. SE of BEERSHEBA; but see MOLADAH). It should be noted that the LXX (according to CODEX VATICANUS) identified the City of Salt with SODOM, and that a variant reading (in CODEX ALEXANDRINUS, prob. a secondary adjustment of the Greek to the MT) renders "the cities of salt(s)," which may also be a reference to the CITIES OF THE PLAIN. (For further discussion, see F. M. Cross, Jr., and J. T. Malik in *BASOR* 142 [April 1956]: 5 – 17; P. Bar-Adon in *BASOR* 227 [Oct. 1977]: 1 – 25; H. Eschel in *IEJ* 45 [1995]: 37 – 40.)

A. BOWLING

salt, covenant of. See COVENANT OF SALT.

Salt, Valley of (גֵּיא־מֶלַח *H1628 + H4875*). The scene of two important victories of the Israelite armies over EDOM. The first was when DAVID'S army, led by ABISHAI, slew 18,000 Edomites (1 Chr. 18:12; in the parallel passage, 2 Sam. 8:13, which does not mention Abishai, the KJV says "Syrians" [i.e.,

Arameans], following the MT reading, *ʾărām*; the title of Ps. 60, probably a late addition to the text, speaks of 12,000 men and attributes the victory to JOAB). The other victory occurred two centuries later when AMAZIAH, king of Judah, slew 10,000 Edomites in the Valley of Salt, captured and slew another 10,000, and then took their capital SELA (2 Ki. 14:7; 2 Chr. 25:11), thus reversing the independence the Edomites had won earlier upon the death of JEHOSHAPHAT.

The exact location of the Valley of Salt is disputed. Wadi el-Milḥ (salt), to the S of BEERSHEBA, which flows by the foot of Tell el-Milḥ, has been suggested because of the similarity of names. Because that area lay outside Edomite territory, others have proposed es-Sebkha, S of the Dead Sea, a barren saline area. Still another proposal is GE HARASHIM, but the location of this valley is also uncertain. F. B. HUEY, JR.

Salthas sal'thuhs (Σαλθας). One of the descendants of Pashhur who agreed to put away their foreign wives (1 Esd. 9:22 [KJV, "Talsas"; RSV, "Elasah"]; the parallel in Ezra 10:22 reads "Elasah").

Salt Sea. See DEAD SEA.

Salu say'loo (סַלּוּא *H6140*, possibly "[God] has returned [*or* restored]"; see SALLU). Father of ZIMRI; the latter was a leader in the tribe of SIMEON who took a Midianite woman and was killed by PHINEHAS (Num. 25:14; 1 Macc. 2:26 [KJV, "Salom"]).

Salum say'luhm. KJV Apoc. form of SHALLUM (1 Esd. 5:28; 8:1).

salutation. This English term is used by the KJV seven times to render the Greek noun *aspasmos G833*, "greeting" (Mk. 12:38 et al.; in the three other passages where this Gk. word occurs [Matt. 23:7; Lk. 11:43; 20:46], the KJV has "greetings"). See GREET. In biblical studies, the English word is used primarily to designate the opening greeting in an EPISTLE.

salvation. Deliverance from the power and consequences of sin; a central doctrine in the Bible and in Christian theology.

I. The need for salvation

A. Sin. According to the Genesis account, God at the CREATION entered into a COVENANT in which ADAM and EVE, by following the pathway of OBEDIENCE, might rise to a confirmed state of HOLINESS; whereas, should they choose to disobey, they would then fall to enslavement under SIN. Obedience would lead to eternal LIFE in communion with God; disobedience would bring DEATH and SLAVERY. The positive dimension of this covenant is to be inferred from the Scripture, whereas the negative side is explicit.

As Gen. 3 makes clear, the creatures chose to disobey the Creator. When confronted with the serpent, Eve succumbed to the challenge to assert her independence from God. She endeavored to deify herself and dethrone God. PRIDE is the essence of sin! Sin is not only "any want of conformity unto, or transgression of, the law of God" *(Westminster Shorter Catechism,* Q. 14); it is also, and perhaps even more fundamentally, the breakdown of our personal relationship with our Creator. When we disobey a command of God we offend the loving and holy One who as the absolute Spirit Person sustains all life.

In Adam all sinned (Rom. 5:12). The apostle PAUL establishes the universal condemnation of all human beings because of their sinning. All, whether Gentile or Jew, have sinned and are failing to reflect the glory of that original impress of the IMAGE OF GOD (3:23).

War, as depicted on this large Greek podium frieze (5th – 4th cent. B.C.), attests to the reality of sin and death in the world and thus the need for spiritual deliverance.

B. Guilt. Because of sin, human beings are deserving of God's judgment. After establishing from Ps. 14 that Jews and Gentiles are alike under the power of sin, Paul states, "Now we know that whatever the law says, it says to those who are under the law, so that every mouth may be silenced and the whole world held accountable to God" (Rom. 3:19). In theological language GUILT means liability to punishment on account of sin; it means to be answerable to God for contradicting his holiness. Guilt must not be confused with moral pollution nor with mere demerit. For various reasons one may feel guilty when there is neither pollution nor personal demerit. Likewise one may not feel guilty where both exist.

The sense of guilt for disobeying God is immediately evident in the account of the FALL. After Adam and Eve had taken of the forbidden fruit, we learn of their vain effort to hide from God. A sense of SHAME compelled them to flee from their Creator. Men and women in their fallen condition have been doing this down through the entire course of human history. But all people exist in a responsible relationship to their Creator, and if they do not fulfill this responsibility in loving obedience to him through faith in Jesus Christ, then only judgment and the second death await them.

C. Estrangement. Because of sin, the human predicament may be described as one in which sinners find themselves the victims of anxiety, dread, despair, frustration, alienation, absurdity, meaninglessness, and estrangement. They have cut themselves off from God, their fellow human beings, and themselves. In this situation people either seek to make meaning by deifying themselves (humanism) or they abandon any hope of discovering meaning (nihilism). Evidences of estrangement from God, others, and even oneself scream at us in contemporary art forms—literature, music, painting, sculpture, architecture, drama, motion pictures.

II. The nature of salvation

A. Biblical terms. The primary Hebrew word for "salvation" is *yĕšsû*‘*â H3802* (Exod. 15:2 et al.), from the verb *yāša* ‘*H3828*, which in the hiphil stem means "to help, save" (Exod. 14:30 et al.). Other cognates are the nouns *yēša* ‘*H3829, môšā*‘*â H4636* (only Ps. 68:20), *môšîa* ‘*H4635* ("savior"), and *tĕšû*‘*â H9591* ("deliverance, victory"). An understanding of this OT word group is imperative to appreciate what is implied in Matthew's statement concerning the meaning of the name JESUS (Matt. 1:21; from *yĕhôšua* ‘*H3397*, "Yahweh is salvation"). The usage of these terms discloses the following important concepts as integral to the overall meaning of salvation (see further *NIDOTTE*, 2:556 – 62).

(1) In the majority of OT references salvation is seen to be the work of a sovereign God (Isa. 43:11). It is Yahweh who saves his people from Egypt (Ps. 106:7 – 10); from Babylon (Jer. 30:10); from trouble (Jer. 14:8). See also 2 Sam. 22:3; Isa. 43:3; Ezek. 34:22; Hos. 1:7; 13:10 – 14 et al.

(2) Salvation is accomplished in history. The first occurrence of the verb with reference to God is found in Exod. 14:30, which summarizes Israel's deliverance from Egyptian bondage: "That day the LORD saved Israel from the hands of the Egyptians." This national deliverance made the deepest impression on the Hebrew mind, an impression which was to be maintained by the annual PASSOVER feast (Deut. 16:1). This deliverance of Israel from Egypt is the supreme OT sign of Yahweh's saving grace. It pointed beyond itself to that central saving event of history, the coming of JESUS CHRIST. It is most significant that Luke describes the decisive victory of Christ over SATAN in terms of a new exodus (Lk. 9:31, where the word "departure" translates Gk. *exodos G2016*).

(3) Salvation is deliverance from enemies. Among these enemies were death and its fear (Pss. 6:4 – 5; 107:13 – 14); the lion's mouth (Ps. 22:21); the battlefield (Deut. 20:4); the wicked (Ps. 59:2); sickness (Isa. 38:21); trouble (Jer. 30:7); and sins (Ps. 51:14; 130:8; Ezek. 36:29). In OT times God was conceived to be the Savior from all foes, both spiritual and physical.

(4) Salvation is deliverance to the Lord. Yahweh not only delivered his people from that which would destroy them but he also brought them to himself. His salvation was not merely a rescue from a dangerous situation but it was also a rescue for a special purpose: that those rescued should worship, praise, and glorify him through lives dedicated to obeying him in all of life (1 Chr. 16:23; Isa. 43:11 – 12; 49:6 – 7; Zech. 8:13). A unique feature of the OT concept of salvation, as compared to the pagan religions of that time, is the fact that it was understood as the prerequisite, rather than simply the goal, of obedience. The order is well expressed by the psalmist, "I cry to you; save me, / that I may observe your decrees" (Ps. 119:146 NRSV). The entire Bible makes it very clear that the imperative of *do* for sinners is based upon the indicative of *done* by God.

(5) Salvation is appropriated solely by FAITH in God apart from any reliance upon supposed merit or human effort. This was true salvation both on a national and individual scale (Pss. 44:3; 55:16; 86:2; 138:7 et al.).

The Greek noun *sōtēria G5401* is used frequently in the LXX as the equivalent of *yĕšû῾â*, denoting the saving power of God in the crises of history nationally and in the people of God individually. This saving grace is further seen not to be confined to this age but also to anticipate the future, and it causes those who have experienced it to rejoice and glorify their Creator. In the NT this Greek word can be used of deliverance from enemies (Lk. 1:69, 71; Acts 7:25; Jude 25) and of bodily health and safety (Acts 27:20, 34; Heb. 11:7), but the distinctive use is in respect to spiritual deliverance. Several important ideas emerge in this sphere (see further *NIDNTT*, 3:205 – 23).

Michelangelo's famous *Pietà*; this marble sculpture at St. Peter's Church in Rome depicts Mary holding Jesus after the

(1) The whole initiative of salvation is with God. "For God did not appoint us to suffer wrath but to receive salvation through our Lord Jesus Christ" (1 Thess. 5:9; see also Jn. 3:16 – 17; 2 Thess. 2:13; 1 Tim. 1:15; 2 Tim. 1:9; Tit. 3:5; Rev. 7:10; 19:1).

(2) Jesus is the center of God's saving work; in no one else is there salvation (Acts 4:12; Heb. 2:10; 5:9). Without him and his work there is no *sōtēria*.

(3) Salvation in the NT sense of spiritual deliverance means a total salvation. God saves the sinner body and soul. Specifically, it includes salvation from physical illness (Matt. 9:21; Lk. 8:36), from lostness (Matt. 18:11; Lk. 19:10), from sin (Matt. 1:21), from wrath (Rom. 5:9).

(4) Salvation is eschatological. Although Christians begin to enjoy their salvation here and now, there is yet a time coming when they will realize it in all its fullness. That time will be at the SECOND COMING of Christ, a day when he will be enthroned as King of all the world (Rom. 13:11; 1 Cor. 5:5; 2 Tim. 4:18; Heb. 9:28; 1 Pet. 1:5; Rev. 12:10).

In summary, *sōtēria* is the rescue of fallen men and women through Christ from all that would ruin their soul in this life and in the life to come.

B. Biblical categories

1. General obedience. The concept of obedience is used of Christ with sufficient impact in the NT to be taken as a comprehensive characterization of his redeeming work (see OBEDIENCE OF CHRIST). Paul writes, "For just as through the disobedience of the one man the many were made sinners, so also through the obedience of the one man the many will be made righteous" (Rom. 5:19). Again, writing of Christ, he states, "And being found in appearance as a man, / he humbled himself / and became obedient to death—/ even death on a cross!" (Phil. 2:8). The writer of the epistle to the Hebrews states, "Although he was a son, he learned obedience from what he suffered" (Heb. 5:8). Christ redeemed us by rendering a perfect obedience to the will of his Father. This he did by obeying all the demands of the law (moral, ceremonial, and civil) and by suffering its penal sanctions.

2. Specific. The NT employs four terms which when taken together give a most comprehensive portrayal of the saving work of the Triune God: SACRIFICE views salvation as the answer to the sinner's guilt; PROPITIATION views it as the answer to God's righteous wrath; RECONCILIATION refers to the removal of the ground of God's alienation from fallen human beings; and REDEMPTION speaks of a release from bondage to sin.

(1) *Sacrifice.* The Greek word *thysia G2602*, used almost thirty times in the NT, is squarely rooted in the OT. The most frequent single occurrence of the term in the NT is found in the book of Hebrews. The primary though not exclusive meaning of the term in Scripture is that of an expiation of guilt, that is, ATONEMENT. (See esp. Heb. 5:1; 7:27; 8:3; 9:9, 23, 26; 10:1, 5, 8, 11, 12, 26; 11:4; 13:15 – 16.)

(2) *Propitiation.* This English term is used three times by the KJV: in one instance it renders Greek *hilastērion G2663* (Rom. 3:25 [NIV and NRSV, "sacrifice of atonement"]; the Gk. word also occurs in Heb. 9:5 with reference to the MERCY SEAT), and in the other two it translates *hilasmos G2662* (1 Jn. 2:2; 4:10 [NIV and NRSV, "atoning sacrifice"]). The RSV has rendered all three texts with the word EXPIATION, which has a more restrictive meaning. It would appear that behind the use of the Greek terms there is the twofold sense of propitiation and expiation. The particular stress of the

word is probably best taken as indicating God's diverting of his righteous WRATH from the sinner through the atoning work of his Son. Propitiation does not imply that the Son had to win over an incensed Father to an expression of love toward us; rather, it was precisely because of his eternal love that the Father sent his Son to be the propitiation for our sins.

(3) *Reconciliation.* The Greek verb *katallassō G2904* and its cognates (noun *katallagē G2903* and compound verb *apokatallassō G639*) are used in several Pauline passages (Rom. 5:10 – 11; 11:15; 1 Cor. 7:11 [of marriage]; 2 Cor. 5:18 – 20; Eph. 2:16; Col. 1:20 – 22). Reconciliation was a work of God in Christ whereby he removed the ground of his holy alienation toward sinners and thus did not impute their sins against them. The subjective change of the sinner's attitude toward God is a result of the historical event of the cross, the objective work of reconciliation accomplished by Christ.

(4) *Redemption.* This term (Gk. verb *lytroō G3390* and various cognates; also *agorazō G60*) speaks the language of purchase and ransom. Redemption is the securing of a release by the payment of a price. In the theological sense, redemption means the release from sin through the shed blood of Christ. Redemption from sin embraces the several aspects from which sin is to be viewed scripturally: (1) redemption from its guilt (Rom. 3:24); (2) redemption from its power (Tit. 2:14); (3) redemption from its presence (Rom. 8:23).

C. The necessity of the atonement. There are two major views reflected in the historical development of theological thought. The hypothetical view maintains that God could have saved sinners without atonement. Other means were open to an all-powerful God, but he chose this means as the best for the accomplishment of his purpose. Two outstanding exponents of this view were Augustine and Aquinas. The second view holds to "consequent absolute necessity": God did not have to save anyone, but consequent upon the fact that he determined to do so, he had to do it by means of atonement. Prominent theologians holding this position include G. Smeaton, A. A. Hodges, and L. Berkhof.

D. Theories of the atonement

1. The ransom theory. This view goes back to the 3rd-cent. theologian ORIGEN. Sometimes termed the military theory, it argues that Christ paid a ransom to Satan for the deliverance of those who were his rightful captives. This position has been called the patristic theory inasmuch as it was held in one form or another by a number of the early church fathers.

2. The satisfaction theory. First formulated by Anselm (1033 – 1109), this view maintains that Christ's death provided full satisfaction for our sins and that his merit was more than equal to any obligation the sinner could possibly incur toward God. Christ's death was centrally conceived of as his voluntary discharge of the sinner's obligation to God.

3. The moral influence theory. Abelard (1079 – 1142) argued that the life and death of Christ was the supreme revelation of God's love calculated to awaken in the sinner a reciprocal love and gratitude. The response of love is then taken to be the basis of both justification and the forgiveness of sin.

4. The example theory. According to Socinus (1539 – 1604), Christ's death effected reconciliation

by affording motives and encouragement to the sinner to repent and believe. Christ's power to save is based on the import of his teaching and the influence of his example. Christ's death was simply that of a noble martyr.

Agora (market place) at Perga. One of the Greek words used for "redeem" is *agorazō*, based on the imagery of purchase at the market place.

5. The governmental theory. Grotius (1583 – 1645) proposed that Christ's death is an exhibition of divine regard for the law, though he did not suffer its precise penalty; God graciously accepted his suffering as a substitute for the penalty. The atonement is viewed as a satisfaction, not to any internal principle of the divine nature, but to the necessities of government.

6. The dramatic theory. Gustaf Aulén (1879 – 1977) maintained that the essence of Christ's work is to be seen in terms of liberation from the tyrants of sin, death, wrath, and the devil. Aulén argued that this was the view of the early fathers, subsequently lost by Anselm and medieval scholasticism but recaptured by Martin Luther.

7. The penal substitution theory. This view, represented for example by John Calvin (1509 – 64), maintains that Christ's death must be seen centrally in forensic terms: Christ suffered the penalty of sin as a substitute for the sinner. Penal substitution is central to the biblical teaching of atonement (Isa. 53:5 – 6; Rom. 5:6).

All the theories defined above have elements of truth, but none of them taken by itself provides a totally adequate explanation of the atonement. Christ by his death did make full satisfaction for our sins; he did by his death seek to evoke the love and gratitude of the believer, but not as a basis of acceptance before God. He did provide an example for believers to follow (Matt. 16:24; 1 Pet. 2:21 – 23). Most significantly however, he provided a substitute for us.

E. The extent of the atonement. The extent of the atonement is a matter about which there has been

much controversy. There are three major views within what may be loosely called Protestantism.

1. Unrestricted universalism. This is the view that God purposed to save all (including angels, according to some who hold this view) by means of the death of Christ, and that in consequence all will be saved eventually, whether in this life or the afterlife. This position is reflected in ecumenical theology, but there is also an evangelical type of universalism.

2. Qualified universalism. According to this view, God planned to save all by the atonement, but all will not be saved because ultimately many fail to believe. This view is held mainly by Arminians.

3. Particularism. This view maintains that God purposed by the atonement to save only the elect and that in consequence only they are saved. Held by consistent Calvinists, this doctrine is often referred to as "limited atonement," but it is more correctly termed "particular redemption."

The specific issue of extent revolves around the question of the design or intent of the redeeming work of Christ, not that of its value. In *The Canons of the Synod of Dort* we read with respect to value: "The death of the Son of God is the only and most perfect sacrifice and satisfaction for sin; is of infinite worth and value, abundantly sufficient to expiate the sins of the whole world." With respect to intent the *Canons* state: "For this was the sovereign counsel and most gracious will and purpose of God the Father, that the quickening and saving efficacy of the most precious death of his Son should extend to all the elect."

III. The accomplishment of salvation

A. The divine elective purpose. Its basis of salvation is seen in God's eternal counsel—his elective purpose. There are three major views to be noted in respect to the doctrine of ELECTION.

1. The Arminian view. This view maintains that God elects on the basis of foreseen faith. According to Arminius (1560 – 1609), "This decree has its foundation in the foreknowledge of God, by which he knew from all eternity those individuals who *would,* through his preventing grace, *believe*, and, through his subsequent grace *would persevere*, according to the before described administration of those means which are suitable and proper for conversion and faith; and by which foreknowledge, he likewise knew those who *would not believe and persevere"* (*The Works of James Arminius*, 3 vols. [1872 – 75], 1:247).

Appeal for this position is made to such passages as Rom. 8:29 – 30 and 1 Pet. 1:1 – 2. It is further understood that God graciously grants to all people sufficient ability to accept Christ. In Arminian theology this is known as the doctrine of prevenient grace.

2. The Barthian view. According to this view election is, primarily, the election of Jesus Christ; secondly, the election of the community; and thirdly, the election of the individual. The first of these ideas is most important in Barth's development of the doctrine. Reconciliation in Christ can be understood only in terms of the mystery of God's decisive word of election in Christ, a word that respects *all* people. The miracle of God's electing grace is discovered in the fact that Jesus Christ is *at the same time* the electing God and the elect man. While it is necessary to speak of a double predestination, this may be done only in terms of the cross. All people are both reprobate and elect in Christ. There is no question here of a distribution of election and reprobation over such and such

individuals, as in the historic Reformed position, but only of double predestination in and concerning Christ.

According to Karl Barth's doctrine of salvation, election is primarily the election of Jesus Christ.

Barth's radical revision of the Reformation view of election inevitably raises the question of whether his position requires as a logical corollary the acceptance of universalism. Although Barth replies with an emphatic negative, many of his critics cannot accept such an answer. G. C. Berkouwer states, "There is no alternative to concluding that Barth's refusal to accept the apokatastasis (universalism) cannot be harmonized with the fundamental structure of his doctrine of election" (*The Triumph of Grace in the Theology of Karl Barth* [1956], 116).

3. The Calvinistic view. Calvinism maintains that God elects unconditionally; that is, there is nothing in the creature which conditions his choice of some and passing over of others. The moving cause is in the sovereign will of God alone (Eph. 1:4 – 5). According to this view, election is that eternal act of God whereby he chooses a certain number of people to be the recipients of saving grace according to his sovereign good pleasure, apart from any merit in the creature actual or foreseen.

Those who adopt this position appeal to such passages as Eph. 1:4 – 5 and Rom. 8:28 – 30. In the former passage the phrase "according to the kind intention of his will" (NASB) is said to establish the unconditional character of election. In the latter passage the verb *foreknow* is taken to

mean "set regard upon beforehand," implying, "know from eternity with sovereign distinguishing affection and delight," hence, "whom he foreloved."

In summary, it may be fairly stated that whatever view one may adopt concerning election, the fact of it must be seen as the biblical basis upon which God's redemptive work was accomplished. What God determined in his eternal counsel he then had to accomplish in history.

B. Christ's redemptive work. The execution of salvation is seen in Christ's redemptive work in history. This is an area of major dispute in present theological discussion. Two major views seem to emerge from all the controversy.

1. The existential school. According to Rudolf Bultmann, the essence of the Christian message as set forth in the NT is that of *a call to decision*—a response that brings with it a new understanding of oneself, a sense of authentic existence. Bultmann almost entirely divorces the question of existence in the NT from that of salvation history. Regarding the historical Jesus, Bultmann states, "I do indeed think that we can now know almost nothing concerning the life and personality of Christ" (*Jesus and the Word* [1834], 8). Bultmann maintains that we can preach the Christ of faith without the Jesus of history. His view can be called an existentialistic approach to the biblical message developed in the context of a historical skepticism.

Bultmann belongs to the radical-critical school of German biblical criticism. Following a "form historical" method (see FORM CRITICISM), he views Jesus as only a man whom the later faith of the church deified. He acknowledges that the Gospels relate to the history of Jesus from a supernatural perspective which at the same time bears the character of preaching, but he argues that this preaching does not give us a trustworthy account of what occurred; it represents only the faith of the later church. Herman Ridderbos states, "The gospels, according to Bultmann, are not concerned with Jesus but with the faith and the preaching of the church with respect to Jesus. And what interests him as an historian is the question: How did this preaching acquire this form? or in other words: Along what way or in what manner has this preaching grown up or developed into our gospel accounts?" (*Bultmann* [1960], 12).

2. The historical school. According to Oscar Cullmann, the essence of the Christian message is both salvation history (*Heilsgeschichte*) and Christian existence. The essential feature of Christianity which distinguishes it from other religions is the fact of the central divine act in history of the death and resurrection of Jesus Christ. Only in Judaism is the historical of equally fundamental importance. The focal point of Christianity is not metaphysics but history. Redemption is something accomplished by God through Christ in time.

Cullmann states, "Redemptive history is the heart of all theology which is based upon the Bible. It represents an essential aspect of all theology. It is the perspective from which the very objects of all Christian theology, God and Christ, are seen. Obviously the objects of theology are God and Christ, but the perspective from which they are viewed is not that of metaphysical or existentialist speculation, but rather that of redemptive history" (*Soli Deo Gloria: New Testament Studies in Honor of William Childs Robinson*, ed. J. McDowell Richards [1968], 13).

In ancient times redemptive history was challenged in the name of a metaphysical philosophy (GNOSTICISM); more recently it is being challenged in the name of an existential position (modern philosophy). But now as then, Christianity proves to be invulnerable to all such attempts to destroy it. As Scripture makes clear, the very *essence* of Christianity is redemptive *history*. Bultmann's

dehistorization of the NT in terms of the extended approach of Heidegger spells a tragic departure from historic Christianity. Theology is thereby reduced to anthropology and another gospel is preached.

One further word should be given to differentiate between those of the *Heilsgeschichte* position and those of a more traditionally conservative position. While both schools would agree as to the historical objectivity and divine meaning of God's redemptive work, they would not agree as to the basis on which these biblical events are to be interpreted. Those of the *Heilsgeschichte* school would tend to look to some suprarational existential experience to discern it, whereas those of the more conservative school would tend to look to the divinely inspired record of Scripture as ultimately definitive of its meaning.

IV. The application of salvation

A. Ordo salutis. The Latin phrase *ordo salutis* (lit., "the way of salvation") refers to the process whereby the work of salvation, accomplished in Christ, is subjectively realized in the hearts of sinners. The emphasis is not on what a person does in appropriating the grace of God, but on what God does in applying it. Though this is a unitary process, when one examines the biblical data it becomes evident that various movements can be distinguished in the process, movements that are to be understood in terms of logical order rather than temporal sequence.

One important question that arises in a discussion of an *ordo salutis* is, Does the Bible supply information sufficient for the construction of a single fixed order? A study of Scripture appears to lead to a negative answer. It would seem, however, to allow for the legitimacy of constructing a flexible *ordo salutis* for dogmatic or systematic reasons. In fact, more positively, it may be stated that we gain definite guidance for our arrangement of topics from the Scripture themselves, though we must use great caution.

Paul in Rom. 8:28 – 30 gives us a strong indication for a broad *ordo salutis.* In this passage certain intimations of a logical sequence are readily discovered: (1) God's purpose is prior to his calling, v. 28; (2) the progression of thought in v. 29 is foreknowledge, then predestination; (3) vv. 29 – 30 make clear that we cannot reverse foreknowledge and glorification—foreknowledge is the ultimate cause and glorification the ultimate end; (4) similarly, foreknowledge and predestination are prior to calling, justification, and glorification—the reverse is inconceivable; (5) finally, glorification cannot be prior to calling and justification. But even in this passage the order is far from complete. There is no mention of regeneration, conversion, adoption, perseverance, sanctification, etc.

B. Calling. According to Rom. 8:30, *calling* would seem to be the initial saving act of God. The scriptural doctrine of redemptive calling is twofold in aspect.

1. The general call. This is a CALL that comes through the preaching of the gospel, inviting sinners to salvation in Christ. It is a call that issues forth from the KERYGMA (the apostolic message concerning Christ). This message is not to be optionally related but authoritatively proclaimed. It contains three essential elements that respectively answer the questions "what?" "why?" and "so what?": (1) historical fact—the death, burial, and resurrection of Christ; (2) theological interpretation—"for our sins"; (3) ethical demand—believe and repent!

This general call given by the prophets under the OT, by John the Baptist, Christ himself, and the

apostles, and by all succeeding ministers in all ages, is a call that is frequently rejected (Matt. 22:14; 23:37). Indeed, it is always insufficient of itself to lead to real conversion. It must be accompanied by the powerful grace of God. Unless through the Spirit the arm of the Lord is revealed, the proclamation of the gospel will not be believed, nor the call of it responded to in faith.

2. The effectual call. This is a *creative* call that accompanies the external proclamation of the gospel, bringing the hearer to the divinely intended response of faith and repentance. The effectual call is efficacious; that is, it always results in salvation. In the NT the terms for calling, when used soteriologically, are almost always applied not to the general call of the gospel, but to the call that actually brings sinners into a state of salvation, that is, the effectual call (cf. Rom. 8:30; 1 Cor. 1:9, 26; 2 Pet. 1:10 et al.).

The NT reveals a number of things about this call. It is immutable (2 Tim. 1:9); it is issued by the Father (Rom. 8:30; 1 Cor. 1:9; Gal. 1:15; Eph. 1:17 – 18; 2 Tim. 1:9 et al.); it is based on the eternal purpose of God (2 Tim. 1:9); it is accomplished through the communication of the Word (2 Thess. 2:14); it brings us into fellowship with Christ (1 Cor. 1:9); it brings us into freedom (Gal. 5:13); it brings us into peace (1 Cor. 7:15).

As the gospel is proclaimed, the general call goes forth like sheet lightning, but God in accordance with his sovereign purpose causes it to strike like a forked flash in the lives of some. Such are those who have been effectually called out of the gross darkness of their sins into the glorious light of the Son of righteousness (1 Pet. 2:9). Indeed, salvation is of Yahweh.

C. Regeneration. It is God the Father who calls his own out of the kingdom of darkness into the kingdom of light, but the sinners must do the coming. And yet, how can they? Are they not dead in trespasses and sin? The spiritual dilemma of the minister is analogous to the utter futility of a doctor's efforts to revive the lifeless body of a patient. Whether we preach the terrors of hell or the blessings of heaven, whether we proclaim the law or the gospel, there can be no response apart from a miracle of grace. But it is the glory of God's sovereign grace that it overcomes this dilemma. God's call, when it is effectual, carries with it the operative grace necessary to secure a response of faith in Christ. This grace is the grace of REGENERATION or quickening. In the Calvinistic tradition this grace of regeneration is bestowed only on the elect, but in the Arminian tradition all people are given ability to respond either in faith or disbelief to the call of the gospel. The Arminian position is based on the doctrine of prevenient grace.

The Greek noun *palingenesia G4098* is found only twice in Scripture. In Matt. 19:28 it is used eschatologically to denote the renewal of the world prior to the coming of the kingdom; and in Tit. 3:5 it is used soteriologically, perhaps denoting BAPTISM as the sign and seal of regeneration. The reality of the latter, however, is referred to in a number of words and images. Perhaps the best known figure is that of new birth. Jesus said to NICODEMUS, "I tell you the truth, no one can see the kingdom of God unless he is born again" (Jn. 3:3). The Greek word for "again" (*anōthen G540*) can also mean "from above" (cf. 3:31; 19:11 et al.). In either case the language presupposes a first birth to which regeneration is the second. Note the following contrasts between the two. The first birth is of sinful parents, the second of God; the first is of corruptible seed, the second of incorruptible seed; the first is of the flesh or carnal, the second of the Spirit or spiritual; the first marks one as Satan's slave, the second as Christ's free person; in the first, the sinner is viewed as an object of divine wrath, in the second as an object of divine love.

In Jn. 3 one reads of the meeting of Nicodemus with Jesus. Nicodemus was a leader in the

orthodox religious party of his day, undoubtedly a member of the SANHEDRIN, but he was unregenerate. On this occasion he desired to see Jesus in order to discover the secret of entry into the KINGDOM OF GOD (the redemptive rule of God through Christ). But even before he had opportunity to express what was in his mind, Jesus provided the answer to his question: a person may not so much as see the kingdom unless he is born again. It is divinely necessary that one be sovereignly regenerated by the Spirit of God.

A difficult problem emerges from Jn. 3:5 respecting the meaning of the word *water*. There are four major views usually set forth. First, some maintain that the water is that of John's baptism and that it is therefore symbolic of repentance. From the standpoint of historical context, this view would seem to commend itself. Second, some maintain that since water according to Jewish usage could denote the male semen, it might be symbolic of birth. If one adopts this view, it would seem more likely to suggest spiritual than natural birth. It seems unlikely that Jesus would have insulted the intelligence of Nicodemus by telling him that unless he was born physically he could not be born spiritually. Third, some maintain that the water is that of Christian baptism. The meaning would then be that a person must be baptized and also be born of the Spirit if he is to enter the kingdom. But this view seems most untenable, for Nicodemus would have understood this figure against the OT background rather than in terms of Christian baptism. Fourth, some maintain that water is a symbol for the Word of God (cf. Eph. 5:26). The weakness in this view is that it involves an interpolation of Paul's usage of this figure into Christ's conversation with one who is filled with OT concepts, not Pauline ones.

In connection with this problem, it seems more profitable to consider the OT parallel in Ezek. 36:25 – 26. This passage would suggest that *water* is symbolic of purification and *Spirit* of renovation. Other phrases descriptive of the concept of regeneration include: "renewal by the Holy Spirit" (Tit. 3:5), "a new creation" (2 Cor. 5:17), "the new self" (Eph. 4:24). Those who are regenerated are referred to as "newborn babies" (1 Pet. 2:2). Regeneration is also indicated by the phrase "make alive" (Eph. 2:5; cf. Jn. 6:63; Rom. 8:1 – 10).

In the most definitive sense, regeneration denotes that act of God whereby spiritually dead sinners are made alive through the HOLY SPIRIT. By this act God plants a new spiritual life in the soul; one is born again from above. Regeneration in this restricted sense is solely a work of God. Hence when Christ says to Nicodemus, "You must be born again" (Jn. 3:7), these words speak not of a moral obligation (we cannot beget ourselves) but of a divine necessity. Regeneration is a passive work; a sinner can no more contribute to his spiritual conception than an infant can to his natural conception. The very nature of the work clearly shows that it is not in the power of human beings to do it; it is represented in Scripture as a *creation*, a *new* creation, and only God can truly create (1:13).

Regeneration is an instantaneous work of the Spirit; it is not like progressive sanctification. As an infant is generated at once and not by degrees, so it is in spiritual generation. One does not gradually become alive. No person can be said to be more regenerated than another, though of course once regenerated one may be said to be more sanctified than another. This work of regeneration is a mysterious work as Christ indicates in his words to Nicodemus. This work of the Spirit is like the wind: "you cannot tell where it comes from or where it is going" (Jn. 3:8).

D. Conversion. It may be noted that both the Hebrew and Greek terms for CONVERSION mean basically "to turn" and, in the religious sense, denote a change of outlook and a new direction in life and action. Conversion involves a turn both toward and away from something or someone. Positively,

the turn toward something or someone is what may be appropriately called FAITH. In the religious sphere it is a turn *toward* God (Acts 26:20; cf. 9:35; 11:21; 15:19; 1 Pet. 2:25).

This turn, or act of faith, may be defined as an understanding of and mental assent to certain basic facts concerning the person and work of Christ (1 Cor. 3:14 – 15) culminating in a committal of one's entire being to the person of whom those facts testify. Three important elements are to be noted in this definition.

(1) *Knowledge.* The first indispensable element in saving faith is information. We must know who Christ is, what he has done, and what he is able to do. We are not called to put faith in someone of whom we have no knowledge. In order to exercise faith we must know about the death, burial, and resurrection of Jesus Christ. Without such knowledge, faith would be but a foolish leap in the dark.

(2) *Assent.* The second element is that of conviction concerning the truthfulness of that which is known. It is possible, of course, to understand the import of certain propositions of truth and yet not believe these propositions. In saving faith, truths known are also accepted as true.

(3) *Trust.* The third element is that of commitment. Knowledge of the truth of the gospel and assent to it do not constitute saving faith. These must be accompanied by trust in the person of Jesus Christ himself. Christian faith is not merely intellectual assent to the divinely revealed truths of Scripture; it must include personal encounter with Christ, the One in whom all truth is summed up.

Negatively, turning away from something or someone is what may be called REPENTANCE. The biblical term for repentance indicates a change of mind and conduct. It properly denotes a change for the better, a change of mind that is productive of good works. Repentance is the gift of God, the purchase of Christ, and the work of the Holy Spirit (Acts 11:18). It is produced by the Spirit at regeneration or quickening. Moreover, the Scriptures teach that there is not only a necessity for an initial conversion of the sinner, but also subsequent conversions of erring saints (it is the latter which is prob. stressed in Ps. 119:59 – 60). Repentance is a turning from idols (1 Thess. 1:9), from vain things (Acts 14:15), from darkness (26:18a), and from the power of Satan (26:18b). It is a turn from transgression (Isa. 59:20).

As for the means of conversion, Scripture clearly teaches that the *efficient* cause is God, not the sinner. The drastic change wrought by conversion is not in our power to effect. An Ethiopian might just as well try to change his skin or a leopard his spots (Jer. 13:23; cf. Jn. 1:13; Rom. 9:16).

The *instrumental* cause of conversion is the ministry of the Word: "faith comes from hearing the message, and the message is heard through the word of Christ" (Rom. 10:17). And yet, even the preaching of the Word is not sufficient of itself to produce the response of conversion. It is obvious that sinners may hear and yet not turn. To be effective, the proclamation must be accompanied by the power and demonstration of the Spirit (1 Cor. 2:1 – 5). Certain cases of conversion in the NT should be carefully studied: the Philippian jailer (Acts 16:19 – 34); the dying malefactor (Lk. 23:32 – 43); Paul (Acts 9:1 – 22); the Ethiopian treasurer (8:26 – 40); Cornelius (ch. 10); Lydia (16:13 – 15); Timothy (2 Tim. 3:14 – 15); conversions at Pentecost (Acts 2).

E. Justification. In a fundamental sense, JUSTIFICATION is concerned not with our spiritual *condition* but with our spiritual *relation*; it is not a matter of our actual *state* but of our judicial *position*. Justification is the answer to the disrupted relationship between creatures and their God brought about through sin. As the result of sin all people stand before God as guilty, condemned and separated from their Creator. Justification is the restoration of mankind to its original relation to God through the work of Christ. Significantly it includes, according to Paul, removal of guilt by the IMPUTATION of Christ's righteousness (Rom. 8:33), removal of condemnation by the gift of forgiveness (v. 34), and

removal of separation by the restoration to fellowship (v. 35).

Justification must be seen from a twofold perspective, actual and declarative. Actual justification means that sinners are *constituted* righteous by having Christ's RIGHTEOUSNESS imputed to them. Only in this way may a just God justify the ungodly. Declarative justification means that the one who has been *constituted* righteous in Christ is also judged righteous before him. Justification is a forensic or legal term, and it should be carefully distinguished in meaning from sanctification, which is experiential and progressive. The distinction between the two concepts may be stated as follows: Justification has to do with Christ *for* us, sanctification with Christ *in* us. Justification has to do with our position; sanctification, with fellowship. Justification has to do with our acceptance; sanctification with our attainment.

The foundation of justification is God's grace, not human works. Paul emphasizes that a person is justified by faith apart from the works of the law (Rom. 3:28). The apostle is concerned to make unmistakably clear that God has accomplished in Christ what sinners are completely unable to do for themselves. What God has done for the sinner in Christ is totally unmerited, unprompted, and unsought. This is the essence of grace (3:24). Our justification depends wholly on God and not on anything in us.

Long ago JOB asked, "How can a mortal be righteous before God?" (Job 9:2). This most important question raises the matter of method. The only satisfactory answer is found in the Word of God. The justification of the sinner is pronounced in the word of the gospel. As near as the word of faith is to us, just so near is the word of God's acquittal. The merit of our Lord becomes ours "through faith" (Eph. 2:18; cf. Rom. 3:21 – 22).

It is imperative to understand that faith is never the ground of justification, but only its means or channel; it is the hand which simply reaches out to accept the gift. The NT consistently uses the phrase "through [*or* by] faith." No Greek preposition is ever employed with such grammatical case of the noun *faith* as to require a translation like "because of" or "by reason of" faith. Faith is never portrayed as meritorious; it is always and only instrumental. Faith is our positive answer to God's justifying grace; it is the correlative of promise.

When we consider the value of justification, certain things become immediately clear from the NT. Justification provides the ground of PEACE with God (Rom. 5:1). When we stand before God as righteous in Christ, we may experience the peace of God in our lives and share this with others. It is also the basis for LIBERTY in Christ. This means freedom from bondage to sin and freedom to serve others. When we are released from anxiety about ourselves, we are able to use our lives for others. It also means freedom to enjoy all the good things of life within the context of genuine love for others (Rom. 14).

F. Adoption. The sonship referred to under this category is not to be confused with that which Christ sustains to the Father as the only Son. Nor is it to be equated with the relationship which all human beings sustain to God as his children by creation (Acts 17:25 – 29; Heb. 12:9; Jas. 1:18; Mal. 2:10; see FATHERHOOD OF GOD).

The doctrine of ADOPTION is exclusively Pauline. The Greek word *huiothesia G5625* occurs only five times in Paul's letters. Once it is applied to Israel as a nation (Rom. 9:4); once to its full realization at the PAROUSIA (8:23); and three times as a present reality in the life of the Christian (Rom. 8:15 – 16; Gal. 4:5; Eph. 1:5).

In Rom. 8:15 it is probably best to understand the Spirit of adoption as the Holy Spirit (note the parallelism with Gal. 4:6 as an argument for this view). The Holy Spirit is not the one who adopts;

this is more especially said to be the work of the Father—but the Spirit is the one through whom the child of God is able to cry ABBA ("Father") and exercise the rights and privileges of God's child. In Gal. 4:5 Paul indicates that God's purpose is twofold: redemption and adoption. God purposed not simply to release slaves but to make sons. In Eph. 1:5 Paul states that God "predestined us" (marked us out in advance) as those who were to receive the honored status of sons.

There has been much discussion as to whether the root of Paul's use of the term *adoption* is Jewish, Greek, Roman, or some other tradition. Many recent scholars favor a Greco-Roman background (but see *DPL*, 15 – 18). In the act of adoption a child was taken by a man from a family not his own, introduced into a new family, and regarded as a true son, entitled to all the privileges and responsibilities belonging to this relation.

The reality of spiritual adoption may be outlined as follows: (1) Fallen sinners are strangers to the family of God; as enemies of God their father is the devil (Jn. 8:44). (2) Yet despite this fact they are invited to enter God's family; to take his name upon them; to share in his fatherly care and discipline. (3) Such as accept this invitation are received into his family and protection. From this point they are called the children of God and are privileged to address him as Father. God as the heavenly Father of believers provides care (Lk. 11:11 – 13), sustenance (Ps. 23:1), protection (Ps. 114:1 – 2), instruction (through his word and by his providence), correction (Heb. 12:7; cf. 5 – 11), and an inheritance (Rom. 8:17).

G. Sanctification. When we are converted to God, we must ask how our new life is to be lived out here on earth. When such a question is faced, the subject of biblical ETHICS becomes an important aspect of the doctrine of SANCTIFICATION; the one cannot be properly considered without the other. Sanctification has to do with the progressive outworking of the new life implanted by the Spirit in regeneration. Christian ethics has to do with the study of the basis upon which, the power whereby, and the goal toward which the believer's life is lived.

The indicative of justification leads to the imperative of sanctification; justification is the theological base of an evangelical ethic. The gift of God in Christ impels to a recognition of our task for him. In the Pauline writings, expositions of the doctrine of justification are generally followed by exhortations to duty. It is not good works that make a good person; rather, it is a good person who does good works.

The distinctive feature of a Christian ethic is found in the matter of motivation. As our Lord made clear in the SERMON ON THE MOUNT (Matt. 5:7), more important than *what* one does is *why* one does it. Goodness is not merely a matter of outward action, but more fundamentally of inward attitude. Jesus interiorizes the moral law. Note for example Matt. 5:21 – 22, "You have heard that it was said to the people long ago, 'Do not murder, and anyone who murders will be subject to judgment.' But I tell you that anyone who is angry with his brother will be subject to judgment." Sanctification and ethics have to do fundamentally with what we are and only secondarily with what we do.

The basic meaning of *holy* is usually thought to be "separated, set apart" (see HOLINESS). God is holy as separate from his creatures, but also as separate from sin. It is this latter ethical aspect of God's holiness that provides the basis for our understanding of the doctrine of sanctification; and yet, sanctification is not only a separation *from* that which is sinful but also a separation *unto* a reflection of the IMAGE OF GOD. Sanctification is the progressive refashioning of our natures by the Holy Spirit, into the image of God, through Jesus Christ (see 2 Cor. 5:17).

The sanctified are the elect of God. All whom the Father chose in eternity, he sanctifies in time

in Christ. The subjects of election, redemption, and sanctification are the same persons (Rom. 8:28 – 30). Sanctification involves the totality of the believer's being—BODY, SOUL, SPIRIT (1 Thess. 5:23). In respect to the soul and/or spirit, Paul indicates that (1) the understanding is enlightened (Eph. 4:23), (2) the will is subservient to the will of God (Phil. 2:13), (3) the affections are made holy (Rom. 12:10). In respect to the body and all its members, the apostle exhorts believers to offer themselves "to God as those who have been brought from death to life; and offer the parts of your body to him as instruments of righteousness" (Rom. 6:13).

Sanctification involves the believer's being *positionally* set apart unto God by virtue of his new life in Christ. This is not a matter of the degree of one's spirituality. Concerning the carnal Christians at CORINTH, Paul wrote, "But you were washed, you were sanctified, you were justified in the name of the Lord Jesus Christ and by the Spirit of our God" (1 Cor. 6:11; the past tense of the Greek verbs points to these acts as already accomplished). This aspect of sanctification coincides with justification.

Sanctification includes the believer being *expe-rientially* set apart to God by reason of the ministry of the indwelling Spirit. This aspect of sanctification is progressive; it admits of degrees. Although no one can be more or less regenerate than another, for one is either dead or alive, one may be more sanctified than another. Scripture frequently exhorts believers to grow in holiness. "But grow in the grace and knowledge of our Lord and Savior Jesus Christ" (2 Pet. 3:18; see 2 Thess. 1:3). The Bible speaks of *growing* in grace, *abounding* in hope and love, and *increasing* in the knowledge of divine things. There would be no reason for such speaking if experiential sanctification were perfected at the moment of regeneration.

Sanctification also involves the believer's being *completely* set apart to God. Ultimately his practice and position will be brought into perfect accord (see Eph. 5:26 – 27; Jude 24, 25). This aspect of sanctification coincides with glorification.

Sanctification is required of every Christian (1 Thess. 4:3). It is not the responsibility of an elite group within the church. There is no scriptural basis for the adoption of a twofold standard of Christian commitment, one for "full-time Christian workers" and another for "Christian laymen." Scripture speaks of *all* believers as SAINTS ("holy ones," 1 Cor. 1:1 – 2).

The ethical standards (principles) for the development of a holy life, a life that increasingly reflects the *imago Dei*, are set forth in Scripture on both a personal and a social level. In Paul's epistle to the Colossians, for example, he deals with personal ethics under the rubrics of "putting off" and "putting on." In chapter 3, the apostle first describes what are the things to be put to death (Col. 3:5, 8 – 9), namely, "sexual immorality, impurity, lust, evil desires and greed, which is idolatry," as well as "anger, rage, malice, slander, and filthy language from your lips." Next he speaks of what is to be put on (vv. 12 – 14), namely, "compassion, kindness, humility, gentleness and patience," being forgiving and above all loving. Then the apostle deals with ethics on a social level, giving instruction concerning wives and husbands (vv. 18 – 19), parents and children (v. 21), and slaves and masters (3:22—4:1). This latter area may find its functional equivalent today in the relationship of employee to employer.

In all the relationships of life, personal and social, Christians are to seek the kingdom of God and his righteousness. The dynamic for the realization of this goal is the Holy Spirit. The motivation is God-given agape LOVE. The guidance is provided by the moral law, to be appropriately applied under the leading of the Holy Spirit in each situation. Since God is holy we are to be also.

H. Perseverance. This is the doctrine that all believers will be preserved by God's grace to the end

through a faith that works. PERSEVERANCE does not mean that everyone who professes faith in Christ, is baptized, and made a member of a church is thereby secure for eternity. Many who profess to have salvation do not possess it. Nor does it mean that it is impossible for a Christian to backslide, that is, to follow a path of disobedience to God for a time (cf. Lk. 2:31 – 34).

The NT would seem to suggest a synthesis between God's preserving grace and the believer's persevering. This is well expressed, for example, by Peter when he says that "through faith [Christians] are shielded by God's power until the coming of the salvation that is ready to be revealed in the last time" (1 Pet. 1:5). There are basically three ideas in this text. First, believers are "shielded." The Greek verb here (*phroureō G5864*, "to guard") is often used in military contexts; it suggests that our life is garrisoned by God, who stands over us as a sentinel all our days. Second, believers are kept "through faith." The final preservation of believers is never divorced from the use of means; believers are preserved through a faith that works. Third, believers are kept "until the coming of…salvation." This undoubtedly refers to the final consummation or ultimate realization of our salvation, which will be revealed in the last time (Rom. 13:11).

In the history of theological thought, there have developed three major views regarding perseverance: the Remonstrant, the Lutheran, and the Calvinist views. The followers of Jacob Arminius, led by Bischop and Grotius, presented to Holland and Friesland in 1610 a series of articles known as the Remonstrance. Among these articles was one which taught that true believers could and often did fall away, completely and finally, from saving faith. Some Lutherans, among whom was Gerhard, maintained that one must differentiate between *total* and *final* falling (cf. Ezek. 18:24). He exegetes 1 Jn. 2:19 as teaching that the elect can fall totally for a time, but does not agree with the Reformed confession of perseverance. Finally, the Reformed view maintains that all true believers are preserved unto the end through a persevering faith. Some of the texts cited in support of this view include Jn. 6:39, 40; 10:27 – 30; 17:11; cf. 11:42; Phil. 1:6; 1 Pet. 5:10; 1 Jn. 3:9; 5:18 et al.

Those who would adopt a Reformed view on this matter must face the problem of biblical warnings. Are we not to take seriously those passages that warn against APOSTASY? Must we not acknowledge the possibility of a real and final falling away from faith? What of all those "if" passages that cannot simply be answered by translating "since"? There are not a few of these (e.g., Jn. 15:6, 10, 14; Col. 1:23; Heb. 3:14; 6:4 – 8). In addition to those passages that speak conditionally, there are a number that warn against apostasy as a real threat (e.g., Heb. 3:12 – 13; 12:25; 1 Tim. 1:19; 2 Tim. 2:18; 2 Pet. 2:1). Actual cases of apostasy include DAVID, SOLOMON, HYMENAEUS, ALEXANDER, PHILETUS, and DEMAS. These and other passages might suggest that the doctrine of perseverance is hopelessly indefensible. Reformed theologians would argue, however, that such conditional warning passages must be related to the *total* context of Scripture. Even if this is done, who is to establish whether the unconditional texts are to be interpreted in terms of the conditional or vice versa? If God's grace, according to Scripture, does not stop short at the limits of human freedom, then faith and grace cannot be viewed synergistically as is done in the Arminian view.

According to Reformed theology, if we properly understand the biblical relationship of faith to grace, then we will realize that our persevering cannot be a factor independent of God's preserving us. God's grace insures our persevering but this does not make it any less *our* persevering (Jude 21, 24). The warning passages are then properly seen as *means* which God uses in our life to accomplish his purpose in grace. G. Berkouwer has well stated, "The profundity of the doctrine of perseverance must be sought precisely in the fact that admonition is included in it and that at the same time, through faith, perseverance is confessed as a gift" (*Faith and Perseverance* [1958], 111).

One of the most difficult passages in a consideration of perseverance is Heb. 6:4 – 8. There are

three major views that may be noted. First, there is the *saved-lost theory*, which maintains that a true believer may be lost through deliberate apostasy. It should be noted, however, that this passage also indicates the impossibility of repentance following such apostasy. Second, there is the *hypothetical theory*, which maintains that the writer is dealing with suppositions and not with fact, in order that he may correct wrong ideas. This view would seem to minimize the impact of the warning. Third, there is the *non-Christian theory*, which holds that there is no genuine faith in the hearts of the persons being described. This view argues that the experiences mentioned describe how exceedingly close it is possible for one to come to being a Christian without actually becoming one. SIMON MAGUS is appealed to as an illustration of this position.

Another problem passage is Jn. 15:1 – 6. The central question here is, What is the nature of the barren branches (vv. 2, 6)? Some would contend that these represent genuine believers who lose their spiritual life by failing to abide in Christ. Others, of a Calvinistic persuasion, would maintain that these branches are such as merely profess to belong to Christ. When it is said that they will be *taken away*, this is understood to mean that they will be finally expelled from all connection with Jesus Christ and his church. (In this reference to barren branches Jesus is undoubtedly thinking of JUDAS ISCARIOT, who although connected with Christ outwardly was never truly one of his.) This *taking away* and *burning* may happen in various stages. Such mere professing Christians may gradually wither and drop off at their own accord or they may have to be excised by the knife of EXCOMMUNICATION. Still others may continue in this world. But ultimately every such branch is taken away at death.

One of the strongest supports of the doctrine of perseverance is found in the significance of Christ's intercessory PRAYER. During the closing days of Jesus' earthly life he encountered PETER in a mood of intense self-confidence. On that occasion Peter boasted to his Master that he would follow him wherever it might lead and at whatever cost. Jesus, knowing Peter better than Peter himself, revealed that Satan desired to sift him as wheat, but he added, "I have prayed for you, Simon, that your faith may not fail" (Lk. 22:32). Now even though Peter denied his Lord three times, as the Master had predicted, yet his faith did not utterly fail; for no sooner had he sinned than he wept bitter tears of repentance. But not only did Jesus pray for Peter, he also prays for all who are his. His intercession includes those who are still unbelievers but who are nonetheless among the elect (Jn. 17:20 – 21; cf. Rom. 8:31 – 35; Heb. 7:25). See INTERCESSION OF CHRIST.

I. Glorification. GLORIFICATION is the final climactic act in God's redeeming work (Rom. 8:30), to be realized at the PAROUSIA. It will involve the perfecting of the soul and/or spirit as well as the body. Although the NT represents glorification as a complete juridical exoneration, it also views it as a moral perfecting. A number of Scriptures make this clear (Eph. 5:27; Phil. 1:10; Col. 1:20; 1 Cor. 1:8; 1 Thess. 3:13; 5:23 et al.).

Glorification also means *full* participation in eternal LIFE. By God's grace believers even now have eternal life (Jn. 5:24); but the *fullness* of this life is yet to be realized (vv. 25 – 28). John states, "Dear friends, now we are children of God, and what we will be has not yet been made known. But we know that when he appears, we shall be like him, for we shall see him as he is" (1 Jn. 3:2). ETERNAL life includes two ideas: a new quality of life and a never-ending life. When the sinner is restored to his proper relationship with God through Christ he enters a new quality of life—a life in harmony with the life of God himself. This is a kind of life drastically different from that previously possessed; it is indeed an abundant life. Glorification then means the full bestowal of eternal life upon believers—the final realization of a perfect relationship with God as we are with him forever.

Glorification will bring a full realization of freedom from sin and death (Jn. 8:33 – 36; Rom. 6 – 8; Gal. 5:1, 13). Then we shall be what we truly are. While in this life, we strive through the Spirit to be like our Lord; then our souls shall be perfectly conformed to his image (Rom. 8:28 – 29). Glorification is our transformation into "the whole measure of the fullness of Christ" (Eph. 4:13).

Glorification also includes the perfecting of the BODY. Scripture attributes a dignity to the human body. Genesis teaches that a person is not a soul merely inhabiting a physical entity. It is the *total* person who is said to have been created in the image of God (Gen. 1:26 – 30; 2:4 – 8, 15 – 18). It is the total person who is affected by sin. The focal point of divine judgment is DEATH, and although the death of the body does not exhaust the biblical concept of death, it is nevertheless central to it. Physical death (separation of the soul and/or spirit from the body) is the outward sign of spiritual death (separation of the person from God).

Christ's RESURRECTION guarantees ours. According to the NT, Christ rose from the dead bodily (Matt. 28:9; Lk. 24:31, 43, 50; Jn. 20:17, 22, 27 et al.), and this glorious body in which he arose is the pattern after which ours will be fashioned (Phil. 3:20 – 21; cf. 2 Cor. 5:1 – 5). In the KJV of Phil. 3:21 we read that Christ will change "our vile body." The word for "vile" is better rendered "lowly," as in several modern versions. Although many Greek pagans viewed the body as the prison of the SOUL, Paul viewed the body as designed by God for the abode of the Spirit (1 Cor. 6:19). In our present state, because of the influence of sin, our body is in a state of humiliation, but at Christ's return it will be refashioned after the glorious body of our Lord (1 Jn. 3:2). The details regarding the nature of this change are outlined in 1 Cor. 15.

Glorification, then, is the climax of God's saving work, a work that extends from eternity to eternity. Glorification involves the *total* person—soul and/or spirit together with the body. In that day all will be complete; death will be swallowed up in victory, and God will be everything to everyone.

salve. See EYESALVE.

Samael sam'ay-uhl. KJV Apoc. form of SALAMIEL (Jdt. 8:1).

Samaias suh-may'yuhs. KJV Apoc. form of SHEMAIAH (1 Esd. 1:9; 8:39; Tob. 5:13 [NRSV, 5:14, "Shemeliah"]).

Samaria (city) suh-mair'ee-uh (שֹׁמְרוֹן H9076, possibly "guarding [place], observation [point]," derived from the personal name שֶׁמֶר H9070, "guardian" [1 Ki. 6:24]; Aram. שָׁמְרַיִן H10726; Σαμάρεια G4899). The capital of the northern kingdom of Israel. See also SAMARIA (TERRITORY) and SAMARITAN.

I. The site. Samaria had an excellent hilltop location c. 40 mi. N of JERUSALEM and c. 25 mi. from the Mediterranean (see GREAT SEA). In the spring, when the wild flowers are in blossom, the setting is exquisite. The king could see the Mediterranean Sea from his palace windows as he looked W down the fertile "valley of barley," leading to the Plain of SHARON and the sea. Samaria was located on the main N-S ridge ROAD of PALESTINE, and almost directly W across the mountain ridge from the preceding capital, TIRZAH. It was c. 6.5 mi. NW of SHECHEM, the kingdom's first capital.

The city was on an oval hilltop c. 300 ft. high and isolated from the hills around it except to the E, where a saddle joined it to the N-S ridge. Although lower than some surrounding hills, it was beyond artillery (catapult) range from them. The city withstood several sieges by the Arameans, and one of three years' duration by the Assyrians, before it fell (2 Ki. 17:5). This is especially interesting in view of the fact that the city's spring was a mile away and the inhabitants had to rely on CISTERNS. When HEROD the Great rebuilt the city, he named it Sebaste in honor of his patron AUGUSTUS (Gk. *sebastos G4935,* "revered," corresponds to Lat. *augustus;* cf. Acts 25:25). The present Arab village at the E end of the site still carries the Herodian name, Sebastiyeh. The OT population of the city can only be conjectured, but SARGON deported 27,290 of its population. Its maximum population even in NT times was probably not more than 40,000. The size of the hilltop, of course, determined the city's size, c. 20 acres.

II. Israelite history. The city of Samaria is referred to over a hundred times in the OT, although it was not built until some fifty years after the death of SOLOMON. It was founded c. 875 B.C. by OMRI. "He bought the hill of Samaria from Shemer for two talents of silver and built a city on the hill, calling it Samaria, after Shemer, the name of the former owner of the hill" (1 Ki. 16:24; see SHEMER). Omri died before completing the new city and it was finished by his son, AHAB. The new capital was in every way an improvement on the former one, Tirzah.

The site was excavated by Harvard University in 1908 under the direction of G. Schumacher and in 1909 – 10 under G. A. Reisner. A second expedition in 1931 – 33 was sponsored by a multiple group: Harvard University, Hebrew University of Jerusalem, the Palestine Exploration Fund, the British Academy, and the British School of Archaeology in Jerusalem (in 1935 the British institutions listed above carried on another dig). The expedition was under the direction of J. W. Crowfoot, and K. M. Kenyon was in charge of the work in the royal quarter. The most important findings of all these digs will be incorporated into the historical sections of this article, although more recent work by R. E. Tappy has led to a revision of the architectural and stratigraphic history in the 11th – 7th cent. B.C.

There had been occupation on the hilltop in the Early Bronze Age, and the archaeological evidence from a later period could be interpreted as the remains of Shemer's estate. The city built by Omri and Ahab was largely replaced by later constructions; the portions of the original city found by the archaeologists show that it was well designed and excellently constructed. The work was apparently done by skilled Phoenician craftsmen, as similar work has been found at TYRE. Israel and PHOENICIA were allies, and Ahab had married the daughter of the king of the Phoenicians. The palace was probably similar to others in the ANE, for it followed their pattern in that it was a two-story building; Ahab's son AHAZIAH was fatally injured in a fall from a second-story window (2 Ki. 1:2 – 17). The palace buildings probably also followed the usual design of being built around open courtyards. In one of the courtyards a rectangular shallow pool was found, which measured 33.5 x 17 ft. Perhaps this was the place where the blood was washed from Ahab's chariot (1 Ki. 22:38). The total palace area seems to have been c. 178 x 89 meters.

The tell of ancient Samaria.

The palace was called an ivory house (1 Ki. 22:39; Amos 3:15). There are three theories of interpretation. One considers the polished white limestone of the buildings as "ivory colored." Another thinks the reference is to wooden wall panels inlaid with ivory. The third, and most likely, is to apply it to the ivory inlay furniture used. Since the inlays are small, they fit the pattern of furniture better than large wall panels.

Over 500 of the ivory plaques or fragments of them have been found. They were at times touched up with glass, enamel, and lapis lazuli inlays, and some were covered with gold leaf. There were figures from nature: plants, flowers, trees, and wild animals. There were also plaques portraying Egyptian gods. The ivories were probably carved in Phoenicia; at least some of the designs were taken from Egyptian models. Work similar to that at Samaria has been found in Syria.

Other interesting palace finds were numerous clay sealings with imprints showing. These were the seals with which papyrus rolls were closed and made official by the seal imprint of a government official. The area where they were found would be the place where the government's official documents, both foreign and local, were kept. The inside of the seals showed the impression of the strings that bound the papyrus.

The entire city of Samaria probably occupied about 20 acres. The palace area was at the higher W end of the hill. The common people lived in the lower city, that is, the E end of the city. Less than one-third of the palace area has been excavated and only a small segment of the lower city.

Samaria was well fortified with both an outer and an inner city wall. The former averaged c. 20 ft., with the greatest width 32 ft. It was the casemate type and was provided with towers and bastions. The casemates were narrow rectangular rooms with the length of the casemate being the width of the wall. They were filled with earth. The inner wall was solid stone c. 5 ft. in thickness. There also seems to have been a third defensive wall on the hillside just below the outer wall, but the evidence is not conclusive.

The city's main gate was naturally at the E end of the city, where the hill joined the main mountain mass. This may be the gate where Ahab and JEHOSHAPHAT sat on their royal thrones and listened to the prophets predicting the outcome of a battle with the Arameans at RAMOTH GILEAD (2

Chr. 18:9). It may also have been the gate where the lepers were conversing with one another as to what death they would choose under the city's siege by BEN-HADAD. It would also be the place where the mob trampled to death the king's captain of the gate as they rushed out of the city for food when the siege was lifted (2 Ki. 7:1 – 20).

Near the gateway a fragment of a large stone stela was found, but only three letters remained and they gave no clue to the inscription The script would date it about the time of JEROBOAM II, who was Samaria's greatest king. Such memorial stelae were common at the gates of capital cities. Limestone pilasters with proto-Ionic capitals were found nearby, showing that an important public building had stood there. These are similar to those used by Solomon's architects.

Omri's place in the history of ASSYRIA is more significant than it is in Bible history. Although several dynasties replaced one another in the kingdom of Israel, Assyria always referred to each of them as "the house [or dynasty] of Omri." Ahab has much more prominence in Scripture; even so, he was a minor figure in comparison with his wife JEZEBEL, and especially with the prophet ELIJAH. Ahab built a temple for BAAL to please his wife, who was a worshiper of Melqart, the Baal of the city of Tyre, where her father had been high priest before becoming king (1 Ki. 16:32 – 33). Ahab's acquiescence to his wife's religion occasioned Elijah's dramatic appearance at Mount Carmel and his demonstration there that Jezebel's Baal and ASHERAH were powerless gods. Ahab's Baal sanctuary in Samaria has not yet been identified by archaeologists. The multiple rebuildings at Samaria have made it very difficult for archaeologists to identify in detail any of the portions of major buildings found after the time of Omri and Ahab. The objects found in the buildings, the architectural fragments of walls, arches, etc., are the best clue to the use of these structures.

Samaria was besieged by Ben-Hadad of SYRIA (ARAM), but Israel made a massive sortie from the city and defeated the Arameans, whose king was drunk at the time of battle (1 Ki. 20:1 – 22). Ahab defeated Ben-Hadad a second time the following spring; the Aramean king surrendered to Ahab. The Israelites were attacked by Ben-Hadad a third time, but Ahab was critically wounded at Ramoth Gilead and died before he could reach Samaria. His bloody chariot was washed in one of the palace pools, as mentioned earlier (22:1 – 38).

Ahab's son Ahaziah reigned only two years. He died as the result of an accident when he fell out of a second-story window in the palace at Samaria (2 Ki. 1:2 – 17). He was succeeded by his brother JEHORAM (Joram). Ben-Hadad again besieged Samaria, and the situation was so desperate that some of its citizens resorted to cannibalism. The prophet ELISHA predicted that the siege would be lifted within twenty-four hours, and so it was, for the Arameans thought that the Hittites and the Egyptians had become allies of the Israelites and were on the march ready to attack them (6:24—7:20). Like his father Ahab, Jehoram was wounded in battle at Ramoth Gilead (8:28), but escaped with his life, only to be murdered shortly afterward by JEHU, one of his military leaders in that battle (9:24).

The dynasty of Omri ended and was succeeded by the dynasty of Jehu. The descendants of Omri were exterminated by Jehoram's court officials, who beheaded all the male relatives of Ahab at Jehu's orders (2 Ki. 10:1 – 11). In antiquity a royal coronation normally took place in the presence of the nation's chief deity; so Jehu called for the service to be held in the great Baal temple that Ahab had built for Jezebel. When the temple was jammed with Baal worshipers, Jehu ordered his army to kill them all. He burned the wooden pillar of Baal and demolished the sanctuary. The site was then made a latrine. Although Jehu did everything possible to annihilate Phoenician Baalism, he still continued the synthetic Yahweh-Baal cult of Jeroboam I as the nation's official cult (10:18 – 31).

The kingdom of Israel suffered heavy defeats under Jehu. HAZAEL, king of DAMASCUS, incorporated all TRANSJORDAN into his kingdom (2 Ki. 10:32 – 33). Jehu became a vassal of

SHALMANESER III, king of Assyria, according to the records of that monarch. Jehu's son, JEHOAHAZ, suffered still more at the hands of the Arameans; but the tables were turned under his son Jehoash (JOASH), for the Assyrian pressure on Damascus enabled that Israelite king to recover his Transjordanian territory; Jehoash even captured Jerusalem and made Samaria rich with its booty (14:8 – 14). Then Jeroboam II came to the throne at Samaria and the northern kingdom reached its greatest territorial expansion (from the DEAD SEA to LEBO HAMATH) and its greatest prosperity. The prophets Hosea and Amos often concentrated their remarks on life in Samaria, the capital city, although the historical books said little of that city in this period of her history.

Samaria has been rebuilt so often in the areas excavated by archaeologists that only fragments of buildings are left. The first major reconstructions seem to have come about the time of Jehu. The reason for this work is unknown. Perhaps destruction by an earthquake made rebuilding necessary, as earthquakes were frequent in the history of Palestine. At any rate the new work was very inferior to that of Omri and Ahab. Jehu, by his destruction of the Phoenician Baalism of the Omri-Ahab dynasty, would not likely be able to secure skilled Phoenician craftsmen; and apparently he had to rely on Israelite labor.

The next building phases came about the time of Joash and Jeroboam II, when wealth flowed into Samaria from all directions. Although there were several building phases, they were inferior to the earliest work. The excellent masonry has been replaced and the newer more crude work has its deficiencies concealed under heavy coats of plaster.

The most important objects found in this period were sixty-five OSTRACA from the time of Jeroboam II. These were business documents written on pieces of broken pottery (one of the most common writing materials used in ordinary business). Scholars differ concerning their exact nature, but they seem to be receipts for produce (wine and oil) given to the government at Samaria as taxes. They list the name and city of the taxpayer and also the name of the tax collector. They seem to show that the federal departments set up by Solomon were still intact at this time in the northern kingdom. Twenty-two cities or towns are mentioned.

Although Samaria was at the peak of her glory under Jeroboam II, the city was to be destroyed within twenty-five years; the whole of its last period was chaotic. Jeroboam's son, ZECHARIAH, was assassinated within six months by SHALLUM, who in turn was assassinated a month later (2 Ki. 15:8 – 14). The latter killing was in the city of Samaria, and MENAHEM, the killer, was from Israel's former capital city of Tirzah just E across the mountains from Samaria. The Assyrians, however, were again in the W, and Menahem paid tribute to TIGLATH-PILESER III (called Pul, 15:19). PEKAHIAH, the son of Menahem, was soon killed by PEKAH, one of his generals, in the palace at Samaria (15:23 – 25). Pekah along with other western monarchs rebelled against Assyria. Tiglath-Pileser III then captured most of the kingdom of Israel and made it into three Assyrian provinces: GILEAD, MEGIDDO, and DOR (15:29).

During this fighting, HOSHEA killed Pekah, probably with the help of the Assyrians, for he was accepted as king over the last remnant of the northern kingdom, that is, the land adjacent to the city of Samaria itself (2 Ki. 15:30). Hoshea was loyal to Assyria for a time, but when SHALMANESER found him planning to revolt, he imprisoned him and attacked Samaria (17:1 – 6). The city withstood a siege of three years but fell to the new Assyrian king, SARGON II, in 721 B.C. Sargon's records reveal that he deported 27,290 persons from Samaria.

Sargon specifically stated that he rebuilt Samaria and made it greater than it had been under the Israelite monarchs. The land was resettled with refugees from other Assyrian conquests (2 Ki. 17:24), but it is uncertain whether Samaria in this text refers to the territory of Samaria or to the

capital city itself. More deportees came in under ESARHADDON (Ezra 4:2) and ASHURBANIPAL (Osnappar, 4:9 – 10). Loyal Yahweh worshipers continued to come to Jerusalem from the city of Samaria even after NEBUCHADNEZZAR'S conquest of the city and temple (Jer. 41:5). Archaeological data give the names of two of the Assyrian governors of Samaria in the 7th cent. A fragment of a cuneiform tablet addressed to a Babylonian governor was found in the city's debris. Archaeologists have not found much evidence for this period in the palace area, since the Hellenistic and Roman city builders removed much of earlier building and sank deep foundations in other places.

When the Babylonians seized world power from the Assyrians, they continued to have Samaria as the capital of the province of Samaria, now called Samerina; but they also added to it the territory around Jerusalem. When the Persians took over world empire, Samaria was continued as the capital of the province of Samerina. Although SANBALLAT, the governor of that province, plays a large part in the postexilic period, his capital city Samaria is mentioned only in Ezra 4:17. See further ISRAEL, HISTORY OF.

III. Intertestamental history. With the coming of ALEXANDER THE GREAT to Palestine, the city of Samaria assumed a new character. It became the most important Greek city in central Palestine; and the Samaritan influence in what was the old province of Samaria was now only religious. Shechem from this time became the important Samaritan city. Its importance was climaxed by the building of a temple on nearby Mount GERIZIM (see SAMARITAN).

When Alexander the Great moved S from Tyre to attack Egypt, he appointed Andromachus as governor of Samaria, but Andromachus was killed by some of the Samaritan leaders, who then fled to the Jordan valley. Their hideout has been excavated by the American School of Oriental Research and much valuable data on this episode has been found. Alexander punished the city by deporting a part of its population, and by making the city a Macedonian colony in 331 B.C.

The city's defenses were greatly improved, probably by Perdiccas, as soon as the Macedonians occupied it. Some scholars date these defenses later to the Ptolemaic-Seleucid fighting, but this is unlikely. Although the old Israelite defenses were used, the walls on the middle terrace were strengthened with massive circular towers of excellent craftsmanship. They averaged 40 – 48 ft. in diameter. A new defense wall with a battered face was found in one area and dated c. the 2nd cent. B.C. This wall, although some 13 ft. thick, was breached by the troops of John Hyrcanus (see HASMONEAN II.A) when they captured Samaria in 107 B.C.

The objects found in the houses of this period show that Samaria was a typical Hellenistic city. The general cultural level seems to have been as high as that of any Israelite or Roman city on the site. The city was economically prosperous and seems to have done much commercial trading of its grains for wine with the island of RHODES, for Rhodian jar handles are found in great quantity (over 2,000) everywhere on the site. Greek and Egyptian deities were worshiped. After the death of Alexander, the city belonged to the Ptolemies (see PTOLEMY) most of the time up to 198 B.C., when it became the permanent property of the Seleucids (see SELEUCUS).

John Hyrcanus moved against Samaria after his capture of Shechem and his destruction of the Samaritan temple on Mount Gerizim. The Samaritans had asked both the Seleucids and the Ptolemies for troops, but John Hyrcanus defeated both these units sent against him. He then besieged Samaria and captured it within a year, c. 107 B.C. JOSEPHUS (*Ant*. 13.10.3 §281) states that the city was so thoroughly destroyed that no sign of it remained. However, archaeologists found this statement to be a great exaggeration of the facts. The city was occupied at least in part by the time POMPEY conquered Palestine, and he added it to the Roman empire in 63 B.C. The city, however, had not been refortified after its capture by Hyrcanus. Samaria was annexed to the province of Syria by the Romans.

The Roman proconsul Gabinius (57 – 55 B.C.) ordered the restoration of Samaria; the breaches in the fortifications made by John Hyrcanus were repaired. New straight streets were also laid out and the houses were built in regular block patterns as today. Five different streets were found, but they were very narrow, only c. 8 – 10 ft. wide. Each block averaged four houses and a row of shops. The best house occupied half a block and had three shops at one end and fifteen rooms built around two open courts. The houses were plastered and painted in panelings of red, purple, white, and yellow. This is a good picture of much of city life wherever Romans built their towns in NT times. The general layout of the city's forum may belong to this period although it was certainly completed by HEROD the Great.

The greatest builder in the history of Palestine was not Solomon, but Herod the Great. Samaria was a city he loved, and he embellished it in every way. He began the reconstruction of the city in 30 B.C. and spent at least ten years at the task. As mentioned above, he renamed it Sebaste in honor of his patron, Emperor Augustus. On the site of Omri's palace, the highest point in the city, he erected a large beautiful temple for the worship of Augustus as a god! This is the same Herod who built the temple of Yahweh at Jerusalem in which Christ himself worshiped. Incidentally, the Roman Emperor Augustus was not appreciative of this temple which Herod dedicated to his worship.

Josephus gives only a brief description of Herod's Samaria (*Ant*. 15.8.5 §§296 – 98), but archaeologists have brought the city to life. Herod built a new city wall, strengthened with towers. The wall was more than 2 mi. in length. The lower sections of the circular towers which constituted the W gate of the city are still intact. It is the only one of the city's gates excavated to date. The construction work was probably done by local craftsmen, as it is inferior to the work on the walls of Jerusalem, where Herod did his finest building.

Only small portions of Herod's temple to the Divine Augustus have survived for the archaeologist to study. This temple was rebuilt and radically modified in pattern at a later date, perhaps in the reign of Septimius Severus. Herod's temple had a great forecourt which was approximately square, c. 240 ft. on a side. It was enclosed by several walls.

At the S end of the forecourt a staircase 90 ft. wide that led to the temple proper was in two

units, broken by a landing about halfway up. At the foot of the staircase and on the floor of the courtyard was a massive altar. In the debris just E of the altar a large fragment of a statue of a Roman emperor was found. Some scholars believe this was a statue of the Emperor Augustus, to whom the temple was dedicated. The temple itself seems to have had a wide portico in front of the cella. The latter was 45 ft. wide. On either side of it were narrow corridors that made the temple proper the same width as the portico. The columns used in the temple were probably of the Corinthian order, as this order was used in his other major projects. Close to the temple were some major buildings that may have been used by the temple priests.

The dates of two of the city's monuments are uncertain. Some scholars date them to Gabinius and others to Herod the Great. One is the stadium in the valley below the city. As its columns are of the Doric order, they may be the work of Gabinius, since Herod preferred the Corinthian order. The first phase of the forum is also uncertain, although most of it that is seen today is much later. Herod was a great lover of the theater and he must have had one in this city he loved so well. The colonnaded street seen in the olive orchard above the ruins today is late Roman in date, but Herod probably constructed at least one major street of this same type.

Herod the Great willed Samaria to his son Archelaus (see HEROD IV), but he was such a poor ruler that Rome removed him. Samaria was then placed under the jurisdiction of the Roman governor, whose headquarters were at CAESAREA.

IV. NT history. This Herodian city was the Samaria of the NT. It is not specifically mentioned in the Gospels. In Acts, Samaria is mentioned as a place where PHILIP went to preach and as the center for the work of SIMON MAGUS (Acts 8:5, 9), but it is uncertain whether the city or the territory is meant (in v. 5 the earliest MSS have "the city of Samaria," but most witnesses omit the definite article, thus, "a city of Samaria"). In v. 14, a reference to the city seems likely, as the apostles did their crucial doctrinal work in urban areas. There is a strong tradition that JOHN THE BAPTIST was buried at Samaria, but there is no proof. Two early churches here honor him.

When the Jews revolted against Rome, Samaria was one of the first cities to suffer. The Jews captured and sacked it in A.D. 66 in the first months of the revolt. The city, however, must have made a good comeback, for there is a fragmentary inscription of VESPASIAN that would favor such a view. Neither written records nor archaeological data throw much light on Samaria in the closing days of the NT. The peak period of Samaria's greatness was c. A.D. 180 – 230. Most of the city's Roman ruins visible today belong to that period.

J. KELSO

Samaria (territory). A name applied to the general region in which the city of Samaria was located; see SAMARIA (CITY). This use of the term, however, is attested only after the fall of the city.

I. Geography. There is very little definite data on the boundaries of the territory of Samaria. Usually

it is considered as the land occupied by the tribes of EPHRAIM and W MANASSEH. Geographically, the S boundary is the road that goes from JERICHO to BETHEL and then descends via the valley of AIJALON to the Mediterranean. The N boundary consists of Mount Carmel (see CARMEL, MOUNT) and Mount GILBOA and the hills that connect these two bastions. The Mediterranean is the W boundary with the Jordan on the E. Both SHECHEM and the city of Samaria are near the center of the area, with Samaria more to the N and W. The area made its wealth from its productive farm lands and its international trade routes.
The region of Samaria.

The natural produce included grains and olives and the fruit of vineyards and orchards, plus flocks and herds. Samaria always had a good produce market in nearby commercial PHOENICIA. Note the economic-political marriage between AHAB and JEZEBEL. It was to the benefit of commerce that both the N-S ROADS, one along the coast and one along the high ridge, went through the territory of Samaria. There were three roads running E and W. The S road, as mentioned above, went from Jericho to Bethel to the Mediterranean. The center highway had a much better grade through a natural pass at Shechem between Mounts GERIZIM and EBAL. The N road was a continuation of the coastal road, where it cut across the plain of DOTHAN to modern Jenin and down through the vale of JEZREEL to the JORDAN River at BETH SHAN (later called Scythopolis). Most of the land commerce between Egypt and Syria went through the district of Samaria.

II. Political history. The use of SAMARITAN as a political term came only after the conquest of

Samaria by the Assyrian SARGON II in 721 B.C. (see 2 Ki. 17:29, which has the only OT occurrence of Heb. *šōměrōnî H9085,* "Samaritan"). Sargon made it into the province of Samerena. His records specifically speak of 27,290 persons being deported from the capital city of Samaria. He apparently took prisoners from other cities, since he settled large numbers of deportees in the province of Samaria, taking them from Babylon, Cuthah, Avva, Hamath, and Sepharvaim (2 Ki. 17:24). Later deportees were also settled in the province by ESARHADDON and his son ASHURBANIPAL (Osnappar, Ezra 4:2, 10). The basic population of the land, however, remained essentially Israelite, for not a single permanent feature of any of the religions practiced by the colonists influenced the Samaritan faith.

When the Assyrian empire weakened, JOSIAH tried to annex the Samaritan territory but he lost it to his military rival Pharaoh NECO. The latter, however, soon lost it in turn to NEBUCHADNEZZAR, who seems to have incorporated this old Assyrian province into his own Babylonian empire in 612 B.C. At that time the province reached as far S as Bethel, for that city was spared when Nebuchadnezzar destroyed Jerusalem in 586. Apparently he then added this new area around Jerusalem to the old Samaritan province. The Persians seemed to have continued the same provincial policy as the Babylonians, for SANBALLAT was politically in charge of this area until NEHEMIAH reduced its size slightly by making the Jerusalem section into a semi-independent political unit under the high priests.

Topography of the hill country of Samaria. (View to the NE.)

Historical evidence concerning the province of Samaria between the RESTORATION under NEHEMIAH and the era of ALEXANDER THE GREAT is scanty. JOSEPHUS recorded a number of interesting stories relating to Alexander in Palestine, but most historians reject them as fiction. It is known, however, that Alexander pensioned off some of his soldiers from the TYRE campaign at the city of Samaria. The Greek general whom he left in charge of the district of Samaria was murdered by the local people. After that the city was severely punished, and apparently the Samaritan population was uprooted, for afterward the city seemed to be essentially Greek. The details have been confirmed by modern archaeological findings. Shechem became the only major Samaritan city. The southern half of the province of Samaria seems always to have continued in the Samaritan faith. Paganism apparently prevailed in the northern half of the province around the capital city itself.

The Ptolemies (see PTOLEMY) carried prisoners to ALEXANDRIA from both the Jews and the

Samaritans. Both of these religious groups continued to be important in that city, even through NT times. ANTIOCHUS Epiphanes seems not to have bothered the Samaritans, unless 2 Macc. 6:2 is correct where it implies that he rededicated the Samaritan temple on Mount Gerizim to Zeus Xenios. Since he had no fighting with the Samaritans, this may well be incorrect, as the Samaritans at all other times, so far as is known, were fanatical whenever Mount Gerizim was profaned. He would, of course, put a governor at Gerizim (2 Macc. 5:23).

The province of Samaria first appeared in the Maccabean story (see MACCABEE) when the Seleucid Demetrius rewarded Jonathan for lifting the siege of the Acra in Jerusalem by giving him three districts of Samaria: Ephraim, Lydda, and Ramathaim. By 128 B.C. John Hyrcanus (see HASMONEAN II.A) was strong enough to capture Shechem and Gerizim and to destroy the Samaritan temple there. As the capital city of Samaria was a strong Greek fortress, it was able to hold off the Jewish forces for a year before it fell. Scythopolis was the next city to be captured, and with its fall the entire province of Samaria was in Jewish hands.

When POMPEY captured Palestine, he annexed the city of Samaria to the province of SYRIA, and the Samaritans again became the local power in the district. In NT times Samaria extended from the free cities of Scythopolis and Jenin on the N to a line c. 15 mi. S of Shechem. The history of Samaria in NT times is treated under the article SAMARITAN . (See further S. Dar and S. Applebaum, *Landscape and Pattern: An Archaeological Survey of Samaria 800 B.C.E. – 636 C.E.,* 2 vols. [1986]; E. Stern, *Archaeology of the Land of the Bible. Volume II: The Assyrian, Babylonian, and Persian Periods, 732 – 332 BCE* [2001]; A. Zertal, *The Manasseh Hill Country Survey* [2004 – 7]; *ABD,* 5:926 – 31; *NEAEHL,* 4:1310 – 18.)

J. L. KELSO

Samaritan suh-mair'uh-tuhn (שֹׁמְרֹנִי *H9085,* gentilic of שֹׁמְרוֹן *H9076;* Σαμαρίτης *G4901).* An inhabitant of SAMARIA (TERRITORY).

I. History. Samaritans were Israelites who lived in the northern kingdom, but there is only one mention of them in the OT (2 Ki. 17:29). The word *Samaritan* as used in the NT refers to an ethnic-religious group whose central sanctuary was on Mount GERIZIM during intertestamental times. These Samaritans are best known through the mention of them in the gospel narratives. The Samaritan sect continues to this day; its members interpret their name as derived from the word *šōmĕrîm* (a participial form of *šāmar H9068,* "to keep"), that is, "guardians [of the law]."

It is impossible to write an accurate history of the Samaritans because their records are so scanty; the references to them are also highly contradictory. Their history began after the Assyrian capture of the city of Samaria in 721 B.C., and the deportation of 27,290 of Israel's population (these figures are taken from Sargon's record of the conquest). Their major historic break with the Israelite tradition came at the time of this Assyrian conquest of Palestine. Their present-day traditions (which are not authenticated by documents from biblical times) are said to go back to Adam.

Samaritans believed that JOSHUA built a sanctuary on Mount Gerizim, which was the center for early Israelite worship. They dated the religious break with the Jews to the time of ELI, whom they accused of erecting a rival sanctuary at SHILOH. For a brief time, they claimed, there were two sanctuaries and two priesthoods. The PHILISTINES soon destroyed the Shiloh sanctuary, and SAUL persecuted the JOSEPH tribes (EPHRAIM and MANASSEH), depriving them of their sanctuary at Gerizim. Their tradition says that for a time they fled to BASHAN. The Samaritans recorded little about the decline of the city of Samaria except to imply that this was a political rather than a religious loss. See

SAMARIA (CITYZ). SHECHEM, not Samaria, had always been and would continue to be their holy city. They modified the story of the lion plague (2 Ki. 17:24 – 33) by adding that the Assyrian king also permitted them to reinstitute their worship on Mount Gerizim.

As recorded by Jewish sources, however, the Samaritans are descendants of the colonists whom the Assyrians planted in the northern kingdom and who intermarried with the Israelite population that the Assyrians had left in the land. More likely they were the pure descendants of the Israelites left in the land, for Samaritan theology shows no sign of the influence of paganism among the colonists sent by the Assyrians. If there was intermarriage, the children became true Israelites.

Furthermore, shortly after the Assyrian conquest of Samaria, some people from Manasseh, Zebulun, and Asher went to King HEZEKIAH's great Passover in Jerusalem (2 Chr. 30:11). The city of Samaria was located in the tribe of Manasseh. As late as the time of JOSIAH, Manasseh and Ephraim contributed to the repairs on the Jerusalem TEMPLE (34:9). These two tribes became the core of the later Samaritan population. Both JEREMIAH and EZEKIEL treated the northern tribes as an integral part of covenant Israel. Ezekiel insisted on blending them with Judah as a common restored covenant people.

When ZERUBBABEL was building a new temple, the descendants of the foreigners brought in by ESARHADDON asked to take part, claiming that they were true Yahweh worshipers (Ezra 4:2), but they were refused. Later, foreigners from many places (4:9 – 10) joined in a petition to ARTAXERXES against Jerusalem, but DARIUS gave the Jews permission to continue to rebuild the temple. Nothing was said regarding the Samaritans, for they were not involved in this episode. The objection was raised by foreigners working together as a political block against Jerusalem.

When NEHEMIAH came to Jerusalem as a special representative of the Persian crown, he was opposed by SANBALLAT, the governor of the Persian subprovince of Samaria (Neh. 2:10—6:14; 13:28). Earlier, when Jerusalem was captured by the Babylonians, NEBUCHADNEZZAR had apparently added it to the province of Samaria. Sanballat recognized that Nehemiah was creating a new political unit around the city of Jerusalem, and this territory would, of course, be taken from Sanballat. Both Sanballat and his partner TOBIAH the Ammonite were Yahweh worshipers. This, therefore, was primarily a political struggle, not a religious issue. It may, however, have ended as a religious schism, if one follows the reasoning of the historians who date the Samaritan break to this feud.

The actual split between the descendants of the religious groups that had constituted the kingdoms of Israel and Judah came when the "Samaritans" built their own temple on Mount Gerizim. There is no exact date for this event. JOSEPHUS (*Ant.* 11.8.1 – 4) tells of the building of this temple, but the account is so confused that different scholars, on the basis of the evidence, date the building of this temple anywhere from the time of Nehemiah to the time of Alexander the Great. J. A. Montgomery (*The Samaritans, the Earliest Jewish Sect: Their History, Theology and Literature* [1907], 66 – 70) suggested that Josephus was expanding the Neh. 13:28 – 29 episode and so favored that date for the temple. It was destroyed by John Hyrcanus in 128 B.C. Some scholars believe that this Samaritan temple can be found beneath the temple built by the Roman emperor HADRIAN on Mount Gerizim.

Remains of a Byzantine church built over the Samaritan temple on Mount Gerizim.

The Samaritans were in general rejected by the Jews in the intertestamental period. The book of ECCLESIASTICUS speaks of them as "not even a people" and as "the foolish people that live in Shechem" (Sir. 50:25 – 26). The *Testament of Levi* (7.2) also calls Shechem "a city of fools." This derogation is relevant to Jn. 8:48, which records that the Jews called Jesus a Samaritan.

The Samaritans are mentioned by the gospel writers in connection with the ministry of Christ. He passed through Samaria and dealt with a Samaritan woman at the well of SYCHAR. He remained at Sychar for two days' ministry (Jn. 4:1 – 42). His interview with the Samaritan woman reflects both the antipathy between Jews and Samaritans and the dispute concerning the rightful place for the worship of God.

At another Samaritan village, Jesus was rejected (Lk. 9:52 – 53). Luke's gospel indicates that good qualities could be found in Samaritans, for a Samaritan leper returned to thank Christ for healing (17:11 – 19), and one of his best-known parables immortalized "a good Samaritan" (10:29 – 37).

On the key essentials of the doctrine of worship, however, Christ was completely Jewish in his talk with the Samaritan woman. The difference also shows that when Christ sent out the twelve disciples to work among the Jews, he gave them strict orders to stay away from Gentile and Samaritan cities (Matt. 10:5 – 7). At his ascension he commanded that world evangelism begin at Jerusalem, then reach out into Judea, then to Samaria, and finally to the uttermost parts of the earth. Thus, Samaria was regarded as a special unit. Acts 8:1 – 25 records the story of the mission work among the Samaritans. J. A. Montgomery writes as follows: " To sum up the witness of the New Testament: the Samaritan appears as an Israelite, but one whose religion is in the condition of ignorance and whose institutions are irregular" (*The Samaritans*, 164). The Samaritans, however, were not actually excommunicated by the Jews until about A.D. 300.

Politically the Samaritans prospered under POMPEY'S conquest of Palestine and the ad ministration of HEROD the Great. Herod made Samaria one of the magnificent cities of Palestine. Here he erected one of his great pagan temples, which he dedicated to his patron, Emperor AUGUSTUS. One of his wives was a Samaritan, and she was the mother of Herod Antipas.

Herod willed the Samaritan district to his son Archelaus, who proved such a poor ruler that

Augustus deposed him in A.D. 6. Samaria then fell under the Roman governor, who ruled from CAESAREA. Josephus (*Ant*. 18.3.4. §§85 – 87) wrote that it was PILATE'S bloody handling of a fanatical assembly at Mount Gerizim that led to his removal as governor in A.D. 36. The Samaritan faith was a legal religion (*religio licita*) in the Roman empire. The Samaritans had synagogues in Egypt, Rome, and other key cities of the empire. Like the Jews, they had been taken to Egypt by the Ptolemies; from there, like the Jews, they had expanded into the key commercial cities of the Mediterranean, especially those that did business with Alexandria. Two Samaritan scholars of high repute are known. Theodotus, c. 200 B.C., wrote an epic on Shechem, of which forty-seven hexameters are presented in EUSEBIUS. Thallus, c. 40 B.C., wrote a history of the world.

The Samaritans, with all of Palestine, suffered greatly in the first Jewish revolt. Although VESPASIAN took action against the more fanatical Samaritans at Gerizim, the countryside was spared. He founded a new city to replace the old Shechem and called it Flavia Neapolis (modern Nablus); by the 4th cent. it was one of the great cities of Palestine. The Samaritans considered Emperor Hadrian as their first great persecutor. He destroyed most of their sacred writings and desecrated their sacred Mount Gerizim by building his own Roman temple to Jupiter, perhaps on the site of the old Samaritan temple.

Although the Samaritans suffered under later Roman emperors, their worst persecutions came from the Christians. Emperor Constantine granted them religious freedom, but it was not long afterward that persecution came to them. It was so severe that they revolted in 484, massacred the Christians nearby, and even attacked Caesarea. Bethel was suddenly refortified lest its population be massacred. The final great revolt, extending from Scythopolis to Caesarea, came in 529. Emperor Justinian outlawed the Samaritan sect and destroyed their synagogues, which were not rebuilt. In self-defense many of the Samaritans at least nominally accepted Christianity. Later, the emperor's edict was softened, but the plight of the faithful Samaritan from then on was most difficult. Nevertheless, of the many religions practiced under the Roman empire, it is one of the few remaining today.

A few hundred Samaritans still live in Nablus and in Jaffa (now Holon, a suburb of Tell Aviv). Mount Gerizim is still their holy mountain, and they hold their PASSOVER services on the traditional site of sacrifice. The Day of Atonement, however, is the holiest day of their year. The Sabbath is rigidly observed. They are distinctly a religious community. Their high priest acts also as their political official in relationship to whatever Palestinian government may be in power.

II. Theology. One can only conjecture concerning the total theology of the Samaritans in OT and NT times. What is known of their own writings is based primarily upon the work of their theologians who wrote in the 4th cent. A.D. during the revival under Baba Rabba.

Although the Jews and Samaritans had no dealings ordinarily with one another, the Jewish rabbinical records are in general not anti-Samaritan. It was about A.D. 300 before the Jews excommunicated the Samaritans. As late as the 2nd cent. A.D., some of the rabbis spoke highly of them. They were sometimes compared to the SADDUCEES, since both denied the RESURRECTION of the body and both objected to the PHARISEES' emphasis upon the traditions of the elders. The Jews' major theological indictment against the Samaritans was their insistence upon Mount Gerizim as the true place of worship instead of Jerusalem.

The Samaritan theology of NT times (as nearly as can be traced from scanty records) seems to be similar to that of the Jews. Both considered themselves to be true Yahweh worshipers. Both placed the supreme emphasis on the PENTATEUCH not only as Scripture but also as a detailed way of life. The Samaritans rejected the remainder of the Jewish canon; according to the records available,

however, the Jews never specifically indicted them for this heresy. One might conjecture that the Samaritans did not include the other OT books in the canon because of the emphasis on the major importance of Jerusalem as a central sanctuary, and the relation of that city to the MESSIAH. The Samaritans, as did the Jews, looked for a Messiah, as is seen in the Samaritan woman's reference to him (Jn. 4:25).

As noted above, the major point of difference was the Samaritans' insistence that Mount Gerizim was the only true central sanctuary for all Israel. The text of the SAMARITAN PENTATEUCH in Deut. 27:4 reads Gerizim, not Ebal as in the Hebrew MT. The Genesis passages that could be interpreted as emphasizing Jerusalem, such as the reference to MELCHIZEDEK as king of SALEM and ABRAHAM's offering of ISAAC on Mount MORIAH, were no problem to the Samaritans, who located these events at sites of similar name near Gerizim. Their interpretation may date from NT times, or even later. Following the TEN COMMANDMENTS in Exodus and Deuteronomy, the Samaritan text adds another commandment requiring the building of an altar on Mount Gerizim and the celebration of a sacrificial service there.

Samaritans of OT times probably held the same views of MOSES as did the Jews, but when the Samaritans developed their own theology after A.D. 400, they exalted Moses excessively and gave him titles that Christians reserve uniquely for Christ.

Like the Jews, the Samaritans looked for a final judgment with rewards and punishments in charge of the Messiah. Both Jews and Samaritans emphasized CIRCUMCISION, the SABBATH, and the kosher laws. Thus Jesus could stay in a Samaritan home for two days, eating their food and drinking water from JACOB'S WELL (Jn. 4:1 – 42).

GNOSTICISM plays a part in later Samaritan theology. Some scholars attribute a strong influence to the work of SIMON MAGUS of Samaria (Acts 8:9 – 24) in the early days of that heresy. Similarities have been noted between Samaritan beliefs and the DEAD SEA SCROLLS, although it is difficult to establish a connection between them. The 4th cent. A.D. is the most important century in the postbiblical period, for the basic work on Samaritan religion and the canon for their social customs was written under Baba the Great. Their TARGUM of the Pentateuch (an Aramaic translation to be distinguished from the Samaritan Pentateuch) was written in the 5th or 6th cent. A.D.

J. L. KELSO

Samaritan Pentateuch. The form of the Hebrew text of the PENTATEUCH preserved and accepted by

the SAMARITAN sect (it is to be distinguished from the Samaritan TARGUM, which is a translation of the Pentateuch into ARAMAIC). The Samaritan Pentateuch has been transmitted in the early type of rounded Hebrew letters (formerly called Phoenician) that largely ceased to be used by the Jews after they adopted the "square" Aramaic characters at the time of EXILE. In the course of copying and recopying, the forms of some of these letters have so changed that the Samaritan writing differs in a number of regards from the earlier form.

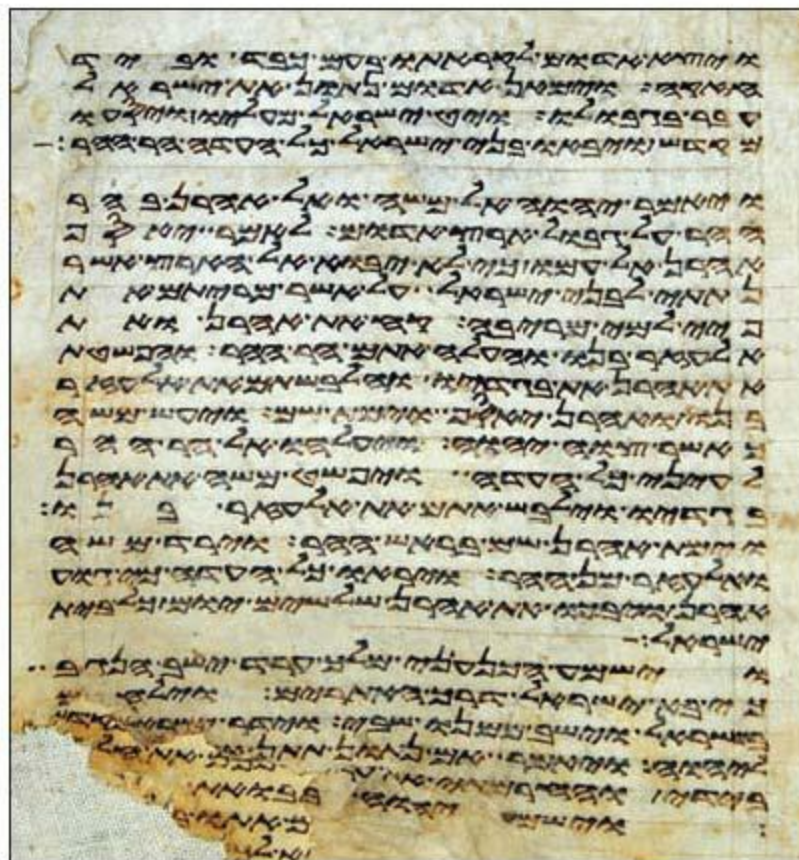
The first copy of the Samaritan Pentateuch to reach Europe came early in the 17th cent. when Pietro della Valle purchased a copy of it, and also a copy of an ARAMAIC translation of it (the Samaritan TARGUM), from a Samaritan whom he met in Damascus. Since that time dozens of other copies have reached Europe. Early in the 19th cent., H. F. W. Gesenius, the noted Hebraist, examined the Samaritan text very closely and declared that it was so full of minor errors as to be of no use for textual study of the Bible. In more recent years certain other scholars have gone to the opposite extreme, declaring that it represents a popular text widely circulated among the Jews as late as the 1st cent. B.C. See TEXT AND MANUSCRIPTS (OT).

There has been considerable discussion as to the time when the Pentateuch came into the hands of the Samaritans. There is no reason why copies of the TORAH might not have been available in northern Israel when the Assyrians led a great many of its people into exile in 721 B.C. Similarly, the priest whom the king of Assyria sent at a slightly later date to teach the law of the God of the land to those he had transported to this area from other regions (2 Ki. 17:27) probably brought with him a copy of the Pentateuch. In either case the book would likely not have been an exact copy of the official Torah that was preserved in the temple in Jerusalem (cf. Deut. 17:18; 31:25 – 26), but one of the copies belonging to private individuals or groups, or one that had been copied and recopied in one of the local centers.

In spite of these facts, so clearly attested in the Bible, it often has been asserted that the Samaritans had no copy of the law until the time when NEHEMIAH drove away from the temple a grandson of the high priest who had married a daughter of the Samaritan SANBALLAT (Neh. 13:28). There is, however, no scriptural statement that this renegade took a copy of the Torah from Jerusalem with him.

Some scholars insist that the peculiarities of the Samaritan Pentateuch point to an early Jewish textual tradition distinct from that of the MT, and that most of its similarities to the MT result from its having been influenced by it during the centuries between 300 B.C. and A.D. 100. However, there is no evidence of a close enough relationship between the Samaritans and the Jews during this period to suggest that such an alteration of the Samaritan Pentateuch might have occurred at this time. In fact, all the evidence that exists points in the opposite direction. There is a long history of opposition between the people at Samaria and those whose worship centered in Jerusalem. Hard feelings from the time of the divided kingdom were probably never entirely healed. When the Jews returned from exile the Samaritans offered to help in building the temple, but ZERUBBABEL and JESHUA vigorously repulsed them (Ezra 4:3, 10, 17). At about 300 B.C., Ben Sira closed his book of ECCLESIASTICUS with sharp words of criticism for "the foolish people that live in Shechem" (Sir. 50:26). In Maccabean times Jewish tradition represents the Samaritans as joining with the Seleucid oppressors. A few years later John Hyrcanus destroyed the Samaritan temple on Mount GERIZIM. In the time of Christ it was declared that the Jews and the Samaritans had no dealings with one another (Jn. 4:9).

The great similarity between the Samaritan Pentateuch and the MT, despite the long period of independent development, argues for the general accuracy of the Torah. During the long time when the kingdoms of Israel and Judah were separate there would have been abundant opportunity for small

textual changes in popular MSS that were not copied with the extreme care devoted to the official copies at Jerusalem. The people of northern Israel, cut off from access to Jerusalem, would be likely to write explanatory glosses on the margins of their private copies of the law. These glosses largely included phrases taken from other parts of the Torah. On a number of occasions where the Samaritan Pentateuch reports that Moses said or did something, it prefaces this statement by an explicit declaration that it was a divine command that he should do so. When the Lord orders Moses to deliver a message, and the MT merely says that he did so, the Samaritan Pentateuch is apt to repeat in detail the words of the message. Sometimes, but not usually, it agrees with the LXX. In a few places there is evidence of intentional alteration for doctrinal reasons, such as the substitution of Mount Gerizim for Mount EBAL as the place where the law was to be written on the stones of the altar (Deut. 27:4), but these are comparatively few.


A 13th-cent. MS of the Samaritan Pentateuch.

© Dr. James C. Martin. Sola Scriptura. The Van Kampen Collection on display at the Holy Land Experience in Orlando, Florida. Photographed by permission.

The orthography of the Samaritan Pentateuch is much fuller than that of the Pentateuch in the MT. This is most readily explained as a natural development in styles of spelling. The Masoretes (see MASORAH) preserved the Pentateuch, as far as possible, as it had originally been written. The books of Chronicles, written after the exile, use the orthography of the later period. In the course of copying, points of orthography in the Samaritan Pentateuch were gradually changed in line with later developments.

In the fourth cave at QUMRAN there have been found many fragments of an early copy of Exodus (4QpaleoExod^m), written in the paleo-Hebrew script, an earlier form of the type of writing used in the present copies of the Samaritan Pentateuch. These fragments seem to possess the same textual peculiarities as the Samaritan Pentateuch. It was probably one of the unofficial texts that were circulated among private individuals and groups in Palestine during the 1st cent. B.C.

(See further H. F. W. Gesenius, *De Pentateuchi Samaritani* [1815]; A. von Gall, *Der*

hebräische Pentateuch der Samaritaner [1914 – 18]; J. D. Pur-vis, *The Samaritan Pentateuch and the Origin of the Samaritan Sect* [1968]; E. Tov, *Textual Criticism of the Hebrew Bible* [1992], 80 – 100; B. K. Waltke in *ABD*, 5:932 – 40.)

A. A. MacRae

Samaritan Targum. See Targum II.

Samatus suh-may'tuhs (Σαματος). One of the sons of Ezora who agreed to put away their foreign wives (1 Esd. 9:34; the RSV identifies him with Shemaiah [cf. Ezra 10:42]).

samech sah'mek (סָמֶךְ, "support," from סָמַד *H6164*, "to support, help"). The fifteenth letter of the Hebrew alphabet (ס), with a numerical value of 60 (the reason for its name is uncertain). Its sound corresponds to that of English *s*.

Sameius suh-mee'yuhs. KJV Apoc. form of She-maiah (1 Esd. 9:21).

Samgar sam'gahr (סַמְגַּר *H6161*, meaning uncertain). According to some scholars, Samgar (Jer. 39:3) is a place name corresponding to Babylonian *Sinmagir*, a province N of Babylon ruled by Nergal-Sharezer (Neriglissar), one of Nebuchadnezzar's officials who participated in the siege of Jerusalem (cf. W. McKane, *A Critical and Exegetical Commentary on Jeremiah*, ICC, 2 vols. [1986 – 96], 2:974 – 76). This view is adopted by the NIV, which identifies three officials in the text: (1) Nergal-Sharezer of Samgar, (2) a chief officer (Rabsaris) by the name of Nebo-Sarsekim, and (3) a high official (Rabmag) who was also called Nergal-Sharezer, but who may be the same as (1). The NRSV and other versions, following the MT more closely, identify four individuals: (1) "Nergal-sharezer," (2) "Samgar-nebo," (3) "Sarsechim the Rabsaris," and (4) "Nergal-sharezer the Rabmag" (the KJV, failing to understand that "Rabsaris" and "Rabmag" are titles, identifies six officials; see also Sarsechim). It has also been suggested that the Babylonian term *sinmagir* or *simmagir* "denotes a duty carried out by Neriglissar" (*HALOT*, 2:759; cf. *Assyrian Dictionary*, 15:272).

Samgar-nebo sam'gahr-nee'boh (סַמְגַּר־נְבוּ). A Babylonian army officer who participated in the siege of Jerusalem (Jer. 39:3 KJV and other versions). See Samgar.

Sami say'mi. KJV Apoc. variant of Shobai (1 Esd. 5:28).

Samis say'mis. KJV Apoc. form of Shimei (1 Esd. 9:34).

Samlah sam'luh (שַׂמְלָה *H8528*, possibly an alternate form of שַׂלְמָה [see Salma], but note *ABD*, 5:948). An early king of Edom who ruled in Mas-rekah (Gen. 36:36 – 37; 1 Chr. 1:47 – 48). Nothing else is known about him.

Sammus sam'uhs. KJV Apoc. form of Shema (1 Esd. 9:43).

Samos say'mos (Σαμος *G4904*, "height" [cf. Strabo, *Geogr.* 8.3.19]). An island in the Aegean Sea off the W coast of Asia Minor, opposite the headlands of Mycale and the city of Ephesus. Samos is

27 mi. long and 14 mi. wide, and it is separated from the mainland by a strait of one mile. The entire island is mountainous, but the terraced land is remarkably fertile. It produced olives, unusually fine wine, and abundant timber for native shipbuilders in antiquity. Settled by Ionian immigrants from Epidaurus, the island enjoyed great prosperity throughout antiquity, but particularly in the 6th cent. Allied with ATHENS during the 5th cent., it later passed into the hands of PERSIA, EGYPT, and then PERGAMUM. It was bequeathed to ROME by Pergamum in 133 B.C. and became part of the province of ASIA. In the 1st cent. A.D. it became an autonomous city-state. (See G. Shipley, *A History of Samos, 800 – 188 BC* [1987].)

Samos is mentioned in the APOCRYPHA as one of the places to which the Romans sent a letter indicating that the Jews should not be harmed (1 Macc. 15:19). It is also mentioned in the NT in connection with PPAUL'S sea voyage from TROAS to MILETUS as he returned to JERUSALEM at the end of his third missionary journey (Acts 20:15). The verb used in this text (*paraballō G4125*) leaves unclear whether the ship only passed by the island or actually stopped there. C. K. Barrett (*A Critical and Exegetical Commentary on the Acts of the Apostles*, ICC, 2 vols. [1994 – 98], 2:958) suggests that the "Western" editor of Acts, understanding the verb to mean that the traveling party did not reach Samos, thought an alternate port of call was needed and added the clause "and tarried to Trogyllium" (KJV, following most MSS). See TROGYLLIUM.

A. RUPPRECHT

Samothrace sam'uh-thrays (Σαμοθράκη *G4903*, "Thracian height"). An island in the NE AEGEAN SEA, about 20 mi. off the coast of THRACE. The apostle PAUL and his companions, on their way from TROAS to NEAPOLIS, anchored on this island for a night (Acts 16:11).

Samothrace is very mountainous, and its central peak, Mount Fengari (5,577 ft.), is the most conspicuous landmark of the N Aegean. From it Poseidon was said to have surveyed the plains of TROY (Homer called it Poseidon's island, *Iliad* 13.12). Samothrace was virtually uninhabited until the 7th cent. B.C. because of its hostile coast. PLINY the Elder (*Nat.* 4.23) says that it became an anchorage for ships plying the N Aegean because they had to anchor somewhere due to the hazards of sailing at night.

The FERTILITY CULT of the great mother Cybele, as well as the MYSTERY RELIGION associated with the Cabeiri (or Cabiri), flourished on the island. During Hellenistic times the cult of the Cabeiri rivaled that of Demeter and Persephone at ELEUSIS. Philip of Macedon and his wife Olympias were initiates, as were many prominent Romans later. The Cabeiri were twin gods of unknown origin. HERODOTUS (*Hist.* 2.49) assigned them to the Pelasgians, the traditional settlers of Greece. Others consider them of Phrygian or Phoenician origin.

The island was excavated by French and Austrian teams in the 19th cent. and more recently by New York University. The sanctuary of the great gods, a rotunda dedicated to Queen Arsinoë II of Egypt, and a propylon of Ptolemy II have been uncovered. The most famous find was the "Winged Victory [*or* Nike] of Samothrace," currently in the Louvre, which was erected in a fountain to commemorate a naval victory of the Rhodians, in c. 190 B.C. (See further K. Lehmann, *Samothrace: A Guide to the Excavations and the Museum*, 6th ed. [1998]).

A. RUPPRECHT

Sampsames samp'suh-meez (Σαμψάμης, but the MSS have several spelling variations). One of the places to which the Roman consul Lucius wrote a letter in favor of the Jews (1 Macc. 15:23). The

name Sampsames is not otherwise attested, but some scholars believe it may be the same as ancient Amisos (modern Samsun in Turkey), a trading port in PONTUS on the Black Sea (see J. A. Goldstein, *I Maccabees,* AB 41 [1976], 498). Another suggestion is Samosata, the capital of COMMAGENE, in what is now SE Turkey.

Samson sam'suhn (שִׁמְשׁוֹן H9088, possibly "sunny"; Σαμψών G4907). Son of MANOAH; a leader and hero of Israel, famous for his prodigious strength displayed against the PHILISTINES (Jdg. 13 – 16).

I. Name. The biblical account gives no etymology or other explanation for the name *Samson.* Nevertheless, most scholars have thought that the name derives from *šemeš H9087,* "sun" (for other possibilities, see *HALOT,* 4:1592 – 93). The ending -*ōn* is probably a diminutive or affectionate suffix, yielding a meaning such as "little sun," "sunny," or "sun's child." It is perhaps relevant that Samson was born only a few miles from BETH SHEMESH, a city whose name means "house of the sun." The city was presumably once the site of a shrine of the sun-god, so probably both names are survivals from pre-Israelite Canaan, where the worship of the SUN was evidently practiced. This has led some to understand the Samson story as a solar myth, but such an interpretation has been refuted (see T. H. Gaster, *Myth, Legend and Custom in the Old Testament* [1969], 434ff).

II. Historical background. Samson was born during the period of the judges, probably around the beginning of the 11th cent. B.C. (see JUDGES, PERIOD OF). During this time God raised up national heroes to deliver his people from their enemies. These deliverers were termed *šōpĕṭîm,* literally meaning "judges," but in this context the Hebrew term (ptc. *of šāpaṭ H9149*) can be translated "rulers, chieftains, leaders." Samson is the last "judge" mentioned before the transitional period of ELI and SAMUEL to the monarchy. Israel's most formidable enemies at this time were the Philistines, whom God had used to oppress Israel because of their evil deeds (Jdg. 13:1). Into this situation Samson was born in order to begin to deliver Israel from the hand of the Philistines (13:5).

III. Birth. The four chapters of Judges devoted to Samson were built on the theme of a broken vow—a time-honored motif in the history of literature. Even before he was born, Samson was designated as a NAZIRITE, and the writer took a full chapter to emphasize that element (Jdg. 13).

Samson was born into a family from the tribe of DAN. His parents had formerly been childless because of the wife's BARRENNESS (Jdg. 13:2). In the ancient world, childlessness was considered one of the worst things that could happen to a couple, and particularly to the woman, whom the husband could divorce for this reason. Male children were more desirable for three reasons: (1) they carried on the family name (note the frequent mention of "X son of Y" throughout the Bible); (2) their labor was more valuable in an agricultural society; (3) they were not as expensive as girls, because a girl of marriageable age had to have a dowry from her father. It is not surprising then that the Bible makes emphasis on several barren women whom God empowered to have a son: SARAH (Gen. 16:1; 18:1 – 15; 21:1 – 3); REBEKAH (25:21 – 26); RACHEL (30:1 – 2, 22 – 24); HANNAH (1 Sam. 1); and ELIZABETH (Lk. 1:5 – 25).

Because of the unusual character of such births, they were sometimes divinely announced ahead of time. Both ABRAHAM, the husband of Sarah, and ZECHARIAH, the husband of Elizabeth, were told that their barren wives would conceive. However, the annunciation of Samson did not come to his father, Manoah, but to his mother, who remains unnamed. Manoah prayed for an additional visit of the man of God, and when the request was granted he asked for instructions regarding the nurture of the promised son. Eventually Manoah presented a sacrifice to the angel and asked his name (Jdg. 13:15 –

17). He received no answer, since names were considered the essence of a person, and to know the name would have carried with it the ability to control the person (cf. Gen. 32:29). Only after the angel disappeared in the flame of the sacrifice did Manoah and his wife realize that they had been talking to an ANGEL (Jdg. 13:21 – 23).

Central to the promise of a son were the instructions the angel gave. The boy to be born was to be consecrated to God as a Nazirite from birth. The Nazirite vow involved three prohibitions: (1) against eating or drinking the fruit of the vine; (2) against contamination by any unclean thing; (3) against cutting the hair. Three times the injunction was repeated, each time addressed to his mother (Jdg. 13:4 – 5, 7, 14). The implication is that the boy was to be so completely consecrated to God that his mother had to refrain from these things while he was still in the womb. The repetitions were clearly purposeful, and leave the reader with no uncertainty regarding the theme of the story.

The regulations for a Nazirite are given in Num. 6:2 – 21, but in the book of Judges the order was changed so that the prohibition against the cutting of the hair came last. This again was purposeful, since the climax of the story came when Samson broke his vow and allowed his hair to be cut.

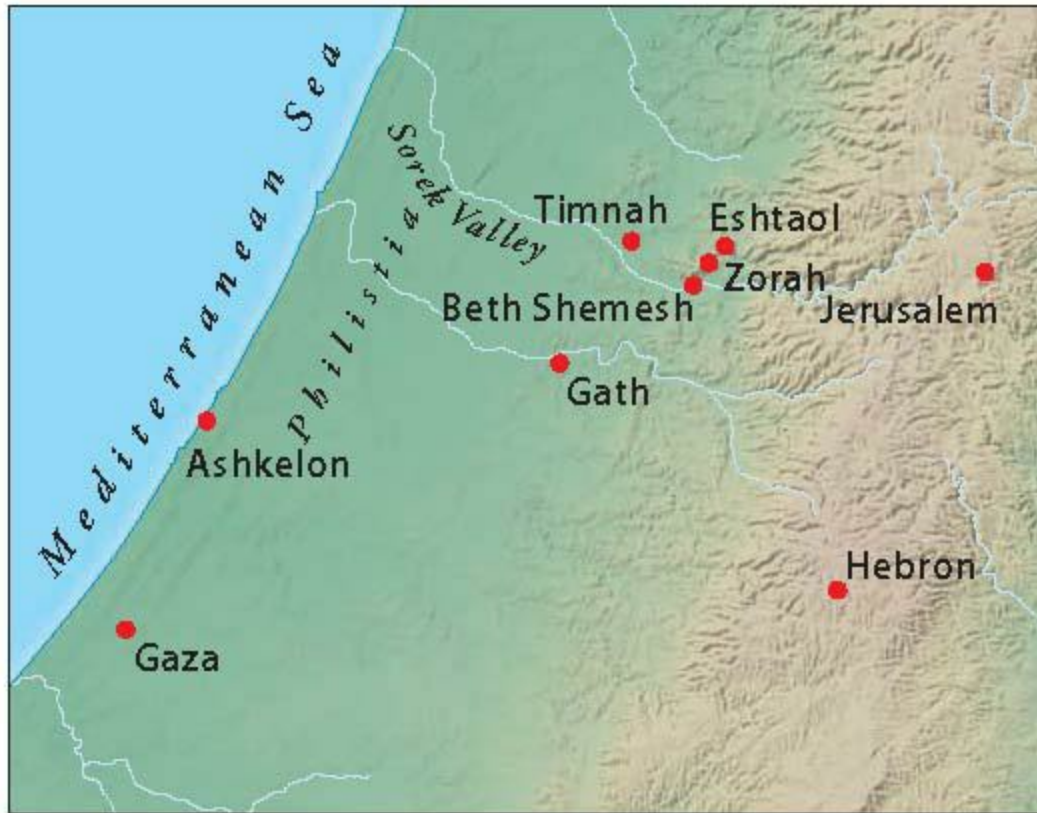
IV. Life. Samson's life was the story of his breaking the Nazirite vow. Hebrew storytelling is at its best in describing how he violated the prohibitions, climaxing with the cutting of his hair by DELILAH.

Samson's first adventure, or misadventure, involved a trip down to TIMNAH (Jdg. 14:1 – 4), a town in Philistine territory but not more than a few miles from Samson's house in ZORAH. Passage between Israel and Philistia was easy because the Philistines controlled SW Israel (15:11). In Timnah, Samson fell in love with a Philistine woman. This was to be the first of three women who were to prove his undoing. Samson came home to his parents with the request that they acquire her as his wife. Although his parents objected, preferring instead an Israelite for a daughter-in-law, God "was seeking an occasion to confront the Philistines" (14:4).

Two additional trips to Timnah to see his girlfriend brought the first violation of his Nazirite vow (Jdg. 14:5 – 9). On one occasion he met a lion on his way and killed it with his bare hands (14:6). He stopped to see the carcass of the lion on his next trip, and found it full of honey. So he took some, ate it, and brought some home to his parents. Numbers 6:6 specifically indicates that a Nazirite was not to go near a dead body. Since the text says that Samson did not tell his parents what he had done (Jdg. 14:6, 9), the implication is that he knew he was breaking his vow.

Samson's fourth trip to Timnah was to marry the Philistine woman (Jdg. 14:10–20). He gave a feast to celebrate the occasion. The Hebrew word for "feast" *(mišteh H5492)* implies a drinking bout, which the Philistines would have enjoyed. Though the text does not specifically say that Samson drank, the clear implication is that he did, and thereby broke the second regulation of his Nazirite vow.

Also at the wedding festivities Samson proposed a RIDDLE that turned on a play of words (Jdg. 14:14, 18; cf J. R. Porter in *JTS* 13 [1962]: 106 – 9). His friends answered the riddle, apparently waiting until the last moment before the marriage was to be consummated (14:18). Enraged, Samson went to ASHKELON, killed thirty men, and used their garments to pay off the wager he had made with his friends. He then returned home without consummating his marriage. Some have argued that the intended marriage was a type of matriarchal marriage known as *sadiqâ,* where the husband either lives with his wife's family or makes periodic visits to her. However, since Samson left in a rage (14:19) we do not know whether he intended to bring his bride home after the ceremonies were over or live at her house.

When he returned to Timnah to visit his wife, he was prevented by her father; she had been given in marriage to Samson's best man (Jdg. 15:1 – 2). According to Canaanite custom, influenced by Sumerian and Babylonian law, the father could give his daughter away to someone else when the first bridegroom left before the consummation of the marriage. But it was expressly forbidden to give her to the best man, who was to protect the groom's interests. Samson's revenge was to burn the corn fields of the Philistines in heroic fashion by attaching torches to the tails of 150 pairs of foxes (15:3–5). Ovid tells that it was customary to send foxes into the fields with firebrands tied to their tails at the annual festival of Ceres *(Fasti* 4.680ff.).


The story of Samson is closely connected to the Sorek Valley and the Philistine Plain.

A similar tactic was employed by Hannibal when he scared the Roman troops by sending oxen into their fields with firebrands tied to their horns (Livy, *Hist*. 22.16ff.). The Philistines, knowing that the law was on Samson's side, took revenge on the bride and her father by burning them—the common treatment of an adulterer (15:6). So Samson responded by killing many Philistines (15:8). Later, on another occasion, he killed a thousand Philistines with only the jawbone of a donkey (15:15 – 16).

Samson's second woman was a harlot he found in GAZA (Jdg. 16:1 – 3). While Samson was having sexual relations with her, the Philistines plotted his death. But despite their well-laid plans, he escaped by carrying the city gates to a hill near HEBRON, some 40 mi. away. This was the worst humiliation, because city gates symbolized national strength.

Samson's breaking of his third vow brought his downfall. The Philistines were desperate and plotted his end continuously. Their opportunity came when Samson fell in love with Delilah, the third woman in his life (Jdg. 16:4 – 22). She lived in the valley of SOREK, only a few miles from his home. The Philistine lords, who were five in number (cf. 3:3) and ruled the Philistine pentapolis, now came to Delilah with a fantastic bribe. Each offered her 1,100 pieces of silver, a sum with purchasing power well into five figures. She is nowhere named as a Philistine and perhaps she was not, since the bribe was so high. Yet her collaboration seems to indicate she was a Philistine; the size of the bribe

would then show how valuable Samson was.

Delilah immediately went to work with all her womanly charms, seeking the key to Samson's strength. For a while she failed, as Samson deceived her three times by giving false information: (1) snapping seven fresh bowstrings (Jdg. 16:6 – 9); (2) breaking new ropes (16:10 – 12); (3) removing a whole loom woven into his seven locks of uncut hair (16:13 – 14). This last event brought the story to the point of climax because Samson's deception regarding his hair came close to revealing the truth (note also the literary device of three items climaxed by a fourth one, Amos 1:3 et al.). The climax itself came when Samson succumbed to Delilah's coaxing and told her that his strength resided in his hair. She lulled him to sleep and cut off his seven locks, depriving Samson of his strength. In addition, Samson was made a captive of the Philistines. His eyes were put out (a customary penalty, cf. 1 Sam. 11:2 and 2 Ki. 25:7), and he was set to grinding in a prison at GAZA (Jdg. 16:21). Here his hair began to grow again (16:22).

On one occasion, Samson killed 1,000 Philistines with the jawbone of a donkey (Jdg. 15:15).

Samson was not the only one whose long hair was associated with heroic strength. Achaean warriors often were called the "long-haired" (Homer, *Iliad* 2.323, 443 et al.). The fighting strength of the god Phoebus was associated with his unshorn hair (ibid., 20.39). Finally, the GILGAMESH Epic states that the mighty Enkidu had long hair like a woman; and the glyptic art bears this out.

V. Death. Samson's death came with his final heroic deed. To celebrate Samson's capture and give

glory to DAGON, their god, the Philistines assembled at a temple in Gaza. Samson was called out of prison to make sport before the assembled body. Led by a little lad to a position between two pillars, Samson asked to feel the pillars. He then prayed to God for strength to avenge himself. God answered, and Samson pulled down the supporting pillars of the temple.

Though it resulted in his own death, he killed more Philistines with this act than during all of his life. He had judged Israel for twenty years (Jdg. 16:28 – 31).

VI. Character. Samson was a somewhat enigmatic figure, with very little similarity to other judges. He resembled them only by being possessed of the Spirit, who seized him suddenly and drove him to violent action, exhibiting itself in extraordinary strength. But his exploits were always individual. He called no one else to his aid, led no troops to battle, and was in no sense a national leader. In fact, all he did was to avenge his own personal wrongs on the Philistines. Yet the key to the understanding of Samson is to be found in these individual exploits. They are of such extraordinary proportions that Samson must be understood as a heroic figure, living in a heroic age, and recorded in heroic literature. (For evidence, see the writings of C. H. Gordon, esp. *The Common Background of Greek and Hebrew Civilizations* [1965], and the unpublished dissertation of C. E. Armerding, *The Heroic Ages of Greece and Israel: A Literary-Historical Comparison* [1968]). Comparisons with other heroic figures, such as Hercules and Gilgamesh, are very illuminating. But comparisons do not mean point-for-point parallels. It is stretching the evidence, for example, to find twelve labors of Samson to parallel the twelve labors of Hercules, as some have done. (See G. G. Cohen in *EvQ* 42 [1970]: 131 – 41.)

VII. Historical significance. The setting of Samson's exploits was along the border between the Philistines and the tribe of Dan. Thus the primary historical significance of the story is the insight it gives us into life along the border. This information is largely sociological—marriage customs and wedding festivities, relationships with women, riddles, bribes, etc. There is also information about the Philistine domination of Israel. The tribe of Dan at one time had expanded out to the Mediterranean coast (Jdg. 5:17), but in Samson's day both Dan and Judah were controlled by the Philistines (15:11). The pressure was so great that at least part of the tribe of Dan migrated N (chs. 17 – 18). The weapons of Samson—a jawbone, his bare hands, and physical strength—clearly indicate that Israel was without the weapons of war and explain the Philistine success. The Philistines had a superior material culture that included the smelting of IRON. They specifically guarded this knowledge and prevented the Israelites from learning it and using it to make iron weapons (1 Sam. 13:19 – 23). Thus Israel was no match for the Philistines, unless they had a man of extraordinary strength like Samson fighting for them.

VIII. Religious significance. Since Samson is a heroic figure living in a heroic age, one must be careful in drawing religious significance from his life. His exploits resulted from the circumstances of a rough-and-ready life. Thus his virtues and vices were those of the heroic age in which he lived and should not be imitated or avoided, as the case may be. Samson broke his Nazirite vow and disobeyed God, and therein is his religious significance. His life is a negative example of a charismatic leader who came to a tragic, yet heroic, end. Nevertheless, his partial victory over the enemy was reason to be named with the heroes of the faith (Heb. 11:32).

(In addition to the standard commentaries on Judges, see P. Carus, *The Story of Samson and Its Place in the Religious Development of Mankind* [1907]; A. S. Palmer, *The Samson-Saga and Its*

Place in Comparative Religion [1913]; A. G. Van Daalen, *Samson* [1966]; J. L. Crenshaw, *Samson: A Secret Betrayed, a Vow Ignored* [1978]; id., "Samson," in *ABD*, 5:950 – 54; P. J. C. MOYER

Samuel sam'y*oo*-uhl (שְׁמוּאֵל *H9017*, derivation uncertain [see also SHEMUEL, rendered "Samuel" by NIV in 2 Chr. 7:2]; Σαμουήλ *G4905*). The last Israelite leader prior to the monarchy (see JUDGES, PERIOD OF). In his ministry Samuel served as judge, priest, and prophet. The first nineteen chapters of 1 Samuel provide the basic source material for his life. The Hebrew form *šĕmûʾēl* possibly means "his name is God" (see *HALOT*, 4:1554 – 55; J. D. Fowler, *Theophoric Personal Names in Ancient Hebrew* [1988], 119, 124), but by a wordplay on the verb *šāmaʿ H9048* (note the consonant ʿ*ayin* rather than ʾ*aleph*) it can be understood as "heard by God" (1 Sam. 1:20; the explanation here also evokes the name שָׁאוּל *H8620*, "one asked for"; see SAUL).

The parents of Samuel were ELKANAH and HANNAH. By lineage Elkanah was a Levite, a descendant of KOHATH but not of the Aaronic line (1 Chr. 6:26, 33 [KJV, "Shemuel"]). Geographically Elkanah was identified as an Ephraimite, since he lived in the mountainous territory of EPHRAIM in the city of Ramah, more specifically identified as Ramathaim (1 Sam. 1:1; see RAMAH #3).

Samuel's parents were God-fearing Israelites who annually went to SHILOH to worship at the TABERNACLE. Hannah, who was not blessed with children as was Elkanah's other wife PENINNAH, made it a matter of earnest prayer that she might have a son (1 Sam. 1:10 – 11). In due time when God granted her request she named her son Samuel and kept her vow by dedicating him to a life of service (vv. 20 – 38). Whereas Samuel as a Levite might have started priestly service at the age of twenty-five, he was, through this act of dedication by Hannah, brought to the tabernacle as a child. Elkanah and Hannah returned annually to supply Samuel with clothes while he was reared in Shiloh under the supervision of ELI the priest. Hannah's song of praise is recorded in 2:1 – 10.

Although Samuel came from a godly home, the tabernacle environment was not godly. Eli, the high priest in Israel, had failed to teach his sons the fear of God according to his paternal responsibility prescribed in the book of Deuteronomy. Consequently, his sons HOPHNI and PHINEHAS had neither respect for their father nor reverence for God in their duties as priests. Through their violation of the laws of sacrifice and their immoral acts with women, the sons of Eli precipitated God's judgment upon Eli's family as announced by a prophet identified as a man of God (1 Sam. 2:27 – 36). In this environment at the central sanctuary in Shiloh, the child Samuel grew to young manhood.

While these conditions prevailed and Eli was aging, the divine call came to Samuel (1 Sam. 3:1 – 18). Fortunately Eli had enough spiritual perception to advise Samuel that God was speaking to him. When Samuel responded in an attitude of obedience, saying, "Speak, for your servant is listening," he became the recipient of God's message of judgment upon the house of Eli. Pressed by Eli, the young man Samuel as a spokesman for God shared with Eli the solemn divine verdict that the iniquity of Eli's priestly family could be purged with neither sacrifice nor offering.

Subsequent to his call, Samuel was established as a prophet in the land of Israel from the southern border of BEERSHEBA to the northern extremity of DAN. Although details concerning Samuel himself are briefly given in the record, the general conditions are vividly portrayed.

The low ebb of Israel's religion is apparent in the crucial battle with the PHILISTINES in the

APHEK area, c. 35 mi. NW of JERUSALEM. Losing the battle, the Israelites prevailed upon Hophni and Phinehas to bring the ARK OF THE COVENANT, which was considered the holiest object in Israel, to the battlefield (1 Sam. 4:1 – 3). Religion among the Israelites had declined to such a low perspective spiritually that they believed God's presence was materially associated with the ark. Believing that God would not let himself be captured, they anticipated a divine intervention that would bring them victory. The nation of Israel, however, was shockingly defeated, and the ark was captured by the Philistines. The sons of Eli were killed in battle; Eli himself died when news reached him that the ark was stolen and that in all probability the city of Shiloh was destroyed by the Philistines. Although the biblical narrative does not mention the destruction of Shiloh, there are references in Jeremiah (Jer. 7:12, 14; 26:6, 9) and in Psalms (Ps. 78:60) that imply that it had been destroyed. Shiloh ceases to be mentioned as a religious center after 1 Sam. 4. (See W. F. Albright in *BASOR* 9 [Feb. 1923]: 10 – 11, for archaeological information; cf. also H. Kjaer in *JPOS* 10 [1930]: 87 – 114.)

Years later, possibly twenty, the ark was returned and stored in the home of ABINADAB in KIRIATH JEARIM. During these years Samuel must have been very active in his teaching ministry throughout Israel, challenging the people to turn from IDOLATRY (1 Sam. 7:1 – 3). When the Israelites responded favorably, Samuel called a national public assembly at MIZPAH in BENJAMIN where they fasted and prayed. Learning of this gathering, the Philistines organized a military attack on Mizpah. As a prophet-statesman Samuel prayed for Israel and officiated as a priest in offering sacrifice. Through a divinely sent thunderstorm, the Philistines were confused and subsequently routed. In memory of this miraculous intervention and victory Samuel erected a stone, naming it EBENEZER ("stone of help"), acknowledging, "Thus far has the LORD helped us" (v. 12). In this way Samuel's ministry as a prophet led the Israelites into a wholehearted love relationship with God, resulting in Israel's victory over the Philistines, and brought temporary peace to the Israelites.

Samuel resided in Ramah, where he built an altar to God (1 Sam. 7:17). As judge, Samuel held courts annually in BETHEL, GILGAL, MIZPAH (vv. 15 – 16), and probably in numerous cities throughout the land that are not mentioned in the biblical record. Samuel had gained the respect of the Israelites as a judge and as a prophet throughout the entire nation. However, Joel and Abiah, the sons of Samuel, were apparently known as judges who accepted bribes, twisted justice, and consequently did not reflect the dimensions of a prophetic ministry.

When the Israelites confronted Samuel with the request for a king they gave two reasons for their petition. Negatively, they were disappointed in Samuel's delegation of authority to his sons, and, positively, they wanted to be like other nations by having a king. Samuel was greatly disturbed by this request, but he was divinely assured that this was God's permissive will and that he should outline the responsibilities the Israelites would assume under a king (1 Sam. 8:1 – 22). Reluctantly, Samuel consented to their plea for a king.

As prophet in Israel, Samuel was divinely commissioned to anoint SAUL as king. Searching for his father's donkeys, Saul came into the Ephraim highlands in the Zuph district. At his servants' suggestion, Saul went to Ramah to inquire of the prophet Samuel. The latter detained him until the next day and privately anointed him as king of Israel. He later anointed Saul publicly (1 Sam. 9:1—10:27).

Samuel's commission to anoint Saul as king made it very plain that a king in Israel was leader over God's people Israel (1 Sam. 9:16) or "over his inheritance" (10:1). Saul was anointed by a prophet who had been divinely confirmed through miracles and was recognized in his ministry as a spokesman for God. The people over whom the king was to rule were God's people and God's possession. The "leader" or king had stewardship responsibility, being accountable to God for the

power he exercised as a ruler over the Israelites. As Samuel outlined the ways of the kingdom (10:25), he provided a written copy that was deposited "before the LORD," and in all likelihood was kept with the other written documents which Moses (Deut. 31:9) and Joshua (Josh. 24:25 – 26) and possibly others had provided previously. The position of a king as indicated by Samuel was in accord with what Moses had prescribed in Deut. 17, that the king as well as his people were to be subject to the written terms of God's revelation given through Moses.

Samuel publicly reaffirmed his support of Saul after his initial victory over the Ammonites. He assured all Israel of his intercessory prayers and warned them about the dangers of diminishing their attitude of wholehearted devotion to God (1 Sam. 11 – 12). Serving in his capacity as priest and prophet, Samuel warned Saul about his failures and reminded him of his responsibilities. Becoming impatient in waiting for Samuel in Gilgal, Saul assumed the priestly responsibility of officiating at the offering of a burnt sacrifice (13:8 – 15). When Samuel arrived, he reprimanded Saul that as prince over God's people he had failed, then warned him that his kingship would not last.

When Samuel was divinely instructed to commission Saul to execute God's judgment upon the Amalekites, Saul failed in this assignment, and the relationship between prophet and king was crucially strained. On this occasion Samuel distinctly enunciated the basic principle that obedience is better than sacrifice (1 Sam. 15:22). With the solemn warning that Saul had forfeited the kingdom, the prophet Samuel and King Saul parted. Samuel returned to Ramah to grieve over Saul and his failures as king of Israel.

Nebi Samwil, traditional burial place of the prophet Samuel marked by a modern-day minaret.

Subsequently Samuel was divinely commissioned to offer sacrifice in BETHLEHEM and anoint DAVID as king of Israel (1 Sam. 16). Fleeing from Saul, David was temporarily sheltered in Samuel's home in NAIOTH of Ramah (19:18). When Saul attempted to arrest David, the Spirit of God came upon Saul's police officers as well as upon Saul himself as soon as they met Samuel and the prophets associated with him. When Samuel died, all Israel mourned his death (25:1; 28:3). He was buried at Ramah.

The final message of Samuel came to Saul after Samuel's death. Facing defeat by the Philistines on Mount GILBOA, Saul in desperation conferred with a woman in ENDOR who was a spirit-medium.

Beyond this woman's control, Samuel spoke directly to Saul, informing him that death awaited Saul and his sons the next day (1 Sam. 28:4 – 19).

Although Samuel served as judge and priest, he made the most significant impact upon Israel's religious life as a prophet. Whereas the greatest revelation to Israel as a nation came through MOSES, it was Samuel who represented God in the anointing of the first two kings of Israel. After Moses' death the written revelation provided guidance for JOSHUA, who was confirmed by miracles in divine leadership. During the reign of the judges, DEBORAH and an unnamed prophet (Jdg. 4:4; 6:8) are the only ones specifically identified as speaking for God. Samuel responded to God's call, and through his prophetic ministry not only revived his generation but also influenced others to respond to the prophetic ministry. Numerous prophets seem to have arisen during this era. NATHAN, GAD, and others during Davidic times may have been influenced by Samuel as he taught throughout the cities of Israel.

In his religious leadership responsibilities, Samuel as well as David appointed gatekeepers for the tent of meeting (1 Chr. 9:17 – 26). Samuel also observed the PASSOVER in such a memorable manner that it was unsurpassed until the time of JOSIAH (2 Chr. 35:18). Gifts for the house of God were also dedicated under Samuel's leadership. In addition to the book deposited "before the LORD" (1 Sam. 10:25), Samuel is also credited with writing a volume identified as "the records of Samuel the seer" (1 Chr. 29:29). The account of Samuel's life and ministry and the national developments up to the time of his death may reasonably be credited to Samuel as they are given in the book bearing his name. See SAMUEL, BOOKS OF.

Samuel is known as a great man of prayer and intercession (1 Sam. 15:11; Ps. 99:6) through whom God's blessing came to Israel. He ranks high among the prophets and outstanding leaders through whom God's favor was evident among his people (Acts 3:24; 13:20; Heb. 11:32). (See further J. P. Free, *Archaeology and Bible History* [1956], 146 – 53; M. Noth, *The History of Israel* [1958], 164 – 78; H. Snell, *Ancient Israel* [1963], 49 – 70; S. J. Schultz, *The Old Testament Speaks*, 4th ed. [1990], 115 – 25; J. Bright, *A History of Israel*, 4th ed. [2000], 184 – 92; J. Hutzli, *Samuel und Saul: Ein Beitrag zur narrativen Poetik des Samuelbuches* [2005].)

    3. The Davidic covenant

I. Title. As in the case of the books of KINGS, 1 and 2 Samuel were originally one book in the Hebrew Bible. The Greek version (see SEPTUAGINT) apparently first made the division into two books by calling them *bibloi basileiōn a* and *b,* that is, 1 – 2 Kingdoms (or Reigns). In similar fashion, Kings became 3 – 4 Kingdoms, since the content continued the historical sketch begun in Samuel. (Toward the end of the 4th cent. A.D., JEROME affixed the title *Libri Regum,* Books of Kings, to these four books. His modification of "Kingdoms" to "Kings" was intended to reflect the Hebrew title, *mĕlākîm,* for the books we now call 1 – 2 Kings. Eventually the Latin VULGATE reverted to the name "Samuel" for the first two books.) In the Hebrew Bible, the division into 1 and 2 Samuel first appears in a 1448 MS. Daniel Bomberg's printed edition of 1516 acknowledged the division of Samuel and Kings into four books, but it preserved the Hebrew title for each pair. This practice has been continued in subsequent editions.

Samuel's name was attached to these books because of his prominence in the first sixteen chapters of 1 Samuel with regard to the establishment of the monarchy. It was he who, as the last judge (see JUDGES, PERIOD OF), anointed the two kings who hold the spotlight in 1 and 2 Samuel. Talmudic tradition also ascribes the authorship of part of 1 Samuel to the prophet *(b. Baba Batra* 14b).

II. Content.

The unity of 1 and 2 Samuel is evident from the close links which tie the books together. The major divisions in the outline do not include a break at the end of 1 Samuel. Instead, the summary passages in 1 Sam. 14 and 2 Sam. 8 provide the keys to understanding the structure of the books.

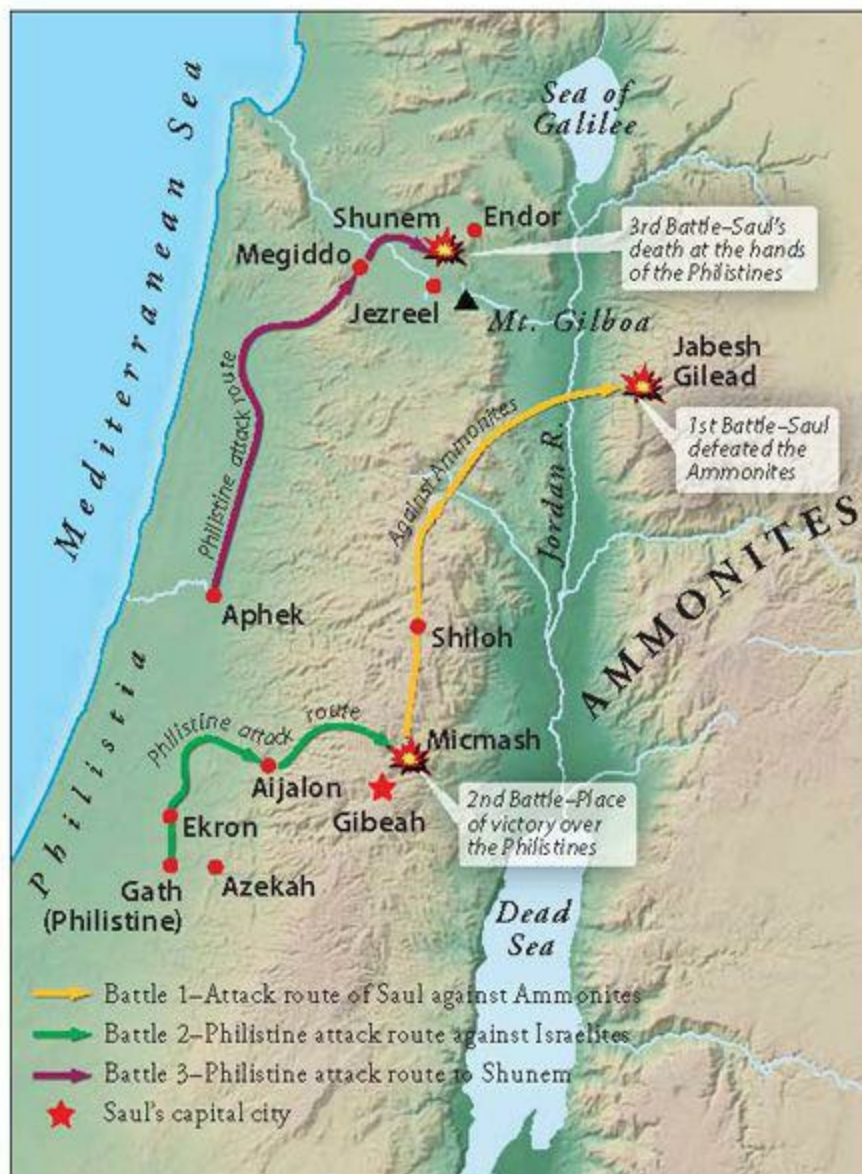
## A. Samuel and the reign of Saul (1 Sam. 1 – 14)

1. The ministry of Samuel (1 Sam. 1 – 7)

Samuel's birth and Hannah's song (1 Sam. 1:1—2:10). The book begins by relating God's gracious answer to the faithful prayers of childless HANNAH. Samuel, the son for whom she prayed, was dedicated to the Lord as a child and made a servant to the high priest ELI. Hannah's song of thanksgiving for the goodness of the sovereign God is recorded in ch. 2.

Samuel's ministry under Eli (1 Sam. 2:11—3:21). In contrast to the faithfulness of the boy Samuel, Eli's sons were godless men who even stole the sacrifices of the people. One night, God revealed to Samuel that Eli's family would be cut off from the priesthood because of the blasphemy of the sons Eli had failed to discipline.

Philistine victory destroys Eli's family (1 Sam. 4:1 – 22). God's prediction came true when the PHILISTINES routed the Israelite army, killing Eli's two sons and capturing the coveted ARK OF THE COVENANT. At the news of this catastrophe, the aged Eli fell heavily, mortally injuring himself.

The captivity and return of the ark (1 Sam. 5:1—7:17). The Philistines soon discovered that their battle prize, deposited near the idol of DAGON, resulted in the smashing of that idol and in outbreaks of TUMORS. After circulating the ark unsuccessfully from city to city, the Philistines sent it back to Israel accompanied by an appropriate guilt-offering. Samuel used the occasion of the ark's return to recall all the people to the true worship of God. Another battle with the Philistines ensued, and God overthrew them decisively.


The battles of Saul.

2. The initial years of Saul's reign (1 Sam. 8 – 14)

The request for a king (1 Sam. 8:1 – 22). In Samuel's old age, the people insisted that he appoint for them a king, so that Israel could be like all the other nations. Samuel resisted their demand by showing that a king would draft their children into his service and would tax their goods. Nevertheless, the people persisted and God instructed Samuel to comply with their request.

Saul anointed as king (1 Sam. 9:1—10:27). God's choice as king was a tall, handsome Benjamite named SAUL. While searching for stray donkeys, Saul and his servant asked Samuel for help. The prophet responded by anointing Saul, who subsequently experienced the mighty power of the Holy Spirit. Later, the humble, reluctant Saul was presented to the jubilant people.

Saul victorious over the Ammonites (1 Sam. 11:1 – 15). Saul passed his first test as king in splendid fashion. He rescued the people of JABESH GIL-EAD from a serious Ammonite threat by winning a solid victory.

Samuel's charge to Israel (1 Sam. 12:1 – 25). In his last address to the people, Samuel reviewed parts of Israel's history and warned Saul and his subjects that they would be swept away unless they were faithful to the commandments of God.

Saul and Jonathan war successfully against the Philistines (1 Sam. 13:1—14:52). After an initial successful skirmish, Saul and his son JONATHAN had to face the entire Philistine army. Saul, in his anxiety to ask for God's favor, offered sacrifices himself. Samuel informed him that God would terminate his reign on account of this disobedience. Through Jonathan's bravery the Israelites triumphed; but Jonathan had unwittingly violated an oath against eating imposed by Saul. The people rescued Jonathan from certain death at the hands of his father.

B. The rise of David to the throne (1 Sam. 15—2 Sam. 8)

1. David's struggle with King Saul (1 Sam. 15 – 31)

Saul's disqualification after Amalekites defeated (1 Sam. 15:1 – 35). Coupled with Saul's intrusion into the priesthood in ch. 13 was his failure to devote to complete destruction all the goods of the defeated Amalekites (see AMALEK), including animals and the king, AGAG. Samuel denounced Saul for this and revealed clearly that he was being rejected as king.

David is anointed and plays for Saul (1 Sam. 16:1 – 23). Saul's successor was a talented young shepherd from BETHLEHEM named DAVID. Samuel anointed David, upon whom the Spirit of God then came. Ironically, David was soon invited to Saul's court as a musician to soothe the king, from whom the Lord's Spirit had recently departed.

David's victory over Goliath (1 Sam. 17:1 – 58). David displayed his great faith in God by defeating in single combat the nine-foot Philistine menace, GOLIATH. This was the first of several military victories by David which displayed his ability as a leader and endeared him to the people.

David's flight from Saul and friendship with Jonathan (1 Sam. 18:1—20:42). The jealousy of the deteriorating king was soon aroused against his successful young rival. David became a target for Saul's spear and was sent into battle by Saul in the hope that he would be killed. JONATHAN, however, made a covenant with David, insuring their friendship, and helped him escape from Saul.

David's plight occasions priests' disaster (1 Sam. 21:1—22:23). In his desperation, the fleeing David persuaded AHIMELECH and the priests at NOB into giving him supplies and arms. A leading servant of Saul overheard the discussion and related it to Saul. The enraged king then commanded the death of all the priests for allegedly conspiring with David against the crown.

David's mercy to the pursuing Saul (1 Sam. 23:1—24:23). Relentlessly, Saul now tried to capture David, who was hiding in the Judean wilderness. David had the opportunity of slaying his tormentor in a cave, but he refused to strike down the Lord's anointed. By revealing his mercy to Saul, David secured a temporary repentance from the pursuing king.

David and Abigail (1 Sam. 25:1 – 44). This chapter partly explains how a fugitive like David could survive in the desert. The protection that he and his men afforded NABAL'S possessions should have been rewarded with supplies. When Nabal refused to pay, David decided to attack, but the wise intercession of Nabal's wife restrained him. After Nabal died, Abigail became one of David's wives.

Saul's repentance and David's despair (1 Sam. 26:1—27:12). Forgetting his earlier promises, Saul resumed his pursuit of David. Once more, David passed up an opportunity to kill the sleeping king, and the king responded by begging David's forgiveness. But David doubted Saul's sincerity with good reason and fled to the Philistines, allying himself temporarily with ACHISH, king of GATH.

Saul and the witch of Endor (1 Sam. 28:1 – 25). When the Philistines with David on their side prepared to attack Israel, Saul rightly trembled and sought a message from God. Unable to contact him through legitimate means, he resorted to divination, inducing a medium to produce the departed Samuel for him. Samuel announced that disaster lay ahead for Saul and Israel.

David rejected by Philistines and victorious over Amalekites (1 Sam. 29:1—30:31). As the armies prepared for battle, the suspicious Philistine commanders voted to dismiss David from their ranks, lest he decide to fight for Israel. Returning to ZIKLAG, David discovered that the Amalekites had burned the city and carried off the women and children. After inquiring of the Lord, David and his men recovered all the people and goods.

Death of Saul and Jonathan (1 Sam. 31:1 – 13). First Samuel ends with the short account of the great Philistine victory. Saul and his sons were killed on Mount GILBOA, and the Philistines celebrated.

2. David's unification of Judah and Israel (2 Sam. 1 – 8)

David's lament over Saul and Jonathan (2 Sam. 1:1 – 27). Instead of gloating over the fall of his enemy, David lamented the death of these men. He eulogized their courage and strength and particularly mourned for his dear friend Jonathan.

David is made king of Judah, and Ish-Bosheth succeeds Saul (2 Sam. 2:1 – 32). The people of Judah were the first to crown their tribesman and good friend (cf. 1 Sam. 30:26 – 30), the heir apparent to Saul's throne. Meanwhile, general ABNER had installed a surviving son of Saul, ISH-BOSHETH, as king over the rest of Israel. Serious fighting soon broke out between the two factions.

Abner and Ish-Bosheth assassinated (2 Sam. 3:1—4:12). When Ish-Bosheth accused Abner of disloyalty, the powerful commander decided to support David and unify Israel under his rule. These plans were thwarted by JOAB, who quickly killed his potential rival general to avenge his brother's death, much to the disgust of David.

David is made king over all Israel (2 Sam. 5:1 – 25). Finding themselves without leadership, the rest of the tribes now acknowledged David's right to rule the entire nation. David responded by storming the stronghold of ZION, which was still under Jebusite control. The Philistines then failed in an attempt to defeat David before he could consolidate the forces of a united Israel.

David brings the ark to Jerusalem (2 Sam. 6:1 – 23). Unlike Saul, David was intensely interested in the worship of the Lord, including the role of the ark of the covenant, which had lain neglected during his predecessor's reign. Thus it was with great joy that the king led the procession bringing the ark to the new capital.

The Davidic covenant (2 Sam. 7:1 – 29). David's zeal for God moved him to consider the need for a TEMPLE to house the ark. Although God postponed the fulfillment of David's wish, he promised that David's dynasty would possess the throne of Israel eternally.

Summary of David's rule (2 Sam. 8:1 – 18). This chapter outlines the expansion of David's kingdom under the prospering hand of God. Israel's major enemies were all defeated as the empire and fame of David were extended.

C. Problems in the reign of David (2 Sam. 9 – 20)

1. David's kindness to Mephibosheth (2 Sam. 9:1 – 13). In relating to the descendants of Saul, David displayed covenant kindness toward the crippled son of Jonathan. He restored property to MEPHIBOSHETH and provided for his material needs.

2. Victory over Syrians and Ammonites (2 Sam. 10:1 – 19). In battles perhaps already referred to (ch. 8), David defeated a coalition of Arameans and Ammonites after the latter had badly insulted David's messengers.

3. David's sins involving Bathsheba (2 Sam. 11:1—12:31). The problems of David increased quickly after he committed adultery with BATHSHEBA. This led to the murder of URIAH and the sharp displeasure of God. NATHAN delivered a pointed parable that brought the king to repentance. After the death of Bathsheba's first child, SOLOMON was born.

4. The sins of Amnon and Absalom (2 Sam. 13:1—14:33). When AMNON, David's son, raped his half-sister TAMAR, ABSALOM retaliated by murdering Amnon two years later. Absalom fled from David not to be recalled to Jerusalem for three years. Relations between the king and Absalom remained strained.

5. Absalom's rebellion and death (2 Sam. 15:1—18:33). Absalom's bitterness toward David erupted into a full-fledged rebellion that forced the king to flee from the capital. By leaving a few faithful followers in Jerusalem, David was able to nullify the wise advice AHITHOPHEL gave to Absalom. The forces of David and Absalom finally clashed, with Joab gaining the victory for David. Contrary to the king's express orders, Joab killed Absalom, deeply grieving David.

6. David's recovery of power (2 Sam. 19:1—20:26). Gradually, Judah and Israel united again behind David, conducting him back to Jerusalem. A Ben-jamite named SHEBA, however, led a short-lived rebellion against the king.

D. Conclusion (2 Sam. 21 – 24)

1. Gibeonites avenged; victory over Philistines (2 Sam. 21:1 – 22). The last four chapters of 2 Samuel appear to be appended to the book without reference to chronological order. First, the cause for a famine was found in Saul's killing of certain Gibeonites, whom the Israelites were bound by treaty to protect. Several of Saul's descendants were hung by the Gibeonites to avenge Saul's folly. Later David again waged war with the Philistines, and his men killed relatives of Goliath.

2. David's hymn of thanksgiving and last words (2 Sam. 22:1—23:7). In a hymn that also appears as Ps. 18, David praises his mighty God for deliverance from all his enemies. Then David reviews the everlasting covenant God made with him.
From David's vantage point of his palace on the ridge of the City of David, he could look down on the roof of Bathsheba's house where he saw her bathing. (View to the S.)

3. David's mighty men (2 Sam. 23:8 – 39). The thirty-seven bravest warriors of David are listed, along with a description of the achievements of the five greatest.

4. The plague because of David's census (2 Sam. 24:1 – 25). When David self-confidently insisted on numbering the nation in spite of God's prohibition, the Lord struck dead 70,000 men. The plague was finally stopped at the site of the future temple.

III. Composition

A. Critical theories. Higher critics have offered several diverse explanations as to the origin of 1 and 2 Samuel. All of them accept the composite nature of these books and seek to account for many "obvious" contradictions, duplicate accounts, and other evidences of multiple authorship over a long period of time. Many hold to the view that the Deuteronomic editors, who supposedly wrote or rewrote much of Deuteronomy – Kings somewhere between 621 and 550 B.C., were responsible for the final composition of Samuel. See DEUTERONOMISTIC HISTORY. This is asserted in spite of the different character and organization of Judges, compared, for example, with either Joshua or Samuel.

The majority of critics feel that 1 and 2 Samuel were formed by the interweaving of several sources, usually two or three. Otto Eissfeldt (*The Old Testament: An Introduction* [1965], 271 – 80) links Samuel with sources J (Yahwist), E (Elohist), and L (Lay) of the documentary hypothesis. These sources, supposedly extending from Genesis to Samuel or even Kings, form the basis for these books, with E almost disappearing in Samuel. Source L, an invention of Eissfeldt, reports folk tales in colorful fashion, but has little reference to theological concerns. It does, however, evidence an interest in the ark of the covenant.

Other critics have expressed doubt as to whether or not J and E really continue in Samuel. William F. Albright (*Archaeology, Historical Analogy, and Early Biblical Tradition* [1966], 44 – 45) explicitly denies the validity of J and E for dividing Samuel: he argues that, although useful in the Pentateuch, neither they nor other criteria of form can be employed to identify the sources behind

Samuel. M. Segal (in *JQR* 55 [1965]: 318 – 39; 56 [1965]: 32 – 50, 137 – 57), who rejects the documentary hypothesis, posits a combination of two stories of David, the first being a splendid biography by a contemporary, whereas the second is of later date and legendary in origin. Added to this were independent stories of the ark, Saul, and Samuel.

The tradition-historical school emphasizes saga-cycles like the ark narratives, which circulated orally until they were written down in a loosely connected form. Some postpone the written phase until after the EXILE. Most critics believe that the material in Samuel includes both legendary "hearsay" and highly accurate historical writing. Hence, its reliability is extremely uneven. Many feel that the fragmented stories about David in 1 Sam. 16 to 2 Sam. 8 are a sort of historical novel glorifying David. They have a basis in history, but are embellished with the fanciful additions common to saga.

On the other hand, the material in 2 Sam. 9 – 20, often linked with 1 Ki. 1 – 2 under the title of the "Succession Narrative" or "Court History" of David, is regarded as a superb example of historiography. The author of these chapters is said to have been a master at character portrayal and apparently an astute eyewitness who scarcely ever deviated from the facts. The critics are willing to accept the essential unity of these chapters, in contrast with the rest of 1 – 2 Samuel.

B. Samuel in the realm of political literature. A rather close connection has been observed between 1 Sam. 15—2 Sam. 8 and a 13th-cent.-B.C. HITTITE document known as the "Apology of Hattusilis." It appeared likely that the central section of Samuel belongs to a genre of literature which could be termed a "dynastic defense" or "apology." (See the present author's dissertation, *The Apology of Hattusilis Compared with Other Political Self-Justifications of the Ancient Near East* [1967].)

In recent years the study of different genres, types, or forms of literature has been summed up under the label of FORM CRITICISM. This broad designation includes features that, from a conservative standpoint, are both positive and negative. Some aspects of form criticism are very helpful for a proper understanding of biblical literature. In the "form" or "genre" of "dynastic defense," a king or his supporters outlines those reasons that make his rule legitimate. This is particularly necessary in the case of kings like Hattusilis and David, who founded dynasties and could have been charged with usurpation. With regard to David, Saul's tribe of Benjamin might have made this accusation (cf. 2 Sam. 20). The Hittites also did not have an absolute monarch, for the nobles exercised some control over the king.

These texts have been compared to the more common annalistic writing, but several features distinguish them from that category. Ordinarily, annals follow a strict year-by-year chronological arrangement, discussing important events in a monarch's reign. Developments leading up to the enthronement of a ruler are mentioned very briefly if at all. Mursilis, the most important annalist among the Hittite kings, devotes only a few lines to the years prior to his accession. In both the central portion of Samuel and in the "Apology of Hattusilis," however, great stress is placed on events which occurred before the men became kings. There is a climactic arrangement that builds until the heroes are placed on the throne. The circumstances surrounding their success are clearly spelled out.

A further divergence from the annals relates to the summary method used. Sometimes events are treated as blocks of time, and there is no effort to move systematically from year to year. The summaries in 2 Sam. 7 – 8 tie together the activities of several years. In the Bible, a more annalistic style of writing can be found in Kings and Chronicles, where the discussion is restricted to individual reigns and does not deal with events preceding the accession of the various kings.

There are numerous parallels between the Hittite and Hebrew texts which may indicate that parts of Samuel have been patterned after the Hittite document. Both "dynastic defenses" describe in detail the disqualification of their predecessors (1 Sam. 15). Their own ability to lead and to rule is evident from repeated military success against national enemies. This is why David's slaying of Goliath and his frequent victories over the Philistines are so clearly reported.

The growing popularity of the men is also important. David was respected by the servants of Saul (1 Sam. 18:5, 30), the people in general, and the prince he was replacing, Jonathan. Even Saul, in his calmer moments, acknowledged that David would succeed him (24:20). By virtue of his marriage to Saul's daughter Michal, David increased his claim to the throne. King Hattusilis also contracted an important marriage in this regard.

A prominent characteristic of both kings was leniency toward political foes. Neither allowed his over-zealous followers to assassinate the ruling king, thus contrasting their methods to those of usurpers. Instead, both appealed to deity to plead their case as a "court battle" in heaven (1 Sam. 24:15).

After coming to power, the kings displayed great energy in religious matters. They were concerned about the worship of the nation and the blessing of one's deity (Yahweh, for David; Ishtar, for Hattusilis) upon the king (2 Sam. 6 – 7). Even ch. 7, in which the critics have seen copious Deuteronomic revision, contains a covenant relating to David and his successors, a covenant that can be paralleled in certain respects in the "Apology of Hattusilis."

Finally, both texts contain a summary of their reigns, demonstrating divine blessing upon their rule through expansion and the establishment of peace with surrounding nations (2 Sam. 8).

Within the sphere of ANE political literature there are no texts that exhibit the genre of "apology" as well as these two examples. Since there is wide evidence of the impact of foreign cultures upon Israel at this time, it is possible that this Hittite document had an important bearing upon Samuel. This would help to explain the purpose and arrangement of this section of the biblical narrative.

As mentioned earlier, the corresponding summary passages (1 Sam. 14; 2 Sam. 8) furnished the clue to the outline. Although Saul does not die until 1 Sam. 31, the listing of his family, officials, and accomplishments in 14:47 – 52 makes the transition from Saul to David. From that point on, David's rise to the throne is primary.

R. Whybray (*The Succession Narrative* [1968]) has defended the view that this narrative also has a political purpose. He compares it to the propagandist motives of political novels in Egypt. The purpose of the narrative is to justify Solomon's claim to the throne by revealing how David's other sons, such as Amnon and Absalom, were unfit to rule. To support this theory, however, 1 Ki. 1 and 2 are needed as the climax to 2 Sam. 9 – 20. This questionable view treats 2 Sam. 21 – 24 as a later insertion interrupting a continuous narrative. It would appear rather that the central section of Samuel has a much closer connection with dynastic justification.

Saul's reign and life came to a close on the heights of Mount Gilboa (1 Sam. 31), pictured here looking E from the Jezreel Valley.

C. Authorship. The theory of "dynastic defense" directly affects the matter of authorship. Tradition has attributed the writing of part of 1 Samuel to the prophet himself, but there is no indisputable evidence as to authorship. R. H. Pfeiffer (*Old Testament Introduction* [1941], 356 – 57) suggests that AHIMAAZ the priest wrote part of it, while Segal offers JEHOSHAPHAT the recorder as David's trustworthy biographer.

The perplexing reference in 1 Chr. 29:29 to the acts of David written in the books of Samuel, Nathan, and Gad offers a tempting solution. For some reason, Chronicles does not otherwise refer to 2 Samuel, with which it has many parallel passages. Either the works of these three were independent books used as sources by the writers of both Samuel and Chronicles, or else they refer to 1 – 2 Samuel.

If the three-part outline of Samuel can be substantiated, the correspondence with these men is very close. Samuel could easily have written the first half of the book. The prophet Nathan already has been suggested as the author of 2 Sam. 9 – 20, because of his close association with David's court. This would leave the other prophet, Gad, as author of the "apology." While impossible to prove, Gad's authorship is a reasonable assumption, since he did accompany David during part of this hectic period (1 Sam. 22:5) and would have been in a position to know the events described.

Perhaps an author-editor combined the works of these three at a later time, also using the Book of JASHAR (2 Sam. 1:18) as a source. This would account for the smooth transition from section to section and the overall unity of the books. The parts are clearly interrelated and the language is basically the same.

D. Date. The answers to the questions raised in the previous section are vitally related to the date of Samuel. If Samuel, Nathan, and Gad are the real authors, the books were written essentially during David's day or shortly thereafter. Parts of Samuel, particularly from 2 Sam. 9 – 20, are acknowledged by many critics as being of 10th-cent.-B.C. origin. The same critics, however, will relegate other portions of the books to various later periods extending to the exile.

Yet, since the form and content of the "apology" resemble political literature that is solidly

dated earlier than David, one can argue for an early date for these chapters also. The need for a dynastic defense could have arisen not only under David's rule but during Solomon's reign as opposition to his policies mounted, or during the early divided kingdom when David's throne was seriously threatened. In 1 Sam. 27:6 there is reference to Ziklag as belonging "to the kings of Judah to this day" (NRSV). This would imply that the kingdom already had been divided, unless it is a later addition. Perhaps this verse demonstrated that an author-editor used as sources an independently existing "apology" and "court history" of David, and that Samuel was written sometime during the divided monarchy.

Conservatives have varied in dating the composition of the books anywhere from 970 to 722 B.C. Lack of reference to the fall of SAMARIA provides a solid *terminus ad quem* (latest possible date). Based on the eyewitness accounts and on the general antiquity of linguistic features, the earlier date appears far closer to the truth.

IV. Purpose. The books of Samuel were written to present a connected history of the events surrounding the establishment of the monarchy. They deal with the last judges and introduce the first two kings during this vital transition period. Samuel's ministry as a prophet is also of importance for understanding the development of the prophetic office as well as the later work of leading prophets.

Originally, the "apology of David" underlying 1 Sam. 15—2 Sam. 8 was probably aimed at the contemporary Jews who were doubting the legitimacy of David's dynasty, perhaps during the reign of Solomon. By defending his actions and revealing God's clear choice of David, the author attempted to convince the nation that the right to rule did indeed belong to David and his offspring.

The moral and spiritual lessons inherent in the experience of Samuel, Saul, David, and others are of timeless value. By describing the catastrophe which nearly befell David and the nation, the author warns the people about the effects of personal and national sin. The emphasis upon David is intended to acquaint all believers with this man after God's own heart, who, in spite of serious sin, was chosen to deliver his people and to head an eternal dynasty culminating in Christ.

The books provide an illuminating historical background to some of the psalms, and important facts about the beloved Jerusalem are also presented.

V. Text. The traditional Hebrew text represented by the Masoretic recension is strangely defective in 1 and 2 Samuel. There are cases where emendations are mandatory because of the poorly preserved text. For example, 1 Sam. 13:1 omits the number before "years" while describing Saul's age.

Why the MT of Samuel presents more difficulties than the text of other OT book is not clear. Gleason L. Archer (*A Survey of Old Testament Introduction*, rev. ed [1994], 314) suggests that the official text formulated during the intertestamental period depended upon an ancient *Vorlage* that may have been worm-eaten, or frayed through overuse. The Masoretes then faithfully reproduced this defective "official" text. Segal feels that Samuel was neglected because of competition from the more popular book of Chronicles. Being read less, the text of Samuel somehow became corrupt.

Fragments of Samuel among the DEAD SEA SCROLLS appear to indicate that the Hebrew underlying the LXX was probably superior to the Masoretic tradition (cf. P. K. McCarter, Jr., *I Samuel*, AB 8 [1980], 9 – 11). The Greek translators seem to have handled their Hebrew texts with overall faithfulness, and should be trusted more than they have been in the past. In Samuel at least, the LXX is of great value for determining the true reading in many difficult passages. The oldest Hebrew copy of Samuel at Qumran bears some readings that are superior to either the Greek or Hebrew texts.

VI. Special problems

A. Doublets. Critics often attempt to prove that Samuel is full of discrepancies and contradictions by referring to the many "doublets" in the text. The descriptions of the same event in two different ways "betrays" the use of different sources or parallel accounts. Examples include the following: twice Saul is made king; twice David is introduced to Saul; twice the Ziphites inform Saul of David's hiding place. There are supposedly many others also, but in each case there is a satisfactory explanation.

The events surrounding Saul's two "coronations" are quite different. On the first occasion, Saul was chosen by lot and presented to the people. Some of the "troublemakers" (1 Sam. 10:27) were dubious of his ability to produce, however, and refused to acknowledge him. In ch. 11, Saul vigorously led Israel to victory over the Ammonites, and Samuel brought the people to Gilgal to "reaffirm the kingdom" (11:14). There they "made Saul king" (v. 15 NRSV) amid great rejoicing and unity. The words "made Saul king" do not occur in ch. 10, and the reference to renewing or confirming the kingdom implies that Saul had been designated previously as king (thus NIV, "confirmed Saul as king").

David was introduced to King Saul in 1 Sam. 16:21. At that time, Saul welcomed him as a musician and armor-bearer, hired to soothe the disturbed king. After David returned from the slaughter of Goliath, Saul asked him, "Whose son are you?" (17:58). There is no need to infer that Saul had forgotten his first name, but only that of his father. One of the benefits of David's victory was freedom for his father's house, as the men of Israel had told him before the battle (17:25, 27). Apparently this included exemption from taxation or other services ordinarily rendered to the king. Hence, knowing the name of David's father became important.

Under the stress and excitement of facing such a formidable foe as Goliath, Saul could also have been excused for a lapse of memory. David was only a court musician and an armor-bearer, so his name may not have been indelibly impressed upon the erratic king's mind. Moreover, 1 Sam. 18:2 states that Saul would not allow David to return home, suggesting a difference from his earlier policy (17:15).

The two episodes involving the Ziphites (1 Sam. 23 and 26) are also superficially similar. In both they betray David's location to Saul, but the succeeding events are quite different. Whenever a jealous king pursues his handsome, popular rival in headlong flight, it would be a captivating story and likely to be reported. In extrabiblical ANE literature there are abundant examples of the repetition of similar events. Within the Hittite annals of Mursilis, for instance, there are several references to the ill health and recovery of an old king. Scholars have concluded that these were separate events rather than different descriptions of the same illness. Abraham's twofold representation of Sarah as his sister (Gen. 12 and 20) is of a similar nature.

B. Who killed Goliath? Another apparent contradiction that could also be classed as a doublet concerns the two slayers of Goliath. The more popular version credits David for this deed, but 2 Sam. 21:19 says that ELHANAN slew Goliath. Most critics believe that Elhanan actually killed the giant, and only later was the hero's role transferred to the better-known David. This supposition, however, finds no support in the rest of Scripture. If David did not kill Goliath, it becomes difficult to account for Saul's intense jealousy and for the song crediting David with slaying "tens of thousands" (1 Sam. 18:7). His conquering of the Philistine giant was his greatest triumph and paved the way for his leadership of Israel.

According to 1 Sam. 21:9, David was forced to take Goliath's sword from the priest Ahimelech. David had evidently dedicated the weapon to the Lord after his victory. His action parallels that of King Hattusilis III, the Hittite whose "Apology" was earlier compared with Samuel. There is a strong possibility that Hattusilis was also involved in a battle of champions. H. A. Hoff-ner, Jr. (in *CBQ* 30 [1968]: 220 – 25) has discussed the evidence based on the "Apology of Hattusilis" (2.31 – 47). After leading his men to an unexpectedly overwhelming victory perhaps by individual combat, the Hittite warrior dedicated his weapon to the goddess ISHTAR. A battle of champions on Hittite soil would provide an interesting analogy to the phenomenon already well-known in Greek and Hebrew literature.

The context in 2 Sam. 21 also supports David's right to the victory. Four of David's mighty men are said to have killed descendants of the giant (v. 22). It is unlikely that David's warriors would have accomplished what their king himself could not do. The struggles of Goliath's relatives were an attempt to avenge the giant's death. A blood-feud of this type was a natural sequel to David's victory.

The parallel in 1 Chr. 20:5 supplies the needed solution, since it refers to Elhanan's triumph over LAHMI, the brother of Goliath. Apparently the MT of Samuel was defective at this point, changing "Lahmi the brother of" (*ʾet-laḥmî ʾăḥî*) into "the Bethlehemite" (*bêt hallaḥmî*). For other proposals, see ELHANAN.

C. The witch of Endor. Saul's experience with the medium or witch of ENDOR in 1 Sam. 28 is a difficult passage to interpret. This woman was one of many wizards or spiritists who operated in Israel in spite of laws banning them. Isaiah condemned those who consulted "mediums and wizards" rather than listen to the word of God (Isa. 8:19 – 20). In Saul's case, he was desperate to know the future and sought some message from the departed Samuel, whose advice he had usually taken too lightly while he was alive.

Several explanations have been given regarding this event and the powers of mediums in general. Some feel that Samuel did not appear in any form; it was only a psychological phenomenon in which Saul thought he saw Samuel owing to his confused state of mind and the mysterious effects of darkness. This interpretation is hard to derive from the scriptural account.

Within a more conservative framework, it has been proposed that God allowed Saul to see a form which resembled Samuel, but which was not actually the body or spirit of the prophet himself. The more obvious explanation, however, recognizes that Samuel did actually appear to Saul in visible form and that the deceased prophet communicated with Saul. Samuel looked like "a god" (1 Sam. 28:13 RSV), implying an unusual appearance for this spirit in visible form.

While not denying the powers of mediums and spiritists within the demonic sphere, one need not conclude that calling up the dead normally lay within their ability. In this instance, God intervened and sent Samuel to his disobedient king. The woman revealed her surprise at the unusual success of this venture by crying out loudly when she saw Samuel (1 Sam. 28:12). This implies that she and her colleagues could not ordinarily bring up the dead. The episode does demonstrate the conscious existence of departed spirits and supports the doctrine of the IMMORTALITY of the soul.

VII. Theology. Although the main emphasis of Samuel is historical and not theological, there are several chapters that touch directly upon important doctrines.

A. The will of God. Scholars have puzzled over the attitude of God toward the establishment of the monarchy. There is sufficient evidence to indicate that God was displeased with the rejection of the

THEOCRACY (1 Sam. 8:7). Samuel tried to dissuade the people from desiring a king, but the majority were adamant in their demand. Yet, even before Saul was anointed, God promised to bless him and to use him in delivering his people (9:16). Apparently some distinction can be made between the directive and permissive will of God in this case. The wish for a king was sinful, but God allowed this wish to become reality and blessed the kingdom greatly in subsequent years.

Another aspect of the will of God relates to predestination and human responsibility, both of which find support in Samuel. After Saul had been king for some time, he disobeyed the commandment of God by performing sacrifices. Samuel severely reprimanded him for this behavior and announced that Saul had forfeited his right to a lasting dynasty. God "would have established your kingdom over Israel for all time" (1 Sam. 13:13). Instead, Saul's sin led the Lord to transfer the leadership to David.

It is clear that Saul's sin is pinpointed as the cause for his loss of dynastic rights. Yet, as early as patriarchal times JACOB prophesied, "The scepter will not depart from Judah" (Gen. 49:10). The ruling tribe would be JUDAH, to which David belonged, and not BENJAMIN, the tribe of Saul. Hence, would not the scriptural fulfillment have necessitated the disqualification of Saul? Interestingly, Samuel did not console Saul by saying, "It was not your fault, it had to happen." Saul was not excused for his sin but was judged for it. God, of course, foreknew this event making it certain long before, but human responsibility remained very much in the picture.

B. The doctrine of sin. Both 1 and 2 Samuel illustrate all too vividly the sinfulness of the human heart and the inevitable results of SIN. Godly leaders like Eli, David, and even Samuel are singled out for their failures before the Lord. Strangely enough, all three men reared children who rebelled against God. As fathers, they experienced great difficulty in bringing their sons into the deep relationship with God they enjoyed. Eli's sons robbed the sacrifices, blasphemed God, and committed fornication, all in the role of priests (1 Sam. 2:13 – 17, 22; 3:13). It is no wonder that God destroyed them before the Philistines. Because of the wickedness of Samuel's sons, the people were further motivated to ask for a king (8:5).

Saul began his monarchy as a humble, Spirit-controlled man. As his reign progressed, however, he disobeyed the Lord, came under the influence of an evil spirit, and was consumed with murderous jealousy. He was finally reduced to dealing with a spiritist in an effort to contact the dead.

The experience of David provides the greatest instruction, both positively and negatively. This great king, a man after God's own heart, nevertheless became secretly involved in adultery and murder after exhibiting great faith and devoutness for years. When David acknowledged his sin and was restored spiritually (2 Sam. 12:13), the Lord forgave him, thus showing his great mercy. Although David's confession was deep and sincere, he had to suffer the inevitable consequences of sin, even of forgiven sin. Bathsheba's first child died, and David's first son Amnon imitated his father by committing fornication with Tamar. This precipitated Absalom's avenging murder, which led directly to the major rebellion under Absalom. God still blessed the reign of David, however, and he even exalted Solomon, Bathsheba's second son, to the throne.

C. The Davidic covenant. One of the most important OT COVENANTS was made with David (2 Sam. 7). This covenant amplifies the provisions of the Abrahamic covenant of Genesis by promising to David an eternal throne and kingdom. The right to rule over Israel will always belong to one of his descendants, a promise anticipating the everlasting reign of Christ. God's great faithfulness and steadfast love for his servant were clearly seen in his gracious forgiveness of David's sin. In view of

God's sure word, David rejoiced in the promise given to his household. His "last words" of 2 Sam. 23:1, 5 refer to this "everlasting covenant."

On the human level, the relationship between David and Jonathan provides an excellent illustration of covenant responsibility. They exhibited intense love and loyalty for each other even though Jonathan had reason to share Saul's jealousy of David. As a result of their covenant, David kindly cared for Jonathan's crippled son after he was established as king.

H. WOLF

Sanabassar, Sanabassarus san'uh-bas'uhr, san'uh-bas'uh-ruhs. KJV Apoc. forms of SHESH-BAZZAR (1 Esd. 2:12, 15; 6:18, 20).

Sanasib san'uh-sib. KJV Apoc. variant of ANASIB (1 Esd. 5:24).

Sanballat san-bal'at (סַנְבַלַּט H6172, from Akk. *Sin-uballit*, "Sin [the moon god] has saved" or "may Sin give life"). A man identified as a HORONITE (prob. a native of BETH-HORON) who, along with TOBIAH and GESHEM, opposed NEHEMIAH's efforts to rebuild JERUSALEM (Neh. 2:10, 19; 4:1 – 9; 6:1 – 14). A grandson of ELIASHIB the high priest married Sanballat's daughter (13:28).

Among the ELEPHANTINE papyri of 407 B.C., a letter to Bagoas, governor of Judah, refers to another letter sent to "Delaiah and Shelemiah, the sons of Sanballat the governor of Samaria" (*ANET*, 492b). See SAMARIA (TERRITORY). This wording suggests that Sanballat was then very old and that the effective control was in the hands of his sons. In the time of Nehemiah he may already have been

governor of Samaria. This would account for his influence, and he had probably hoped to become joint governor of Samaria and Judah if Nehemiah had not come. (For other possible motives that may explain Sanballat's opposition, see H. G. M. Williamson in *ABD*, 5:973 – 75.)

In spite of his foreign name, Sanballat gave his sons names with a Yahweh ending, but he may well have been descended from the mixed races who had been brought into the northern kingdom and who had a syncretistic worship with a preference for Yahweh (2 Ki. 18:23). JOSEPHUS makes Sanballat the founder of the SAMARITAN temple on Mount GERIZIM, with his son-in-law Manasseh as high priest, Manasseh being brother to the Jewish high priest, Jaddua (*Ant*. 11.8.2). The situation Josephus describes is not unlike that of Neh. 13:28 – 29, but he dates it in the time of ALEXANDER THE GREAT about a century later. He may have mistaken the name (or the period), but it is possible that he is referring to a different man of the same name. On the basis of Josephus and of the "Samaria papyri" discovered at Wadi ed-Daliyeh in 1962, F. M. Cross (in *HTR* 59 [1966]: 201 – 11) has argued that a grandson and a great-great-grandson of Sanballat bore the same name and were also governors of Samaria. (See fur ther C. C. Torrey in *JBL* 47 [1928]: 380 – 89; H. H. Rowley, *Men of God: Studies in Old Testament History and Prophecy* [1963], 211 – 45.)

<div align="right">J. S. WRIGHT</div>

sanctification. The act or process of acquiring sanctity or HOLINESS as a result of association with deity. It is one of the most important concepts in biblical and historical theology. See also CONSECRATION.

1. In the OT
    1. Vocabulary
    2. Concern for inward righteousness
2. In the NT
    1. Vocabulary
    2. Facets of sanctification
    3. Crisis or process?
    4. Actual or potential?

I. In the OT

A. Vocabulary. The basic Hebrew word lying behind such terms as "sanctification" and "holiness" is *qōdeš H7731*, which has various cognate terms. Its etymology is uncertain (for discussion, see HOLINESS I.A). Numerous passages speak of holiness or sanctification as linked with God's presence, as at the BURNING BUSH (Exod. 3:5), at Mount SINAI (19:16 – 25; 24:17), in the desert (14:24), and in the TABERNACLE and TEMPLE (40:34 – 38; 1 Ki. 8:11). In these passages God's presence is marked by radiance and light; significantly, the concepts of holiness and glory are often conjoined (e.g., Exod. 29:43; 1 Chr. 16:29; Ps. 29:2).

The most basic meaning of *sanctification*, however, is generally believed to be "separation." In each of the thousand places where this term and its cognates appear in the canonical Scriptures, the meaning of separation is either explicit or implicit, and in no instance is this meaning excluded. Mount Sinai (Exod. 19:23), the FIRSTBORN (13:2), the SABBATH (20:11), and even a pagan army (Isa. 13:3) were "sanctified" by being set apart.

The objective of sanctification is PURITY, whether ritual or moral. The former is that normally required of priests and other officials in divine service (Exod. 22:31); it is ritual correctness. In the moral and ethical sense, purity is conveyed in such texts as these: "I have sworn by my holiness—and I will not lie" (Ps. 89:35; cf. Amos 4:2); "Be holy because I, the LORD your God, am holy" (Lev. 19:2; cf. Deut. 7:6; Ps. 51:7, 10; Isa. 4:3; 6:3; Hab. 1:12). It should be noted that the idea of moral purity or goodness is not inherent in the relevant terms; this connotation comes rather from the God with whom the term is linked. In eleven OT usages the concept of sanctification is linked with amoral deities and shrines and has no moral content (e.g., Gen. 38:21 – 22; Deut. 23:17; 1 Ki. 14:24; Job 36:14; Hos. 4:14). Since Yahweh is righteous, the sanctification he effects is ethical and moral as well as cultic in character.

B. Concern for inward righteousness. From an emphasis on ceremonial purity in priestly contexts, the moral meaning comes to be predominant in the later prophets and wise men. An analysis of the moral meaning of sanctification brings one to the vision recorded in Isa. 6, which shows that the "concept of holiness is central to the whole theology of Isaiah" (O. Procksch in *TDNT*, 1:93). The two important declarations in this passage are (1) removal of guilt and (2) atoning for sin (v. 7), reflecting an awareness of SIN that is deeper than specific acts for which the removal of guilt is needed. It is rather the corrupt source from which sinful acts arise. The prophet therefore experiences not only pardon and the removal of guilt, but purging of the inner defilement at its source.

In several passages the notion of spiritual cleansing is explicit (e.g., Job 14:4; 17:9; Pss. 15; 19:13; 24:4; 101:2; 139:23 – 24; Hab. 1:13). Passages such as these show that the OT is cognizant not only of outward sins but of inward defilement as well, and they give hope for inner renewal of the spirit. The statements reflect a concern, not only with the formal or forensic removal of guilt, but also with the residual, inward pollution or sinfulness. The most explicit and detailed description of sanctification is to be found in Ps. 51. The psalmist (prob. DAVID) prays for pardon of actual offenses. But he is concerned with more than a rectification of the past; he also pleads for cleansing and renewal of his disposition.

Influenced by a study of comparative religions, scholarship of an earlier day tended to give an exaggerated emphasis to the amoral, cultic aspect of the Hebraic concept. There is now an increasing recognition that the moral content is present throughout, and to an increasing degree from the early prophets onward (Pss. 15:1 – 5; 24:3 – 6; 51:1 – 17; Hos. 4:1 – 10; Amos 2:6 – 11). See RIGHTEOUSNESS.

The wall (*temenos*) surrounding this temple found at Timna in N Sinai was meant to separate the sanctuary from its surroundings—an illustration of the "setting apart" that is involved in the concept of sanctification.

In the Jewish literature produced after the close of the OT, the WISDOM OF SOLOMON reflects a deep appreciation of the spiritual life. A much deeper awareness of the pervasiveness and subtlety of sin is seen in the thoughtful lines of *2 Baruch* and *4 Ezra* (these may well be contemporary with the writings of the NT; see BARUCH, APOCALYPSE OF (SYRIAC) and ESDRAS, SECOND). An even more profound concern with sanctification and holy living is discernible in the scrolls produced by the residents of QUMRAN in the decades prior to John and Jesus. In several of their hymns, and especially in the *Manual of Discipline*, the conviction is expressed that the Spirit of Truth will purge the believer's heart from all impurity and make perfect his relationship with his God (1QS IV). The Qumran literature is more optimistic with reference to sanctification than were the authors of *2 Baruch* and *4 Ezra*. The holy life envisioned therein is ascetic and legalistic in contrast to the assurance, freedom, and joyousness of the NT. See DEAD SEA SCROLLS.

II. In the NT

A. Vocabulary. Perhaps the most important Greek term for sanctification is *hagiasmos G40*, which connotes the state of grace or sanctity not inherent in its subject, but the result of outside action. The term occurs ten times in the NT (Rom. 6:19, 22; 1 Cor. 1:30; 1 Thess. 4:3 – 4, 7; 2 Thess. 2:13; 1 Tim. 2:15; Heb. 12:14; 1 Pet. 1:2). The act of sanctifying is expressed by the verb *hagiazō G39*, which occurs almost thirty times and in several cases means moral purification (Jn. 17:17, 19; Acts 20:32; Eph. 5:26; 1 Thess. 5:23; 2 Tim. 2:21; Heb. 13:12; 1 Pet. 3:15). The noun *hagios G41* is found over 220 times, and in more than sixty passages the plural form is translated SAINTS, the common NT designation of believers. It means that Christians are now separated from the world and joined to Christ (1 Cor. 1:2; cf. Num. 16:3 – 10; 2 Chr. 23:6). In Ephesians this term is joined with *amōmos G320* in two passages that describe the church as being "holy and blameless" (Eph. 1:4; 5:27), the

latter term referring to the unblemished sacrificial victim, and twice used of Christ (Heb. 9:14; 1 Pet. 1:19; cf. Lev. 22:21). The noun *hagiōsynē G43* is used of the moral purity that the gospel requires and imparts (2 Cor. 7:1; 1 Thess. 3:13; cf. Rom. 1:4).

B. Facets of sanctification. Clearly definable distinctions emerge in the NT. There is, for example, the sanctification of God the Father: when Jesus prayed, he acknowledged the holiness or sanctity of his Father (Jn. 17:11), and in his model prayer he taught believers to ask for the hallowing of the Father's name (Matt. 6:9; Lk. 11:2; cf. 1 Pet. 3:15; Moses' failure in this regard led to his exclusion from the Promised Land, Num. 20:12; Deut. 3:26). There is also the sanctification of the Son: we read that he was "sanctified" by the Father (Jn. 10:36) at the INCARNATION, and the Son "sanctified" or dedicated himself for the sake of his disciples (17:19). In these instances the meaning clearly is "separation"; it designates a relationship rather than inner moral renewal.

Most frequently, however, the NT speaks of the sanctification of the believer. (1) *Positional* sanctification is also properly called *status* or *cultic* sanctification. What was the predominant meaning in the OT is retained, but to a lesser degree in several NT passages. The meaning of separation is clear with reference to gifts offered to God (Matt. 23:19; cf. Rom. 15:16; 1 Tim. 4:5) and with reference to believers (1 Cor. 1:2; cf. Rom. 1:7). The Corinthian believers were "sanctified" in the sense of being set apart and yet remained "carnal" or unsanctified spiritually. Sanctification in this sense is attributive or imputational; it designates one's status, position, or relationship, and not necessarily one's nature or spiritual condition. Some regard it as imputed righteousness or JUSTIFICATION, but others distinguish justification from the initial sanctifying act referred to in these and other passages (see esp. J. Murray, "Definitive Sanctification" [orig. 1967], in *Collected Works of John Murray* [1976 – 82], 2:277 – 84).

(2) *Progressive* sanctification begins in the believer from the moment of his becoming "in Christ." Actual sanctification is the most common usage of the term; it designates *imparted* righteousness. Progressive sanctification occurs when one becomes a "partaker of the divine nature" (2 Pet. 1:4 KJV), a "new creation" in Christ (2 Cor. 5:17), or is "born anew" (Jn. 3:5, 8). It involves not only a changed relationship to God but also a changed nature, a real as well as a relative change. Among the passages that stress this aspect of sanctification are Acts 26:18; 1 Cor. 1:30; 6:11; and Heb. 9:14 (cf. Rom. 5:1 – 4; 2 Cor. 5:17; Jas. 1:21; 1 Pet. 1:3, 22 – 23; 2:1). The epistle to the Hebrews, in particular, speaks of initial sanctification in this manner, thus linking the OT and the NT concept and nomenclature (Heb. 2:11; 8:10; 9:14; 10:10, 14; 13:12) and making it the equivalent of regeneration.

(3) *Entire* sanctification is the most debatable aspect of the subject. All major theological traditions agree with reference to sanctification up to this point. The Reformed traditions, Orthodox, and Catholic do not, however, find in Scripture or in experience provision for full deliverance from sin while "in the flesh." Those who find in Scripture and in grace provision for complete victory over sin prior to death are many in the Arminian, Pietist, Quaker, and Wesleyan traditions. Caspar Schwenk-feld, a contemporary of Luther, was among the earliest of the reformers to call for a "reformation of the Reformation" and to protest against a tendency to an accommodation of sin in some Catholic and Reformation theology. (Some have attributed the latter, in part, to the influence of oriental DUALISM imported into Christian theology via AUGUSTINE, who was influenced by a MANICHEAN philosophy before he became a Christian.)

Basic to the concept of entire sanctification is one's concept of sin. If our definition of sin is influenced by the term *hamartia G281*, indicating any want of full conformity to the will of God, then

sanctification can hardly be "entire" or complete. If, however, like Wesley, we stress sin as *anomia G490*, "lawlessness" (1 Jn. 3:4), that is, a conscious and deliberate departure from the known will of God, then we may embrace promises that offer entire sanctification as a gift of grace (Rom. 6:1 – 23; 1 Thess. 5:23; 1 Jn. 3:3). Such readers gather from Scripture (e.g., Matt. 5:8; Jn. 17:17; Rom. 6:6 – 19; 2 Cor. 7:1; Eph. 4:24; 5:26; Phil. 2:15; Col. 1:22; 1 Thess. 3:13; 5:23; 1 Pet. 1:16) that the call to salvation is nothing less than a call to full deliverance from indwelling sins of attitude and motive as well as deeds.

The position of the Scriptures that can be cited in support of entire sanctification is both negative and positive. The negative aspect may be seen when PAUL , after reminding his readers that as "holy ones" they are temples of God (2 Cor. 1:2; 6:16), exhorts them: "let us purify ourselves from everything that contaminates body and spirit, perfecting holiness out of reverence for God" (7:1). The apostle here refers to a pollution that is both religious (disloyalty to God) and ethical (association with iniquity, 6:14), and yet that to which the "saints" are subject. The positive aspect is seen in the command to "perfect" or bring to completion the quality of holiness, which is now only potential. That this is a present option is apparent from the tense of the verb.

C. Crisis or process? The evidence from Scripture, reason, and experience leads to the conclusion that sanctification is both process and crisis. The process begins when one is "risen with Christ" in the new birth. Paul's emphasis on faith blends well with this emphasis upon a stage in the Christian life when believers recognize their inner defilement, deliberately renounce self-centeredness, and embrace by faith God's provision in Christ for full deliverance and perfection in love (Col. 1:22; 1 Thess. 5:23; Eph. 3:19; Rom. 6:11 – 14; Gal. 2:20). "This conscious self-consecration to the indwelling Spirit…is uniformly represented as a single act…(2 Cor. 7:11)…Such an awakening and real consecration…was rather a thing of definite decision (expressed by the aorist, Rom. 13:14; Col. 1:9f.; Eph. 6:11, 13 – 16) than of vaguely protracted process (expressed by presents)" (J. B. Bartlet in *HDB*, 4:393). Many scholars, however, question whether the aorist and present forms convey such meanings.

The call to sanctification is nowhere sounded more urgently than in Romans, where Paul, after explaining justification and its results (Rom. 3:21—5:21), makes it emphatically clear that the Christian is to make no provision for residual sin (6:1 – 23). In the light of its context the struggle with indwelling sin in ch. 7 is not the description of the normal "saint" but rather the futility of justification by law, apart from Christ (7:24—8:2). The same call to holy living is sounded in several other epistles (cf. Gal. 5:1, 13; Col. 1:22, 28; 3:1 – 15; 1 Thess. 3:13; 5:23). In the latter the call is sometimes interpreted as an eschatological event in the future. In several passages (Col. 1:23; 1 Thess. 5:23; 1 Jn. 3:3) the future is the climax, but there is little if any exegetical ground for concluding that full deliverance from sin must wait until the soul is separated from the body.

D. Actual or potential? Sanctification, defined broadly as the work of God's grace whereby a person reaches perfection in righteousness, begins when one becomes a believer and hence is "in Christ." It continues progressively until death brings the believer into Christ's presence unless he "does despite to the Spirit of grace." It is only as one by dedication and faith realizes in actuality what is provided in the atonement that this grace is experienced; it does not follow as a matter of course, as the exhortations in the NT imply. Parallel to the work of sanctification is the infilling of the HOLY SPIRIT in the believer, perfection in love, having the "mind of Christ," and "walking as he walked."

(See further W. Marshall, *The Gospel Mystery of Sanctification* [1692]; J. Wesley, *A Plain Account of Christian Perfection* [1777]; R. C. Ryle, *Holiness: Its Nature, Hindrances, Difficulties, and Roots*, 2nd ed. [1883]; R. S. Taylor, *A Right Conception of Sin* [1939]; C. W. Brown, *The Meaning of Sanctification* [1945]; G. C. Howard, *Paul, the Community, and Progressive Sanctification* [2007].)

G. A. TURNER

sanctuary. A holy place set apart from profane use for the purpose of worship of, or communion with, a deity. The forerunners to Israel's sanctuaries were the patriarchal worship places, usually designated by a theophany or some other special revelation of God (e.g., Gen. 12:7; 26:24 – 25; 28:16 – 17). The Hebrew term *miqdāš H5219* is most frequently used of the TABERNACLE, but also of the TEMPLE and of pagan holy places (Isa. 16:12 [NIV, "shrine"]; Ezek. 28:18). The first reference to a sanctuary (Exod. 15:17) speaks of the abode of God to which he brings his redeemed people to reign over them as King. This eschatological sanctuary (cf. Heb. 8:2; Gk. *hagios G41* used in the pl.) forms the reality of which the earthly sanctuaries of God are but the foreshadowing. The sanctuary is a place for the Lord to dwell in the midst of his people (Exod. 25:8), and since the presence of God is the important factor, the establishment of the right relationship with God ultimately renders the special holy place unnecessary (Ezek. 11:16; Rev. 21:22; see also Jn. 4:21, 23). (See N. H. Snaith, *The Distinctive Ideas of the Old Testament* [1944], 24 – 32; R. de Vaux, *Ancient Israel* [1961], 274 – 311.)

G. GOLDSWORTHY

sand. Although biblical references to sand (Heb. *ḥôl H2567*; Gk. *ammos G302*) are numerous, on only one occasion does physical sand figure in the record, namely, when MOSES buried an Egyptian whom he had killed, in the hope of keeping the affair secret (Exod. 2:12). All other references are figurative, the most common being to speak of sand grains as an indication of large numbers or amounts.

The regions in which the Bible narrative unfolds contain many areas of sand and sand-hills. From Egypt, through the wilderness of Sinai, the Israelites would have been marching over sand for a good part of their journey. Although the desert of SINAI is rocky rather than sandy, patches of loose sand are encountered very frequently. Within the Promised Land, there was and is a wide belt of coastal sand dunes bordering the Mediterranean along the shores of S Palestine. This belt has tended to spread inland unless stopped by forest planting or marram grass. It is the true "sand of the seashore."

Apart from this coastal sand, it should also be borne in mind that in a dry climate every river and torrent eroding the barren surface of the land quickly becomes charged with a load of sand and debris, which it spreads along its banks where it debouches into the plain. This gives point to the Lord's parable of the house built on the sand (Matt. 7:26); presumably it was built on these valley deposits, beside the river, where it was within reach of the flood level of the storm water.

References to sand as symbolizing very large numbers occur from Gen. 22:17 onward; not only ABRAHAM'S descendants are so described, but also the corn gathered by JOSEPH in Egypt (41:49) and, rather curiously, the wisdom of SOLOMON and his breadth of knowledge (1 Ki. 4:29). In Matt. 7:26, of course, sand serves as a symbol of instability or lack of foundation.

J. H. PATERSON

sandal. A covering for the foot consisting of a sole fastened to the instep or ankle by straps. Both the Hebrew *naʾal H5837* (Gen. 14:23 et al.) and the Greek *hypodēma G5687* (Matt. 3:1 et al.) are rendered "shoe" by the KJV, but modern versions have "sandal" because the latter term more accurately portrays to the modern mind a picture of the ANE shoe. The KJV does use "sandal" in the two instances where the NT has the Greek synonym *sandalion G4908* (Mk. 6:9; Acts 12:8; this latter term is a diminutive of *sandalon*, which originally referred to a wooden sole with straps).

Sandals or shoes of some kind were worn in the ANE from very early times to protect the feet. However, the poor frequently walked barefoot when no great distance was to be covered. The form of ancient footwear can be known chiefly from monuments of Assyria, Egypt, and Persia. Some kind of covering on the feet can be distinguished in a painting on wood, dating as far back as the 4th millennium B.C., but the exact shape is not clear. The Beni Hasan panel (c. 1900 B.C.) shows a group of Asiatics in Egypt, the men wearing soles fastened to the foot by crossing straps with a strap running round the ankle, and the women having boots reaching above the ankle with a white band at the top. A black obelisk of SHALMANESER III (9th cent. B.C.) portrays JEHU and the Israelites having shoes with upturned toes, while the Assyrians to whom they were paying tribute were wearing sandals with heel caps. In a painting of SARGON II (8th cent. B.C.) the method of fastening is seen more distinctly. The sandals have sides coming above the arch of the foot and are held in position by a double strap over the toes. These are probably the sandals of the wealthier class. A simpler type consisted of soles of wood, LEATHER, or some fibrous material kept in position by leather thongs. Ezekiel described women's sandals made of "leather" [Heb. *taḥaš H9391*], possibly a reference to seal skin, or the skin of a dolphin-like animal (Ezek. 16:10). See SEA COW.

The wearing of shoes often spoke of travel or readiness to travel. Thus the Israelites were to eat the PASSOVER with shoes on, that is, in readiness to depart immediately (Exod. 12:11). They also experienced a miraculous preservation of their sandals while wandering (Deut. 29:5). Similarly, the Lord's disciples did not need the customary extra pair of sandals for their journey (Matt. 10:10; Lk. 10:4; 22:35). Because having one's shoes on indicates that a person is ready for travel or work, PAUL instructs believers to have their "feet fitted [*hypodeō G5686*] with the readiness that comes from the gospel of peace" (Eph. 6:15).

Shoes were commonly taken off on entering a house, and water was provided for guests to bathe their feet. The washing of feet was necessary, especially because the sandals afforded only partial protection from dust or insects (Lk. 7:44). To unloose the shoe was often the work of a slave, who might also carry the shoes to an appropriate place (Matt. 3:11; Lk. 3:16). The latter practice may lie behind Pss. 60:8 and 108:9; as shoes might sometimes be thrown to a slave to carry away, the figure suggests power exercised over EDOM to make its people serve God's purpose.

Being the least expensive of personal items, the sandal-thong sometimes signified cheapness. Hence, ABRAHAM would not agree to take even the most insignificant possession of the king of SODOM (Gen. 14:23). A similar use of the shoe itself is found: to sell "the needy for a pair of sandals" (Amos 2:6; 8:6) meant to sell them for a very low price. It appears that a poor man's shoes were the most trifling pledge that could be accepted. Where these were lacking, the debtor was likely

to be enslaved by the unrelenting creditor. The absence of shoes is a mark of POVERTY (Lk. 15:22); it also points to the plight of the captive (Isa. 20:2 – 4). Growing out of the concept of cheapness is the idea that shoes depict the most humble part of a person. Accordingly, JOHN THE BAPTIST disclaimed any worthiness to touch the sandals of Christ (Matt. 3:11; Mk. 1:7; Lk. 3:16; Jn. 1:27; Acts 13:25); even the lowliest part of the MESSIAH was too exalted for comparison with the forerunner.

If the SEPTUAGINT of 1 Sam. 12:3 reflects accurately the original Hebrew text, shoes might be offered as a bribe to a judge (see P. K. McCarter, Jr., *I Samuel*, AB 8 [1980], 209 – 10). In 2 Sam. 15:30 being barefoot is a sign of MOURNING, but the wearing of shoes (Ezek. 24:17, 23) during a period of mourning is an attempt to conceal grief. Twice in the OT the command was given to remove shoes in the presence of God or his supernatural representative (Exod. 3:5; Josh. 5:15), possibly because of the defilement contracted by the shoes in traveling. It is in keeping with this symbolism denoting reverence that no mention is made of shoes in the descriptions of priestly dress. The service of the TABERNACLE and TEMPLE was performed barefoot. Muslims observe a similar custom in modern times, either removing or covering the shoes when about to enter a mosque. To have a shoe removed on refusal to undertake a levirate marriage was to be shown contempt (Deut. 25:9 – 10), but in the arrangement between BOAZ and ELIMELECH'S nearer relative, the former confirmed the bargain by giving his sandal (Ruth 4:7 – 8). (Cf. E. A. Speiser in *BASOR* 77 [Feb. 1940]: 15 – 20; R. de Vaux, *Ancient Israel* [1961], 22, 37, 59, 86, 169.) See also DRESS IV.

Sanhedrin san-hee'druhn (συνέδριον *G5284,* "a sitting together, a council-board"; transliterated into Mishnaic Heb. as סַנְהֶדְרִין [the occasionally encountered spelling *Sanhedrim* is the result of a mistaken assumption that the Heb. word was in reality a masc. pl. noun]). The council or governing body that met in JERUSALEM in NT times and that constituted the highest Jewish authority in Palestine prior to A.D. 70. It must be distinguished from lesser, local courts of law to which the name *sanhedrin* was also regularly applied.

I. Sources for the study of the Sanhedrin.

The three primary sources of information for our knowledge of the Sanhedrin are (1) the NT documents, (2) the writings of the Jewish historian JOSEPHUS, and (3) rabbinic tradition, particularly as codified in the MISHNAH (in the tractate *Sanhedrin),* but also in the TALMUD (and its supplement, the TOSEFTA). The information that can be gleaned from the NT and Josephus is, of course, indirect, whereas the rabbinic materials often intend specifically to provide details about the Sanhedrin. This fact is counterbalanced, however, by the comparatively late date (about A.D. 200) at which the rabbinic materials that had been handed down orally were finally written down.

It is, unfortunately, impossible to reconcile the description of the Sanhedrin in the rabbinic materials with that found in the NT and Josephus. An attempt has been made to do just this, however, by alleging that there were two major Sanhedrins in Jerusalem: (1) a political Sanhedrin composed of a priestly aristocracy headed by the high priest, concerned with civil affairs and the administration of criminal justice (of which we read in the NT and Josephus) and (2) a religious Sanhedrin composed of a laity of PHARISEES headed by a RABBI, concerned with matters of religious life and the interpretation of the TORAH (of which we read in the rabbinic materials). While this ingenious and attractive theory has been accepted by a number of Jewish scholars (e.g., Lauterbach, Hoenig, Zeitlin,

Mantel), it has not found general consent and is here rejected as a conjecture that is too facile and goes too far beyond what the concrete evidence warrants. The reliability of the NT and Josephus far exceeds that of the rabbinic writings, which often reflect the state of affairs after, rather than before, the destruction of Jerusalem in A.D. 70. Consequently the traditions of the rabbis, while they may sometimes convey trustworthy information concerning the Sanhedrin, must be used with special caution. Where there is conflicting testimony between the NT and Josephus on the one hand and the rabbinic materials on the other hand, historically speaking, one is on safer ground to accept the former as trustworthy and to reject the latter as anachronistic.

II. Terminology. The Greek word *synedrion* is frequently encountered in Classical and Hellenistic Greek, where it commonly means "place of gathering," but also comes to connote the gathering itself and in some instances even its authority. The word occurs also in the SEPTUAGINT, where it refers to an assembly or court (but not to the Sanhedrin as commonly understood). While *synedrion* is common in the NT (over twenty occurrences) and in Josephus, it is not the only term or phrase used in referring to the great council of Jerusalem. The term *gerousia G1172* , "council of elders, senate," is found occasionally in the OT APOCRYPHA and Josephus, and occurs once also in the NT (Acts 5:21). Another word used to refer to the Sanhedrin is *presbyterion G4564*, "council of elders," which is used twice in the NT (Lk. 22:66; Acts 22:5).

A term used often by Josephus in referring to the Sanhedrin is *boulē G1087*. While this particular word is used by NT writers only in such senses as "purpose" and "will," the cognate noun *bouleutēs G1085*, "councillor," is used by Luke in referring to JOSEPH of Arimathea in his capacity as member of the Sanhedrin (Lk. 23:50; the noun *bouleutērion*, "council," also is used by Josephus. The council is often referred to in the NT by speaking of its members as chief priests, elders, and scribes. The rabbinic sources use, in addition to *sanhedrîn*, words and phrases such as *bêt dîn gadôl* ("great house of justice") and Aramaic *kěnîštā)*, ("assembly").

III. History. The rabbinic tradition as recorded in the Mishnah (*m. Sanh.* 1:6) traces the origin of the Sanhedrin back to the command of God to MOSES to gather together seventy men chosen from among the elders of Israel (Num. 11:16). After the EXILE it was said to have been reorganized by EZRA. While the precise origins of the Sanhedrin remain obscure, it is commonly argued that historically one cannot speak of the Sanhedrin proper until Hellenistic times, that is, the period of Israel's domination by the Ptolemies and Seleucids (see ANTIOCHUS; PTOLEMY; SELEUCUS).

There are, to be sure, certain anticipations or foreshadowings of the Sanhedrin in the period immediately following the exile (see RESTORATION). The place of the elders in Israel was, of course, ever an important one. Early in the history of Israel priests and judges administered justice in specific cases (e.g., Deut. 19:15 – 21). Long before the exile, JEHOSHAPHAT king of Judah (872 – 848 B.C.) is reported to have appointed a law court in Jerusalem consisting of "priests and heads of Israelite families to administer the law of the LORD and to settle disputes" (2 Chr. 19:8). Just after the exile, the importance of the elders (e.g., Ezra 5:5; 6:7 – 8; 10:8) as well as of the priests and nobles (e.g., Neh. 2:16; 5:7; 7:5) in leadership and adjudication is readily evident. See ELDER (OT). Despite the acknowledged similarity, however, it is still not the Sanhedrin of the NT period.

The first explicit mention of the body known as the Sanhedrin in historical sources is found in Josephus, who in his account of a decree of Antiochus III (223 – 187 B.C.) refers to the *gerousia* or "senate" of the Jews (*Ant.* 12.3.3 §§138ff.). This "senate" was composed of priests and elders under the direction of the high priest, being constituted as an organized body concerned not merely with

judicial matters, but having the broader responsibility of acting as the governing body for the whole of Palestine. It was the practice of the Hellenistic kings to give a large degree of freedom to subject nations in the governing of their internal affairs. This seems to have been true of the Jewish nation under the Ptolemies and Seleucids. The senate of this period is also referred to in the books of the Maccabees (e.g., 1 Macc. 12:6; 2 Macc. 1:10; 4:44; cf. "the elders of the people," 1 Macc. 7:33). During the period of independence under the HASMONEAN Dynasty, the power of the council was somewhat curtailed, but it continued to exist as a body. The monarchical rulers of this period needed the support of the nobility who composed its members. It was the queen Salome ALEXANDRA (76 – 67 B.C.) who, at the advice of her dying husband Alexander Jannaeus, first installed large numbers of Pharisees in the Sanhedrin, making this group dominant in a council that had hitherto consisted wholly of SADDUCEES (Jos. *War* 1.5.2 §110).

Interior of the Huldah Gates, located at the S end of the temple mount. The members of the Sanhedrin would have frequently used this entrance to the temple.

After the Roman occupation of 63 B.C., the council continued to exist under the leadership of the high priest Hyrcanus (II). Within a few years, however, Gabinius, the Roman governor of Syria (57 – 55 B.C.), greatly reduced the power of the Jerusalem council by dividing the land into five "sanhedrins" (*synedria*, Jos. *Ant.* 14.5.4 §91; *synodoi*, *War* 1.8.5 §170) or administrative councils. The high council thereby became merely one among the five, and its regional jurisdiction diminished considerably.

This limitation was only temporary, however, for under the direction of Caesar, Hyrcanus was reappointed "ethnarch," and the Jerusalem council regained its status, appearing again to have had authority over the whole of the land. Indeed, in 47 B.C. there was the remarkable occurrence that HEROD was summoned from Galilee to appear before the Sanhedrin for having executed a certain Hezekiah without the permission of the high court (Jos. *Ant.* 14.9.3 §§166 – 68, a passage where the

actual word *synedrion* occurs for the first time in historical sources with specific reference to the Jerusalem council, after which however this use of the word becomes common). For the sake of Hyrcanus, Herod was absolved of this crime, but after he was made king of the Jews he took bloody revenge by killing the members of this Sanhedrin (ibid., §175; it is doubtful whether "all" the members are to be taken literally; cf. 15.1.2 §6).

The Sanhedrin continued to exist under Herod, but it was filled with tractable men and its power was severely limited. Herod used the court to carry out his will, but did not allow it or the high priest (Herod was unqualified for this office) to interfere with his reign. At the death of Herod in 4 B.C., his kingdom was divided among his three sons, the most important part (including Judea and Samaria) going to Archelaus who ruled as "ethnarch." Despite the plea of the people to AUGUSTUS for more self-government (cf. Jos. *Ant*. 17.11.2 §§304ff.), the status and power of the Sanhedrin underwent no particular change.

In A.D. 6, however, when JUDEA was made a Roman PROVINCE, the Sanhedrin and its president, the high priest, were granted almost exclusive control of the internal affairs of the nation, similar to that which it had under the Hellenistic kings. The sacred status of Jerusalem and its environs was recognized by the Romans and, so long as public order was maintained and tax revenues were forthcoming, they were content for national matters to be under the control of the Jerusalem Sanhedrin. It is during the period of the Roman governors (A.D. 6 – 66) that the Sanhedrin came to possess the greatest power and jurisdiction of its history, although the Jewish authority was always ultimately answerable to the Roman governor. Josephus can speak of the dominion of the nation as having been entrusted to the high priests of this period (*Ant*. 20.10.1 – 5 §§224 – 51).

This is the Sanhedrin which we encounter in the NT documents. It is a body composed largely of members of the aristocracy (the chief priests and Sadducees), which under the leadership of the high priest exercises considerable judicial authority in handling Jesus of Nazareth according to the Gospels, and his disciples according to the book of Acts. Its area of jurisdiction also appears to include the DIASPORA to some degree (witness PAUL'S request for letters to the synagogue at DAMASCUS from the high priest, Acts 9:1 – 2).

With the Jewish rebellion, which began in A.D. 66, martial law came into effect, and when Jerusalem finally fell in the year 70, the Sanhedrin was permanently dissolved. From this point onward Palestine was governed solely by strict Roman provincial administration. Almost immediately, it appears, a new "Sanhedrin" was constituted at Jamnia (see JABNEEL). This institution, however, was markedly different from its predecessor in that, needless to say, it had no political or governing power whatsoever, and was limited exclusively to the judgment of religious questions. Despite the rabbinic claims that this body stood in continuity with the Sanhedrin of earlier periods, it is evident that by comparison the new Sanhedrin was powerless. Whereas the Jerusalem Sanhedrin of the period of the Roman governors consisted largely of aristocratic men led by the high priest, the decrees of which were binding under penalty of severe punishment, the new Sanhedrin or *Beth Din* (court of Justice), as it was called, consisted exclusively of rabbinic scholars under a scholar-president whose decrees were theoretical and bore only the authority warranted by voluntary respect for scholarly wisdom.

IV. Composition. Although the rabbinic tradition knows only of a "Sanhedrin" composed entirely of scholarly scribes and Pharisees, we know that throughout its history the Sanhedrin was dominated by a priestly aristocracy. And, to speak in terms of the parties that developed during Hasmonean times, the nobility almost without exception consisted of Sadducees. Pharisees were admitted into the

Sanhedrin in considerable numbers at two particular junctures in its history: once under Salome Alexandra (as noted above) and subsequently under Herod the Great, who took this measure to limit more effectively the power of the older nobility who opposed him.

According to the Mishnah (*m. Sanh.* 1:6), the membership of the Great Sanhedrin numbered seventy-one. This statement seems to reflect accurately the situation before the fall of Jerusalem. (Mention is made also of smaller, local sanhedrins composed of twenty-three members.) Tribunals were quite probably modeled in number after the tribunal of seventy instituted by Moses according to Num. 11:16 – 17, and there are some indications that, among the Jews, councils of seventy were favored. The extra man was apparently the leader or president of the Sanhedrin, who according to the evidence of Josephus and the NT, was the high priest. The rabbinic tradition, however, does not associate the Great Sanhedrin with the high priest. Instead, it attributes the leadership of the council to a president (*nāśîʾ H5954*, "prince, ruler") who was simply one of the scribes of the council. He was assisted by a vice-president (*ʾ ab bêt dîn*, "father of the house of justice") who was also a scribe. This almost certainly reflects the situation after A.D. 70 and is sometimes wrongly taken as accurately describing the Sanhedrin of the time of Christ.

The office of high priest was, of course, hereditary, although on occasion this was altered for political expediency. Exactly how other members of the Sanhedrin came to hold office remains obscure. A likely conjecture is that the body was self-perpetuating in the sense of electing its own members. The office was probably given for life, but again this is uncertain. The criteria for membership were probably age and wealth, although the Mishnah mentions only one necessity—that the candidate be learned in rabbinic doctrine.

Particularly in the NT, one encounters repeated references to "chief priests"; this term renders Greek *archiereis*, which is the plural of *archiereus G797*, normally translated "high priest." The group of chief priests, which formed the leading component of the Sanhedrin, consisted of former high priests, including members of the most important of the priestly families. Probably next to this group in prestige was the lay nobility, who like the priestly aristocracy were also of Sadducean sympathies, and who are probably referred to under the title "elders." Another important group, an element of increasing importance in the Sanhedrin of the 1st cent., is that of the "scribes," the professional scholars who were experts in matters of Mosaic law. The scribes, by way of contrast with the other groups, were usually Pharisees. Although they were a minority in the Sanhedrin, they apparently enjoyed considerable popular support. So much so, that not only could nothing be accomplished without the Pharisees, but as Josephus indicated, the Sadducees often went along with them in order merely to be tolerated by the masses (*Ant.* 18.1.4 §§16 – 17).

Remains of a priestly estate located in Jerusalem's upper city.

V. Session. The Sanhedrin, like other local courts according to the Mishnah, almost certainly was prohibited from meeting on the SABBATH or on feast days. Whether it could in extreme circumstances legally meet on a feast day as it did in the TRIAL OF JESUS cannot be known, but seems improbable. In cases involving capital punishment, the sentence could not lawfully be delivered until the day following the trial, and therefore such trials were also prohibited on the eve of either a Sabbath or a feast day (*m. Sanh.* 4:1). Cases involving potential capital punishment were similarly barred from taking place at night (ibid.). According to the Tosefta, the hours of meeting on regular days were from the time of the morning sacrifice to the evening sacrifice (*t. Sanh.* 7:1).

There is some disagreement concerning where the Sanhedrin held its meetings. According to the Mishnah it met in the temple precincts to the S of the temple court, in what was called "The Chamber of Hewn Stone" (*m. Mid.* 5:4). Josephus, however, appears to locate the meeting place of the Sanhedrin in two different spots (cf. *War* 5.4.2; 6.6.3). The NT has the Sanhedrin gathered at the palace of the high priest for the trial of Jesus, but the circumstances are exceedingly irregular (the meeting at night was illegal, and it could not have taken place in the temple precincts, which would have been locked) and cannot be taken as normative in any sense.

The Mishnah provides us with further information concerning the meetings of the Sanhedrin. The members are said to have sat in a semicircle in order that all might see one another, while in front of them on the right and left were positioned two scribes who kept a written record of the testimony for acquittal or conviction (*m. Sanh.* 4:3). Also present were three rows of "disciples of the Sages" from which additional judges could be appointed, while a member of the congregation would be chosen to fill the gap caused among the disciples of the Sages (ibid., 4:4). A great amount of additional information of the actual process of justice is available in the Mishnah; for example, capital cases had to begin with reasons for acquittal, and whereas testimony in such cases could be unanimous for acquittal, it could not be unanimous for condemnation—someone had to argue on behalf of the accused (ibid., 4:1). However, the question of whether or not such information can be accepted as at all accurate for the period of our concern remains crucial.

VI. Competence. The Sanhedrin certainly had complete control of the religious affairs of the nation as the Mishnah indicates. The high court was the supreme authority in the interpretation of Mosaic law and, when it mediated in questions disputed in the lower courts, its verdict was final. Beyond this, the Sanhedrin also governed civil affairs and tried certain criminal cases under the authority of the Roman governor. The Romans were quite content to let subject nations regulate internal affairs, but there were, of course, always limits. They, for example, would have reserved the right to intervene at will, and while it is probable that they usually went along with the high court's decisions, they were under no compulsion to do so.

One of the most vexing questions concerning the Sanhedrin was whether or not the Romans had granted it the power of capital punishment. There is a fair amount of evidence that seems to indicate that the Sanhedrin did have the right to try capital cases and to execute capital punishment. In the Mishnah regulations are given for different types of execution. (Four kinds of capital punishment which could be inflicted by the court are enumerated in *m. Sanh.* 7:1.) There is, moreover, reference to the burning of a priest's daughter for adultery, which probably occurred before the fall of Jerusalem. Further records of actual executions are found in Josephus, who provides an account of the Sanhedrin's trial and stoning of JAMES, the brother of Jesus, as well as some other Christians (*Ant.* 20.9.1 §200). Documentary evidence has been discovered by archaeologists which proves that GENTILES (even Roman citizens) could be put to death by the Jewish authorities for trespassing the restricted areas of the temple precinct. In the NT itself there is the account of the trial and stoning of STEPHEN by the Sanhedrin (Acts 6:9—8:1).

While this evidence is weighty, it is not necessarily conclusive. The regulations in the Mishnah quite probably describe the situation after the "reconstitution" of the Sanhedrin at Jamnia. The execution of the priest's daughter referred to in the Mishnah may be readily explained if it occurred during the reign of Herod Agrippa I (who ruled as king over the whole of Palestine) in the years A.D. 41 – 44, when there was a temporary interruption in the procuratorial system of government in Palestine (see HEROD VII). It is also during this interval between Roman PROCURATORS that the execution of James son of Zebedee took place, this by the hand of Agrippa himself (Acts 12:1 – 2). Years later, when James brother of Jesus was executed, Agrippa II quickly had the high priest responsible (Annas II, or Ananus) removed from office (Jos. *Ant.* 20.9.1 §§201 – 3).

Thus the right of capital punishment over those trespassing the holy places of the temple is surely to be regarded as an extraordinary privilege granted by the Romans merely for the sake of expediency. It would be rash to extrapolate from this instance and allege that therefore the Sanhedrin would also possess the right of capital punishment in other matters, at least over its own people, the Jews. The stoning of Stephen took place after a trial before the Sanhedrin on the charge of blasphemy. (Herein lies another problem in that technically Stephen was not guilty of blasphemy since he did not pronounce the ineffable Name, and thus at most he should have received forty stripes less one.) However, the execution bears the marks of precipitate action on the part of an enraged mob. On the other hand, if it was the carefully deliberate action of the Sanhe-drin, it is not difficult to believe that occasionally the Jewish authority perpetrated an illegality which to the Romans was not very significant, and which was thus conveniently overlooked.

The NT data clearly point to the conclusion that the Sanhedrin did *not* possess the power of capital punishment. Jesus appears to have been turned over to the Romans because the crime of which he was alleged to be guilty was regarded as deserving of capital punishment. At any rate, the assertion of Jn. 18:31 made by the Jews to PILATE is beyond question: "we have no right to execute

anyone." Remarkably, there is a piece of Talmudic evidence that supports this assertion. In the Jerusalem Talmud, it is said that the right of capital punishment was taken from Israel forty years prior to the destruction of the temple (*y. Sanh.* 1:1 [18a]; 7:2 [24b]). The round number forty quite probably means to convey the period of Roman procuratorship (precisely, A.D. 6 – 66). All of this fits with what is known of the Roman custom in the government of the provinces. Capital punishment was almost always held by the governor as his own personal prerogative. It was on occasion granted to free cities in the empire, but that it would be granted to a city such as Jerusalem, or to a nation so infamously unruly as Judea, is hardly to be expected.

VII. The Sanhedrin in the NT. The action of the Sanhedrin in the NT bears out the picture here presented. The Sanhedrin is perhaps most conspicuous in its role in the trial of Jesus in the Gospels. Without getting into the intricacies of the trial itself, the following may be said. The Sanhedrin had every right to prosecute Jesus for alleged crimes whether religious or civil. From what can be pieced together from the gospel narratives (Matt. 26; Mk. 14; Lk. 22; Jn. 19), the Sanhedrin rather than being a vehicle for the accomplishment of justice—for which the rabbinic model in the Mishnah is exemplary—here became guilty of a gross travesty of justice. The time and nature of its meetings, the manner in which the "trial" was conducted, its strange outcome—all point to the intent desire of the Jewish authorities to do away with Jesus. Here we have a group of desperate men who, while trying to keep a show of propriety and at least a semblance of "legality," take what can only be regarded as very desperate measures. Long before his arrest and trial they had determined to have Jesus put to death (Matt. 12:14; Mk. 3:6; Jn. 11:53). It was only a question of how to do this, and under what charges to hand him over to the Romans for the capital punishment they themselves could not legally administer. Ultimately they found this in the political charge of sedition.

In the Acts of the Apostles, the Sanhedrin on occasion behaves more as one should expect this council to act. The apostles are brought before the court and admonished not to continue stirring up the people with their message (Acts 4:5 – 22; 5:17 – 42). At one point when some members of the council wanted to kill them (5:33), a Pharisee of the council, the famous rabbi GAMALIEL, made an eloquent plea for justice (5:35 – 39). Similarly, when Paul was arraigned before the Sanhedrin, he was able (with some skill and knowledge) to elicit support from the Pharisees of the council, who declared, "We find nothing wrong with this man" (23:9). In the stoning of Stephen, however, the court appeared in a bad light, being guilty of an illegal as well as impetuous act.

There can be little question that the Sanhedrin in its full complement included some outstanding men. In addition to Gamaliel, already mentioned, the council included Joseph of Arimathea, who was a disciple of Jesus secretly (Jn. 19:38; see JOSEPH #14), and NICODEMUS, who was also drawn to Jesus. The latter showed a genuine concern for justice in the high council's intentions concerning Jesus when he said to his fellow members, "Does our law condemn anyone without first hearing him to find out what he is doing?" (Jn. 7:50). One may only suppose that in the fiasco which served as Jesus' trial, these more honorable members of the Sanhedrin were not present at the clandestine meetings, or that they did object even though we have no record of their protestations. It has occasionally been suggested that Saul of Tarsus was a member of the Sanhedrin prior to his conversion. Acts 8:1 and 26:10 do not necessarily mean that Saul voted as a member of the council. What is meant is probably only that he gave his assent unofficially, for it is improbable that Saul, who is described as "a young man" (7:58), could have been a member of the august council of elders.

D. A. HAGNER

Sansannah san-san'uh (מַסְנַנָּה H6179, prob. "stalk of the date palm"). One of the "southernmost towns of the tribe of Judah in the Negev toward the boundary of Edom" (Josh. 15:31; cf. v. 21). It is probably the same as modern Khirbet esh-Shamsaniyat, some 8 mi. NE of BEERSHEBA. A comparison with the parallel lists (Josh. 19:5; 1 Chr. 4:31) has led some to equate Sansannah with HAZAR SUSAH (Hazar Susim), but this identification remains uncertain.

A. BOWLING

Saph saf (סַף H6198, meaning unknown). A descendant of Rapha (see REPHAITES) who was killed by SIBBECAI the Hushathite in a fight with the PHILISTINES at Gob (2 Sam. 21:18). In the parallel passage, he is called "Sippai" (evidently an alternate form of the name), and the battle is said to have taken place in GEZER (1 Chr. 20:4). See discussion under GOB.

Saphat, Saphatias, Sapheth say'fat, safuh-t*i*'uhs, say'fith. KJV Apoc. variants of SHEPHATIAH (respectively 1 Esd. 5:9; 8:34; 5:33).

Saphir say'fuhr. KJV form of SHAPHIR.

Sapphira suh-fi''ruh (Σάπφιρα G4912, from Aram. שַׁפִּירָא [determined state of שַׁפִּיר H10736], "beautiful"). Wife of ANANIAS. The couple sold a piece of property and pretended to bring the money to the apostles. For their hypocrisy in pretending not to have kept any of the money for themselves, and lying to the HOLY SPIRIT, they both died suddenly within three hours of each other, much to the fear of the early church and of all who heard about it (Acts 5:1 – 11). (For a discussion of the literary qualities of this narrative, see Robert F. O'Toole in *ABD,* 5:980 – 81.)

A. M. ROSS

sapphire. A blue precious stone (Heb. *sappîr H6209;* Gk. *sapphiros G4913);* like RUBY, it is a variety of corundum (aluminum oxide), which next to DIAMOND is the hardest known naturally occurring mineral. The blue color of sapphire, "clear as the sky itself" (Exod. 24:10), is thought to be due to titanium. Many think, however, that ancient writers used the term to refer to the blue colored mineral LAPIS LAZULI, which is easier to cut.

Sapphire possesses a fibrous structure that is generally very faint. Where this structure is well developed, an optical effect of six rays of light emanating from a center is shown and the precious stone is called a "star sapphire." The term *sapphire* has also been used to refer to all gem varieties of corundum except those that are red (rubies); these include oriental TOPAZ (yellow), oriental EMERALD (green), and oriental AMETHYST (purple). The transparent colorless variety is called "white sapphire"; it has been referred to by some writers as ADAMANT. Sapphire, together with ruby and many other gem stones, has come from Ceylon for 2,500 years. They mainly occur in detrital gravels

derived from the denudation of metamorphic rocks, including crystalline limestones. They are also obtained from the basement crystalline rocks. (See E. S. Dana and W. E. Ford, *A Text-book of Mineralogy,* 4th ed. [1932], 481 – 83; A. M. Bateman, *Economic Mineral Deposits,* 2nd ed. [1950], 847 – 48.)

D. R. BOWES

Sara sair'uh. KJV NT form of SARAH.

Sarabias sair'uh-bi"uhs. KJV Apoc. form of SHEREBIAH (1 Esd. 9:48).

Sarah, Sarai sair'uh, say'ri (שָׂרָה *H8577* [from Gen. 17:15 on], alternate form שָׂרַי *H8584* [Gen. 11:29—17:5], "princess"; Σάρρα *G4925*). (1) The wife of ABRAHAM (Gen. 11:29 – 30), and also his half-sister on his father TERAH'S side (20:12). She is highly esteemed by the Jews as a kind of mother-figure and example of piety. She seems also to be admired as an epitome of feminine pulchritude. Legendary accounts of this appear in postbiblical Jewish writing (cf. *DOTP*, 735), and there is a flowery description of her in the GGENESIS APOCRYPHON (1QapGen XX, 2 – 8).

Sarai journeyed with Abram from UR to HARAN (Gen. 11:31), and after a time there to CANAAN (12:5). Sojourns at SHECHEM and between the towns of BETHEL and AI followed, but because of a famine in the land they fled to EGYPT. Even at the age of sixty-five (cf. 12:4 and 17:17) she had so retained her beauty that Abram feared that he might be killed for his wife when they were in Egypt. To minimize this possibility he let it be known that she was his sister (12:10 – 13). PHARAOH took Sarai into his HAREM or palace and gave generously to Abram. Because of plagues on his household, however, Pharaoh suspected the truth and she and her husband were sent away.

A second incident in which a similar pretense was used occurred at the court of ABIMELECH, king of GERAR, when again Sarai posed as Abram's sister (Gen. 20; cf. the parallel in ch. 26, concerning ISAAC and REBEKAH). Abimelech was warned in a dream, and following a prayer by Abram, the plague that had fallen on his house was lifted, but again Sarai and Abram had to leave.

The first mention of Sarai stated that "she had no children" (Gen. 11:30). Her BARRENNESS was a continual reproach, and after ten years in Canaan she gave her Egyptian handmaiden, HAGAR, to Abram for a concubine (16:1 – 3). When Hagar conceived she despised Sarai, who in her jealousy mistreated Hagar to the extent that the latter had to escape into the wilderness for a time; but after seeing a vision, she returned to the house of Abram (16:4 – 9). Hagar gave birth to a son named ISHMAEL, who is regarded as ancestral to the ARABIAN peoples, in fulfillment of a prediction made to Hagar in the wilderness: "I will so increase your descendants that they will be too numerous to count" (16:10, cf. 17:20). (On the conflict between the two women as a literary pattern, see A. Brenner in *VT* 36 [1986]: 257 – 73. This story has been a focus of much modern feminist hermeneutics.)

Sarai's name was changed to Sarah as a mark of something new: God's promise that she would bear a son (Gen. 17:15 – 16; "Sarai" is thought to be an older form of the name, but there appears to be no significant difference between the two forms). This son was to be the ancestor of a great posterity, from whom prominent leaders should come. Sarah laughed at the announcement because she was already ninety, and her husband, Abraham, was one hundred years of age. But the promise came to pass, and some fourteen years after Ishmael, Isaac was born (21:1 – 3). All was joyous until the feast held for Isaac's weaning, when Sarah's jealousy lest Ishmael should receive the inheritance resulted in the now permanent casting out of Hagar and Ishmael, who went and lived in the

wilderness of PARAN (21:8 – 21). Sarah is thus shown as a very human person who, because of her jealousy and hasty judgment, falls something short of the ideal character. Nevertheless, her FAITH (Rom. 4:19; cf. Isa. 51:2; Heb. 11:11) and proper familial regard (1 Pet. 3:6) are noted in these NT passages. Her name is not mentioned in the allegorical treatment of the covenants in Gal. 4:21 – 31, but it is obvious that she is specifically referred to in this passage as well.

Sarah died at the age of one hundred twenty-seven years, at KIRIATH ARBA (i.e., HEBRON, Gen. 23:2). To provide a place of burial, Abraham purchased land at Hebron which included a cave known as MACHPELAH, which was destined to become the family burying place (23:3 – 20, cf. 25:10; 49:31), and which today is surmounted by a well-known building used as a mosque. Hebron is indelibly associated with the family of Abraham, and its early name, Kiriath Arba ("fourfold city") comes from the leader of the Anakites, whose name was ARBA (Josh. 14:15). It was the center of the community of giants during the exodus and conquest, and was captured by CALEB during a late conquest military action. However, during the earlier times of Abraham the area was settled by the HITTITES (KJV, "sons of Heth," Gen. 23:3), and the land was purchased from a man named EPHRON for a price of 400 shekels of silver (23:16). (For a full-scale feminist literary interpretation, see T. J. Schneider, *Sarah: Mother of Nations* [2004].)

(2) Daughter of Raguel and wife of TOBIAS (Tob. 3:7 et passim). She is the heroine of a somewhat fanciful and engaging narrative set at the time of the Assyrian captivity. Sarah had previously been married to seven husbands who were killed by a demon, and she suffered reproach from her maids. On the very day that TOBIT, father of Tobias, implored God to end his sufferings, Sarah offered a similar prayer. God heard them both and sent the angel RAPHAEL, who released Sarah from the demon and made possible her marriage to Tobias (3:16 – 17). The story abounds with details of family life, conveying a sense of verisimilitude to the reader.

(3) KJV alternate form of SERAH (Num. 26:46).

M. H. HEICKSEN

Saraias suh-ray'uhs. KJV form of SERAIAH (1 Esd. 5:5; 8:1; 2 Esd. 1:1).

Saramel sair'uh-mel. KJV Apoc. form of ASARAMEL (1 Macc. 14:28).

Saraph sair'uhf (שָׂרָף *H8598,* "burning one"). Son of SHELA and grandson of JUDAH; he and one (or more) of his brothers are said to have ruled in MOAB and JASHUBI LEHEM (1 Chr. 4:22; the NRSV emends the text and renders, "who married into Moab but returned to Lehem").

Sarapis. See SERAPIS.

Sarasadai sair'uh-sad'i (Σαρασαδαι). Son of Israel and ancestor of JUDITH (Jdt. 8:1; KJV, "Salasadai"). The reference is probably to ZURISHADDAI (Num. 1:6 et al.).

Sarchedonus sahr'kuh-doh'nuhs. KJV Apoc. form of ESARHADDON (Tob. 1:21 – 22).

Sardeus sahr-dee'uhs. KJV Apoc. form of Zer-daiah (1 Esd. 9:28). See AZIZA.

sardine. An archaic term used by the KJV to render Greek *sardion G4917,* which refers to the

mineral CARNELIAN (Rev. 4:3; the KJV translates "sardius" in 21:20).

D. R. BOWES

Sardis sahr'dis (Σάρδεις *G4915*; see also SEP-HARAD). A city of W ASIA MINOR. Sardis lay on the junction of the principal highways linking EPHESUS, SMYRNA, and PERGAMUM with the high country of inner Asia Minor. The kingdom of LYDIA, of which Sardis was the ancient capital and royal seat, straddled the communications route between the AEGEAN coast and the hinterland and was in consequence an area where the Greek and native culture met and creatively mingled. Under the 6th-cent.-B.C. Lydian king Croesus—whose name became a legend for wealth, prosperity, and the doom which sometimes falls shockingly upon the rich and fortunate—Sardis was famed for its affluence. Gold and silver minted coinage had its origin there, and the Pactolus River, which flowed nearby, was a proverb for its easily won alluvial gold.

The site itself was marked by geography for greatness. The broad ridge of Mount Tmolus thrusts seaward from the central plateau, and a cluster of sharp-sided promontories of highland dominate the Hermus valley plain, where Tmolus ends. On one of these easily defended ridges stood the stronghold of Sardis, 1,500 ft. above the alluvial plain onto which, in days of peace, her population and habitations flowed. Like Troy, Sardis was a citadel and place of refuge, the residence of king and courtier. It must have been inhabited from the first arrival of humans in the Hermus valley, and a place of importance from the first days of the Lydian kingdom in the 13th cent. B.C.

Under Croesus, in the Golden Age of Sardis, Lydian power extended to the Aegean coast and the cities of the Ionian Greeks: Smyrna, Ephesus, and the rest. It was the doctrine of the historian HERODOTUS that power and wealth breed arrogance, and arrogance ends in ruin; in Sardis and its greatest king the historian found a somber and striking illustration. PERSIA was rising to power in the E in the middle of the 6th cent., and Croesus marked the fact with anxious eye. "Croesus," says Herodotus, "learned that Cyrus had destroyed the empire of Astyages, and that the Persians were becoming daily more powerful. This led him to consider with himself whether it were possible to check the growing power of that people before it came to a head" (*Hist.* 1.46). One thought haunted Croesus as he weighed the chances of preventive war. Solon the lawgiver had once visited him in Sardis, and warned him to beware of self-satisfaction, and to count no one happy until the end of life had set him free at last from all danger of a sudden change of fortune. Said Solon: "Sire, he who unites the greatest number of advantages, and, retaining them to the day of his death, then dies in peace, that man alone is, in my judgment, entitled to bear the name of 'happy.' In every matter it behooves us to mark well the end, for often God gives men a gleam of happiness, and then plunges them into ruin" (1.32).

Among his precautions, Croesus consulted the Delphic oracle, who with customary ambiguity answered that "if Croesus attacked the Persians, he would destroy a great empire" (*Hist.* 1.53). This is what the king did. He crossed the river frontier and destroyed a great empire—his own. Croesus retreated to his stronghold and the armies of CYRUS closed in. How disaster befell is best told in Herodotus's own words (1.84):

On the fourteenth day of the siege, Cyrus made proclamation that he would give a reward to the man who should first mount the wall. After this he made an assault but without success. His troops retired, but one Hyroeades resolved to approach the citadel and attempt it at a place where no guards were ever set. On this side the rock was so precipitous, and the citadel so impregnable, that no fear was entertained of its being carried in this place...Hyroeades, however, had observed a Lydian soldier descend the rock to retrieve a helmet which had rolled

down from the top, and having seen the man pick it up and carry it back, thought over what he had witnessed, and formed his plan. He climbed the rock himself, and other Persians followed in his track, until a large number had mounted to the top. Thus Sardis was taken.

The real reason, of course, was decay of the structure of the conglomerate rock which formed the ridge. Its erosion had undermined the defenses. Little is left today of the substantial plateau on which the royal stronghold had stood and the connecting neck of land which joined it to the major mountain mass. (For information on the Persian period, see E. R. M. Dusinberre, *Aspects of Empire in Achaemenid Sardis* [2003].)

More than two centuries later, after ALEXANDER THE GREAT had destroyed the Persian empire, Sardis passed from hand to hand under the successive regimes. It fell first to Antigonus, then to the SELEUCIDS of SYRIA, and then to PERGAMUM when the Attalid dynasty broke free from Seleucid power, which was perennially overstretched in W Asia Minor. It was during an attempt by ANTIOCHUS the Great in 214 B.C. to bring Sardis back under Syrian rule that the lone feat of Hyroeades of 549 B.C. was precisely repeated.

ROME succeeded Pergamum in 133 B.C. when Attalus III, aware of emerging history, bequeathed his kingdom to the republic. Sardis became an administrative center of Roman Asia, and when in A.D. 26 the cities of the province contended for the honor of building a second temple for EMPEROR WORSHIP, the envoys spoke long and eloquently about the past glory of the place. Sardis, as the apocalyptic letter put it, had a name but was dead (Rev. 3:1). Ramsay writes: "It was the city whose history conspicuously and pre-eminently blazoned forth the uncertainty of human fortunes, the weakness of human strength, and the shortness of the step that separates over-confident might from sudden and irreparable disaster. It was the city whose name was almost synonymous with pretentions unjustified, promise unfulfilled, appearance without reality, confidence that heralded ruin" (W. M. Ramsay, *The Letters to the Seven Churches* [1904], 376).
Temple of Artemis at Sardis. (View to the E.)

All the imagery of the letter is vivid in the history of the place, the works undone, the climbing "thief in the night," the sudden surprise. The Christian community was infected by the complacency of

the place. All but a few had not "soiled their clothes"; that is, they had not compromised with the worship of Cybele—the horrible cult of hysteria and mutilation reflected in Catullus's grim poem *Attis*—or with the more subtle Caesar-cult that had become strong in Sardis after A.D. 17 when the beneficence of Rome and Tiberius, after the mighty Asian earthquake of that year, put the city heavily in debt.

Some Christian inscriptions have been found in Sardis, but nothing is known of the origins or end of the Christian community, unless Ramsay is right in finding their sad relics in a strange Muslim splinter sect. The temple of Artemis, whose worship enveloped that of Cybele in the city, has been uncovered together with evidence of its transformation into a church.

(See further E. M. Blaiklock, *The Cities of the New Testament* [1965], 112 – 19; E. Yamauchi, *The Archaeology of New Testament Cities in Western Asia Minor* [1980], ch. 5; G. M. A. E. M. Blaiklock

Sardite sahr'd*i*t. KJV form of "Seredite." See Sered.

sardius. This term (now usually spelled *sard*) is used by the KJV to render Greek *sardion G4917*, which refers to the mineral Carnelian (Rev. 21:20; the KJV translates "sardine" in 21:20).

sardonyx. A semiprecious variety of Chalcedo ny, which is very fine-grained silica (silicon dioxide). Like Agate, it consists of layers of different colors, in this case white or bluish-white and red, or brownish-red, but the layers are in even planes and the banding straight. It is mentioned as the material used for one of the foundations of the wall of the future Jerusalem (Rev. 21:20; NRSV, "onyx"). See also Onyx.

D. R. Bowes

Sarea sair'ee-uh. One of five writers employed by Ezra to transcribe the law (2 Esd. 14:24).

Sarepta suh-rep'tuh. KJV NT form of Zare-phath.

Sargon sahr'gon (סַרְגוֹן *H6236,* from Ass. *Šarrukēn,* "the king is legitimate"). The name of three Mesopotamian kings: Sargon of Akkad (c. 2300 B.C.; cf. B. Lewis, *The Sargon Legend: A Study of the Akkadian Text and the Tale of the Hero Who Was Exposed at Birth* [1980]) and the Assyrians Sargon I (c. 1900) and Sargon II (721 – 705). The name is found only once in the Bible, where it refers to Sargon II of Assyria (Isa. 20:1). This Sargon was the son of Tiglathpileser III, successor to his brother Shalmaneser V, and father of Sennacherib. His reign is amply known from his inscriptions at Khorsabad and from letters and historical texts found at Nineveh and Nimrud C(alah). Although he is named only once in the OT, his campaigns are of importance for understanding the historical background of the prophecies of Isaiah.

Sargon II claimed the fall of Samaria (721 B.C.), which had been besieged by Shalmaneser V

for three years (2 Ki. 17:5 – 6) until his death in 722. According to Sargon's own records, he deported 27,290 people from the area of Samaria to Mesopotamia. During the first part of his reign he faced serious domestic problems, which were settled only by grant of privileges to the citizens of ASSHUR. The next year (720) Ilu-bihdi of HAMATH led ARPAD, DAMASCUS, and PALESTINE into revolt. Sargon defeated this anti-Assyrian coalition near Qarqar in N SYRIA. Also in 720 the kingdom of JUDAH, under AHAZ, together with PHILISTIA, EDOM, and MOAB, submitted to vassalage and paid tribute. In the following years, people deported from Babylonia, Hamath, and elsewhere were resettled in SAMARIA; these, with others brought in later, mingled with the surviving Israelite population, and their descendants were eventually known as the SAMARITANS.
This relief of Sargon II from the palace of Khorsabad (c. 710 B.C.) pictures the king wearing the royal tiara and holding a staff as he faces a high official or crowned prince.

Sargon had scarcely completed the reduction of Samaria when he was greeted by a rebellion in Babylonia in 720 B.C. led by the Chaldean prince Marduk-apal-iddina (biblical MERODACH-BALA-DAN), who ruled 721 – 711 in Babylonia not simply as a barbarian chieftain but as a great Mesopotamian monarch who left behind traces of his building activities in various cities. Although backed by Humbanigash, king of ELAM, an indecisive battle was fought at Der, between the Tigris and the Zagros, making it expedient for Sargon to leave Merodach-Baladan as king in Babylonia. Thus Sargon lost control of Babylonia and did not regain it for about twelve years.

Meanwhile, other campaigns claimed his attention. In ASIA MINOR, Mita (Midas), king of the Phrygian Mushki, proved a troublesome foe. A rebellion by the vassal state of CARCHEMISH in Syria (717 B.C.) provoked Sargon to destroy that ancient center of HITTITE culture and deport its population, and subsequently to make various campaigns into Asia Minor. Sargon also turned on Urartu (ARARAT), already weakened by Tiglath-Pileser III and now gravely threatened by the

incursions of an Indo-Aryan barbarian people called the CIMMERIANS, who were moving down from the Caucasus. Seizing the opportunity, Sargon broke the power of Urartu completely, thus removing an ancient rival—and Assyria's strongest dike against the barbarian tide at the same time.

After 720 B.C. Sargon conducted no major campaign in Palestine. This may have encouraged the restless vassals to imagine that he was a man who could be trifled with. By 713 ASHDOD rebelled; other Philistine towns were then drawn into the revolt and, as Sargon told it, Judah, Edom, and Moab were invited to join. That Egyptian aid had been promised is clear both from the Assyrian texts and the Bible (Isa. 20:5). In fact, according to Isa. 18:1 – 2, ambassadors of the Cushite (Ethiopian) PHARAOH himself waited on HEZEKIAH, hoping to enlist his cooperation. Opinions were divided in Judah: Isaiah was bitterly opposed to such an alliance, both calling on his king to give the Ethiopian envoys a negative answer, and symbolically illustrating the folly of trusting in Egypt by walking about Jerusalem barefoot and clad only in a loincloth (20:2 – 4).

Sargon at this time was at the peak of power and preparing to reconquer Babylon. Ashdod, the center of revolt, was quickly taken by storm, and Judah, Moab, and Edom paid homage to the conqueror. The expected Egyptian aid failed completely to materialize and Judah was held in subjection. Later Hezekiah revolted against Sargon's son, Sennacherib.

At the start of 710 B.C., Sargon was everywhere victorious. The whole of Syria-Palestine and most of the Zagros range were firmly in Assyrian hands; Urartu was dressing its wounds; the Egyptians were friendly; the Elamites and Phrygians were hostile but peaceful. Babylon, under Merodach-Baladan, remained a thorn in the side of Assyria, and in 710 Sargon attacked it for the second time in his reign. It was a smashing victory, with Merodach-Baladan fleeing to Elam for refuge, and the fame of Sargon continued to grow. The repeated efforts made by its enemies to undermine the Assyrian empire had been of no avail; at the end of Sargon's reign it was larger and apparently stronger than ever.

As a war chief, Sargon liked to live in Nimrud, the military capital of the empire, where he occupied, restored, and modified ASHURNASIRPAL'S palace. Moved by great pride, he soon decided to have his own palace in his own city. In 717 B.C. he laid the foundations of "Sargon's fortress," *Dur-Sharrukin,* a hitherto virgin site 12 mi. NE of Nineveh, near the modern village of Khorsabad.

Ten years later the workmen completed a town that was square in plan, each side measuring about one mile. The palace itself stood on a 60-ft. high platform overriding the city wall and comprised more than 200 rooms and thirty courtyards. The royal abode was richly decorated and the gates of the town were guarded by colossal bull-men. Evidence, however, indicates that the city was scarcely inhabited and almost immediately abandoned at the king's death. One year after Dur-Sharrukin was officially inaugurated, Sargon was killed (705 B.C.). His successors preferred Nineveh, and Khorsabad, deserted, fell slowly to ruins.

L. L. WALKER

Sarid saiŕid (שָׂרִיד *H8587,* possibly "survivor"; often emended to "שָׂדִיד, possibly "barrier"). A border town within the tribal territory of ZEBULUN (Josh. 19:10, 12). If the MT is correct, perhaps the

name of the town is related to SERED, one of the sons of Zebulun, but the site is unknown. However, on the basis of some Greek MSS and other versional evidence, many scholars believe that the original Hebrew reading was *sadûd* and that the site should be identified with modern Tell Shadud on the northern edge of the Plain of ESDRAELON c. 5 mi. SW of NAZARETH and 6 mi. NE of MEGIDDO.

<div align="right">A. BOWLING</div>

Saron sair'uhn. KJV NT form of SHARON.

Sarothie suh-roh'thee (Σαρωθιε). Ancestor of a group of SOLOMON'S servants who returned from the Babylonian captivity with ZERUBBABEL (1 Esd. 5:34). The name is not found in the parallel lists (Ezra 2:57; Neh. 7:59).

Sarsechim sahr'suh-kim (שַׂר־סְכִים). A Babylonian army officer who held the title of RABSARIS and who participated in the siege of Jerusalem (Jer. 39:3 NRSV and other versions). Some scholars analyze the text differently and, joining this name with the previous one, read NEBO-SARSEKIM (cf. NIV); in 2007, M. Jursa discovered, in a British Museum tablet, what may be the corresponding Akk. name, *Nabu-šarrussu-ukin,* identified as "chief eunuch [official]" during the reign of NEBUCHADNEZZAR. Others, on the basis of v. 13, emend the text to read NEBUSHAZBAN (cf. J. Bright, *Jeremiah,* AB 21 [1965], 243). See also SAMGAR.

<div align="right">S. BARABAS</div>

Saruch sair'uhk. KJV NT form of SERUG.

Satan say'tuhn (שָׂטָן $H8477$, "adversary" or "accuser"; satanaß $G4928$ [from Aram. σατανᾶς], usually with the definite article [הַשָּׂטָן in 1 Ki. 11:14 LXX]). The grand adversary of God and human beings, identified with the DEVIL (Rev. 12:9; 20:2).

I. References to Satan

A. In the OT. Without the definite article, the Hebrew term *śāṭān* means "an adversary, an opponent." Thus in 1 Sam. 29:4 it is used of DAVID as a possible enemy in battle; in 1 Ki. 11:14, 23, 25, it designates political adversaries to SOLOMON; in Num. 22:22 it is applied to the angel of the Lord who opposed BALAAM. In Ps. 109:6 it is used of a human accuser. With the article, *haśśāṭān*, "*the* adversary," it becomes a proper name and denotes the personal Satan. It is so used in Job 1 – 2 and in Zech. 3:1 – 2, where it clearly designates a celestial being (both passages in the LXX have *ho diabolos G1333*, "the slanderer, the devil"). In 1 Chr. 21:1 the word does not have the article and may be rendered "an adversary," but it is generally conceded that here, even without the article, the term is a proper name (cf. 2 Sam. 24:1).

Terra-cotta mask of a demon (from Ur, 2000 – 1700 B.C.). Monstrous faces like this one, appearing repeatedly in Mesopotamian art, had magical significance.

It is sometimes said that in the OT the figure of Satan is not essentially an evil being, and that he appears simply as an angelic personage who has the task of testing human beings. Admittedly the full picture of Satan's evil character is not given in the few OT references to him, but clearly the recorded glimpses of his activities reveal that he acts in opposition to the best interests of humanity. The first two chapters of JOB unmistakably reveal his malicious nature; he also moved David to number Israel to his own hurt; and his accusations against Joshua (JESHUA) the high priest drew down on him the Lord's rebuke. It is a remarkable feature of the theology of the OT that so little mention is made of Satan as the great Adversary of God and his people. (In the APOCRYPHA, the term *satanas* occurs only in Sir. 21:27, where it probably means simply "adversary.")

B. In the NT. It is in the NT that the picture of Satan receives its full unfolding. The Greek term *satanas* occurs thirty-six times (the TR has the indeclinable form *satan* in 2 Cor. 12:7 and an

additional occurrence of *Satanas* in Lk. 4:8). Without the definite article, the name is twice used in addressing PETER (Matt. 16:23; Mk. 8:33). The remaining occurrences, generally with the definite article, refer to the personal devil. (The article is missing in Matt. 4:10; Mk. 3:23 twice; Lk. 22:3; 2 Cor. 12:7.) Satan is also referred to more than thirty times as *diabolos*, which means "slanderer" or "calumniator," but no material distinction between the two terms is discernible in their usage. ("Devils" in the KJV is properly DEMONS.)

II. Scriptural picture of Satan

A. Names. Beside the two principal names already mentioned, various other names and descriptive designations are applied to Satan. They serve to reveal the dignity and character of this mighty celestial being. He is called ABADDON and APOLLYON (Rev. 9:11), both meaning "destroyer"; "the accuser of our brothers" (12:10); "your enemy" (*antidikos G508*, 1 Pet. 5:8); BEELZEBUL (Matt. 12:24); BELIAL (*Beliar G1016*, 2 Cor. 6:15); "the great dragon…that ancient serpent…the deceiver of the whole world" (Rev. 12:9 NRSV); "enemy" (*echthros G2398*, Matt. 13:28, 39); "the evil one" (13:19, 38); "a murderer…a liar and the father of lies" (Jn. 8:44); "the god of this age" (2 Cor. 4:4); "the ruler of the kingdom of the air" (Eph. 2:2); "the prince of this world" (Jn. 12:31; 14:30; 16:11); "the tempter" (Matt. 4:3; 1 Thess. 3:5).

B. Position. Satan holds a position of great power and dignity in the spiritual world. In Job 1:6 he is numbered among "the sons of God" (NIV mg.), although by his moral nature he is not one of them. He has personal access to the presence of God, a privilege that will be taken from him in a future day (Rev. 12:9). So exalted is his position that MICHAEL the archangel found him a formidable foe and "did not dare to bring a slanderous accusation against him" (Jude 9).

The NT reveals that Satan is the ruler over a powerful kingdom of evil which he rules with intelligent consistency. In refuting the charge that he was casting out demons by the power of Beelzebul, Jesus pointed out the absurdity of the charge, since it would mean that Satan "is divided against himself. How then can his kingdom stand?" (Matt. 12:26). Satan does not operate in isolation but is the head of a well-organized kingdom in which his subjects exercise delegated responsibility under his direction. He is the leader of a vast, compact organization of spirit-beings, "his angels" (Matt. 25:41; Rev. 12:7). As "the ruler of the kingdom of the air" (Eph. 2:2), he skillfully directs an organized host of wicked spirits in the HEAVENLY realms who do his bidding (6:12). The fallen angels who gave their allegiance to Satan (Rev. 12:4, 7, 9) apparently retain the ranks, dignities, and titles that were divinely given them.

Whatever the origin of the demons, it is clear that they render willing and wholehearted obedience to the rule of Satan (Matt. 12:28 – 29). Acts 10:38 makes it clear that the outburst of demonic activities during the ministry of Jesus was Satan-inspired. Satan, who is not omnipresent, exerts his influence practically everywhere through the work of his numerous subordinates. The book of Revelation reveals that at the close of this age and in the great tribulation there will be another fearful outburst of demonic activity (Rev. 9:1 – 11; 18:2).

Satan is also described as "the prince of this world" (Jn. 12:31 et al.). The WORLD he rules is the *kosmos G3180*, the present world system organized according to his own principles, methods, and aims (2 Cor. 4:3 – 4; Eph. 2:2; Col. 1:13; 1 Jn. 2:15 – 17). The greed and self-centered ambitions of the nations, the deceptive diplomacy of the political world, the bitter hatred and rivalry in the sphere of commerce, the godless ideologies of the masses of humanity—all spring out of and are fostered by

satanic influence. Satan exercises his domination over "the children of disobedience" (Eph. 2:2 KJV). And the statement that "the whole world is under the control of the evil one" (1 Jn. 5:19) indicates that the world of unregenerated humanity lies in the grip of Satan and supinely yields to his power.

Satan has gained his power over mankind by trickery and usurpation. As the instigator of human SIN, whose punishment is DEATH, Satan gained "the power of death" and uses "the fear of death" as a means to keep people under his domination (Heb. 2:14 – 15). The statement that he is "a murderer from the beginning" (Jn. 8:44) does not mean that he can inflict death at will but that through the FALL of ADAM and EVE he brought about the death of the human race. In his death Christ broke the power of Satan over death and took the prey from under his control (cf. Rev. 1:18).

During the TEMPTATION OF CHRIST, Satan displayed all the kingdoms of the world, asserted that all had been delivered to him, and claimed that he could give them to whom he wished (Lk. 4:5 – 6). Significantly, Jesus did not dispute Satan's claim to sovereignty over this world. Christ categorically rejected the satanic offer to invest him with sovereignty over this world, but that offer will be accepted in the end-time by "the man of lawlessness" (2 Thess. 2:3 – 9; Rev. 13:4).

C. Activities. According to Job 1:7 and 2:2, Satan himself described his restless activity as consisting in "roaming through the earth and going back and forth in it." He is engaged in a worldwide and unremitting conflict against God and his people. This stamps him as "the enemy" of God and truth (Matt. 13:28, 39; 2 Thess. 2:9 – 12). His activities are associated with the realm of moral darkness (Acts 26:18).

The description "the tempter" (Matt. 4:3; 1 Thess. 3:5) designates Satan by his characteristic activity (the Greek is *ho peirazōn*; the present participle used substantivally is a common way of indicating a person's profession or line of work). His intention is ever to lead those tempted to fall into sin. The people of God are always the objects of his fierce hatred. The church of SMYRNA was informed that they would be the subjects of Satan's special onslaughts (Rev. 2:10). The Lord informed PETER, "Satan has asked to sift you as wheat" (Lk. 22:31).

Satan uses the weaknesses and limitations of human beings to entice them to sin (1 Cor. 7:5). He also employs the allurements of the world (1 Jn. 2:15 – 17; 4:4). He commonly tempts people to evil by the falsehood that they can attain a desired good through the doing of wrong. His mode of operation is vividly demonstrated in the account of the fall in Gen. 3. Deception is a universal feature of his activities, justifying his description as "the deceiver of the whole world" (Rev. 12:9 NRSV). He constantly lays "snares" for sinners to make them his captives (1 Tim. 3:7; 2 Tim. 2:26). A fundamental temptation employed is PRIDE (1 Tim. 3:6).

Satan opposes the work of God through his counterfeiting activities. He oversows the wheat with weeds, placing counterfeit believers among "the sons of the kingdom" (Matt. 13:25, 38 – 39). These counterfeit believers form "a synagogue of Satan" (Rev. 2:9; 3:9). Satan often disguises himself as "an angel of light" by presenting his messengers of falsehood as messengers of truth (2 Cor. 11:13 – 15). Those who thus give themselves over to evil and become the agents of Satan to persuade others to do evil are the children and servants of the devil (Jn. 6:70; 8:44; Acts 13:10). Apostate workers may engage in great religious activity without accepting the power of God's truth (2 Tim. 3:1 – 9). Satan blinds human minds to the light of the gospel (2 Cor. 4:3 – 4) and induces people to accept his lie (2 Thess. 2:9 – 10). He induces them to give heed to "deceiving spirits and things taught by demons" through the pretentions of religious liars who have their conscience seared (1 Tim. 4:1 – 2). He hates the Word of God and eagerly acts to snatch it out of the hearts of the

unsaved (Matt. 13:19). He actively hinders workers concerned to further the welfare of the saints (1 Thess. 2:17 – 18).

Satan also opposes the work of God through open and fierce opposition. The act of betrayal by JUDAS ISCARIOT was instigated by the devil (Lk. 22:3; Jn. 13:2, 27). Peter pictures Satan's ferocious activity when he warns believers that "the devil prowls around like a roaring lion looking for someone to devour" (1 Pet. 5:8). His violent attacks manifest themselves in the persecutions experienced by God's people (2 Tim. 3:11 – 13; Rev. 12:13 – 17).

D. Limitations. The Scriptures make it clear that Satan, although a mighty and determined enemy of God, is a limited being. He is a superhuman being, but not coequal with God. The power of Satan is derived (Lk. 4:6) and he is free to act only within the limits laid upon him by God. Satan was able to inflict loss and suffering upon Job only to the extent that God permitted (Job 1:12; 2:6). The members of the church at Smyrna were assured that their tribulation would last only "ten days" (Rev. 2:10). The length of their period of testing was set by the Lord, and Satan would not be able to go beyond it. At present the efforts of Satan on earth are restrained and frustrated by the operation of the divine Restrainer; with the removal of the restraint, Satan will be able to achieve the full outburst of evil in the end-time in the manifestation of the man of lawlessness (2 Thess. 2:7 – 8; some scholars interpret differently the phrase *ho katechōn*, "the one restraining").

Believers are assured that God is greater than the forces of satanic evil and that they will never be able to defeat God and separate them from the love of God (Jn. 10:28; Rom. 8:38 – 39; 1 Jn. 4:4). Satan is permitted to afflict God's people, but they are assured he will never experience complete victory over them (Jn. 14:30 – 31; 16:33). God at times even uses Satan as his instrument to chasten and correct erring saints (Lk. 22:31 – 32; 1 Cor. 5:5; 1 Tim. 1:20).

Satan is not divine; thus he is not omnipotent, nor omniscient, nor omnipresent. He has vast power, but that power is definitely limited. He does not know all things, as is evident from his blunders during the course of history (e.g., his futile efforts to destroy the child Jesus). Satan cannot be personally present everywhere, though he makes his power felt worldwide through the operations of his many minions. Satan acknowledged his limitations in his conversation with God concerning Job (Job 1:7 – 11).

E. Origin. Satan is not eternal or self-existent. Scriptural MONOTHEISM leaves no room for any view of an eternal DUALISM of good and evil. His limitations are consistent with his nature as a created being. The words of Jesus in Jn. 8:44 indicate that Satan is a fallen being. The assertion that he "does not stand in the truth" (NRSV) indicates not only his past fall but also his resultant apostate character. Satan fell under God's condemnation through ambitious pride (1 Tim. 3:6). While numerous interpreters refuse to apply Ezek. 28:11 – 19 to Satan, and admittedly he is not named there, yet many scholars hold that the passage goes beyond the human king of TYRE to Satan, the unseen ruler and true source of all such pomp and pride as that of Tyre. Thus viewed, the passage would set forth the origin of Satan as a created being, his original position of power and dignity over the created universe, at least over this earth, and his fall through pride.

A similar passage, Isa. 14:12 – 14, is addressed to the MORNING STAR (KJV, "Lucifer") and likewise is held by many to go beyond the king of BABYLON and to refer to Satan, the prince of the godless world system of which Babylon was the type. Thus viewed, the fivefold "I will" (vv. 13 – 14) portrays Satan's rebellious self-exaltation, marking the beginning of the conflict between the will of God and Satan's own will. This interpretation of Ezek. 28:12 – 15 and Isa. 14:12 – 14 throws

much light on the question of Satan's origin and is in harmony with the scriptural picture of Satan's close relations with world governments (Dan. 10:13; Jn. 12:31; Eph. 6:12). (For the view that the Isaianic passage cannot refer to Satan, see E. J. Young, *The Book of Isaiah: A Commentary*, 3 vols. [1965 – 72], 1:441.)

F. Motive. Satan's substitution of his own will for that of his Maker marked the beginning of the protracted conflict between good and evil which has extended through the ages. God has permitted the effort of Satan to establish his own will in opposition to the divine will to be thoroughly tested. The unrelenting conflict between the KINGDOM OF GOD and the kingdom of evil is the direct result of Satan's determination to establish his claim. The presence of sin, suffering, and death reveal the inevitable consequences of the satanic claim. Through his seduction of Adam and Eve (Gen. 3:1 – 7; 2 Cor. 11:3) Satan succeeded in establishing his domination over mankind. Through the work of the incarnate Christ that power was broken (Heb. 2:14 – 15).

In his efforts to establish his own will, Satan relentlessly works to thwart the purpose and work of God (Acts 13:10). And in his ambition to assume the place of God, Satan is mastered by a consuming passion to receive worship as God. That master passion was revealed in Satan's bald offer to invest Jesus with authority over the kingdoms of this world on condition that Jesus would worship him. This passion for worship will be gratified through his empowerment of the man of lawlessness in the end-time (2 Thess. 2:9 – 11; Rev. 13:4). IDOLATRY, with its diversion of worship from the true God, is motivated by demonic forces (1 Cor. 10:20; Ps. 106:34 – 38).

G. Judgment. The crucial battle between the kingdom of God and the kingdom of evil took place in the conflict between Christ and Satan. The explicit purpose of the coming of Christ into the world was "to destroy [render inoperative] the devil's work" (1 Jn. 3:8). Satan's initial defeat came in the wilderness temptation at the beginning of Jesus' messianic ministry (Matt. 4:1 – 11; Lk. 4:1 – 12). Because of that victory Jesus was able during his ministry to enter "a strong man's house and carry off his possessions" (Mk. 3:27). The decisive defeat of Satan came in the cross of Christ (Jn. 12:31; 16:11). There Satan was judged as a usurper and cast out as the legitimate ruler of this world. In the cross and the resurrection Christ broke the power of Satan over mankind (Col. 2:14 – 15; Heb. 2:14 – 15) and potentially delivered every soul from Satan's power. Those who in faith accept that deliverance are rescued from the dominion of darkness and transplanted into the kingdom of God's beloved Son (Col. 1:13).

While judgment has already been pronounced upon him, Satan is still permitted to operate as a usurper until the time of his final imprisonment. As a dethroned monarch he is still allowed to rule over those who accept his authority while he persecutes those who have declared their allegiance to Christ.

H. Doom. Scripture reveals the certain outcome of the conflict between good and evil and the inevitable doom of Satan and his hosts. Jesus saw a picture of that final defeat of Satan in the victory of the seventy disciples over the forces of evil (Lk. 10:18). Jesus asserted that "the eternal fire" had been "prepared for the devil and his angels" (Matt. 25:41).

The book of Revelation portrays the final judgment carried out on the devil. At the return of Christ in glory, Satan will be confined to the sealed bottomless pit for 1,000 years, during which time the earth will be free from his deceptive and seductive influences (Rev. 20:1 – 3). At the end of the 1,000 years, Satan will again be loosed from his prison and will again resume his deception of the

inhabitants of the earth with great success. This final rebellion will be summarily crushed by divine action, and the devil will be thrown into "the lake of burning sulfur," where with the beast and the false prophet he "will be tormented day and night for ever and ever" (20:7 – 10). His doom will be to share the eternal punishment of those whom he deceived (20:12 – 14). See LAKE OF FIRE; PUNISHMENT, ETERNAL.

III. Believers and Satan. Having been rescued from the kingdom of darkness, believers are assured of victory over the malicious activities of the devil. They are promised that "the God of peace will soon crush Satan under your feet" (Rom. 16:20). They find their security in the keeping power of Christ (Rom. 8:31 – 39; 1 Jn. 5:18).

For effective victory over Satan, believers must recognize that, on the basis of the work of Christ, Satan is a defeated foe. They are called upon to take a firm stand against the devil. "Resist the devil, and he will flee from you" (Jas. 4:7). Any attempt to flee from the devil would be useless, but in claiming the victory of Christ, a person can put the devil to flight. In order to experience victory over Satan believers cannot remain "unaware of his schemes" (2 Cor. 2:11). Recognizing that he is a powerful and crafty foe, they must "not give the devil a foothold" by allowing sin in their lives (Eph. 4:25 – 27). Instead, they must be "self-controlled" as well as "alert" to the danger from the devil, and firmly resist him in faith (1 Pet. 5:8 – 9). Paul repeatedly stresses the need to take a firm stand against the satanic enemy (Eph. 6:10 – 17).

God has made ample provision for the believer's victory over Satan. Victory over all satanic attack is possible to those who put on "the full armor of God" (Eph. 6:13 – 17). They also have the anointing of the HOLY SPIRIT, which enables them to discern truth and error (1 Jn. 2:20 – 21, 26 – 27). The intercessory work of Christ on the basis of his ATONEMENT is the divine provision for cleansing and restoration whenever they sin (Rom. 8:33 – 34; Heb. 7:25; 1 Jn. 2:1 – 2). The way of victory over "the accuser of our brothers" is given in Rev. 12:11: "They overcame him / by the blood of the Lamb / and by the word of their testimony; / they did not love their lives so much / as to shrink from death."

It is the commission of Christ's people to turn the lost "from darkness to light, and from the power of Satan to God" (Acts 26:18).

IV. Objections to the doctrine. The NT clearly pictures Satan as a malignant, superhuman personality. But the concept of a personal devil is unacceptable to many minds today. The objection is raised that the existence of a personal devil is incapable of scientific proof. Admittedly, spiritual realities cannot be proved by means of naturalistic scientific criteria, but consistency would require that the biblical revelation of a personal God also be rejected.

It is claimed that the devil is in reality a human invention to account for our sinfulness. This view seems laudable in its attempt to make people responsible for their own sins. In effect, however, it leads to a shallow view of the reality of sin in the world, and it cannot adequately account for the depths of iniquity in the world. An objective evaluation of the reality of sin reveals that it is "too masterly marshalled, too subtly planned, too skilfully directed, too logically remorseless, for any such facile explanation. There is design; there is diplomacy; there is cunning; there are stratagems and campaigns. There must be a master mind behind these activities" (quoted in F. A. Tatford, *The Prince of Darkness* [1967], 14).

The biblical view of a personal devil who is a limited being under the control of divine sovereignty best explains the awful realities of sin and fits a monistic worldview. The sane and

restrained scriptural references to the devil are wholly consistent with the worldview presented in the Bible as a whole. These references are woven into the very warp and woof of the biblical revelation, and cannot be consistently demythologized without serious damage to the fabric as a whole. The recorded utterances of Jesus in the Gospels clearly assert the existence of a personal devil. In this he agreed with the views of the Jewish leaders of his day. His acceptance of the view cannot be explained simply on the basis of accommodation to prevailing views, since Jesus did not hesitate to expose the erroneous views of the Jewish leaders wherever he found them.

The view that the NT picture of a personal devil was derived from Persian dualism is answered by the nature of the NT picture of Satan. That picture is not dualistic: good and evil are not presented as distinct and coeternal principles. While Satan is seen as a mighty evil being, his kingdom is viewed as having a definite beginning and will have a definite end. The operation of evil is always viewed as being under the sovereign permission of the eternal God. God allows Satan to continue his work in order to give a cosmic demonstration of the bankruptcy of the satanic lie.

D. E. HIEBERT

Sathrabuzanes sath'ruh-by*oo*'zuh-neez. See SHETHAR-BOZENAI.

satrap say'trap. A ruling official in the far-flung Persian empire (Ezra 8:36; Esth. 3:12 et al.; Dan. 3:2 – 3 et al.; both the Heb. *ăḥaĕdarpān H346* [Aram. *H10026*] and the Gk. *satrapēs* derive from a Persian word meaning "protector of the realm"). The satrap's jurisdiction extended over several provinces. HERODOTUS (*Hist*. 3.89 – 94) has given the standard list of the twenty Persian satrapies. In Latin literature the term *satrapes* occurs as early as Terence (159 B.C.).

The office was virtually that of a vassal king. The satrap held extensive power but was checked by the presence of a royal scribe who had regularly to render a report to the sovereign of the realm; moreover, the military forces were under the command of a general who held independent status. In Ezra 8:36 ("They also delivered the king's orders to the royal satraps and to the governors of Trans-Euphrates") the term seems to be used loosely, since the only satrap whom Ezra's commission would really concern was the one ruling in Trans-Euphrates itself (cf. 5:3). See also PERSIA III.C. (For an extensive treatment, see H. Klinkott, *Der Satrap* [2005].)

J. H. BRATT

satyr. The Greek term *satyros* referred to a mythological god, half human and half beast (with pointed ears and goats' tail and legs), which inhabited the woods and engaged in the revelries of DIONYSUS. For lack of a better term, the KJV chose *satyr* to render Hebrew *śā'îr* in Isa. 13:21 and

34:14, understanding the word to refer to demonic creatures that gambol in desolate areas. This rendering was followed by the RSV and other versions not only here, but also in Lev. 17:7 and 2 Chr. 11:15 (where the KJV has "devils"). The NRSV, while accepting the same interpretation, translates "goat-demon." The NIV interprets the term in Isaiah as the usual noun for "goat" or "wild goat" (*śāʿîr* II *H8538*), but acknowledges the sense "goat idol" or "goat demon" (*śāʿîr* III *H8539*) in the other two references. (Some scholars emend 2 Ki. 23:8, "the shrines at the gates" [*bāmôt haššeʿārîm*] to "the shrine of the goat-demons" [*běmat haśśěʿirîm*].) It does seem likely that in some or all of these passages there is a reference to one of the demonically inspired pagan gods of Canaan, in the image of a goat, having a brutal and lustful nature, which was an object of worship for Israel and became a snare to them (cf. Deut. 32:17; Ps. 106:37). (See also *DDD*, 732 – 33.)

J. H. BRATT

Saul sawl (אָשׁ֫וּל *H8620*, "one who has been begged for" [cf. SHAUL]; LXX Σαούλ *G4910* [also Acts 9:4; 13:21; 22:7, 13; 26:14], NT usually in the hellenized form Σαῦλος *G4930*). Son of Kish and first king of Israel. (In the NT, the name is applied only once to the Israelite king [Acts 13:21], elsewhere to Saul of Tarsus; see PAUL. The KJV uses the form *Saul* also in reference to the Edomite king SHAUL [Gen. 36:37 – 38; but not in 1 Chr. 1:48 – 49].)

I. Family. According to 1 Sam. 9:1, Saul's father was "a man of standing, whose name was Kish son of Abiel, the son of Zeror, the son of Becorath, the son of Aphiah of Benjamin." In 1 Chr. 8:33 and 9:39, however, NER is listed as the father of KISH (cf. also 8:30 [LXX] and 9:36). Some argue that 1 Chronicles is incorrect, but, as is common in Hebrew genealogies, there are probably gaps between generations in these lists. (The Ner in 1 Sam. 14:50, identified as Saul's paternal uncle, must be a different person.) The place mostly associated with Saul was GIBEAH, but ZELA seemed to be the location of the family burial plot (2 Sam. 21:14).

There is no record that Saul had brothers or sisters. His first wife was AHINOAM, daughter of Ahimaaz. By her he had four sons: JONATHAN, MALKIM-SHUA, ABINADAB, and ESH-BAAL (1 Chr. 8:33; 9:39). Esh-Baal became better known as ISH-BOSHETH (2 Sam. 2:8) and apparently was also called ISHVI (1 Sam. 14:49). Saul also had a concubine named RIZPAH, daughter of Aiah, by whom he fathered two sons: ARMONI and MEPHI-BOSHETH (2 Sam. 21:8, 11). Two daughters are mentioned: MERAB and MICHAL (1 Sam. 18:19 – 20).

II. Youth. The opening of 1 Sam. 9 gives the limited data available about young Saul. He came from a family of influence and some wealth, and he himself was handsome and tall (vv. 1 – 2). The text goes on to relate that Saul and a servant set out to look for some lost donkeys. They covered the territory of BENJAMIN and did not find them, so the servant suggested to Saul that they obtain information from SAMUEL, who was at RAMAH. God revealed to Samuel that Saul was the man chosen to be the king of Israel (vv. 15 – 17), so after a festive meal and a night's rest (vv. 22 – 27), the prophet called Saul aside and anointed him (10:1). A series of predictions followed (10:2 – 7), all of which came true as Saul returned home. The most important was an encounter with a band of prophets and an outpouring of the Spirit on Saul (vv. 9 – 11).

III. Proclaimed king. There are parallel accounts of Saul's rise to kingship (1 Sam. 10:1 – 24 and 11:1 – 15; some scholars assign early and late dates to these stories, but that conclusion is not

necessary). Behind both accounts lies the initial discussion about the need of a king (8:1 – 22). The first story (ch. 10) gives the religious aspect of the authentication of Saul's qualifications to serve as ruler in Israel, and the other (ch. 11) gives the military perspective. The religious aspect included God's word to Samuel (9:15 – 16), Samuel's private anointing of Saul (10:1), the Spirit's infilling (10:9 – 13), and the public selection by lot at MIZPAH (10:20 – 24). The military aspect centered in the appeal of the men of JABESH GILEAD for help against the Ammonites, who were quickly defeated by Saul's army (11:1 – 11). This feat brought instant popularity. Samuel led the people to GILGAL and confirmed again the new status of Saul as king of Israel. (For a summary of critical discussion concerning this and other topics, see *ABD*, 5:989 – 99.)

IV. The general situation. Saul lived in troubled times. For a relatively long period Israel had been simply a loose confederation of twelve tribes with no single leader. Judges had arisen under the call of God to serve in various regions of the land in times of crisis (see JUDGES, PERIOD OF). There had been a common sanctuary at SHILOH, but it was now destroyed (1 Sam. 4:12 – 22; Jer. 7:14; 26:6, 9). New invaders from the islands of the sea, the PHILISTINES, had settled along the Mediterranean coast and had pushed up into the highlands. Israel had no military organization capable of stopping the invaders. Nor did they have weapons, for the Philistines had established a monopoly in the making and the maintenance of IRON tools (1 Sam. 13:19 – 22). The Philistines had made Saul's home town, Gibeah, into an outpost (10:5; 13:3). For some time Samuel, the prophet, had been the figure on whom the Israelites could center their hopes. Israel had no governing institutions, no economic institutions, no effective religious institutions.

V. Initial acts to establish a nation. Saul's first major move was against the local Philistine garrison. He formed a small army of 3,000 men who were divided between himself and his son Jonathan, and the latter soon destroyed the garrison at GEBA. The enemy immediately reacted by bringing in a larg force of chariots, cavalry, and troops, stationing them at MICMASH. They were dramatically defeated almost singlehandedly by Jonathan (1 Sam. 14:1 – 15), though the rest of Israel's force soon joined the fray and routed the enemy. From this victory Saul moved effectively against Israel's enemies to the E and to the S. Seemingly, Saul's army had a simple organization. There was a core group made up of three units that could operate separately (13:2) and a militia called "the people" (13:7 NRSV [NIV, "troops"]). Saul set up his headquarters at his family home at Gibeah (14:2; 15:34). Here (modern Tell el-Ful, some 3.5 mi. N of Jerusalem) a small but strong walled fortress has been found, which some have assumed to belong to Saul (see GIBEAH #4).

VI. Saul's relationship with Samuel. Saul owed everything to Samuel the prophet, but they soon came into conflict. At the time there was no clear distinction between civil and religious activities. In the early part of Saul's reign, there seemed to be a cooperative attitude, for in calling the people to war against the Ammonites, Saul linked his name with the name of Samuel (1 Sam. 11:7). The incident in 13:8 – 15 implies that the two men had agreed on the necessity of resisting the Philistines. Samuel was to be in charge of the religious ceremonies of the called meeting, and Saul in charge of the military aspects. On the pretext that Samuel's delay in coming to do his duty was unbearable, Saul performed the religious ceremony and brought upon himself a sharp rebuke from Samuel. On the surface Saul's excuses seem valid enough, but he had overstepped the bounds of his authority and thus revealed that he lacked the wisdom of a good leader. The possibility of an enduring dynasty was removed by his rash act (13:8 – 14).

A similar situation took place during the war against the Amalekites (1 Sam. 15:6 – 33; see AMA-LEK). At the beginning Samuel and Saul were united in their understanding of the reasons for and the goals of the war, as well as the procedures in dealing with an implacable foe after the victory had been won. However, at the moment when orders must be given to carry out the objectives, he yielded to other pressures and reneged on the agreement. He did his best to rationalize his actions to Samuel, but to no avail. The judgment was that a man who could not carry through on agreed objectives was not worthy and therefore rejected of God. In order not to humiliate Saul too drastically before the people, Samuel did agree to worship with him publicly. But Samuel refused to have anything to do with Saul throughout the remainder of the prophet's life.

Saul's last encounter with Samuel was an unpleasant event (1 Sam. 28:7 – 20). Saul had gone to the medium of ENDOR to gain occult information from Samuel, who had long been dead. To the amazement of all, Samuel appeared without occult incitement and severely condemned the king. A relationship that had originally been so fruitful was totally shattered beyond repair.

VII. Saul's relationship with David. Samuel's act of anointing DAVID as a future ruler in Israel was, seemingly, a secret of which Saul knew nothing for many years. David's entrance on the national scene, his encounter with GOLIATH (1 Sam. 17:20 – 58), was dramatic and greatly impressed Saul; moreover, it won the admiration and affection of Jonathan, Saul's son.

David soon became a skilled soldier. His popularity soared to such heights that Saul was eclipsed. The effects of this turn of events were devastating, for Saul, under the influence of "an evil spirit from God," tried to kill David (1 Sam. 18:5 – 11). Then thwarted hate became fear as the new rival became more famous and acclaimed as a hero. Fear begat cunning and so, under the disguise of flattery, Saul sent David against the Philistines, with the lure of his daughter Merab as a prize, but also the hope that the enemy would kill the young man. When David returned successful, Saul partially reneged on his promise by substituting his second daughter, Michal, for Merab. To Saul's dismay the union blossomed into mutual love (18:12 – 30).

Saul's relationship with David became complicated by Jonathan's refusal to go along with his father's efforts to destroy David; in fact, Jonathan actively aided his friend to escape after temporarily persuading Saul to spare David's life (1 Sam. 19:1 – 7; 20:1 – 42). Even Michal took a stand against her father by aiding David (19:11 – 17). The intensity of Saul's hatred toward David increased to the extent that he soon recklessly slaughtered any group which gave him aid and comfort (21:1 – 9; 22:9 – 19), and wasted time and strength chasing David through the wilderness of Judah (23:24 – 26).

David was an elusive prey. He fled from Saul in the wilderness of ZIPH, because the local people were loyal to Saul and betrayed David's presence there. Saul gave chase and followed David to the wilderness of MAON, but had to cease because word came that the Philistines had invaded Israel (1 Sam. 23:19 – 29). Spies kept Saul informed and soon he pursued David to the wilderness of ENGEDI, among the barren hills just W of the DEAD SEA. It so happened that Saul made camp in the cave in which David and his men were hiding. While Saul slept, David cut off part of the king's robe, but refused to harm the king. Later, after all had left the cave, David called to Saul from a safe distance and informed him how near the king had been to death. This act of mercy so shamed Saul that he begged for mercy on his posterity. Saul confessed that he knew that David would be the next king. With this statement completed, Saul called off his chase and returned home (24:1 – 22).

VIII. Saul's last years. The threat from the Philistines became more severe, for they seemed

determined to take advantage of Saul, whose government had suffered much from his quarrels with David. Saul could scarcely build a strong organization while pursuing David in the desert. Samuel was dead, so the religious life of the people was practically nil. Saul had outlawed Canaanite occult practices (1 Sam. 28:3), but he had never provided positive religious values or practices in their stead. Commercial activity had never been encouraged, so the economic condition of the tribes was at a low ebb. Effective social, cultural, and educational institutions had never been built in order to bind the tribes together as a unit. There was a small core army but, evidently, the training of the popular militia had been neglected.

Saul's kingdom seemed ripe for the picking; the Philistines were eager to be the pickers. The center of attack focused on the northern approaches to the highlands from the valley of JEZREEL (much like the Israeli-Jordan tactics of 1967).

Saul was not prepared for the battle, either militarily or spiritually. His unfortunate encounter with the medium of Endor and with the spirit of Samuel had unnerved him. The battle was a disaster from the beginning. Saul's army was quickly routed, then slaughtered by the Philistines as they sought to escape. Among the fallen were three of Saul's sons: Jonathan, Abinadab, and Malki-Shua. The king himself was wounded by an arrow. In agony, Saul begged his armor-bearer to thrust him through with a sword; he refused. Desperately, Saul fell on his own sword and thus ended his life in ignominy. When Saul's body was found by the Philistines, they dishonored it by cutting off the head, stripping off the armor and hanging the naked body on the outside wall of BETH SHAN (1 Sam. 31:1 – 10; 1 Chr. 10:1 – 10). The armor was put on public display in a temple.

The disgrace that had befallen Saul stirred a people whom he had helped early in his reign, the inhabitants of Jabesh Gilead. At great risk to themselves, men from this city removed the bodies of Saul and his sons from the wall of Beth Shan and gave them proper burial.

Aerial view of ancient Beth Shan (looking SE), where the bodies of Saul and Jonathan were hung after they were killed by the Philistines.

IX. The spiritual odyssey of Saul. Saul is one of the most tragic figures of the OT. He entered his life's work with great promise, but ended it with shame and dishonor.

When first meeting Saul in the Scripture, the reader does not gain the impression that he was an

unusual person, except that he was much taller than others. The fact that he assumes that a fee would have to be paid Samuel for a prediction of where the donkeys were located may reflect a lack of understanding of how true Hebrew prophecy differed from that practiced among his pagan neighbors. His lack of knowledge of who Samuel really was reveals his ignorance of the name of the great men of his people and his lack of interest in them. Saul's servant knew, but he did not.

Yet, Saul was a modest fellow, ready to admit his unimportance because his tribe, Benjamin, was insignificant. He did not protest the favors Samuel showered on him, but he did not revel in them either. Saul was attentive to Samuel's predictions and readily responded to the influence of the Spirit of God on his heart and the workings of the Spirit among the joyful band of prophets. Here is the first instance in Scripture in which the Spirit of God and a heart change are linked together.

Saul's spiritual experience, with resultant success in aiding the people of Jabesh Gilead against the Ammonites and defending his own people from the Philistines did not engender pride in his heart. He did not seek the leadership of Israel; he tried to evade it. But both Samuel and the Israelites saw Saul as God's choice.

The success God gave Saul in political and military affairs did give him trouble. For a time he shared leadership and decision making with Samuel, but soon chafed under the restraints of sharing power and popularity. And this became the watershed of his life. Tradition and custom in the ANE held that kings should be sole rulers, though Israel had never accepted this dictum. Saul was lured by it, and using Samuel's seemingly unnecessary delay as an excuse, Saul violated an established shared leadership by taking on the functions of a priest as well as a king, on the basis of pious motive. It was a serious mistake, and he suffered the humiliation of a severe rebuke.

Saul possessed a serious personality flaw. He was given to rash decisions while under pressure. In a battle with the Philistines, Saul's son Jonathan ate honey, not knowing that his father had put a curse on anyone eating food during the battle. Saul faced a painful dilemma. If he ignored his son's act he would be guilty of negating his own command on the basis of favoritism. If he rigidly carried out his curse, he would have to kill his own son. It was a crisis of authority, and on the face of it Saul seemed heroic in his willingness to put Jonathan to death. But the army objected and openly forced the king to back down from his position. The crisis of authority became a crisis of confidence and Saul lost.

Saul became less sure of himself, and in the victory over Agag, the Amalekite, he quickly yielded to the people's greed for loot. He backed off from his judicial role as executioner of the criminal renegade, Agag. He had been willing to kill Jonathan but shrank from killing the bloody Amalekite. Saul's fumbling excuses before Samuel brought down the clap of doom upon his kingly future. Samuel and God parted company with Saul. The king never recovered from the shock of rejection, though he sought reinstatement carefully with tears.

Instead of the good Spirit of God, an evil spirit took over in Saul's life. His heart changed for the worse and a fearful depression repeatedly seized him. He fluctuated between positive and negative feelings toward those near him. He both loved and hated David (1 Sam. 16:21; 18:8, 11). Saul could brook no rival. The inner circle of government became charged with suspicion, fear, jealousy, and hate. Not only was David in danger of his life, but the king's children, Jonathan and Michal, became involved. In the holocaust of terror, kindly priests, who had helped David grudgingly with food, were slaughtered at Saul's orders by the evil informer, Doeg (21:7; 22:9, 18, 22).

In the series of events leading up to this tragic moment, one incident is most revealing. David had been located as under the protection of Samuel's prophetic band. Saul's police, repeatedly, were overawed by the presence of God's Spirit among the prophets and could not arrest David. Saul went

personally, but the jealousy, hate, and fear which indwelt his soul reacted negatively in the presence of God's servants. Saul prophesied, but not as before; he lost his self-control and stripped himself of clothing. He lost self-consciousness, falling helplessly to the ground. For a king, it was a most humiliating experience, and Saul came out of it more venomous than before. Death and terror marked his associations with others from that time on.

David was Saul's special target and Saul almost trapped him. The king's dismay was devastating when he discovered that, unwittingly, he had slept in the same cave as David, who daringly had cut off a portion of Saul's robe. When, from a safe distance, David confronted Saul, the king reacted characteristically. His anger dissolved into groveling confession that David was in the right and ended with an entreaty for mercy. Saul tried to capture David again but was outsmarted and publicly ridiculed for leaving his person so poorly guarded. Saul confessed he was a sinner and a fool. The chase was over, but Saul's spirit was broken.

Faced with an impending attack by the Philistines, Saul violated his own prohibitions on DIVINATION and sought help from the medium of Endor. Through no skill of the old woman, Saul was met by the spirit of dead Samuel and heard the fatal words of doom.

Saul had no heart for the battle that ensued, nor for the captivity which seemed inevitable. His suicide was an act of utter hopelessness and fear, an act rare in the annals of Israel. The young man of great promise had become an old man of utter disgrace. See also SAMUEL, BOOKS OF.

G. H. LIVINGSTON

Savaran sav'uh-ruhn. KJV Apoc. variant of AVARAN (1 Macc. 6:43).

Savias suh-vi'uhs (Σαουια). Son of Boccas (Bukki) and ancestor of EZRA (1 Esd. 8:2 KJV). This name occurs in CODEX ALEXANDRINUS but not in CODEX VATICANUS (nor in the parallel passage, Ezra 7:4), and on this basis it is omitted by the NRSV.

savior. A term applied to mighty warriors, rulers, and ancient gods, but supremely in the Bible to Jesus Christ (Jn. 4:42; Eph. 5:23). Basic to the OT is the concept that God is the deliverer of his people. No human being could save himself; only God was Savior (Ps. 44:3, 7; Isa. 43:11; 45:21; 60:16; Jer. 14:8; Hos. 13:4). In Hebrew "savior" is a participle (*môšîa‛ H4635*, from the verb *yāša‛ H3828*), which may indicate that in the thought of the OT this term is not so much a title as it is a description of God's activity in behalf of his people. Although the word is not a messianic term in the OT, the MESSIAH is described in the OT as one coming to offer salvation to all nations (Isa. 49:6, 8; Zech. 9:9). Mighty leaders whom God used as instruments of deliverance for his people were also in

the OT referred to as "saviors" (Jdg. 3:9, 15; 2 Ki. 13:5; Neh. 9:27; Obad. 21).

In many OT passages, the SEPTUAGINT translation employs the noun *sōtēr G5400*, which was commonly used among the Greeks as a divine appellation. They, as did the Hebrews, used the term with reference to mighty warriors and rulers, and it is even applied to philosophers such as Epicurus. But in the Greek NT, in contradistinction to other usage, the term is never applied to a mere human being, but only to God the Father and his Son, JESUS CHRIST. God is described as "savior" in the NT because he authored the salvation that Jesus accomplished (Lk. 1:47; 1 Tim. 1:1; 2:3; 4:10; Tit. 1:3; 2:10; 3:4; Jude 25). "Savior" is in the NT preeminently the title of Jesus. From the beginning he was announced to the world as Savior (Lk. 2:11). Although the term is not used by Matthew, Jesus' mission is described in that gospel as the One to save his people from their sins (Matt. 1:21). The distribution of the twenty-four uses of the term in the NT would indicate that, although the term was employed from the beginning in Christianity, it became especially important toward the close of the NT period. Two-thirds of the usage occurs in the later books: ten in the Pastoral Epistles; five in 2 Peter; and one each in John, 1 John, and Jude. The Gospel of Mark and the earlier Pauline epistles do not use the term.

The contexts of the term *sōtēr* in the NT give insight into its significance in early Christianity. Jesus was described by John as "Savior of the world" in his record of the encounter with the Samaritan woman (Jn. 4:42). Jesus' significance was such as could not be confined to any single race or people. In the Pastoral Epistles, the phrase "the appearing of our Savior" is used (2 Tim. 1:10; Tit. 2:13), which testifies both to his supernatural origin and glory. The term is also associated with "kindness" and "love" (Tit. 3:4).

Jesus himself interpreted his mission as one of salvation, saying, "For the Son of man came to seek and to save what was lost" (Lk. 19:10). The term presupposes a danger, a disaster, from which the rescuer snatched the one whom he helped. The term in both the OT (Isa. 53) and the NT suggests deliverance from the worst affliction and trouble known to humanity—deliverance from SIN. There is an emphasis also in Jesus' ministry regarding the recipients of his deliverance; he was the Savior not only of the mighty and the rich or of the learned, but also of shepherds and outcasts such as ZAC-CHAEUS. See full discussion under SALVATION.

H. L. DRUMWRIGHT, JR.

savour. See ODOR.

saw. A tool with notched blade or teeth used for cutting hard material (Heb. *mĕgērâ H4490* and *maśśôr H5373*). The saw was in common use in the ANE world. An Egyptian relief from the 5th dynasty (2560 – 2420 B.C.) shows two carpenters with long saws making planks. It was also one of the familiar implements of the Israelite carpenter or woodcutter (Isa. 10:15). Metal and stone as well as wood were sawn. Archaeological evidences show 12th-dynasty Egyptians (1989 – 1776 B.C.) using bronze saws with emery for cutting granite. In the construction of Solomon's TEMPLE, some of the costly stones were "trimmed with a saw" (1 Ki. 7:9). Sawing was hard work and captives taken in warfare were frequently assigned to it (2 Sam. 12:31; 1 Chr. 20:3). Because of its difficulty, many ancients preferred to use large stone blocks for building operations. The saw could also be an instrument of terrible death: the prophet ISAIAH is reputed to have suffered martyrdom by being sawn in two (cf. Heb. 11:37; verb *prizō G4569*).

J. H. BRATT

sayings of Jesus. See LOGIA; OXYRHYNCHUS SAYINGS OF JESUS.

scab. A crust on a sore. The KJV uses this English word to render the related Hebrew nouns *sappahat H6204* (Lev. 13:2; 14:56) and *mispahat H5030* (Lev. 13:6 – 8), which modern translations understand as references to skin rash or eruption, probably psoriasis (cf. the verb *śāpaḥ H8558*, Isa. 3:17). It also uses the term "scab" (or "scabbed") to render *gārāb H1734*, which may refer to scabies (Lev. 21:20; 22:22; Deut. 28:27). See DISEASE.

scale. See BALANCE; WEIGHTS AND MEASURES.

scales, fish. The rough exterior surface of a fish, removable by scraping. Only those aquatic animals that had scales and dorsal fins were permissible for the Israelites to eat (Lev. 11:9 – 12; Deut. 14:9 – 10). In a figurative use, Ezekiel predicts that even as fish that cling to the hoary scales of a crocodile share its fate when it is caught, so also would the followers of the arrogant Egyptian pharaoh share the calamity that would overtake their leader (Ezek. 29:4). The Hebrew term (*qaśqeśet H7989*), like the English, can be used with reference to a military coat of mail (scale armor, 1 Sam. 17:5) because its small overlapping pieces resemble fish scales.

Iron saw used by the Assyrians for cutting stone (from Nimrud, 9th – 7th cent. B.C.).

J. H. BRATT

scall. This archaic term, meaning "scurf " or the like, is used by the KJV to render Hebrew *neteq H5999*, which refers to a DISEASE of the skin (Lev. 13:30 – 37; 14:54). Modern versions usually translate it as "itch."

scapegoat. See AZAZEL.

scarlet. A term applied to various bright red colors. This English word is used by the KJV and NIV to render Hebrew *šānî H9106* (Gen. 38:28 and frequently), though the NRSV and NJPS prefer to translate with CRIMSON (a deeper, purplish red). In the NT, "scarlet" is the standard rendering of the Greek term *kokkinos G3132* (Matt. 27:28 et al.).

The DYE used for coloring the wool and thread a scarlet color undoubtedly came from the insect *Coccus ilicis*. This is an insect pest that attacks the species of oak called *Quercus coccifera*, commonly called the kermes oak. The insect has sometimes been called the kermes bug. The oak is evergreen, never grows taller than 20 ft., and is of a dense sturdy habit. The acorns are borne in ones or twos, about one inch long, and they are half enclosed in a spiny cup. The insect which produces the dye is a scale that soon covers the young branches, if not controlled. These scales produce a white

fluff similar to cotton wool, similar to the American blight (wooly aphis) and to the insect which attacks the cacti known as prickly pear—the cochineal, from which the red culinary coloring comes.

The actual preparation of the dyes was probably done by the Phoenicians, though it is agreed that the Egyptians taught the Israelites the actual application. It is obvious that this scarlet dye was known as far back as the first half of the 2nd millennium B.C., for TAMAR'S midwife put a scarlet thread around the hand of ZERAH in order to make sure that he was known as the firstborn (Gen. 38:27 – 30). Scarlet clothing suggested luxury (2 Sam. 1:24; Prov. 31:21; Rev. 17:4), and the color is used to describe the beauty of a woman's lips (Cant. 4:3). In an important figurative use, however, both scarlet and crimson represent sin in contrast to the white purity of snow and wool (Isa. 1:18).

W. E. SHEWELL-COOPER

scented wood. See CITRON.

scepter. A staff representing the authority of a king or other sovereign. The rendering "scepter" may be viewed as a specialized meaning of various biblical words that commonly denote an ordinary rod or may have some other meaning in particular contexts. Hebrew *šēbeṭ H8657*, for example, can be used of a shepherd's staff (Mic. 7:14), of instruments for administering discipline (Prov. 22:15), including clubs studded with iron (Ps. 2:9), and so on. Similarly, *maṭṭeh H4751* may refer simply to a stick used for support (Gen. 38:28) or to a branch (Ezek. 19:12). Both terms, however, can refer specifically to the scepters of rulers (cf. Jer. 48:17). In addition, the term *mĕḥōqēq* (participle of *ḥāqaq H2980*, "to cut, inscribe, prescribe") is a poetical word standing for "commander's staff " or "scepter" (Ps. 60:7). In the N T, Greek *rhabdos G4811* also has a variety of uses (e.g., traveler's staff, Matt. 10:10; discipline stick, 1 Cor. 4:21; measuring rod, Rev. 11:1), but it can be used in particular of the Son's kingly scepter (Heb. 1:8, citing Ps. 45:6).

Scepters were associated mainly with kings, but lesser officials sometimes carried a staff of office. In the O T, reference is made to the scepters of the rulers of Israel, Egypt, Moab, Damascus, Ashkelon, and Judah (Pss. 60:7; 108:8; Jer. 48:17; Ezek. 19:11; Amos 1:5, 8; Zech. 10:11). Two passages often regarded as messianic associate a scepter with Israel's future rulers (Gen. 49:10; Num. 24:17). The Roman soldiers had the royal scepter in mind when they mockingly placed a reed in the hand of Jesus to represent it (Matt. 27:29). Several passages in Esther illustrate a special use made of the scepter by the Persian kings (Esth. 4:11; 5:2; 8:4). In these passages it is described as golden, meaning either that it was of solid gold or that it was gold-studded, like the scepters of the Homeric kings. Representations of Eastern kings show them holding two different kinds of scepter. One is long, slender, and ornamented; the other, shorter and mace-like. The former is seen on a limestone relief of DARIUS, who appears holding his scepter near the top, while the lower part of it rests on the ground. The latter type appears on a relief of ESARHADDON.

W. J. CAMERON

Sceva see'vuh (Σκευᾶς *G5005*, possibly the Greek form of Latin *Scaeva* [from *scaevus*, "left"]). A Jewish chief priest living in EPHESUS (Acts 19:14 – 17). Since he would not have been able to function as such in the synagogues of ASIA MINOR, he may have exercised the office at Jerusalem; alternatively, he was simply a member of a high-priestly family or he had been the chief of one of the twenty-four courses of priests for which he was still honored. (See further C. K. Barrett, *A Critical and Exegetical Commentary on the Acts of the Apostles*, ICC, 2 vols. [1994 – 98], 2:909.) Sceva's seven sons traveled from place to place attempting to exorcise demons by using the

name of Jesus, but on one occasion the evil spirit denied knowing them with these famous words: "Jesus I know, and I know about Paul, but who are you?" (Acts 19:15). Lacking the authority of PAUL and Jesus, they were attacked by the demon-possessed man and had to flee "naked and bleeding" (v. 16). The incident was widely reported, with the result that awe and rever ence for the name of the Lord Jesus came upon all the Ephesians. There was also a revival and renewal in the church; many of the believers confessed that they had not given up the practices of the occult and voluntarily surrendered their books of magic to a public bonfire. The power of the gospel was signally demonstrated, and the word of the Lord prevailed over all the rival forces of evil. (See R. B. Rackham, *The Acts of the Apostles*, 14th ed. [1951], 355 – 56; *ABD*, 5:1004.)

science in the Bible. The term *science* refers to systematized knowledge covering general truths (or "laws") that are discovered through the scientific method (i.e., a procedure that involves observation, experimentation, and the testing of hypotheses in order to solve a perceived problem). The term is specifically used with regard to *natural science*, that is, knowledge of structural and behavioral pattern in the physical world.

I. The Bible and scientific method. Scientific method in the modern sense arose in the 17th and 18th centuries. Prior to that, the nearest thing to scientific method was speculation and postulation with little if any reference to experiment and test. The Bible is singularly free from such conjectures about general truths and the operation of general laws, especially in the realm of nature. If science is found in the Bible, it therefore must have a special significance, since it was not obtained and tested through scientific method. The specific case of natural science will be considered first, after which the more general case of all experiential reality will be considered.

II. Natural science

A. Purpose, plan, and pattern. The Bible, in its references to nature, is concerned primarily with purpose. Pattern is related to purpose through plan. Scripture acknowledges the existence of the physical universe as created by God (Gen. 1:1). The CREATION, much debated by scientists and theologians in modern times, is the dominant theme of biblical references to NATURE. It is explicitly catalogued in the first chapter of Genesis, and is repeatedly invoked in OT and NT alike to identify the one true God, and to attest to his power and wisdom. Done as an act of God's will (Ps. 33:9), the creation was purposeful. God made all things for himself (Prov. 16:4; Col. 1:16; Rev. 4:11) and created human beings for his glory (Isa. 43:7). The crowning purpose is salvation through faith in Christ (2 Cor. 5:17; Eph. 3:12, 17; 2 Tim. 1:9 – 10). The purpose will be accomplished when the

church of Christ is perfected and the enemies of God destroyed (1 Cor. 15:20 – 28). When the purpose is fulfilled, the physical universe will undergo a total transformation, for God "will create new heavens and a new earth" (Isa. 65:17; cf. 2 Pet. 3:10 – 13; Rev. 20:11; 21:1). See HEAVENS, NEW.

To fulfill its purpose, the creation had to be wisely planned (Prov. 8:22 – 31). The plan and the wisdom evidenced by it are revealed in nature itself (Job 38 – 41; Ps. 19). It is part of that plan that humans dominate nature (Gen. 1:26, 28; Ps. 8:6 – 8), use it for their benefit (Gen. 1:29, 30; 9:1 – 4; Deut. 12:15), study it as revealing God's glory (Ps. 19), power (Rom. 1:20), providence (Ps. 104), and constancy (Ps. 89:2; Jer. 31:35 – 37; 33:20 – 26), and thus derive wisdom (Prov. 14:8) and great reward (Ps. 19:7 – 11).

It is Bible teaching that the universe is intelligently constructed on a complex and divinely ingenious self-consistent pattern, that it operates according to divinely ordained ways or laws, that the basic pattern and laws do not change with time, that the pattern and laws are intelligible to us, and that our welfare depends on understanding them. These basic concepts of nature are in sharp contrast to the teachings of other ancient cultures, which depict physical origins as by-products of the clashes between warring deities, and natural phenomena as unpredictable activities of willful and capricious gods.

B. The foundations of modern science. The origin of modern science rests on a few basic assumptions to which experience has ascribed self-evidence. Among them are the uniformity of nature in space and time and the inviolability of natural law. These assumptions appear to be self-evident only because the discoveries of science have given them credence. There is neither necessity nor proof that these assumptions are universally valid in nature. Except they be accepted on faith, there is no basis for scientific endeavor.

It cannot be said that scientists would never have made such assumptions apart from the monotheistic culture of the ancient Hebrews. It is a matter of record that these assumptions were matters of religious faith in the Hebrew-Christian culture, and modern science was spawned in the Christian culture of Western Europe. Most of the scholars who laid the foundations of modern science were also people of strong Christian faith. Among them were Copernicus, Galileo, Johannes Kepler, Isaac Newton, Francis Bacon, and René Descartes. The uniformity of nature and the inviolability of natural law were for them matters of religious faith. Even the concept of a mechanistic universe was put forward as showing the perfection of God's creation and the absence of the need for a "gap-filling" God to account for natural phenomena that science could not explain.

It is a reasonable conclusion that modern science is heavily indebted to the Bible. It has major conceptual origins in the Bible, its basic assumptions were matters of religious faith, and the pursuit of scientific research is scripturally admonished.

C. The creation. The Bible devotes little space to the manner in which the creation of the universe took place. The simple affirmation that "he spoke, and it came to be" (Ps. 33:9) runs like a silver cord from beginning to end. A few broad concepts are given in the first chapter of Genesis. This account teaches that the creation took place in a succession of steps, each step building on what went before and preparing for what was to follow. The earth was prepared for life before life appeared. Vegetable life preceded animal life. Different forms of ani mal life were evidently created at different times, with the suggestion that animal life first appeared in the water. Humans were a special creation sub sequent to the creation of all other living things. These teachings are all consistent with modern

scientific observations, though not necessarily with the interpretations placed on these observations by some modern scientists.

D. Pattern. The Bible contains many references to commonly observable patterns in nature, not so much as if to reveal the patterns as to call attention to their significance in testifying to the WISDOM and PROVIDENCE of God. The assured regularity of the seasons, seed and harvest, day and night, are declared (Gen. 8:22; Jer. 3:19; 5:24). The seas, mountains, and valleys are kept in place by God's decree (Job 38:8 – 11; Ps. 104:8 – 9; Prov. 8:29; Jer. 5:22). Nature was made orderly by God's wisdom (Prov. 8:1 – 14). God's wisdom is seen in the instincts of birds (Jer. 8:7). The lightning and the rain have their ways prescribed by God's law (Job 28:26). The interdependence of different parts of nature is seen in the feeding of wild life (Pss. 104:27; 145:15). Recognition of these phenomena in their easily observable aspects is now so commonplace that the wonders of natural pattern are taken for granted. The more subtle cause-and-effect relationships by which structural and behavioral patterns in nature are scientifically explained are more challenging to modern science. On this subject the Bible is silent. These relationships are left for human beings to discover, and they are indeed discernible and intelligible to the human mind.

In the creation account (Gen. 1) the Bible presents a broad outline of pattern that is more significant to modern science. Distinction is made between radiation (light), space (firmament or expanse), and matter (waters, earth, dry land, seas). Distinction is made also between living and nonliving matter. Living matter is divided into five great categories: plants (1:12 – 13), marine animals and birds (1:20 – 21), land animals (1:24 – 25), and humans (1:26 – 27; 1 Cor. 15:39). Within each of these five major divisions matter originated and persists in certain broad and inviolable classes. Inviolability is inferred from the endowment of each class with a hereditary mechanism that assures perpetuation of that class (Gen. 1; Matt. 7:16; 1 Cor. 15:37 – 38) and protects it from admixture with other classes and the consequent ultimate degeneration of all classes of living things into a single conglomerate potpourri. These broad characteristics of the pattern of nature are consistent with modern scientific observations.

Another generality of scientific significance is the concept of the universe as growing old and wearing out like a garment (Ps. 102:25 – 26; Isa. 34:4). This seems to correspond to the scientific principle of increasing entropy in a closed system, known as the second law of thermodynamics. However, the applicability of this principle to the universe as a system is a matter of debate among scientists.

E. Anticipations of modern science. Some writers have found scriptural passages in which they see anticipations of modern scientific discovery (see H. Rimmer, *The Harmony of Science and Scripture*, 3rd ed. [1936]; O. E. Sander, *Does Science Support Scripture?* [1951]). The undulatory theory of matter is seen in Gen. 1:2; wireless telegraphy in Job 38:35; the concept of parallax in Jas. 1:17; atomic theory of matter in Heb. 11:3; atomic binding forces in Heb. 1:3; light as the basis of all substance in Gen. 1:3; nuclear fission in Gen. 1:4, with a final chain reaction in Isa. 34:4 and Lk. 21:25 – 28; an expanding universe in Isa. 40:22; motor cars in Joel 2:3 – 4; airplanes in Isa. 31:5 and 60:8; submarines in Rev. 9:1 – 11; radio in Eccl. 10:20 and television in Rev. 11:3 – 12; the sphericity of the earth in Job 22:14 (also Prov. 8:27; Isa. 40:22; Mk. 13:35 – 37); suspension of the earth in space in Job 26:7; the concept of air as having weight in Job 28:25; the water cycle as known by modern science in Job 36:27 – 28 (also Ps. 104:10, 13; Prov. 8:28; Eccl. 1:6 – 7). Other writers, among whom Bernard Ramm (*The Christian View of Science and Scripture* [1954]) is a chief

exponent, hold that in each of these cases the context precludes interpretation that reads modern scientific discovery into its meaning.

F. Plan versus chance. Pattern in nature may arise from plan or it may arise from the random processes of chance. The validity of interpretation of scientific observations sometimes rests on which of these alternatives is assumed. The area of theories on organic evolution provides many examples where the direction of investigation and the interpretation of data may be significantly dependent on whether random chance or purposeful creation is assumed to play the dominant role in the formation of basic patterns. The Bible does not rule the random processes of chance out of the chain of causality, but it does insist emphatically on the purposeful and knowing creation by God as the true origin of the universe and of the basic structural and behavioral patterns of nature, and on the continuing providence of God as the ultimate basis of the stability of natural law.

III. All experiential reality. In its broadest sense science may be described as systematized knowledge of truth wherever truth may be identified. The Bible is a prolific sourcebook of truth (Ps. 119:160; Jn. 17:17) and its identification (Matt. 7:15 – 20; Jn. 14:6; 1 Jn. 4:1 – 6).

A. The spiritual realm. The Bible teaches that the physical realm is not all of reality, but that it is coexistent with a spiritual realm (Jn. 4:24; Rev. 16:14). The Bible teaches that the physical realm is permeated by the spiritual realm (Gen. 2:7; Eph. 6:12; 1 Pet. 5:8), and that the two realms interact on each other (Matt. 17:19 – 20; Jn. 13:2; Acts 2:2 – 4). It teaches also that the spiritual realm is eternal while the physical realm is temporal (Matt. 24:35), and that the ultimate source of all knowledge and power is in the spiritual realm (Ps. 111:10; Matt. 28:18; Rom. 11:33 – 36).

B. Spiritual-physical interactions. Pagans, both ancient and modern, frequently ascribe natural phenomena to unpredictable spiritual activity. Bible writers ascribed natural phenomena to the activity of God. In both cases natural chains of causality included supernatural agents. As science brought about an ever-increasing understanding of the patterns of natural behavior, spiritual forces disappeared from science as recognized elements in natural chains of causality. If natural processes were to be modified temporarily by supernatural intervention, natural law would appear to be violated, and the event would be called a MIRACLE. The Bible contains many accounts of miracles.

In some cases, such as the long day when Israel battled the AMORITES (Josh. 10:12 – 14; see DAY, JOSHUA'S LONG) and the DIAL of AHAZ (2 Ki. 20:11; Isa. 38:8), a noncritical interpretation would imply the historical occurrence of a worldwide catastrophe for which historical evidence is lacking. However, according to Ramm, critical examination of the texts and interpretation in the light of the contexts raise uncertainty as to what natural perturbations actually occurred, and greatly diminish the consequence of search for scientific explanations. In other OT cases the miracles ascribed to God's witnesses are wrought by God as authentication of his witness, and appear to be clear cases of spiritual-physical interactions.

Miracles performed in the course of Christ's ministry clearly demonstrate spiritual power over natural phenomena (Mk. 4:39; 6:41 – 44, 48; Jn. 2:1 – 11; 11:44) and disclose the potency of faith to exercise control over that power (Matt. 9:22; Jas. 5:16). The miracles of the VIRGIN BIRTH (Matt. 1:18 – 25; Lk. 1:26—2:7) and the RESURRECTION (1 Cor. 15:12 – 23) are central to Christian belief.

IV. Science and theology. The pursuit of knowledge in the field of science and in the field of theology have long been considered as two separate and unrelated professions. However, if science

deals with what God did and theology deals with why he did it, then it would seem that a combination of these two professions in an interdisciplinary search for truth might profoundly benefit humanity. As the joining of philosophy and technology in Newton's day produced the scientific revolution and gave humanity the understanding of natural forces that led to the industrial revolution, would not the joining of theology and science in our day produce a "knowledge of truth" revolution and give humanity the understanding of spiritual forces that would lead to a spiritual revolution? If so, then as the industrial revolution freed people from the bondage of drudgery and dependence on their own physical power, the spiritual revolution should free them from the bondage of fear and dependence on their own spiritual power. See also ASTRONOMY.

Bonting, *Creation and Double Chaos: Science and Theology in Discussion* [2005]; V. S. Poyth-ress, *Redeeming Science: A God-Centered Approach* [2006].)

<div align="right">R . M . PAGE</div>

scoff. The Hebrew verb *lîs H4329*, "to scoff, brag, deride" (the participle *lēṣ H4370* functions as a noun, "scoffer"), is used in the Bible specifically as the opposite of wise behavior. To scoff is to willfully refuse to learn the way of the Lord and to mock those who do.

I. In the OT. In Proverbs the scoffer is characterized by his refusal to learn the way of WISDOM, the basis of true happiness. Since wisdom is more than an intellectual achievement, but is also an ethical-religious attitude of commitment to God, scoffing is more than a matter of naive ignorance; it is sinful, foolish PRIDE (Prov. 9:7 – 10; 21:24; 24:9). (See *NIDOTTE*, 2:798 – 800.)

God punishes his disobedient people by sending *his* reproach upon them, which is echoed by the attitude of the nations (Ps. 79:12 – 14; Jer. 24:9; 42:18; 44:8, 12; 49:13; Zeph. 2:8 – 10). This reproach of God is borne by a mediator, the anointed of the Lord (Ps. 89:50 – 51), the one who bears reproach for God's sake so there will be no reproach on others (Ps. 69:6 – 12; cf. Jn. 2:17), whose words are the words of Jesus on the cross (Ps. 22:7; cf. Matt. 27:46).

II. The scorning and vindication of Christ. This predicted mocking of the MESSIAH is explicitly fulfilled in both the Jewish and Roman trials, culminating in the mock coronation (Lk. 22:63; 23:11; Gk. *empaizō G1850*). The CROSS itself is a mark of shame (Gal. 3:13) and its preaching was regarded as offense and foolishness (1 Cor. 1:23; Gal. 5:11); even the message of the resurrection was an occasion for scoffing (Acts 17:32). Also in this the followers of Christ were not to be above their Master, and were to share in this aspect of suffering and rejection (Matt. 10:17); the heroes of faith of all ages have cruel mockings as their lot (Heb. 11:36), with MOSES regarding abuse suffered for Christ as the greatest wealth (11:26). But Christ's humiliation leads to his exaltation, and his triumph over the powers enables him to scoff publicly at them (Col. 2:13). In his work is seen God's choice of the weak and foolish things of the world to put to shame the wise and the strong (1 Cor. 1:18 – 31): Christ's victory over SATAN humiliates his opponents (Lk. 13:17).

III. The believer's triumph over scoffing. The underlying motive for scoffing at Christ is the desire for self-justification (Lk. 16:11), the refusal to accept Christ as one's only righteousness. For those who have their honor in Christ it is inappropriate that they seek the dishonor of any (Jas. 2:6). For any to fall away from Christ would mean their exclusion from any future repentance, for they would

have put Christ again to shame (1 Cor. 11:27; Heb. 6:6).

There will continue to be mockers, questioning the return of Christ (2 Pet. 3:3; Jude 18), but God will not be mocked and will indeed come in judgment (Gal. 6:7). The shame of the cross includes also its "foolishness," but Christ is made unto us wisdom (1 Cor. 1:17 – 31). The life of faith is not ashamed of the shame of Christ (Heb. 11:26, 36) and boasts in Christ and in fellow Christians (2 Cor. 7:14; 9:4). This boasting is based on Christ's victory over evil, his shaming and mocking of it in its total defeat (1 Cor. 1:27 – 29; Col. 2:15; cf. Lk. 13:17). If self-justification is a mocking of Christ (Lk. 16:14 – 15), then glorying in him must be identified with justification by faith in him alone. The life of faith is necessarily one that has counted the cost of forsaking all to follow him; anything else deserves proper scoffing (Lk. 14:29). (See *TDNT*, 5:630 – 36.) See also MOCKING.

<div align="right">D. C. DAVIS</div>

scorn. See MOCKING.

scorpion. An arachnid characterized by a venomous stinger at the tip of its tail (Heb. ʿaqrāb H6832; Gk. *skorpios G5026*). Of the world's many hundreds of species of scorpions, some twelve (in the large *Buthidae* family, e.g., *Buthus occitanus israelis*) are known from the various regions of Palestine, from the NEGEV desert to the moist woodlands of the N. One route up the great escarpment across the Negev is known as Scorpion Pass (Num. 34:4; Josh. 15:3; Jdg. 1:36; see AKRABBIM).

Even though scorpions vary in size, proportions, and color, the outline of this small animal, with its pair of heavy pincers and forward-curving sting-tipped tail, makes it immediately recognizable. Size itself is no indication of potency of venom; at least one Middle E species has a most serious sting, but none is likely to kill a healthy person. Scorpions are classified near the spiders and, like them, they are entirely carnivorous. The sting is used with precision to paralyze the prey, which is then consumed by pumping digestive juices into it and sucking out the broken-down tissues. Toward nightfall scorpions emerge from the holes and crevices where they have spent the day and wander in search of prey. They do not normally attack humans but react instinctively if trodden on. (See further *FFB*, 70 – 71.)

The desert through which God led the Israelites is described as "that thirsty and waterless land, with its venomous snakes and scorpions" (Deut. 8:15). Elsewhere in the Bible, scorpions are mentioned figuratively as symbols of unpleasantness and danger (Eze. 2:6; Rev. 9:3 – 10). When REHOBOAM said to the Israelites, "My father scourged you with whips; I will scourge you with scorpions" (1 Ki. 12:11, 14; 2 Chr. 10:11, 14), he was probably refer ring to a many-thonged whip armed with hooked metal knobs and known as the scorpion. Jesus gave his disciples "authority to trample on snakes and scorpions" (Lk. 10:19). The Lord's rhetorical questions, "Which of you fathers, if your son asks for a fish, will give him a snake instead? Or if he asks for an egg, will give him a scorpion?" (11:12), may express a striking contrast; the "body" segment in some species of scorpions is fat and almost egg-shaped (esp. if resting and contracted), but this saying could echo a proverb.

<div align="right">G. S. CANSDALE</div>

Scorpion Pass. See AKRABBIM.

scourge. A whip used for flogging, especially to inflict punishment (see CRIMES AND PUNISHMENTS). Scourging was common among ancient peoples, but most instances of the Hebrew noun šôṭ H8765 in

the OT are metaphorical. The figure is used for the tongue (Job 5:21), for a disaster that slays suddenly (9:23), and for divine judgment (Isa. 28:15, 18). The Lord is said to lash his enemies with a scourge (10:26). Israel was warned that the Canaanites might become a scourge on the nation (Josh. 23:13; Heb. *šōṭēṭ H8849,* possibly a textual error for *šōṭîm,* pl. of *šôṭ*).

The only references to the scourge as an instrument of punishment are in 1 Ki. 12:11, 14 (= 2 Chr. 10:11, 14). It is not certain whether the word SCORPIONS here (which occurs as parallel to *šôṭîm*) is merely a vivid figure or implies a weighted scourge. Mosaic law permitted a person found guilty in court to be beaten. The sentence was executed upon the prostrate man in the presence of the judge. The number of strokes was no doubt proportioned to the offense but might not exceed forty (Deut. 25:1 – 3). Later the Jews used a three-thonged whip, but kept to the stated limit, indicating one stroke short for fear of miscounting (cf. 2 Cor. 11:24; *m. Makkot* 3:10). Local SYNAGOGUE authorities and the SANHEDRIN administered scourging for offenses against the law (Matt. 10:17). It appears from Deut. 22:18 and JOSEPHUS (*Ant*. 4.8.23) that defamation was one of the offenses so punishable, but there is no record of other charges on which a person might be scourged.

The MISHNAH describes the method employed (*m. Makkot* 3:11 – 12). When the physical fitness of the offender had been ascertained, his hands were bound to a pillar and his back and chest bared. Thirteen strokes were administered on the chest and thirteen on each shoulder. If the victim died, no blame was attached to those inflicting punishment. The Roman Porcian law forbade scourging a Roman citizen, but slaves and non-Romans might be examined by scourging (cf. Acts 22:24 – 25, where the noun *mastix G3465* and the verb *mastizō G3464* are used). The Romans commonly used a scourge weighted by pieces of bone or metal, but the Greek verb *rhabdizō G4810* (Acts 16:22; 2 Cor. 11:25) implies that lictors' rods were employed on the occasions mentioned. Scourging usually preceded CRUCIFIXION (cf. Livy, *Hist*. 33.36; *phragelloō G5849* in Matt. 27:26 and Mk. 15:15; *paideuō G4084* [lit., "punish"] in Lk. 23:16, 22; *mastigoō G3463* in Jn. 19:1). (See *TDNT*, 4:515 – 19.)

W. J. CAMERON

screech owl. See OWL.

screen. This English term is used by the NRSV and other versions to render Hebrew *māsāk H5009,* referring to a linen hanging that served as a door in the TABERNACLE (Exod. 26:36 – 37 et al.; KJV, "hanging"; NIV, "curtain"). In the specifications of the tabernacle given to MOSES, there was provision for three such curtains. They were made of blue, purple, and scarlet yarn and fine twined linen. They were attached by hooks to poles of acacia wood, but whether they were detached or parted for access is not clear.

The first screen was at the E end of the court of the tabernacle (Exod. 27:16). It was 20 cubits long, and was supported by four pillars decorated with silver fillets and standing in bronze bases. The screen was similar to the hangings of linen from which the walls of the court were made, except that it was decorated. The specifications for the court hangings seem to mean that there was one pillar every 5 cubits, in which case a detachable screen of 20 cubits would require five pillars. If there was such an interval between pillars, which is not certain, the screen could have been nondetachable and would therefore require four more pillars not already accounted for in the walls.

The second screen was the door to the tent (Exod. 26:36 – 37), and was similar to the court gate except that it was supported by five pillars either overlaid with gold or, more probably, decorated with gold overlaid fillets and capitals.

The third screen formed the division between the two parts of the tent, veiling the innermost holy place (Exod. 35:12). This hanging is most frequently referred to as the *pārōket H7267* (26:31 et al.; see VEIL), several times as the *pārōket hammāsāk* (lit., "veil of the screen," 35:12 et al.), and once only as the *māsāk* (Num. 3:31; this is clearly the veil described as in the care of the Kohathites, since the screen of the tent was assigned to the care of the Gershonites, v. 25).

<div align="right">G. GOLDSWORTHY</div>

scribe. This English noun (derived from Latin *scriba*, "[official] writer, secretary") is used to translate Hebrew *sōpēr H6221* (also rendered "secretary" and the like, 2 Sam. 8:17 et al.; Aram. *sāpar H10516*) and Greek *grammateus G1208* (Matt. 2:4 and frequently). In the ancient world, relatively few people received the training necessary to gain skill in the art of writing, and those who followed the scribal profession were usually regarded as scholars (cf. the NIV translation of 1 Cor. 1:20) and could hold high civic offices. Especially after the EXILE, Jewish scribes were involved not only in clerical activities, such as the copying of biblical MSS, but also in religious instruction. Accordingly, the NIV sometimes uses the rendering "teacher" in the OT (e.g., Ezra 7:6), and in the NT it consistently uses "teacher of the law." See also AMANUENSIS.

I. In the OT. In ancient Israel the scribal craft was principally confined to certain clans who doubtless preserved the trade as a family guild profession, passing the knowledge of this essential skill from father to son. Among the KENITES were "clans of scribes" dwelling at JABEZ (1 Chr. 2:55). The connection between MOSES' father-in-law, JETHRO, who was a PRIEST (Exod. 3:1), and the Kenites (Jdg. 1:16; 4:11) is an indicator that the art of writing was never far removed from the priesthood.

During the united and later Judean monarchies a substantial number of scribes came from the Levites. The point of contact between the ritual and scribal functions derives from the demand for fiscal organization of temple operations (e.g., in MESOPOTAMIA and EGYPT most of the earliest writings are associated with temple records). A Levite recorded the priestly assignments (1 Chr. 24:6), and the royal scribe helped in counting the public funds collected for the repair of the temple (2 Ki. 12:10 – 11; 2 Chr. 14:11). Since the furnishing of written copies of the law was a (scribal) Levitical responsibility (Deut. 17:18), the reforms of JEHOSHAPHAT (cf. 2 Chr. 17) cannot be disassociated from the scribal function.

Although the extent of literacy within Israelite society is a complex question, at least one "writing prophet" found it convenient, if not necessary, to employ a scribe (Jer. 36:26, 32), which strongly suggests that others did the same. The scribal function of composing private legal documents is widely attested in Mesopotamia and Egypt before, during, and after the biblical period. Although it is not stated that the scribe composed the text of a deed of sale (32:10 – 12), this may be implied, since the document was entrusted to BARUCH before witnesses.

Most important of all were the scribes who served in the government. They may have served as counselors (e.g., 1 Chr. 27:32) or borne the responsibility for mustering the army (2 Ki. 25:19). The highest ranking government scribe was that of the king. His position in the cabinet is difficult to judge, since ministerial lists may not be given in sequence of rank. If, however, the members of David's cabinet are listed in sequence in 2 Sam. 8:16 – 18 (cf. 1 Chr. 18:15 – 17, but differences in 2 Sam. 20:23 – 26), the royal scribe ranked below the top military commander, the RECORDER (*mazkîr H4654*), and the two chief priests, but above the commander over special forces and the "royal advisers" (so NIV; lit., "priests").

The list of SOLOMON'S officers may then be given in ascending order (1 Ki. 4:2 – 6; AZARIAH, described as being "in charge of district officers," may have been a "royal adviser," since he appears nowhere else). Next are listed two scribes who were sons of David's scribe Shisha (see SHAVSHA), and next the recorder and the new commander of the army, along with the two high priests serving jointly. A new official, the one "in charge of the palace," surely ranked above the scribe. During the united monarchy at least, therefore, the scribe ranked below the recorder.

Artistic rendition of scribes at work.

The hierarchy may have been different during the divided monarchies, since the scribe is twice listed between the recorder and the palace administrator (2 Ki. 18:18, 37; cf. Isa. 36:3, 22); here he served as one of three ministers appointed to negotiate with SENNACHERIB, who demanded the surrender of Jerusalem. Moreover, by JOSIAH's reign, the scribe SHAPHAN preceded both the recorder and "the ruler of the city" (cf. 2 Ki. 22:3 – 13 with 2 Chr. 34:8 – 21), suggesting that the relationship between scribe and recorder had been reversed since David's era. The high status of Shaphan's family is evident from the careers of his son AHIKAM and his grandsons GEDALIAH (who became palace administrator and was later appointed governor of Judah under the Babylonians) and MICAIAH son of Gemariah, who served the chief ministers of state under JEHOIAKIM (Jer. 36:11).

Royal scribes had offices (Jer. 36:12) that were evidently located in the building complex of the royal Judean palace, serving to illustrate the high standing of the king's secretary in the government. The prophets were aware also of an Akkadian counterpart to the royal scribe, with equally high standing (cf. Nah. 3:17) and military functions (cf. Jer. 52:25). The multilingual, pluralistic character

of the Persian period likewise demanded administrative specialists (Esth. 3:12; 8:9), and provincial commanders also had scribes as seconds in command (Ezra 4:8 – 9, 17, 23).

II. Ezra and the intertestamental period. EZRA marked the watershed for the later development of the understanding of the term *scribe*. Indeed, the transition is already suggested in the book of Ezra: the term is used in an administrative sense in Artaxerxes' royal decree (Ezra 7:12 – 26), but in the narrative (7:6, 11) the term already refers to Ezra as a scribe who, by reason of his learning, is capable of interpreting the law for the common people. Moreover, by his priestly lineage (7:6) he symbolized the close connection between the priesthood and this official interpretation of the law. This connection, which existed probably until the 2nd cent. B.C., appears to be the continuation of the association between scribal and cultic functions of an earlier day. By Persian royal decree, the law of Moses was made civilly binding on Jews living in Trans-Euphrates (i.e., W of the EUPHRATES, 7:25). The essential task of interpreting Moses' law so that it could function in this new civil capacity was given to the priesthood (Ezra) and the Levites (cf. Neh. 8:6 – 9).

The sources for the next several centuries are almost exclusively later rabbinic literature. However, the priestly hegemony over the correct legal interpretation of the law can hardly be doubted. During the Persian era and most of the Ptolemaic period, the high priest was the most important local official of the government and a ranking member of the local aristocracy. He was the logical choice to receive ALEXANDER THE GREAT (*b. Yoma* 69a; Jos. *Ant.* 11.8.4 – 5), being escorted by nobles, and clearly was expected to function as the highest local official under Ptolemaic rule (Jos. *Ant.* 12.4.1). As late as the reign of ANTIOCHUS III over Palestine, the high priest was clearly the chief local official (2 Macc. 3:1 – 4), and priests and Levites dominated the roles of the specially privileged in Antiochus's letter of tax exemptions (Jos. *Ant.* 12.3.3). Significantly, "scribes of the temple" were included among those exempted from certain taxes.

The precise role of the "scribe" is still somewhat difficult to assess, however, for lack of source material. According to one rabbinic tradition (*m. ʾAbot* 1:1), the oral law (which according to rabbinic theology was also given to Moses on Sinai) was mediated from the prophets to the generation of SIMEON "the Just" (the identification is disputed; either the high priest active c. 300 B.C. or his grandson, c. 210 B.C.) by "the Great Assembly." When this tradition is compared with the rules cited in rabbinic literature as given from "the scribes," it seems quite probable that the "scribes" of the Persian and Ptolemaic periods were identical with (or at least participant in) this body of formulators of the oral law.

The rules and practices established by the scribes acquired a binding authority, particularly with the specially orthodox of later (NT) times. One tradition ascribes greater stringency to their teachings than to the written law (*m. Sanh.* 11:3), and a proselyte was required to follow the scribal traditions as well as the simply interpreted written law (*Sipra* on Lev. 19:34). The scribes were essentially biblical interpreters, for occasional scribal rules not based on Scripture caused later rabbis considerable consternation (*m. Kelim* 13:7). This situation fits very well with the enactments of a body or class of interpreters functioning during the Persian and Ptolemaic periods.

From the 2nd cent. B.C. are two additional sources of information on the scribes. In the Wisdom of Ben Sira (ECCLESIASTICUS), whose author clearly considered himself to be in the scribal tradition, is an "ode" to the "perfect scribe" (Sir. 38:24—39:11). This ode confirms the picture of a scribe as one schooled in the law and religious wisdom, understanding the implications of both the written law and oral traditions. As a result of his learning, he enjoyed a prominence in public assemblies, and both understood and exercised justice among the people. Moreover, he was considered particularly

pious by virtue of his knowledge of the revealed will of God, a feature of rabbinic understanding of piety. If Ecclesiasticus is Sadducean in origin (or more appropriately proto-Sadducean), then we are faced with one more point of connection between the established priesthood and the class of scribes (see SADDUCEE).

Moreover, during the Maccabean revolt a company of scribes "sought justice" from the Seleucid-appointed high priest, Alcimus, in the confidence that since he was "a priest of the line of Aaron" (1 Macc. 7:12 – 14) they had nothing to fear. Although their confidence was short-lived, the fact of it reflects an abiding cooperation between the scribes and the established priesthood. The cooperation between the "pious" (see HASIDEAN) and the scribes, however, hints at the later development, when the priestly Sadducees opposed those who descended from the scribes, namely, the RABBIS and PHARISEES. At the time of the Maccabean revolt, however, the "party lines" had in all probability not yet been drawn.

III. In the NT. In the Gospels, scribes are found in connection with both the priestly (Sadducean) party (e.g., Matt. 2:4; 21:15) and the Pharisaic party (cf. Matt. 23). The scholars of this latter group were the leaders of what was to become rabbinic JUDAISM, known subsequently, however, as "sages" (or, "wise") and still later as rabbis. But the scribes (scholars) of both parties challenged Jesus principally on his disobedience to traditional practice under the law (e.g., eating with those obviously unobservant of these traditions [Mk. 2:16], and eating without ritually cleansing the hands, referring to the disciples [Matt. 15:2; Mk. 7:5]).

Matthew 23 (which parallels Lk. 11) is a classic condemnation of the scribal approach to the will of God. The scholars of both parties in all probability took part in whatever Jewish legal proceedings were initiated against Jesus during the week of his passion, but the very complex questions of the legality of such proceedings (under Roman rule) makes further conclusions very tenuous. PAUL clearly understood the scribe as a dialectician (1 Cor. 1:20 – 25) who was a scholar on the written and oral law; in Paul's view such dialectics were foolishness in the face of God's saving work in Christ. However, at least in certain segments of the early church, the function of the scribe as a Christian scholar and instructor in legal responsibility was preserved (Matt. 8:19, esp. 13:52 and 23:34), so that the Mosaic law was not abolished, but reapplied for the needs of the Christian church. The only mention of "scribes" in John's gospel is in a passage judged unauthentic on both textual and linguistic grounds (Jn. 7:53—8:11). After the period of the NT, *scribe* came to describe a teacher of children and composer of legal documents, the terms *sage* and then *rabbi* being used for the scholar of the law.

(See further R. de Vaux, *Ancient Israel* [1961], 131 – 32; J. Jeremias, *Jerusalem in the Time of Jesus* [1969], 233 – 45; *HJP*, rev. ed. [1973 – 87], 2:322 – 36; A. J. Saldarini, *Pharisees, Scribes and Sadducees in Palestinian Society: A Sociological Approach*, new ed. [2001]. For the view that the scribal profession involved not just the preservation of texts but also "educational enculturation," see David M. Carr, *Writing on the Tablet of the Heart: Origins of Scripture and Literature* [2005].)

A. RAINEY

scrip. This archaic term is used by the KJV once in the OT (1 Sam. 17:40) and several times in the NT (Matt. 10:10 et al.). Modern versions usually translate "bag."

Scripture. The term *scripture* (from Latin *scriptura*, "a writing") can be used in a general sense of

anything written, but it more frequently refers to sacred writings. The expression *the Scripture(s)* applies specifically to the BIBLE. (The term can also be used with reference to a particular biblical text, in which case it is usually not capitalized.

I. Terminology

A. Descriptive terms

1. Focusing on the written form. The Greek word *graphē G1210* occurs with some frequency in the NT, both in the singular and in the plural, usually with the definite article. B. B. Warfield (*The Inspiration and Authority of the Bible* [1948], 232) has pointed out that even where the article is absent some other feature indicates definiteness (e.g., the use of an adjective, as in Jn. 19:37 and Rom. 16:26). Although its extrabiblical use is wider, it is always employed in the NT with reference to sacred Scripture. The plural denotes the sacred Scriptures as a whole (Matt. 21:42; Jn. 5:39; 1 Cor. 15:3 – 4) and so is collective rather than distributive in force. There is no passage where it clearly means "the books" considered as separate entities (though it approaches this sense in 2 Pet. 3:16; Warfield [*Inspiration*, 234 – 35] maintained that the phrase here means "the other passages").

The use of the singular has led to a certain amount of debate. Some hold that it always refers to a particular OT passage, while others hold that it sometimes has the same significance as the plural. A stronger case can be made out for the latter view. G. Schrenk (*TDNT*, 1:753) points, for example, to Gal. 3:8, 22, "where the personification of *graphē* makes it quite inconceivable that Paul should simply have in view an individual text." An expression like "this scripture" is clear evidence that a single passage is in view (e.g., Mk. 12:10; Lk. 4:21; Acts 8:35; cf. Jn. 19:37). It is also likely, though not certain, that *graphē* denotes an individual saying whenever followed by a quotation (e.g., Jn. 7:38; 13:18; 19:24, 36). Even in such cases there may well be a reference to Scripture a a whole. The

use of the singular for the whole OT is certainly not frequent outside the NT, but it is difficult to eliminate it from the NT itself. The phrase "Holy Scriptures" (*graphai hagiai*) occurs only once (Rom. 1:2), but the authoritative use of the OT as divinely inspired literature makes the term an altogether appropriate description.

Another term, *gramma G1207* ("letter [alphabet character], writing"), occurs rarely in the NT with reference to the Scriptures per se. The expression *hiera grammata*, "holy Scriptures" (2 Tim. 3:15), is the only clear case, although Jn. 5:47 also approaches this technical sense. When PAUL uses *gramma* he often does so in a somewhat depreciatory sense (Rom. 2:29; 7:6; 2 Cor. 3:6 – 7; cf. 3:14 – 16). As appears from Paul's general use of the OT, his intention is not to belittle the law as Scripture, but only when conceived as making salvation possible by the works of the flesh. Hence he can oppose it to the Spirit, although he sees the Spirit as the Author of Scripture (Acts 28:25).

The phrase *to gegrammenon*, "the thing written," is of frequent occurrence in the SEPTUAGINT in its plural form (e.g., 2 Chr. 35:26; Dan. 9:11). It occurs also in the NT both in the singular (e.g., Lk. 20:17; 2 Cor. 4:13; cf. 1 Cor. 15:54) and in the plural (Lk. 18:31; Gal. 3:10; cf. Jn. 12:16), and it refers to a passage or a group of passages in terms of their content. It is interesting to note that it occurs also in Rev. 1:3 and 22:18 – 19 in reference to a NT book; and this suggests an extension of the concept of Scripture beyond the OT into the NT. The impressive nature of the context confirms this.

Finally, there is the noun *biblos G1047*, "book," and its diminutive form, *biblion G1046*. The latter, which often has the specific meaning of "scroll," is used in the LXX of particular books of sacred Scripture (Deut. 17:18; Jer. 25:13; Nah. 1:1). In Dan. 9:2 its use in the plural could be a reference to the collection of prophetic literature. The NT use of the singular is similar (Lk. 4:17), and the plural in 2 Tim. 4:13 could refer to a number of scrolls of OT books. The word *biblos* is used in a similar way in the singular (Josh. 1:8; Acts 1:20) and does not occur in the plural in biblical Greek. Even though these two words had not established themselves as technical expressions for Scripture in the same way as some other terms, this is their most characteristic use both in the LXX and the NT. The most significant exception (Rev. 5:1 – 10) is only an apparent one, for the heavenly book mentioned in this passage is sacred as well (cf. also 17:8; 20:12; and, significantly, 22:7, 9 – 10, 18 – 19).

2. Focusing on some further quality of the literature. The phrase "the word of God" (*ho logos tou theou*) centers attention on divine origin and is used of Scripture in Mk. 7:13; Jn. 10:35; Rom. 9:6; Heb. 4:12. This expression or, more frequently, "the word of the LORD," is extremely common in the OT, and the plural also often occurs. It is significant that the GOSPEL as proclaimed first authoritatively by the Lord (Lk. 8:21; 11:28) and by his apostles (Acts 6:7; 11:1; 1 Thess. 2:13; 1 Pet. 1:23) is also called "the word of God." This suggests that it comes into the same category as the OT Scriptures. Also important is the great value set upon "words of the Lord" (i.e., of Jesus) in the NT (Lk. 22:61; cf. Acts 20:35; 1 Cor. 7:10, 12, 25). In 1 Tim. 5:18 Paul apparently quotes as Scripture not only Deut. 25:4 but also Lk. 10:7, whether from this gospel or from the oral tradition of the words of Jesus. Once again, one finds an extension of the concept of the "word of God" beyond the OT into the NT.

Another expression, *ta logia tou theou*, "the oracles/words of God," is usually understood to be a reference to the OT (Acts 7:38; Rom. 3:2; Heb. 5:12; in 1 Pet. 4:11 it may refer to the inspired utterances of the Christian prophet of NT days). Some have maintained that it concerns rather the salvation-history contained in the Bible, but others argue cogently for the traditional view. As used in the classical and Hellenistic literature, Warfield says that "it means, not 'words' barely, simple 'utterances,' but distinctively 'oracular utterances,' divinely authoritative communications, before which men stand in awe and to which they bow in humility: and this high meaning is not merely implicit, but is explicit in the term" (Warfield, *Inspiration*, 403; see also J. W. Doeve in *Studia Paulina: In honorem Johannis de Zwaan septuagenarii* [1953], 111 – 23).

The term for "law," *nomos G3795*, is used in a variety of ways (see LAW [NT]), but when applied to sacred literature it normally designates the PENTATEUCH and so is sometimes called "the law of Moses" (cf. Matt. 12:5; Lk. 2:22) or "the law of the Lord" (Lk. 2:23). There are, however, passages where it clearly means the OT as a whole, for they give quotations from the Psalms and Isaiah as from "the law" (Jn. 10:34; 15:25; 1 Cor. 14:21). The Hebrew equivalent is *tôrâ H9368*, which really means "instruction," and the whole OT is divine instruction for the people of God. Similarly, the expression "the prophets" in the NT usually refers to prophetic literature (Matt. 5:17 et al.; sing. "the prophet" in 2:5 et al.), but it seems probable that Matt. 26:56 and Rom. 16:26 are references to the whole OT and not just to the literature that was prophetic in the strict sense. The entire OT is prophetic, for it is God's speech to human beings through human channels and it points forward to Christ (Lk. 24:27).

3. Composite terms. The Jews employed the phrase "the Law and the Prophets" or "the Law, the Prophets, and the Writings" to designate the whole OT. The Writings (H AGIOGRAPHA) are the other Scriptures which are not sufficiently homogeneous for a single title; this third general term was sometimes omitted, so that the OT was known by its two major types of literature. In the NT there are frequent references to "the Law and the Prophets" (Matt. 5:17; 22:40; Lk. 16:16; Rom. 3:21) or to "Moses and the Prophets" (Lk. 16:29). In one passage the expression used is "the Law of Moses, the Prophets and the Psalms" (Lk. 24:44), the last word pointing to the first and largest of the Writings and, perhaps, the one that spoke most clearly of Christ. Just as we have seen that "the Law" and also "the Prophets" may bear a narrower or a broader sense, so the term for "Writings" (*graphai*,

"Scriptures") in the NT usually refers to the whole OT (see esp. Lk. 24:27, where the broader sense is prob. intended, but where there is perhaps an allusive glance in the direction of the narrower).

B. Introductory formulae

1. Stressing the written form. The form *gegraptai* (pf. pass. of *graphō G1211*) may be translated "it is written" or "it stands written"; its use implies the existence of an authoritative written document beyond which there is no appeal. In classical Greek it was used of legal documents, while in the NT it is uniformly employed of OT Scripture. It occurs most frequently in the Synoptic Gospels, Acts, and the Pauline epistles. Sometimes a reference to the place of citation is added (e.g., "it is written in the Law of Moses," 1 Cor. 9:9; "it is written in Isaiah the prophet," Mk. 1:2). The Gospel of John more frequently employs the periphrastic equivalent (ptc. *gegrammenon* plus the verb *eimi*, an expression peculiar to this book, Jn. 2:17 et al.). Schrenk (*TDNT*, 1:745) points to the fact that John used this periphrasis in relation to his own book (20:30) and declares, "Yet there is no less solemn emphasis on the testimony of writing in 1 John" (cf. 1 Jn. 1:4; 2:1; 2:12 – 14; 5:13). He goes on to refer to the conviction of the revelatory significance of writing in the Apocalypse (Rev. 1:11, 19; 14:13; 22:19). Here then is further evidence pointing in the direction of an extension of the concept of Scripture to include writings of the new covenant.

2. In terms suggestive of a living voice. Scriptural citations are frequently introduced with the expression "[he/it/] says" (*legei* or *phēsi*; in some of the passages other tense forms of the verbs are used and occasionally other verbs). Sometimes the subject is expressed: Scripture (Jn. 7:38, 42; Rom. 4:3; Jas. 4:5), God (Matt. 19:4 – 5; Acts 4:24 – 25), the Holy Spirit (Acts 28:25; Heb. 3:7), perhaps even Christ (Heb. 10:5). E. E. Ellis (*Paul's Use of the Old Testament* [1957], 107 – 13) has drawn attention to the formula "the Lord says" in the NT and especially in Paul (Rom. 12:19; 1 Cor. 14:21; cf. Acts 7:49; Heb. 8:8 – 12). This formula is of extremely frequent occurrence in the OT prophets, but the NT writers sometimes include it even when it is not present in the OT text. Moreover, formulae like this are employed sometimes of the utterances (Acts 21:11) or writings (Rev. 14:13; 1:8) of NT prophets.

What of passages where no subject is expressed or clearly implied in the context (Rom. 9:15; Eph. 4:8; 5:14; Jas. 4:6)? Some would understand them to mean, "God says," others, "Scripture says," while still others maintain that they sometimes mean, "It is said," with the assumption that the source is not important. Warfield (*Inspiration*, ch. 7) has demonstrated in masterly fashion that this last is not a live option. He says at the conclusion of his survey of the evidence, "We may well be content in the NT as in Philo to translate the phrase wherever it occurs, 'It says'—with the implication that *this* 'It says' is the same as 'Scripture says,' and that this 'Scripture says' is the same as 'God says.' It is this implication that is really the fundamental fact in the case" (p. 348). In line with this conclusion, and despite his general difference of approach from that of Warfield, Alan Richardson (*IDB*, 4:249) points to the inaccuracy of the RSV rendering "it is said" in Eph. 4:8 and 5:14. The latter passage presents difficulties, for the matter quoted cannot be found in so many words in the OT. It may perhaps represent a grouping of passages, of course, but some modern writers have suggested that it is from a primitive Christian hymn. The introductory formula suggests strongly its inspiration and so, if no convincing OT equivalent is to be found, it is best to view it as a NT prophetic utterance.

3. In terms of fulfillment. The verb *fulfill* (usually Gk. *plēroō G4444*) in connection with OT passages occurs widely in the NT but most frequently in Matthew and in John (Matt. 1:22 et al.; Jn. 12:38 et al.). It shows the unity of the biblical REVELATION in terms of prophecy and FULFILLMENT, of type and antitype. See PROPHETS AND PROPHECY; TYPOLOGY. John also saw this same principle in operation in relation to the words of Jesus (Jn. 18:9; cf. 2:22).

C. Summary. The use of the terminology considered above is striking testimony to the belief of the NT writers in the OT as a divinely inspired and authoritative book. This belief can be indicated without the use of such terms, of course, and the book of the Revelation, which contains no quotations with formula, nevertheless shows the most complete dependence upon the OT at every point. It is noteworthy also that the NT writers show some tendency to extend their own technical language to the utterances and writings of inspired persons under the new covenant.

II. The inspiration of Scripture

A. The term. As applied to Scripture, INSPIRATION has been well defined as "a supernatural influence of the Holy Spirit upon divinely chosen men in consequence of which their writings become trustworthy and authoritative" (C. F. H. Henry in *BDT*, 286). The word *theopneustos G2535*, which the KJV renders "given by inspiration of God," is found only once and means "God-breathed," that is, "breathed out by God" (2 Tim. 3:16). The English word *inspiration* tends to be misunderstood sometimes because it seems to suggest breathing into or within rather than breathing out. (The KJV uses it also in Job 32:8, where the Hebrew means simply "breath"; the passage does not address the present subject.)

B. The relation of inspiration to revelation. These are closely related without being identical. REVELATION is concerned with God's disclosure of truth to human beings, while inspiration is its communication in verbal form. The term *inspiration* may be properly applied to the spoken as well as to the written Word, as in the Spirit-given utterances of the OT prophets before these were given written form, but spoken and written communication is alike verbal. For revelation to have permanent form it needs to be communicated in writing, and thus inspiration is its servant. This does not mean that Scripture is simply the record of revelation (although it is this) for it possesses revelation status in its own right, as one sees from NT quotations of OT passages as "the word of God" (e.g., Jn. 10:35; Rom. 3:2). Much modern theology denies the propositional element in revelation and so it is not surprising to find that the return of revelation to a central place in the theological vocabulary has not been followed by a renewal of interest in inspiration. The Bible itself is concerned with both, however.

C. The inspiration of the OT

1. The OT phenomenon of inspiration. Many of the OT channels of revelation exhibit a clear consciousness of their inspiration. Particularly is this true of the line of prophets from Moses onward. In the light of 2 Sam. 23:1 – 3 it is instructive to note that DAVID is described in the NT as a prophet

(Acts 2:30). In general, it would seem that the true prophet was not only an inspired person but also one who was conscious of his inspiration.

The prophets, by their employment of expressions such as "Thus says the LORD" and "The word of the LORD came unto me, saying," show that they were conscious of inspiration in the oral communication of divine truth. Of course, only those prophecies that were later committed to writing have survived, but there can be no doubt that the inspiration of a communication does not depend on its being in oral, as opposed to written, form (Jer. 36). So long as it is preserved unchanged, it matters little how many channels are employed before the Word reaches the recipient. Moses, for example, received the Word of God, but it passed to the people through AARON (Exod. 4:15, 28, 30). Although the end product in this instance was an utterance of Aaron, it lost none of its character as divine Word by this process of mediation. Moses also wrote the words of the Lord (24:3 – 4, 7). The Book of the Covenant is therefore just as much the Word of the Lord as the two tablets which God wrote on the mount (31:18).

An important quality of the word of the inspired servant of God is its divine and objective character. This does not mean that the Word of God included nothing from the prophet's experience— in the case of men like David, Jeremiah, and Hosea, it is clear that it often did—but that it was never simply their own thought and word. It was always the thought and Word of God. The prophet NATHAN was able to distinguish between his own thought and the Word of God (2 Sam. 7:3 – 17).

It is especially the divine origin of the inspired word which distinguishes the true from the false prophet, although this is obviously not open to direct testing. The tests of prophecy are such criteria as fulfillment and conformity to the revelation given earlier, especially through Moses (Deut. 13:1 – 5; 18:15 – 22; Jer. 23:9 – 40; Ezek. 12:21—14:11). In an excellent discussion of true and false prophecy, J. A. Motyer (*NBD*, 969 – 70) shows helpfully that it was not so much the fulfillment of the word of the true prophet but the nonfulfillment of the word of the false which was the test. It is worth noting that although the prophets were normally godly persons and their word was always adapted to the divine purposes of holiness, it is not even their godliness and character which constituted them as true prophets, as the (admittedly unusual) case of BALAAM shows (Num. 22:1—24:25; 31:16; 2 Pet. 2:15 – 16; Rev. 2:14). What matters is whether the message is the Word of the living God or simply a product of the prophet's own mind (Ezek. 13:2 – 3) or of an evil spirit (1 Ki. 22:19 – 20).

This discussion of inspiration in the OT has been concerned chiefly with prophecy because in the prophets inspiration is conscious. Other writers, such as historians and poets, do not disclose such a consciousness explicitly. Inspiration is not, however, to be equated with the declaration of it nor even with the consciousness of it. There is other testimony to the inspiration of other OT writers.

2. Christ's testimony to OT inspiration. The Lord recognized that OT books had human authors (Matt. 15:7; 22:43; 24:15; Mk. 7:10; Jn. 5:46), but he saw these as instruments of the divine Spirit. Jesus asserted that the word came through the prophets (Matt. 21:4 – 5; Lk. 18:31), and this suggests that they were employed by Another who was the ultimate Author of their word. For Jesus, Scripture is "the word of God" (Jn. 10:35). It is clear from Mk. 7:1 – 13 (a passage that deserves much more detailed study than can be given to it here) that the Lord rejected the authority of the "tradition of the elders" but that for him what "Moses said" (v. 10) constituted "the word of God" (v. 13). In Mk. 12:35 – 37 he clinched an argument, already weighty without it, with an affirmation of the inspiration of David when he wrote Ps. 110: "While Jesus was teaching in the temple courts, he asked, 'How is it that the teachers of the law say that the Christ is the son of David? David himself, speaking by the Holy Spirit, declared: 'The Lord said to my Lord: / "Sit at my right hand / until I put your enemies /

under your feet."' David himself calls him 'Lord.' How then can he be his son?"

3. The testimony of the NT writers. Wherever we look in the NT, we find exactly the same attitude toward the OT as that manifested by Jesus. Like him, the writers of the NT acknowledged the human authorship of the books. The epistle to the Hebrews, however, seems to avoid reference to human authors wherever possible in order to underline the divine authorship of Scripture (cf. Heb. 1:5 – 8, 13 with 2:6). This is simply an emphasisupon a fact that is a general characteristic of the NT writers, namely, their unqualified acceptance of the divine origin of OT Scripture. The prophets "spoke in the name of the Lord" (Jas. 5:10).

In the Gospel of Matthew, for example, there is a certain amount of variety in the formulae of quotation employed, but it is clear always that for Matthew the OT writer was an instrument of God, whose word came "through the prophet" (cf. also Acts 1:16; 2:16; 28:25; Rom. 9:25). The Scriptures are "the oracles of God" (Acts 7:28; Rom. 3:2; Heb. 5:12 NRSV). Warfield pointed out the great significance of the use of the word "Scripture" instead of "God" in certain passages (Rom. 9:17; Gal. 3:8, 22; cf. also Jas. 4:5 – 6). He said, "These acts could be attributed to Scripture only as the result of such a habitual identification in the mind of the writer, of the text of Scripture with God as speaking that it became natural to use the term 'Scripture says' when what was really intended was 'God, as recorded in Scripture said'" (*Inspiration*, 299 – 300, cf. 145 – 46).

The importance of this phenomenon is that it discloses a psychological fact of great significance for the estimate of Paul's concept of OT Scripture. A partial parallel from the lips of the Lord may be found in Matt. 19:4 – 5, where it is clear that for him Scripture and God, as speaking, are to be equated.

D. *The inspiration of the NT.* The Spirit of God did not cease his work of inspiration with the completion of the OT canon. After a period of silence, a new era of prophecy dawned just prior to, and in witness to, the advent of Christ, as we see especially clearly in Lk. 1 – 2. Prophesying is mentioned in the passage from Joel to which Peter referred on the Day of PENTECOST (Joel 2:28 – 29; Acts 2:17 – 18). Moreover, there are sundry references to prophets in the Acts of the Apostles and elsewhere in the NT (Acts 11:28; 13:1; 15:32; 21:10 – 11; 1 Cor. 12:28 – 29; Eph. 4:11 et al.).

Of even greater importance than the prophets, however, were the apostles. The Twelve were specially chosen by the Lord and instructed by him throughout his ministry. To them he gave special promises concerning the work of the Spirit in them as the Spirit of Truth (Jn. 14:16 – 17, 25 – 26; 15:26; 16:12 – 15). He would witness to Christ by declaring to them the things of Christ, by calling to their minds the teaching of their Master, and by showing them things to come. In this way the Spirit would complement and complete the instruction which Jesus had given to them. See APOSTLE.

There is moreover evidence of a *consciousness* of inspiration in the NT apostles, just as there is in the case of the OT prophets. In this connection 1 Jn. 4:1 – 6 is a passage of interest, as it is concerned with false prophecy. After prescribing a confessional test, John concludes, "They are from the world and therefore speak from the viewpoint of the world, and the world listens to them. We are from God, and whoever knows God listens to us; but whoever is not from God does not listen to us. This is how we recognize the Spirit of truth and the spirit of falsehood." On the assumption of the apostolic authorship of the epistle, the first person plural of the assertion "We are from God" will allude to the apostles and their witness to Christ (cf. 1:1 – 5). The words "Spirit of truth" (the capital letter is to be preferred to the NRSV's "spirit of truth") are reminiscent of the upper room discourse (Jn. 14 – 16). Here there is a clear indication of a consciousness of inspiration. Note also the same

phenomenon discernible in the following passages: 1 Cor. 2:9 – 10, 13; 7:40; Eph. 3:5; 1 Tim. 4:1; Rev. 1:1 – 3, 10 – 20; 22:18.

Once again, one needs to remember that a writer's failure to refer to his being inspired is no indication that inspiration is lacking, just as the claim to inspiration does not furnish logical proof of it. Paul was conscious that his word was accepted as the Word of God by the Thessalonians through faith (1 Thess. 2:13) and that the Holy Spirit wrought a conviction of its truth in their hearts (1:5). It is important also to remember that the only form in which we have the inspired utterances of God's servants in the NT as well as in the OT period is the written form.

E. The character of biblical inspiration

1. The Spirit as the ultimate Author of all that is rightly called Scripture. The Bible is not merely human literature; all that is rightly called *Scripture* is God-breathed (2 Tim. 3:16). This verse in its context refers primarily to the OT, but its principle is equally applicable to other literature to which one may apply this term. The precise delimitation comes under a study of the CANON of Scripture, but we may note that the claim to inspiration occurs in the NT as well as in the OT, and that Peter regarded the epistles of Paul as Scripture (2 Pet. 3:15 – 16).

2. All Scripture of full and equal inspiration. The statement of 2 Tim. 3:16 concerns "all Scripture." It is not permissible to translate these words as "every scripture inspired of God" (ASV, cf. NRSV mg.) if this is understood to distinguish Scriptures which are inspired from those which are not. Whether the adjective *pasa* (fem. of *pas G4246*, "all" or "every") is attributive or predicative is a matter of little consequence. It is the *interpretation* of the statement that matters. The NT knows nothing of "Scripture" which is not divinely originated.

This passage gives justification for the use of the term *plenary* ("full") in reference to Scripture and the rejection of the concept of degrees of inspiration. Revelation certainly admits of degree, for a disclosure of truth may be small or great; but a book either is God-breathed or it is not. Scripture passages may even differ in their value, but they do not differ in their inspiration, and so must all find a place in the Word of God.

3. The control of the writers by the Spirit. Peter affirms that "prophecy never had its origin in the human will, but prophets, though human, spoke from God as they were carried along by the Holy Spirit" (2 Pet. 1:21 TNIV). Commenting on this, Warfield says, "What is 'borne' [carried] is taken up by the 'bearer' and conveyed by the bearer's power, not its own, to the bearer's goal, not its own" (*Inspiration*, 137). Inspiration is not the mere heightening of the powers of the writers but their control by the divine Spirit.

4. The Spirit's use of the individuality of the writers. Inspiration did not override or suppress the individuality of any particular writer but employed it. The Word of God came into existence through many different human channels, and the evidence of stylistic variation bears testimony to the reality of the human factor. This is true even of the OT prophets where the form in which the word was often received—in a vision or dream—testifies most strongly to the objectivity of it. It is even more evident in writings like the Epistles. Paul's letters, for example, show signs of his own individuality. A great deal of research went into the production of a book like the Gospel of Luke (Lk. 1:1 – 4). Charles Hodge wrote concerning inspiration from God: "When he ordains praise out of the mouths of

babes, they must speak as babes or the whole power and beauty of the tribute will be lost" (*Systematic Theology*, 3 vols. [1871 – 73], 1:157). When the Reformers used the term *dictation* in relation to Scripture, as they occasionally did, they seem to have employed it simply to lay stress upon the divine origin of Scripture and not to define its invariable method.

This 5th-cent. parchment codex, known as the Sinaitic Syriac, is a palimpsest. The upper writing is a work known as *Lives of the Saints*, but the barely visible script underneath preserves the Old Syriac text of the Gospels.

5. The "verbal" character of inspiration. Inspiration refers to the verbal communication of truth. While recognizing the Spirit's superintendence of all the processes that lie behind the actual writing (or speech), it is to the end-product that the term *inspired* is properly applied. It is *Scripture* which is God-breathed (2 Tim. 3:16). In the nature of the case, then, inspiration must be verbal, since it is concerned with the communication of the truth in language. This does not mean that it consists of the dictation of words but that the various processes which lie behind it, involving the writer's individuality, environment, training, experience, and other factors, are so manipulated by God that the result is words that are not only those of the human agent, but fully God's. The commonly held notion that the ideas were divinely given but that the writers were left to themselves in the verbal expression of the thought will not fit the biblical evidence. Various passages (e.g., Exod. 4:30; Jer. 1:9; Ezek. 2:7 – 8; 1 Cor. 2:13; Rev. 22:18 – 19) center attention on the words as divinely imparted. Such an attempt to drive a wedge between ideas and words faces psychological difficulties also. Moreover, there are passages of Scripture where stress is laid upon the use of one word rather than another (e.g., Matt. 22:43 – 45; Jn. 10:34 – 35; Gal. 3:16).

On the other hand, one must not fall into the opposite error of imagining that the words of Scripture have importance apart from the meaning they convey. It is the sense which is all-important, and it is for this reason that the inspired writers of the NT sometimes employed a free rendering of some OT passages when it could bring out more forcibly the point they were making. The matter would be a problem only if the sense of the original passage were violated. This raises the whole question of the use of the OT by the NT writers, which belongs to the subject of interpretation. See QUOTATIONS IN THE NT.

6. Inspiration as a finished work. Inspiration, which is a completed work of the Spirit, is not to be confused with illumination, which is continuous. Between the original inspired MSS and ourselves lie one or two processes. If the original languages are known to the reader, the only process is the transmission of the text. The science of textual criticism of the Bible is a very refined and exact one, and the study of it shows that the text, although not isolated completely from the normal processes of corruption that affect all transmission, has been wonderfully protected so that the message disclosed in Scripture has been available to each successive generation. See TEXT AND MANUSCRIPTS (OT); TEXT AND MANUSCRIPTS (NT). Translators have a duty to reverence the wording of the original and to seek to convey in another language the thought of the Hebrew and Greek. The extensive use of the SEPTUAGINT (a Greek version of the OT) by the NT writers shows that translation is legitimate, and it may be laid down that a translation may be—indeed *must* be—treated as the Word of God insofar as it conveys faithfully the thought of the original.

7. Inspiration and the difficulties of Scripture. The Christian receives God's Word on his own testimony. This does not mean, of course, that the reverent reader of Scripture encounters no problems. Difficulties in Scripture are a spur to seek divine enlightenment and to pursue diligent study. They are not a call to abandon a high doctrine of Scripture. The scientist's conviction of the unity of the universe is not overturned when he encounters problems. Likewise, the Christian's conviction of the unity of Scripture is not surrendered in the face of biblical difficulties. It is sometimes maintained that the doctrine of Scripture should be based on all the phenomena of Scripture, including its difficulties. It is questionable whether this is practicable, for the evaluation and harmonization of all the phenomena is considerably more than a lifetime's work. Moreover, the Bible itself contains clear statements concerning its own inspiration. It is on these that the doctrine of inspiration should be based. The acceptance of Scripture as divinely given on this basis implants the conviction of its unity, and the problems can now be approached, and progressively solved, in the light of this.

III. The authority of Scripture

A. Its relation to inspiration. The inspiration and the AUTHORITY of Scripture are distinguishable but inseparable. Matters of religion are of such great importance that merely human authority is insufficient. It is not the human authors as such who give the Bible its authority, but rather its divine Author. It is because it originates from him that its message is to be received and trusted. Accordingly, inspiration is rightly discussed before authority, and there can be no stable doctrine of biblical authority where there is no stable doctrine of inspiration.

B. The authority of the OT

1. Its recognition within the OT period. An examination of the historical books of the OT discloses the fact that the law was treated as authoritative by those who read it. On the borders of the Promised Land, God directed JOSHUA to it: "Be strong and very courageous. Be careful to obey all the law my servant Moses gave you; do not turn from it to the right or to the left, that you may be successful wherever you go. Do not let this Book of the Law depart from your mouth; meditate on it day and night, so that you may be careful to do everything written in it. Then you will be prosperous and

successful" (Josh. 1:7 – 8; cf. 8:30 – 35; 22:5; 23:6; 1 Ki. 2:3; 2 Ki. 14:6; 22:8 – 13).

In 2 Ki. 23:24 – 25 the wording is particularly significant: "Furthermore, Josiah got rid of the mediums and spiritists, the household gods, the idols and all the other detestable things seen in Judah and Jerusalem. This he did to fulfill the requirements of the law written in the book that Hilkiah the priest had discovered in the temple of the LORD. Neither before nor after Josiah was there a king like him who turned to the LORD as he did—with all his heart and with all his soul and with all his strength, in accordance with all the Law of Moses." There is a close relationship between turning to the Lord and obeying the precepts of the law. (For recognition of the authority of the law in other parts of the OT, see Ps. 119; Dan. 9:10 – 13; Amos 2:4; Mal. 4:4.)

The law was obviously intended for posterity and not just for the generation to which it was first given, and evidence is not wanting that this is true of the prophetic revelations also (Isa. 30:8; Jer. 30:1 – 3; 36:1 – 3; Hab. 2:2 – 3). Daniel states, "In the first year of Darius son of Xerxes (a Mede by descent), who was made ruler over the Babylonian kingdom—in the first year of his reign, I, Daniel, understood from the Scriptures, according to the word of the LORD given to Jeremiah the prophet, that the desolation of Jerusalem would last seventy years" (Dan. 9:1 – 2). Daniel's prayer, which immediately follows this, makes it clear that he regarded the Word of God through Jeremiah as completely authoritative. Psalm 89 also shows the psalmist pleading the promises of God given to David (2 Sam. 7) in such a way as to show his acceptance of their divine authority.

2. Its recognition by Christ. Jesus did not quote the rabbis as authoritative, but he was constantly quoting Scripture in this way. He contrasts scribal tradition with the Word of God in the OT (Matt. 15:1 – 6). His oft-repeated formula, "it is written," being in the perfect tense, might well be translated, "it stands written," for it implies the present relevance and not just the original writing of OT Scripture (e.g., Matt. 11:10; Lk. 22:37; Jn. 6:45). Note should also be taken of the present tense as used by Jesus in Matt. 13:14; Lk. 20:42; and Jn. 5:45. Consider the significance of the words "to you" in Matt. 22:31 – 32. Addressing the SADDUCEES, Jesus said, "But about the resurrection of the dead— have you not read what God said to you, 'I am the God of Abraham, the God of Isaac, and the God of Jacob'?"

For Jesus, then, the OT was a book that spoke with a living voice, having abiding authority. His teaching in Matt. 5:21 – 48 is sometimes thought to involve a belittling of the OT in comparison with his own instruction, but this is a misunderstanding of the passage. The strong statements that precede it (5:17 – 20) show that this could not be his intention. He is actually showing how profound are the implications of the law, disclosing even higher standards than those the law required, and correcting certain wrong inferences from the law. The parenthetical assertion in Jn. 10:35 sums up his attitude to OT Scripture: "and the Scripture cannot be broken." Jesus treated the OT as authoritative even for his own life. The whole point of the temptation narratives (Matt. 4:1 – 11; Lk. 4:1 – 13) is that it was the Lord's duty, as true Man, to listen to the voice of God through the OT and not to the voice of Satan.

The Lord assumed the reliability of even small details in the OT. He referred to a number of events the historicity of which is called into question by many today: the marriage of ADAM and EVE (Matt. 19:4 – 5) and the stories of ABRAHAM (Jn. 8:56), NOAH, and LOT and his wife (Lk. 17:26 – 32). It may be objected that fictitious stories may be employed to convey spiritual truth. Yet such an argument cannot be consistently applied to the Lord's use of the OT. He was speaking to people who believed in the literal truth of the OT stories. There is no hint that he took them in any other way, and there are some passages where the whole point would be destroyed if they were not historical. It is impossible to defend his language in Matt. 12:41 and Lk. 11:50 – 51 unless the OT events he refers to

are absolutely historical and factual. How can people who are represented as repenting in a fictitious story rise at an actual judgment to condemn actual people? (See J. W. Wenham, *Our Lord 's View of the Old Testament* [1953], 12 – 14.)

3. Its recognition by the NT writers. Jews and Christians were agreed on the authority of the OT Scriptures. Accordingly, a major factor in Christian witness to the Jew in NT days was the demonstration of the OT witness to Christ. This characterized Peter's preaching at Pentecost and all the sermons to Jews in the Acts of the Apostles (e.g., Acts 2:24 – 36; 17:2 – 3, 11; 18:28; 28:23). The witness of the prophets was not treated by the apostles as authoritative only for the contemporaries of the prophets; rather, their prophecies in written form were regarded as having continuing validity (Rom. 1:1 – 2; 16:26; Mk. 1:2; 2 Tim. 3:16; 1 Pet. 2:6; 2 Pet. 1:20). For the NT writers, as for Jesus, the OT has present authority. They, too, use the formula "it is written" extensively, and the use of the present tense in the following passages should be noted: Rom. 4:3; 9:25, 27; Gal. 4:30; Heb. 8:13; 2 Pet. 1:19.

The up-to-date character of the OT also emerges in certain important passages where it is expressly stated that it was written with believers of the NT era in mind and not simply for those of old. For example, Paul, writing about Abraham (Gen. 15:6), has this to say: "The words 'it was credited to him' were written not for him alone, but also for us, to whom God will credit righteousness—for us who believe in him who raised Jesus our Lord from the dead" (Rom. 4:23 – 24; cf. Acts 7:38; 13:47; Rom. 15:4 – 5; 1 Cor. 9:9 – 10; 10:6 – 11; 2 Cor. 7:1).

C. The authority of the NT

1. The nature of apostleship. It is of vital importance to grasp the fact that the apostles of Christ were appointed by him to a very special office, which was unique and unrepeatable. In retrospect, we can see that one of the major tasks of the apostles was to be the production of the body of the NT literature. J. B. Lightfoot points out that although the word *apostolos G693* "in the first instance is an adjective signifying 'despatched' or 'sent forth,'" when applied "to a person, it denotes more than *angelos*. The 'Apostle' is not only the messenger, but the delegate of the person who sends him. He is entrusted with a mission, has powers conferred upon him" (*St. Paul's Epistle to the Galatians*, 10th ed. [1890], 92).

It is not completely clear how many persons were looked upon as apostles of Christ, but there can be no debate about the original twelve or Paul, who, like them, was specially appointed by the Lord (1 Cor. 9:1; Gal. 1:1; cf. Acts 1:8, 22). Some consider that the word was still being used in this special way when it was applied to ANDRONICUS and JUNIAS (Rom. 16:7). BARNABAS (Acts 14:14; cf. 13:1) and JAMES the Lord's brother (1 Cor. 15:7; Gal. 2:9) may also be included in the circle of apostles of Christ. There is evidence, however, of a somewhat wider use of the term to denote specially designated messengers who were given a commission by a particular church for a particular purpose (2 Cor. 8:23; Phil. 2:25). These are to be distinguished from those who were apostles of Christ.

The Lord evidently regarded the selection of the original apostolic band as a matter of great moment, for he prepared for it by an extended time of prayer (Mk. 3:13 – 19; Lk. 6:12 – 16). Matthew 10:1—11:1 gives the terms of their commission during the period of his earthly ministry. Jesus concentrated on these men, giving far more time to their instruction than to the instruction of others. Whether they were right in appointing MATTHIAS after the defection and death of JUDAS ISCARIOT has

been the subject of some debate, but in any case they realized that it was the divine choice which mattered supremely (Acts 1:24 – 35).

The apostle Paul often associated one or more Christians with him in the writing of an epistle, but it is noteworthy that for such a person he never used the term *apostle* (1 Cor. 1:1; 2 Cor. 1:1; Col. 1:1; 1 Thess. 1:1). The words, "As apostles of Christ we could have been a burden to you" (1 Thess. 2:6), are probably not an exception to this but simply the literary employment of "we" in a singular sense (cf. 3:1).

2. The nature of apostolic tradition. The term TRADITION means "that which is handed over," and the Jews possessed a large vocabulary of terms connected with tradition. They spoke of receiving it, holding it, keeping it, standing in it, and handing it over to another. They used it of the oral traditions of earlier rabbis that were handed over to their followers. Jesus was opposed to these rabbinic traditions when they were given the same reverence as the Word of God (Mk. 7:1 – 13; cf. Gal. 1:14). The NT writers took over this vocabulary and applied it to the true traditions, the deposit of apostolic testimony (see, e.g., the phraseology of Lk. 1:2; Acts 2:42; Rom. 6:17; 1 Cor. 11:2, 23; 15:1 – 5; Gal. 1:9, 12; Phil. 4:9; 1 Thess. 2:13; 4:1; 2 Thess. 2:15; 3:6; Jude 3). What is it that makes this tradition valid and authoritative when that of the Jews was not? It is the fact that it was the deposit of teaching which was given to the apostles by Jesus himself, both before and after the resurrection (Acts 1:1 – 2). It was "received from the Lord" (1 Cor. 11:23) and bore the stamp of his own supreme authority upon it.

18th-cent. Ethiopic MS of the Bible.

The apostles were completely at one as transmitters of authoritative teaching from Jesus himself (1 Cor. 15:9 – 11). Does Gal. 2:11 – 14 constitute an exception? It should be noted that this passage does not refer to Peter's teaching but to an event in his life in which, as Paul indicates, he acted against his own convictions (not just against Paul's!) and so presumably against what he would have taught others. The veracity of his teaching is not in question at all. The preceding passage (2:1 – 10) shows that Paul and the earlier apostles agreed completely on matters of doctrine.

Paul set his teaching about the LORD'S SUPPER, which, because of his apostleship, has the authority of the Lord Jesus behind it, against the unruly practice of the Corinthians, which was without authority. In the Greek of 1 Cor. 11:23, the first "I" is emphatic, and will signify, "I as an apostle." Of course, the apostles not only transmitted tradition from the Lord, but, because they were inspired by the Spirit as the Spirit of truth and the Spirit of Christ, they also gave judgments on matters on which the tradition was silent. On certain matters concerning marriage, Paul found nothing in the traditions of the teaching of Jesus, but he gave his judgment as an inspired apostle (7:25, 40 [where there is a touch of irony]; cf. 14:37).

It is this distinction between dominical tradition and Spirit-inspired judgment which lies behind the distinctions Paul is making in 1 Cor. 7:10, 12, 25. In v. 6 the KJV reads, "But I speak this by permission, *and* not of commandment," a rendering that has sometimes occasioned difficulty. Modern versions remove the ambiguity: "I say this as a concession, not as a command." Not only command but even permission needs to be authoritatively declared, and Paul does this in his apostolic capacity. In this chapter, then, one may see Paul transmitting tradition and giving judgments, but doing both as an apostle, specially commissioned by Christ and specially endowed by the Spirit for this purpose.

3. Apostolicity and the authority of the NT. Paul refers to the church as "built on the foundation of the apostles and prophets, with Christ Jesus as the chief cornerstone" (Eph. 2:20). An examination of the epistle to the Ephesians makes it seem highly probable that the prophets referred to are NT rather than OT prophets, and also that they are described as the foundation of the church because of the foundational character of their teaching (cf. 3:4 – 5; 4:11). The converts of the day of Pentecost are said to have "devoted themselves to the apostles' teaching" (Acts 2:42), which was, of course, completely Christ-centered and Christ-dominated. The NT recognizes the possible existence of false prophets, and so it is significant that apostolic truth is made the test of all that claims to be prophetic and emanating from the Spirit of God. "If anybody thinks he is a prophet or spiritually gifted, let him acknowledge that what I am writing to you is the Lord's command. If he ignores this, he himself will be ignored" (1 Cor. 14:37 – 38; cf. 1 Jn. 4:1 – 6). Jude, confronted by false teachers, exhorted his readers "to contend for the faith that was once for all entrusted to the saints," to "remember what the apostles of our Lord Jesus Christ foretold," and to build themselves up on the "most holy faith" that had been brought to them (Jude 3, 17, 20; note also the significance of 1 Thess. 5:19 – 22 and 2 Thess. 3:6, 11 – 14).

There is no suggestion in the NT that one is to look to successors of the apostles for authoritative teaching. The apostolic office would seem, in a personal sense, to have been a temporary one, although it is a permanent gift of Christ to the church because of the inscripturation of the apostolic testimony in the writings of the NT. It is only through the NT that their teaching is now available so that sinners may believe on him through their word (Jn. 17:8, 14, 20) and continue to devote themselves to their teaching. The common idea that the apostles did not realize that they were writing inspired and authoritative literature is not true to the facts, for they placed considerable emphasis upon the authority of their written words (1 Cor. 14:37; 1 Thess. 5:27; 2 Thess. 3:14; Rev. 22:18 – 19).

The CANON OF THE NT lies outside the scope of this article, but it should be noted that, according to the NT itself, there were other inspired persons in NT days besides the apostles, that is, the prophets. The test of prophetic utterance was apostolic truth. The harmony between the nonapostolic writings of the NT and those that are clearly apostolic can be shown. The NT as a whole presents a marvelous unity of teaching, which is the perfect complement to the earlier inspired books collected

together in the OT.

IV. The use of Scripture

A. The practical ends for which Scripture was given. It is highly significant that one of the most important passages exhibiting the biblical doctrine of inspiration links this concept most intimately with the practical use of Scripture: "…from infancy you have known the holy Scriptures, which are able to make you wise for salvation through faith in Christ Jesus. All Scripture is God-breathed and is useful for teaching, rebuking, correcting and training in righteousness, so that the man of God may be thoroughly equipped for every good work" (2 Tim. 3:15 – 17). The function of Scripture is instructional ("able to make you wise," "useful for teaching") and its end salvation and sanctified service. The fourfold profit indicated shows Scripture's use to be both theological and ethical, for it instructs the mind in divine truth and directs the reader in the right way; and both positive and negative, for "rebuking" and "correcting" imply that errors in thought and in life are attacked by it.

The instructional function of Scripture is never merely intellectual but also practical. Its aim is to produce not merely knowledge but also wisdom and personal application. "The secret things belong to the LORD our God, but the things revealed belong to us and to our children for ever, that we may follow all the words of this law" (Deut. 29:29; cf. 32:46 – 47; Josh. 1:7 – 8; Jas. 1:25 – 27; Rev. 1:3).

B. Scripture and spiritual illumination. It is important to distinguish inspiration from illumination and to notice the relationship each sustains to the other. This is indicated clearly in 1 Cor. 2:1 – 16. Speaking of "the testimony about God" that Paul, as an apostle, had proclaimed to the Corinthians (v. 1), he asserts that it was divinely revealed, and that this revelation was communicated by the human channels of inspiration to those enabled to receive it. "This is what we speak, not in words taught us by human wisdom but in words taught by the Spirit, expressing spiritual truths in spiritual words. The man without the Spirit does not accept the things that come from the Spirit of God, for they are foolishness to him, and he cannot understand them, because they are spiritually discerned" (vv. 13 – 14). Spiritual truths are a foreign realm to those who are unregenerate, and it is the Word of God which the Spirit uses to bring one to the birth (Jas. 1:18; 1 Pet. 1:23 – 25).

REGENERATION is described in various ways in the N T, but a significant analogy in this connection is the shining of a great light, the dawn of a new day (2 Cor. 4:6; Eph. 5:14). Through the indwelling of the Spirit the norm for the Christian is a progressive growth of enlightenment and spiritual understanding (Eph. 1:17 – 19; cf. Ps. 119:18, 97 – 104, 144; Prov. 4:18). Strictly speaking, it is not so much the illumination of the Word itself which the Spirit accomplishes (this is the neoorthodox concept of the matter) as the illumination of the human heart so that it understands the Word. In other words, the Scriptures are clear in themselves (the technical term is the "perspicuity of Scripture") but each person's heart, darkened by sin, needs a supernatural work of the Spirit before it is capable of receiving and understanding the truth of God.

C. The interpretation of Scripture

1. The importance of interpretation. If the Bible is an inspired and authoritative revelation of God, then it is of great importance that it be properly understood. See INTERPRETATION. It is possible for a

person to twist the Scriptures to his own destruction (2 Pet. 3:16; cf. 2 Cor. 4:2; 1 Tim. 1:3 – 11). When Satan was tempting the Lord, he applied Scripture in a way that violated the context (Matt. 4:6). Jesus and the Pharisees were united on the inspiration and authority of the OT, but at variance frequently concerning its interpretation. Matthew, in particular, often showed him rebuking the Jewish leaders for their failure to understand the significance of certain OT passages (9:13; 12:3 – 8; 21:42; 22:23 – 32).

2. The divine interpreter. During the Lord's ministry, the disciples were recipients of his teaching, much of which involved interpretation of the OT, and he continued to instruct them in this way after the resurrection (Lk. 24:25 – 27, 32, 44 – 47). His interpretation carried the authority of his own divine person. He promised that the Holy Spirit would continue to instruct the disciples in divine truth (Jn. 16:12 – 15). The Christian is given a spiritual "instinct" for truth through the Spirit's indwelling: "I am writing these things to you about those who are trying to lead you astray. As for you, the anointing you received from him remains in you, and you do not need anyone to teach you. But as his anointing teaches you about all things and as that anointing is real, not counterfeit—just as it has taught you, remain in him" (1 Jn. 2:26 – 27; cf. 2:20 – 21). The Christian is assured that he need not be led away by false teaching. False teaching is also referred to in 2 Pet. 1:20 – 21: "Above all, you must understand that no prophecy of Scripture came about by the prophet's own interpretation of things. For prophecy never had its origin in the human will, but prophets spoke from God as they were carried along by the Holy Spirit" (TNIV). If the translation "the prophet's own interpretation" is correct, the statement underlines the fact that the prophecy is of divine and not of human origin. On the other hand, the phrase may refer to the reader (the Gk. simply says, "own interpretation," and Peter's readers have been told to pay attention to the prophetic word, v. 19), and so it may imply that because the prophecy was given by the Spirit it can be interpreted only by the Spirit. The "right of private judgment" is not license to wrest the Scriptures, nor to engage in wild and fanciful exegesis, but liberty to study and to follow the Spirit's own principles of interpretation as these are exposed to view in Scripture itself.

3. The purpose of Scripture. The interpretation of any book must, of course, be related to its purpose, and the purpose of Scripture is frankly practical. It is given so that the people of God may be per fected in the life of godliness. The classic evangelical position is that when the Bible touches matters of history, science, etc., it does so in conformity to truth. It does so, of course, in popular, nontechnical language. There is a considerable amount of history in the Bible, but matters of science are usually touched upon only incidentally. It is right to maintain the inerrancy of Scripture in such matters, for it is "God-breathed" and the product of the Spirit of truth, but it is wrong to lose sight of the fact that the great purpose of the Bible is to teach sinners the things of God. All else is incidental to, and ministers to, this end.

4. Scripture as self-interpreting. The multiple authorship of Scripture shows itself in great variety of style, vocabulary, and emphasis. Beneath this variety is a basic unity of doctrine. Modern studies of the KERYGMA ("the thing proclaimed") in the NT have tended to underline the oneness of the preachers and writers of the early church in the gospel they declare in their preaching and assume in their writing. Similar studies of the OT can show that it finds its unity in the revelation of an all-sovereign righteous God who has redeemed his people Israel from Egypt and brought them into the land of promise. Moreover, the oneness of the two Testaments is the constant presupposition of the

writers of the NT. This unity is, of course, the product of the inspiring work of the Holy Spirit, the ultimate Author of Scripture.

Consequently, a true interpretation of Scripture will demonstrate the harmony of the Bible with itself, not in any artificial or strained manner, but by seeking to do justice both to the natural sense of each passage and the unity of the whole. This does not mean that the interpreter comes to the text with a ready-made system of dogmatics, but it does mean that he keeps always in mind the fact that behind all the human authors is the divine Spirit, for this is what the Bible itself claims. It is important to remember also that the Bible contains many examples of interpretation, for the NT writers themselves interpret the OT, and the principles they apply have the authority of their inspiration behind them. Here is the Holy Spirit's own guide in the understanding of Holy Writ.

5. The grammatico-historical principle. The Bible is wholly divine in its origin, for its inspiration is plenary. It is also completely human in its language and its modes of expression, for in no case did the inspiring Spirit bypass human instrumentation in communicating truth. For this reason, Scripture is to be viewed as literature in which the ordinary laws of language and human expression are seen. There must be patient attention to words, phrases, and sentences, and every particular statement is to be understood in relation to its context. The Bible contains examples of many generally recognized literary devices such as omission (Acts 2:40), compression (contrast Mk. 1:29 – 31 with 1:32 – 34), parenthesis (Eph. 4:9 – 10), and ellipsis (e.g., in Heb. 8:7 the word "covenant" does not occur in the Greek but can be inferred from the context).

A great many figures of speech occur. Some of the more important are the following: irony (1 Ki. 18:27); litotes (Acts 12:18); hyperbole (2 Sam. 1:23); synecdoche (Lk. 24:44, where "Psalms" prob. stands for "the Writings," since the Psalter was the first book of this third division of the Hebrew canon). Simile and metaphor occur times without number. It should also be remembered that the Bible contains a variety of literary forms, such as prose, poetry, parable, allegory, etc., and the characteristics of each needed to have been studied by the writer beforehand. The historical context is also important, and the Bible reader should always be concerned to discover what a passage of Scripture would have meant to its original readers in their particular situation and in terms of their own background. This means that a knowledge of the history of the biblical period and the geography of the biblical area and the customs of the Hebrews and other peoples referred to in the Bible is of considerable value.

6. The theological principle. The grammatico-historical approach is not the only level at which the interpreter does his work. We need to remember the unity of Scripture and so to understand any particular passage in the light of the whole of Scripture. This means that we seek to understand not only the human author in his context (the particular book in which the passage occurs) but also the divine Author (the Bible as a whole). For example, one needs to remember that there is a progress of doctrine in Scripture so that truth is more and more unfolded (without the necessity for "unlearning" anything previously revealed) and that Christ is the culmination and climax of this divinely controlled process (Heb. 1:1 – 2). Christ is not only the goal of the biblical revelation, but also its great theme throughout (Lk. 24:27; Jn. 5:45 – 47; Rom. 3:21 – 26; 1 Pet. 1:10 – 12 et al.).

The Christological character of Scripture emerges in a number of ways. Christ was predicted in the OT (Matt. 2:5 – 6; Rom. 9:33 et al.). He is also typified; that is, a correspondence exists between some OT event, person, or institution and Christ, so that the OT element is a divinely intended anticipation, more or less partial or imperfect, of the Person or work of Christ. Great caution must be

exercised in the realm of TYPOLOGY, and the clear teaching of the NT is the only safe guide to the typological elements in the OT. The NT writers describe Christ as the last Adam (1 Cor. 15:45), our paschal lamb (5:7), and our great high priest (Heb. 4:14); such descriptions are based upon this typological principle. The NT writers appear also to refer occasionally to a real presence of Christ in the OT story (1 Cor. 10:4), although the attempt of A. T. Hanson (*Jesus Christ in the Old Testament* [1965]) to show that this idea occurs in the NT with very great frequency would appear to take the evidence further than is warranted.

Many evangelical interpreters stress the presence of different DISPENSATIONS (administrative periods involving somewhat different methods of the divine dealing with human beings), while others emphasize the importance of the COVENANT concept in Scripture as disclosing a unity in all the stages of God's redemptive activity. Each of these two schools tends to be critical of the other, but it is worth noting that the most important of their principles of biblical interpretation is identical, for they both make the important assumption that the Bible discloses "unity in diversity." The evangelical understanding of the interpretation of Scripture may be summed up in that phrase, for it is simply another way of saying that the Bible is fully human and yet fully divine in the thought it conveys. Evangelical interpreters also agree that no alien philosophical principles (such as the existentialism employed by the school of Bultmann) should constitute presuppositions of interpretation, for all human philosophy must itself come under the judgment of God's Word written.

G. W. GROGAN

scroll. Sheets of PAPYRUS, LEATHER, or PARCHMENT joined together in long rolls, usually 10 – 12 in. wide and up to 35 ft. long, and used for various kinds of documents in ancient times. Prior to the invention of the CODEX, BOOKS were commonly produced in the form of scrolls. The material could be rolled from left to right between two wooden rollers, with part of the roller projecting as a handle. Rarely were both sides written on (but see Ezek. 2:10; Rev. 5:1). The writing was in short vertical columns a few inches wide, side by side, separated by a narrow space. The scroll was read by uncovering one column, then rolling it up on the other roller as the reading continued.

The use of the standard-length papyrus scrolls necessitated the division of the Hebrew PENTATEUCH into five books. One scroll was sufficient for a book the length of Isaiah. The Egyptians used some scrolls of enormous lengths, such as the Papyrus Harris (133 ft. long by 17 in. wide) and a Book of the Dead (123 ft. long by 19 in. wide). The more convenient book form (codex) was popularized by the early Christians, though its origins are unclear. There is little evidence of its use by the Jews prior to the 3rd cent. A.D. Most of the DEAD SEA SCROLLS were of leather, and Talmudic law required that copies of the Torah intended for public reading be written on scrolls made of leather of clean animals, for papyrus was a great deal more perishable than leather. Scrolls were often stored in pottery jars, such as those found in the caves of QUMRAN.

The most familiar reference to a scroll is found in Jer. 36, where BARUCH wrote down at JEREMIAH'S dictation all that God had spoken to the prophet over a twenty-three year period. In this passage, the LXX takes it for granted that the scroll was made of papyrus, for it renders Hebrew *mĕgillâ H4479* with *chartion* ("papyrus sheet"). It was surely papyrus and not leather that JEHOIAKIM cut in strips and burned, for the odor of burning leather would have been unbearable (Jer. 36:22 – 23). In EZEKIEL'S inaugural vision, he was ordered to eat the scroll on which God's words had been

written (Ezek. 2:9—3:3; cf. Rev. 10:8 – 10 [Gk. *biblion G1046* and *biblaridion G1044*]). There was a flying scroll in ZECHARIAH's vision (Zech. 5:1 – 2). DAVID refers to a scroll in a statement that the NT interprets as messianic (Ps. 40:7, cited in Heb. 10:7 [Gk. *kephalis G1046* plus *bibliou*]). Most of the NT references to books have a roll in view (cf. esp. Lk. 4:17, 20). See also TEXT AND MANUSCRIPTS (OT); TEXT AND MANUSCRIPTS (NT).

This Hebrew scroll of the book of Isaiah dates to c. A.D. 1350.

scurvy. See DISEASE.

Scythian sith'ee-uhn (Σκύθης *G5033*). A name designating primarily a nomadic people that inhabited the Caucasus, E and NE of the Black Sea. The term came to be applied more generally to horse-riders who raised livestock in that region and farther N and who were viewed as uncivilized (Col. 3:11).

The Scythians were one of several Indo-Iranian groups that appeared in the ANE around the 8th cent. B.C. First came the CIMMERIANS. When the Scythians then appeared, they were opposed both by the Cimmerians and by the Assyrian King ESARHADDON. The Cimmerians eventually moved farther to the W into ASIA MINOR. Eventually the Scythians allied themselves with the Assyrians, and the Medes sided with Babylonia (see ASSYRIA AND BABYLONIA; MEDIA). It is not clear whether the Scythians attempted to help the Assyrians in their hour of final collapse (the fall of NINEVEH in 612 B.C.). It is clear, however, that a large group of them launched an expedition down the coast of PHOENICIA and PALESTINE and were responsible for the destruction of ASHKELON and ASHDOD before Pharaoh Psammetichus (663 – 609) bought them off with a bribe. Eventually they were defeated and destroyed by the Medes, who expelled the remnants of them to the N.

Many identify the Scythians with the name ASHKENAZ (*ʾaškĕnaz H867*, prob. a corruption of

earlier *Ashkuzai* as found in Akk. inscriptions), who in Gen. 10:3 and 1 Chr. 1:6 is said to be one of the sons of Gomer (Cimmerians), along with Riphath and Togarmah. Gomer in turn was one of the sons of Japheth. In Jer. 51:27, in a prophecy against Babylon, God threatened to raise up against her the kingdoms of Ararat (Urartu), Minni (Manneans), and Ashkenaz (Scythians). The biblical writers viewed the Scythians as a savage and cruel people, and Herodotus devotes considerable attention to their history and culture (*Hist*. 4.1 – 142). The memory of them persisted in the Holy Land in the popular Greek name of the city of Beth Shan, *Skythōn polis* (Scythopolis), "city of the Scythians."

(See further T. T. Rice, *The Scythians* [1957]; E. Yamauchi, *Foes from the Northern Frontier: Invading Hordes from the Russian Steppes* [1982], ch. 4; L. Galanina and N. Grach, *Scythian Art: The Legacy of the Scythian World, Mid-7th to 3rd century B.C.* [1987]; R. Rolle, *The World of the Scythians* [1989]; V. Schiltz, *Les Scythes et les nomades des steppes* [1994]; D. Braund, ed., *Scythians and Greeks: Cultural Interactions in Scythia, Athens and the Early Roman Empire (Sixth Century BC – First Century AD)* [2005].)

Scythopolis sith-op'uh-lis (Σκυθόπολις [Jos. *War* 1.3.7 §65 et al.], from Σκυθῶν πόλις, *poliß*, "city of the Scythians" [Polybius, *Hist*. 5.70.4; Jdg. 1:27 LXX; Jdt. 3:10; 1 Macc. 12:29], gentilic Σκυθοπολίτης [1 Macc. 12:30]). The Greek name given to biblical Beth Shan. Holofernes is said to have camped between Geba and Scythopolis for a month (Jdt. 3:10). During Maccabean times, the Jews living there testified to the goodwill of its Gentile inhabitants (2 Macc. 12:29 – 30). At the time of Christ it was one of the cities of the Decapolis. The origin of the name is uncertain: some think it may recall the Scythian invasions of the late 7th cent. B.C., while others attribute it to the presence of Scythian forces in Beth Shan in Hellenistic times.

A. Bowling

sea. In the Hebrew Bible, the term for "sea," *yām H3542* (Aram. *yam H10322* only in Dan. 7:2 – 3), is used by extension in the sense WEST, for that was the direction in which the Great Sea (i.e., the Mediterranean) lay to an observer in Palestine. The NT writers frequently use the common Greek term *thalassa G2498*, with *pelagos G4283* ("high sea, open sea") occurring once in reference to the Mediterranean (Acts 27:5).

Four "seas" form the background to biblical events, and each appears in the record under a variety of names. (1) The RRed Sea, often referred to as "the sea" (Exod. 14:2 et al.; cf "Egyptian Sea" in Isa. 11:15). This was the obstacle which the Israelites had to overcome on their march out of Egypt, and once they were safely across and had watched its waters close over the pursuing Egyptians, they never returned to it. It is mentioned also in 1 Ki. 9:26, which records that Solomon built a fleet and a base on the Gulf of Aqabah for trading purposes.

(2) The Mediterranean. This body is first mentioned in Exod. 23:31 as "the Sea of the Philistines," since its coastlands were held, then and for long afterward, by this people group. In Num. 34:6 – 7, it is called the Great Sea, and this is its designation all through the topographic descriptions concerned with Israel's settlement in the land (Josh. 1:4 et al.; Ezek. 47:10 et al.). In Joel 2:20 and Zech. 14:8 it is called the "western" sea (lit., "at the back"), contrasted with the "eastern" sea (lit., "former"), that is, the Dead Sea on the other flank of the mountains of Judea. Indeed, dissimilar as these two bodies of water might appear to be, the OT writers seem to have thought of Israel as somehow hemmed in between them. At times it is simply called "the sea" (Num.

13:29; Josh. 16:8; Jon. 1:4; cf. Acts 10:6 et al.).

(3) The DEAD SEA. This appears first as the "Salt Sea" (Num. 34:12 et al.), then as "the sea of the Arabah" (Deut. 3:17; KJV, "the sea of the plain"), and three times as "the eastern sea" (Ezek. 47:18; Joel 2:20; Zech. 14:8; see previous paragraph). As with the Sea of Galilee (discussed below), the name "sea" is here given to what is in reality only a lake (cf. also Caspian Sea); unlike that body of water, however, the Dead Sea has no outlet—its level is maintained by a very high rate of evaporation from its surface. This same phenomenon is responsible for its extremely salty waters, and it is contrasted frequently with the Mediterranean for the fact that no fish can live in it. One of the visions of the prophets Ezekiel and Zechariah was that its waters would one day become fresh enough to support life; hence the picture of fishermen spreading their nets at EN GEDI and neighboring places (Ezek. 47:10).

(4) The Sea of Galilee (see GALILEE, SEA OF). This appears in the OT as the Sea of KINNERETH (Num. 34:11 et al.), and in the NT occasionally as the Sea of TIBERIAS (after the town of that name built on its shore by HEROD Antipas), or the Lake of GENNESARET (Lk. 5:1; this name is thought by some to be derived from Kinnereth). "Sea of Galilee" is, however, its usual name in the NT.

In the OT there are really only three naval episodes, the first when HIRAM, king of TYRE, floated rafts of timber S along the Mediterranean coast to supply Solomon with materials for the temple (1 Ki. 5:9), the second when Solomon built his Red Sea fleet (9:26 – 28), and the third when JONAH fled from the Lord (Jon. 1). The Israelites seem to have had little contact with the sea and no maritime tradition; with the Phoenicians as their near neighbors they would, in any case, probably have been outclassed.

This lack of maritime interest may have been due, at least in part, to geographical reasons: S of PHOENICIA, the coastline of Palestine offers no good natural harbors and only a few unimportant ones; the straight, dune-fringed coast provides no shelter (cf. G. Adam Smith, *The Historical Geography of the Holy Land*, 25th ed. [1931], ch. 7). On the other hand, D. Baly (*Geographical Companion to the Bible* [1966], 74) points out that a more valid explanation of Israel's disinterest in the sea may be that they so seldom occupied the coastline politically. Without assured access to the sea along the Philistine coast, they had little opportunity to become seafarers. In support of this suggestion is the fact that the only two national episodes linking the nation with the sea (noted above) occurred during the reign of Solomon, when the Philistines had been suppressed and Israel's power was at its height.

The "seas" of the Bible.

The sea is a source of much symbolic imagery (cf. *DDD*, 737 – 42). Some of the references are positive: "If only you had paid attention to my commands, / your peace would have been like a river, / your righteousness like the waves of the sea" (Isa. 48:18). On the whole, however, the Bible views the sea as a hostile and dangerous element (e.g., Job 26:12; Ps. 89:9). It is a part of the anticipated glories of the new heaven and earth that the sea has been eliminated (Rev. 21:1; cf. 12:18—13:1). See DEEP. (THE)

<div align="right">J. H. PATERSON</div>

sea, bronze. See SEA, MOLTEN.

Sea, Great. See GREAT SEA.

sea, molten. This expression is used by the KJV and other versions to render the Hebrew phrase *hayyām mûṣāq,* which occurs in only one context (1 Ki. 7:23=2 Chr. 4:2). The second word in the phrase comes from a verb that means "to pour" and is used in a more technical sense of metal that was melted and poured into a mold for casting. Thus the NIV renders, "the Sea of cast metal," which elsewhere is called "the bronze Sea" (*yām hannĕḥōšet,* 1 Chr. 18:8 and 2 Ki. 25:13 [= Jer. 52:17]). The reference is to a large receptacle for water, cast from molten BRONZE, which stood in the court of Solomon's TEMPLE.

SOLOMON commissioned Huram (see HIRAM #2) of TYRE, a skilled worker of bronze, to make the various castings for the temple. The sea was made from metal which DAVID had captured from

ZOBAH (1 Chr. 18:8), and was in turn broken up and carried off by the Babylonians (2 Ki. 25:13). It is described as round, having a diameter of 10 cubits (c. 15 ft.) at the brim, a circumference of 30 cubits (c. 45 ft.), and a height of 5 cubits (c. 7.5 ft.; 1 Ki. 7:23 – 26). The brim was decorated with castings of knobs or GOURDS placed in two rows around the circumference of the lip. It was mounted on a base consisting of twelve oxen, also cast from bronze, three facing toward each of the four cardinal points of the compass. The metal was cast a handbreadth in thickness, and the lip was curved over like the flower of a lily.

The sea was positioned "at the southeast corner of the temple" (1 Ki. 7:39). This suggests that it was beside the altar; in any case it was not in a direct line between the altar and the temple door. The reason for this apparent variation from the TABERNACLE layout is not clear. Nor is it clear why the extra ten basins were provided if the sea had the same function as the tabernacle laver. The identical function of both, namely for the priests' washings, can be seen from a comparison of Exod. 30:17 – 21 with 2 Chr. 4:6.

There has been no lack of modern explanations of the significance of the bronze Sea in terms of ancient mythology. The identification of the bulls with the twelve signs of the zodiac is almost certainly anachronistic, but they have been favored also as symbols of fertility and hence linked with the Babylonian *Apsu*, the water of life and fertility. Such attempts to link Hebrew concepts with Babylonian origins often ignore the distinctive meanings conveyed in the revealed religion of Israel. The fact that there was a similar sea in the temple at Babylon which was linked to the myth of Apsu says nothing about the significance of the sea in Solomon's temple, for Israel had no myth of Apsu, but on the contrary had a firm conviction of the historical basis of its faith.

The volume and shape of the sea are problematical because of the lack of specifications and because of uncertainty over the measurement of baths and cubits (see WEIGHTS AND MEASURES). The shape described seems most naturally to fit a hemisphere, except that 1 Ki. 7:26 describes a lip that could alter the ratio of volume to circumference. Other suggestions of the shape are that it was cylindrical or that it bulged with a diameter considerably larger than the 10 cubits at the brim. A further difficulty arises from the discrepancy between the volumes recorded in 1 Ki. 7:26 (2,000 baths) and in 2 Chr. 4:5 (3,000 baths). Some suggest that the Chronicler, writing after the destruction of the temple, may have misunderstood his sources with regard to the shape, and so have applied a different formula for volume. Others argue that he may have had a different standard of measurement for cubit or bath, or that the text may have been corrupted in the course of transmission.

G. GOLDSWORTHY

sea cow. An aquatic herbivorous mammal also known as *dugong*. The term is used by the NIV to render Hebrew *taḥaš H9391*, which is of uncertain meaning (TNIV, "durable leather"). In almost all of its occurrences (the exceptions are Num. 4:25; Ezek. 16:10 [in the latter, where the reference is to sandals, the NIV translates "leather"]), this Hebrew noun occurs in combination with ⟨ôr H6425, "skin," and the phrase designates a material used for covering the TABERNACLE and some of its furnishings (Exod. 25:5; 26:14 et al.; Num. 4:8 – 14). Translations of the phrase include "badgers' skin" (KJV), "goatskin" (RSV), "dolphin skin" (NJPS), and simply "fine leather" (NRSV, prob. on the basis of a similar-sounding Egyptian verb meaning "to stretch leather"; cf. *HALOT*, 4:1720 – 21).

In determining the meaning of the term, the following facts are relevant: (1) It is generally agreed that these instructions were given near the mouth of the Gulf of AQABAH, which is desert. (2) The skins were of large size. The net area of the larger cover was approximately 13 by 44 ft., or 572 sq. ft.; here the plural "skins" is used, but the singular occurs consistently in connection with the

furnishings (Num. 4:6 – 14), such as the ARK OF THE COVENANT (4 x 2 x 0.5 ft.). Few wild animals easily obtainable in the desert would provide big enough skins. (3) The material was both valuable and strong; it is associated with embroidered cloth and fine linen, but was also used as leather for sandals, not only as ornament (Ezek. 16:10).

The third point above makes goatskin most unlikely, while no suitable desert mammal can be suggested, so the most probable solution is a marine species. Some authorities have proposed the seal, but the nearest is the monk seal of the Mediterranean. Several dolphins live in the RED SEA, and it is possible that the Hebrew term is related to the Arabic word for "porpoise," *duhas*; however, their skin is unsuitable for making into leather, and they are usually caught only by chance. More likely is the dugong or sea cow, the only truly marine species of the order *Sirenia* alive today. It was once plentiful in the Gulf of Aqabah, and until early in the 19th cent. its skin was the standard material for making sandals in the E Sinai peninsula. An adult dugong is 10 ft. long and one skin would easily cover the ark. For the larger cover perhaps between twenty and thirty skins would be needed.

The dugong is entirely vegetarian, eating brown seaweeds, grasses, etc. The forelimbs have become paddles and the hind limbs have disappeared, so it is quite unable to leave the water. Dugongs are not truly sociable but go about in groups of up to six. Once found in warm coastal waters from the Red Sea to Australia, they are now much reduced in numbers because they have been hunted for food; in some areas they are in danger of extinction. (See F. S. Bodenheimer, *Animals and Man in Bible Lands*, 2 vols. [1960 – 72], 1:52; *FFB*, 22 – 23.)

    1. Protection
    2. Indication of ownership
    3. Authentication of documents
    4. Trademark
    5. Ritual
4. Significant seal discoveries
5. Figurative usage

I. Terminology. The primary Hebrew term for "seal" or "signet" is ḥôtām *H2597* (Gen. 38:18; Exod. 28:11 et al.), from the verb ḥātam *H3159*, "to close up, seal, confirm" (Deut. 32:34; Job 9:7; Isa. 8:16 et al.; Aram. ḥătam *H10291*, Dan. 6:17). In addition, the word for "ring," ṭabbaʿat *H3192*, can be used specifically of a signet ring (Gen. 41:42; Esth. 3:10 et al.; in Aram., the term used is ʿizqâ *H10536*, Dan. 6:17).

The NT uses the common Greek noun *sphragis G5382* (Rom. 4:11; 1 Cor. 9:2; 2 Tim. 2:19), which occurs frequently in the book of Revelation (Rev. 5:1 – 2 et al.). The cognate verb is *sphragizō G5381* (Matt. 27:66; Jn. 3:33; 2 Cor. 1:22; Rev. 7:3 – 5 et al.); the compound form *katasphragizō G2958* occurs only once (Rev. 5:1).

II. Types. At least four different types of seal can be identified.

A. Stamp seals. Glyptic ART (engraving or carving of seals or gems) flourished in the ANE from the 4th millennium B.C. down to the end of the Persian period in the 4th cent. B.C. Through the medium of these seals, one knows a great deal about the people of those days, the way they dressed, and their religious ideas. Seals often supply an indispensable witness to the developing thought of the ancients when other evidence is lacking.

The first seal was probably a development from the AMULET, which was worn as a charm. The earliest type, called a stamp seal, was an engraved gem or bead that was flat and produced a copy of itself by being pressed to soft CLAY. In earliest times it was probably felt that some of the seal's protective power would be transferred to the impression. The stamp seal was virtually discarded in MESOPOTAMIA at the beginning of the 3rd millennium in favor of the cylinder seal and came into use again only at the end of the 8th cent. B.C., when it again gradually became more common, eventually replacing cylinder seals altogether by Hellenistic times.

B. Cylinder seals. The cylinder seal probably began as little more than tiny clay spools scratched by twigs in attempts to depict a god, an animal, or perhaps a flower. The design would leave its impression when rolled on wet clay. Cylinder seals first appeared in Mesopotamia during the Uruk period of the Protoliterate Period (before c. 3000 B.C.) and were of a high quality. In all periods good and bad craftsmanship are found; the Jemdet Nasr seals are decidedly inferior to the artistry of the preceding Uruk period. The cylinder seal remained the most popular type of seal until the middle of the 1st millennium B.C. The cylinder seal reached Egypt in the 3rd millennium, but since the most common writing material there was PAPYRUS, it was not so well adapted to the cylinder for sealing documents, so the Egyptians preferred the stamp seal in a scaraboid form (see below, section C).

Many materials were used as cylinder seals, from baked clay to lapis lazuli, gold, silver, carnelian, blue chalcedony, rock crystal, pink marble, jasper shell-core, ivory, glazed pottery, wood haematite (an iron ore, Babylonian *aban shadi*). Care was exercised in the choice of stone from which the seals were cut, as some stones were considered "unlucky." A list of lucky and unlucky stones was compiled. The seal cutter ordinarily used stones that were readily available, except for lapis lazuli (imported from Persia, Afghanistan, or India) and shells (brought from the Persian Gulf).

Seals of softer material could easily have been cut with flint. For the harder materials, such as agate or quartz, a harder tool was required. It is most likely that coarse corundum was used for this purpose. All the early seals were undoubtedly incised by hand. The earliest seals were incised with geometric patterns, probably representations of a totem or some magical object. Religious scenes, animals and flowers, epic scenes from myths, scenes from everyday life, boats, banquets, and ritual

marriage also figured prominently in the designs. Most of the scenes or designs of Mesopotamian seal cylinders usually have a religious meaning.

When WRITING was invented, the seal often incorporated the owner's name; such inscriptions began to appear in the middle of the Early Dynastic period (3000 – 2340 B.C.). Soon afterward the owner's title or rank and his father's name began to appear, and by the Akkadian period (2340 – 2180 B.C.) a space was often left by the seal cutter for adding the purchaser's name. Sometimes a declaration of loyalty to a god or king was included in the inscription. Seals have been unearthed in such quantity at sites through SE Europe and the Near and Middle E—from Greece and Egypt through to Iran—that the general dating of seals is now undisputed (at least within two or three centuries), though sometimes it is difficult to decide the exact period or even country of origin, particularly those from regions bordering Mesopotamia. HERODOTUS (*Hist.* 1.195) recorded that every Babylonian gentleman "carries a seal and a walking-stick." More than 6,000 cylinder seals from the ANE have been published, from sites such as Ur, Eshnunna, and Khafajeh on the Diyala River, and from the ancient Assyrian military capital of KalḪu (biblical CALAH, modern Nimrud).

The cylinders were hollowed by using a copper tool with emery, revolving it by hand or with the aid of the string of a bow. The seal was worn suspended by a cord about the neck or on the wrist or attached by a pin to some part of the owner's garment. Graves with skeletons having cylinders tied to the wrist have been found.

C. Scarabs. The use of stones and earthenware in the form of a scarab or beetle was, along with the amulet, one of the most distinctive contributions of Egyptian glyptic art. The scarab is a type of the stamp seal and is better adapted to papyrus, the principal writing material used in Egypt, than the cylinder seal. The beetle was venerated in Egypt, the dung beetle (*Scarabaeus sacer*) being the emblem of resurrection and continual existence. The Egyptians saw the sun rolling like a great ball across the sky and compared it to the beetle carrying its food or sometimes laying its eggs in animal droppings which it rolled into a ball. The Egyptians believed that the sun god RE, who at dawn was Khepera, took the form of a beetle at noon, and from this belief evolved the symbol of the beetle as an emblem of eternal life. It was only natural that the scarab should develop as the most distinctive form of seal among the Egyptians.

Scarabs were usually made from stea-schist, fibrous steatite, or schist, sometimes from quartz, carnelian, jasper, black obsidian, or limestone. They bore cartouches (symbols or designs cut in the scarab) and were often coated with glaze. The scarab thus came to be used as a person's signature. Scarabs were set in seal rings with a swivel type of bezel rim or mounted in the Roman fixed fashion. Reference is made to PPHARAOH'S signet ring which he gave to JOSEPH (Gen. 41:42); undoubtedly this was a scarab and served as Joseph's authority for transacting the king's business. Scarabs were used to stud pectorals, crowns, and bracelets. Every pharaoh had his own scarab, often two. One gave his throne name and the other his name before ascending the throne. Cartouches of the principal pharaohs have been identified, and when they are found in diggings of ancient cities or in tombs, they are quite useful in establishing the dates of the material surrounding them. Egyptian scarabs were carried by traders and soldiers to the entire Mediterranean and Mesopotamian areas and have been invaluable in the dating of finds.

These scarabs (seals in the form of a beetle), made of amethyst, were discovered in Lachish and date to the middle of the 2nd millennium B.C.

It became customary to bury scarabs with the dead; they were placed in the bandages of the mummy. Heart scarabs, 3 or 4 in. long, were placed where the human heart had been removed as part of the mummification process, or at the throat, engraved with the 64th chapter of the *Book of the Dead*, which contained a spell imploring the heart of the deceased not to betray him in the judgment before OSIRIS. Later a number of scarabs were placed about the body. Toward the end of the 18th dynasty, large heart scarabs were engraved in commemoration of significant secular events.

One of the most famous scarabs is the huge pectoral scarab of Amenhotep III (c. 1406 – 1370 B.C.), uncovered during the LACHISH excavations. It contains in eight parallel lines of hieroglyphics the record of a lion hunt in the tenth year of the reign of Amenhotep III (Amenophis) and Queen Tiye.

D. Jar handles. Though the principal use of seals was for signing documents, they were also used to make safe for shipment jars containing valuable papers or goods. A piece of cloth was placed over the neck of the bottle, soft clay was smeared on top of the binding cord, and the seal was then pressed into the wet clay. The unbroken seal was evidence that the merchandise was intact upon arrival. In Judea the seal was imprinted as a record of ownership on clay jar handles which were not yet hardened; this practice was not commonly used in Israel. There is also evidence that stamped jars were used for collecting taxes paid to the king, usually in wine or oil.

Four groups of impressions on jar handles of the 5th and 4th centuries have been found: (1) The three consonants of the word *Yehud* (JUDEA) in old Hebrew characters together with a monogram consisting of a cross with a circle around it; such seals probably had official significance. (2) A circle with a star incised within it, and the letters of Jerusalem in old Hebrew characters between the points of the star. (3) The letters of the name Yehud on a round or oval stamp-seal with no further decoration written in early Palestinian ARAMAIC, suggesting that in this period the older manner of writing was being replaced by the newer Aramaic characters. (4) Seals found at Tell en-Naṣbeh (MIZPAH) containing the letters *mṣh*, probably a reference to the Benjamite town of MOZAH (see E. Stern, *Archaeology of the Land of the Bible. Volume II: The Assyrian, Babylonian, and Persian Periods, 732 – 332 BCE* [2001], 335 – 36).

III. Uses. Seals served a variety of purposes.

A. Protection. The earliest seal developed from an amulet and therefore maintained some of the amulet's magical power. The seal would deter anyone from breaking open the sealed object for fear of the evil that might overtake him. Later the unbroken seal served as evidence that the object being protected had not been tampered with. When DANIEL was cast into the lion's den, the king sealed the den with his signet and those of his lords (Dan. 6:17). The tomb of Jesus was made secure by sealing the stone (Matt. 27:66).

B. Indication of ownership. The earliest method, as far as one knows, to distinguish a person's property was by use of the seal; this kind of seal has been found in Neolithic settlements in Mesopotamia. The seal was engraved with a design or mark distinctive to the owner.

C. Authentication of documents. The most common use of the seal was to authenticate written documents, letters, bills of sale, or receipts for goods or money. After incising the CUNEIFORM message in the soft clay, the scribe had the sender and witnesses remove from their necks their own cylinder seals and roll them over the still wet clay to make their signatures. JUDAH had to give his seal to TAMAR as a pledge (Gen. 38:18); he apparently wore it attached with a cord around his neck.

It was also common practice to wear the seal as a ring on the finger, as seen in Joseph's elevation by Pharaoh which included the giving of the signet ring (41:42). The giving of the ring was a sign that authority had been transferred to him; all important documents would receive his seal and all officials were under his orders; contracts were guaranteed by the seal. As vizier, Joseph governed in Pharaoh's name and acted for him in his absence.

JEREMIAH sealed a deed of purchase when he bought a piece of land (Jer. 32:10 – 14). JEZEBEL assumed her husband's authority by writing letters in his name and sealing them with his seal, and these letters resulted in the death of NABOTH (1 Ki. 21:8 – 13). When Jerusalem was restored and its walls rebuilt in the 5th cent., the leaders of the city set their seal to a written covenant agreeing to keep the law (Neh. 9:38; 10:1). The Persian king's edict sealed with his ring could not be revoked (Esth. 8:8). The use of the seal as a signature did not necessarily imply the inability of the person to write, but it did carry the authority of the owner. The signet came to be looked upon as a symbol of authority. Before he died, ANTIOCHUS IV Epiphanes entrusted his crown, robe, and signet to Philip as regent for his son (1 Macc. 6:15).

Seal of "Elishama son of Semahyah(u)" (bottom, with enlarged replica on top). Numerous bullae, or clay impressions made from seals, were found at the excavations in the City of David Area G, dating to the 7th – 6th cent. B.C.

D. Trademark. Seals were used to impress an early form of trademark, as, for example, on pottery before firing. This was practiced in the Early Dynastic Period (c. 3000 – 2340 B.C.) at SUSA, and for many centuries in Syria and Palestine Judean jars bearing the stamp *lmlk*, "[belonging] to the king," may have been the identifying mark of the royal workshop that produced them (see A. Mazar, *Archaeology of the Land of the Bible, 10,000 – 586 B.C.E* [1990], 455 – 58; *SacBr*, 251 – 53).

E. Ritual. Seals seem to have been used in community rites, especially in the annual New Year Festival when the kings of ASSYRIA AND BABYLONIA sought the blessing of the gods and prosperity for the nation, and the gods in solemn assembly determined their destiny for the ensuing year. Large seals inscribed with the names of gods and kings have been found in the main temple of BABYLON. The impressions of divine and royal seals have been found affixed to religious covenants.

IV. Significant seal discoveries. A serious study of seals began in the 1880s with the work of J. Ménant. Pioneer work of cataloguing was done by William H. Ward and Louis Delaporte. More recent comprehensive work has been done by H. Frankfort and A. Moortgat. The most valuable seals are those that carry cuneiform inscriptions as well as designs. Of great interest is the lapis lazuli seal of Queen Shub-ad (c. 2500 B.C.), which was thrown into her tomb after all her other treasures and her court had been buried sacrificially with her.

Of more particular interest is the development of the seal in Israel and Judah. The first Israelite-inscribed seals that can be dated with certainty are from the dynasty of JEHU (842 – 815 B.C.). Israelite seals are probably adaptations of Canaanite or Phoenician work, the latter in turn being adaptations of the Egyptian scarab seal. They show a mixture of Egyptian and Syrian influence; seal designs include the lion, young bull, cherub (winged lion with human head), the griffin (a bird-

headed, winged animal), and the four-winged cobra. Also included are the ram, fighting cock, gazelles, and a standing human figure, as well as more complex scenes, sometimes drawn from non-Israelite traditions. Seals have shed new light on the Israelite system of taxation and the ability of Israelite artists. Seals and other objects show that the artistic level of Judea was higher in the 6th cent. than that of Greece. Seals from Judah which became more common in the 8th cent. and are very numerous in the 7th and early 6th do not contain any combinations of names with BAAL as was quite common in Israel. A typical Palestinian seal was of the stamp type, round or oval, with a convex top. In the inscribed face a double line divided the surface. Above it was the name of the owner and below was the name of the owner's father.

Typical of the many seals unearthed by archaeologists is one found at MEGIDDO on the plain of ESDRAELON in 1904. Dating from the reign of JEROBOAM II (c. 775 B.C.), it is made of jasper and bears the image of a roaring lion with the words, "of Shema, the servant of Jeroboam," the words "the seal" or "the property" being understood at the beginning of the inscription. From the same period the personal seals of two of King UZZIAH'S officials have been found, each calling himself "the servant of Uzziyau" (Uzziah); one of the men was named Abiyau (Abijah) and the other was Sheban-yau (Shebaniah). There is also a seal that belonged to King JOTHAM of Judah (742 – 735).

Two jar handles found at DEBIR and one at BETH SHEMESH, dating from the end of the monarchy, were all made from the same original stamp seal bearing the inscription, "Belonging to Eliakim, steward of Yaukin." These seal impressions indicate that between 598 and 587 B.C. a person named Eliakim was steward or overseer (*na⁽ar H5853*) of the crown property of JEHOIACHIN while the latter was in captivity in Babylon and that this property was maintained intact and was not transferred to his successor, ZEDEKIAH.

A beautiful seal was found at Tell en-Nasbeh, 8 mi. N of Jerusalem, with the inscription "To Jaazaniah, servant of the king." It probably refers to a Judean royal official of GEDALIAH mentioned in 2 Ki. 25:23, and would be dated after 587 B.C. during the governorship of Gedaliah, appointed by NEBUCHADNEZZAR over Judea after the fall of Jerusalem (Jer. 40:5, 8). The seal is incised with the figure of a fighting rooster, perhaps borrowed from Egypt.

A seal of DARIUS the Great (522 – 486) shows the king in a two-wheeled chariot between two date palms. The charioteer is driving over one lion; the king stands with bow in hand ready to shoot another lion standing on his hind legs. The winged disk is depicted at the top center of the seal, along with the letters of the god Ahura Mazda. At the left is a trilingual cuneiform inscription containing in Old Persian, Elamite, and Babylonian the words, "I am Darius the great king."

V. Figurative usage. Symbolic or figurative use of the seal is found in literature of all periods. An old Babylonian prayer says, "Like a seal may my sins be torn away." In the 8th cent., the prophet ISAIAH said, "Bind up the testimony / and seal up the law among my disciples" (Isa. 8:16). The bride is described as "a spring enclosed, a sealed fountain" (Cant. 4:12); and she says to her lover, "Place me like a seal over your heart, / like a seal on your arm; / for love is as strong as death, / its jealousy unyielding as the grave" (8:6). JEREMIAH makes effective use of the signet ring as a warning to JEHOIACHIN (Jer. 22:24 – 25). ZERUBBABEL is told that God will make him like a signet ring (Hag. 2:23). The earth, which was formless in the dark, "takes shape like the clay under a seal" (Job 38:14; cf. also 9:7; 33:6; 37:7; 41:15). The book of Daniel makes use of the figure in expressions such as "to seal up vision and prophecy" (Dan. 9:24) and "close up and seal the words of the scroll" (12:4).

The NT also employs the seal in a figurative sense. Jesus claimed that the Father had "placed his seal of approval" on the Son of Man (Jn. 6:27). PAUL described CIRCUMCISION both as a sign and as

"a seal of the righteousness" that ABRAHAM obtained by faith (Rom. 4:11). Writing to the Corinthians he stated, "For you are the seal of my apostleship in the Lord" (1 Cor. 9:2). Most significant, the apostle spoke of the HOLY SPIRIT as the seal of ownership with which God has marked the believer (2 Cor. 1:22; Eph. 1:13; 4:30; cf. also 2 Tim. 2:19). In the book of Revelation, the seal is a recurring eschatological symbol (Rev. 5:1 – 2, 5, 9; 6:1 – 14; 7:2 – 8; 8:1; 9:4; 10:4; 20:3; 22:10).

sea monster. The NRSV and other versions use this phrase to render the Hebrew noun *tannîn H9490* in two passages (Gen. 1:21 [NIV, "creatures of the sea"]; Ps. 148:7 [NIV, "sea creatures"]; the RSV also uses it in Job 7:12, and the KJV in Lam. 4:3 [in the latter passage, the more likely reading is *tannîm*, pl. of *tan H9478*, "jackal"]). For other uses of the Hebrew term, see DRAGON. The NRSV uses "sea monster" also to render Greek *kētos G3063*, which occurs only once (Matt. 12:40 [KJV, "whale"; NIV, "huge fish"]).

This fresco of a sea monster (prob. one of a pair) was discovered in the house of Nero in Rome.

sea of glass. In his description of the heavenly council chamber, John says that "before the throne there was what looked like a sea of glass, clear as crystal" (Rev. 4:6). In a different vision he says, "I saw what looked like a sea of glass mixed with fire and, standing beside the sea, those who had been victorious over the beast and his image and over the number of his name" (15:2). These references have been interpreted in numerous ways. Some have considered this glassy sea to be the counterpart of the LAVERS or basins in Solomon's temple, which stood there as a symbol of the purity that was required of any person who would approach God (1 Ki. 7:38). Others point to the sea of bronze in the temple (7:23 – 26; see SEA, MOLTEN), which possibly alluded to the water above the skies (Gen. 1:7; Ps. 184:4; cf. Ezek. 1:22). The symbolism may have indicated the vastness and transcendence that separate God from his creation.

It is unclear what connection, if any, there is with the sea as a reservoir of evil out of which the "beast" arose (Rev. 13:1), and with John's statement that, when he saw the new heaven and earth, "there was no longer any sea" (21:1). It is likely that in John's cosmology, the sea—whether on earth or in heaven—indicated separation, and in the spiritual context all that separated human beings from God. The glassy sea stood in John's symbolism before the throne of God as a mute reminder that the entire universe was afflicted with rebellion against God. John's theology had a precise universal opposition between good and evil and between God and Satan that approached DUALISM. This is due to the seriousness with which he regarded the reality of evil. It was not, however, a true dualism because John regarded God as the creator of all things (4:11), even the sea of glass. (For other proposals, see the summary in G. R. Osborne, *Revelation*, BECNT [2002], 232.)

H. L. DRUMWRIGHT, JR.

Sea of Kinnereth (Chinnereth). See GALILEE, SEA OF.

Sea of the Arabah. See ARABAH; DEAD SEA.

Sea of Tiberias. See GALILEE, SEA OF.

Sea Peoples. Documentary sources from Egypt and elsewhere attest to the existence of various people groups that began to reach the Syrian coast around 1300 B.C. (although there is sporadic evidence for an even earlier presence). These seafaring invaders caused considerable havoc in the ANE over an extended period of time. In the 12th cent., for example, RAMSES III claims to have defeated a confederation of "foreign countries" that had conspired "in their islands" and that consisted of "Philistines, Tjeker, Shekelesh, Denye(n), and Weshesh" (*ANET*, 262; for a fuller list with alternate spellings see *ABD*, 5:1059 – 61). Their precise origins cannot be established, but it seems likely that their migration was caused by disturbances in the AEGEAN related to the demise of the Mycenean civilization (see GREECE IV). For further details and bibliography, see PHILISTINES.

seasons. The periods of the year associated with certain phenomena or activities. The Hebrew noun *mô(ēd H4595*, which has a broad range of meanings ("meeting place, assembly, appointed time"), can be appropriately rendered "season" in various contexts (e.g., Gen. 1:14; Ps. 103:19). The same is true of such words as *yôm H3427* (lit., "day"; e.g., Num. 13:20) and *<et H6961* (lit., "time"; e.g., Lev. 26:4). In the N T, the word "season" usually translates Greek *kairos G2789* (lit., "time"; e.g., Mk. 11:13; Acts 14:17; Gal. 4:10).

Specific words for "summer" are Hebrew *qayiṣ H7811* (Gen. 8:22 et al.) and Greek *theros*

G2550 (Matt. 24:32 et al.); for "winter," Hebrew ḥōrep H3074 (Ps. 74:17 et al.; cf. also sĕtāw H6255 in Cant. 2:11) and Greek cheimōn G5930 (Matt. 24:20 et al.). The Greek word for "autumn," phthinopōrinos G5781, occurs once in the NT (Jude 12). In addition, the NIV uses the renderings "autumn/spring rains" for terms that mean literally "early/later rain" (e.g., Deut. 11:14; Jas. 5:7); see RAIN.

Like all other societies at a comparable cultural level, the Israelites had a strong awareness of the seasons and their importance in their lives. Basically, there are only two seasons in the Palestinian year, the dry season, which is hot, and the wet season, which is cool or cold. The incidence of these seasons would dominate the planning of any agricultural community, but Israel had a special consciousness of the seasons as a direct evidence of God's oversight, based on God's promise in Gen. 8:22 and the explicit warning of Lev. 26:3 – 4 (cf. Deut. 11:13 – 14). The unreliability of rainfall in PALESTINE gave them an awareness of dependence on God for the gift of a HARVEST.

At the time of the exodus, it was provided that Israel should measure time from the PASSOVER month, which became the first month of the year in the religious calendar (Exod. 12:2; the civil year began in the fall). This month became the starting point for measuring the other fixed occasions, such as the three times in the year when all the men of Israel were commanded to come together for the great religious festivals. However, once the people settled in the Promised Land and became cultivators rather than pastoralists, the rhythm of the farmer's year asserted itself, and the religious festivals came to acquire a new significance as marking the seasons. See AGRICULTURE.

Agriculturally, the year began with the "early" rains in October, when the sun-baked earth became sufficiently workable for plowing and sowing to take place. The crops grew through the wet season, and in April the harvest began, the first ripe crop being BARLEY. In June the main harvest occurred, followed by the gathering of grapes (see VINE) and OLIVES, and it was not until late September or early October that the cycle of the farm year was completed.

The FEASTS of Israel marked the progression of these seasons. The Passover occurred at the time of gathering the FIRSTFRUITS in April; the Feast of Weeks coincided with the main WHEAT harvest, and involved loaves of bread to underline the connection; the Feast of Tabernacles marked the "harvest home" and the start of the new crop year. D. Baly (*The Geography of The Bible* [1957], 99) sees in the water poured out at the Feast of Tabernacles a symbol of "the desperate need for rain," as the farmers began the labors of a new season. See also CALENDAR.

J. H. PATERSON

seat. In the OT, the Hebrew word *kissē) H4058* often refers to any seat occupied by an important person, whether king, minister, or priest (Jdg. 3:20; 1 Sam. 1:9; 4:13, 18; 1 Ki. 2:19; Esth. 3:1). In NT times, special seats of importance were a part of the furniture of the SYNAGOGUE. Jesus rebuked the leaders of his day for seeking the "most important seats" there (Matt. 23:6; Mk. 12:39; Lk. 11:43; 20:46; the Gk. term here is *prōtokathedrias G4751*, parallel to *prōtoklisia G4752*, "place of honor" in a banquet). In the synagogues of Palestine, the back seats were occupied by children and unimportant people; the closer the seat was to the front, the greater the honor of the person who occupied it. The most honored seats of all were the seats of the ELDERS, which faced the congregation (cf. A. Edersheim, *The Life and Times of Jesus the Messiah*, 2 vols. [1899], 1:436). A man who sat in an elder's seat could be seen by all, and his importance could not be missed. In ALEXANDRIA, the principal synagogue had seventy-one such seats (a testimony to the size of the Jewish community), and they were held by the members of the "Council" of that community.

The Greek noun *kathedra G2756* is applied to the seats or benches of the merchants who were selling doves in the temple (Matt. 21:12; Mk. 11:15). This word is also used in the expression "Moses' seat" (Matt. 23:2; see SEAT, MOSES'). In some instances in the NT, the word *bēma G1037* is used to designate a JUDGMENT SEAT (Matt. 27:19; Jn. 19:13; Acts 18:12, 16 – 17; 25:6, 10, 17), referring to the place occupied by a governor or other official who was sitting in function as a judge. Twice it is used of Christ's sitting in judgment (Rom. 14:10; 2 Cor. 5:10), and some have thereby distinguished between the judgment of Christ and the judgment of God from his THRONE.

<div align="right">H. L. DRUMWRIGHT, JR.</div>

seat, Moses'. Matthew reports Jesus as saying, "The teachers of the law and the Pharisees sit in Moses' seat. So you must obey them and do everything they tell you. But do not do what they do, for they do not practice what they preach" (Matt. 23:2). Archaeological evidence confirms that in the front of the SYNAGOGUES there was a stone seat where the authoritative SCRIBE (teacher of the law) sat and taught (see E. L. Sukenik, *Ancient Synagogues in Palestine and Greece* [1934], 57 – 61; M. Avi-Yonah, *Views of the Biblical World*, 5 [1961], 63). The phrase "sit in Moses' seat" may suggest that the scribes viewed themselves as successors of MOSES (cf. D. A. Carson in *EBC*, 8:471 – 72, who also addresses the problem that the PHARISEES did not normally teach unless they also belonged to the scribal profession). In any case, the scribes did believe that they exercised the authority of Moses, in whom the written law and the main lines of the oral law were regarded as originating (see MISHNAH).

<div align="right">S. BARABAS</div>

Seba see'buh (סְבָא *H6013*, meaning unknown). Son of CUSH and grandson of HAM (Gen. 10:7; 1 Chr. 1:9). The term is also applied to his descendants, a people group that inhabited the eastern part of ETHIOPIA or possibly a region in S ARABIA (Isa. 43:3). One passage associates Seba with SHEBA (Ps. 72:10). For discussion see SABEAN.

Sebam see'bam. Alternate form of SIBMAH.

Sebat see'bat. KJV form of SHEBAT.

Secacah si-kay'kuh (סְכָכָה *H6117*, prob. "covering" or "protection"). TNIV Sekakah. One of six towns allotted to the tribe of JUDAH in the desert (Josh. 15:61). Some settlements in el-Buqeʿah (i.e., ACHOR, a valley SW of JERICHO) dating to Iron II are thought to correspond with four of these towns, including Secacah. Assuming that the list of cities in this passage runs from N to S, Secacah would then be identified with Khirbet es-Samrah, about 4 mi. SW of QUMRAN. The remains feature the following: a large double-walled fortress with an enclosed cistern, nearby dam complexes for exploiting the scanty rainfall, and remains of several stone towers. The pottery fragments all come from a single period, Iron II. Some scholars, however, prefer to identify Secacah with Qumran. (For bibliography, see SALT, CITY OF.)

<div align="right">A. BOWLING</div>

Sechenias sek'uh-ni'uhs. KJV Apoc. form of SHECANIAH (1 Esd. 8:29, 32).

Sechu see'ky*oo*. KJV form of SECU.

second Adam. This title, which does not occur in Scripture, results from a conflation of "the last Adam" (1 Cor. 15:45) and "the second man" (v. 47), and it incorporates a concept that is prominent in both 15:45 – 49 and Rom. 5:12 – 21. In his counter to a static Platonic anthropology that taught a heavenly real man and earthly copies, PAUL proclaimed a dynamic redemption for real people on earth and a fulfillment in history by the "spiritual" and "heavenly" man JESUS CHRIST (1 Cor. 15:46 – 49). In contradistinction to the first man's sin, which brought death and condemnation, the second man's "act of righteousness" and "obedience" results in an "abundant provision of grace" bringing JUSTIFICATION, RIGHTEOUSNESS, and eternal LIFE (Rom. 5:15 – 19). See ADAM II.B.

<div align="right">R. N. LONGENECKER</div>

second coming. The future return of JESUS CHRIST to the earth. A prominent doctrine of CHRISTOLOGY, the predicted second advent of Christ is implied in hundreds of OT prophecies of future judgment on the world and a coming kingdom of righteousness on earth, and it is explicitly detailed in major NT passages. The last book of the Bible, the Revelation of Jesus Christ, refers specifically to his second coming (Rev. 19) and to the subsequent MILLENNIUM and future state (chs. 20 – 22). See also ESCHATOLOGY; PAROUSIA.

I. General OT references. The OT presents a mingled prophecy of the first and second advents of Christ (cf. 1 Pet. 1:10 – 12), often combining both comings in the same context (Isa. 61:1 – 3; Lk. 4:17 – 20). The first reference to the second coming may be found in Deut. 30:3, which the KJV renders, "Then the LORD thy God will turn thy captivity, and have compassion upon thee, and will return and gather thee from all the nations whither the LORD thy God hath scattered thee" (modern versions interpret the second occurrence of *šûb H8740* not in the sense "return," but adverbially, "again," a common use when this term is followed by another verb). The "return" results in their regathering to their ancient land and their spiritual and physical restoration. This is typical of OT prophecies of the second advent. The OT seldom pictures the second coming *per se*, but often dwells upon the circumstances of the second coming, such as the preceding regathering of Israel to the land (Jer. 30:3; Amos 9:14 – 15), and the results of the second coming—the judgment of the nations (Isa. 2:4), deliverance of Israel (Jer. 31:28), and a kingdom of righteousness and peace on earth (Ps. 72:7).

II. The second coming in the Psalms. The second coming of Christ is linked with the moral struggle between God and his creatures. Psalm 2, for instance, after picturing the world's rejection of the sovereignty of God, declares God's purpose, "I have installed my King / on Zion, my holy hill" (v. 6). In the verses that follow, the decree of God is stated concerning his purpose to place his Son over the nations: "You will rule them with an iron scepter; / you will dash them to pieces like pottery" (v. 9). On the basis of God's intention to make his Son the King of the earth, the exhortation to earthly kings is, "Serve the LORD with fear / and rejoice with trembling. / Kiss the Son, lest he be angry…" (vv. 11 – 12a). The conclusion is reached, "Blessed are all who take refuge in him." This psalm is typical of the OT passages relating to the second coming. The event itself is assumed, but the results are detailed.

Psalm 24 is another great passage dealing with Christ's coming as "the King of glory." The gates of Jerusalem are exhorted to open to this King when he comes. His rule on the earth is based on the promise that "The earth is the LORD'S, and everything in it, / the world, and all who live in it" (v. 1).

Another complete presentation of the second coming of Christ and its result is found in Ps. 72, presented in the form of a prayer, but describing the certain results of Christ's return. His dominion is described as "from sea to sea" (v. 8). Kings and nations are described as serving him (v. 11). This psalm ends with the prayer, "may the whole earth be filled with his glory" (v. 19).

Other psalms are similar in character. For example, Ps. 96 declares, "The LORD reigns" (v. 10), and affirms that "he comes to judge the earth" (v. 13). The present position of Christ seated at the right hand of the Father in Ps. 110:1 is considered temporary, for the day will come when "The LORD will extend your mighty scepter from Zion" (v. 2) and "will judge the nations" (v. 6).

III. The second coming in the Prophets. The Major Prophets take up the same theme of the coming of the Lord to reign. A familiar text is Isa. 9:6 – 7, "For to us a child is born, / to us a son is given, / and the government will be on his shoulders. /…Of the increase of his government and peace / there will be no end. / He will reign on David's throne / and over his kingdom." The rule of the MESSIAH on earth is described in ch. 11 as one of complete righteousness and justice, of tranquility in nature, with universal knowledge of the Lord. Isaiah prays for the coming of the Lord, "O that you would rend the heavens and come down, / that the mountains would tremble before you!" (64:1). Isaiah's great prophecy concludes in chs. 65 – 66 with a description of the reign of Christ on earth and the judgments that relate to it.

Jeremiah speaks of the results of the Lord's coming when the Son of David "will reign wisely / and do what is just and right in the land" (Jer. 23:5). The judgments and tribulation that precede the second coming are followed by the deliverance of Israel according to chs. 30 – 31, and many other prophecies in Jeremiah deal with the ultimate triumph of God during the reign of Christ. The presentation of the right to rule over the earth following his second coming is described in the vision of Dan. 7:13 – 14, where "one like a son of man" is given dominion over the entire earth and an everlasting kingdom.

One of the most specific references to the second coming in the OT is in Zech. 14:3 – 5. Here the Lord is described as fighting in defense of Israel, and the statement is made, "On that day his feet will stand on the Mount of Olives, east of Jerusalem, and the Mount of Olives will be split in two from east to west, forming a great valley, with half of the mountain moving north and half moving south." The revelation goes on to picture that "the LORD will be king over the whole earth. On that day there will be one LORD, and his name the only name" (14:9).

IV. General NT references. The NT doctrine of the second coming of Christ tends to dwell more upon the event than the total circumstances, and it is more detailed than that of the OT. Constant references to the second coming make this a major theme of the NT (Matt. 19:28; 23:39; 24:3—25:46; Mk. 13:24 – 37; Lk. 12:35 – 48; 17:22 – 37; 18:8; 21:25 – 28; Jn. 14:1 – 3; Acts 1:10 – 11; 15:16 – 18; Rom. 11:25 – 27; 1 Cor. 11:26; 15:51 – 58; 1 Thess. 4:13 – 18; 2 Thess. 1:7 – 10; 2 Pet. 3:3 – 4; Jude 14 – 15; Rev. 1:7 – 8; 2:25 – 28; 16:15; 19:11 – 21; 22:20). It is clear that the second coming is a dominant theme and one that colors the exposition of the entire NT.

V. The second coming in the Gospels. One of the most explicit passages relating to the second coming is found in the Olivet Discourse (Matt. 24 – 25; Mk. 13; Lk. 21:5 – 38). Matthew, which gives the most complete account, like OT prophecies relating to the second coming, describes the preceding great tribulation (Matt. 24:15 – 28). This will climax an age that includes war, famine, pestilence, earthquakes, and many persecutions.

Christ warned his disciples not to be deceived by premature, false reports that the Lord has returned. He describes the event in such language as to make the event unmistakable. The second advent is compared to lightning that comes from the E and shines to the W (Matt. 24:27). "Immediately after the distress of those days," he says, "the sun will be darkened, / and the moon will not give its light; / the stars will fall from the sky, / and the heavenly bodies will be shaken" (v. 29). The world will then see "the sign of the Son of Man…in the sky," that is, "They will see the Son of Man coming on the clouds of the sky, with power and great glory" (v. 30).

At this time there will be a loud trumpet call, and the angels will be commissioned to collect the elect of God in heaven and earth. The second coming is described as the time of the doom of the wicked in the earth. It is prophesied that "all the nations of the earth will mourn" (Matt. 24:30) as they see the second coming of Christ from heaven to the earth.

VI. The second coming in Jude. The epistle of JUDE presents the second coming as a time of judgment, quoting ENOCH, "See, the Lord is coming with thousands upon thousands of his holy ones to judge everyone, and to convict all the ungodly of all the ungodly acts they have done in the ungodly way, and of all the harsh words ungodly sinners have spoken against him" (Jude 14 – 15). As in Matt. 24, the second coming is declared in Jude to be a distinct event, one in which the holy angels will participate and culminating in dramatic judgment upon the wicked.

VII. The second coming in the Revelation. The book of Revelation, however, provides the most comprehensive prophecy of the second advent. The first 18 chapters of the book deal with that which precedes: the age of the churches (Rev. 2 – 3) and scenes in heaven and earth leading up to the second advent (chs. 4 – 18). Then follows a description of the second coming itself (ch. 19) and the epilogue (chs. 20 – 22, which deal with the millennium in ch. 20, and the new heaven and new earth in chs. 21 – 22). The obvious implication is that the second advent is the crowning event climaxing human history, paralleling in importance the first advent.

John opens his presentation of the second coming with the words, "I saw heaven standing open and there before me was a white horse, whose rider is called Faithful and True. With justice he judges and makes war" (Rev. 19:11). That he is none other than Christ himself is made clear from the titles, "The Word of God" (v. 13) and "King of kings and Lord of lords" (v. 16). His appearance is most awesome: "His eyes are like blazing fire, and on his head are many crowns" (v. 12). His robe is "dipped in blood" (v. 13), and he is followed by the "armies of heaven…riding on white horses and dressed in fine linen, white and clean" (v. 14). Out of the mouth of Christ "comes a sharp sword with which to strike down the nations," and it is predicted, "He will rule them with an iron scepter" (v. 15). His coming signals his intention to tread "the winepress of the fury of the wrath of God Almighty" (v. 15).

This awe-inspiring scene is attended by the invitation of the angel to the birds of heaven to eat the flesh of men and beasts slain in the great battle which follows. The armies of the world gathered in the Holy Land at that time in the final great world conflict are destroyed. The beast or world political leader, and the false prophet, the world religious leader, who had dominated the preceding period, are thrown alive in the LAKE OF FIRE (Rev. 19:19 – 20). The armies themselves are slain by the sword issuing from the mouth of the rider (v. 21). In what would naturally be considered subsequent action in ch. 20, SATAN is bound, the martyred dead of the preceding period are resurrected, judgment is given, and the 1,000-year reign of Christ follows (20:1 – 4). If Scripture is taken in its normal sense, it yields a dramatic picture of this tremendous event that will judge

wickedness and unbelief, deliver those trusting in the Lord, and inaugurate a kingdom of righteousness and peace on earth. The nonliteral view of the second advent as a present spiritual crisis, or as fulfilled for each individual at death, has never been considered an orthodox view. (However, for a different understanding of Rev. 20:1 – 4 and related events, see the articles on AMILLENNIALISM and POSTMILLENNIALISM. See also REVELATION, BOOK OF.)

VIII. The rapture of the church. In addition to major passages dealing with the second advent are prophecies of a rapture or catching up of believers in Christ to meet the Lord in the air. The coming of Christ for his own may have been mentioned by Christ in the upper room when he declared to his disciples, "In my Father's house are many rooms; if it were not so, I would have told you. I am going there to prepare a place for you. And if I go and prepare a place for you, I will come back and take you to be with me that you also may be where I am" (Jn. 14:2 – 3).

This simple revelation is later amplified by PAUL, who declares that, at the coming of Christ for his church, God will bring with him the souls of Christians who had died, in order that their bodies might be resurrected from the grave. The dramatic event is described with these words, "For the Lord himself will come down from heaven, with a loud command, with the voice of the archangel and with the trumpet call of God, and the dead in Christ will rise first. After that, we who are still alive and are left will be caught up together with them in the clouds to meet the Lord in the air. And so we will be with the Lord forever" (1 Thess. 4:16 – 17). In the passage that follows (5:1 – 11), this event is declared to be one that will come without warning to the unbelieving world, but one that believers in Christ should anticipate.

A parallel revelation of this event is given in 1 Cor. 15:51 – 58. Here it is plainly declared that all Christians will not die, but at the coming of the Lord all will be changed—the living given new bodies, and the dead in Christ resurrected (vv. 51 – 52). The new bodies that believers will receive are declared to be imperishable or immortal. According to 1 Jn. 3:2, they will be like the resurrection body of Christ and hence sinless. This hope of the coming of the Lord was held out as an imminent possibility to early Christians.

Because of certain similarities in describing the rapture and the second coming of Christ to the earth, probably the majority view, especially of amillennialists and postmillennialists, is that the rapture is a phase of the second coming of Christ and occurring at the same time. Many premillennialists, however, hold that the rapture occurs some years before the formal second advent to the earth. Usually a seven-year period, referred to in Dan. 9:27, in addition to certain other events, is placed between the rapture and the second coming itself. A compromise view held by relatively few interpreters is midtribulationism, which places the rapture forty-two months before the second advent, that is, before the great tribulation. Generally, interpreters distinguishing Israel and the church, and who interpret prophecy literally, tend toward pretribulationism. (For arguments "pro and con," see J. F. Walvoord, *The Rapture Question* [1957]; Alexander Reese, *The Approaching Advent of Christ: An Examination of the Teaching of J. N. Darby and His Followers* [1937]; George E. Ladd, *The Blessed Hope* [1956]; G. Archer et al., *The Rapture: Pre-, Mid-, or Post-tribulational?* [1984]; Bob [R. H.] Gundry, *First the Antichrist* [1997]; C. M. Pate and D. W. Kennard, *Deliverance Now and Not Yet: The New Testament and the Great Tribulation* [2003].)

The early church fathers interpreted Scripture as teaching the rapture as possible any moment. Because they mistakenly identified their sufferings as those of the great tribulation, they did not distinguish the rapture itself from the second advent to the earth. Pretribulationists emphasize the imminency and deny that the rapture and the second advent are the same event. Modern

posttribulationists usually deny imminency in the sense of daily expectation, and combine the rapture and the second advent to the earth as one event.

IX. Conclusion. Within orthodoxy, regardless of details of the time of prophetic fulfillment, a personal, visible, bodily, second coming of Jesus Christ has been considered the normal interpretation of prophecy from the 1st cent., and its denial has never been the orthodox interpretation. Generally speaking, those who affirm a literal first advent, a virgin birth of Christ, and a literal death and resurrection of Christ also hold to a literal second advent. (See further R. Anderson, *The Coming Prince* [1915]; W. E. Blackstone, *Jesus Is Coming* [1917]; L. Berkhof, *The Second Coming of Christ* [1953]; R. Pache, *The Return of Jesus Christ* [1955]; J. F. Walvoord, *The Millennial Kingdom* [1959], 263 – 75; J. D. Pentecost, *Things to Come* [1958], 370 – 426; G. C. Berkouwer, *The Return of Christ* [1972]; A. A. Hoekema, *The Bible and the Future* [1979], 109 – 238; W. Grudem, *Systematic Theology: An Introduction to Christian Doctrine* [1994], ch. 54.)

<div align="right">J. F. WALVOORD</div>

second death. See DEATH, SECOND.

Second District, Second Quarter. The district of JERUSALEM in which HULDAH the prophetess lived is referred to as the *mišneh H5467* (2 Ki. 22:14=2 Chr. 34:22). This Hebrew term, which means "second," could simply be transliterated as "Mishneh" (cf. NJPS), but most versions prefer to translate it with such renderings as "Second Quarter" (NRSV), "Second District" (NIV), and "New Quarter" (TNIV). (The KJV understood it to mean "college," apparently following the TARGUM, which has *byt-ᵓlpnᵓ*, "house of instruction.") This area is mentioned also in a postexilic prophecy that speaks of a cry going up from the FISH GATE and wailing from the *mišneh* (Zeph. 1:10 [NIV and TNIV, "New Quarter"]; here the KJV has "second [gate]"). It is also possible that this part of Jerusalem is mentioned in Neh. 11:9, which the NIV translates, "Judah son of Hassenuah was over the Second District [TNIV, 'New Quarter'] of the city [ᶜal-haᶜîr mišneh]" (most versions, however, understand the text to mean, "…was second over the city"). In addition, some scholars emend Neh. 3:6 to read "Mishneh" instead of "Jeshanah" (see discussion under OLD GATE).

The name evidently referred to an expansion of Jerusalem toward the W (opposite the Tyropoeon Valley) that probably took place during the reign of HEZEKIAH. Archaeological excavations during the 1970s uncovered a portion of the BROAD WALL that may have protected this new area, as well as evidence of Israelite occupation there c. 700 B.C. (cf. N. Avigad, *Discovering Jerusalem* [1983], 46 – 54). As a result of this expansion, the city grew from approximately 35 acres during the time of SOLOMON to at least 120 acres. See also JERUSALEM II.C.3.

Huldah the prophetess, who lived in the Second District of Jerusalem, was honored with a pyramid-shaped monument near the S steps of Herod's temple complex.

Second Temple Period. A label commonly employed (and preferred by many contemporary scholars) to designate the interval of time that has traditionally been called "intertestamental," that is, from the rebuilding of the Jerusalem temple after the EXILE (c. 520 B.C.) until its destruction by the Romans (A.D. 70). Thus this period begins near the end of the OT era and extends to NT times. See MACCABEE; HASMONEAN; RESTORATION; TEMPLE, JERUSALEM VI.

secret. See MESSIANIC SECRET; MYSTERY.

secretary. See AMANUENSIS; SCRIBE.

sect. This English term, referring to a dissenting religious group or faction, is used in Bible versions to render the Greek term *hairesis G146*, which literally means "a choosing," but by extension, "that which is taken or chosen" in a religious or political sense, thus a party or sect. Although the English term HERESY derives from this Greek word, the latter does not have that later and specialized ecclesiastical sense, but it simply refers to a body of people distinguishing themselves from others by choice (however, see 2 Pet. 2:1 NIV).

On three occasions in the NT, the term is used in reference to the Christian movement, and with a suggestion of reproach. In PAUL'S trial before FELIX, TERTULLUS charged Paul with being "a ringleader of the Nazarene sect" (Acts 24:5). In reply, the apostle called Christianity "the Way, which they call a sect" (24:14). The Jews in Rome said to Paul, "we know that people everywhere are talking against this sect" (28:22). Elsewhere, the term is applied to the SADDUCEES (5:17) and to the PHARISEES (15:5; 26:5). In his epistles, Paul used it in the negative sense of "division, dissension" (1 Cor. 11:19; Gal. 5:20), while PETER possibly meant by it something like "[false] opinion" (2 Pet. 2:1).

G. F. FUNDERBURK

Secu see'ky*oo* (מֶשׂכּוֹ *H8497,* perhaps "lookout point"). KJV Sechu; TNIV Seku. A place known for its great cistern and apparently located between GIBEAH and RAMAH (#3); it was visited by SAUL when seeking information to search out DAVID and SAMUEL (1 Sam. 19:22). The proposed identification with Khirbet Shuweikeh, 3 mi. N of Ramah (cf. C. R. Conder and C. Warren, *The Survey of Western Palestine* [1884], 52), has not been accepted, so the location of Secu is unknown. Because the SEPTUAGINT (as represented by CODEX VATICANUS and other Greek MSS, though with orthographic variations) transliterates the name as *Sephi* (cf. also the Syr. Peshitta, *swp⁾*, "end"), some scholars emend the MT to read the noun *šĕepî H9155,* meaning probably "bare height" or "bare plain" (e.g., P. K. McCarter, Jr., *I Samuel*, AB 8 [1980], 328). A few Greek MSS (including CODEX ALEXANDRINUS) and the VULGATE have SOCOH, but this reading is almost certainly secondary.

A. K. HELMBOLD

Secundus si-koon'duhs (Σεκοῦνδος *G4941* [or Sekoundoß], from Lat. *Secundus*, "second"). A Thessalonian Christian who with others accompanied PA U L through GREECE on his return to ANTIOCH OF SYRIA from his third missionary journey. If he was one of the delegates entrusted with the offerings of the churches to the Jewish Christians, he may have accompanied Paul to Jerusalem (Acts 20:4; Rom. 15:25 – 26; 2 Cor. 8:23). See ARISTARCHUS.

A. M. ROSS

Sedecias sed'uh-k*i*'uhs. KJV Apoc. form of ZEDEKIAH (Bar. 1:1, 8).

Sedrach, Apocalypse of sed'rak. A pseudepigraphic Greek document that may have had a Jewish origin some time between the 2nd and 5th centuries A.D., though subsequently it was reworked by Christians. Its final form could be as late as the 11th cent., and it survives in only one 15th-cent. MS. Because the *Apocalypse* has clear points of contact with *4 Ezra* (see ESDRAS, SECOND), it is generally agreed that the name Sedrach is a corruption of Esdras. The work begins with these words, "A sermon by the holy and blessed Sedrach on love, repentance, orthodox Christians, and the second coming of our Lord Jesus Christ." After the sermon, Sedrach is taken to heaven and he discusses with God the problem of evil in the world. God then directs his Son to take Sedrach's soul to paradise, but not before Sedrach persuades God to reduce the time required for repentance. The document places much emphasis on divine love and compassion. (English trans. in *OTP*, 1:605 – 13.)

seduction. See CRIMES AND PUNISHMENTS I.B.4.

seed. The primary biblical words for "seed" (Heb. *zera⁽ H2446* and Gk. *sperma G5065*) are used to indicate both agricultural and human seed, the latter both in a narrow physical sense and as a description of the descendants of a common ancestor. (Other Gk. terms for agricultural seed are *sporos G5078* and *kokkos G3133*.)

Seedtime to the farmer in Palestine occurred in late October or November. After the dry, hot summer it was impossible to plow and plant until the early RAINS had softened the ground and made it workable. Sowing then took place; the Israelite was commanded not to mix his seed in any field or vineyard, but to plant only one crop (Lev. 19:19; Deut. 22:9), a stricture parallel to that regarding the mixture of human seed by intermarriage with other nations. See AGRICULTURE; CALENDAR; SEASON.

The main types of seed and crop grown by the Israelite farmer were WHEAT, BARLEY, and RYE, as well as a number of vegetables. Of these, the barley might be expected to mature first, roughly ten weeks after seedtime, or about the time of the PASSOVER. Maturing of the other crops occurred thereafter, the wheat approximately six weeks after the barley.

Our Lord gave the word *seed* a new dimension of meaning when he said "the seed is the word of God" (Lk. 8:11). Thereafter the NT combines the agricultural and physical concepts of the seed in its presentation of spiritual truth; the word of God is sown, taking root in the hearts of men and women, who are then born as children into the family of God (1 Pet. 1:23) and become a spiritual seed or nation.

<div align="right">J. H. PATERSON</div>

seer. See PROPHETS AND PROPHECY.

Segub see'guhb (שְׂגוּב H8437, possibly "[God] is exalted"). (1) The youngest son of HIEL of BETHEL. During AHAB'S reign, Hiel rebuilt JERICHO "at the cost of" his sons ABIRAM and Segub (1 Ki. 16:34). The TARGUM indicates that Hiel actually killed his sons, suggesting that he offered them as "foundation" or "threshold" sacrifices, a rite apparently practiced by the pagans of the area (cf. John Gray, *I and II Kings: A Commentary*, 2nd ed. [1970], 370). Such sacrifices are attested at GEZER, where three skeletons were found under a foundation from c. 1800 B.C. (cf. *BA* 30 [1967]: 56). Other scholars question this theory (cf. J. A. Montgomery, *A Critical and Exegetical Commentary on the Book of Kings*, ICC [1951], 287 – 88). R. de Vaux (*Ancient Israel* [1961], 441 – 42) says that if this incident was a foundation sacrifice, it was probably due to Phoenician influence. In any case, the writer of Kings considered the death of Hiel's sons as a fulfillment of JOSHUA'S curse upon anyone who tried to rebuild Jericho (Josh. 6:26).

(2) Son of HEZRON and descendant of JUDAH (1 Chr. 2:21 – 22). Three of Hezron's sons had been mentioned earlier in the genealogy (v. 9). The reintroduction of Hezron in v. 21 is unusual, apparently motivated by the desire to note a connection between the tribes of Judah and MANASSEH: Segub was born when Hezron, at sixty years of age, married the daughter of MAKIR (son of GILEAD); and Segub's son, JAIR, became a powerful Manassite. It has been suggested that this portion of the genealogy reflects a Judahite claim on the twenty-three Gileadite towns mentioned in v. 22 (cf. *ABD*, 5:1068; for further discussion, see G. N. Knoppers, *I Chronicles 1 – 9*, AB 12 [2004], 305 – 8).

<div align="right">A. K. HELMBOLD</div>

Seir see'uhr (שֵׂעִיר H8541, "hairy, shaggy," possibly indicating a thicket or wooded area). Aside from one reference to a Mount Seir in JUDAH N of KESALON (*śēʿîr H8542*, Josh. 15:10, prob. a ridge W of KIRIATH JEARIM) and two references to a HORITE whose descendants were chieftains in EDOM (*śēeʿîr H8543*, Gen. 36:20 – 21; 1 Chr. 1:38), all other occurrences of the name Seir, including "Mount Seir" (Deut. 1:22; 2 Chr. 20:10, 22 – 23; Ezek. 35:2 – 3, 7, 15) and "land of Seir" (Gen. 32:3; 36:30), designate the mountain range of Edom lying E of the rift valley known as the ARABAH and roughly parallel to it.

The range extends from Wadi ARNON southward to the vicinity of modern AQABAH. PETRA and Mount HOR are among its chief features. The rugged cliffs of this range mark the W boundary of Edom while its eastern foothills extend as far as Edom's E boundary. Its height varies from roughly 600 to 6,000 ft. above sea level. The region was important to the Hebrews because of its command of the

routes to EZION GEBER.

This area apparently derived its name from "Seir the Horite," founder of a line of rulers who lived there (Gen. 36:20 – 30). Subsequently, the descendants of ESAU (Edom) dispossessed and destroyed the Horites in a manner comparable to the Hebrew conquest of Canaan (Deut. 2:12). The precise geographical distinction between Seir and Edom is a matter of some dispute (see *ABD*, 5:1072 – 73), but after the Edomite conquest the two names became virtual synonyms. At the time of HEZEKIAH, a group of Simeonites massacred a colony of Amalekites somewhere in the range and settled the site themselves (1 Chr. 4:42 – 43).

According to some scholars, various texts (Deut. 1:2, 44; 33:2; Josh. 11:17; 12:7; Jdg. 5:4) suggest that "Seir" also applied to a mountainous territory W of the Arabah. Most of these passages, however, either use geographical terms whose precise meaning is uncertain or are poetic (and poetry often capitalizes on ambiguity). N. Glueck (in *HUCA* 11 [1936]: 141 – 57) and others have nevertheless concluded that while the term originally denoted land E of the Arabah, subsequently, as the Edomites spread westward in the postexilic period, the name "Seir" was extended to their new holdings also. (See further L. E. Axelsson, *The Lord Rose up from Seir: Studies in the History and Traditions of the Negev and Southern Judah* [1987].)

A. BOWLING

Seirah see'uh-ruh (שְׂעִירָה *H8545*, "female goat" or "wooded" [see SEIR]). KJV Seirath. A town or wooded region, apparently in the hill country of Ephraim W of JERICHO, where EHUD sought refuge after killing EGLON (Jdg. 3:26; cf. v. 27). No suitable identification has been offered. Some have thought that the term simply designates a topographical feature in the Jordan Valley; if so, the sense of the text may be that Ehud escaped to "the woody hills" of Ephraim (cf. Josh. 17:15, 18; J. Simons, *The Geographical and Topographical Texts of the Old Testament* [1959], 288, §545). See EPHRAIM, FOREST OF; EPHRAIM, HILL COUNTRY OF.

A. BOWLING

Seirath see'uh-rath. KJV form of SEIRAH.

Sekakah si-kay'kuh. TNIV form of SEKAKAH.
Seku see'ky*oo*. TNIV form of SECU.

Sela see'luh (סֶלַע *H6153*, "rock, cliff"). A fortified city that served as the capital of ancient EDOM; early in the 8th cent. B.C., King AMAZIAH of Judah captured it and renamed it JOKTHEEL (2 Ki. 14:7). At least one prophecy refers to this city (Isa. 42:11), but it is uncertain whether it is named elsewhere in the Bible. The name Sela is possibly applied once to a site in AMORITE territory that is otherwise unidentified (Jdg. 1:36). In several passages, it is disputed whether the term should be interpreted as a place name or as the common word for "rock" (2 Chr. 25:12 [NIV, "a cliff"]; Isa. 16:1 [where the context is MOAB rather than Edom]; and two texts that describe Edom as dwelling "in the clefts of the rock," Jer. 49:16; Obad. 3).

Ancient Sela has commonly been thought to be the same as PETRA, the later capital of the NABA-TEANS. There, on a rocky peak known as Umm el-Bayyara, excavations have uncovered Edomite remains dated to the 7th cent. B.C. (cf. W. A. Morton in *BA* 19 [1956]: 26 – 36). This site, however, lies about 50 mi. SSE of the DEAD SEA, and some scholars prefer to identify Sela with

modern es-Sela< (almost 30 mi. closer to the Dead Sea). In the latter location, archaeologists have found evidence of a fortified settlement dating as far back as the 9th cent. (See further S. Hart in *PEQ* 118 [1986]: 91 – 95.)

selah see'luh. See HEBREW POETRY IV; PSALMS, BOOK OF, VII.A.2.

Sela Hammahlekoth see'luh-huh-mah'luh-koth (סֶלַע הַמַּחְלְקוֹת *H6154*, possibly "rock of divisions" or "slippery rock"). A well-known crag in the Desert of MAON where SAUL almost captured DAVID (1 Sam. 23:28; cf. v. 25). If the second element of the name is the noun *maḥălōqet H4713* (from *hālaq H2745*, "to divide"), the rock may have been so named because it seemed to mark the parting of the ways between these two men (cf. NJPS, "Rock of Separation"). Others derive the noun from a different verb meaning "to be smooth, slippery" (ḥālaq *H2744*), perhaps suggesting that David was able to "slip away" from Saul (cf. NRSV, "Rock of Escape"). It is also possible that the crag was originally known as Slippery Rock simply because of its physical features (like *hāhār heḥālāq,* "the Bare Mountain," Josh. 11:17), and that it took on additional significance after David took refuge there (cf. P. K. McCarter, Jr., *I Samuel,* AB 8 [1980], 379). The location of Sela Hammahlekoth is unknown, although some have proposed Wadi el-Malaqi, some 12 mi. ESE of HEBRON. The popular idea that it may be the rock later known as MASADA does not take into account that Masada is too distant from Maon to be identified with the biblical site.

Seled see'lid (סֶלֶד *H6135,* possibly from סָלַד *H6134,* "to jump [for joy]"). Son of Nadab and descendant of JUDAH through JERAHMEEL; the text notes that he had no children (1 Chr. 2:30).

Selemia sel'uh-m*i*'uh. One of five scribes trained to "write rapidly" and commissioned to record the apocalyptic vision of EZRA on "many writing tablets" (2 Esd. 14:24).

Selemias sel'uh-m*i*'uhs. KJV Apoc. form of SHELEMIAH (1 Esd. 9:34).

Seleucia si-l*oo*'shuh (Σελεύκεια *G4942).* A city on the coast of SYRIA in the NE corner of the Mediterranean, some 5 mi. N of the mouth of the ORONTES River. Antioch, the capital of Syria (see ANTIOCH OF SYRIA), royal seat of the SELEUCID kings, was a few miles inland, near the point where the Orontes, after its northern course between the Lebanon ranges, turns sharply W to the sea.

The grave deforestation of the Lebanon ranges, which began thirteen centuries before Christ, when the Phoenician occupants of the coastal strip became aware that there was an international market for CEDAR timber, produced a problem of erosion that has not been adequately solved. Hence the heavy burden of eroded soil carried to the sea by the Orontes. Because of this erosion, the construction of Seleucia's artificial harbor somewhat N of the mouth of the Orontes proved to be wise. It was formed, according to the visible remains, of two stone jetties of which the southern one took a wider sweep and overlapped the northern, thus giving an entrance sheltered from the prevailing S wind and blocking the northward drift of the Orontes silt.

Even so, the silt deposited along the coast by the outflow of the river ultimately filled and choked Seleucia's outlet to the sea. The site of the harbor today is a damp flat, built of alluvial deposits, in which a few fragments of the harbor masonry can be distinguished. Seleucia, designed to serve as a port for Antioch, was one of nine cities which bore the name of SELEUCUS, the first ruler of

the dynasty which ruled Syria and adjacent territories from the beginning of the 3rd cent. B.C. until the Romans assumed control of the eastern Mediterranean two and a half centuries later.

One of the most astonishing phenomena of history was the transformation of the political pattern of the E Mediterranean by the rapid conquests of ALEXANDER THE GREAT and the partition of his subjugated territories by the Diadochi (Successors), as his generals who carved themselves kingdoms were called. One of them, Seleucus, boldly seized control of the northern central satrapies of Alexander's empire and took the title Nicator. He founded the Seleucid kingdom of Syria in 312 B.C., and in 301 he built the port which bore his name. Seleucus and ANTIOCHUS were both common Seleucid names. This accounts for the various Seleucias and Antiochs that are scattered over the map of the Hellenistic kingdom.

Seleucia.

The Syrian Seleucia was known as Seleucia Pieria, to distinguish it from the similarly named foundations in MESOPOTAMIA and in the neighboring region of CILICIA. The appended adjective Pieria preserves in all probability the name of an existing Phoenician port, overlaid by Seleucus's major foundation. The Syrian monarch intended his port to be a strong fortress guarding one of the chief approaches to his kingdom.

For all its strength, natural and engineered, Seleucia was captured about a half century later by PTOLEMY III Euergetes, who launched an attack on Syria, probably from CYPRUS as his base (1 Macc. 11:8). Lacking the compactness of Ptolemaic Egypt, Syria found it difficult to control the various territories and tortuous frontiers of her far-flung complex of heterogeneous peoples and provinces and lived in long rivalry with her fellow successor state of Egypt, but she suffered no setback more serious than this damaging inroad into the heart of her kingdom by the third Ptolemy. Seleucia remained in Egyptian hands, a nearby menace to the security of Antioch, for over thirty years. It was recaptured by Antiochus the Great in 219 B.C., but again fell briefly into the hands of the Ptolemies in 146 B.C. (For a lucid description of the port's military importance and of its topography, see the

account of Antiochus's siege of Seleucia in Polybius, *Hist.* 5.59 – 60.)

Antiochus's recovery of Seleucia from Syria's Egyptian rival was part of the program of that military king to recapture and consolidate all the varied regions of the Seleucid kingdom, and it was obvious that he would restore Seleucia first of all. He regarded the port as a symbol of all his soldierly success, and the story is told that in 205 B.C. he entered Seleucia in triumph, like a second Alexander, with a train of elephants and masses of plunder. It was probably on this festive occasion that the monarch assumed the ancient royal title of the Achaemenid (Persian) rulers and called himself "the great king." His common appellation was "Antiochus the Great." Under his rule Seleucia was greatly beautified and its fortifications strengthened to enable the port more effectively to fulfill its major purpose and provide a bastion of defense for Antioch, the capital.

It was the far campaigning of Antiochus the Great, in his efforts to regain control of all areas once held by Seleucid Syria, that brought him into direct confrontation with the Romans. The latter, awakened to their international obligations by the Second Punic War, were realizing that their quest for a stable frontier must extend to the Hellenistic kingdoms of the E end of the Mediterranean. Antiochus's great political mistake was his failure to recognize the emerging power of ROME and her vital interest in these eastern regions. He thrust his conquests too far to the W and was decisively defeated by the Romans. By a treaty signed at Apamea on the Orontes in 188 B.C., the Seleucid kingdom of Syria ceased to be a great power in the Mediterranean world, but retained her place as a continental power in the ANE. Seleucia was still a major fortress in Syrian hands. Rome, after all, was not seeking conquests so much as a stable eastern wall.
The area of Syrian Seleucia with remains from its harbor.

It was not till well over a century later that the Romans appeared in power in the heartlands of the Syrian empire. Mithridates of PONTUS and Tigranes of ARMENIA looked with hostility and suspicion on the consolidation of Roman power in ASIA MINOR. It was because of a general breakdown of order in the E Mediterranean and its associated territories that the Roman senate invested the great soldier POMPEY with special powers in 66 B.C. to deal with the growing chaos of the area and to restore peace.

Pompey's three years in the E were a remarkable feat of soldiering and administration. When he arrived, he found that an Armenian and Pontic invasion had reached as far as Jerusalem. Seleucia,

thanks to the strengthened fortifications of a century before, was still intact in the rear of the invading armies. It was for this reason, after his rapid recovery of all territories W of the EUPHRATES, that Pompey bestowed on Seleucia the status of "free city." In his organization of the wide arc of eastern territories from Asia Minor to Egypt, Pompey eliminated what was left of the Seleucid kingdom. It had long been in decline, weakened by domestic and dynastic strife, and eroded along all its borders by progressive loss of control. Recognizing that fact, Pompey formed Syria into a Roman province. Seleucia remained a free town within the provincial borders, and an essential port of entry for the distant power that had assumed control. The port was further fortified to act as CAESAREA did on the same difficult coast—as a harbor, a base, and a bridgehead.

With the coming of Roman domination and the Roman peace to an area that had been rent and enfeebled by chaos, weak government, and chronic war, Seleucia began a century of significant development. The maritime activity of the port must have been great. It was not only a place of exit and entry for an important Roman province, but also a staging post for ships in an age when navigation favored coastal sailing. It was from Seleucia that PAUL and BARNABAS sailed for neighboring Cyprus (Acts 13:4) on the first Christian missionary journey. They undoubtedly returned that way, though no specific reference is made to the fact (14:26); readers would have taken for granted that Seleucia was the gateway to Antioch. It is unlikely that they sailed up the lower reach of the Orontes to Antioch itself, although for smaller ships this was navigationally possible.

It is also likely that it was from Seleucia, in Paul's second tour abroad, that he and SILAS set sail (Acts 15:40 – 41; it is an odd fact that, in the sea beyond the silt-covered remains of Seleucia's harbor works, there are two fragments of the old masonry which are known as Paul and Barnabas). Barnabas and Mark no doubt used the same departure point as well (15:39). Cyprus is visible on a clear day. The current on the coast sets in a northeasterly direction, but a good offshore wind would counteract its thrust and land the travelers in Cyprus in less than a day. Half a century later, IGNATIUS, bishop of Antioch, would likely have passed through Seleucia on his way to eventual martyrdom in Rome.

Seleucia retained its status as a free city, and this dignity was confirmed by VESPASIAN in A.D. 70. All through the 1st cent., Seleucia was the base of Rome's Syrian fleet. There were continual Roman attempts in imperial times to improve a not very satisfactory port, and there are traces of Roman engineering. Chief among these remains is a vast tunnel some 200 yards long, designed to direct some of the downflow from the hills away from Seleucia's harbor works. The problem of erosion and silting was evidently a serious concern. The tunnel bears the inscribed names of both Vespasian and his son TITUS. The inference might be that Seleucia had assumed large importance as a base and supply port during the Great Rebellion in Judea. It had a clear advantage over Caesarea for this purpose, because of its relative remoteness from the scene of war and guerrilla harassment.

Reverting to notable travelers moving through the port of Seleucia, mention must be made of the Neopythagorean sage, Apollonius of Tyana (a town in CAPPADOCIA). Born about the beginning of the Christian era, and surviving almost to the end of the century, this teacher and pagan missionary matched his contemporary Paul in the length of his journeys and in his zeal for a moral way of life. Philostratus wrote in his *Life of Apollonius* (3.58) that he "went down to the sea at Seleucia, and finding a ship sailed to Cyprus." The journey must have almost coincided with that of Paul and Barnabas. Like Paul, the sage wrote letters to various groups, and two of them are addressed to the councillors of Seleucia, who had asked him to visit them. He regarded the Syrian city as "hospitable to man and devoted to the gods" (*Epistles of Apollonius* 12 – 13).

The city at this time must have been a splendid place with a wealth of temples and an

amphitheater cut out of a cliff, which may still be seen. The great road that linked Seleucia with Antioch may also be traced here and there, and the lofty ruin of the market gate through the city wall survives. On the steep lower slopes of Mousa Dagh, there are great man-made caverns which, it is suggested, were warehouses in the days of Seleucia's commercial prosperity and sea-borne trade.

Seleucia presents a strong challenge to modern archaeology. The University of Princeton has been interested in the whole area, and in 1932 began conducting extensive excavations at neighboring Antioch. For two years before the long interruption of the Second World War, digging was done at Seleucia. Some houses, the market gate, and a Doric temple were cleared, also a 5th-cent. memorial Christian church, the Martyrion, but excavation of the whole city calls for a major effort on the part of the Lebanese government that controls the site. (See further J. D. Grainger, *The Cities of Seleukid Syria* [1989].)

E. M. BLAIKLOCK

Seleucid si-l*oo*'sid. An adjective derived from the name SELEUCUS. As a noun, *Seleucid* refers to a member of the dynasty founded by Seleucus I. On the Seleucid empire, see also ANTIOCHUS; ISRAEL, HISTORY OF XIII-XIV; MACCABEE.

Seleucus si-l*oo*'kuhs (Σέλευκος). The name of six kings of SYRIA, four of whom are of special significance.

(1) Seleucus I, Nicator (i.e., "Conqueror," c. 358 – 280 B.C.). The son of a Macedonian noble, he was a close associate of ALEXANDER THE GREAT in his eastern campaigns. He became the ruler of Syria and Babylonia after Alexander's death. In the wars of the Diadochi ("Successors"), he was Perdiccas's chief supporter in the early struggle, but later was a party to his demise. In 316 he lost his domains and was forced to flee to Egypt. With the help of PTOLEMY I he regained Babylon, Media, and Susiana. This marked the beginning of the Seleucid dynasty, which lasted until 65 B.C. The book of DANIEL apparently refers to Seleucus when it says that after the "king of the South" (Ptolemy) becomes strong, "one of his commanders will become even stronger than he and will rule his own kingdom with great power" (Dan. 11:5).

Silver coin with the image of Seleucus I.

Seleucus was a separatist with Lysimachus, Ptolemy, and Cassander against Antigonus at Ipsus in 301. As a result of the victory, he gained control of Syria and CILICIA. In 281 he won ASIA MINOR from Lysimachus. He founded a number of famous cities, among them ANTIOCH OF SYRIA on the ORONTES, several towns by the name of SELEUCIA, and EDESSA. He settled many Jews in them and conferred upon them the rights of citizenship (Jos. *Ant.* 12.3.1). He founded his new capital at Antioch and married the daughter of Demetrius, but he did not repudiate his Bactrian wife Apama. Basically Western in outlook, he aspired to gain the throne of MACEDONIA and reestablish a unified empire, but he was murdered in the attempt by Ptolemy II.

(2) Seleucus II, Callinius (i.e., "Glorious Victor," 265 – 226 B.C.). The eldest son of Antiochus II and father of Antiochus III. See ANTIOCHUS. Reference seems to be made in Dan. 11:6 – 9 to the way in which he gained the throne and to subsequent events. His mother was Laodice, whom his father put aside to marry Berenice, daughter of Ptolemy II and sister of Ptolemy III. After this marriage, Antiochus II returned to Laodice, only to be poisoned by her. In 247 she named her son Seleucus II king. Berenice then asked her brother to come to her aid and support her infant son's claim to the throne. The Third Syrian War followed, in which Syria and Babylonia were plundered. As a result of the weakness of the empire, Bactria and Parthia were also lost. Seleucus's younger brother, Antiochus Hierax, supported by their mother, temporarily took command of Asia Minor. Seleucus then died as the result of a riding accident. It remained for his son Antiochus the Great to restore the kingdom.

(3) Seleucus III, Soter (i.e., "Savior," c. 245 – 223). He and his brother and successor Antiochus the Great are evidently referred to in Dan. 11:10 as the sons of Seleucus II. He reigned for only two years, and died mysteriously on a campaign against Attalus of Pergamum to regain Asia Minor.

(4) Seleucus IV, Philopator ("Father-loving," c. 218 – 175 B.C.). The son of Antiochus the

Great and brother of Antiochus IV Epiphanes, he maintained a diminished empire by keeping scrupulously to the terms of the Peace of Apamea with Rome. This forbade further adventures in the W under penalty of heavy fine. He remained on friendly terms with the other two independent powers of the E, Egypt and Macedonia. He was assassinated by a plot of Heliodorus, his chief minister, and was succeeded by his brother. Seleucus IV is probably mentioned in Dan. 11:20 as the one who "will send out a tax collector to maintain the royal splendor." Although he undertook a large share of the expenses of the Jerusalem TEMPLE early in his reign (187 – 175), he later attempted to carry off its treasury through Heliodorus and Simon, a Jewish officer, perhaps because he owed a great sum of money to Rome (2 Macc. 3:4).

A. RUPPRECHT

self-control. One of the basic Christian virtues. It is the mastery of self, the exercise of restraint, especially in sensual pleasures. Self-control or temperance is insurance against self-indulgence in immorality, drunkenness, brawling, gossiping, conceit, and greed. In temperance one foregoes excesses in acceptable pursuits, such as eating, drinking, and conversation.

I. Lack of self-control. It is stated in an old proverb, "Like a city whose walls are broken through / is a person who lacks self-control" (Prov. 25:28 TNIV). Self-control fortifies the inner person. It builds a wall of defense against destructive forces of evil. The pathetic tragedy of the physically strong SAMSON was the result of his intemperance in sensual desires. His sexual love for ungodly women decreed his doom (Jdg. 14:1 – 2). Israel's beloved king, DAVID, reaped tragic results from lack of self-control in sexual pleasures (2 Sam. 11:1 – 5); and so did his son SOLOMON (1 Ki. 11:1 – 4). PAUL was keenly aware of the threat of sexual lust. Consequently, in writing to the church in the large, wicked city of CORINTH, he gave specific instructions on this subject, particularly as related to MARRIAGE. He urged self-control (Gk. *akrasia G202*) as a safeguard against immorality (1 Cor. 7:5).

II. Practice of self-control. Good examples and wise teachings are made available to Christians in the NT. Both JOHN THE BAPTIST and JESUS CHRIST practiced self-control, even though their enemies accused John of having a demon and Jesus of being "a glutton and a drunkard" (Lk. 7:33 – 34). John followed a strict course of self-control and abstinence, similar in some respects to that of the ESSENES. Though Jesus was sociable and enjoyed feasting with friends, he set the perfect example of self-control. He enjoyed the blessings of nature and humanity, but abstained from sensual pleasures.

Self-control, like other Christian virtues, is not easy to maintain. It requires exercise of will and the aid of the HOLY SPIRIT. Even the strong pagan may find himself lacking in self-control. Paul alarmed the Roman governor FELIX as he "discoursed on righteousness, self-control [*enkrateia G1602*] and the judgment to come" (Acts 24:25). And, as he wrote "to the unmarried and the widows" in the Corinthian church about SEX matters, he was quite aware of how difficult it was to exercise self-control (1 Cor. 7:8 – 9). Young churches planted in the midst of paganism throughout the Roman empire had a hard struggle against worldliness. CRETE was one of the worst localities for "liars, evil brutes, lazy gluttons" (Tit. 1:12), and other reprobates. With this kind of environment, Paul realized the demands that would be made on church leaders. Consequently, he charged TITUS to appoint bishops (overseers) with strong Christian qualities. Such an overseer "must be hospitable, one who loves what is good, who is self-controlled [*sōphrōn G5409*], upright, holy and disciplined" (v. 8).

Self-control is essential for success in the pursuit of any worthy goal. "Athletes exercise self-control [*enkrateuomai G1603*] in all things; they do it to receive a perishable wreath, but we an imperishable one" (1 Cor. 9:25 NRSV). Paul then asserted that he, like the athlete, constantly subdued his body for the Christian ministry. Self-control was constantly in Jesus' teaching, as with reference to murder, sexual lust, swearing, retaliation, hypocrisy, greed, and anxiety (Matt. 5:21—6:34). Paul, likewise, catalogued sources of temptation (Gal. 5:19 – 21) and advised how to combat them: "But the fruit of the Spirit is love, joy, peace, patience, kindness, goodness, faithfulness, gentleness and self-control. Against such things there is no law" (vv. 22 – 23; cf. 2 Pet. 1:5 – 7). With reference to the Christian ministry, Paul encouraged Timothy "to fan into flame the gift of God, which is in you through the laying on of my hands. For God did not give us a spirit of timidity, but a spirit of power, of love and of self-discipline [*sōphronismos G5406*]" (2 Tim. 1:6 – 7).

<div align="right">G. B. FUNDERBURK</div>

self-righteousness. Confidence in one's own RIGHTEOUSNESS. In popular usage, a self-righteous person is one who views himself or herself as morally upright in contrast to others; it often implies adherence to the letter of legal requirements (legalism) without regard to their spirit. In a theological sense, the term *self-righteousness* is applied to the belief, attitude, or behavior of persons who seek God's acceptance by their own efforts, that is, by doing good works and keeping the divine statutes.

Although the term *self-righteousness* itself does not appear in the Bible, the concept is clearly indicated in various passages. For example, Luke informs us that Jesus related the parable of the PHARISEE and the TAX COLLECTOR to "some who were confident of their own righteousness and looked down on everybody else" (Lk. 18:8). Similarly, Paul says of the unsaved Israelites that "they did not know the righteousness that comes from God and sought to establish their own" (Rom. 10:1 – 3). The apostle further testifies that he wishes to gain Christ, "not having a righteousness of my own that comes from the law, but that which is through faith in Christ" (Phil. 3:9). In a more distant way this kind of "self-righteousness" is the burden of ELIHU'S complaint against JOB (cf. Job 32:2; 33:8 – 12).

Often the concept has moral implications. Jesus refers to the Pharisees as "the righteous" in contrast to tax-collectors and sinners (Mk. 2:15 – 17 and parallels), but he clearly implies that "the righteous" were not really so: "unless your righteousness surpasses that of the Pharisees and the teachers of the law, you will certainly not enter the kingdom of heaven" (Matt. 5:20). Their "righteousness" was external, with an emphasis on conformity and quantity (cf. 23:1 – 36, esp. v. 28: "on the outside you appear to people as righteous but on the inside you are full of hypocrisy and wickedness"); the righteousness Jesus called for was internal, with an emphasis on quality (cf. 5:21 –

48), although it also involved action (cf. 7:21, 24; 25:31 – 40). (Of course, one must not infer that Jesus' condemnation of the Pharisees and scribes was universal in character, as though none of them relied on God for their true righteousness. See PHARISEE V.)

Thus the self-righteous person is righteous neither in the religious nor the moral sense. Those who trust in themselves do not have right standing with God through self-effort or adherence to the law; nor are they morally upright, since only their external conduct is affected and not their attitudes. See also JUSTIFICATION.

G. D. FEE

selvedge. This English term, referring to the border of a fabric, is used by the KJV twice to render Hebrew *qāṣâ H7896*, which literally means "end, edge" (Exod. 26:4; 36:11). Both passages have to do with the manufacture of CURTAINS for the TABERNACLE.

Sem sem. KJV Apoc. and NT form of SHEM.

Semachiah sem'uh-k*i*'uh. See SEMAKIAH.

Semakiah sem'uh-k*i*'uh (סְמַכְיָהוּ *H6165*, "Yahweh has sustained" [cf. ISMAKIAH]). Son (or relative) of Shemaiah and grandson (or descendant) of OBED-EDOM (1 Chr. 26:7). This family of Korahites (see KORAH #3) belonged to one of the divisions of gatekeepers (v. 1).

semantics. The study of meaning. See INTERPRETATION.

Semei sem'ee-*i*. (1) KJV Apoc. form of SHIMEI (1 Esd. 9:33; Add. Esth. 11:2).
(2) KJV NT form of SEMEIN.

Semein sem'ee-uhn (Σεμεΐν *G4946* [with various spellings in the MSS], from שִׁמְעִי *H9059* [see SHIMEI]). KJV Semei. Son of Josech, included in LUKE'S GENEALOGY OF JESUS CHRIST (Lk. 3:26).

Semellius si-mel'ee-uhs. KJV Apoc. form of SHIMSHAI (1 Esd. 2:16 – 17, 25, 30).

Semis see'mis. KJV Apoc. form of SHIMEI (1 Esd. 9:23).

Semite. This term was apparently first used by A. L. Schlözer in 1781 to designate the descendants of SHEM (listed in Gen. 10:21 – 31). The descendants of Shem, however, do not correspond entirely to the Semitic-speaking peoples (see LANGUAGES OF THE ANE II). ELAM, for example (v. 22), was not a nation that spoke a Semitic language, while the Canaanites, who were certainly Semitic, are listed among the descendants of HAM (v. 15). To be sure, there is a clear connection between Egyptian (and other "Hamitic" languages) and Semitic, and modern scholars posit a large family called Afro-Asiatic. Perhaps there was a very primitive Semitic-Hamitic community in the vicinity of Arabia and Egypt. Such facts indicate that the Table of NATIONS in Gen. 10 was not entirely ethnological, but at least partly geographical. In any case, the term *Semite* was subsequently used by Johann Gottfried Eichhorn (*Einleitung ins Alte Testament*, 2nd ed. [1787], 1:15) with reference to the peoples whose habitat is ETHIOPIA, ARABIA, PALESTINE, PHOENICIA, SYRIA, and the countries of the EUPHRATES and TIGRIS Rivers.

The original home of the Semites is not known, although various theories have been suggested. At the dawn of civilization traces of Semitic languages are found throughout the FERTILE CRESCENT. Today the term *Semitic* is primarily applied to the various people associated with the Semitic languages. The Semitic family, therefore, includes most of the inhabitants of modern Syria, Iraq, Jordan, Israel, Arabia, and a high percentage of Turkey, Lebanon, and N Africa. The Semitic influence has reached England and the United States largely through Jews; the Arabs have greatly influenced Africa, and at one time, southern Europe. Although all Semites were at one time polytheistic, it was they who gave birth to the three great monotheistic religions of the world: Judaism, Christianity, and Islam.

L. L. WALKER

Semitic. See LANGUAGES OF THE ANE II.

Semitism. Also *Semiticism.* A feature that is characteristic of one or more Semitic languages and that has been adopted by a non-Semitic language. In biblical studies, the term is applied specifically to the presence of Hebrew or Aramaic distinctives in the Greek of the SEPTUAGINT and the NT. Semitisms include various kinds of lexical borrowing (loanwords, loan translations, semantic loans), syntactical and stylistic features, and mistranslations. (See K. Beyer, *Semitische Syntax in Neuen Testament* [1961]; M. Wilcox, *The Semitisms of Acts* [1965]; M. Black, *An Aramaic Approach to the Gospels and Acts*, 3rd ed. [1967]; J. A. Fitzmyer, *Essays on the Semitic Background of the New Testament* [1971]; R. A. Martin, *Syntactical Evidence of Semitic Sources in Greek Documents* [1974]; E. C. Maloney, *Semitic Interference in Marcan Syntax* [1980]; S. Thompson, *The Apocalypse and Semitic Syntax* [1985]; M. Silva, *Biblical Words and Their Meaning: An Introduction to Lexical Semantics*, rev. ed. [1994], chs. 2 – 3; G. Walser, *The Greek of the Ancient Synagogue: An Investigation on the Greek of the Septuagint, Pseudepigrapha and the New Testament* [2001].) See also GREEK LANGUAGE III.B.

Senaah suh-nay'uh (סְנָאָה *H6171*, possibly "hated [woman]" [if from שָׂנֵא *H8533*], perhaps referring to people of lower classes). Either the ancestor of some Israelites who returned from EXILE or, more likely, a town in JUDAH resettled by them (Ezra 2:35; Neh. 7:38; 1 Esd. 5:23 [KJV, "Annaas," with some editions reading "Annas"]). Because the number of returnees seems rather large, some have interpreted the phrase *běnê sěnāʾâ* ("sons of the rejected woman"?) as referring to the poorer classes of Jerusalem (cf. BDB, 702) or to some other group that was regarded with contempt. The matter is complicated by references to the son(s) of HASSENAAH and HASSENUAH (*hassěnāʾâ H2189*, Neh. 3:3; *hassěnuʾâ H2190*, 1 Chr. 9:7; Neh. 11:9), both of which could be understood as designating people from (the) Senaah. Some scholars suspect textual error (see H. G. M. Williamson, *Ezra, Nehemiah*, WBC 16 [1985], 34).

S. BARABAS

senate. An authoritative assembly possessing legislative powers. The English term derives from Latin *senatus,* meaning "an assembly of elders" (from *senex*, "old man"). The KJV uses "senator" once in the OT to render the Hebrew word for "elder" (Ps. 105:22), and "senate" once in the NT to render the Greek word for "council of elders," probably referring to the SANHEDRIN (Acts 5:21; "senate" also occurs several times in the KJV Apoc., Jdt. 11:14; 1 Macc. 8:15 et al.).

Among the Romans, the state council or senate was most ancient—from before the expulsion of the Tarquins. The Roman senate first consisted of 100 men, but later the number was increased to 300, and plebeians as well as patricians were made eligible. Under the ROMAN EMPIRE, the number was increased to 900 by Julius CAESAR but was reduced to 600 by AUGUSTUS, who added age and property requirements. Under the empire, the principal duties of the senate consisted of (1) the maintenance of state religion, (2) supervision of government property and finances, (3) control of the senatorial provinces, (4) legislative ratification of the emperor's decisions, (5) jurisdiction over breach of contract, cases of high treason, and offenses of senators, and (6) exercise of the right to nominate all magistrates except consuls.

H. L. DRUMWRIGHT, JR.

Seneca sen'uh-kuh. Latin orator, writer, philosopher, and statesman. Lucius Annaeus Seneca (the Younger) was born in southern Spain c. 4 B.C. (possibly as late as A.D. 1), but a relative took him to ROME while he was still a child. Trained in rhetoric, Seneca was attracted to STOIC philosophy and became a brilliant orator. In 49 he was appointed tutor to the young NERO, and when the latter became emperor five years later, Seneca (alongside Afranius Burrus) served as his minister and confidant. Seneca wielded considerable power for some years, but his reputation declined in the late 50s. He eventually retired from public life, and in the year 65, accused of conspiracy, was forced to commit suicide. (Much of our information comes from Tacitus, *Annals*, books 13 – 15. Among recent works, see also M. T. Griffin, *Seneca: Philosopher in Politics*, new ed. [1992]; G. Maurach, *Seneca: Leben und Werk*, 2nd ed. [1996]; P. Veyne, *Seneca: The Life of a Stoic* [2003]; B. Inwood, *Reading Seneca: Stoic Philosophy at Rome* [2005]; *OCD*, 96 – 98, s.v. "Annaeus Seneca (2).")

Seneca wrote a number of ethical treatises and other prose works that are a major source for our understanding of Stoicism. His poetic writings consist primarily of tragedies, and these proved influential during the Renaissance (cf. A. L. Motto and J. R. Clark, *Senecan Tragedy* [1988]). An apocryphal document known as *Epistles of Paul and Seneca*—composed in the 3rd cent. or later, and popular in the late Middle Ages—purports to preserve mutually admiring correspondence between these two figures (English trans. in *NTAp*, 2:46 – 53). These letters were no doubt composed with the purpose of commending Christianity to pagan society, which was strongly influenced by Stoicism; the unknown author(s) may also have wished to enhance Seneca's reputation among Christians. (For a comparison between Paul and Seneca, including a brief description of the apocryphal letters, see J. B. Lightfoot, *St. Paul's Epistle to the Philippians: A Revised Text with Introduction, Notes, and Dissertations* [1868], 270 – 333. See further J. N. Sevenster, *Paul and Seneca* [1961]; A. Fürst et al., *Der apokryphe Briefwechsel zwischen Seneca und Paulus* [2006].)

Seneh see'nuh (סְנֶה H6175, possibly "thorny" [BDB, 702, but see *HALOT*, 2:760]). A notable rock or crag which, together with BOZEZ, commanded the pass at MICMASH (1 Sam. 14:4). This important access route to the Judean highlands follows the Wadi Qelt in its lower stages. In the vicinity of Micmash the route becomes narrower and passes through these two crags, thus forming one of the strategic locations for governing access to the Judean highlands. This accounts for its importance to the PHILISTINES. Suitable rock formations are found along Wadi es-Suweiniṭ in the immediate vicinity of ancient Micmash (c. 7 mi. NE of JERUSALEM).

A. BOWLING

Senir see'nuhr (שְׂנִיר H8536, meaning unknown; cf. Akk. *Saniru*). KJV also Shenir. The AMORITE name for Mount HERMON (Deut. 3:9). At times the name has been used for larger portions of the ANTILEBANON range (as perhaps in Ezek. 27:5). However, Hebrew usage also distinguished between Hermon and Senir (Cant. 4:8), and between those and BAAL HERMON as well (1 Chr. 5:23). It is tempting to suppose that such usage distinguishes the three individual peaks of Mount Hermon.

A. BOWLING

Sennacherib suh-nak'uh-rib (סַנְחֵרִיב H6178, from Akk. *Sin-aḫḫē-erība*, "Sin [the moon god] has replaced the [lost] brothers"). King of ASSYRIA, 705 – 681 B.C. As his name implies, Sennacherib was not the eldest son of SARGON II, but he was chosen as crown prince and made military governor of the troublesome northern frontier. His boldness in difficult situations and firmness in dispensing justice was to stand him in good stead. When his father was assassinated in 705 B.C., Sennacherib acted quickly to take the throne before marching against dissidents.

I. Northern foes. Since Sargon's victories over the northern tribes, the latter had been subject to pressure from the CIMMERIANS (Assyr. *Gimirrai*) as the latter moved westward from the Caucasus toward LYDIA. Sennacherib led expeditions to the central Zagros Mountains and to Tabal and CILICIA, where he captured TARSUS. His aim was to keep the trade routes open to friendly peoples outside the newly invaded areas. This action contained the borders and enabled him to devote his attention to the more restive parts of his empire.

II. Babylonia. In the same year as Sennacherib became king, the old enemy of his father, Marduk-apla-iddinna (MERODACH-BALADAN), sheikh of the Bit-Yakin, seized the throne of Babylon with the backing of Elamite troops (see ELAM). Much of his time was spent in Borsippa, since this was closer to his tribal lands and more easily defensible by his fellow Arameans (see ARAM). In 703 B.C. Sennacherib led an army against the rebel whom he defeated near Kish. After sacking Babylon he deported 208,000 prisoners and set a puppet king trained in NINEVEH, one Bēl-ibni, on the throne.

Marduk-apla-iddinna retreated to the security of the southern marshes until the time, three years later, when he was able to elicit further Elamite assistance and rouse the Chaldean and Aramean tribes in collusion with Bēl-ibni. A swift Assyrian march broke up the attempt by this coalition to assert their independence. This time Marduk-apla-iddinna fled across the Persian Gulf to take refuge in S Elam, where he died. Sennacherib characteristically aimed to deal with the subversion at its source and thus he mounted a sea-borne invasion, using a fleet of ships, manned by sailors from TYRE, SIDON, and CYPRUS, which floated down the TIGRIS and EUPHRATES Rivers. From a bridgehead on the coast, punitive raids were mounted against the villages that harbored the tribesmen from the marshes.

This punitive action had little lasting effect. Soon Elam retaliated by raiding across the Tigris to capture Ashur-nadin-shumi at Sippar. This was Sennacherib's youngest son, whom he had placed on the Babylonian throne under a special charter (699 – 694 B.C.). A pro-Elamite supporter, Nergal-ushēzib, replaced him. Then in 693 Assyrian troops redrawing from the S defeated Nergal-ushēzib at Nippur, but failed to recapture Babylon itself where another Aramean, Mushēzib-Marduk, had taken control.

Relief of Sennacherib on a magnificent throne watching prisoners being brought before him from the capture of the city of Lachish during the time of Hezekiah (from Nineveh, 7th cent. B.C.).

In the following year Sennacherib took drastic steps to reassert Assyrian authority in the S. He met and defeated the Elamites at Dēr, and local Assyrian officials ousted Mushēzib-Marduk, who had seized this moment to rouse the tribes. Fleeing to Elam he managed to bribe the Elamites and Arameans to waylay the Assyrians at Ḥalule, where an indeterminate but bloody battle was fought. Internal dissensions soon limited further Elamite help, so that an Assyrian force was able to besiege Mushēzib-Marduk in Babylon for nine months. When the city fell it was looted, its deity Marduk being taken off to Nineveh, and the city remained quiet through the rest of the reign.

III. Action against Judah. HEZEKIAH of Judah, perhaps incited by the Babylonian Marduk-apla-iddinna (Merodach-Baladan) to join in the anti-Assyrian coalition (2 Ki. 20:12 – 13), seized Padi, the pro-Assyrian ruler of EKRON (18:8). When Sidon and Tyre refused tribute in 701 B.C., Sennacherib directed his third campaign to the W. Marching down the Phoenician coast, he captured Great and Little Sidon, Zarephath, Mahallib (Ahlab of Jdg. 1:31), Ushu, and Acco. Eluli (Elulaeus), who had fled, was replaced as king of Tyre with Ethbaal, but that seaport was bypassed. The kings of Sidon, Arvad, Byblos, Beth-Ammon, and Edom submitted, but Ashkelon, Beth Dagon, and Joppa, who refused, were sacked.

Hezekiah's resistance in these circumstances was outstandingly daring, especially as the Assyrians marching on ELTEKEH defeated the Egyptians on whom the anti-Assyrian forces doubtless relied for help. The elders of Ekron were flayed alive for handing over their king to Hezekiah. The Assyrians thereupon besieged LACHISH, which fell after a cruel siege, and sacked forty-six towns and villages in Judah, taking away 200,150 prisoners and much spoil. Despite the close siege works hemming in Jerusalem, Hezekiah refused a demand for surrender (2 Ki. 18:17; Isa. 36:1 – 21). According to Sennacherib, Hezekiah later paid tribute of "40 talents of gold and 800 talents of silver, precious stones," and other rare commodities. The Bible mentions only "300 [talents] of silver and 30 [talents] of gold" (2 Ki. 18:13 – 16), the difference being perhaps due to the remaining amount being given in other form, to variations in the standards of weights used, or to Assyrian exaggeration.

According to Sennacherib, Hezekiah freed Padi, who was given some former Judean territory as compensation for his ordeal on behalf of Assyria. Meanwhile, Sennacherib claims, "Hezekiah, the Judean, I shut up in Jerusalem, his royal city, like a bird in a cage. I put sentry-posts closely round the city, to turn back to his fate anyone who ventured out of the city-gate" (Taylor Prism; cf. *ANET*, 288a). The siege was unsuccessful due to the foresight of Hezekiah in protecting his water-supplies (2 Ki. 20:20; 2 Chr. 32:30) and his steadfast trust in God rather than in material support from allies (2 Ki. 19:32 – 34).

Sennacherib's own account makes no reference to the outcome of the siege—a sure acknowledgment of failure—or to the defeat of the Assyrian army, which the Bible describes as 185,000 dead "by the angel of the LORD" (2 Ki. 19:35). This latter event, says HERODOTUS (*Hist.* 2.141), was due to "a multitude of field mice which by night devoured all the quivers and bows of the enemy, and all the straps by which they held their shields…Next morning they commenced their fight and great numbers fell as they had no arms with which to defend themselves."

There has long been debate whether all these events fall into one or two campaigns by Sennacherib. Those who argue for two campaigns see the reference to the approach of the Egyptian relief forces under TIRHAKAH (2 Ki. 19:9; Isa. 37:9) as indicative of later action, since this pharaoh did not come to the throne of Egypt until c. 690 B.C. This may be answered by the suggestion that he acted as commander-in-chief while "king of Ethiopia/ Nubia (Cush)," for there is no confirmation that he was born c. 709 and that therefore he was too young to be in the field. The two-campaign theory assumes that it was in the first campaign of 701 that Hezekiah paid tribute and surrendered Padi and that he successfully withstood a later siege, c. 689 – 686, when Sennacherib struck against the Arabs S of DAMASCUS, of which there is no mention in the Assyrian records.

Those who hold this view believe that both campaigns have been conflated into one by the Hebrew historians. They, moreover, interpret 2 Ki. 19:37 as implying that Sennacherib's death took place immediately on his return from Palestine. The Hebrew text does not, however, state or imply the length of time between his return to Nineveh and his death in 681. The latter was some years after the Palestinian campaign on either view. There is no textual or historical evidence which precludes the now more generally accepted view of a single campaign in 701.

IV. Domestic policy. Sennacherib exercised a firm but tolerant rule at home. Encouraged by his W Semitic (Palestinian?) wife, Naq⁾ia-Zakutu, he spent much effort on rebuilding his capital, Nineveh. With prisoner-of-war labor he built his own "palace without a rival," with suites of rooms furnished in cedar, cypress, boxwood (walnut?), and ebony. Stone was extensively used, and the reception rooms were panelled with more than 9,000 sq. ft. of bas-reliefs depicting his victories, including the siege of Lachish (now in the British Museum). The city walls and gates were renovated and a New Year Temple and armory built to receive the spoils of war. Water for the city was brought via canals, an aqueduct (Jerwan), and a dam (Ajeila) to water the city and its surrounding parks between the Tigris and Khosr Rivers. Sennacherib introduced cotton growing to Assyria and claims to have used other new techniques in his architectural works, including open-cast bronze modeling "like the casting of half-shekels."

V. His death. According to 2 Ki. 19:37 (Isa. 37:38), Sennacherib was assassinated by his two sons while worshiping in the shrine of his god NISROCH. The sons escaped to Ararat, and Sennacherib's son ESARHADDON reigned in his stead. The Assyrian texts make no specific reference to this event and it has been thought that there are divergencies in the accounts. The Babylonian Chronicle states that he

was murdered by "his son." Such variation in historical sources is not uncommon, since one son may well have been the ringleader or have actually done the deed.

Esarhaddon himself makes no reference to his father's death in his account of his own accession, though he does mention the hostility of his brothers, whom he had to defeat before gaining the throne. He claims to have defeated the rebels in Hanigalbat, from where two of them may have fled to Urartu. See ADRAMMELECH (PERSON) and SHAREZER. Thirty-two years later ASHURBANIPAL says that his grandfather Sennacherib had been "crushed between the figures of protecting deities," possibly the bull-colossi guarding the narrow temple doorway. Though the temple of Nisroch is not necessarily to be located in Assyria, it could be the temple of Ninurta (or Nusku?) in Nineveh.

(See further D. D. Luckenbill, *The Annals of Sennacherib* [1924]; L. L. Honor, *Sennacherib's Invasion of Palestine* [1926]; D. J. Wiseman in *Documents from Old Testament Times* , ed. D. W. Thomas [1958], 64 – 73; H. H. Rowley in *BJRL* 44 [1962]: 395 – 431; J. M. Russell, *Sennacherib's Palace without Rival at Nineveh* [1991]; A. K. Grayson in *CAH*, 3/2, 2nd ed. [1991], 103 – 22; M. Dietrich, *The Babylonian Correspondence of Sargon and Sennacherib* [2003]; L. L. Grabbe, ed., *"Like a Bird in a Cage": The Invasion of Sennacherib in 701 BCE* [2003].)

D. J. WISEMAN

sensual. The KJV uses this English adjective twice to render the Greek word *psychikos G6035* (Jas. 3:15; Jude 19). This Greek term occurs in three other passages where the KJV uses the rendering "natural" (1 Cor. 2:14; 15:44, 46). In one of the references (Jas. 3:15), the term is applied to a wisdom that is "earthly" in contrast with "the wisdom that comes from heaven" (v. 17). In the other passages, the term is applied to people and contrasted with *pneumatikos G4461* ("spiritual") and/or with (having the) *pneuma G4460* ("Spirit"). Thus the person characterized as *psychikos* is one who does not have, or whose conduct is not controlled, by the HOLY SPIRIT (cf. the various renderings used by modern versions). (For the specific meaning, "preoccupied with bodily/sexual pleasures," see LUST; SEX.)

sensus plenior. See TYPOLOGY.

Senuah si-ny*oo*'uh. KJV alternate form of HASSENUAH.

Seorim see-or'im (שְׁעֹרִים *H8556,* possibly from שָׂעִיר *H8537,* "hairy"). A priest who received the fourth lot of the twenty-four divisions in DAVID'S time (1 Chr. 24:8).

separation. See CONSECRATION; HOLINESS; SANCTIFICATION.

Sephar see'fuhr (סְפָר *H6223,* meaning uncertain). A place "in the east country" (prob. ARABIA) that, along with MESHA, served to delimit the territory occupied by the sons of JOKTAN, a descendant of SHEM through EBER (Gen. 10:30). The location of Sephar is unknown, although many scholars believe it was somewhere in S ARABIA (the names of several of Joktan's sons can be linked with geographical sites in this region; moreover, Mesha is usually thought to have been in N Arabia). Specific proposals include modern Zafar (a coastal city in Oman, though there is a place by the same name in Yemen) and Iṣfar (S of the valley of Ḥaḍramaut; see HAZARMAVET). It has also been suggested that the word is a common noun meaning "border country" (*IDB,* 4:272). (Biblical Sephar is not to be confused with a place of the same name mentioned in the SAMARIA ostraca and identified

with modern Sefarin, a few miles W of Samaria. See Y. Aharoni et al., *The Carta Bible Atlas,* 4th ed. [2002], map 139.)

Sepharad sef'uh-rad (סְפָרַד *H6224,* meaning unknown). A place mentioned by OBADIAH as the site of the exile of certain captives from Jerusalem (Obad. 20). A rabbinic tradition preserved in the TARGUM (which has *sĕpamyā⟩* properly *⟩ispamyā⟩* or *⟩ispanyā⟩,* from Lat. *Hispania)* understood the name as a reference to SPAIN (cf. the term *Sefardi,* applied to Jews who first settled in Spain and Portugal). Some modern scholars identify Sepharad with Saparda, a country that appears in the Assyrian Annals of SARGON II as a district of SW MEDIA (though other documents suggest a location near ASIA MINOR).

Most probably, however, Sepharad should be identified with SARDIS, the capital of LYDIA. The difference in spelling is not linguistically objectionable, since an Aramaic-Lydian bilingual inscription, found at Sardis, refers to this city as *sprd;* moreover, Sardis appears as *Sparda* in Old Persian inscriptions, and as *Saparda* in Babylonian. If this view is correct, the biblical reference is of historical significance, for it attests to the existence of a Jewish colony in SW Asia Minor at a rather early date. The importance of Sardis as a center of trade between the sea routes of the AEGEAN and the interior land routes makes it not surprising that Jewish exiles should be found there.

T. E. MCCOMISKEY

Sepharvaim sef'uhr-vay'im (סְפַרְד *H6226,* meaning unknown; gentilic סְפַרְוִים *H6227,* "Sepharvites"). A city conquered in the 8th cent. B.C. by the Assyrians; SHALMANESER V resettled its inhabitants in SAMARIA (2 Ki. 17:24). The deities of the Sepharvites included ADRAMMELECH and ANAMMELECH (v. 31). Subsequently, SENNACHERIB'S envoy mentioned Sepharvaim as a place whose gods were helpless against the Assyrians (2 Ki. 18:34; 19:13; Isa. 36:19; 37:13).

The location of Sepharvaim is uncertain. Among various proposed identifications, two deserve mention. (1) The less likely is Sippar (modern Abu Habba) in Mesopotamia, known as Sippar of Shamash and Sippar of Anunitum, thus accounting for the dual ending in the Hebrew form of the name. (2) Ezekiel refers to a town named SIBRAIM as lying between DAMASCUS and HAMATH (Ezek. 47:16; note that Hamath is included in all the passages where Sepharvaim is mentioned). This second possibility is attractive because it suits the Syrian context of Sepharvaim and the possible Syrian character of the god Adrammelech. (See *ABD*, 5:1090.)

A. BOWLING

Sepharvite sef'uhr-v*it*. See SEPHARVAIM.

Sephela suh-fee'luh. KJV Apoc. form of SHEPHELAH (1 Macc. 12:38).

Sepphoris sef'uh-ris (Σέπφωρις [Jos. *Ant*. 13.12.5 §338 et al.], with various spellings, cf. *HJP*, rev. ed., [1973 – 87], 2:172 – 73; apparently from צִפּוֹר *H7606*, "bird" [see ZIPPOR and ZIPPORAH]). A strongly fortified city c. 4 mi. NW of NAZARETH. Although not mentioned in the Bible, Sepphoris was famous as a military, political, and cultural center and as one of the chief cities of Hellenistic GALILEE. Herod Antipas (see HEROD V) did much to rebuild and enhance the importance of the city (cf. Jos. *Ant*. 18.2.1 §27). Sepphoris figures prominently in the writings of JOSEPHUS and in rabbinic literature, and Jesus must have often visited it. (See *ABD*, 5:1090 – 93; *NEAEHL*, 4:1324 – 28.)

Septuagint sep'*too*-uh-jint. This term, derived from Latin *Septuaginta* ("Seventy") and commonly abbreviated with the corresponding Roman numeral LXX, is the traditional (though imprecise) name given to the primary Greek version of the Hebrew Bible. The LXX appears to have been the first translation made of the OT or of any literary work of comparable size into another language, and it thus marks a milestone in human culture.

For biblical scholarship, the LXX is of great importance in several areas: (1) *OT textual criticism*— it attests to an ancient form of the Hebrew text that is often different from, and sometimes more reliable than, the standard Masoretic text (MT); (2) *OT hermeneutics*—it represents the earliest known interpretation of the Hebrew Bible (aside from interpretative features within the OT itself); (3) *NT language*—it is a major source for our understanding of Hellenistic Greek; (4) *NT hermeneutics*—it was used extensively by the NT writers and evidently influenced their formulation of Christian teaching. This article treats not only the LXX (in the stricter sense of the term) but also the other Greek versions of the Hebrew Bible produced in antiquity. (What follows is an abridgment of the initial chapters in K. H. Jobes and M. Silva, *Invitation to the Septuagint* [2000], to which the reader is referred for additional information.)

I. Introduction. The Bible contains ancient writings that have been continuously read from the time of its authors until our own. The first and oldest part of the Bible was written originally in Hebrew (except for the following passages written in ARAMAIC: Ezra 4:8—6:18; 7:12 – 26; Jer. 10:11; Dan. 2:4—7:28). The abiding importance of these sacred writings—first to the Jews and later to the Christians—demanded that throughout history they be translated into the languages of the peoples who received them as Scripture.

After the ANE was conquered by ALEXANDER THE GREAT (c. 333 B.C.), the Jewish people found themselves living in the Hellenistic culture. Their religious values and ancient ways collided with Greek practices, philosophies, and language. Just as today most Jewish people live outside of Israel, so it was during the Hellenistic period. Because as a rule the Jews of the DIASPORA (Dispersion) who were scattered throughout the Mediterranean no longer spoke Hebrew, they needed to have the sacred writings in Greek, which had become the *lingua franca* of the Hellenistic world. Thus the Greek

version of the Hebrew Bible became Scripture to the Greek-speaking Jewish communities in the Diaspora. Together with the Greek NT, it was later the Bible of most Christians during the first few centuries of the church. The Greek version remains even today the canonical text for the Orthodox Christian tradition, which traces its heritage to the Byzantine church of the eastern empire.

Because of its widespread importance, numerous copies of the Greek Bible were produced by scribes in many places throughout the centuries. There are more surviving MSS of the Greek OT than there are of any other ancient Greek text except the NT. Counting both complete and fragmentary MSS, nearly 2,000 handwritten copies of the Septuagint have survived. In comparison, there are only about 650 extant MSS of Homer's *Iliad*, the most popular work of antiquity, and fewer than 350 of the writings of the famous Greek tragedian, Euripides. For scholars interested in the complexities of textual criticism and the tendencies of scribes, the MSS of the Septuagint provide an enormous amount of material for study.

The LXX is written in the Koine, that is, the *common* Greek of the Hellenistic age, a form of the language that had developed from the classical Greek of 5th-century ATHENS. For students of the GREEK LANGUAGE during the Hellenistic period, the LXX is a major source of information. Moreover, because it is a translation of a Hebrew text into Greek, it provides a unique opportunity for those interested in comparing original Greek writings to "translation" Greek.

The Greek version also has great value for the study of the Hebrew text. The issues surrounding this use of the version are quite complex, but the fact remains that the LXX was translated from some Hebrew text that was not identical to the Hebrew text we use today. That original Greek translation, which was produced much earlier than any surviving copy of the Hebrew Bible, is an indirect witness to its *Vorlage*, that is, to the Hebrew parent text from which it was translated. In theory, the LXX should allow scholars to reconstruct that earlier Hebrew text, though in practice this attempt is fraught with difficult problems.

Translation between any two languages, however, always involves a degree of interpretation. The translators who produced the Greek version of the Hebrew Bible were also interpreters who came to the text with the theological and political prejudices of their time and thus had to deal with hermeneutical issues similar to those we face today. Their translations were no doubt influenced, whether deliberately or subconsciously, by what they believed the Hebrew meant in light of their contemporary situation, which may or may not have been what the author of the Hebrew intended. Clearly, this is bad news to the textual critic, who wants to use the Greek version to reconstruct its Hebrew parent text. On the other hand, precisely because the LXX reflects the theological, social, and political interests of the translator, it provides valuable information about how the Hebrew Bible was understood and interpreted at the time the translators were working.

Subsequently, the LXX played a significant role in the Christian church. The Greek version, not the Hebrew Bible, was the primary theological and literary context within which the writers of the NT and most early Christians worked. This does not mean that the NT writers were ignorant of the Hebrew Bible or that they did not use it. Since these authors were writing in Greek, however, they would naturally quote, allude to, and otherwise use the Greek version of the Hebrew Bible. This process is no different from that of a modern author writing, for instance, in Spanish, and quoting a widely used Spanish translation of the Bible.

Consequently, familiarity with the Greek OT cannot help but enlighten the student of the Greek NT. Biblical scholar Adolf Deissmann once wrote, "A single hour lovingly devoted to the text of the Septuagint will further our exegetical knowledge of the Pauline Epistles more than a whole day spent over a commentary" (*The Philology of the Greek Bible* [1908], 12). The connection can be

illustrated at several levels. In the first place, the LXX provided some of the vocabulary that the NT writers drew upon. They often use terms or phrases that are found in the LXX and that were not in common usage in the first century (e.g., *pasa sarx*, "all flesh," Lk. 3:6). In such cases, they may be borrowing the terms from the Greek OT to affect a "biblical" style. The LXX certainly left its mark in Greek just as the KJV has in English.

Second, the NT writers sometimes use expressions found in the LXX to draw the reader's mind to specific passages of OT Scripture. PAUL, for instance, uses the phrase "every knee shall bow" in Phil. 2:10 when he describes the ultimate exaltation of Christ. Clearly Paul is using vocabulary from the Greek of Isa. 45:23 not just to sound "biblical" but rather to bring that passage to mind in order to identify Jesus Christ with God.

Third, the NT writers frequently—perhaps as many as 300 times—quote the Greek OT directly (see QUOTATIONS IN THE NT). This fact accounts for some of the differences readers note when comparing these citations with the corresponding OT passages. For example, in Heb. 11:21 dying JACOB is said to have worshiped leaning on the top of his *staff*, a reference to the Greek text of Gen. 47:31. In almost all English Bibles, however, Genesis says that Jacob worshiped at the top of the *bed*, which is indeed what the Hebrew MSS say. The reason for the discrepancy is that the Hebrew text used by the Greek translator of Genesis consisted only of consonants; the correct vowels were to be inferred by the reader from the context. The Hebrew noun in Genesis could be read as either *maṭṭeh H4751* ("staff") or *miṭṭâ H4753* ("bed"), and the Greek translator inferred that the word "staff" was meant. Some centuries later, when vowel points were added to the Hebrew biblical texts, the noun in 47:31 was taken to mean "bed." (The NIV has translated 47:31 so as to agree with Heb. 11:21, presumably on the grounds that the traditional vowel-pointing of the Hebrew text is incorrect and that the Greek version preserves the correct sense. For a fuller treatment of this quotation, see M. Silva in *Scripture and Truth*, ed. D. A. Carson and J. W. Woodbridge [1983], 147–65.)

One must also appreciate that the continuity and development of thought between the OT and NT is of particular concern for BIBLICAL THEOLOGY. The LXX provides essential, but often overlooked, theological links that would have been familiar to Christians of the first century, but are not so obvious in the Hebrew version. No NT scholar can afford to ignore the LXX.

After NT times, the LXX, not the Hebrew text, was the Bible used by the early church fathers and councils for several centuries. As Christian doctrine on the nature of Christ and the TRINITY developed, discussion centered on the exegesis of key OT texts. Because most of the church fathers could not read Hebrew, exegetical debates were settled using the Greek OT. Some of the Greek words used to translate the OT had connotations associated with Greek culture and philosophy that were probably alien to the thought of the original Hebrew author. The simple fact that the Hebrew Scriptures existed in the Greek language and were read by people living in Greek culture led to exegesis by both Jewish and Christian interpreters (e.g., PHILO JUDAEUS and ARIUS, respectively) that was heavily influenced by Greek philosophy.

Of course, one must also consider that the Greek translator himself originally rendered the Hebrew in ways that were to some extent influenced by Greek culture and thought, making the text even more congenial to a later exegesis that would be similarly influenced. A good example is the LXX text of Prov. 8:22–31, which held a prominent place in the early discussions about the nature of Christ and his place in the Trinity. In this passage, wisdom is personified as the first of the Lord's works prior to the creation of the universe.

Primarily because of the opening verses of the Gospel of John, JESUS CHRIST became associated with this divine WISDOM (*sophia G5053*) or rationality (*logos G3364*; see LOGOS). In Greek

philosophy, however, the Greek concept of an impersonal divine wisdom permeating the universe was very prominent, and so the nature of Jesus Christ and his relationship to God the Father had to be carefully delineated. Many early theologians, such as ORIGEN and TERTULLIAN, all used this passage from the Greek Proverbs in their discussions of the relationship between the Son and the Father. Subsequently Arius, a Christian presbyter of ALEXANDRIA (died 336), argued on the basis of the Greek of Prov. 8 that the Son was a created being, not coeternal with the Father. Subtle differences between the Greek and Hebrew worked in favor of Arius's argument, which led to years of intense debate. (The exegesis of this passage was settled by the Council of Nicaea in 325, when the Arian controversy was pronounced a heresy. For further details, see Jaroslav Pelikan, *The Christian Tradition: A History of the Development of Doctrine*, 5 vols. [1971 – 89], 1:191 – 210.)

This example is only one of many that show that the doctrines of orthodox Christianity were hammered out with exegetical appeals to an OT that was written in Greek, not Hebrew. While it is true that no point of orthodox Christian doctrine rests on the Greek text in contradiction to the Hebrew, it is also true that the LXX text was the Word of God for the church in its first few centuries. Moreover, the Eastern Orthodox churches, such as the Greek, Russian, and Syrian, inherited the Greek text as their Bible. Traditionally, the Orthodox churches have considered the Greek version to be divinely inspired (and even in some sense to have superseded the Hebrew text), although this is a matter of debate among Orthodox scholars today.

II. Terminology. Strictly speaking, there is really no such thing as "*the* Septuagint." Most translations of the Hebrew Bible are characterized by unity throughout. Not so with the LXX, which was produced by many people unknown to us, over two or three centuries, and almost certainly in more than one location. Consequently, the Greek OT does not have the unity that the term "the Septuagint" might imply.

Because the Greek translation of the Hebrew Bible has such a long and complicated history, the name Septuagint is used to refer to several quite different things. In its most general sense, the term is used to refer to any or all ancient Greek translations of the Hebrew Bible, just as one might now refer in general to the "English Bible," with no particular translation in mind. This is the sense in which the term is used in the title of this article, which deals with the ancient Greek version(s) of the Hebrew Bible. Often, the term is also used to refer to a particular printed edition of the Greek text, whether that edition reproduces the text of a MS or prints a reconstructed text.

Given these typical uses of the term "LXX," one might understandably, though mistakenly, infer that the Greek translation found in a given ancient MS or modern edition is a homogeneous text produced in its entirety at one point in time. In fact, no such homogeneity exists in any collection of the Greek books of the OT. Each edition—whether the ancient, hand-copied Codex Vaticanus or the modern, printed Rahlfs edition—is an amalgam, with each section of the Bible having a long and separate textual history.

The books of the Hebrew Bible were originally translated independently into Greek by different translators over several centuries. What we call *books* were at that time written on individual SCROLLS. A scroll, typically no longer than 35 ft., could not contain the Greek version of the Hebrew Bible in its entirety. Usually each book was written on a separate scroll. A different format, the CODEX, came into use in the second century of our era. This format made it possible to bind the texts from many separate scrolls into one volume, giving a false impression of homogeneity. Just because the texts were bound together did not mean they shared a common origin. In fact, there was no one uniform Greek version of the entire Hebrew Bible, just individual scrolls that had been copied from

other scrolls through the ages. For instance, the Greek text of Genesis in some medieval codex may have been copied from a MS that was produced in the 1st cent. of our era and that contained the translation originally made in the 3rd cent. B.C. in Alexandria, while the Greek text of Esther *bound in the same codex* may have been copied from a MS produced in the 4th cent. of our era and containing a translation made in the 1st cent. B.C. in Jerusalem.

The particular collection of Greek texts of the biblical books that comprise the earliest one-volume Bibles, such as CODEX SINAITICUS or CODEX VATICANUS, occurred usually by the historical happenstance of whatever texts were at hand, irrespective of their origin and character. Therefore, whatever one may say about the history and characteristics of the Greek text of one biblical book may or may not be true of the others, even though they are found bound together in one codex. And because modern critical editions of the LXX are based on the ancient MSS, the same misleading appearance of homogeneity exists today.

When one enters the highly specialized world of textual criticism, the name Septuagint takes on a more precise and technical sense. It may be used specifically to distinguish the oldest Greek translation from subsequent translations and revisions of the Greek. If the term is used in this narrower sense, it refers only to the original Greek version of the PENTATEUCH, for that was the first part of the Hebrew Bible translated in the 3rd cent. B.C. The remaining books of the Hebrew canon were translated by different people in different places during the next two centuries. However, it has become customary, by extension, to use the term Septuagint with reference to the complete Greek canon of the Hebrew Bible.

It is probably better to refer to the original translation of books other than the Pentateuch as the *Old Greek* (OG) so as to distinguish it from the original translation of the Pentateuch as well as from the later revisions and new translations. (When referring to these initial Greek translations of the Hebrew Bible as a whole, some scholars prefer the combined abbreviation LXX/OG as a continual reminder of the diversity that characterizes the corpus.) However, when the Greek version of a biblical book survives in more than one form, it is not always possible to know with certainty which is the older. Nor is it possible to know for sure if the oldest surviving form was in fact the first Greek translation made of that book. Therefore, even the term Old Greek is not totally satisfactory. Unless the context requires a distinction, this article uses the abbreviation LXX in its general sense.

The scope of modern LXX studies extends beyond the CANON of the Hebrew Bible. It includes texts from the Hellenistic period that are not translations from the Hebrew at all, but rather Jewish writings composed in Greek, such as 3 and 4 MACCABEES and the WISDOM OF SOLOMON. Some other books, such as JUDITH, survive as complete copies only in Greek, even though they probably were translated from a Semitic source that is no longer extant. See APOCRYPHA. These texts may also be in mind when the name Septuagint is used.

The reader is cautioned, therefore, to pay particular care to the context in which the term is used, even by the same writer. Unfortunately, some writers use the term carelessly and equivocally, and the inevitable confusion that results from such ambiguity has led LXX scholars to call for standardizing the terminology. This may be easier said than done, however, for the ambiguities of the term go back to antiquity.

III. Origin. The earliest extant account of the original Greek translation of the Hebrew Bible is found in the *Letter of Aristeas* (see ARISTEAS, LETTER OF). This document purports to be a lengthy, personal letter from a man named Aristeas to his "brother" (or friend) Philocrates. It describes, among other things, how the Jewish TORAH was first translated from Hebrew into Greek for the great library of the

Egyptian king PTOLEMY Philadelphus (285 – 247 B.C.) in ALEXANDRIA. Copies of this "letter" survive in about two dozen medieval MSS, the earliest of which dates to the 11th cent. The length and character of the document, and the fact that it apparently was so widely copied and circulated, suggests that it was not personal correspondence from one person to another, but was intended as an "open" letter to a wider audience.

According to the author, the king's librarian requested the high priest of the temple in Jerusalem to send translators with the Hebrew Torah scrolls to Alexandria. The high priest complied, sending six men from each of the twelve tribes of Israel, that is, seventy-two translators, with a large escort carrying gifts for the king. (The twelve tribes of Israel had long before been dispersed, so if there is any truth to this unlikely story, the number of people sent would have been merely a symbolic gesture.) Aristeas was among the envoys.

The entourage from Jerusalem was welcomed to Alexandria with a royal banquet lasting several days, during which time the king and the envoys from the high priest discussed questions of theology and ethics. Finally, the translators were escorted to an island called Pharos, connected by a causeway to Alexandria. Working there for seventy-two days, they produced the first Greek translation of the Pentateuch. When the translation was complete, it was read to an assembly of the Jews of Alexandria, who enthusiastically received it and gave the translators a great ovation. The Jews asked the king's librarian to make a copy of the new translation for use in their community. To ensure that the original words of the translators would be preserved in perpetuity, the priests and elders pronounced a curse on anyone who should later change the text in any way.

Scholars today believe that this letter was written, not at a time contemporaneous with the events it describes, but in the 2nd cent. B.C., to defend JUDAISM in general and the Greek version in particular. During the conflict in Judaism over hellenization, some Jews embraced the Greek language and culture while others resisted such acculturation on religious principle. It is also very likely that the Greek translation of the Pentateuch did not enjoy universal favor among the Jews. A hundred years or more after the translation was produced, the *Letter of Aristeas* was probably written to address this situation. Claiming that the translation was made from the Jerusalem scrolls under circumstances that paralleled the giving of the law on Sinai, the author seeks to give the Greek version of the Scriptures used in Alexandria authority and veneration, such as the Hebrew texts in Jerusalem enjoyed.

Even though the authenticity of the letter should be rejected, some of its information is probably reliable. The first Greek translation of the Hebrew Torah would have been needed by Jews living in the Diaspora during the Hellenistic period (i.e., after Alexander's conquest in 333 B.C.). Even earlier, during the Persian period, significant communities of Aramaic-speaking Jews already lived in Egypt: papyri from ELEPHANTINE show an established Jewish community there as early as 495 B.C. After Alexander's conquest of the Persian empire, Alexandria became home to a large Greek-speaking Jewish population. It is therefore likely that the Pentateuch was first translated into Greek by or for the Alexandrian Jews during the reign of Ptolemy Philadelphus in the middle of the 3rd cent. (The historical and prophetic books of the Hebrew Bible were prob. translated into Greek during the following century, but we do not know where or by whom.)

The language of the translation bears the marks of the Greek spoken in Egypt, and it seems improbable that it would have been produced by a large group of Palestinian scholars. It is much more reasonable to believe that a handful of Greek-speaking Alexandrian Jews were responsible for it. As for the claim that the translation was based on Hebrew scrolls brought from Jerusalem, we have no clear evidence to refute it, but few scholars accept its validity. More difficult to assess is the role

supposedly played by the king's librarian. Many scholars, thinking it unlikely that the Greeks themselves would have taken the initiative to produce a translation of the Hebrew Scriptures, reject this element of the story as pure embellishment. On the other hand, some specialists are hesitant to dismiss altogether the possibility that court officials may have had an active interest in gaining access to the formative documents of the large and significant Jewish population. The *Letter of Aristeas* may reflect some reliable information concerning the Ptolemaic court's support, if not sponsorship, of the translation.

But the questions do not end here. Even if the Greeks had some involvement in this project, surely the interests of the Jewish population itself must have been prominent. Was the translation then undertaken because of the needs of the Greek-speaking worshipers who no longer understood Hebrew? Or was it done rather for the academic purposes of Hebrew students and scholars who would be more likely to make sense of the translation's many difficult, literal renderings? It may well be that all of these concerns, and perhaps others as well, were motivating factors in the production of the LXX.

The very intensity with which the *Letter of Aristeas* defends the legitimacy of the translation raises an additional question. The great Hebraist of a previous generation, Paul Kahle (*The Cairo Geniza*, 2nd ed. [1959], chap. 3), argued forcefully that the author of this document was in fact defending the Alexandrian version *against competing Greek translations* (for a refutation of some of Kahle's arguments see the articles by D. W. Gooding and G. Zuntz reprinted in *Studies in the Septuagint: Origins, Recensions, and Interpretations*, ed. S. Jellicoe [1974], 158 – 80, 208 – 25). Most scholars, following the lead of Paul de Lagarde in the 19th cent., have generally believed that there was only one initial Greek translation of the Hebrew Bible, and that the recovery of that "Proto-Septuagint" (*Ur-Septuaginta*) is the great task at hand. Kahle insisted, however, that originally simultaneous Greek translations were produced over a period of time, in a manner not unlike that of the Aramaic TARGUMS, and that the *Letter of Aristeas* sought to impose the authority of one such translation over the other ones. Although Kahle's theories created a heated controversy during his lifetime, relatively few scholars were persuaded by them. Lagarde's position, with some modifications, has been confirmed by later investigation and functions as the working assumption for most specialists (see J. W. Wevers in *Bulletin of the International Organization for Septuagint and Cognate Studies* 21 [1988]: 23 – 34, esp. 24 – 26).

Writers subsequent to the *Letter of Aristeas* add little information of substance. PHILO JUDAEUS, a Jewish Alexandrian philosopher who lived in the 1st cent. of our era, embellished the story of the origin of the Greek version of the Bible. Probably relying on an earlier tradition, he writes that the translators worked independently of each other, yet produced the same translation word-for-word through divine dictation. Philo believed that the Greek translation had been divinely inspired just as the original Hebrew had been.

By the 2nd cent. there is evidence of an alternate Jewish tradition, found in rabbinical material, that gives the number of translators who went to Alexandria as seventy, not seventy-two (*Sepher Torah* 1:8; another tradition gives the number of translators as five). This detail is probably intended to justify the claim that the Greek version too, like the Hebrew, was divinely inspired. Seventy ELDERS of Israel accompanied MOSES to Mount Sinai and saw God (Exod. 24:1 – 2, 9 – 11); moreover, seventy elders received a share of the Spirit that was in Moses (Num. 11:10 – 25). By numbering the translators of the Torah as seventy, the tradition portrays them as assistants to Moses working centuries later to administer the Law. The name *Septuagint* reflects this tradition. It first appears in Greek (*hoi hebdomēkonta*, "the seventy") in the mid-second century and thereafter only in

Christian writers, such as JUSTIN MARTYR, IRENAEUS, EUSEBIUS, and CHRYSOSTOM. The term was most often used by these writers to refer in general to the entire Greek OT, without distinguishing its various revisions and forms.

In the 3rd cent. the use of the term became even more confused. As will be noted below, ORIGEN took the various Greek texts in existence at his time and produced a recension that was "corrected" to the Hebrew text available to him. After his work, the name Septuagint began to be used to refer both to the Greek text he had used as his base *and* to the text that resulted from his revisions! The term is found in colophons in biblical MSS as early as the 4th cent. It is not known if such a notation was used to distinguish the text of these MSS from other Greek versions known to the scribes at that time, or was intended simply to identify the proper textual pedigree of the MS. In any case, the confusion resulting from the imprecise and ambiguous use of the name Septuagint today reflects the long and complicated history of the term and the texts to which it refers.

IV. Later Greek translations. Early Christian writers sometimes referred to alternate Greek renderings found in translations other than that of "the Seventy." These references are often vague, but we can find many passages where they specifically identify translations attributed to three scholars: Aquila, Symmachus, and Theodotion. Sometimes they are referred to as a group, "the Three (Translators)." Today they are often called "the Later Versions" or (for reasons to be discussed below) "the Hexaplaric Versions." None of these works has survived, except for a few fragments, but we have valuable evidence in numerous patristic quotations, as well as in marginal notations in MSS. With regard to their origin, these later translations are to be clearly distinguished from "the Septuagint," but as we shall see, the textual transmission of all these documents eventually became closely intertwined.

The rise of Christianity from JUDAISM in the 1st cent. of our era is usually given as the reason new Greek versions of the Hebrew Bible were needed. The Christian church first flourished in Jerusalem among Jews who recognized Jesus of Nazareth as the MESSIAH and who interpreted the death and resurrection of Jesus in light of the sacred Scriptures of the Judaism of their day. When Christianity spread outside the borders of Palestine, it was apparently the Greek version of the Jewish Scriptures from which the apostles, especially Paul, preached Christ. It is usually said that the resulting tension between Christians and Jews, both of whom used the Greek Bible but understood it so differently, was the primary reason for the synagogue to abandon the "Septuagint" to the church and to produce a new translation of the Hebrew texts.

While the early relationship between Christians and Jews no doubt played a major role in the history of the Greek versions, there was another factor that should not be overlooked. The DEAD SEA SCROLLS provide indisputable evidence that at the turn of the era, before the birth of Christianity, the text of the Hebrew Bible (for at least some of the books) circulated in more than one form. One of these, however, emerged as *the* standard text by the beginning of the 2nd cent., apparently supplanting all previous Hebrew texts. This situation alone would provide the need for a new Greek translation faithful to the newly standardized Hebrew text.

In addition, it is now clear that, even apart from Jewish-Christian polemics, there were different ideas about what a translation should look like. The discoveries in the Judean Desert have shed light on this issue as well. One of the more significant MSS found there is actually a Greek translation of the Minor Prophets. Dated no later than the 1st cent. of our era, it appears to be a revision of the "Septuagint" for those books of the Bible. This find provides clear evidence that prior to the 2nd-cent. debates among Jews and Christians, more than one Greek version of the Bible was in

circulation.

A. Aquila. According to ancient testimony, Aquila was a Gentile who had been commissioned by his relative, the Roman emperor HADRIAN, to superintend the rebuilding of Jerusalem (renamed Aelia Capitolina) around the year 128. While there, he became a Christian, but later converted to Judaism and studied under prominent rabbis. Aquila eventually undertook a new Greek translation of the Hebrew Bible that (a) was based on the recently standardized Hebrew text; (b) sought to correct perceived deficiencies in the LXX, including those that affected Jewish-Christian disputes; and (c) adopted a very literalistic approach that possibly reflected certain rabbinic methods of interpretation. Aquila's work, completed perhaps around the year 140, was received enthusiastically by the Greek-speaking Jewish communities and remained the form trusted by the synagogue well into the 6th cent. and beyond.

The literal character of Aquila's translation has not always been adequately understood. Some scholars have given the impression that Aquila was either incompetent or eccentric, but the facts suggest otherwise. To begin with, we should note that Aquila allowed himself some flexibility in the area of syntax. Instead of representing Hebrew grammatical forms in one-to-one fashion, he would sometimes use the resources of the Greek language to provide stylistic variation.

In the area of vocabulary, undoubtedly, Aquila's policy was to represent every detail in the most consistent fashion, even at the cost of acceptable Greek. For example, Ps. 22:12b (MT 22:13b; LXX 21:13b) says, "strong [bulls] of Bashan *surrounded* me." The Hebrew verb here, *kittĕrûnî* (piel of *kātar H4193*), happens to be related to the noun *keter H4195* ("turban"). Because this Hebrew noun is elsewhere rendered with the Greek *diadēma G1343* ("band, diadem"), Aquila boldly makes up a new Greek verb, *diadēmatizō*, so that his translation would carry over into English as, "strong ones of Bashan diademized me." We must not think that Aquila misunderstood the meaning of the Hebrew verb or that he was simply being reckless. He was clearly guided by the principle of providing one-for-one lexical correspondences, and he did so even in the case of particles and certain word-endings.

Almost surely, Aquila's method was intended as an aid to biblical exegesis, perhaps for people who had a minimal knowledge of Hebrew. (Cf. the way that "literal" English translations of the Bible are sometimes advertised as the next best thing to knowing Greek and Hebrew.) There is also reason to believe that he may have been following a specific rabbinic approach to interpretation, although this point is disputed. In any case, we should remember that some distinguished writers, even today, argue that translations ought to preserve both the content *and the form* of the original. And for modern biblical scholars interested in reconstructing the Hebrew *Vorlage* or parent text of a Greek translation, Aquila's consistent method makes that task simpler.

B. Symmachus. Little is known about the origins of the Greek version attributed to Symmachus. He is said by some sources to have been an EBIONITE Christian who produced the translation around the year 170 of our era. A major recent study identifies Symmachus as a Jew (not an Ebionite) who undertook this task around the year 200 for the Jewish community in Caesarea of Palestine (A. Salvesen, *Symmachus in the Pentateuch* [1991], 296 – 97, building on the work of A. van der Kooij).

Scholars who have studied what remains of this translation agree that the work was carefully done. Alison Salvesen has examined the exegetical features of Symmachus's version of the Pentateuch and its syntax and vocabulary. She concludes that Symmachus produced a Greek translation of the

Hebrew text of the Pentateuch that "combined the best Biblical Greek style, remarkable clarity, a high degree of accuracy regarding the Hebrew, and the rabbinic exegesis of his day: it might be described as a Greek Targum, or Tannaitic Septuagint" (ibid., 297; the term TANNAIM refers to rabbinic authorities during the first two centuries A.D.).

On the basis of syntactical and lexical characteristics found also in the other Greek versions, Salvesen concludes that Symmachus "certainly knew Aquila," "probably knew Theodotion," and it seems "likely" to her that he also knew of the LXX as he produced his translation for the Jewish community of Caesarea in Palestine around the year 200. In short, Symmachus "aimed to produce a translation in clear Greek which accurately reflected the sense of the Hebrew original. His respect for the LXX is evident: he revised it in the spirit of the original translators of the Pentateuch, ironing out their lexical inconsistencies and inaccuracies, yet preserving smooth diction where he found it and extending it where it was absent" (ibid., 26; L. Greenspoon [in *ABD*, 6:251] believes that Symmachus's work is primarily a revision of Theodotion).

Another specialist, similarly, states that Symmachus's work on the Major Prophets is characterized by clarity (representing Hebrew idioms with natural Greek expressions), variety (one Hebrew term may be represented with several Greek terms), and coherence. Although the translator allowed himself the use of exegetical expansions, his approach was sober. In general, the translation stands mid-way between Aquila and the LXX. (See J. González Luis, *La versión de Símaco a los profetas mayores* [1981], 367 – 68. Note, however, that in OT books where the LXX is very literal, Symmachus renders more freely than either the LXX or Aquila.)

C. Theodotion. The Greek translation attributed to Theodotion is especially problematic. According to the traditional view, Theodotion was a convert to Judaism who lived in EPHESUS in the late 2nd cent. Taking the existing Greek version as his base, he revised it toward the standard Hebrew text. His work—which may fairly be characterized as "literal," but not excessively so—includes features reminiscent of Aquila. One peculiarity is his penchant for transliterating (i.e., using Greek letters to represent the sound of the Hebrew) rather than translating certain words, such as difficult terms for animals and plants. His translation of the book of Daniel supplanted that of the "Septuagint" (better, the Old Greek), which was widely regarded as defective.

One of the problems with this description is that certain renderings once thought distinctive to Theodotion are now known to have existed a century or two before he lived. Note, for example, the reference to Dan. 6:22 (MT and LXX, 6:23) in Heb. 11:33. Although the author of Hebrews is otherwise heavily dependent on the "Septuagint," this passage reflects Theodotion's rendering, "[God] shut the mouths of the lions" (*enephraxen ta stomata tōn leontōn*), rather than the Old Greek, which says, "God saved me from the lions" (*sesōke me ho theos apo tōn leontōn*). This phenomenon led to speculation about the existence of a "proto-Theodotion" (*Ur-Theodotion*) and recent discoveries have confirmed the view that, for at least parts of the Hebrew Bible, a translation very similar to Theodotion's was already in use in the 1st cent. B.C. For a variety of reasons, most scholars now prefer to speak of *Kaige*-Theodotion, meaning by that term a well-defined, pre-Christian revision of the Old Greek. (One of its characteristics is the use of Gk. *kaige* to render Heb. *gam H1685* [with or without the conjunction *w*]. It is also thought that this revision became the basis for the work of both Aquila and Symmachus.) The work of the historical Theodotion may then be viewed as a later updating of the revision.

Also under debate is the question of Daniel-Theodotion in particular. Some have argued that the characteristics of this translation do not fit those found in materials otherwise attributed to

Theodotion. Moreover, doubts have been raised about the usual view that Daniel-Theodotion is a revision of the Old Greek. (See A. Schmitt in *BZ* 36 [1992]: 1 – 29; T. McLay, *The OG and Th Versions of Daniel* [1996].) These and other questions will continue to occupy scholars for years to come.

D. Other versions. In addition to "the Three," other attempts were made to translate parts of the Hebrew Bible into Greek. Some church fathers, for example, make reference to *ho Hebraios*, an ambiguous term that in some contexts appears to mean, "the Hebrew translator." One also finds quite a few references to "the Syrian" and nearly fifty to "the Samariticon." There is little that can be said with confidence about these versions. Moreover, as we shall see in the next section, Origen was familiar with three anonymous translations that have come to be known as Quinta, Sexta, and Septima. Of these, the Quinta is best attested, but not sufficiently to give us a complete picture.

V. Recensions. We have good reason to believe that by the middle of the 1st cent. B.C. or even earlier, the whole Hebrew Bible, with the possible exception of one or two books, had been translated into Greek. In the case of Judges, Daniel, and Esther (as well as Tobit, Susanna, and Judith, books not included in the Hebrew canon), two quite different Greek forms are found among surviving MSS. Most contemporary scholars believe that only one "original" Greek translation was made of each book prior to the Christian era, and that whatever differences are found between surviving texts of the same book reflect a revision of the Greek. In any case, by the turn of the era, at least one Greek translation of virtually every book of the Hebrew Bible was in circulation among Greek-speaking Jews.

In the past, scholars have made a fairly sharp distinction between two types of work produced subsequent to the "original" Septuagint: (a) new Greek translations of the Hebrew Bible, that is, primarily the three versions made by Aquila, Symmachus, and Theodotion; and (b) major recensions (systematic revisions) of the Septuagint itself. Following this traditional understanding, in the previous section we treated "the Three" as independent works to be distinguished from the LXX. Here, however, we focus again on the LXX as the original Greek version and ask questions about its transmission and revisions.

Unfortunately, the distinction between a revision and a new translation is very difficult to define clearly. After all, scholars today speak of *Kaige*-Theodotion as a revision, and even the work of Aquila is sometimes described this way. It remains true, however, that "the Three" were historically perceived, and probably intended, as new works more or less in competition with the LXX, whereas the "recensions" (Origen's in particular) were meant to provide reliable editions of the LXX itself.

The usual starting-point for a discussion of the recensions is a well-know comment by JEROME (c. 340 – 420), the most knowledgeable biblical scholar of his day. In his preface to Chronicles, Jerome complained that the Christian world was in conflict over three forms *(trifaria varietas)* of the LXX text: (a) one in Egypt, attributed to Hesychius; (b) a second dominant from Constantinople to Antioch and attributed to Lucian; and between them (c) Origen's (Hexaplaric) recension, used in Palestine. We know nothing about Hesychius, and scholars have been unsuccessful in identifying a Hesychian recension among the MSS (although for most biblical books there is such a thing as an Egyptian form of the text, which may be the basis for Jerome's comment). For all practical purposes, therefore, a description of the Christian recensions must be limited to those attributed to Origen and to Lucian of Antioch.

A. The Hexaplaric recension. The most important work on the text of the Greek OT was done by Origen, the Christian theologian of Alexandria (c. 185 to c. 254). After heading up the Christian catechetical school in Alexandria, Origen eventually settled in Palestine, in the city of CAESAREA. During this period he undertook the massive project of comparing the Greek versions known to him with the Hebrew text of his day, which apparently was close to what has come to us as the MT. Most of what is known about this work comes from two brief descriptions by Origen himself and from the writings of later church fathers who saw the work. Aware of the differences between the LXX and the Hebrew text, he set out to produce an edition that would take those variations into account. To accomplish his task he had the available texts written in parallel columns. For most of the OT he needed to use six columns, the feature from which the name of this work, the Hexapla, is taken. These columns contained the following: (1) the Hebrew text; (2) transliteration of the Hebrew text into Greek letters; (3) Aquila's translation; (4) Symmachus's translation; (5) the translation of the Seventy; (6) Theodotion's translation.

The purpose of the second column, containing a transliteration of the Hebrew into Greek letters, is somewhat puzzling. Some have suggested that it would have allowed a Greek speaker who did not know Hebrew to "read" (i.e., pronounce) the Hebrew Bible aloud, perhaps in the synagogue service. Others have thought that it enabled people who did know the Hebrew alphabet to vocalize a consonantal text. Before the early Middle Ages, the Hebrew text consisted of consonants only; the vowel sounds were to be inferred by the reader. Origen's second column may represent an earlier attempt to preserve the correct pronunciation of the Hebrew vowels for people whose native language was Greek and whose knowledge of Hebrew was not extensive.

The translations in columns 3 (Aquila), 4 (Symmachus), and 6 (Theodotion) of the Hexapla were described above. Column 5 contained the "Septuagint," apparently the standard Greek translation used by the Christian church at the time. It is usually thought that this column included the corrections that Origen believed needed to be made in light of the Hebrew text. For example, as he compared the texts of Isaiah, he found that several lines of the Hebrew in Isa. 40 (vv. 7b – 8a) were missing from the LXX, so he inserted that material into the text of the fifth column. According to some scholars, however, the fifth column contained an *uncorrected* text, so that the revised translation was really a separate, subsequent project for which the Hexapla was the preparatory work.

With regard to the order of the columns, we do not know Origen's rationale for it. One interesting theory is that of Harry M. Orlinsky (in *JQR* 27 [1936 – 37]: 146 – 47), who argued that Origen wanted "to provide his [Christian] contemporaries with the much needed facilities to learn Hebrew, and thus to be able to make use of all six columns of his Hexapla." After supplying the Hebrew text and a second column to help the reader pronounce it, Origen next included Aquila's version because its word-for-word representation of the Hebrew provided a "crib" for the reader. Since Aquila is often unintelligible, however, Symmachus was needed to clarify it. "And equipped with the knowledge gained from the first four columns, the reader was ready to tackle the most important column of them all, the LXX."

For the book of Psalms and possibly a few other books, Origen was able to use three more Greek versions (but not more than two at a time), so for these books he expanded his work to eight columns—thus the term *Octapla*. Virtually nothing is known about the origin of these anonymous versions, referred to as the Quinta, the Sexta, and the Septima (that is, the fifth, sixth, and seventh versions). Since Origen included their text for only a few of the books, apparently none of these three versions contained the complete OT in the MSS available to Origen. The Quinta—the best attested of these three versions—is believed to have included 2 Kings, Job, Psalms, Song of Solomon, and the Minor Prophets.

Given the way modern scholars refer freely to the Hexaplaric texts, including the translations of Aquila, Theodotion, and Symmachus, readers may be left with the impression that fairly complete and reliable copies of these Greek texts exist. In fact, actual specimens are preserved only in (a) quotations by other ancient writers, (b) marginal notes in a handful of MSS, and (c) a very few fragments of copies of the Hexapla. The largest and most significant fragment of a copy of the Hexapla is the Mercati palimpsest in the Ambrosian Library of Milan. In 1896 Giovanni Mercati discovered that the underwriting of this MS contains five of the six columns of the Hexapla for about 150 verses of the Psalms. It apparently never did contain the first column, the Hebrew text. This copy was written in cursive letters around the 10th cent.

It is estimated that the Hexapla would have required about 6,000 pages bound in fifteen volumes. Such a massive work would probably never have been copied in its entirety. The only copy we know of was deposited in the library in Caesarea, Palestine, under the care of Pamphilus, the Christian

martyr (c. 250 – 310). It was presumably destroyed with the library by Muslim Saracens in the 7th cent., if not earlier. The most comprehensive collection of Hexaplaric remains was published by F. Field over a century ago (*Origenis Hexaplorum quae supersunt sive veterum interpretum graecorum in totum Vetus Testamentum fragmenta* , 2 vols. [1875]). Since then, new fragments have been discovered and studied. In 1994, a new project was begun at Oxford University to produce a new, electronic database containing all the surviving evidence.

For students of the LXX, however, the most important issue surrounding Origen's work is the character of his revised Greek text, which presumably was to be found in the fifth column. (As mentioned earlier, however, some scholars believe that this column contained an unrevised text and that Origen's own recension was published separately.) Origen had set out to produce a restored Greek version of the Bible for the church, and his corrected text quickly became the standard OT for the eastern churches from Antioch to Alexandria. It was copied and promoted by church leaders for centuries. It, too, was called the "Septuagint," although it was no longer the same "Septuagint" text with which Origen had started out.

Origen himself states the purpose of this work in the *Letter to Africanus*, while the method he used is explained in his *Commentary on Matthew*. Apparently his purpose was to settle the dispute between Christians and Jews about the biblical texts. The Hexapla would show at a glance the Hebrew and all known Greek versions of it. Where the Greek Bible did disagree with the Hebrew Bible, Origen felt it important to "correct" the Greek version used *at that time* by the church to agree with the Hebrew version used *at that time* by the synagogue. In other words, Origen's purpose in constructing the Hexapla was quite different from the task of modern textual critics.

Origen may have been unaware that the Hebrew text available to him did not fully correspond with the Hebrew parent text from which the Greek translation had been produced. He could have easily been misled by the fact that in his day one standard Hebrew text already reigned supreme—the one that has survived today as the MT. We now know, however, that this text had undergone at least some development in the centuries before becoming standardized and that, for at least some books, the Hebrew Bible existed in more than one textual form. This means that the parent text from which any Greek translation had been made may or may not have had the same general form as the Hebrew text used by Origen. From the perspective of textual criticism, therefore, the basic assumption upon which he based his method was wrong. On the other hand, what looks like the work of a wrong-headed textual critic in the production of the Hexapla was actually the careful and valuable work of a well-intentioned Christian apologist.

As for his method, what Origen did was to compare the Greek of the LXX text, bit by bit, to the Hebrew text. The Greek sometimes had text that was not found in the Hebrew. Maybe these "pluses" had been in the Hebrew *Vorlage* from which the Greek was originally produced. Or maybe the pluses were introduced later as the Greek version developed independently of the Hebrew. In either case, out of respect for the sanctity of the LXX, Origen did not wish simply to delete Greek material not found in the Hebrew text. So he marked that material found in the LXX, but not in the Hebrew, with a special sign (an obelos). This and other signs used by Origen to mark his text are sometimes referred to as the Aristarchian symbols, because they had previously been used by an Alexandrian scholar named Aristarchus to do similar work on the various Greek texts of Homer.

Origen also found, however, that there was material in the Hebrew that was not in the LXX text. Perhaps the Hebrew *Vorlage* of the original translation did not contain the material, either because that Hebrew text was quite different from the one Origen had before him, or because the material was added to the Hebrew text after the Greek translation had been made. Or perhaps these minuses had

originally been in the Greek translation, but were omitted, either intentionally or accidentally, at some later time. In any case, Origen felt compelled to insert Greek text to correspond to his Hebrew text. He did this by referring to the other existing Greek versions. If one of them contained a reading which corresponded well, in his opinion, to the Hebrew reading, he inserted that reading into the Greek text of the fifth column, placing it between special signs (an asterisk and a metobelos).

Through this process, Origen introduced isolated readings pulled from Aquila, Symmachus, and Theodotion (and possibly from Quinta, Sexta, and Septima) into the "Septuagint" text. Although he marked the original material, those markings were not always preserved. After Origen completed his work, the fifth column—that is, his recension of the LXX—was copied by itself and became the authorized Greek version of the Bible for the Christian church in Palestine. Because Origen's symbols were reproduced imperfectly or not at all, it became impossible to identify the origin of the various readings. It was this text that from that time forward was widely copied and circulated, which means that surviving MSS of the "Septuagint," with few exceptions, have a mixed text. Origen may have accomplished his goal successfully, but he greatly complicated the work of modern textual critics. In effect, the great task of LXX textual criticism is to reconstruct the pre-Hexaplaric text, which means *undoing* Origen's labors so as to rediscover the form of the "Septuagint" in the 2nd cent.

B. The Lucianic recension. Lucian of Antioch, born in Syria about the middle of the 3rd cent., died as a martyr in the year 312. He was a controversial theologian and a very influential biblical scholar. While the specific extent and nature of his textual work remain uncertain, he apparently updated an existing Greek text of both the OT and the NT. His revisions seem to have been primarily stylistic in nature. (Some scholars doubt that Lucian personally had anything to do with such revisions. For a survey of Lucian's life and work, see especially B. M. Metzger, *Chapters in the History of the New Testament* [1963], 1 – 41.)

The resulting Lucianic recension is also referred to as the Antiochene or Antiochian text, partly because Lucian may have used as his base the Greek text (perhaps Origen's fifth column?) that was then current in ANTIOCH OF SYRIA, partly because his revision was best known in that city. Lucian's recension is believed to be quoted in the writings of later Antiochene scholars such as Chrysostom and Theodoret. Moreover, isolated readings in the margins of several Greek and Syriac MSS are marked by the letter *l* (Gk. *lambda* and Syriac *lomadh*), and many of these readings should no doubt be recognized as Lucianic. With these clues, scholars have been able to identify, for most books, a large number of MSS as containing the Lucianic recension.

The revision commonly attributed to Lucian, or more vaguely to the Syrian church, is especially evident in the book of Psalms and in the NT. Indeed, most of the surviving MSS that include either of those two portions of the Greek Bible contain a revised text that is somewhat fuller—and stylistically more homogeneous—than other text forms. Whether or not Lucian was responsible for this work, it is generally agreed that the revision can be traced back to Antioch around the year 300. In addition to the Psalter, the Lucianic or Antiochene recension of the LXX is clearly attested in the Prophets and in some of the historical books (esp. Samuel-Kings-Chronicles). For the Pentateuch, however, scholars have been unable to identify a Lucianic text.

The most difficult and important problem related to this recension has to do with the presence of "Lucianic" readings attested long before Lucian lived. The Old Latin version (a translation from the Greek OT produced in the 2nd cent. of our era), as well as biblical quotations from such Latin fathers as Tertullian (who died early in the 3rd cent.) and Cyprian (d. 258), occasionally reflect a text that has some distinctives normally associated with the Antiochene text. Even earlier, Greek writers such

as Justin Martyr (d. 165) and especially Josephus (c. 37 – 100) appear to have used a biblical text resembling that of the Antiochene recension. Most puzzling of all, one of the Hebrew fragments of Samuel discovered at QUMRAN (4QSamª) also shows important points of contact with the Lucianic text.

Although some of the evidence has been disputed, many scholars speak of a proto-Lucianic text, meaning by that term an early revision of the LXX (better, OG) that brings it closer toward the Hebrew text. If so, the historical Lucian may have used such a revised text as the basis for his own revisions. This two-layer view helps to explain why the Lucianic or Antiochene text is characterized by two opposing tendencies: (a) on the one hand, the Lucianic MSS contain many readings that are closer to the Hebrew text than are those found in the other LXX MSS; (b) on the other hand, many of the stylistic changes in the Lucianic recension tend to move the Greek text away from the Hebrew. This problem is solved if "Lucian" made his stylistic alterations on a text that had earlier been adjusted toward the Hebrew.

VI. Ancient witnesses. While most of the surviving biblical texts have come to us through continuous transmission over the centuries, many other MSS have come to light only in modern times as a result of archaeological work. Indeed, ancient biblical texts dating as far back as the pre-Christian era have been found in archives of papyri excavated by archaeologists (see PAPYRUS). Manuscripts discovered in this way are extremely valuable, because they preserve the text as it existed when it was buried and have not been subjected to the vicissitudes of copying throughout subsequent centuries. The 4th-cent. CHESTER BEATTY Papyrus IV (= Rahlfs 961), one of the most significant finds, contains Gen. 9:1 —44:22. Most papyrus fragments, however, contain small portions of biblical text—sometimes only a few letters or words. Therefore, while the papyri provide very ancient and important testimony of the text at the time they were buried, such little material makes it difficult to generalize about which form of the Greek Bible they represent.

Among important biblical papyri in Greek, the two earliest documents deserve special notice. Papyrus Fouad 266 (= Rahlfs 847 and 848), dated to c. 100 B.C., contains small portions of Deuteronomy that have great significance for the reconstruction of the text. Even earlier by perhaps half a century is PRyl. 458 (= Rahlfs 957), which contains about twenty scattered verses from Deut. 23 – 28. A few additional documents from the following two centuries have survived, and there are many other papyrus fragments of the Greek Bible that date from the 3rd cent. of our era and later.

One of the most dramatic papyrological finds began in 1947 when the first of the Judean Desert materials (popularly known as the DEAD SEA SCROLLS) came to light. Over the following decade, texts were found in eleven caves at Qumran, on the NW shore of the Dead Sea, and its environs. Most of these texts are in Hebrew and Aramaic, but Caves 4 and 7 preserved a small number of biblical texts in Greek. They are fragments of the Pentateuch, specifically Leviticus, Numbers, and Deuteronomy. A wider area of the Judean wilderness produced other significant finds, especially an entire scroll of the Minor Prophets in Greek (not to be confused with the Minor Prophets scroll in *Hebrew* discovered at Murabba<at). All of these documents are dated to the 1st cent. of our era or earlier.

In addition to the papyri, there are other early and important MSS written on PARCHMENT; they are referred to as *uncials* because they are written in the uncial or majuscule script (one should keep in mind, however, that the papyri are written in that same script). The three best-known biblical uncials contain the books of both the OT and the NT: CODEX VATICANUS (B), a 4th-cent. MS of exceptionally high quality that for most books of the OT has preserved a text relatively free from Hexaplaric

influence; CODEX SINAITICUS (S or ℵ), produced about the same time, and usually having a text similar to that of B (unfortunately, very little of the Pentateuch and of the historical sections has been preserved); and CODEX ALEXANDRINUS (A), copied in the 5th cent., which in spite of showing many signs of Hexaplaric influence, is very valuable (in the book of Isaiah, for example, it is our best witness).

Among other important uncials, the following are worth special attention. Codex *Colberto-Sarravianus* (G), dated about the year 400, preserves portions of Genesis to Judges; its significance lies in the fact that it retains the Hexaplaric signs (although these are not always trustworthy). Codex *Coislinianus* (M), copied in the 7th cent., includes Genesis to 2 Samuel and the first chapters of 1 Kings (= 3 Reigns or 3 Kingdoms). Codex *Basiliano-Vaticanus* is an 8th or 9th cent. uncial with the double designation N-V; one portion (N) is in the Vatican Library and contains much of the Pentateuch (beginning with Lev. 13:59) and also the historical books; the other portion (V, also known as Codex Venetus) is in Venice and contains most of the poetic books, the Prophets, Tobit, Judith, and 1 – 4 Maccabees. Finally, Codex *Marchalianus* (Q) is a beautiful and very well preserved MS of the Prophets, dating from the 6th cent.; it contains an excellent text and includes the Hexaplaric signs.

Finally, well over 1,500 cursive or minuscule MSS of (parts of) the LXX have been preserved. Because they are later than the papyri and the uncials, they are relatively less important, but it would be a great mistake to ignore them. In the first place, a minuscule produced, say, in the 13th cent. may be a copy of an uncial dated many centuries earlier; if so, the text preserved in the minuscule is much more ancient than the MS itself. Moreover, the minuscules broaden our knowledge base significantly and thus help us to assess the value of the uncials in a more accurate way (a specific reading in a valuable uncial may be suspect if it is not broadly attested). Among interesting cursives, we may note especially the famous Chigi MS (88), which has two distinctions: it is one of the few MSS that include the Hexaplaric signs, and it is the only Greek MS that has preserved the Old Greek (rather than the Theodotionic) version of Daniel in its entirety. An important group of cursives that deserves attention is most frequently referred to by the lower-case letter designations boc_2e_2; these minuscules constitute our primary witnesses to the Lucianic or Antiochene text of Samuel-Kings.

In addition to Greek MSS, we have the evidence of "secondary versions" and of ancient citations. As the Christian church expanded, the translation of the Bible into other languages became necessary. Such translations, *when made from the Greek* (rather than from the Hebrew), have great value to scholars who try to identify and date distinctive features of the different Greek versions. If a translation of the Greek into another language was made before Origen produced the Hexapla, that translation offers, at least in theory, a witness to what the Greek text(s) looked like in the earliest centuries of the church. However, the secondary translation has also suffered the vicissitudes of time and transmission, which means that *its* original text must be established before we can use it to reconstruct its Greek *Vorlage*. It should also be kept in mind that these translations cannot always represent the Greek parent text precisely, and therefore their witness must be used with caution.

In the first few centuries of this era, Latin was the language not only of Italy but of other areas as well, including parts of N Africa. When the first translation of the Bible was made into Latin, it was made from a Greek text. This Latin version, referred to as the *Vetus Latina* or Old Latin (OL), was eventually replaced in the Latin-speaking church by Jerome's translation made in the early 5th cent. Jerome's work, known as the VULGATE, was a direct translation of the OT in Hebrew. In contrast, surviving MSS of the OL translation attest to a Greek *Vorlage*. Syriac (a member of the ARAMAIC family) was the language of a large and important section of the Christian church for many centuries.

The *Syro-Hexaplar* (sometimes spelled Syro-Hexapla), an important secondary translation of Origen's Hexaplaric recension, was produced between the years 613 and 617. This work, translated from the Greek, is to be distinguished from the standard Syriac Bible, known as the Peshitta, which had been translated from the Hebrew about the 2nd cent. Translations of the LXX into Coptic (a late form of the Egyptian language) have been preserved in both the Sahidic and Bohairic dialects; they are an important witness to a valuable early Greek text used in Egypt. Other languages into which the LXX was translated include Arabic, Ethiopic, Armenian, Slavonic, and Georgian. Not many LXX scholars are competent in one or more of these languages, and relatively few MSS of these translations have survived.

Another secondary or indirect source for the Greek texts consists of quotations from the Bible surviving in ancient writings, especially the large corpus of the Christian fathers. In many ways, the value of these quotations for establishing the Greek text in use at that time is even more tenuous than consulting the secondary translations. This is because the writings of the fathers were themselves copied by scribes who may have edited the quotations to agree with the text known and used in their time and locale. Therefore, the textual critic must first establish how patristic writers originally quoted the passage. Moreover, one cannot be sure that they quoted a biblical verse word-for-word. They may have paraphrased it or omitted short phrases that were irrelevant to their point. These complications notwithstanding, it appears that the quotations of certain fathers agree more closely with the readings of some surviving MSS than with others. For instance, Chrysostom and Theodoret, both of Antioch, are considered to be primary witnesses to the Antiochene text as revised by Lucian.

VII. Modern editions. With the invention of the printing press in the 15th cent., it became possible to take a book and produce numerous copies that were exact replicas of one another. Mass duplication virtually eliminated the tedious work of scribes and prevented the inevitable errors and changes they introduced into the texts. When the first printed editions of the LXX were produced, however, the choice of a biblical text by the printers was sometimes based simply on which MSS were conveniently at hand rather than on deliberate selection, much less scholarly scrutiny. In a given codex the text of one biblical book may have been from Theodotion, for example, while another book in the same codex may have contained the Hexaplaric recension of the LXX. If a given codex was damaged, and therefore lacking all or part of a biblical book, the lacking text would be supplied from another codex near at hand, without thought to the pedigree of the texts contained therein. While the advent of modern printing technology stabilized the printed editions of the Bible, giving the appearance of homogeneity, the particular version it preserved and propagated was in fact an arbitrary amalgam of texts with various pedigrees and characteristics.

The first printed edition of the entire Greek OT was produced by Christian scholars in Spain between 1514 and 1517, then published a few years later as part of the *Complutensian Polyglot Bible*. The OT was presented in three columns: the Latin Vulgate with pride of place in the middle, the Hebrew text on its right, and the Greek text (with a Latin interlinear translation) on its left. In addition, the Aramaic Targum, accompanied by a Latin translation, was placed at the bottom of the page. This work was initiated and directed by Cardinal Francisco Ximenes de Cisneros, who claimed to have carefully selected his MSS, including some supplied by Pope Leo X from the Vatican library.

At about the same time, the so-called *Aldine* edition of the Greek Bible, based on a few, relatively late MSS, was published in Venice. Of greater importance is the *Sixtine* edition, published in 1587 under the auspices of Pope Sixtus V. This project was undertaken with care and

thoroughness. After searching for MSS in various libraries, the editors, led by Cardinal Antonio Carafa, became convinced that what is now known as Codex Vaticanus or B (Vatican Library Gk. 1209) was the best MS upon which to base the new edition. Other MSS were used to fill the large gaps and correct errors in B, as well as to provide alternate readings from time to time. The Sixtine edition became the standard LXX text and was used by many subsequent editors.

In the 17th and 18th centuries, scholars began to collect and publish variant readings, that is, differences among the MSS for any given verse. This process gave birth to modern textual criticism and to the practice of publishing editions of ancient texts that include a critical apparatus (i.e., a section of notes indicating variant readings, usually found at the bottom of the page). The British scholars Robert Holmes and (after his death in 1805) James Parsons produced such an edition in five large volumes, which was published in Oxford between 1798 and 1827, under the title, *Vetus Testamentum Graecum cum variis lectionibus*. Using the Sixtine text as their base, this monumental work provides readings from about 300 MSS collated by a large number of British and Continental scholars. From our later vantage point, the methods used in this work can be easily criticized; and since the quality of the collations was not uniform, the edition must be used with care. Even today, however, specialists know that certain kinds of information can be found only in Holmes-Parsons.

Other editions were published during the 1800s, though none of them was truly satisfactory. Toward the end of that century, however, scholars in Cambridge, England, began to work on a diplomatic edition of Codex Vaticanus (i.e., an edition that reproduces as exactly as possible the text of the MS, although obvious scribal errors are corrected). This important document was collated against all the available uncials, many minuscules (thirty in Genesis, for example), the secondary versions, and quotations from Philo, Josephus, and the Christian fathers. A preliminary "portable" edition in three volumes, entitled *The Old Testament in Greek according to the Septuagint*, was produced by H. B. Swete in 1887 – 94 (3rd edition, 1901 – 07), and became the most widely used text during the first decades of the twentieth century. The more ambitious project, often referred to as the Larger Cambridge edition, was entrusted to A. E. Brooke and N. McLean, and in 1906 it began to be published in fascicles. Although never completed, this work is a great treasure; for the books of Joshua through Chronicles, it remains our primary source of information.

Given that every MS contains scribal errors and that no one existing MS preserves in its entirety the Greek text as it originally came from the translator or reviser, a different approach can be taken, namely, the production of a *critical text*. Instead of printing the entire text of one MS, an editor or editorial committee examines the textual variants and decides which reading is most likely original. This approach produces a reconstructed text, often referred to as *eclectic*, because the resulting printed text is not identical to *any* MS in its entirety. Although the text that appears on the printed page of such an edition is not found in any one surviving MS, it preserves the best readings selected from among all of them and is therefore closer to the text of the original documents.

The production of a critical text for the LXX has been the goal of many scholars. Above all, however, it was the vision of a brilliant and controversial scholar named Paul de Lagarde, whose work was taken up upon his death in 1891 by his student, Alfred Rahlfs. As a means to that end, a scholarly center known as the Septuaginta-Unternehmen was established in Göttingen in 1908. This organization soon became the world's primary center for LXX research. As its director, Rahlfs devoted his considerable talents and energies to searching for MSS, evaluating them, and designing a new system for their enumeration, as well as producing some of the most penetrating textual studies in the history of LXX scholarship.

Work on a full critical edition had to be postponed because of the First World War and its

aftermath, but Rahlfs undertook the production of a provisional critical edition, which appeared just before his death in 1935. His text is based primarily on the three great uncials—Vaticanus, Sinaiticus, and Alexandrinus—but many other sources were used extensively. Rahlfs's edition, in spite of its provisional character, has since been regarded as the standard LXX text, even though for many books of the Bible it has now been superseded by individual volumes of the larger project, often referred to as "the Göttingen Septuagint."

For the fuller edition, Rahlfs himself published the volume on Psalms (and Odes) in 1931, though he emphasized the preliminary character of the work, since it was not based on fresh collations. Subsequently, Werner Kappler, Joseph Ziegler, Robert Hanhart, John W. Wevers, and Udo Quast have produced over twenty full and authoritative volumes. Entitled *Septuaginta: Vetus Testamentum Graecum*, this project combines a judiciously reconstructed critical text with a virtually exhaustive repository of information from all available sources.

Translations of the LXX into modern languages are not common. An English version was produced in the 18th cent. by Charles Thomson and published in 1808 (rev. ed. by C. A. Muse, *The Septuagint Bible: The Oldest Version of the Old Testament in the Translation of Charles Thomson* [1954]). More widely used has been the translation by Lancelot C. L. Brenton (*The Septuagint Version of the Old Testament* [1844], reprinted frequently under the title *The Septuagint with Apocrypha*). Because these English versions are based on unreliable texts and are otherwise problematic, the International Organization for Septuagint and Cognate Studies has sponsored a modern work entitled *A New English Translation of the Septuagint* (2007). Special mention should be made of *La Bible d'Alexandrie*, a multivolume French translation of the Septuagint with a philological and exegetical commentary that pays special attention to the patristic use of the Greek OT. In 1990, John W. Wevers published a very helpful commentary, *Notes on the Greek Text of Exodus*, which was followed by individual volumes on the other books of the Pentateuch. Other commentary projects are in preparation.

(The classic source for information on Septuagint studies is H. B. Swete, *An Introduction to the Old Testament in Greek*, 2d ed. [1914], which includes documentation for many of the details mentioned in this article. Much of Swete's material is updated in Sidney Jellicoe, *The Septuagint and Modern Study* [1968], and in N. Fernández Marcos, *The Septuagint in Context: An Introduction to the Greek Version of the Bible* [2000]. See also M. Harl et al., *La Bible Grecque des Septante: Du judaïsme hellénistique au christianisme ancien*, 2nd ed. [1994]; K. H. Jobes and M. Silva, *Invitation to the Septuagint* [2000]; F. Siegert, *Zwischen Hebräischen Bibel und Alten Testament: Eine Einführung in die Septuaginta* [2001]; M. Hengel, *The Septuagint as Christian Scripture: Its Prehistory and the Problem of Its Canon* [2002]; R. T. McLay, *The Use of the Septuagint in New Testament Research* [2003]; J. K. H. Jobes; M. Silva
sepulchre. See TOMB.

Sepulchre, Church of the Holy. An ancient church in Jerusalem, purportedly located over sites of Christ's crucifixion, burial, and resurrection, and hence regarded by many as the greatest "holy place" of Christendom. In locating the place of our Lord's passion, the NT states only that his death occurred "near the city" (Jn. 19:20), at "the place of the Skull (which in Aramaic is called Golgotha)" (v. 17), and that his burial was in a garden "where Jesus was crucified," in "a new tomb, in which no one had

ever been laid" (v. 41). It was hewn out of the rock, and owned by Joseph of Arimathea (Matt. 27:60).

Tombs would naturally lie outside the walled areas of a city, but the site of the "holy sepulchre" remains otherwise unidentifiable. After the destruction of Jerusalem by the Romans in A.D. 70, but especially after the devastation in A.D. 135—which was followed by a leveling of the entire area, the banishment of all Jews (including Christian Jews), and the construction of the completely new Roman city of Aelia Capitolina on the site—any preserved memory of the exact spot of Jesus' tomb would seem unlikely.

The Church of the Holy Sepulchre occupies a spur of the NW hill of Jerusalem. It lies within the present N wall of the Old City, which approximates that of Aelia Capitolina and of the N wall of Herod Agrippa I (A.D. 41 – 44); whether it lay N, and hence outside, of the previous wall that is described by Josephus (*War* 5.4.2) has been a matter of debate (see Jerusalem III.B). In any event, the site was used for a 2nd-cent. Roman forum, at the W end of which were erected temples to Jupiter, Juno, and Venus.

At Christianity's official recognition at the Council of Nicaea in 325, Bishop Macarius of Jerusalem was authorized by the emperor Constantine to tear down the temples. Beneath the temple erected to Venus, Macarius recovered a cavern, and this site has traditionally marked the "holy sepulchre." An argument, however, that favors this tradition lies in the unlikelihood that a spot *within* the then city of Jerusalem would have been selected by Macarius. Constantine immediately authorized the erection of a magnificent church, which was dedicated in 335.

Aerial view of the domes of the Church of the Holy Sepulchre. (View to the S.)

The church was constituted of the *Anastasis* ("resurrection")—a rotunda resting on columns over the tomb, from which the surrounding rocks were cut away and to which the present rotunda corresponds—and a large basilica to the E, with courts both to its E and between it and the Anastasis. The church was badly damaged at the Persian conquest of Jerusalem in 614, and after the Arab occupation in 638 the Omariyeh Mosque took the place of its forecourt. In 1009 the Fatimid caliph

Hakem did not simply demolish the church and its relics but had the very rocks of the supposed GOLGOTHA and sepulchre cut away and destroyed. The Anastasis alone was subsequently rebuilt in 1048 from funds supplied by the Byzantine emperor Constantine IX, Monomachus; it was honored by the Crusaders as the supreme object of their campaigns.

The church was inartistically restored and the formerly open dome closed in by the Greek community in 1809. Then in 1961 reconstruction was begun in order to restore more of its ancient form. Restoration of the dome was completed in 1997. Little remains to suggest the original sepulchre, which is more effectually visualized at the Garden Tomb and Gordon's Calvary, N of the Damascus Gate, but this is an unauthenticated site that has received notice only since 1867. (See W. Harvey, *Church of the Holy Sepulchre: Structural Survey* [1935]; A. Parrot, *Golgotha et Saint-Sepulcre* [1955]; K. Kenyon, *Jerusalem: Excavating 3000 Years of History* [1967], 147 – 54; J. Wilkinson, *Jerusalem as Jesus Knew It: Archaeology as Evidence* [1978], 190 – 94; D. Bahat in *BAR* 12/3 [Sept.-Oct. 1986]: 26 – 45; C. Morris, *The Sepulchre of Christ and the Medieval West* [2005].)

<div align="right">J. B. PAYNE</div>

Serah sihr'uh (שֶׂרַח *H8580*, possibly "abundance, prospering"). Daughter of ASHER and granddaughter of JACOB (Gen. 46:17; Num. 26:46 [KJV, "Sarah"]; 1 Chr. 7:30). Aside from DINAH (Gen. 46:15), Serah is the only daughter mentioned in any of these lists, and Jewish tradition has attempted to explain this peculiarity in various ways. The biblical text itself gives no explanation, although one of the references (Num. 26:46) may hint that one of the Asherite clans was descended from her.

Seraiah si-ray'yuh (שְׂרָיָה *H8588* and שְׂרָיָהוּ *H8589* [only Jer. 36:26], "Yahweh has persevered" or "Yahweh has shown himself ruler"; cf. *HALOT,* 3:1356, and J. D. Fowler, *Theophoric Personal Names in Ancient Hebrew* [1988], 108). (1) A royal secretary (see SCRIBE) in DAVID'S court (2 Sam. 8:17). For the variations on his name and further discussion, see SHAVSHA.

(2) Son of Azariah, descendant of ZADOK, and chief priest at the time of the fall of Jerusalem; he was seized and put to death at RIBLAH by NEBUCHADNEZZAR, probably not for anything he had done, but because he was a symbol of Hebrew autonomy (2 Ki. 25:18 – 21; Jer. 52:24 – 27; 1 Chr. 6:14). Seraiah was the father of JEHOZADAK, who was taken into exile by Nebuchadnezzar (1 Chr. 6:14 – 15); the grandfather of JESHUA, postexilic high priest (cf. Hag. 1:1 et al.); and an ancestor of EZRA (Ezra 7:1, where "son" means "descendant"; cf. 1 Esd. 5:5; 8:1; 2 Esd. 1:1 [KJV Apoc., "Saraias"]).

(3) Son of TANHUMETH from NETOPHAH and one of the military officers who supported GEDALIAH at MIZPAH (2 Ki. 25:23; in Jer. 40:8 the descriptive "Neophatite" is applied not to Tanhumeth but to EPHAI). Gedaliah, who had been made governor by Nebuchadnezzar, advised them to accept Babylonian rule and promised to treat them fairly (2 Ki. 25:24; Jer. 40:9 – 10).

(4) Son of KENAZ and brother of OTHNIEL, listed in the genealogy of JUDAH (1 Chr. 4:13 – 14).

(5) Son of Asiel and grandfather of Jehu; the latter is listed among the clan leaders in the tribe of SIMEON whose families increased greatly during the days of King HEZEKIAH and who dispossessed the Hamites and Meunites near Gedor (1 Chr. 4:35; cf. vv. 38 – 41).

(6) An Israelite mentioned among leading individuals who returned from Babylon with ZERUBBABEL (Ezra 2:2; 1 Esd. 5:8 [KJV, "Zacharias"]; apparently called AZARIAH in Neh. 7:7). Perhaps he is the same Seraiah as a priest mentioned elsewhere (Neh. 12:1, 12).

(7) A priest who signed the covenant of Nehemiah (Neh. 10:2). Some identify him with #6 above.

(8) Son of Hilkiah; he is listed among the priests who settled in Jerusalem and is described as "supervisor in the house of God" (Neh. 11:11 [some scholars emend this text so that the description applies to Jedaiah]; apparently called Azariah in 1 Chr. 9:11).

(9) Son of Azriel; he was one of the officials of king JEHOIAKIM who were commanded to arrest JEREMIAH and his scribe BARUCH because of Jeremiah's prophecies that had been read to the king (Jer. 36:26).

(10) Son of Neriah (thus brother of Baruch, Jer. 32:12); he was a staff officer (see QUARTERMASTER) to whom Jeremiah gave a scroll so that he might read its prophecy to ZEDEKIAH in Babylon (Jer. 51:59 – 64). The name "Seraiah [ben] Neriah" occurs in a seal impression dated to the 7th cent. B.C. and is thought to refer to the individual mentioned in Jeremiah (see N. Avigad in *IEJ* 28 [1978]: 56).

<div align="right">A. K. HELMBOLD</div>

seraph, seraphim ser'uf, ser'uh-fim (שָׂרָף *H8597* [pl. שְׂרָפִים], possibly "glowing, burning," or "noble"). KJV "seraphims" (superfluous English pl. form). There are only two references in the Bible to the seraphs (Isa. 6:2, 6). The number of these creatures is not given. Each seraph is said to have six wings, a face, hands, and feet (the latter many scholars regard as a euphemism for the genitalia). Two wings covered the face, two covered the feet, displaying humility before God, and with two they flew. They expressed themselves in words that human ears comprehended (6:3, 7). The description seems to suggest a six-winged, humanoid figure *(cf. ANEP, plate 655).*

Seraphs are described by some scholars as winged demons or as guardian-griffins (called *šerref* in Egyp. [BDB, 977]). Others make a connection with the snake cults of the ANE, pointing both to the FIERY SERPENTS (KJV) that afflicted the Israelites in the wilderness and to the apotropaic bronze serpent (see NEHUSHTAN), which later was destroyed because it had become an object of worship (Num. 21:6 – 9; 2 Ki. 18:4). According to this view, the term for "fiery [serpent]" (*śārāp;* cf. also Deut. 8:15; Isa. 14:29; 30:6), which possibly alludes to the "burning" sting of the snakes' fatal bite or to their bright "glowing" color, is the same term used for "seraph." However, the seraphs as described by Isaiah are more like men than snakes. Moreover, although they handled hot coals from the altar (Isa. 6:6 – 7) or may have had fiery countenances, some scholars have thought that their name is derived, not from the verb meaning "to burn" (*śārap H8596*), but from a different Semitic root preserved in Arabic *šarafa*, "to be noble," suggesting that the seraphs were regarded as "princes" or "nobles" (*Gesenius' Hebrew and Chaldee Lexicon* [1859], 795 – 96; this and other etymologies are not widely accepted, however).

The seraphs or seraphim were probably an order of supernatural or angelic beings (see ANGEL) similar to the CHERUBS, possibly related to the living creatures of Rev. 4:6 – 8. They stood beside or hovered above the heavenly throne of God as functionaries and attendants. They acted as agents and spokesmen for God (Isa. 6:6 – 7). A chief duty was that of praising God (6:3). It has been suggested that this act was accomplished antiphonally with the seraphs on one side of the throne responding to those on the opposite side. They probably were not threshold guardians as some believe that Isa. 6:4 implies. (In addition to commentaries on Isaiah, see K. R. Joines in *JBL* 86 [1967]: 410 – 15, and J. de Savignac in *VT* 22 [1972]: 320 – 25; cf. also *NIDOTTE*, 3:1289 – 91; *DDD*, 742 – 44.)

<div align="right">D. E. ACOMB</div>

Serapis si-rah'pis (Gk. Σέραπις [earlier Σάραπις], from Egyp. *Osir-Ḥapi,* i.e., *Osiris-Apis,* sacred bull at MEMPHIS). Also Sarapis. A Greco-Egyptian deity whose cult was instituted by PTOLEMY I (reigned 305 – 282 B.C.) at ALEXANDRIA, in a temple known as the Serapeum. Ptolemy perhaps intended to unite his Egyptian and Greek subjects in the worship of this god, but he attained only limited success. As a ZEUS-like figure, Serapis gained great popularity in the Greco-Roman world as a god of the afterlife, of fertility, of healing. He was a savior (e.g., of seafarers), giver of oracles and dreams, and linked with (or identified with) Helios, ASCLEPIUS, and other gods. To Egyptians, Serapis remained simply a form of OSIRIS, their god of the netherworld, fruitfulness, etc. (See H. I. Bell, *Cults and Creeds in Graeco-Roman Egypt* [1953]; J. E. Stambaugh, *Sarapis under the Early Ptolemies* [1972]; S. A. Takács, *Isis and Sarapis in the Roman World* [1995]; R. Merkelbach, *Isis-regina, Zeus Sarapis: Die griechisch-ägyptische Religion nach den Quellen dargestellt* [1995]; *OCD,* 1355 – 56.)

K. A. KITCHEN

Sered sihr'id (סֶרֶד *H6237,* derivation uncertain; gentilic סַרְדִּי *H6238,* "Seredite" [KJV, "Sardite"]). Son of ZEBULUN, grandson of JACOB, and ancestral head of the Seredite clan (Gen. 46:14; Num. 26:26).

Sergius Paulus. See PAULUS, SERGIUS.

serjeant. KJV form of "sergeant," used to render Greek *rhabdouchos G4812,* which means literally "staff-bearer" but is used in a sense comparable to that of "[police] officer" (Acts 16:35, 38). The specific office in view is that of the Roman *lictor,* who functioned as a personal attendant or bodyguard, especially for MAGISTRATES (i.e., PRAETORS).

Sermon on the Mount. Traditional title given to Jesus' discourse recorded in Matt. 5 – 7. The term was apparently first used by AUGUSTINE (c. A.D. 400) in his Latin commentary on the Gospel of Matthew, and it was established in English usage by a notation in the Coverdale Bible (1535).

    5. Metaphorical conclusion

I. Unity. Even though it is a moot question whether the material in Matt. 5 – 7 was ever preached as a

sermon or not, many have found a lack of unity and a discontinuity in Matthew's account, pointing to a collection of disjointed sayings rather than to a homiletical development. Others have found a unifying theme and the development of thought toward a climax.

A. Arguments against unity. There are three basic arguments advanced against the unity of the sermon. These would tend to support the view that it was not delivered as a sermon, or that it is not a historical account of the single sermon in the setting ascribed to it (Matt. 5:1).

1. Nature of the material. Much of the material seems to be the epitome of what Jesus taught. A vast range of teaching is condensed and summarized in pithy statements that need to be reflected upon at length. These pointed gnomic sentences were characteristic of Jewish religious teaching, which sought to compress and distill important truths into easily remembered, graphic statements.

2. Disconnection of parts. Various parts of the sermon (e.g., Matt. 5:31 – 32 and 7:7 – 11) seem to have little, if any, connection with what goes before or follows in each instance. Some sections seem to be self-contained sermonettes (e.g., 6:1 – 6, 16 – 18). The sermon has been believed to contain a mosaic of some of the more striking fragments of as many as twenty of Jesus' discourses.

3. Parallels in Luke. The account in Lk. 6:17 – 49, commonly called the Sermon on the Plain, has been used against the unity and historicity of the Sermon on the Mount. Luke's material consists of only 30 verses, in comparison with 107 in Matthew. All but six of Luke's verses have more or less close parallels with Matthew's account of the sermon, while 47 verses in Matthew have no parallel at all in Luke. Moreover, 34 additional verses in Matthew have parallels elsewhere in Luke in various different settings. Because of these differences, from Augustine to the Reformation it was generally believed that Matthew's Sermon on the Mount was a different discourse from Luke's Sermon on the Plain.

Modern scholarship, however, has concluded that the differences between Matt. 5 – 7 and Lk. 6:17 – 49 are indications that Matthew received his material from two sayings-sources. The overlapping material between Matthew and Luke is assigned to a source they supposedly had in common, usually designated "Q." The material in Matthew that fails to overlap Luke is usually assigned to a second source called "M." There are also some minor differences in language in some of the parallel verses that are best explained by a multiple-source theory. See GOSPELS III.B.

B. Arguments for unity. Many able expositors have found a logical sequence in the sermon and a thematic development that they believe point to the essential coherence of Matt. 5 – 7 as a literary unit, although not necessarily to its exact historic setting.

1. Character of the audience. It is pointed out that the sermon was not delivered to a general audience nor to novices, but to selected disciples who had been for some time in association with Jesus. The reason given for Jesus' going up the mountain was to escape the crowds (Matt. 5:1). The sermon was thus addressed to the disciples and not the crowds, though the latter may have been sitting on the fringe of the disciple group. Matthew omits all indications of date, and it is incorrect to assume that it was at the beginning of Jesus' ministry. Jesus here is a teacher, not an evangelist.

2. Thematic development. Because of a central idea that is developed throughout the sermon progressing to a climax, many have held to the essential unity of Matt. 5 – 7. The theme, however, has been variously stated: "Christ's Idea of Righteousness," "The Goal of Life," "The Ideal Christian Life," and so on. Perhaps it is best to designate the theme as "the gospel of the kingdom" (4:23). The phrase "the kingdom of heaven" was Matthew's usual way of expressing the equivalent of "the kingdom of God," which is found in parallel passages in Luke. As would be immediately apparent, the understanding of what was meant by "kingdom" (whether literal or a reference to present reality) becomes determinative in the application. See KINGDOM OF GOD.

3. Editorial possibilities. It has been asserted that it is of no great importance to determine whether Matthew and Luke give divergent reports of the same sermon or of two similar but distinctive sermons. It is a false assumption that the writer of each gospel told all that he knew and that what he did not tell was unknown to him. It is also false to assume that Jesus never repeated his teachings so that different reports of his words must be related to the same situation. It seems obvious also that Luke has edited out of his account the material that would have a special Palestinian-Jewish coloring. Matthew's account is characterized by such detail. If two sources lie ultimately behind Matt. 5 – 7, it is not impossible that Jesus himself combined the materials from two sermons that he had preached, and they came to Matthew in the form in which he presented them.

II. Manner. The manner, form, or style of the sermon reveals the literary characteristics of Semitic languages to a remarkable degree.

A. Poetical. Semitic poetry is characterized chiefly by a literary device called *parallelism*, which is a balancing of successive thoughts, phrases, or words. See HEBREW POETRY II. Synonymous parallelism finds the thought of the first literary member restated with different language—and thus usually intensified and/or expanded—in the second member (cf. Matt. 7:6 – 7). Antithetical parallelism finds the first literary member contrasted and opposed by an opposite (7:17). Synthetic parallelism has the second member completing the thought of the first (5:3). Another Semitic feature found in the sermon is *rhythm*, a term that refers not to some regular system of meter but to a pattern of beats of varying number separated by pauses (6:9b – 13 is thought to be an example).

B. Pictorial. An abundance of illustration is taken from common life and nature. Solomon in all his glory, an enforced carrying of a Roman official's baggage for one mile, a burglar breaking in to steal, a builder of a house, trees in an orchard, gates to the road, pearls and hogs, salt and the sun, the hair of a person's head, anointing and fasting, birds and barns, logs and dogs, a serpent and bread, wolves and sheep—these do not exhaust the illustrative material of the sermon.

C. Proverbial. Proverbs have been defined as principles stated in pithy and ingenious words, often dealing with sharply phrased paradoxes. Such were used to penetrate the understanding and make the hearer aware. Crude literalism has always been a danger in the interpretation of the proverbial. It is the principle underlying the proverb that is important and not the literal meaning (Matt. 5:29 – 30). See PROVERB.

III. Contents

A. Beatitudes and supporting metaphors. The BEATITUDES (Matt. 5:3 – 12) were named from the Latin word *beatus* (pl. *beati*), used in the VULGATE to translate Greek *makarios G3421*. This Greek term is as old as Homer and Pindar, and was used of Greek gods as well as of human beings; it referred primarily to outward prosperity. Aristotle used it to mean "divine" blessedness in contrast to human happiness. It included the idea of not being subject to fate. Jesus apparently pointed with this word to the intention of God for human life, and thus the condition of being truly well-off. This divine intention for life was a portrait of Jesus himself in a sense. Jesus was the very embodiment of the Sermon on the Mount.

The first beatitude affirmed the blessedness of the "poor in spirit." Among the Hebrews, because the rich were often corrupt and the oppressors of the lowly and destitute, the term POOR was applied to the pious, religious people who were oppressed by the ungodly. Matthew apparently added "in spirit" (missing in Lk. 6:20) so that "poor" would not be misunderstood by Greek readers who were unacquainted with the Hebrew idiom. Isaiah 61:1 notes the interest of the coming MESSIAH in the poor (cf. Matt. 11:5 – 6; Lk. 4:17 – 18). The poor were the dependent, godly people, oppressed by the world, who had cast themselves upon God. To such people "the kingdom of heaven" belongs; or better, it is of such that the kingdom of heaven consists.

The second beatitude spoke of the blessedness of those who mourn, but just as "poor" did not refer to actual poverty, so "those who mourn" did not refer simply to those who were sad. The strongest word for MOURNING in the Greek language is used (*pentheō G4291*). In the SEPTUAGINT, it describes mourning for the dead and also the mourning for sins. Such people are desperately sorry and truly penitent for their sins. Their sorrow for sin may reach out to embrace the needy world. The passive voice of "comforted" suggests that God acted in their behalf to share with such people his own strength. God's COMFORT can come only when and where there has been REPENTANCE.

The third beatitude announced the blessedness of the meek. This statement clearly alludes to Ps. 37:11 (LXX 36:11). That psalm speaks of the need to cling to faith in the goodness of God and his care for the righteous in spite of adversity. Just as Israel followed God to the land of promise, so pilgrims in life who are "meek" will find the fullness of God's blessings at the end of the way.

The fourth blessing was on those "who hunger and thirst for righteousness." RIGHTEOUSNESS probably did not in this instance mean goodness as much as it meant right standing with God (in Isaiah, "righteousness" was used by the prophet to define "salvation"). The people in view are characterized by the most intense craving for the gift of God's grace, and God will feed or satisfy the seeking soul in the fullness of salvation.

The fifth through seventh beatitudes concern human relationships, whereas the first four look toward God. The fifth beatitude noted the blessedness of the merciful. MERCY deals with what was to be experienced of pain, misery, and distress. Mercy as active pity was revealed as an element in true righteousness (Mic. 6:8), an element lacking in Pharisaic righteousness (Matt. 23:23). The cry of distress, "Have mercy upon me," often found in Matthew addressed to Jesus, illustrates the meaning of this beatitude. God's mercy is both the cause and the effect for such action in the lives of his people. Because God has been merciful to them, the righteous know the meaning of mercy and are motivated to extend mercy to others; and because they have shown mercy, they are increasingly the object of God's mercy.

The sixth beatitude identified the "pure in heart" as those who would see God. The idea here is meant singleness of heart—an honest heart free from any hidden motive of self-interest. It was part of Jesus' "good news for the poor" that even if they could not attain to the ritual purity of the PHARISEES, they could see God. Jesus taught that the only defilement that really bars a person from God's

presence comes from within. The believer whose heart is truly fixed on God will not lack God's presence.

Interior of the Church of the Beatitudes that overlooks the Sea of Galilee near Tabgha, Israel.

The term "peacemakers" of the seventh beatitude refers to the true subjects of the Prince of Peace, who came to found a kingdom of peace. Such people exercise themselves in the extension of his sovereignty, the only source of peace in a world of alienation, strife, and passion. The passive voice "will be called" (i.e., by God) implies that God alone can bestow the title "sons."

The last (twofold) beatitude witnessed to the blessedness of those who suffered because of their loyalty to God. They have suffered because of their godly characters. It was not suggested by these words that the ideal Christian character could not be formed apart from PERSECUTION; rather it meant that where Christian character provoked persecution there would also be afforded an additional opportunity to prove one's relationship to God and to demonstrate the reality of citizenship in the heavenly kingdom.

The two metaphors that follow the Beatitudes were intended to show the effect of such ideal character in a world that needed such living. SALT was used in the Jewish sacrificial system (Lev. 2:13; Ezek. 43:24) and was also symbolical in establishing of covenants (Num. 18:19; 2 Chr. 13:5; see COVENANT OF SALT). Among the Jews, the Torah was compared with salt, and it was often stated that the world could not exist either without salt or without the Torah (Sir. 39:26). In practical

experience, salt prevented putrefaction and insipidity. This, too, may have been in the mind of Jesus. Salt, however, must make contact with other substances to be able to work. It was a commodity of considerable value in Jesus' time, and whatever the particular application, the tremendous work of discipleship to a waiting world was underscored.

Whereas the action of salt is silent and unseen, the action of LIGHT is obvious and discernible. References to "light" or "lamp" were not infrequent in the rabbinic writings; in particular, Israel was referred to as God's lamp. Biblical material likewise made use of this symbol. It was God who lit Israel's lamp (Ps. 18:28). The nations would come to Israel's light (Isa. 60:3). The probable intent of Jesus' illustration was that through character as described in the Beatitudes, people may see God and glory in him.

B. Christian life and Jewish ideal contrasted. Jesus was not at war with the religion of the OT, and he was not the opponent of Mosaic law. He was, however, in strong opposition to the externalism of Pharisaism. He regarded the OT as having permanent validity (Matt. 5:17 – 19), but he attacked the interpretation and application of Scripture by the Pharisees, who were the popular religious authorities of that day. The examples chosen by Jesus against which to measure Pharisaic religion were not in contradiction to the law of Moses but, rather, intensified the meaning of the law. Jesus denounced the legalistic interpretation of the law, which militated against a realization of its spiritual significance.

1. Murder. In the first example (Matt. 5:21 – 26) Jesus interpreted the commandment against murder to prohibit also anger and hatred. The degrees of punishment suggested for those who violated this commandment—the "judgment" for anyone who has been angry with a brother, the "Sanhedrin" for anyone who has insulted his brother, and "hell of fire" for anyone who has said "you fool"—have puzzled interpreters. Some feel that Jesus argued as a skilled rabbi, and this type of argument looked for gradation of punishment. Others think that these references were meant as irony, holding up to ridicule such rabbinic distinctions. The central teaching is quite clear, however, in the concluding statement, which reveals that no act of worship is acceptable to God when the worshiper is wrongly related to other persons. Hostility toward others may not eventuate in the act of murder, but it is nonetheless a barrier to worship. A quarrel is never to be nurtured, but quickly resolved.

2. Adultery. The prohibition against ADULTERY was carried even further by Jesus to forbid also the desire to commit adultery (Matt. 5:27 – 30). The language used (lit., "so that he might lust after her") suggests deliberate intention. Beyond question, the teaching about the removal of the offending eye and the offending hand is figurative. The removal of offending organs could not actually remove sin from a person's heart. These were strong words that indicated the seriousness of the problem and the necessity of a remedy, whatever the cost.

3. Divorce. Next, in connection with the law against DIVORCE, Jesus stated the divine ideal of MARRIAGE as an indissoluble union—one man for one woman for life (Matt. 5:31 – 32). He identified the law of Moses that authorized limited divorce as a concession to the hardheartedness of human beings. The so-called "exceptive clause" that recognized divorce on the ground of "marital unfaithfulness" (the NIV rendering of *porneia G4518*) seems out of harmony with Mark and Luke, who do not have the clause. It seems best to emphasize that in the teaching of Jesus, marriage was a God-given institution, and divorce a violation of the divine will.

4. Oaths. The Jews were fond of OATHS. The Pharisees considered themselves bound by an oath if it was stated in certain words. If it was not, the slightest verbal change relieved these formalists from all moral obligation. Intricate and complicated were the rules and regulations by which such a system operated. Jesus again expressed his interest in attitudes and inner motivation; he earnestly desired his followers to live and speak the truth because truth alone is right (Matt. 5:33 – 37).

5. Retaliation. The rabbis misinterpreted the law to mean that it commanded retaliation. Jesus said that the OT teaching was never intended to occasion violence; it was given to put a limit on such violence. Jesus taught a "Christian retaliation," by which actual good was given in return for evil (Matt. 5:38 – 42).

6. Love to others. "Love your neighbor" in the OT was understood to mean a fellow Israelite (Lev. 19:18). "Hate your enemy" does not occur explicitly in the OT (though the concept of hatred for the enemy is found in substance in the OT, e.g., Deut. 23:6 and Ps. 139:21 – 22). See HATE, HATRED . Because Christians are God's children and God so acted, they are to show LOVE even to their enemies and to pray for those who were unkind (Matt. 5:43 – 47).

7. Summary. Finally, Jesus called supremely for a likeness to God in the lives of his people (Matt. 5:48). This was not a command to sinlessness as such but was rather related especially to the love of God. Christians were to exercise complete love as did God, who sent sun and rain upon both the just and the unjust.

C. Christian worship. The Jews asserted three principal expressions of the religious life. They were the three great pillars on which the good life was based: almsgiving, prayer, and fasting (Matt. 6:1 – 18). In obvious ways, however, wrong motivation could rob those acts of their spiritual significance. In connection with those areas, Jesus underscored the necessity for right motivation in acts of WORSHIP. His disciples were to avoid religious parade when they gave alms (vv. 2 – 4), when they prayed (vv. 5 – 11), and when they fasted (vv. 16 – 18).

1. Almsgiving. To the Jews, the giving of ALMS was of great importance, and they counted it as a part of worship (Ps. 41:1). The rabbis themselves often taught that it should be done in secrecy, but there were many hypocrites who liked to publicize their charity to gain human credit. Jesus said that this was all such people would get. The only charity that could be a real act of worship was charity that sought to please God and avoided the attention of others for self-glory.

2. Praying. The disciples were warned about the wrong motivation in PRAYER; they were to pray to God and not to human beings. There was also a warning against vain repetitions. An additional warning was given in connection with praying with the idea that the individual must inform God. Real prayer must never be just for appearance. Jesus commended a spot free from distractions as the place of prayer and secrecy, which afforded opportunity for fellowship with the infinite God. The prayer given to the disciples as the example to guide them revealed these characteristics of real prayer: confidence ("our Father"), reverence ("hallowed be your name"), submission ("your will be done"), dependence ("give us today"), forgiveness ("forgive us…as we have also forgiven"), and humility ("lead us not into temptation"). See LORD'S PRAYER.

3. Fasting. The practice of FASTING was counted by the Jews as a sign of special piety. The Pharisees fasted on Mondays and Thursdays in commemoration of Moses' ascending the mountain to receive the law and descending with the law. Some of the devout apparently smeared ashes on their faces as a token of their fast and thus gained the commendation of others for their piety. Jesus did not condemn fasting as such; once again, it was the wrong motivation that deserved the scathing denunciation.

4. Living. Jesus taught the meaning of genuine worship to be an exclusive devotion to God in this life. A person served God by living. His God-consciousness was determinative in everything. This was the meaning of a heart that was "in heaven." Some people lived with this world dominating their lives —not so the Christian. The worldly wealth of the 1st cent. was frequently counted in garments and grain rather than in the coin of the realm; but it was foolish to let one's life be governed by avarice rather than by God. What a person garnered in the way of material substance could not by its very nature be permanent. His possession of it was uncertain, and it passed away quickly. Preoccupation with the goods of this world could draw, like a magnet, his heart away from God.

The metaphor of the eye in a moral sense was quite common among the Jews. A good eye signified a generous soul, and an evil eye a grasping and grudging one (Deut. 15:9; Prov. 23:6; 28:22). Even as people today speak of spiritual insight, so Jesus was insisting that people could lose their sense of true values in life and become possessed by their possessions. The word MAMMON (an Aramaic term) signified wealth and riches. In this passage it was personified, becoming the avaricious man's master. It is important to note that this did not apply to rich people only, for the greater temptation comes many times to the person who has not, but desires to have. Jesus made this truth apply to all when he said, "No one can serve two masters."

GREED and ANXIETY about life were next presented. Nothing was intended in these verses to forbid foresight, careful planning, or prudence: the remarks were rather directed against a care for this life that dishonors God because it fails to find its stability, confidence, and security in relationship to him. The heavenly Father has always been interested in and ready to meet the needs of human life at every level and in all experiences. God's kingdom must be placed first in life, and then there could be a foundation upon which to rest in confidence with reference to the material and temporal.

D. The Christian's sympathy. The connection of Matt. 7 with the rest of the sermon has been much disputed, with many scholars suggesting that it reveals lack of continuity. It seems, however, that these verses are bound together by a consideration of the sympathetic spirit.

1. Avoiding criticism. Jesus admonished his disciples not to be disparaging in their criticism (Matt. 7:1 – 5). He singled out and condemned the vice of lifting up oneself by pointing out the weaknesses and faults of others. The Christian was not to be unconcerned about a brother's fault, but it was impossible to help him when the helper's vision was poor.

2. Helping wisely. The disciples were warned against being overzealous in trying to help another (Matt. 7:6). Perhaps the "sacred" or "holy" thing referred to the use of the SHOWBREAD among the Jews. If it were not consumed, it must not be cast out to be eaten by the scavengers of the streets, the dogs. In the TALMUD (e.g., *b. Yebam.* 94a), "pearl" was used to refer to the choice thoughts, sentiments, or tenderest experiences of a person. The "pigs" or "swine" were the unclean, those of

vicious nature who did not have the character to appreciate such thoughts and sentiments. This passage calls for wisdom in dealing with the people of the world.

3. Praying earnestly. It was revealed that prayer was the best way to help; it was in prayer that the solution was to be found to the problems of life (Matt. 7:7 – 12). Two illustrations were given of the efficacy of genuine prayer. The first illustration underscored the truth that a father did not mock his child in the answer given to an earnest request. In the second illustration Jesus underscored the truth that a father does not give his child what would harm him, neither does God. The grand climax in the statement of the sympathetic approach to life is the "Golden Rule."

E. Metaphorical conclusion. With three metaphors, Jesus urged his hearers on to realize the intention of God for their lives: (1) "the two ways," which indicated that following Jesus was difficult, involving struggle, self-discipline, and effort; (2) "the two fruits," which warned against false guides whose real purpose was selfish and destructive—guides in life must be tested; and (3) "the two builders," which emphasized the importance of the right foundation for life, which is the teaching of Jesus—only those who obey him will be safe in the experience of testing.

H. L. DRUMWRIGHT, JR.

Sermon on the Plain. Common title given to Jesus' discourse recorded in Lk. 6:17 – 49. See discussion under SERMON ON THE MOUNT.

Seron sihr'on (Σήρων). A military commander under ANTIOCHUS Epiphanes who was defeated at BETH HORON by Judas MACCABEE (1 Macc. 3:13 – 23). According to JOSEPHUS (*Ant.* 12.7.1 §§288 – 92), Seron was commander or governor (Gk. *stratēgos G5130*) of COELESYRIA, but this description is generally thought to reflect a misunderstanding (cf. J. A. Goldstein, *I Maccabees*, AB 41 [1976], 246;

B. Bar-Kochva, *Judas Maccabaeus: The Jewish Struggle against the Seleucids* [1988], 133).

serpent. This English term is now less common than "snake," but *Serpentes* (= *Ophidia*) is the scientific name for the suborder of reptiles to which all snakes belong. The primary biblical terms for "serpent" or "snake" are Hebrew *nāḥāš H5729* (Gen. 3:1 et al.) and Greek *ophis G4058* (Matt. 7:20 et al.). There are, however, various other terms that can be so rendered (e.g., *tannîn H9490*, Exod. 7:9 – 10) or that can refer to particular species (e.g., *echidna G2399*, "viper," Matt. 3:7).

I. Problems of identification. Except in the case of a few narratives, where the settings contain helpful clues, any attempt at precise identification would be pointless, especially since most occur in figurative passages. Snakes have long been the cause of superstition and irrational fear; many people of all countries, both civilized and primitive, still suffer from a serious snake phobia, usually acquired in early life. Snakes are mentioned some seventy times in the OT and NT, and in nearly two-thirds the use is figurative. Although the majority of Palestine species are harmless, their poisonous character is clearly implied some fifty times. The serpent is thus a frequent picture of evil and danger, whether personally (Matt. 3:7) or nationally (Isa. 14:29). The punishment given to the serpent in EDEN, "you will eat dust all the days of your life" (Gen. 3:14), is hard to interpret biologically, for all snakes are carnivorous and must swallow their prey whole, but this idea is repeated several times (e.g., Mic. 7:17, where a snake is assumed to feed by licking with its tongue, a belief that is still widely current). The subtlety of the serpent (Gen. 3:1) is also echoed in the NT, "be as shrewd as snakes" (Matt. 10:16), though this piece of wisdom is qualified by the following verses.

Serpent relief carved on basalt. (From the Pergamum excavations.)

II. Serpents in Palestine. The Middle E has a wide range of snakes, from those reaching a maximum length of under one foot to several exceeding 6 feet and a girth of over 6 in. Most are quite harmless, but a few can give potentially lethal bites. Snakes are found in every region from desert to closed woodland, some widely and others confined to narrow habitats. Some are normally nocturnal and others diurnal, but their cold-blooded nature may make them vary their habits at certain seasons. All reptiles and amphibians are "cold-blooded," which means that they have no automatic temperature

control but are dependent on external heat sources. They therefore regulate their exposure to sun, or protection from it, to keep their bodies within suitable limits, mostly about 60° – 80° F. Doing so may entail (a) hibernation for short spells when the winter days are too cold; (b) estivation, under shelter, if the extreme summer temperature with low humidity makes life on the surface too difficult; or (c) staying on the higher ground at some seasons, being active for short periods early and late, between the heat of the day and the cold of the night.

III. Ignorance of snakes leads to myths. In civilized lands the average citizen's knowledge of snakes is small and few species are known by name; this is in part because of the fear in which they are held. In less developed countries, many of them with a wealth of snakes, names are usually given to the more conspicuous or important species and these are known by hunters, shepherds, etc., while the common folk hardly know the names and certainly cannot apply them correctly. This attitude to snakes is not new, for ancient peoples did not know their snakes any more accurately; one would thus expect general names, rather than specific ones, to be used for the most part. Some myths still current were known to the ancient writers, such as the view that the pointed forked tongue is dangerous (cf. Ps. 140:3).

IV. Serpents in the Bible. The first mention of a serpent is of course in Gen. 3:1, introducing the story of the FALL, and thus a theological rather than zoological matter. The mention of changing rods into snakes (Exod. 4 and 7) suggests that snake-charming and conjuring were already being practiced in Egypt before the exodus, for this was a trick in the repertoire of the court magicians. Clearly, the snake used was one of the larger species, possibly the harmless Montpelier snake, or more probably the Egyptian cobra (*Naja haje*), whose range also extends N toward Palestine and which is used by Egyptian snake-charmers today. Ancient Egyptian scarab-amulets depict cobras being held by the neck. This is, in fact, the correct and safe way to hold a venomous snake, but the significance of these pictures has been explained in modern times. Charmers have been filmed immobilizing cobras by holding them in this way until a state of rigid unconsciousness is induced (H. S. Noerdlinger, *Moses and Egypt* [1956], 26). See ASP.

The FIERY SERPENTS in the wilderness (Num. 21:6 – 9; Heb. *śārāp H8597*) merit fuller discussion. The location was the NEGEV desert on the borders of EDOM, probably to the SE of the DEAD SEA, while a basic fact of the narrative is that the snakes were highly venomous. These two facts reduce the possible species to four only: the two sand vipers (*Cerastes cerastes* and *C. vipera*); the false cerastes (*Pseudocerastes fieldi*); and one of the carpet or saw-scaled vipers (*Echis coloratus* or *E. carinatus*). See VIPER.

C. cerastes, which may reach a length of 30 in., is well adapted to desert life, being able to sink quickly and hide itself in the sand with a shuffling movement, leaving only the nostrils and eyes showing. Its venom is used mostly to kill small rodents such as jerboas, for which it waits, lying unseen on the surface of the sand, but its bite can be fatal to humans. *C. vipera* seldom reaches 15 in. and is less dangerous. The false cerastes is a highly specialized desert form, with a valve-like structure inside the nostril that enables it to exclude driven sand. Its venom is the least potent of the four species. In the wild it may take some dead prey in the form of migrant birds; this is unusual in snakes.

These three are of somewhat similar shape; they are typical vipers, with bodies rather fat for the length, with a very stubby tail ending in a sharp point (not poisonous) and with a large flat head, distinctly broader than the neck. As in all vipers, a pair of long curved fangs hinge in the front of the

upper jaw and, normally, lie in folds of mucus lining the hard palate. The fangs are needle-sharp and hollow to the tip. To swing the fangs down and forward into position the mouth is opened wide, and the whole action, ending in the strike, is at great speed.

The serpents mentioned above are all found in the sandy deserts crossed after the exodus, but *Echis*, the carpet or saw-scaled viper, has perhaps the best claim to be the fiery serpent. It grows to over 2 ft., but is thinner than many vipers; it is darker than the sand vipers and its head is smaller. One or another form of the carpet viper is found from W Africa to E Africa and SW Asia to N India, and in some areas it is very common. For instance, in one part of Kenya some 7,000 were caught, marked, and released for research purposes; and in NW India about 200,000 were killed annually for bounty for six years.

Only a snake capable of being as numerous as this in one locality could do the damage described in Num. 21, and there is further confirmatory evidence. The venom of this genus is more powerful, weight for weight, than that of any other viper. This snake is well known for being easily provoked, while many of the large vipers are strangely placid. *Echis* also appears able to tolerate hotter conditions than most snakes and therefore would be more active by day. The saw-scaled viper's name comes from the rough nature of its scales, which produce a distinct rasping noise as its sides rub while it makes a characteristic figure-eight movement. When gliding over shingle or rock it moves normally but, like the sand viper and some desert rattlesnakes, it has developed a side-winding motion for traveling over loose sand.

Its venom is typical of the viper family in being hemolytic, that is, it affects the blood, breaking down the capillaries, rupturing the corpuscles, and finally causing death by massive and wide-spread internal hemorrhage. This can be a slow process, and death may occur after as long as four days, the progress depending on the site and severity of the bite. This fact is also relevant to the narrative, for it must have taken MOSES some time to cast the bronze serpent and publish news throughout the host of Israel, which amounted to many tens of thousands at even the lowest estimate. See NEHUSHTAN.

This incident is one of the clearest OT pictures of SALVATION (cf. Jn. 3:14 – 15), and there is a further point of interest. The injection of such venom is not always followed by intense pain, but the internal destruction goes on; it is possible that a victim may feel somewhat better after two or three days and assume that all is well, but after a severe bite the process continues until death. The timing of the incident shows divine overruling, and the results of looking in faith at the bronze serpent were wholly miraculous, but the setting needs no metaphysical explanation. (On the serpent as a religious symbol, see *ABD*, 5:113 – 16; cf. also *DDD*, 744 – 47.)

serpent charming. See SNAKE CHARMING

Serpent's Stone. See ZOHELETH.

Serug sihr'uhg (שְׂרוּג *H8578*, meaning unknown; Σερούχ *G4952*). Son of Reu and descendant of SHEM (Gen. 11:20 – 23; 1 Chr. 1:26); included in Luke's GENEALOGY OF JESUS CHRIST (Lk. 3:35; KJV, "Saruch"). Some link Serug with a place in N SYRIA that apparently bears the Akkadian name *Sarugi* (cf. *HALOT*, 3:1355; *ABD*, 5:1117 – 18).

servant. The most common Hebrew word for servant in the OT is ʿ*ebed H6269*, usually translated in the SEPTUAGINT by the Greek words *doulos G1528* (which more properly means "slave"), *pais G4090* ("boy, youth"; cf. Heb. *naʿar H5853*), and less frequently *therapōn G2544* ("attendant," used esp. in cultic contexts; cf. Heb. *mĕšārēt*, piel ptc. of *šārat H9250*) and *oiketēs G3860* (usually "household slave"). The Hebrew term is used often in the OT to refer to SLAVES regarded as property, though possessing also certain rights (for laws pertaining to slaves see Exod. 21:1 – 11; Lev. 25:39 – 55; Deut. 15:1 – 18). In more instances, however, "servant" is a better translation than "slave" because the words have to do with service or obedience in a far more general sense than what is known today as slavery.

A servant can be anyone committed to someone more powerful; thus the term may be applied to a trusted steward (Gen. 24:2), a soldier in an army (Jer. 52:8), a court official (1 Sam. 8:14 – 15), or a vassal king (2 Ki. 17:3). The servant is dependent on his master for protection (16:7), and in turn agrees to fight if need be to protect or further his master's interests (10:3). A servant-master relationship can be a kind of COVENANT (cf. Josh. 9:6 – 7), voluntarily undertaken with such words as "We are your servants" (Josh. 9:8; 2 Ki. 10:5) or "I will be your servant" (2 Sam. 15:34). A servant addressing the master can express humility and dependence by speaking of himself or herself as "your servant." This may remind the master of their agreement, especially if the servant is seeking help or protection, though in some instances it becomes little more than a formality, a polite substitute for "I."

Gilded shabti of the Egyptian priest of Amun (from Iwy, c. 1700 B.C.). Shabtis were small, mummy-shaped figurines that came to represent servants for the deceased in the afterlife.

This "covenantal" use of servant terminology is especially conspicuous in passages where the

servant is a servant of God. Elijah proclaims his allegiance to God with the words, "I am your servant" (1 Ki. 18:36). Judges and kings address the Lord much as any servant would address an earthly master (Jdg. 15:18; 1 Sam. 3:9; 14:41; 23:10 – 11). Those who pray to God often refer to themselves as "your servant(s)" (2 Sam. 7:19 – 21, 27 – 29; Pss. 19:11, 13; 27:9; 31:16; 90:13, 16), and appeal to God's dealings in the past with his servants Moses (1 Ki. 8:53; Neh. 9:14) or David (1 Ki. 8:24 – 25; Ps. 132:10; cf. 89:39).

For his part, God acknowledges a person who gives allegiance to him as "my servant" (Moses, 2 Ki. 21:8; Mal. 4:4; Caleb, Num. 14:24; David, 2 Ki. 19:34; Ezek. 34:23; 37:24; Job, Job 1:8; Zerubbabel, Hag. 2:23; unnamed messianic figures, Isa. 52:13; Zech. 3:8). Prophets are called his servants both individually (1 Ki. 14:18; 2 Ki. 14:25; Isa. 20:3; 22:20) and as a group (2 Ki. 17:13, 23; Ezek. 38:17; Amos 3:7; Zech. 1:6). In the widest sense the servants of God are the people of God, all the faithful of Israel regarded either as his "servants" (Isa. 65:9) or collectively as "Israel my servant" (Isa. 41:8 – 9; cf. 44:1 – 2; Ps. 136:22).

If the servant-master relationship is based on a kind of covenant, it is natural that "people" of God and "servants" of God should often be parallel concepts (e.g., Deut. 32:36; Ps. 135:14; cf. Neh. 1:6; Ps. 105:25; Isa. 63:17). And since the covenant is mediated to the people of God through individual "servants" (such as the patriarchs, Moses, the kings of Israel, and the prophets), it is not surprising that sometimes the "people" are seen in close association with a single "servant" who is regarded as their representative before God (e.g., 1 Ki. 8:30, 52, 59, 66; cf. Neh. 1:11; Ps. 78:70 – 71). What is conspicuously lacking in the OT is the idea that a "servant of God" who exercises leadership over Israel is in some sense also a "servant of the people." Neither the modern notion of a "public servant" nor the Roman Catholic ideal of a "servant of the servants of God" has any explicit analogy in the OT. The closest approach to such a concept is perhaps the advice of the old men to Rehoboam in 1 Ki. 12:7 ("If today you will be a servant to these people"), but it was advice that went unheeded.

The range of meaning in the servant idea in the OT is best illustrated in Lev. 25:42, where ʿ*ebed* is used in two senses: "Because the Israelites are my *servants*, whom I brought out of Egypt, they must not be sold as *slaves*." The covenant begins with redemption from slavery in Egypt, and to be servants in the covenant is not to be "slaves" of God but to be his people and his sons (cf. Exod. 4:22 – 23).

In the NT as in the OT, "servant" can refer to the people of God in general (Rev. 2:20; 19:5), to the prophets in particular (10:7; 11:18), or to a prophet and his people together (1:1). "Your servant(s)" can still be a self-designation of those who address God in prayer (Lk. 2:29; Acts 4:29; cf. Jesus' use of "your Son" in Jn. 17:1). Moses and David (Rev. 15:3; Lk. 1:69; Acts 4:25), as well as the community of Israel (Lk. 1:54), can still be called God's "servant," but more typically this title passes to Jesus (Matt. 12:18; Acts 3:13, 26; 4:27, 30; cf. Phil. 2:7). Decisive for this development is the identification of Jesus with the suffering servant of Isa. 52:13—53:12, because of his sacrificial death (cf. Mk. 10:45; 1 Pet. 2:24f.). See Servant of the Lord.

In terminology the NT differs from the LXX in distinguishing between *doulos* and *pais* often (though not always), using the former to mean "slave" while the latter moves in the direction of "child" or "son." NT writers can speak of slavery to sin (Jn. 8:34; Rom. 6:16), but also in a positive sense of slavery to Christ or to righteousness (Rom. 6:16 – 23; 1 Cor. 7:23). Paul himself indicates, however, that this language is a rather exceptional metaphor (Rom. 6:18). When he and other writers call themselves "servant of Jesus Christ" it is not the metaphor of slavery, but the OT covenantal use of "servant" which controls their thinking. To call oneself "servant" is simply the corollary of

confessing Jesus Christ as "Lord." In contrast to the OT, a "servant of Jesus Christ" is also explicitly seen as a servant to the whole community of believers (Mk. 10:43 – 44; 2 Cor. 4:5). Again the decisive factor in the shift is Jesus, who reversed the customary patterns of authority (both pagan and Jewish) first by his teaching, and then by his own fulfillment of the servant role (Mk. 10:35 – 45; Matt. 23:8 – 12; Jn. 13:1 – 17).

<div style="text-align: right">J. R. MICHAELS</div>

Servant of the Lord. The Hebrew expression ʿ*ebed yhwh*, "the servant of Yahweh," occurs frequently in the OT, usually with reference to MOSES (e.g., Josh. 1:1 and often in this book). In biblical scholarship, however, the phrase "the Servant of the Lord" refers primarily to a messianic figure mentioned repeatedly in Isa. 42 – 53 whom God calls "my servant" (though the specific phrase ʿ*ebed yhwh* occurs only in Isa. 42:19). At the end of the 19th cent., Bernhard Duhm (*Das Buch Jesaia* [1892]) distinguished in this section four passages which modern criticism has generally agreed to treat as the "Servant Songs." They are 42:1 – 4; 49:1 – 6; 50:4 – 9; 52:13—53:12. The limits of the individual "Songs" are not clear; many would add 42:5 – 7; 49:7; 50:10 – 11; and others would see a fifth Servant Song in 61:1. Some scholars have carried this line of argument to the extent of postulating a separate author and period of origin for these passages. The general tendency, however, has been to interpret them in relation to their context in Isaiah and as an integral part of the prophet's message.

More recent scholars have sometimes questioned the view that there is a coherent line of thought linking the "Songs" together (cf. T. N. D. Mettinger, *A Farewell to the Servant Songs: A Critical Examination of an Exegetical Axiom* [1983]). Some even dispute that these passages are intended to portray a specific figure, since the term SERVANT is frequently used in the OT for those who are obedient to God and is therefore applied to Israel as she fulfills her vocation. Certainly other figures in the OT are described as "servants of God," especially the PROPHETS, the PATRIARCHS, and other individuals such as MOSES and DAVID (each of these frequently; e.g., Gen. 26:24; Exod. 14:31; Deut. 34:5; 2 Sam. 7:5; Isa. 20:3; Amos 3:7). To refer to someone as "servant of the Lord" was no novelty. In Isaiah itself, moreover, the term "servant" is used as frequently outside the Servant Songs as within (note these passages in the vicinity of the Songs: Isa. 41:8 – 9; 43:10; 44:1 – 2, 21; 45:4; 48:20). All of these are applied to Israel, sometimes in terms similar to the language of the Songs.

I. Identification of the Servant. Interpretations may be divided into three basic classes: the collective, the individual, and the cultic (cf. the discussions by C. R. North, *The Suffering Servant in Deutero-Isaiah: An Historical and Critical Study*, [1948], 6 – 116; and H. H. Rowley, *The Servant of the Lord, and Other Essays on the Old Testament* [1952], 4 – 48).

(1) *Collective interpretations.* The Servant is explicitly addressed as "Israel" in Isa. 49:3. This fact, and the close correspondence between the language of the Songs and that applied to Israel as God's Servant in surrounding chapters, have led many to see in the Servant-figure a projection of the prophet's ideal for the nation. It is the nation as a whole that is to undergo redemptive suffering. Others restrict the reference to a pious remnant within the nation, thus making allowance for the fact that the Servant has a mission *to Israel* (49:5 – 6; cf. 42:6) and suffers *for* the people (53:4 – 6, 8, 11 – 12). A further candidate for the title is the Davidic dynasty.

(2) *Individual interpretations.* The Songs refer to the Servant in the singular and describe the life and experience of an individual (his birth, obedience, suffering, death, and triumph). That this is not a mere poetical personification of the nation is shown by his mission *to* Israel, as mentioned

above. Interpreters have therefore taken the Servant as either a specific historical figure known to the author (e.g., Moses, Jeremiah, Cyrus, Zerubbabel, the prophet himself, or some unknown contemporary), or an ideal figure of the future—the MESSIAH. The latter was the predominant Christian interpretation until the end of the last century.

(3) *Cultic interpretations.* Some Scandinavian scholars have seen the background to the Servant-figure in a cultic ceremony, involving the symbolic death and rising again of the king, deriving from the Babylonian myth of the dying and rising god, TAMMUZ, and its liturgy. The Servant would, in this view, be neither a historical figure, past, present, or future, nor a collective personification of the nation, but a mythological symbol. The existence of such a mythology and ritual within Israel is highly controversial, and such interpretations have received little support outside Scandinavia.

(4) *Synthetic interpretations.* Few scholars today hold to an exclusively collective or an exclusively individual interpretation. Some would see a progression of thought from the collective figure of the earlier Servant Songs to a more fully individualized figure in the fourth. The ideal for Israel was summed up in an ideal individual—the Messiah. Rowley (*Servant of the Lord*, 53) has suggested that "what began as a personification [has] become a person." Such an understanding of the Servant is best able to do justice to the apparently conflicting evidence of the text, as mentioned above. (See esp. the close juxtaposition of Isa. 49:3, where the Servant is addressed as "Israel," and 49:5 – 6, where he is described as having a mission *to* Israel.)

This view is reinforced by the growing recognition that the Israelite distinguished less sharply between the individual and the community than does the modern Western mind. The notion of CORPORATE PERSONALITY (associated particularly with the name of H. W. Robinson and not accepted by all) makes it possible for the Messiah not only to act *for* Israel, but also to sum up Israel in himself. The Servant, therefore, *is* Israel—the ideal Israel, who is capable of fulfilling the destiny of which the empirical Israel fell short. In that capacity he can suffer and die to redeem the people of God as their representative as well as their substitute.

The subtlety of the prophet's thought defies systematic analysis. It is in some such synthetic interpretation that the biblical data will be most fully satisfied. To describe the Servant as a messianic figure, in the sense of an individual who is central to the eschatological fulfillment of God's purposes for his people, is therefore a correct, though not an exhaustive, description; and a messianic application of the Servant passages, and especially of the passage where the individual terminology is clearest (Isa. 52:13—53:12), will be in accordance with the intention of the prophet.

II. The character and mission of the Servant. Working from the traditionally delimited Servant Songs (though the limitations of this approach have been indicated above), the following picture of his character emerges. The Servant was chosen by the Lord (Isa. 42:1; 49:1) and endued with the Spirit (42:1); he was taught by the Lord (50:4), and found his strength in him (49:2, 5). It was the Lord's will that he should suffer (53:10); he was weak, unimpressive, and scorned by human beings (52:14; 53:1 – 3, 7 – 9), meek (42:2), gentle (42:3), and uncomplaining (50:6; 53:7). Despite his innocence (53:9), he was subjected to constant suffering (50:6; 53:3, 8 – 10), so as to be reduced to near despair (49:4). But his trust was in the Lord (49:4; 50:7 – 9); he obeyed him (50:4 – 5) and persevered (50:7) until he was victorious (42:4; 50:8 – 9).

The Servant's mission to Israel was to bring the rebellious nation back to God (Isa. 49:5), but his work extended further: he was a light to the nations, bringing judgment and salvation to the end of the earth (42:1, 3 – 4; 49:6). This mission was to be accomplished only through his suffering, in

which he took the place of the people of the Lord, and bore the penalty that should be theirs (53:4 – 6, 8), interceding for them (53:12); his suffering ended in death (53:8 – 9; 53:12) as a sin offering on their behalf (53:10), thus accomplishing their acquittal (53:11). His mission accomplished, he was exalted to glory and worldwide influence (52:13, 15; 53:12).

III. The Servant in later Judaism. Possible echoes of the Servant-figure have been detected in the OT itself, particularly in Zech. 9 – 14; a meek and suffering figure occurs in 9:9, 10; 11:4 – 17; 12:10 – 14; 13:7 – 9. It is the character of the figure portrayed, rather than any verbal echo, which might suggest the influence of the Servant in Isaiah. In later Hellenistic Judaism (see HELLENISM) there is little evidence of a messianic understanding of these passages, except what is implicit in the SEPTUAGINT translation of Isa. 52:13—53:12 (cf. W. Zimmerli and J. Jeremias, *The Servant of God*, rev. ed. [1965], 42 – 44, 53 – 55).

In Palestinian JUDAISM, on the other hand, a persistent messianic exegesis exists side by side with an embarrassment at the idea of a suffering Messiah. Thus *Targum Jonathan* on Isa. 52:13—53:12 (see TARGUM) explicitly identifies the Servant as the Messiah, but systematically manipulates the text to transfer every idea of suffering from the Servant to Israel, the Gentiles, or the wicked. Several other indications of a messianic exegesis in Palestinian Judaism are listed by Jeremias (in Zimmerli and Jeremias, *Servant of God*, 59 – 79). While some are disputed, their overall significance far outweighs the few isolated indications of an interpretation of the Servant as either the nation or a historical individual. This is the more surprising in view of the apologetic use made of these passages by Christians. The rabbis generally preferred rather to ignore the Servant-idea than to interpret it as other than messianic. The evidence, therefore, suggests that in Palestinian Judaism of the time of Christ and afterward a messianic exegesis of the Servant was so firmly established that even the demands of the anti-Christian polemic could not unseat it.

IV. The Servant in the NT. The NT writers are unanimous in stating both that the Servant is a messianic figure and that Jesus is the Servant. What is in dispute is the extent of the influence of this figure in the NT. Some writers (esp. M. D. Hooker, *Jesus and the Servant* [1959]) have argued that it was of minor importance, and that Jesus' predictions of his suffering were based not on the Servant-idea, but on the "one like a son of man" of Dan. 7:13. See SON OF MAN.

A. In the teaching of Jesus. The only explicit quotation is Lk. 22:37. The Servant is also clearly alluded to in Mk. 10:45 and 14:24 (and possibly 9:12). In each of these cases the reference is to the suffering and death of Jesus as the fulfillment of that predicted for the Servant. In 10:45 and 14:24 stress is laid on the redemptive purpose of that suffering and its vicarious nature. There are also numerous predictions by Jesus that he *must* suffer, several of which base this necessity on Scripture (Matt. 26:54; Mk. 9:12; 14:21, 49; Lk. 18:31). The most probable source of these predictions is the Servant-idea in Isaiah—the clearest indication of a suffering Messiah in the OT, and an idea which Jesus elsewhere applied explicitly to his own suffering—rather than Dan. 7, for in the latter passage, which Jesus applied only to his exaltation and power, the idea of suffering is not clearly attributed to the central figure.

It is relevant, too, that the heavenly voice at the baptism of Jesus (Mk. 1:11), which is generally agreed to allude to Isa. 42:1, must have influenced his subsequent view of his mission. Therefore the Servant-idea appears as a major factor in Jesus' understanding of his own mission as one of redemption through a vicarious suffering and death.

B. In the rest of the NT. The Servant-idea, though not as prominent as one might expect, is attested in most of the major strata of the NT. That Jesus was at an early stage given the title of *pais theou* (a common rendering of ʿ*ebed yhwh* in the LXX) is seen by its use in Acts 3:13, 26 (Peter's speech) and 4:27, 30 (the prayer of the church). The title does not occur again, but explicit quotations from the Servant passages, with reference to Jesus and his gospel, occur in Matt. 8:17; 12:18 – 21; Jn. 12:38; Acts 8:32, 33; Rom. 10:16; 15:21. The emphasis in these quotations is not, however, as in Jesus' use of the passages, on the necessity of his redemptive suffering. This use of the Servant-idea is seen in some allusions in the theological writing especially of Peter and Paul. Its influence has been traced especially in 1 Pet. 2:21 – 25; 3:18; 1 Cor. 15:3; and Phil. 2:6 – 11. Further probable echoes are in Rom. 4:25; 5:19; 2 Cor. 5:21; and in John's use of the term "Lamb of God" (Jn. 1:29, 36; cf. Isa. 53:7).

This material is, however, not impressive in its bulk. It would appear that the view of Jesus as the Servant of the Lord, while prominent in Jesus' own teaching, and preserved in the earlier parts of the NT, especially in connection with the teaching of Peter, was later superseded by the titles LORD and SON OF GOD, though the fact of Christ's vicarious and atoning death, which the Servant passages explicitly teach, was firmly established as the basis of his redemptive work. See also CHRISTOLOGY V; ISAIAH, BOOK OF, VI.C.

(In addition to the titles mentioned in the body of the article, see H. W. Robinson, *The Cross of the Servant* [1926]; J. S. Van der Ploeg, *Les chants du Serviteur de Jahvé* [1936]; H. W. Wolff, *Jesaja 53 in Urchristentum* [1942]; I. Engnell in *BJRL* 31 [1948]: 54 – 93; J. Lindblom, *The Servant Songs in Deutero-Isaiah* [1951]; S. Mowinckel, *He That Cometh* [1956], 187 – 257; H. service. The first biblical occurrences of the Hebrew noun ʿ*ăbōdâ H6275* ("work, service") concern JACOB'S service to LABAN (Gen. 29:27; 30:26). A different expression (lit., "to stand before") is used with reference to JOSEPH'S entering "the service of Pharaoh" (41:46). After that is the well-known record of Egypt's oppression of the Israelites, making "their lives bitter with hard labor [ʿ*ăbōdâ*]" (Exod. 1:14). Reminiscent of this, MOSES provided laws prohibiting intra-Israelite SLAVERY and governing hired servants (Lev. 25:35 – 55). Various other types of secular service are mentioned throughout Scripture.

Religious service in the OT is closely associated with WORSHIP rituals in the TABERNACLE and the TEMPLE (Exod. 27:19 et al.). The PRIESTS AND LEVITES were responsible "for the service of the temple of the LORD" (1 Chr. 23:32; cf. Num. 8:11 et al.). As revelation progressed, service acquired a broader meaning. "The Son of Man did not come to be served, but to serve [Gk. *diakoneō G1354*]" (Matt. 20:28), and thereby Jesus set an example for his followers (cf. the FOOTWASHING incident, Jn.

13:3 – 17). He said, "Whoever serves me must follow me…My Father will honor the one who serves me" (12:26). Early Christians soon grasped Jesus' concept of total religious service, including evangelism and missions. Paul said, "There are different kinds of service [*diakonia G1355*]" (1 Cor. 12:5), and he thanked Jesus Christ for "appointing me to his service" (1 Tim. 1:12). In a more general sense, all believers are to "serve [*douleuō G1526*] one another in love" (Gal. 6:13).

<div align="right">G. B. FUNDERBURK</div>

Sesis see'sis. KJV Apoc. form of SHASHAI (1 Esd. 9:34).

Sesthel ses'thuhl (Σεσθηλ). One of the descendants of Addi that agreed to put away their foreign wives (1 Esd. 9:31; some think this name corresponds to BEZALEL in Ezra 10:30).

Seth seth' (שֵׁת *H9269*, possibly "provision, restitution"; Σήθ *G4953*). KJV also Sheth (only 1 Chr. 1:1). Third son of ADAM and EVE, father of ENOSH, and ancestor of the godly messianic line that descends from him to NOAH (Gen. 4:25 – 26; 5:3 – 8; 1 Chr. 1:1; Sir. 49:16; included in Luke's GENEALOGY OF JESUS CHRIST, Lk. 3:38). He is reported to have lived 912 years (Gen. 5:8). When Eve named him Seth (*šēt*), she said, "God has granted [*šāt*, from *šît H8883*] me another child in place of Abel, since Cain killed him" (4:25). It is uncertain whether the name originally derives from the verb *šît* ("to place, set, appoint"); the statement may reflect a popular etymology or it may be simply a play on words. Some scholars believe that "the sons of Sheth" (Num. 24:17) should be related to Seth. See SHETH. In later tradition, Seth plays a prominent role (cf. A. F. J. Klijn, *Seth in Jewish, Christian and Gnostic Literature* [1977]). See SETH, THREE STELES OF.

Seth, Second Treatise of the Great. A polemical Gnostic document preserved in Coptic in the NAG HAMMADI LIBRARY (NHC VII, 2), and purporting to be a revelatory discourse from Jesus Christ. The name Seth occurs only in the title (found at the end), but presumably he is identified with Jesus (whoever added this title must have thought that one of several Gnostic documents in which the name Seth appears was the "first treatise" of Seth). The work was originally written in Greek, probably no earlier than the 3rd cent., and its purpose was evidently to set forth a docetic view of Christ and to oppose the claims of the orthodox church. See DOCETISM; GNOSTICISM. (English trans. in *NHL*, 362 – 71.)

Seth, Three Steles of. Earlier known as the *Apocalypse of Dositheus*, this Gnostic work is preserved in the NAG HAMMADI LIBRARY (NHC VII, 5). According to a Jewish tradition, the descendants of SETH inscribed their astrological knowledge on two steles or pillars for posterity (cf. Jos. *Ant*. 1.2.3 §§68 – 71); in Gnostic thought, Seth himself preserved in three steles the revelation given to ADAM (see ZOSTRIANUS, APOCALYPSE OF). In the present document, which claims to be "the revelation of Dositheus" (apparently a founder of GNOSTICISM), the three steles are in fact three hymns addressed to a divine triad and possibly formed part of a liturgy. The original Greek work may have been composed in the 3rd cent., but it is preserved only in a Coptic version. (English trans. in *NHL*, 396 – 401.)

Sethur see'thuhr (סְתוּר *H6256*, possibly "hidden [by God]"). Son of Michael, from the tribe of ASHER, and one of the twelve spies sent out by MOSES to reconnoiter the Promised Land (Num.

13:13).

settlement of Canaan. See TRIBES, LOCATION OF.

seven. See NUMBER. On the KJV rendering "seven stars" (Amos 5:8), see ASTRONOMY III. On the letters to the seven churches, see REVELATION, BOOK OF.

Seveneh suh-ven'uh. See SYENE.

seventy disciples. According to Lk. 10:1 and 17, Jesus sent out seventy disciples to minister as a part of his extended journey to Jerusalem (some important witnesses, including P[75] and CODEX VATICANUS, say "seventy-two"). The number seventy was symbolic to the Jews. It alluded to the group of elders that MOSES had chosen to help with the task of leading Israel in the wilderness (Num. 11:16 – 17, 24 – 25). See ELDER (OT). Apparently on the basis of that group (cf. *m. Sanh.* 1:6), the number of the members of the SANHEDRIN, the supreme council of the Jews, was set at seventy-one (i.e., seventy plus a leader). It was also the "number" of the NATIONS in the world (see Gen. 10, where LXX has seventy-two), and of the members of JACOB'S family in Egypt (Gen. 46:27). Some have supposed that Jesus, by his choice of this number, was foreshadowing the preaching of the gospel to all nations. Others argue that the original number of disciples was seventy-two, and that later scribes altered it to seventy because the latter number had greater significance. (See discussion by J. A. Fitzmyer, *The Gospel according to Luke X-XIV*, AB 28A [1985], 845 – 46.)

H. L. DRUMWRIGHT, JR.

seventy weeks. According to Dan. 9:24, seventy weeks (lit., "seventy sevens") were decreed for Israel and Jerusalem "to finish transgression, to put an end to sin, to atone for wickedness, to bring in everlasting righteousness, to seal up vision and prophecy and to anoint the most holy." The period is said to begin with "the issuing of the decree to restore and rebuild Jerusalem" and ends with the time of "the Anointed One, the ruler" (v. 25). The seventy weeks are subdivided into seven weeks, sixty-two weeks, and one week. After the sixty-two weeks have been accomplished, the Anointed One is to be cut off, a period marked by desolation and war when the city and sanctuary are destroyed (v. 26). It is also stated that either the Anointed One or, more likely, the ruler or prince mentioned in v. 26b makes a firm covenant with many for one week, in the midst of which "he will put an end to sacrifice and offering. And on a wing of the temple he will set up an abomination that causes desolation, until the end that is decreed is poured out on him" (v. 27). This passage has received three basic interpretations, all of which agree that each week represents seven years so that in round figures the seventy weeks equal four hundred and ninety years.

I. The traditional view. This interpretation, with slight variations, has been held by most biblical scholars until relatively recent times. According to it, the end of the seventy weeks represents the time of the accomplished work of Christ on the cross. The four hundred and ninety years are thus the period of time from the edict to rebuild Jerusalem until the death of Christ on the cross. The question of when that edict was given is however greatly disputed. It is most often identified with the time of ARTAXERXES' decree to send EZRA back to Jerusalem (c. 458 B.C.). This would put the seventieth week approximately in the time of Christ's earthly ministry. Usually the seventieth week is considered to have begun with Christ's baptism, and the "cutting off" is identified with his death

about three and one-half years later. Others date the seventy weeks from the time of the decree issued by Cyrus (538 B.C.).

II. The critical view. Many modern scholars hold that the prophecy was written in the 2nd cent. B.C. In this view the writer of Daniel is not predicting but telling what has already happened. The seventy weeks began in 538 B.C. with Cyrus's decree and ended with the deposition of the high priest Onias III in 175 B.C. and his assassination in 172. The three and one-half years are the period from deposition to death. In this interpretation, Dan. 9:26 – 27 describes the attack on the city by Antiochus Epiphanes. While this view does not contain a full four hundred and ninety years, the problem is answered by appeal to the fact that we know little of how the years were actually reckoned in that period.

III. The dispensational view. This view basically considers the seventy weeks to have begun with Artaxerxes' decree and the sixty-ninth week to have ended with Christ's death. But the great "parenthesis" or unreckoned period from Christ's death until the SECOND COMING of Christ for his saints (more specifically, the "rapture") is the period of the Gentiles. Finally, the seventieth week is that period of the ANTICHRIST in Jerusalem until Christ comes again to deliver his church, a period covering seven years.

This writer holds the traditional view and notes the obvious fulfillment by Jesus Christ of the goals listed in Dan. 9:24 . Note the great theological words contained in that one passage.

J. B. Scott

sewing. The origin of the skill of sewing is lost in the antiquity of the race. The book of Genesis, however, relates that Adam and Eve sewed fig leaves to make aprons for themselves (Gen. 3:7; the Heb. verb *tāpar H9529* occurs also in Job 16:15; Eccl. 3:7; Ezek. 13:18). Sewing was done by both men and women in the Mediterranean world. The only explicit reference to sewing in the NT is Jesus' saying, "No one sews [*epiraptō G2165*] a patch of unshrunk cloth on an old garment" (Mk. 2:21; the more common verb *epiballō G2095*, "to lay on," is used in the parallels, Matt. 9:16 and Lk. 5:36). It is very likely, however, that Paul practiced the craft in tent-making, which was his trade.

Bedouin woman sewing.

sex. The Scriptures reflect the cautious attitude toward discussion of sexual matters that was prevalent in ancient times. The poetic and imaginative nature of the Hebrew language resulted in the use of euphemisms that tended to conceal linguistically such things as the male and female organs, sexual intercourse, and reproduction. In spite of such circumlocutions, however, the subject of sex and related topics are treated frequently and with frankness in the Bible.

1. The teaching of the OT concerning sex
    1. Distinctions between the sexes
    2. The sex organs
    3. Sexual intercourse
    4. Sex education
2. The teaching of the NT concerning sex
    1. Christ's teaching
    2. The teaching of the early church
3. Summary

I. The teaching of the OT concerning sex. The OT contains the major portion of the biblical teaching concerning sex. Reference is made to distinctions between the sexes in the CREATION account in Genesis; and the PENTATEUCH contains numerous commandments related to sex and sexual acts. The narrative portions of the OT contain references to normal and abnormal sexual activities. Portions of the WISDOM Literature deal with sex in relation to such diverse themes as married love (SONG OF SOLOMON) and the dangers of promiscuity (PROVERBS). The Bible states that OT teachings were included in the Scriptures not only for the purpose of conveying redemptive truth but also for the "instruction" of believers through the centuries (1 Cor. 10:11). The OT references to sex seem to fall largely under the latter category.

A. Distinctions between the sexes. In Genesis mention is made of the creation of male and female (Gen. 1:27). The primary meaning of the word *sex* emphasizes the physical differences between the members of the human family.

1. The male role. According to the first chapter of Genesis, the first created human was a male called ADAM. The specific tasks assigned to him following his creation included the care of the garden of EDEN and the naming of the animals (Gen. 2:15 – 20). Other activities of early males included sheep herding and farming (4:1 – 2); ranching (4:20); and working with metals (4:22). The male in the OT was expected to be the head of the household and was to be the spiritual leader of the family (3:16; Exod. 12:1 – 6; 20:12; Deut. 6:20 – 25 et al.).

It seems that Jewish parents specially welcomed the birth of male children. This attitude was demonstrated in the desire for male progeny (1 Sam. 1:8 – 18). Also, a higher ransom was to be paid for males in contrast to females (Lev. 27:1 – 8). When the numbering of the Israelites was conducted, special attention was given to males (Num. 3:40 – 43). Jewish genealogies also gave special attention to males in their roles as progenitors of the families (Ezra 8:1 – 14); and the priesthood was reserved for males (Exod. 19:22; Lev. 1:11). The majority of the prophets were males, although

female prophets, or prophetesses, were active in Israel at varied times (Exod. 15:20; Jdg. 4:4; 2 Ki. 22:14; 2 Chr. 34:22; Neh. 6:14; and Isa. 8:3).

Males were not allowed to put on women's garments (Deut. 22:5); and Jewish males were distinguished from other males in some of the surrounding nations by the rite of CIRCUMCISION (Gen. 34:14 – 17). Apparently Jewish males were to be distinguished in the wearing of their hair from females generally (1 Cor. 11:14) as well as from men in the surrounding nations (Lev. 19:27).

Ancient Israel was largely patriarchal and tended to give decided favor to the male role. Under this system, males apparently were afforded a number of privileges that were not available to females.

2. The female role. According to the creation account in Genesis, the first female, EVE, was created from the rib of Adam (Gen. 2:21 – 22). Prior to the creation of Eve, Adam was referred to as being without a "suitable helper" (2:20). According to Genesis, the creation of woman apparently served a utilitarian purpose as far as man was concerned. Adam called his wife "woman," a term that signified her being taken from man (2:23). Eve, the first female, was enticed to partake of the forbidden fruit and gave the same to her husband Adam (3:1 – 6). Following this act, the male and female apparently became aware in a sexual sense of the physical differences between them (3:7). The FALL is said to have resulted in a divine judgment on both the male and the female sexes. For the male, a different form of work would result; in the case of the female, an increased sense of pain in childbirth and a (heightened or dependent) desire for her husband was to be expected (3:14 – 16; the precise meaning of the passage is disputed).

The role of woman in the earliest days of recorded history generally was considered to be that of bearing and mothering children and of serving as a helper to the male (Gen. 4:1 – 2, 16 – 25). Gradually, the role of the female in the OT became more sophisticated, and over time women seemed to assume a greater share of the activities originally ascribed to males. The book of Proverbs describes a virtuous wife as one who engaged in spinning wool and making linen from flax, purchasing real estate, planting vineyards, selling linen garments (Prov. 31:10 – 31). At this point in Israel's history, such activities were considered desirable as far as women were concerned and were placed on a plane next to that of bearing and rearing children.

B. The sex organs. The Scriptures tend to avoid direct reference to the sex organs and to issues connected with sex. For example, when Gen. 17:11 refers to the rite of circumcision, the mention of the male sex organ is concealed by use of the expression *bĕśar(orlatkem*, literally, "the flesh of your foreskin." The injunction that a wife should not seize her husband's adversary by the male sex organs uses the term *mĕbûsîm H4434* (Deut. 25:11), a word that occurs nowhere else in the Bible and that literally means "shame-provoking [things]" (cf. Latin *pudenda*). Again, reference is made to the desolation of Judah by the Assyrians as being as extensive as if one shaved "the hair of the feet" (Isa. 7:20; NIV, "the hair of your legs"); some believe that this usage of the word *feet* is an indirect reference to the lower parts of the body including the genitalia and pubic hair (cf. Ruth 3:1 – 4, 7 – 9; Deut. 28:57; perhaps Isa. 6:2). In a similar way, a circumlocution is used to refer to the testicles and the penis (Deut. 23:1). The word *seed* is used to refer to male semen, and a variety of injunctions are given in relation to this term (Gen. 3:15; Lev. 15:16 – 18; 22:4).

A similar approach was taken to the female genitalia. The female breast is referred to in several instances in the OT (e.g., Job 3:12; Cant. 1:13; 4:5; 8:10), and the womb is specifically mentioned in connection with birth and parentage (Gen. 25:23; 38:27; Prov. 31:2; Isa. 49:5). However, more

precise terms such as are used today to identify the female genitalia were not used by the Hebrews in the Scriptures. Rather, generalities and euphemisms seem to be preferred. Also, it was considered shameful by the Hebrews to expose to public view either the male or the female genitalia (Gen. 9:21 – 23; Lev. 18:6 – 19; 20:17; 2 Sam. 6:20).

C. Sexual intercourse. Similarly, sexual intercourse is not referred to directly, but rather by expressions such as "becoming one flesh with" (Gen. 2:24), "knowing" (4:1, 17, 25; Jdg. 19:25), and "lying with" someone (Gen. 34:7; Num. 31:17, 18; Deut. 22:22). This language tends to emphasize the intimate nature of the sex act. The concept of "knowing" someone may have a relationship to the fall and the knowledge of good and evil with its possible sexual overtones (Gen. 2:17 and 3:7). The Scriptures manifest a clear awareness of the emotional and intimate nature of sexual intercourse along with the companionship involved between two lovers (Song of Solomon.). The primary purpose of sexual intercourse stressed in the Scriptures is procreation (Gen. 1:28). Sexual intercourse outside of marriage is condemned along with prostitution and other types of sexual activity that were not related to procreation (Exod. 20:14, 17; 22:16; Lev. 18:6 – 18; 19:20). Sexual intercourse with animals by either males or females is forbidden (Lev. 18:23; 20:15 – 16).

D. Sex education. Sex education according to present standards was largely unknown in ancient Israel. Apparently children learned about sex either through parental instruction or by personal experience. Sex instruction through the Scriptures or in public education was limited to statements regarding the expected role of the male and female in reproduction and warnings against the misuse or abuse of sex or the body. The OT specifically condemned a number of activities connected with the body and the sex organs: exposure of the sex organs (2 Sam. 6:20); adulterous interest in another man's wife (Lev. 18:20); the enticement of a virgin to commit sexual intercourse (Exod. 22:16); sexual intercourse with animals, mentioned earlier (Lev. 18:23); homosexuality (18:22 and 20:13); incest (Lev. 18:6 – 18; Deut. 27:20, 22); prostitution (Deut. 23:17 – 18); intercourse with an engaged slave (Lev. 19:20); and related subjects. It should be mentioned that polygamy was practiced in early Israel and men were allowed to have sex relations with their concubines. However, polygamy was replaced by monogamy in later Israel; and the Scriptures teach that while polygamy was permitted by God, it was never ordained by him (Matt. 19:3 – 8). Monogamy was the practice of the first humans, Adam and Eve (Gen. 1 – 5).

In contrast to the surrounding nations, the Israelites possessed a lofty moral code, even though they did not always live up to this ethic.

II. The teaching of the NT concerning sex. The major emphasis of the NT was on teachings related to evangelization and the establishment of the church. For the most part, the early church seemed to rely upon the teachings of the OT with respect to sex and the sex role. However, the NT is not silent on the topic. When the topic is mentioned, it usually is dealt with in relation to the spiritual life of the church, and the total message of redemption as it related to the family and the individual.

A. Christ's teaching. The four Gospels emphasize the teachings and deeds of Christ that had a messianic and redemptive significance. As a result, only passing mention is made of subjects related to sex. During his earthly ministry, Christ referred to the topic primarily in its relation to redemptive truth and dealt with several problems of a sexual nature.

Christ condemned adultery, fornication, and lust, both outwardly (Matt. 15:19 – 20) and

inwardly (5:27 – 32). He made reference to being a EUNUCH either by natural or human causes for the kingdom of heaven's sake (19:12). Christ forgave the woman taken in the act of adultery (Jn. 8:1 – 11) and frequently referred to virgins and marriage in his parabolic teachings. In general, however, his teachings concerning sex and related topics were subservient to his teachings concerning redemptive truth.

B. The teaching of the early church. The attitude toward sex prevalent among the early Christians reflected agreement with the highest moral ideals of the OT and the spiritual ideals of Christ. The Hebraic tendency to avoid direct reference to the sex organs and sexual intercourse persisted in the early church. For example, Paul referred to treating with greater modesty "the parts that are unpresentable" (1 Cor. 12:23); and the writer of Hebrews refers to the "bed" as undefiled when occupied by marriage partners (Heb. 13:4). While the subject of sex is not discussed specifically in the NT, topics related to the subject frequently are dealt with by the early church. It seems that the early Christians adopted generally the views and teachings of the OT concerning sex; and the OT teachings related to the subject seemed to provide adequately for their needs with respect to sex instruction.

The prevailing attitude toward women in the Jewish culture was adopted by the early Christians. In general this involved ascribing to men a major share of the leadership. The apostles were male and apparently the early elders were males according to existing records. However, women were not overlooked in the activities of the church. Paul placed restrictions upon the activities allowed to women but at the same time made mention of women occupying places of service and leadership in the churches (Rom. 16:1, 6, 12; Phil. 4:3; 1 Tim. 2:12 – 14; 3:11). The first convert in Europe was a business woman, LYDIA of THYATIRA (Acts 16:14); and women served as prophetesses and exercised charismatic gifts in the early worship services (Acts 21:8 – 9; 1 Cor. 11:5; note also 1 Cor. 11:6 – 15 and 14:34 – 40 concerning the role of women in the church).

While the early church relied largely on the OT with respect to specific instruction about sex, reference is made in the NT to a variety of related subjects. Sexual intercourse between marriage partners is considered appropriate and expected (Heb. 13:4); but married couples may forego, at times, natural sex relations in order to give themselves to prayer (1 Cor. 7:5). Refraining from sexual intercourse is referred to as "depriving each other," and uncontrolled sexual desire of the unmarried and widows is spoken of as "burning" (v. 9), in accordance with the Hebrew tendency to refer to sexual intercourse indirectly. Polygamy was condemned by the early church and monogamy was the expected practice (1 Cor. 7:1 – 2; 1 Tim. 3:2). Homosexuality (Rom. 1:26 – 28), prostitution, adultery, and fornication (Gal. 5:19; Jude 7) were condemned along with other vices prevalent in the early Christian era. It was stated that indulgence in such vices would keep a person from entering the kingdom of God (1 Cor. 6:9 – 10). No mention is made in the NT of formal sex education in the early church. It appears that such instruction was left largely to the home and family apart from the specific instructions cited above.

III. Summary. The biblical teachings concerning sex manifest a high ethic, especially when contrasted with the prevailing views in the same period of history. The sex roles are distinguished and a division of labor commensurate with each role is apparent. However, women gained considerable status over time, and the Christian view of sex allowed for mutual respect among the sexes coupled with a monogamous view of marriage, which was based upon the original relationship of the first created beings.

Sexual activities during both the Christian and OT eras were discussed with caution and candor coupled with relative frankness. Apart from positive instruction regarding the responsibility for procreation, sexual instruction in the Bible was largely related to prohibitions that would discourage participation by the people of God in those sex practices exhibited in the surrounding nations. See also FAMILY; MARRIAGE.

<div align="right">G. LAMBERT</div>

Sextus, Sentences of. A document preserved in Coptic in the NAG HAMMADI LIBRARY (NHC XII, 1). The work is not Gnostic in character but is rather a Christian collection of ethical sayings that goes back to a Greek original composed probably in the 2nd cent. A.D. With an ascetic outlook, it emphasizes the need for mastering bodily passions; it proved to be a popular work and was translated into Latin, Syriac, and other languages (two Gk. MSS have also survived). The Coptic version, though fragmentary, is regarded as an important textual witness. (English trans. of the Coptic in *NHL,* 503 – 8. For a broad study, see H. Chadwick, *The Sentences of Sextus: A Contribution to the History of Early Christian Ethics* [1959].)

Shaalabbin, Shaalbim shay'uh-lab'uhn, shay-al'bim (שַׁעֲלַבִּין *H9125,* שַׁעַלְבִים *H9124,* prob. "[place of] foxes"; gentilic שַׁעַלְבֹנִי *H9126,* "Shaalbonite"). The form Shaalabbin occurs in a list of towns allotted to the tribe of DAN; it is included between Ir Shemesh (see BETH SHEMESH #3) and AIJALON (Josh. 19:41 – 42). It must be the same as Shaalbim, which is associated with Mount HERES and Aijalon as places from which the Danites could not drive out the AMORITES (Jdg. 1:34 – 35). Elsewhere, Shaalbim is listed as one of four towns, including Beth Shemesh, that were part of an administrative center under SOLOMON; governed by BEN-DEKER, this center supplied provisions for the royal court (1 Ki. 4:9). The descriptive "Shaalbonite," used of Eliahba, one of DAVID'S mighty warriors (2 Sam. 23:32; 1 Chr. 11:33; NRSV renders, "Eliahba of Shaalbon"), very probably is a gentilic adjective of Shaalbim, and some argue that Shaalbon (which does not occur in the OT) may have been the original form of the place name. See also SHAALIM. Shaalabbin/Shaalbim is generally identified with modern Selbit, c. 3 mi. NW of Aijalon, 8 mi. N of Beth Shemesh, and 16 mi. NW of Jerusalem. (See *NEAEHL,* 4:1338.)

<div align="right">A. BOWLING</div>

Shaalbon, Shaalbonite shay-al'bon, shay-al'buh-n*i*t. See SHAALBIM.

Shaalim shay'uh-lim (שַׁעֲלִים *H9127,* "hollows"). KJV Shalim. A region near SHALISHA, between the hill country of Ephraim (see EPHRAIM, HILL COUNTRY OF) and the tribal territory of BENJAMIN, where SAUL went looking for his father's donkeys (1 Sam. 9:4; some think that "Benjamin" here is a textual error). Shaalim has often been identified with the Danite town of Shaalbim (see SHAALAB-BIN), some 16 mi. W of Jerusalem. However, an area around BETHEL, N of Jerusalem, would fit the context better. Accordingly, Shaalim is often thought to be the same as SHUAL, a region close to OPHRAH (1 Sam. 13:17), a few miles N of MICMASH.

A. BOWLING

Shaaph shay'af (שַׁעַף *H9131,* prob. "balm," suggesting the comfort provided by a child). (1) Son of Jahdai (1 Chr. 2:47) and apparently a descendant of JUDAH in the line of CALEB (2:47). See discussion under JAHDAI.

(2) Son of CALEB by his concubine MAACAH; he is described as the "father" (i.e., founder) of MAD-MANNAH (1 Chr. 2:49). Some emend the text so that this Shaaph can be identified with #1 above (see *ABD*, 5:1147 – 48).

Shaaraim shay'uh-ray'im (שַׁעֲרַיִם *H9139,* "[pair of] gates"). (1) A town within the tribal territory of JUDAH located in the SHEPHELAH (Josh. 15:36; KJV, "Sharaim"). The way from the Valley of Elah (some 18 mi. WSW of JERUSALEM; see ELAH, VALLEY OF) to GATH and EKRON is identified as "the Shaaraim road" (1 Sam. 17:52). The site has not been positively identified, but an attractive proposal is modern Khirbet Sairah, very near AZEKAH (cf. A. F. Rainey in *BASOR* 251 [Summer 1983]: 6 – 7).

(2) One of the Simeonite towns where the clan of SHIMEI son of Zaccur lived (1 Chr. 4:31). Its location is uncertain, but some scholars regard Shaaraim here as a textual error for SHARUHEN (Josh. 19:6).

A. BOWLING

Shaashgaz shay-ash'gaz (שַׁעַשְׁגַּז *H9140,* meaning uncertain). A EUNUCH in the court of Ahasuerus (XERXES), king of PERSIA (Esth. 2:14). He is described as being "in charge of the concubines," who resided in "the second house of the women" (KJV; NIV, "another part of the harem"). Initially, the young women who were candidates to become queen spent time in the part of the HAREM reserved for virgins, which was supervised by HEGAI (v. 8); after spending a night with the king, they became concubines (lesser wives) under the custody of Shaashgaz. ESTHER, however, won the king's approval and was made queen rather than a lesser wife (v. 17).

Shabbethai shab'uh-thi (שַׁבְּתַי *H8703,* prob. "[born on] the Sabbath"). A Levite who apparently challenged EZRA'S instruction that those who had married foreign women should divorce them (Ezra 10:15; cf. 1 Esd. 9:14 [KJV, "Sabbatheus"]). The Hebrew text, however, can be understood differently. See discussion under JAHZEIAH. He is probably the same Shabbethai listed among the Levites who "instructed the people in the Law" (Neh. 8:7; 1 Esd. 9:48 [KJV, "Sabateas"]). Elsewhere, he and Jozabad are described as "two of the heads of the Levites, who had charge of the outside work of the house of God" (Neh. 11:16).

Shachia shuh-ki'uh. KJV form of SAKIA.

Shaddai, Shadday. See EL SHADDAI.

shade, shadow. Most occurrences of the biblical words for "shadow" (Heb. ṣēl *H7498* and Gk. *skia G5014*) are figurative. Only twice does an actual shadow play a significant part in the narrative: when HEZEKIAH asked that the shadow on the sundial might reverse its normal direction of movement, as a sign from God (2 Ki. 20:10; see DIAL), and when the sick were brought into the streets so that the shadow of PETER might fall on them as he passed (Acts 5:15). The many figurative references make use of an image which, like so much of the Bible's imagery, is drawn straight from the Middle Eastern environment. In a land of heat and violent storms, the need for shelter would be readily apparent, and since much of the land was treeless, protection was usually found in the shade of a rock or crag.

Figurative references to the shadow fall into three main groups. (1) Uses indicating the ephemeral nature of things, or their lack of substance (e.g., 1 Chr. 29:15; Job 8:9; Pss. 102:11; 144:4). By contrast, however, with the fleeting existence of human beings, God is eternal and unchanging. He does not alter his position or inclination as the hours or the years pass; he is not like the shadow on the sundial, but is always the same (Jas. 1:17).

(2) Uses indicating protection or defense, in the sense of shelter from the heat or the storm. Most of these references picture God as providing the shelter, and they are numerous in the Psalms (e.g., Pss. 17:8; 36:7; 57:1; 63:7; 91:1). On some occasions Israel was accused by God of seeking shelter elsewhere, and of hiding in the imaginary safety of other shadows—allies like Egypt whose help she enlisted in her wars (cf. Isa. 30:2, 3; Jer. 48:45).

(3) NT uses in which the sense is "foreshadow, adumbration, partial disclosure." PAUL, for example, states that the OT dietary regulations and special feasts "are a shadow of the things that were to come; the reality, however, is found in Christ" (Col. 2:5). Especially significant is the use of the term with reference to the TABERNACLE and its contents in the wilderness, implying that the realities of heaven cast a shadow on the earth—a shadow that will in most cases later be replaced by actuality—and that what God has ordained on earth is a representation of what is in heaven (Heb. 8:5; 10:1). The writer to the Hebrews explains that the physical structure in the desert, in which the Levitical offerings took place, was only an illustration in visible form of spiritual reality, or spiritual truth. There exist in heaven, he suggests, spiritual facts of such character that, when they are translated onto the material plane, they take this particular form. The relationship of men and women to God can be concretized in this particular way. But, he adds, these material forms were never more than a foreshadowing of a new and more dramatic material expression of the spiritual reality—the coming and the sacrifice of Christ. Thus he seems to challenge the normal human pattern of thought, according to which material objects throw insubstantial shadows. In *this* case, it is the spiritual reality—insubstantial though it may appear—which casts its shadow in a material form, in advance of its own final establishment. See also TYPOLOGY.

Shadow cast on sundial.

J. H. Paterson

Shadrach, Meshach, Abednego shad'rak, mee'shak, uh-bed'ni-goh (שַׁדְרַךְ *H8731* [Aram. *H10701],* perhaps from Akk. *šādurāku,* "I have been made to feel afraid"; מֵישַׁךְ *H4794* [Aram. *H10415],* derivation unknown; עֲבֵד נְגוֹ *H6284* [Aram. *H10524*], possibly "servant of [the god] Nebo"). The Babylonian names that Ashpenaz, chief officer of Nebuchadnezzar king of Babylon, gave to three Israelite youths who were companions of Daniel (Dan. 1:7). Their original Hebrew names were respectively Hananiah ("Yahweh is gracious"), Mishael ("Who is like God?"), and Azariah ("Yahweh has helped"). These were changed presumably to honor the Babylonian religion, but the etymologies of the new names are obscure, and some believe that the biblical writer deliberately deformed them to satirize pagan culture.

Daniel and his three friends belonged to the Hebrew royal family and are described as "young men without any physical defect, handsome, showing aptitude for every kind of learning, well informed, quick to understand, and qualified to serve in the king's palace" (Dan. 1:3 – 4). They were to be educated for three years in the "language and literature of the Babylonians." They determined, however, not to defile themselves with the "royal food and wine"; instead, they ate vegetables and drank water for ten days (vv. 8 – 14). At the end of this trial period, it was obvious that "they looked healthier and better nourished than any of the young men who ate the royal food" (v. 15). Later, the three youths were appointed provincial administrators (2:49). They also proved to be of stalwart faith and piety, and withstood all pressures to worship the pagan image set up by Nebuchadnezzar. In consequence of this, all three were cast into a fiery furnace, but they were miraculously delivered (3:1 – 30). See Daniel, Book of.

Although not mentioned outside the book of Daniel, there are repeated allusions to the three Hebrew youths in the apocrypha, and the martyrs of the Maccabean period seem to have been much encouraged by their example (1 Macc. 2:59 – 60; 3 Macc. 6:6; 4 Macc. 13:9; 16:3, 21; 18:12). The NT alludes to them when it mentions the heroes of faith who "quenched the fury of the flames" (Heb. 11:34).

L. L. Walker

Shadud shay'duhd. See SARID.

shaft. See WATER SHAFT.

Shage shay'geh. KJV form of SHAGEE.

Shagee shay'gee (שָׁגֵה *H8707,* derivation uncertain). KJV Shage. A Hararite and the father of Jonathan; the latter was one of DAVID'S mighty warriors (1 Chr. 11:34). In the parallel passage the MT reads "Jonathan, Shammah the Hararite" (2 Sam. 23:32 – 33; the NIV and other versions emend to "Jonathan son of Shammah the Hararite"), and Shammah is also identified as "son of Agee [*ʾāgēʾ]* the Hararite" (23:11). Evidently there has been textual corruption in one or more of these passages. According to one view, the name Shagee in Chronicles is original, and 2 Sam. 23:32 – 33 should be emended accordingly (cf. KD, *Samuel,* 499: "שַׁמָּה for בֶּן־שָׁגֵא probably arose from ver. 11"). Others believe Shagee is a false form, resulting from a confusion of the names Shammah and Agee (cf. *HALOT,* 4:1414). See also HARARITE.

Shahar shay'hahr (שַׁחַר *H8840,* "dawn," referring prob. to the reddish morning twilight [cf. AHISHAHAR]). In English Bible versions, this name appears only in the title of Ps. 22 (KJV, "Aijeleth Shahar"; NIV, "The Doe of the Morning") and in the place name ZERET SHAHAR (Josh. 13:19). The Hebrew word, however, occurs over twenty times in the OT, and some scholars believe that at least in a few passages it alludes to the Amorite god Shahar (the Morning Star, referring to Venus at dawn). Ugaritic mythology describes the birth of Shahar and his twin Shalem (deity of the dusk or evening) to the Canaanite god EL (cf. C. H. Gordon, *Ugaritic Literature* [1949], 60 – 62; *ABD,* "Shahar" and "Shalem," 5:1150 – 51 and 1152 – 53; *DDD,* 754 – 55).

Such expressions as "the eyelids of the morning" (Job 3:9 and 41:18 NRSV; NIV, "the rays of dawn") and "the wings of the dawn" (Ps. 139:9) are sometimes thought to reflect this Canaanite MYTH, without necessarily suggesting that the biblical writers themselves held to it. Similarly, the description of the king of BABYLON as "morning star, son of the dawn" (Isa. 14:12; see MORNING STAR) has been interpreted as suggesting a divine being (cf. H. Wildberger, *Isaiah 13 – 27: A Continental Com mentary* [1997], 63).

H. M. WOLF

Shaharaim shay huh-ray'im (שַׁחֲרַיִם *H8844,* "[two] dawns," possibly indicating time of birth between initial morning light and appearance of the sun's rays [cf. *HALOT,* 4:1469]). A descendant of BENJAMIN, although his place in the genealogy is unclear (1 Chr. 8:8). The passage contains some difficult textual problems and various emendations have been proposed. However, the MT appears to say that Shaharaim divorced two wives, Hushim (who had given birth to two sons, v. 11) and Baara, and that afterwards his third wife Hodesh gave birth to seven sons in MOAB (vv. 9 – 10; it is not clear whether he had always lived in Moab or only after his divorces). Shaharaim had an extensive progeny, especially through ELPAAL (born to Hushim). His grandson SHEMED is said to have built the towns of ONO and LOD as well as surrounding villages (v. 12). Two other sons "were heads of families of those living in Aijalon and…drove out the inhabitants of Gath" (v. 13). (For further discussion, see G. N. Knoppers, *I Chronicles 1 – 9,* AB 12 [2004], 482 – 83.)

Shahazimah shay'huh-z*i*'muh. KJV form of SHAHAZUMAH.

Shahazumah shay'huh-*zoo*'muh (שַׁחֲצוּמָה *H8833;* the *Qere* is שַׁחֲצִימָה, but some scholars suggest vocalizing it שַׁחֲצִימָה, supposedly the locative form of an otherwise unattested name, שַׁחֲצִים, meaning "double elevation" [see *HALOT,* 4:1463 – 64]). KJV Shahazimah. A site on the northern boundary of ISSACHAR between Mount TABOR and BETH SHEMESH (Josh. 19:22). Its location is unknown, though several proposals have been made, including modern el-Kerm (SE of Tabor), which appears to lie on the divide between the watersheds of Issachar and NAPHTALI (see discussion in Z. Kallai, *Historical Geography of the Bible [1986],* 195 – 96).

<div align="right">A. BOWLING</div>

Shalem shay'luhm (שָׁלֵם *H8970,* "complete"). A city of SHECHEM where JACOB went after he left PADDAN ARAM (Gen. 33:18 KJV; cf. also NIV mg.). Most scholars, however, believe that the Hebrew word here is the common adjective *šālēm H8969* ("complete, whole, safe"), yielding the translation, "he arrived safely at the city of Shechem" (NIV). The Hebrew form is identical with the name usually rendered SALEM (Gen. 14:18; Ps. 76:2).

Shalim shay'lim. KJV form of SHAALIM.

Shalisha shuh-l*i*'shuh (שָׁלִשָׁה *H8995,* possibly "third [part]"). Also Shalishah. A region near SHAALIM, between the hill country of Ephraim (see EPHRAIM, HILL COUNTRY OF) and the tribal territory of BENJAMIN, where SAUL went looking for his father's donkeys (1 Sam. 9:4). Unfortunately, the topographical information in this text is difficult to sort out (cf. P. K. McCarter, Jr., *I Samuel,* AB 8 [1980], 174 – 75). Shalisha was probably in SE Ephraim, and it is usually thought that BAAL SHALISHAH (2 Ki. 4:42) was found in that area, but the precise location is unknown.

Shallecheth shal'uh-kith. See SHALLEKETH.

Shalleketh shal'uh-kith (שַׁלֶּכֶת *H8962,* meaning uncertain [cf. שַׁלֶּכֶת *H8961,* "felling," Isa. 6:13]). Also Shallecheth. The name of a gate on the upper road in the W part of the TEMPLE enclosure in Jerusalem; the gatekeepers assigned to it were SHUPPIM and HOSAH (1 Chr. 26:16; some scholars omit "Shuppim" as a textual error). Nothing else is known about this gate, although on the assumption that the name might mean "casting forth," the improbable suggestion has been made that the ashes and offal from the sacrifices were discarded there. Also doubtful is the view (*ABD,* 5:1153 – 54) that the name means "departing" and that therefore the reference is to the gate elsewhere called SUR (2 Ki. 11:5; the verb *sûr H6073* means "turn aside, leave"). The SEPTUAGINT reads *pasto-phoriou,* "of [the] chamber," and on that basis some scholars emend the MT to *liškat* (construct *of liškâ H4384,* "hall") and translate, "the chamber gate" (cf. G. N. Knoppers, *I Chronicles 10 – 29,* AB 12A [2004], 864).

Shallum shal'uhm (שַׁלּוּם *H8935* [also שַׁלֻּם], possibly short form of שֶׁלֶמְיָהוּ *H8983,* "Yahweh has repaid [*or* replaced]"; see SHELEMIAH and cf. MESHELEMIAH and MESHULLAM). (1) Son of JABESH and one of the last kings of Israel (2 Ki. 15:10 – 15). Shallum reigned over the ten tribes after having murdered ZECHARIAH, who was the son of JEROBOAM II and the last king of JEHU'S dynasty. Within a

month this usurper was himself assassinated by Menahem, c. 745 B.C.

(2) Son of Tikvah and husband of the prophetess Huldah; he had charge of the royal wardrobe (2 Ki. 22:14; 2 Chr. 34:22 ["son of Tokhath"]). Some identify him with #13 below.

(3) Son of Sismai and descendant of Judah in the line of Jerahmeel (1 Chr. 2:40). He descended from Jerahmeel's son, Sheshan, who gave his daughter in marriage to an Egyptian slave (vv. 34 – 35).

(4) Son of Josiah and king of Judah (1 Chr. 3:15; Jer. 22:11). See Jehoahaz #2.

(5) Son of Shaul and grandson of Simeon (1 Chr. 4:25).

(6) Son of the high priest Zadok and ancestor of Ezra (1 Chr. 6:12 – 13; Ezra 7:2; 1 Esd. 8:2 [KJV, "Salum"]; 2 Esd. 1:1 [KJV, "Sadamias"]; Bar. 1:7 [KJV, "Salom"]); probably the same as Meshullam in the parallel lists (1 Chr. 9:11; Neh. 11:11).

(7) Son of Naphtali and grandson of Jacob (1 Chr. 7:13 MT, followed by most versions); the NIV, on the basis of some MSS and the parallel passages (Gen. 46:24; Num. 26:49), has Shillem.

(8) Son of KORE and descendant of KORAH; after the EXILE, he was the chief gatekeeper, "being stationed at the King's Gate on the east" (1 Chr. 9:17 – 19 [although some think that v. 19 refers to a different person]; see also Ezra 2:42; Neh. 7:45; 1 Esd. 5:28 [KJV, "Salum"]). His firstborn, MATTITHIAH, "was entrusted with the responsibility for baking the offering bread" (1 Chr. 9:31). This Shallum is often identified with MESHELEMIAH (v. 21), SHELEMIAH (26:14), and MESHULLAM (Neh. 12:25). He is probably the same person listed among the gatekeepers who agreed to put away their foreign wives (Ezra 10:24; 1 Esd. 9:25 [KJV, "Sallumus"]).

(9) Father of JEHIZKIAH, an Ephraimite leader (2 Chr. 28:12).

(10) One of the descendants of Binnui who agreed to put away their foreign wives (Ezra 10:42).

(11) Son of Hallohesh; "ruler of a half-district of Jerusalem" who, with his daughters, repaired a section of the walls of Jerusalem (Neh. 3:12).

(12) Son of Col-Hozeh (Neh. 3:15 NRSV). See SHALLUN.

(13) Father of HANAMEL and uncle of JEREMIAH (Jer. 32:7). Some identify him with #2 above.

(14) Father of Maaseiah; the latter was a doorkeeper (NJPS, "guardian of the threshold") who had a room in the temple (Jer. 35:4).

<div align="right">R. F. GRIBBLE</div>

Shallun shal'uhn (שַׁלּוּן *H8937,* possibly "carefree" [cf. *HALOT,* 4:1511] or else a variant of שַׁלּוּם *H8935* [see SHALLUM]). Son of Col-Hozeh; he was a postexilic "ruler of the district of Mizpah" who rebuilt the FOUNTAIN GATE, "roofing it over and putting its doors and bolts and bars in place." Shallun was responsible also for repairing the wall of the Pool of SILOAM (see SHELAH, POOL OF), which was apparently used to irrigate the KING'S GARDEN (Neh. 3:15; NRSV, "Shallum"). What the line of this wall may have been is difficult to ascertain (see H. G. M. Williamson, *Ezra-Nehemiah,* WBC 16 [1985], 207 – 8).

Shalmai shal'mi (שַׁלְמַי *H8978* [Ezra 2:46 *Ketib,* שַׁמְלַי, but some MSS of Neh. 7:48 have שָׁלַם, which is thought to be the correct pointing; in either case, the derivation is uncertain [see *HALOT,* s.v. שָׁלַם, 3:1331 – 32]). Ancestor of a family of temple servants (NETHINIM) who returned after the EXILE with ZERUBBABEL (Ezra 2:46 [NRSV, "Shamlai"; NJPS, "Salmai"]; Neh. 7:48; 1 Esd. 5:30 RSV [KJV and NRSV, "Subai"]).

Shalman shal'muhn (שַׁלְמַן *H8986,* meaning uncertain). An otherwise unknown person who "devastated Beth Arbel on the day of battle, / when mothers were dashed to the ground with their children" (Hos. 10:14; see BETH ARBEL). Evidently this event was well known to the Israelites, but the identification of Shalman is difficult. Many think the reference is to SHALMANESER V, the Assyrian king who besieged SAMARIA in 725 – 723 B.C.; others have suggested that he should be equated with an 8th-cent. king of MOAB named Salamanu, mentioned by TIGLATH-PILESER III in a building inscription (text in *ANET,* 282a; for other possibilities and further discussion, see D. K. Stuart, *Hosea-Jonah,* WBC 31 [1987], 171 – 72).

<div align="right">L. L. WALKER</div>

Shalmaneser shal'muh-nee'zuhr (שַׁלְמַנְאֶסֶר *H8987,* from Ass. *Šulmānu-ašarēd,* "[the god] Shulman is chief"). (1) Shalmaneser I (1274 – 1245 B.C.), son of Adad-nirari I and the greatest warrior of the Middle Assyrian period, is known for having defeated the people of Urartu and Guti, and in the W,

the Hurrians, Hittites, and Arameans. By his capture of Carchemish he was the first to bring Assyria into direct clash with the Egyptians in SW Asia.

(2) Little is known about Shalmaneser II (1030 – 1020 B.C.), who took action to strengthen Assyria after a period of domination by Aramean tribes.

(3) Shalmaneser III (859 – 824 B.C.), son of Ashurnasirpal II, was the first Assyrian king to come into direct contact with Israel. By a long series of raids he sought to contain the pressure of the hill-tribesmen in Urartu (see Ararat) and the Medes and Persians in the Urmia region, but this did not prevent his main thrust to the W in thirty-one years of campaigning.

Basalt statue of Shalmaneser III (from Ashur, 9th cent. B.C.). On the robe is a cuneiform inscription in which Shalmaneser describes himself as "the great king, king of all the four regions, the powerful and the mighty rival of the princes of the whole universe."

Three expeditions were needed to neutralize Bıt-Adini (Beth-Eden) and thus gain a hold of the Euphrates crossing. Its capital, Til-Barsip, was captured in 856 and renamed Kār-Shalmaneser. In 853 the main march was directed toward Damascus via Aleppo. After the capture of Argan, the army advanced to Qarqar on the Orontes near Hama, where it was faced by a powerful alliance led by Irhuleni of Hamath with 700 cavalry and 10,000 men backed by Adad-ʾidri (Hadadezer, the biblical Ben-Hadad II) with 1,200 chariots, 1,200 horsemen, and 20,000 infantry. Ahab the Israelite (*Aḫabbu* [*māt*]*Sirʾilaia*) supplied 2,000 chariots and 10,000 men. Contingents from twelve kings, including Cilicia, Arvad, Musru, Ammon, and Arabia brought the total muster to 62,900 men, 1,900 cavalry, and 3,900 chariots. Shalmaneser claimed the victory in a bloody contest in which 20,500 died. It is, however, significant that neither Hamath nor Damascus was taken, and that the Assyrians did not reappear in the W for three years (1 Ki. 16:29; 20:20; 22:1).

In 849 Shalmaneser again marched westward. CARCHEMISH, the last nominally independent state in the Upper EUPHRATES Valley, was incorporated into the growing provincial system under direct Assyrian control. The Assyrians claimed the defeat of Adad-ʾidri of Damascus, but this is unlikely to have been more than a temporary setback, since they had to take the field again the following year to meet the same king and his twelve allies near Ashtamaku. But again the Assyrians do not appear to have been able to follow up their claimed victory. In his fourteenth year (845) Shalmaneser massed a force of 120,000 men and claimed to have defeated Adad-ʾidri yet again.

By 841 the alliance had broken up and HAZAEL was ruling in Damascus in place of the murdered Adad-ʾidri (2 Ki. 8:15). He now had to face the Assyrians alone, and to do this he made a vigorous stand on Mount SENIR (HERMON, cf. Deut. 3:9), losing 16,000 men and some territory. However, the line of attack was diverted to the Mediterranean via the HAURAN. At Baʿal-rasi (N of Beirut) Shalmaneser received tribute from TYRE and SIDON brought in by ship, and from "Jehu, son of Omri"; according to the inscription and reliefs on the Black Obelisk set up in CALAH to commemorate the event, the tribute was carried by Israelite porters. Although this incident is not mentioned in the OT, it accords with the policy of the usurper JEHU, who may well have sought unsuccessfully for help against Hazael's raids on N Israel (2 Ki. 10:31 – 32). It explains the subsequent need for Assyrian intervention when SAMARIA made its bid for independence. After one further unsuccessful attempt to capture Damascus in 838, Sennacherib appears to have left the W alone, probably because of increasing internal disorders at home.

In Babylonia, Marduk-zakir-shumi was engaged in a struggle with his brother following the death of his father, Nabu-apla-iddinna, with whom Assyria had been in close treaty relationship (885 – 852). He now invoked the help of Shalmaneser, who in 851 moved to Babylon, defeated the rebels, and made a display of strength through Chaldean country (Kaldu) to the Persian Gulf.

Toward the end of his reign, Shalmaneser seems to have stayed at Calah, the city rebuilt by his father. Here he built himself a new palace and armory, an action perhaps necessitated by the revolt of one of his sons, Ashurdanin-apla, who had led Nineveh, Erbil, and Arrapha to revolt. Another son, Shamshi-Adad V, was taking action against the rebels when his aged father died and he claimed the throne.

(4) The reign of Shalmaneser IV (782 – 772 B.C.), son of Adad-nirari III who had taken tribute from Samaria (Rimah stela), was spent mostly in attempting to suppress local disturbances.

(5) Shalmaneser V (726 – 722 B.C.) continued his predecessor's practice of periodical marches through Syria to collect tribute. He made HOSHEA of Israel a vassal (2 Ki. 17:3), but when in his seventh regnal year Hoshea ceased to pay the annual tribute, Shalmaneser was quick to react. He besieged Samaria for three years, but it is not yet known why he was not in command when the city fell to SARGON II (723/2), unless he had retired to Nineveh where he died.

(For relevant texts, see *ANET*, 277 – 81. See also A. K. Grayson, *Assyrian Rulers of the Third and Second Millennia BC (to 1115)* [1987]; id., *Assyrian Rulers of the Early First Millennium BC*, 2 vols. [1991 – 96]; S. Yamada, *The Construction of the Assyrian Empire: A Historical Study of the Inscriptions of Shalmaneser III (859 – 824 B.C.) Relating to His Campaigns to the West* [2000]. For additional bibliography, see ASSYRIA AND BABYLONIA.)

D. J. WISEMAN

Shama shay'muh (שָׁמָע H9052, prob. "[God] has listened"). Son of Hotham the Aroerite (see AROER); he and his brother Jeiel were among DAVID'S mighty warriors noted as the "Thirty" (1 Chr.

11:44).

Shamariah sham'uh-r*i*'uh. KJV alternate form of SHEMARIAH (only 2 Chr. 11:19).

shambles. This English term, in its archaic sense of "meat market," is used by the KJV once (1 Cor. 10:25). The Greek word it renders, *makellon G3425*, could refer to a food market more generally (cf. H. J. Cadbury, *JBL* 53 [1934]: 134 – 41).

<div align="right">S. BARABAS</div>

shame. The biblical words for "shame" occur over 150 times (Heb. noun *bōšet H1425* and verb *bôs H1017*; Gk. noun *aischynē G158* and verb *aischynomai G159* and its compounds). They are associated with such concepts as defeat, reproach, nakedness, folly, contempt, poverty, unseemliness, cruelty, and nothingness. Shame is a debasing emotion arising from a consciousness of impropriety, offense, injured reputation, hurt pride, or guilt. In most biblical references it is associated with religion; only a few instances relate to social prestige. See HONOR; SOCIETY.

SIN is the primary source of all shame, expressing itself through various media. The first one mentioned in the Bible is nakedness, having a twofold meaning—physical and spiritual. In their primordial state "the man and his wife were both naked, and they felt no shame" (Gen. 2:25), but after they sinned they were ashamed of their nakedness in God's presence (3:10; cf. Rev. 3:18).

After expulsion from the Garden of Eden (see EDEN, GARDEN OF), righteousness precluded shame, while wickedness produced it. Those who deride and hate God's people invite their own shame (Job 8:22; Pss. 71:24; 129:5; 132:18; Isa. 66:5). Those who make idols and worship images are put to shame (Ps. 97:7; Isa. 42:17; Jer. 50:2; 51:17), as are diviners (Mic. 3:7). Heathen nations and their gods shall be put to shame (Jer. 46:24; 48:1, 20; 50:2). Israel's apostasy brought her shame through God's judgment (Ezra 9:7; Isa. 3:24; 30:3 – 5; Ezek. 16:36; Hos. 10:6; Nah. 3:5). Moreover, God's judgment put Israel to shame by other nations (Jer. 2:35 – 36).

Wicked and rude people may cause shame to those of nobler nature. DAVID'S goodwill servants "were greatly ashamed" by the humiliating treatment given them by the Ammonite king, HANUN (2 Sam. 10:5 NRSV; the verb here is *kālam H4007*). David called on God because he was "scorned, disgraced and shamed" by his foes (Ps. 69:19). A man who mistreats his parents "is a son who brings shame and disgrace" (Prov. 19:26). Most of all, Jesus endured the shame of the cross at the hands of evil men (Heb. 12:2; cf. D. A. DeSilva, *Despising Shame: Honor Discourse and Community Maintenance in the Epistle to the Hebrews* [1995]).

In many passages, including some listed above, the idea moves from that of a subjective feeling of shame to the objective reality of judgment. DAVID said, "To you, O LORD, I lift up my soul; / in you I trust, O my God. / Do not let me be put to shame. /…No one whose hope is in you / will ever be put to shame, / but they will be put to shame / who are treacherous without excuse" (Ps. 25:1 – 3). This plea is often reiterated by psalmists and prophets (Pss. 25:20; 31:1, 17; 119:6, 31, 46; Isa. 49:23; Jer. 17:18; cf. Zeph. 3:11). PAUL, quoting from Isaiah's prophecy concerning Christ, says, "he who believes in him will not be put to shame" (Rom. 9:33b; cf. 1 Pet. 2:6).

The worst that a Hebrew could wish on his enemies was that they be put to shame (Ps. 31:17; 119:78). This malediction was often invoked, sometimes coupled with another curse, such as disgrace, confusion, and destruction (Pss. 35:4, 26; 71:13; cf. 40:14; 70:2; 109:28; Jer. 17:18). The final place of the wicked is accursed with shame. Elam and her accessories in crime will "bear their shame with those who go down to the pit" (Ezek. 32:24). In the resurrection, "Multitudes who sleep

in the dust of the earth will awake: some to everlasting life, others to shame and everlasting contempt" (Dan. 12:2).

In the NT avoidance of shame was sought and taught. Joseph declined to put Mary to shame (Matt. 1:19 RSV). Jesus taught that humble decorum at feasts might avoid shame (Lk. 14:9). Paul taught that the worldly wise and strong were put to shame by God's choice of the weak and foolish (1 Cor. 1:27). Concerning bad conduct, he said, "It is shameful [*aischros G156*] even to mention what the disobedient do in secret" (Eph. 5:12). Some are so worldly that "their glory is in their shame" (Phil. 3:19). Paul was ashamed of the Corinthian church because it did not have believers wise enough to be peacemakers among the brotherhood (1 Cor. 6:5). To young TITUS he wrote that a Christian's deportment should be such "that those who oppose you may be ashamed because they have nothing bad to say about us" (Tit. 2:8; cf. 1 Pet. 3:16). Jesus had put his adversaries to shame (Lk. 13:17). Christians should be ready to meet Christ at his SECOND COMING without shame (1 Jn. 2:28). (See *NIDOTTE*, 1:621 – 27; *NIDNTT*, 3:561 – 64.)

G. B. FUNDERBURK

Shamed shay'mid. KJV alternate form of SHEMED.

Shamer shay'muhr. KJV alternate form of SHEMER.

Shamgar sham'gahr (שַׁמְגַּר *H9011*, apparently from Hurrian *Šimigari*, "[the god] Shimig has given" [cf. *HALOT*, 4:1552]). One of the Israelite leaders during the period of the judges (Jdg. 3:31; 5:6; see JUDGES, PERIOD OF). Shamgar is identified as "son of Anath," but some believe that here the Hebrew expression *ben-'ănāt* may have originally meant something like "warrior of [the goddess] Anath" and that subsequently it came to be used as a military title (P. C. Craigie in *JBL* 91 [1972]: 239 – 40; see ANATH).

Shamgar is noted for having made a successful raid on the PHILISTINES with an oxgoad, a metal-tipped instrument which needed sharpening repeatedly (cf. W. F. Albright, *The Excavation of Tell Beit Mirsim*, 3 vols. [1932 – 43], 3:33). The suggestions that "the oxgoad" was the name of a ship (C. Marston, *The Bible Is True* [1934], 248) and that Shamgar was a Syrian sea captain allied with RAMSES II (J. Garstang, *Joshua-Judges* [1931], 63, 284ff.) are dubious. Although Shamgar may have been a Canaanite, he is listed among those who delivered the Israelites from oppression. Very likely this was the earliest oppression by the Philistines, who interfered with Israel's trade and restricted travel. Shamgar was successful in bringing relief to the Israelites before the Canaanite oppression in the days of DEBORAH and BARAK. Because the biblical information regarding Shamgar is so limited, interpreters have made a variety of conjectures as to the origins of the story (cf. G. F. Moore in *JAOS* 9 [1898]; R. G. Boling in *ABD*, 5:1155 – 56).

S. J. SCHULTZ

Shamhuth sham'huhth (שַׁמְהוּת *H9016*, thought by some to be a hybrid form of שַׁמָּה *H9015* and שְׁמוֹת *H9021*). An IZRAHITE who served as commander in charge of the division for the sixth month under DAVID (1 Chr. 27:8). Shamhuth is usually thought to be the same as SHAMMAH the Harodite, one of the Thirty (2 Sam. 23:25; called SHAMMOTH the Harorite in 1 Chr. 11:27).

Shamir (person) shay'muhr (שָׁמִיר *H9033*, "thorn" or "diamond"). Son of Micah and descendant of

LEVI (1 Chr. 24:24).

Shamir (place) shay'muhr (שָׁמִיר H9034, "thorn" or "diamond"). (1) A town in the hill country of the tribe of JUDAH (Josh. 15:48). Shamir was part of a district that included such towns as JATTIR and SOCOH, but its precise location is unknown. Although some think that its name is preserved in modern Khirbet es-Sumara (c. 12 mi. SW of HEBRON), the identification cannot be confirmed.

(2) A town in the Ephraimite hill country (see EPHRAIM, HILL COUNTRY OF), and the home and burial place of TOLA, one of the judges (Jdg. 10:1 – 2). The site is unidentified (there is little to commend the suggestion that Shamir may be connected with SAMARIA). Why Tola, who came from the tribe of ISSACHAR, was living in Ephraim is a matter of speculation.

A. C. SCHULTZ

Shamlai sham'l*i*. See SHALMAI.

Shamma sham'uh (שָׁמָא H9007, derivation uncertain). Son of Zophah and descendant of AHER (1 Chr. 7:37).

Shammah sham'uh (שַׁמָּה H9015 and שָׁמָא H9007 [only 2 Sam. 23:11], derivation uncertain [cf. *HALOT*, 4:1554]). (1) Son of Reuel and grandson of ESAU; a chief in EDOM (Gen. 36:13, 17; 1 Chr. 1:37).

(2) Third son of JESSE and older brother of DAVID. He was present when SAMUEL anointed David as future king of Israel (1 Sam. 16:9; cf. v. 13). He fought, with two older brothers, in the campaign against the PHILISTINES under SAUL and was with the Israelite forces in the Valley of ELAH when David killed GOLIATH (17:13, 19). Shammah apparently had two sons: the crafty JONADAB (2 Sam. 13:3, 32 [here he is called SHIMEAH]; 1 Chr. 2:13; 20:7 [SHIMEA]) and a warrior named JONATHAN (2 Sam. 21:21; here the *Ketib* has SHIMEI).

(3) A Harodite (see HAROD) who was one of David's mighty warriors (2 Sam. 23:25; called SHAMMOTH the Harorite in 1 Chr. 11:27). He is usually thought to be the same as SHAMHUTH the Izrahite (1 Chr. 27:8).

(4) Son of Agee the HARARITE (2 Sam. 23:11 – 12). This Shammah, regarded as one of David's three chief warriors (cf. v. 8), is said to have defended, successfully and alone, after the other troops had fled, "a field full of lentils" from a band of Philistines. (The parallel, 1 Chr. 11:12 – 14, appears to attribute this incident to ELEAZAR son of Dodo, but it is generally acknowledged that in this passage the reference to Shammah, with surrounding text, accidentally dropped out at some point in the textual transmission. See KD, *Samuel*, 494 – 95.) Shammah is apparently mentioned again in the list of the Thirty, but only as the father of the warrior Jonathan (2 Sam. 23:33, if the NIV's emendation is correct; however, see discussion of 1 Chr. 11:34 under S HAGEE). Some scholars also believe that this Shammah is the same as #3 above (with confusion of the descriptives Harodite and Hararite).

A. C. SCHULTZ

Shammai sham'*i* (שַׁמָּי H9025, derivation uncertain). (1) Son of Onam and descendant of JUDAH in the line of JERAHMEEL (1 Chr. 2:28).

(2) Son of Rekem and descendant of Judah in the line of Jerahmeel's brother, CALEB (1 Chr. 2:44 – 45). The statement that Shammai's "son" was MAON may indicate that Shammai was the

founder of the town by that name or that he was the ancestor of the people who settled there.

(3) Son of MERED (by BITHIA), included in the genealogy of Judah (1 Chr. 4:17).

(4) A Jewish scholar who lived at the end of the 1st cent. B.C. and the beginning of the 1st cent. A.D. See discussion under HILLEL.

<div align="right">S. BARABAS</div>

Shammoth sham'oth (שַׁמּוֹת *H9021,* derivation uncertain). A Harorite (see HAROD), listed among DAVID'S mighty warriors (1 Chr. 11:27); probably the same as SHAMMAH the Harodite (2 Sam. 23:25) and SHAMHUTH the Izrahite (1 Chr. 27:8).

Shammua sha-my*oo*'uh (שַׁמּוּעַ *H9018,* prob. "heard [by God]"). Also Shammuah (2 Sam. 5:14 some KJV editions). (1) Son of Zaccur and descendant of REUBEN; one of the twelve spies sent by MOSES to Canaan (Num. 13:4).

(2) Son of DAVID and BATHSHEBA, born after David moved from HEBRON to JERUSALEM (2 Sam. 5:14; 1 Chr. 14:4; called SHIMEA in 1 Chr. 3:5 MT).

(3) Son of Galal and descendant of the musician JEDUTHUN; one of the Levites who resettled in Jerusalem after the EXILE (Neh. 11:17; called SHEMAIAH in 1 Chr. 9:16).

(4) Head of the priestly family of BILGAH in the days of JOIAKIM the high priest (Neh. 12:18).

<div align="right">A. C. SCHULTZ</div>

Shammuah sha-my*oo*'uh. KJV (some editions) alternate form of SHAMMUA (2 Sam. 5:14).

Shamsherai sham'shuh-r*i* (שַׁמְשְׁרַי *H9091,* derivation uncertain). Son of Jehoram and descendant of BENJAMIN; he is listed among the heads of families who lived in Jerusalem (1 Chr. 8:26).

Shapham shay'fuhm (שָׁפָם *H9171,* derivation unknown). A Gadite leader in BASHAN (see GAD, TRIBE OF), listed as second in importance (1 Chr. 5:12). He lived "during the reigns of Jotham king of Judah and Jeroboam king of Israel" (v. 17).

Shaphan shay'fuhn (שָׁפָן *H9177,* "coney, rock badger"). (1) Son of Azaliah and royal secretary (see SCRIBE) under JOSIAH, king of Judah (2 Ki. 22:3 – 20; 2 Chr. 34:8 – 20). It was Shaphan to whom HILKIAH the high priest gave the Book of the Law, which was discovered when the TEMPLE was being repaired in 621 B.C. Shaphan read from this law to Josiah, who then sent him with Hilkiah the priest and others to confer with HULDAH the prophetess. As a result, the king's reform movement gained impetus. Shaphan was an important leader in those reforms, and this must have brought him into close contact with the prophet JEREMIAH and his work. Shaphan's family for two generations participated as lay leaders in the religious life of Judah and supported the work of Jeremiah.

His influence upon his sons is clear, for he was the father of AHIKAM, also an official in the court and involved in the discovery of the Book of the Law (2 Ki. 22:12; 2 Chr. 34:20). According to Jer. 26:24, Ahikam saved the prophet from being lynched at the hands of a mob during some disturbances in the reign of King Jehoiakim. Another son of Shaphan, ELASAH (Jer. 29:3), was one of two messengers who took a letter of the prophet (ch. 29) to the exiles in Babylonia. Another son, GEMARIAH, was the owner of the house where BARUCH the scribe read the prophecy of Jeremiah to the people and later made a futile effort to prevent King JEHOIAKIM from destroying the scroll (36:10,

25). GEDALIAH, the governor of Judea after the Babylonian captivity, was his grandson (39:14).

(2) Father of JAAZANIAH; the latter was one of seventy idolaters that EZEKIEL saw in the temple (Ezek. 8:11).

<div align="right">A. C. SCHULTZ</div>

Shaphat shay'fat (שָׁפָט *H9151,* prob. short form of שְׁפַטְיָהוּ *H9153,* "Yahweh has judged"; see SHEPHATIAH and cf. ELISHAPHAT). (1) Son of Hori and descendant of SIMEON; one of the twelve spies sent by MOSES to Canaan (Num. 13:5).

(2) Father of the prophet ELISHA (1 Ki. 19:16, 19; 2 Ki. 3:11; 6:31).

(3) Son of Shemaiah and postexilic descendant of DAVID through SOLOMON and ZERUBBABEL (1 Chr. 3:22). Some scholars believe he was the son of Shecaniah; see HATTUSH #1.

(4) A Gadite leader in BASHAN (1 Chr. 5:12; see GAD, TRIBE OF). Both the SEPTUAGINT and the TARGUM interpret the Hebrew *špṭ* as a common noun rather than a name. Some scholars, following the same approach and omitting the conjunction "and," translate the text, "Janai a judge in Bashan." G. N. Knoppers (*I Chronicles 1 – 9,* AB 12 [2004], 379) argues for the conjecture *haššōṭēr,* "Janai was the officer of Bashan."

(5) Son of Adlai; he was an official under King DAVID in charge of the herds in the valleys (1 Chr. 27:29).

(6) An ancestor of SOLOMON'S servants (1 Esd. 5:34; KJV, "Sabat").

<div align="right">A. C. SCHULTZ</div>

Shapher shay'fuhr. KJV form of SHEPHER.

Shaphir shay'fuhr (שָׁפִיר *H9160,* "beautiful, fair"). KJV Saphir. A geographic area, probably a town, against which Micah prophesied (Mic. 1:11). Past attempts at identification have been limited to looking for a site in PHILISTINE territory perhaps because of the association with GATH (v. 10). Tell es-Sawafir frequently has been suggested for several reasons, such as etymological similarity between the two names and suitability of location in Philistine territory some 4 mi. SE of ASHDOD. Others, pointing out that the context demands a Judean site, have suggested Khirbet el-Kom (el-Qom), c. 7 mi. W of HEBRON; this site is on Wadi es-Saffar, which possibly preserves the biblical name (cf. *IDB,* 4:308; but see *NEAEHL,* 4:1233). There is no solid evidence for either site, however, so the location of Shaphir remains unknown.

<div align="right">A. BOWLING</div>

Sharai shair'i (שָׁרַי *H9232,* perhaps "Yahweh has delivered" [cf. *HALOT,* 4:1654, proposal b]). One of the descendants of Binnui who agreed to put away their foreign wives (Ezra 10:40).

Sharaim shuh-ray'im. KJV alternate form of SHAARAIM.

Sharar shair'ahr (שָׁרָר *H9243,* possibly "firm, healthy"). A HARARITE who was the father of Ahiam, one of DAVID'S mighty warriors (2 Sam. 23:33; called SHACAR in the parallel, 1 Chr. 11:35).

Sharezer shuh-ree'zuhr (שַׂרְאֶצֶר *H8570,* possibly short form of Akk. *Nabu-šar-uṣṣur,* "may [the god] Nebo protect the king" [cf. NERGAL-SHAREZER]). (1) Son of SENNACHERIB; he and his brother,

Adrammelech, joined in murdering their father in the temple of NISROCH (2 Ki. 19:37; Isa. 37:38). See discussion under ADRAMMELECH. NO extrabiblical sources attest to the name Sharezer for one of Sennacherib's sons. Since the Greek historian Abydenus (quoted by EUSEBIUS in the *Armenian Chronicle*) refers to the two brothers as Adramelus and Nergilus, some have thought that the full name of the latter was Nergal-šar-uṣur (Nergal-Sharezer). It could equally well be a rendering of Šar-eṭir-aššur, the name of a known son of Sennacherib.

(2) An Israelite leader sent by the inhabitants of BETHEL to inquire concerning the propriety of keeping the anniversary feast which commemorated the destruction of Jerusalem (Zech. 7:2; KJV, "Sherezer"). The text is difficult, however, and some argue that it should be rendered, "Bethel-Sharezer and Regem-Melech and his men sent to entreat the favor of the LORD" (cf. NJPS); if so, the name may be equivalent to Bel-šar-uṣur (i.e., Belshazzar, "may Bel protect the king"). Another possible rendering is, "Bethel—that is, Sharezer and Regem-Melech and his men—sent…" (cf. T. E. McComiskey in *The Minor Prophets: An Exegetical and Expository Commentary,* ed. T. McComiskey [1992-98], 3:1124). See also REGEM-MELECH.

<div align="right">D. J. WISEMAN</div>

Sharon shair'uhn (שָׁרוֹן H9227, "flat land" or "wet land"; gentilic שָׁרוֹנִי H9228, "Sharonite"; Σαρών G4926). KJV NT Saron. (1) When used with the definite article *(haššārôn,* prob. meaning "the plain"), this term refers to the largest of the coastal plains of northern Palestine, extending from the Crocodile River in the N to the Valley of AIJALON and JOPPA in the S, a distance of about 50 mi., with a variable width of 9 – 10 mi. The relief is of Quaternary and Pleistocene origin, largely determined by ancient shorelines, sand-dune deposits, and the weathering of red sands that give a brilliant hue to much of its soil cover. The sand dunes, some of fossil character, tend to choke or divert the lower courses of the rivers, so that swampy conditions have tended to prevail in the past along the coast and valleys. The false bedded character of much of the surface geology and the encircling karstic nature of the hills to the interior explain the rich variety of aquifers and sources of subsurface water supply. See PALESTINE III.D.
The Sharon Plain.

Aerial view of the Sharon Plain, SW of Mount Carmel, looking E.

The red Quaternary sands that form a continuous belt for some 20 mi. in the N, in undulating relief that rises to 180 ft. above sea level, were thickly covered with OAKS (cf. Isa. 35:2). With deforestation in biblical times, there was extensive pasturage (Isa. 65:10). It was here that SHITRAI the Sharonite supervised the flocks of King DAVID (1 Chr. 27:29). The "splendor" of Sharon (Isa. 35:2) suggests the dense vegetation originally associated with the whole plain. Its rich soil, now utilized extensively under irrigation for citrus groves and other commercial farming, formerly yielded beautiful covers of wild flowers. The "rose of Sharon" (Cant. 2:1) has been identified with various bulbous plants; see discussion under ROSE.

In Canaanite times, the chief town of Sharon was DOR (Josh. 11:2; 12:23; 1 Ki. 4:11). It was at first one of the unconquered Canaanite cities within the border of MANASSEH, impregnable because of its strong fortifications and use of chariots of iron (Josh. 17:18; Jdg. 1:19 et al.). Later, in SOLOMON'S time, Dor was a fiscal district on the Carmel coast (see CARMEL, MOUNT). In Assyrian times, Dor was capital of an extended coastal province between Carmel and APHEK that reflected the strategic importance of the "way of the sea," the coast road between Egypt and Syria (Isa. 9:1). Later the district appears to have become subservient to an extended province of SAMARIA.

Joppa was also a walled town in Canaanite Sharon, fortified at least as early as the reign of Pharaoh THUTMOSE III (1490 – 1435 B.C.), who mentions it. At the division of the land it was allotted theoretically to the tribe of DAN (Josh. 19:46), but it did not come under Israelite control until David gained effective occupancy of the coast. Then HIRAM of TYRE floated his timber from the forests of LEBANON to the seaport of Joppa for the building of the temple at Jerusalem (2 Chr. 2:16); likewise at the rebuilding of the temple in the time of CYRUS, Joppa was the import center (Ezra 3:7).

In NT times the capital of the whole Roman province of JUDEA was built by AUGUSTUS at CAESAREA midway on the Sharon coast. Its port became a major Mediterranean harbor. The city was the Roman showpiece of its culture in the ANE. It figures prominently in the early contacts between the apostles and the Gentiles (Acts 10:1, 24; 11:11; 18:22; 21:8; 23:23 – 35; 25:13). See also LASHARON.

(2) Sharon was also the name of a pasture district E of the JORDAN (1 Chr. 5:16). It is referred to as among the possessions of GAD, along with GILEAD and BASHAN, but its precise location is unknown. Some think Sharon here may be a corruption of SIRION, the pasture lands of HERMON. Others believe it may be the "plateau" of Gilead between HESHBON and the ARNON Valley (Deut. 3:10). It is possible that the MOABITE STONE refers to this place (see *ANET,* 320).

J. M. HOUSTON

Sharonite shair'uh-n*i*t. See SHARON.

Sharuhen shuh-r*oo*'huhn (שָׁרוּחֶן *H9226,* from Egyp. *šʾ-ra-ḥu-na).* One of the cities within the territory of JUDAH that were allotted to the tribe of SIMEON (Josh. 19:6). A comparison of the Simeonite list (19:1 – 9) with the Judahite list (ch. 15) indicates that Sharuhen may be identical with SHILHIM (15:32; see also SHAARAIM). The city was located in the extreme SW corner of Canaan.

Sharuhen is mentioned in various Egyptian texts. It figured importantly in the successful attempts of the Egyptians to drive out the HYKSOS, although it resisted stoutly for three years before it fell. Its collapse marked the end of a century of Hyksos rule and the opening of the route to Asia, the prelude to the rise of the Egyptian empire and its extensive dominion of Syro-Palestine. The identification of Sharuhen is debated. Modern Tell el-Farʿah (c. 12 mi. SE of GAZA) has been a popular proposal in the past (still defended in *SacBr,* 75b), but many scholars prefer a site closer to the coast, such as Tell el-ʿAjjul (c. 4 mi. SW of Gaza). (See further details in *ABD,* 5:1163 – 65.)

T. E. MCCOMISKEY

Shashai shay'sh*i* (שָׁשַׁי *H9258,* derivation uncertain). One of the descendants of Binnui who agreed to put away their foreign wives (Ezra 10:40; 1 Esd. 9:34 [KJV, "Sesis"]).

Shashak shay'shak (שָׁשָׁק *H9265,* possibly an Egyp. name). Son of BERIAH (or of ELPAAL; cf. NRSV)

and descendant of BENJAMIN, listed among the heads of families living in Jerusalem (1 Chr. 8:14, 25; cf. v. 28). See also AHIO.

Shaul shawl (שָׁאוּל *H8620,* "one who has been begged for" [cf. SAUL]; gentilic שָׁאוּלִי *H8621,* "Shaulite"). (1) Son of Samlah; he was an early king of EDOM who lived in "Rehoboth on the river" (Gen. 36:37 – 38 [KJV, "Saul"]; 1 Chr. 1:48 – 49). See REHOBOTH #2.

    (2) Son of SIMEON (by a Canaanite woman), grandson of JACOB, and ancestor of the Shaulite clan (Gen. 46:10; Exod. 6:15; Num. 26:13; 1 Chr. 4:24).

    (3) Son of Uzziah, descendant of LEVI through KOHATH, and ancestor of SAMUEL (1 Chr. 6:24).

Shaveh shay'vuh (שָׁוֵה *H8753,* possibly "level [place]" or "wasteland" [see *HALOT,* 4:1438]). A plain or valley near SALEM (Gen. 14:17). See discussion under KING'S VALLEY.

Shaveh Kiriathaim shay'vuh-kihr-ee-uh-thay'im (שָׁוֵה קִרְיָתָיִם *H8754,* prob. "plain of the [twin] cities"). The place where KEDORLAOMER defeated the EMITES (Gen. 14:5). Apparently it was a plain in the environs of KIRIATHAIM, a city in TRANSJORDAN.

shaving. Probably most Israelites, like ABSALOM, generally allowed their hair to grow for a considerable time before cutting it (2 Sam. 14:26). A BEARD was regarded as a natural accompaniment of manhood. The ceremonial law forbade priests to shave their heads on account of mourning (Lev. 21:5) or to adopt long flowing hair for the same reason (Ezek. 44:20). A NAZIRITE was not allowed to shave his head until the time covered by his vow expired (Num. 6:5) unless because of accidental defilement (6:9). In regard to the vows of SAMSON and SAMUEL, lifelong consecration was intended (Jdg. 13:5; 1 Sam. 1:11).

Egyptian bronze razor from the New Kingdom period (mid-to-late 2nd millennium B.C.).

    The main biblical implications of shaving were the following: (1) *Cleansing.* JOSEPH, when summoned to PHARAOH'S presence, may have shaved his whole body to conform to Egyptian ideas of cleanliness (Gen. 41:14). The same concept appears in the ritual that marked the leper's recovery (Lev. 14:8 – 9) and the Levite's consecration to service (Num. 8:7), and it is indicated in Isaiah's figure (Isa. 7:20). (2) *Mourning.* Examples are found in Deut. 21:12; Job 1:20; and Jer. 7:29. (3) *Vows.* Shaving of the head followed the fulfillment of a VOW (Num. 6:18; Acts 18:18; 21:24); but for Samson to submit to hair-cutting was to renounce the divine purpose for his life (Jdg. 16:19). (4)

Contempt. This attitude was expressed by HANUN'S ungracious action (2 Sam. 10:4; 1 Chr. 19:4). (5) *Humiliation.* PAUL says to the Corinthians that "it is a disgrace for a woman to have her hair cut or shaved off" (1 Cor. 11:5 – 6).

W. J. CAMERON

Shavsha shav'shuh (שַׁוְשָׁא H8807, meaning uncertain, but possibly an Egyp. word). A royal secretary (see SCRIBE) in DAVID'S court (1 Chr. 18:16). The need for such an office reflects the development of governmental affairs both domestic and foreign. There are variations of this man's name: SHEVA (2 Sam. 20:25), SERAIAH (8:17), and SHISHA (1 Ki. 4:3). Many have thought that the spelling Shavsha is the original one. Others suggest that the man's true name was Seraiah and that the form Shisha (with its variants) reflects an Egyptian title (*šš š(t*, "the writer of the king's letters"; see *HALOT*, s.v. שַׁוְשָׁא, 4:1483). In SOLOMON'S reign, two of his sons occupied the same office (1 Ki. 4:3). Shavsha's own father is not named in the records, and this omission, together with the fact that the name Shavsha does not appear to be Hebrew, supports the idea that he was of foreign origin. It would be natural for such a man to be appointed to an office that handled foreign affairs and documents.

A. C. SCHULTZ

sheaf. A small quantity of GRAIN cut and gathered. The principal grains mentioned in the Bible are WHEAT and BARLEY: the former was grown on the lowland areas of PALESTINE and in the HAURAN region E of the Jordan, while the latter was the crop of the uplands. Both were harvested by the method which was standard in grain growing regions for centuries afterward, and can still be observed in the Middle E—the reaper with his sickle goes ahead, and cuts the grain; then it is gathered into bundles by workers (often women) who follow, and the bundles are tied, by using a few stalks, into sheaves. After the gatherers come the gleaners, who collect any loose stalks dropped in the REAPING. The best Bible description of the process occurs in the book of RUTH.

Such sheaves were used as a form of offering in the Levitical system of SACRIFICES (cf. Lev. 23:10 – 12). Probably they were sheaves of barley, the first crop to be harvested each year in Palestine. They represented the thank offering for the FIRST-FRUITS of the harvest.

J. H. PATERSON

Sheal shee'uhl (שְׁאָל H8627, often corrected to יִשְׁאָל, possibly "he has asked [*i.e.*, for a child]" [see *HALOT*, s.v. שְׁאוּל, 4:1370]). One of the descendants of Bani who agreed to put way their foreign wives in the time of EZRA (Ezra 10:29; 1 Esd. 9:30 [KJV, "Jasael"]).

Shealtiel shee-al'tee-uhl (שְׁאַלְתִּיאֵל H8630 and שַׁלְתִּיאֵל H9003 [Hag. 1:12, 14; 2:2], possibly "I have requested [a child] from God"; Σαλαθιήλ G4886). Also Salathiel (KJV in 1 Chr. 3:17, Apoc., and NT; NRSV in Matt. 1:12) and Salatiel (KJV in 1 Esd. 6:2). Eldest son of King JEHOIACHIN (Jeconiah) of Judah and father of ZERUBBABEL, the leader of the first group that returned from the Babylonian captivity (1 Chr. 3:17; Ezra 3:2 et al.; Neh. 12:1; Hag. 1:1 et al.). Included in the GENEALOGY OF JESUS CHRIST (Matt. 1:12; Lk. 3:27; on the latter passage, see NERI).

Sheariah shee'uh-ri'uh (שְׁעַרְיָה H9138, perhaps "Yahweh has acknowledged"). Son of Azel and descendant of BENJAMIN in the line of SAUL (1 Chr. 8:38; 9:44).

shearing house. See BETH EKED.

Shear-Jashub shee'uhr-jay'shuhb (שְׁאָר יָשׁוּב *H8639*, "a remnant will return"). Son of the prophet ISAIAH (Isa. 7:3; cf. 10:21 – 22). Shear-Jashub was present when Isaiah confronted King AHAZ, and his name is symbolical of the message the prophet delivered. Judgment in the form of the EXILE was an essential aspect of Isaiah's message, but there was also the promise of restoration for a purified REMNANT. The meeting took place c. 735 B.C., which means that Shear-Jashub must have been born near the start of the prophet's career; thus this doctrine of the remnant apparently was formed in the early period of Isaiah's ministry.

<div align="right">A. C. SCHULTZ</div>

Sheba shee'buh (שְׁבָא *H8644*, meaning uncertain; for ##5 – 7 below, שֶׁבַע *H8680* [2 Sam. 20:1 – 22; 1 Chr. 5:13; *H8681* in Josh. 19:2], "seven," possibly suggesting "completeness" [*HALOT*, 4:1400]). (1) Son of Raamah, descendant of CUSH, and brother of DEDAN (Gen. 10:7; 1 Chr. 1:9).

(2) Son of JOKTAN and descendant of SHEM (Gen. 10:28; 1 Chr. 1:22).

(3) Son of JOKSHAN, descendant of ABRAHAM and KETURAH, and brother of Dedan (Gen. 25:3; 1 Chr. 1:32).

Many have argued that two or all three of the above are the same person because (a) all three are associated with names connected with ARABIA, (b) the first and third have Dedan as a brother, and (c) the second and third are in the line of Shem. The fact that the first one is in the line of Cush and HAM may indicate the close relationship between the S Arabians and Africans (Hamites). It is widely thought that the name Sheba is primarily a geographical term, as follows.

(4) A country in S Arabia, now Yemen, the most mountainous and fertile part of Arabia. The biblical writers probably regarded the person Sheba (#3?) as the source of this country's name and the progenitor of its people, the SABEANS. This country gained wealth through control of the trade in perfumes and incense, which were important in the life and religion of the ancient world. Camel caravans from Sheba (Job 6:19) carried northward to the Mediterranean countries the gold, precious stones, and frankincense of S Arabia (Isa. 60:6; Jer. 6:20; Ezek. 27:22). The capital of Sheba was first Sirwaḥ and then Marib. At the latter are the remains of a great dam and of the temple of the moon-god, Ilumquh. In the thousands of Sabean inscriptions are the names of many of their priest rulers.

In the 10th cent. B.C. the QUEEN OF SHEBA visited SOLOMON (1 Ki. 10:1 – 13; 2 Chr. 9:1 – 12). Her camel caravan brought typical products of Sheba: gold, precious stones, and spices, which she exchanged with Solomon. The country also played a role in Israel's expectations for the future. It was hoped that Sheba would give gifts to the king of Israel (Ps. 72:10, 15) and praise to the God of Israel (Isa. 60:6).

(5) A town within the tribal territory of SIMEON (Josh. 19:2). Sheba is missing in the parallel list (1 Chr. 4:28); moreover, if it is included in Joshua, the total comes to fourteen towns instead of thirteen (as stated in Josh. 19:6). Thus the NIV and other versions translate "or Sheba," indicating that this is an alternate name for BEERSHEBA. A few have thought that Sheba and Beersheba were parts of the same city. Still others emend Sheba to Shema (on the basis of the similar list in Josh. 15:26; the LXX at 19:2 [Codex B], as well as at 1 Chr. 4:28, reads *Samaa* or *Sama*). See SHEMA (PLACE).

(6) Son of BICRI; he is known for having revolted against DAVID (2 Sam. 20:1 – 22). Sheba's revolt appealed to followers of SAUL'S family, since he was from the tribe of BENJAMIN and perhaps

a relative of Saul. Also he appealed to all northern Israelites with his rallying cry, "We have no share in David, / no part in Jesse's son! / Every man to his tents, O Israel!" (20:1), a cry that was repeated later in Jeroboam's rebellion (1 Ki. 12:16). Joab and the royal bodyguard pursued Sheba until he took refuge in Abel Beth Maacah in the northernmost part of Israel. Joab besieged the city until the inhabitants decapitated Sheba and threw his head over the city wall to Joab.

(7) Son of Abihail; he was one of seven relatives from the Gadites who occupied the region E of Gilead (1 Chr. 5:13; cf. vv. 10, 14). See Gad, tribe of.

J. Alexander Thompson

Shebah shee'buh. KJV form of Shibah.

Shebam shee'bam. KJV alternate form of Sibmah.

Shebaniah sheb'uh-n*i*'uh (שְׁבַנְיָהוּ H8677 [only 1 Chr. 15:24] and שְׁבַנְיָה H8676, perhaps "Yahweh has drawn near" [*HALOT*, 4:1396]; for other options, see J. D. Fowler, *Theophoric Personal Names in Ancient Hebrew* [1988], 130 – 31). (1) One of the priests appointed to blow the trumpet when David transferred the ark of the covenant to Jerusalem (1 Chr. 15:24).

(2) One of the postexilic Levites who led worship when the Feast of Tabernacles was celebrated (Neh. 9:4 – 5). He is probably the same as either #4 or #5 below.

(3) A priest who signed the covenant with Nehemiah (Neh. 10:4). In the days of the high priest Joiakim, the head of Shebaniah's family was a man named Joseph (12:14 KJV and most versions, following MT); here the NIV, following some Heb. MSS and ancient versions, has Shecaniah (which harmonizes with v. 3), but it should be noted that in all the passages in Nehemiah where the MT has Shebaniah various witnesses read Shecaniah (the Heb. consonants ב and כ are easily confused).

(4 – 5) Two Levites who signed the covenant with Nehemiah (Neh. 10:10, 12). One of them should probably be identified with #2 above.

Shebarim sheb'uh-rim (שְׁבָרִים H8696, prob. pl. of שֶׁבֶר H8691, "fracture, crushing"). A place cited in connection with the retreat of the Israelites from Ai (Josh. 7:5 KJV and other versions). It evidently lay somewhere between Ai and Jericho, but the location is unknown. Some ancient versions understood *šĕbārîm* not as a name but as a common term, indicating that the men of Ai pursued the Israelites "until they broke [*i.e.,* vanquished] them" (cf. NAB, "until they broke ranks"). Similarly, modern scholars have suggested such renderings as "to the broken city walls" (cf. Z. Zevit in *BASOR* 251 [Summer 1983]: 31) and "as far as the stone quarries" (NIV). (For additional details and suggestions, see *ABD*, 5:1171 – 72.)

T. E. McComiskey

Shebat shee'bat (שְׁבָט H8658, from Akk. *šabāṭu*). The eleventh month in the Hebrew calendar, corresponding to January-February (Zech. 1:7 [KJV, "Sebat"]; 1 Macc. 16:14 [KJV, "Sabat"]).

Sheber shee'buhr (שֶׁבֶר H8693, meaning uncertain [for possibilities, see *HALOT*, 4:1406]). Son of Caleb (by his concubine Maacah), included in the genealogy of Judah (1 Chr. 2:48).

Shebna, Shebnah sheb'nuh (שֶׁבְנָה *H8675*, also שֶׁבְנָא *H8674* [2 Ki. 18:26, 37], possibly short form of שֶׁבַנְיָהוּ *H8677* [see SHEBANIAH]). In one passage (Isa. 22:15) Shebna is described as a "steward" (*sōkēn H6125*) and as being "in charge of the palace" (ʿal-habbāyit), evidently a very high and influential position that may have included authority over the standing army. Elsewhere, however, ELIAKIM son of Hilkiah is said to be the palace administrator, while Shebna appears as royal secretary (see SCRIBE); the two of them were part of the delegation sent by King HEZEKIAH to meet the emissaries of SENNACHERIB (2 Ki. 18:18, 26, 37; 19:2 = Isa. 36:3, 11, 22; 37:2). It appears that Shebna was demoted from his high position and that Eliakim replaced him. Given his unusual name, as well as the fact that his father's name is not mentioned, it is possible that Shebna was a foreigner.

The first passage as a whole (Isa. 22:15 – 25) is a denunciation of Shebna and the only instance in Isaiah of an oracle against a named individual. The specific charge against Shebna reveals his pretensions. He had taken it upon himself to have a grave chiseled in a high rock (something normally reserved for the nobility). Isaiah indicated that Shebna's tomb would not be used for the purpose intended, since he would be cast out of office (v. 19), replaced by Eliakim (vv. 20 – 21), and die in exile (v. 18). A further allusion to his vanity is in the reference to his splendid chariots (v. 18). Some critical scholars have alleged that vv. 19 – 23 are a later modification in the light of events, changing a prophecy of violent removal and death (vv. 17 – 18) into one of demotion only. Since nothing is known of Shebna subsequent to Sennacherib's invasion, the precise mode of fulfillment of the prophetic oracle is uncertain. (According to some interpreters, the Shebna of this passage is not the same person as the royal secretary, but it is most improbable that there were two officials of the same name, both without any "pedigree," holding one or other of the two most responsible state offices, in the same general period. On these matters, as well as the unlikely proposal that Shebna's grave has been discovered, see H. Wildberger, *Isaiah 13 – 27: A Continental Commentary* [1997], 384, 386.)

In 701 B.C. Sennacherib, having reduced most of the cities of Judah and having accepted an indemnity from Hezekiah for the latter's rebellion (2 Ki. 18:13 – 16), returned again to besiege Jerusalem. There must be some explanation for this unusual action, following Hezekiah's earlier submission. Possibly the danger of a major encounter with the main Egyptian army made the Assyrian king wary of leaving a humiliated but still powerful Jerusalem in his rear. Shebna appeared as one of three ambassadors who represented Hezekiah before the emissaries of Sennacherib (2 Ki. 18:18 = Isa. 36:3). Their request to the RABSHAKEH to conduct the negotiations in a language which the inhabitants of Jerusalem would not understand was rejected (2 Ki. 18:26 – 27 = Isa. 36:11 – 12). The arrogant, blasphemous words of the Assyrian, backed by the tangible evidence of military might, were reported to Hezekiah by Shebna and his companions, accompanied by appropriate signs of mourning (2 Ki. 18:37 = Isa. 36:22).

Then Eliakim and Shebna, as the two senior officials, and the leading priests were sent to the prophet Isaiah (2 Ki. 19:2 = Isa. 37:2), who had consistently opposed Hezekiah's anti-Assyrian, pro-Egyptian policies (e.g., Isa. 20; 30; 31) as inconsistent with a policy of dependence upon Yahweh alone (cf. Isa. 7:1 – 9). It may be that Isaiah's apparent antagonism toward Shebna is accounted for, in measure, by the leading part which the latter would have played in the national policy. Isaiah's oracle (37:22 – 29) reveals that the devastation wrought in the land by the Assyrians was determined by the Lord (v. 26), presumably as his chastisement for the false foreign policies of his people. He also promised that the arrogant Assyria would be forced out of the land like an unwilling beast (v. 29). (See further H. H. Rowley, *Men of God: Studies in Old Testament History and Prophecy* [1963], 98 – 132.)

Shebuel shi-by*oo*'uhl. See SHUBAEL.

Shecaniah shek'uh-n*i*"uh (שְׁכַנְיָהוּ H8909 [only 2 Chr. 24:11; 31:15] and שְׁכַנְיָה H8908, "Yahweh dwells [*or* has taken up residence]"). TNIV Shekaniah. (1) Postexilic descendant of DAVID in the line of ZERUBBABEL (1 Chr. 3:21 – 22). The NRSV and other versions, following the SEPTUAGINT, understand Shecaniah to be the son of Obadiah (see REPHAIAH). This Shecaniah is to be identified with the father (or ancestor) of HATTUSH (Ezra 8:3) and of SHEMAIAH (Neh. 3:29).

(2) A descendant of AARON whose family in the time of DAVID made up the tenth division of priests (1 Chr. 24:11).

(3) A Levite who faithfully assisted KORE in distributing the contributions made to the temple during the reign of HEZEKIAH (2 Chr. 31:15).

(4) Son of Jahaziel; he and 300 members of his family returned with EZRA from Babylonia to Jerusalem in the reign of ARTAXERXES (Ezra 8:5; according to 1 Esd. 8:32 [KJV, "Sechenias"], the family descended from ZATTU, and this reading is adopted in Ezra 8:5 by the NIV and other versions).

(5) Son of Jehiel and descendant of Elam (Ezra 10:2). He acted as spokesman for the large congregation whose conscience on the subject of mixed marriages had been stirred by Ezra. Shecaniah confessed the national sin, expressed the nation's hope, suggested that a covenant be made before the Lord to eliminate the evil of intermarriage, and encouraged Ezra to take the lead in this reform. Since his name does not appear in the list of 10:18 – 44, it is possible that he was not personally guilty.

(6) Son of Arah and father-in-law of TOBIAH the Ammonite, NEHEMIAH'S sworn adversary (Neh. 6:18).

(7) One of the priests and Levites who returned from exile with ZERUBBABEL (Neh. 12:3). Later, in the days of the high priest JOIAKIM, a certain Joseph was the head of his family (v. 14 NIV, following some ancient witnesses; see SHEBANIAH #3).

<div align="right">A. E. CUNDALL</div>

Shechem (person) shek'uhm (שֶׁכֶם H8902 and שֶׁכֶם H8903 [Num. 26:31; Josh. 17:2; 1 Chr. 7:19], probably from the corresponding place name meaning "shoulder, ridge"; gentilic שִׁכְמִי H8904, "Shechemite"). (1) Son of HAMOR the HIVITE; Shechem raped DINAH, the daughter of JACOB, and was killed by SIMEON and LEVI (Gen. 34:2 – 26; Josh. 24:32; Jdg. 9:28). See further SHECHEM (PLACE).

(2) Son of GILEAD, great-grandson of MANASSEH, and eponymous ancestor of the Shechemite clan (Num. 26:31). Elsewhere, however, "the sons of Shechem" (Josh. 17:2 Heb.) are listed with other Manassite clans as receiving an inheritance W of the Jordan, in distinction from the Gileadites, who were granted territory in TRANSJORDAN. See also #3 below.

(3) Son of SHEMIDA and descendant of Manasseh (1 Chr. 7:19). Some argue that this Shechem is really Shemida's brother (cf. Num. 26:31 – 32) and therefore the same as #2 above.

Shechem (place) shek'uhm (שְׁכֶם H8901, "shoulder, ridge"; Συχέμ G5374). KJV also Sichem (Gen. 12:6; Sir. 50:26) and Sychem (Acts 7:16). An ancient Canaanite town in the hill country of Ephraim (Josh. 20:7; see EPHRAIM, HILL COUNTRY OF) in the neighborhood of Mount GERIZIM (Jdg. 9:7), being about 30 mi. N of JERUSALEM, just E of modern Nablus. It became an important Israelite political and

religious center. The site is known today as Tell Balaṭah.

I. The name. It was once thought that the name derived from Shechem the son of Hamor (Gen. 33:18-19); see SHECHEM (PERSON) #1. It now seems more probable that the name referred to the geographical setting of the city, which is more or less on the "shoulder" or slope of Mount Gerizim. The name occurs in Egyptian texts dating from the 19th to the 17th centuries B.C. and in the TELL EL-AMARNA letters (see *ANET*, 230, 329, 477, 485-87, 489-90). It appears as Sakmemi, Sakmami, and Sekmem. The name also occurs in one of the early 8th-cent.-B.C. OSTRACA from SAMARIA.

Shechem's importance is closely linked to its position on the central Ridge Road in Palestine.

II. Excavations. Early archaeological expeditions were conducted at the site of Tell Balaṭah by Carl Watzinger from 1907 to 1909 and by Ernst Sellin and others between 1913 and 1934. In 1956 further excavations were begun by the Drew-McCormick Expedition in collaboration with the American School of Oriental Research, under the direction of G. E. Wright. The excavations, which continued until 1973, have uncovered the history of the site from the beginning of the 4th millennium B.C. down to c. 107 B.C., when the city evidently met its end.

The first signs of occupation were Chalcolithic campsites (c. 4000 B.C.) discovered immediately above bedrock in the lowest strata. Some pottery fragments were found for the following period, though it appears that the site was not actually occupied again till c. 1800. The city then quickly reached the height of its prosperity under the HYKSOS (1700-1550).

From the beginning of the Hyksos period, the story of the city is one of building and rebuilding. A massive wall was built around the city and a large palace built within it. In c. 1650 the palace area was covered over and the great temple of Shechem was erected in its place. Egyptian military expeditions may have destroyed the temple about a century later, after which it was rebuilt on a smaller scale. Recently, however, L. E. Stager (in *BAR* 29/4 [July-Aug. 2003]: 26 – 35, 66 – 69) has argued that the original structure was still standing when the Israelites invaded the land and that it may be the "tower of Shechem" mentioned in Jdg. 9:46 – 49. In any case, the destruction of the city by ABIMELECH (v. 45) is evident in the archaeological record. The site was then utilized for storage pits until the days of the monarchy, when a granary was built there. The city appears to have been

reasonably prosperous again during the 9th and 8th centuries, though it could not compare with the status it had assumed under the Hyksos. There is ample evidence in the masses of brick and burned debris for the destruction of the city by the Assyrians when they invaded in 724-721.

For four centuries following this, the city reverted to village status until the SAMARITAN period. Around the year 325 B.C. the palace was again rebuilt and enjoyed some prosperity. There is a continuous coin record for this period of the town's existence. The abrupt end to this numismatic evidence suggests that the town may have been finally destroyed by John Hyrcanus (see HAS-MONEAN II.A) along with the city of Samaria in c. 107 B.C.
Excavation remains of ancient Shechem (Tell Balaṭah) with Mount Gerizim in the background.

III. Physical features. Ancient Shechem lay in the pass that runs between Mount Ebal on the N and Mount Gerizim on the S. Part of the ancient road connecting the E bank of the JORDAN with the Mediterranean coast ran through this valley and connected with a N-S route associated with "the soothsayers' tree" (Jdg. 9:37; see DIVINERS' OAK). The city enjoyed a good water supply and a fertile plain directly to the E. Shechem did not have the advantage of elevated terrain, thus necessitating its massive fortifications. Nevertheless, its location did mean control of some of the main roads through the mountainous regions of N Canaan, a feature of considerable military importance.

IV. Shechem in the Bible. Shechem first enters the biblical narrative in Gen. 12:6 – 7, when Abram (ABRAHAM) left HARAN and journeyed to Canaan with his family and possessions. Abram's first stopping place was the oak of MOREH near, or at, Shechem. The Canaanites were still in the land, but Yahweh appeared to Abram and renewed his covenant promise. Abram built an altar there.

In later years JACOB camped before the city of Shechem on his return from PADDAN ARAM. Here he bought a parcel of land from the sons of HAMOR, the HIVITE prince of the area, and built an altar to EL ELOHE ISRAEL ("God, the God of Israel," Gen. 33:18 – 19). Later, Shechem, Hamor's son, defiled Jacob's daughter DINAH, and this resulted in a formal agreement between the Shechemites and Israel to permit intermarriage between the two peoples. SIMEON and LEVI, however, took revenge, killing Hamor and Shechem and all the males, plundering the city, and taking captive all the women and children with their possessions (ch. 34).

It was near Shechem that Jacob hid the foreign gods of his family under the oak (Gen. 35:4). Interestingly, Jacob's sons later pastured their flocks near Shechem, where Joseph went to find them (37:12 – 13). It seems that Jacob wished to be friendly with the Shechemites (34:30; 49:5 – 7), and it appears that the pillaging of the town mentioned above did not permanently mar relations between the two peoples. Indeed, the body of JOSEPH, brought up from Egypt, is recorded to have been buried at Shechem (Josh. 24:32; cf. Acts 7:16).

According to the Amarna letters referred to above, Shechem fell to the HABIRU in the 15th cent. B.C. After the Israelite conquests in the land, JOSHUA called an assembly of the people at Shechem. Upon rehearsing the history of the people of Israel from their origin beyond the EUPHRATES to the conquest, Joshua summoned the people to unreserved service of Yahweh (Josh. 24). There he gave statutes and ordinances for Israel, and these were included in the Book of the Law of God. A great stone was set up under the oak in the sanctuary of Yahweh to serve as a witness to Israel's COVENANT with her God.

The fact that assemblies of the people were held at Shechem has suggested to many scholars that Shechem rather than SHILOH was the center of an amphictyonic league (see AMPHICTYONY). It has also been argued that Shechem served as the military and political center while Shiloh was the religious center. Both cities seem to have served as political and religious headquarters in some way or other, and it is impossible to determine the exact relationship between them.

Little is said of the town from Joshua until the time of Abimelech, GIDEON'S son, except that the boundary between EPHRAIM and MANASSEH passed near it (Josh. 17:7), and that it served as one of the cities of refuge (20:7; 21:21) and was assigned to the descendants of KOHATH as a Levitical city (1 Chr. 6:66, 67). The mother of Abimelech was a Shechemite woman (Jdg. 8:31). On the death of Gideon, Abimelech went to Shechem and through his mother's family persuaded the Shechemites to make him king. Worthless men from BAAL BERITH, a Canaanite sanctuary that still existed in Shechem, were hired to help slay the seventy other sons of Gideon who would have had claim to the throne. It was there that the only other surviving son, JOTHAM, gave his famous parable which effected a curse upon Shechem. Abimelech ruled over Israel for three years, but he quickly lost favor with the people of Shechem. They warred against him but he finally took the city, destroying it and sowing it with salt. The house of EL-BERITH was also destroyed with its occupants, who had sought refuge from the destruction of the city (Jdg. 9).

Nothing is said of Shechem during the united kingdom period. It was at Shechem, however, that the northern tribes rejected REHOBOAM and made JEROBOAM their king, thus creating the divided monarchy (1 Ki. 12:1 – 19 = 2 Chr. 10:1 – 19). Shechem then became, for a time at least, Jeroboam's capital in the N and he began to rebuild it (1 Ki. 12:25). Within a short time, however, he moved the capital to PENUEL (PLACE) and then to TIRZAH, possibly in an effort to make the capital less vulnerable to Judean attack.

There is evidence that Shechem continued to exist with some degree of importance during the times of HOSEA and JEREMIAH (see Hos. 6:9; Jer. 41:5), though little is known of it in this period. Nothing is said, for example, of the fate of the town under Assyrian and Babylonian invasions. The OT itself gives no information concerning Shechem during the postexilic period. From other sources, however, we know that Shechem became the leading city of the SAMARITANS and was taken by John Hyrcanus (Jos. *Ant.* 11.8.6; 13.9.1). After the war of A.D. 70, the town was refounded and named Flavia Neapolis in honor of Flavius Vespasianus. The modern Nablus, W of Tell Balaṭah, derives its name from this rebuilt city. A small community of Samaritans has continued to live in the area in modern times.

(See further W. J. Harrelson, *The City of Shechem: Its History and Importance* [thesis, Union Theological Seminary, NY, 1953]; E. Nielsen, *Shechem: A Traditio-Historical Investigation* [1955]; G. E. Wright, *Shechem: The Biography of a Biblical City* [1965]; Dan P. Cole, *Shechem I: The Middle Bronze IIB Pottery* [1984]; E. F. <div align="right">H. G. ANDERSEN</div>

Shechinah shuh-k*i'*nuh. See SHEKINAH.

Shedeur shed'ee-uhr (שְׁדֵיאוּר *H8725*, prob. "SHADDAI is light"). Father of ELIZUR; the latter was a leader of the tribe of REUBEN at the time of MOSES (Num. 1:5; 2:10; 7:30, 35; 10:18).

sheep. The primary biblical words for "sheep" are Hebrew ṣō*'*n *H7366* (which often has the collective sense of "flock") and Greek *probaton G4585*. The common Hebrew word for "ram" (male sheep) is *'ayil H380*. There are, in addition, other Hebrew terms that may be rendered "sheep" in specific contexts (e.g., the more general term *śeh H8445*, Exod. 22:9 et al.). See also GOAT; LAMB; MOUNTAIN SHEEP.

I. Origin and early history. This topic is complex; many views have been published about possible wild ancestors and their period and place of origin. F. E. Zeuner's work (*A History of Domesticated Animals* [1963], ch. 7) is most complete and unlikely to be superseded unless some radically new material or method is found. The following paragraph owes much to his research, which includes a full review of the literature. (For a more recent study, see J. Clutton Brock, *A Natural History of Domesticated Mammals*, 2nd ed. [1999].)

Although several wild sheep have contributed to the stock, two species are the main ancestors. Urial (*Ovis orientalis*) is the more important; it is a central and western Asiatic species, living mostly in mountains, from W Tibet to Transcaspia. The adult sheep stands nearly 3 ft. at the shoulder, with strongly wrinkled horns curled in typical "Ammon" shape at the sides of the head; it is reddish in summer, with whitish underparts, and grayish brown in winter. The other is the mouflon, now found only in Corsica, Sardinia, and Asia Minor: it is the smallest wild sheep and is dark-reddish brown. In winter the adult rams have white or cream side patches. The Belt Cave in N Iran supplies the earliest known evidence of domesticated sheep, and this is near Urial country. By the Neolithic pottery age (c. 5000 B.C.) sheep were being herded, probably by dogs, and breeding under some control had started. They then spread rapidly, meeting with other groups domesticated independently, and finally few breeds could be regarded as purely from one source.

II. Characteristics of domestic sheep. Most breeds now differ widely from their wild forebears, and these differences began appearing early. The most obvious are the following:

(a) *Wool.* This is present in wild sheep but is most obvious only in winter, when it may cover the stiffer hairs. The felting and weaving properties of wool were soon recognized, and strains were bred to yield good wool in large amounts. Hair sheep are still found, especially in the tropics. See WOOL.

(b) *Tail.* Some breeds have tails with two or three times as many vertebrae as wild forms. In

others the tail has become an organ for storing fat; this has been found with mummies of the twelfth dynasty (c. 2000 B.C.).

(c) *Color.* Westerners are so used to seeing white sheep that any other color seems odd. Early sheep were probably brown, but in Egypt there were white, brown, and black forms before 2000 B.C., perhaps much earlier. It is traditional to regard biblical sheep as white (cf. Isa. 1:18). While this is largely correct, Gen. 30:32 – 43 indicates that both sheep and goats were in various colors, presumably including white, but "spotted" is shown also to mean white spots on dark animals. It is also assumed that the sacrificial animals had to be white because of the requirement "without spot" (KJV in Num. 28:3, 9; 29:17, 26), but the Hebrew term (*tāmîm H9459*) refers to imperfections generally, not necessarily to color markings.

(d) *Habitat.* From a mountain origin the sheep developed into many breeds in a wide range of country from marsh to uplands and the desert edge. It became more demanding than the goat, needing better quality forage, largely grass (cf. 1 Chr. 4:39 – 40, "pasture for their flocks…rich, good pasture"). The erratic winter rains in parts of Palestine made the grass grow in patches, and shepherds, knowing where to find pasture, led their flocks there. It was from such an experience that DAVID wrote, "He makes me lie down in green pastures" (Ps. 23:2).

III. Uses. It is generally agreed that sheep were domesticated at first for their meat (see FOOD). Meat of the sheep, in contrast to that of the goat, is good from adult as well as young. Like CATTLE and goats, sheep are cloven-hoofed ruminants and therefore provide clean meat (Lev. 11:3), which became an important part of the Hebrew diet, as it still is in many Arab lands.

WEAVING had first begun with plant fibers; possibly also WOOL shed by wild animals had been used. With selective breeding, both quality and quantity of wool improved, and finally there was great trade in it. Part of the annual tribute paid by MESHA king of MOAB was the wool of 100,000 rams (2 Ki. 3:4). In some communities sheep were highly regarded for their milk, but there is only one clear biblical reference to this (Deut. 32:14). A modern breed (Awassi) derived from races long native to Palestine is now used there widely for milk and cheese production.

The use of SKINS was general long before domestication and thereafter increased greatly. "The priest who offers a burnt offering for anyone may keep its hide for himself" (Lev. 7:8); this was either sheep or goat. Persecuted refugees "went about in sheepskins and goatskins" (Heb. 11:37). See SHEEPSKIN. In addition, many peoples recognized the value of sheep for manuring pastures. In Egypt they were used for treading in seed as early as c. 2500 B.C. The wealth of Hebrew names indicates the importance of sheep to the Israelites, who were able shepherds and probably had several distinct breeds.

Genesis 30:32 – 43 is interesting in describing a false theory still widely believed—that things eaten or seen by the mother before or at birth can affect the color, shape, etc. of the young. JACOB put a striped white pattern in front of the lambing ewes in order to increase the proportion of marked animals. The text (vv. 41 – 42) indicates that he selected for vigor; the inference is that he unconsciously understood the flock genetics and mated accordingly, while wrongly attributing his success to his cleverness with the rods. However, it was God's providence in the breeding that brought success (cf. 31:11 – 12).

The sheep became preeminent in SACRIFICES, and very large numbers were used every year. Certain classes were wholly burnt, but in others most of the meat was used by offerer or priest. Some Hebrew names are seldom used except in this connection.

Above all, the sheep has deep metaphorical significance, especially in Ps. 23:1 – 4 and Isa. 53:6

("We all like sheep have gone astray"). Significant occurrences in the NT include Jn. 1:29 ("Look, the Lamb of God, who takes away the sin of the world") and 10:14 ("I am the good shepherd"). Of seventy-four mentions in N T, only one is literal (sheep sold in the temple court, 2:14).

G. S. CANSDALE

sheepcote, sheepfold. An enclosure that served for the protection of sheep from the hazards of weather, robbers, and wild beasts. Located near the home of one of the owners or on the hills where the sheep grazed, it was roofless, walled by stone, and had only one door. It usually housed several flocks, each of which retained its own identity since each shepherd knew his sheep by name and was on intimate terms with them (Jn. 10:3 – 5).

J. H. BRATT **Sheep Gate.** The easternmost entrance into the N side of the ancient city of JERUSALEM (Neh. 12:39; Jn. 5:2). The Sheep Gate marked the terminus in the circuit of the walls, as rebuilt in 444 B.C. and as recorded by NEHEMIAH (Neh. 3:1, 32). Almost five centuries later Christ healed the man who had been lame for thirty-eight years at the neighboring pool of BETHESDA (or Beth-zatha, Jn. 5:2 – 9). This in turn confirms the location of the Sheep Gate. Pilgrim reports of the 4th Christian cent., the mosaic map from MEDEBA (5th cent.), and modern excavation of the large double pools by the Church of St. Anne unite to confirm the NE location of Bethesda and hence of the gate.

Sheepfold located in the hills near Nazareth.

J. B. PAYNE

sheepskin. A simple garment made from the tanned pelt of sheep. It may well be that the sheepskin, still an ordinary article of dress in the E, was the initial covering of ADAM and EVE in the Garden of EDEN (Gen. 3:21). It was the common dress of the prophets of Israel, and this "hairy mantle" (Zech. 13:4 NRSV) was one of their distinctive marks. The Lord warned his followers against impostors who borrowed this dress when he said: "Watch out for false prophets. They come to you in sheep's clothing" (Matt. 7:15). The material was also used as covering for the TABERNACLE (Num. 4:25). See SKIN.

J. H. BRATT

Sheerah shee'uh-ruh (שְׁאֵרָה *H8641*, perhaps "relative, descendant"). KJV Sherah. Daughter of EPHRAIM (according to some, of BERIAH); she is credited with having built Lower and Upper BETH HORON as well as an otherwise unknown town called UZZEN SHEERAH (1 Chr. 7:24). No other woman in the Bible is said to have founded a town.

Shehariah shee'huh-ri'uh (שְׁחַרְיָה *H8843*, possibly "Yahweh is dawning" [cf. Isa. 60:2 and see SHAHAR]). Son of Jehoram and descendant of BENJAMIN; he is listed among the heads of families who lived in Jerusalem (1 Chr. 8:26).

Shekaniah shek'uh-ni'uh. TNIV form of SHECANIAH.

shekel. See WEIGHTS AND MEASURES IV.C.

Shekinah shuh-ki'nuh (שְׁכִינָה [from שָׁכַן *H8905,* "to dwell"], "dwelling, residence"; in Aram. the word appears also in the form שְׁכִינְתָּא). A postbiblical term applied especially to the divine presence.

I. Origin of the term. The word *Shekinah* arose among the Palestinian and Babylonian Jews, being based upon the OT doctrine of the divine presence in the world, which emphasized God's immanence and activity in the world order, and in contradiction to the Alexandrian teaching that God was supramundane in his being. The term was useful to the rabbis in that it afforded a reverent means of bringing the God who was "completely other" into contrast with the material universe, and especially into a visible or tangible relationship to his people Israel. No doubt the particular focus of the word upon "dwelling" grew out of the OT teaching that God chose to dwell among his people and put his name in a special place in the earth (Deut. 12:5 – 7). It was an interpretive effort to bridge the gap between HEAVEN as the place of God's eternal residence and the earth as the place of his real activity, especially his involvement in Israel's history.

The TARGUMS used the expressions "the Shekinah of God/Yahweh," "the glory of God," and "the word *[mêmrā]* of God" as near synonyms; indeed, the terms became designations of God himself. For instance, the complaint of the Israelites, "Is the LORD among us or not" (Exod. 17:7) is translated by *Targum Onkelos,* "Is the Shekinah of the LORD among us or not?" (for similar circumlocutions, see the targumic renderings in Gen. 9:27; Exod. 25:8; 29:45; Num. 5:3; 6:25; 9:20; 14:14; 16:3; 35:34; Deut. 1:42; 32:40; Pss. 16:8; 44:10; 74:2; Hag. 1:8). Especially interesting is Lev. 26:11 – 12, which according to the Hebrew reads, "I will put my dwelling place *[miškān H5438]* among you, and I will not abhor you. I will walk among you and be your God, and you will be my people." *Targum Pseudo-Jonathan* paraphrases as follows: "I will set the Shekinah of my glory among you, and my word will not abhor you. The glory of my Shekinah will dwell among you, and my word will be for you as God redeemer, and you will be for my name as a holy people." In spite of such usage, however, it is abundantly clear that the Targums regarded the Shekinah as God himself and not as a mediator who stood between God and Israel. The term became a means of referring to God in less direct fashion (see esp. Exod. 33:14 – 16; 34:6, 9).

Many OT ideas fed the growth of the Shekinah concept. The ARK OF THE COVENANT was the place of God's habitation among his people in the early days (Num. 10:35 – 36). When the ark was captured by the PHILISTINES, it became their personal enemy so that they said, "Send the ark of the God of Israel away; let it return to its own place, or it will kill us and our people" (1 Sam. 5:11). The PILLAR OF FIRE AND CLOUD that guided Israel in the wilderness was understood to be a testimony of the

divine presence. As the TABERNACLE and subsequent sanctuaries became the center of worship, so it was there that the Shekinah was found. Finally the TEMPLE in Jerusalem became the special sanctuary, and there the Shekinah was truly at home. The opinion of many scholars has been that the Babylonian idea of the enthronement of a deity in an innermost or secret sanctuary of a temple, where he remained if pleased with the worship of the people but from which he departed if angered, was the source of this trait assigned to the Shekinah.

II. Rabbinic use. The MISHNAH contains very few references to the Shekinah (only *m. Sanh.* 6:5 [omitted in some MSS]; *m.)Abot* 3:2, 6), but in the TALMUD and the Midrashim (see MIDRASH) there was a much wider application of the teaching to the Scriptures. The presence of God in the world is described as being as pervasive as light (*Num. Rab.* 21:16). As the sun in the heavens reaches everywhere with its light, so God is inescapable in his world. The earth is said to shine with the glory of God, and thus to be the face or presence of the Shekinah ()*Abot de Rabbi Nathan* 2; see J. Goldin, *The Fathers according to Rabbi Nathan* [1955], 24).
Monastery and Chapel of the Transfiguration atop Mount Tabor. Jesus' transformation on the mount may be regarded as a manifestation of the Shekinah glory.

In the HAGGADAH, the tabernacle was especially associated with the Shekinah; in fact, the day of the dedication of the tabernacle was said to have been the first day of the Shekinah's abiding in the universe, when it at last had found a home (*b. Šabb.* 85b). Solomon's temple was the successor to the tabernacle as the Shekinah's home. It was taught by some that at the time of the EXILE the Shekinah went with the captives into BABYLON, but others taught that it returned to heaven. Although the Shekinah was not to be found in the Jerusalem temple subsequent to the captivity, this did not mean that it ceased to be active in the world. Both Ishmael ben Elisha and Hoshaiah Rabbah taught that after the return to Jerusalem the Shekinah was in every place.

III. Symbolic representations. God spoke to MOSES out of the BURNING BUSH that was not consumed (Exod. 3:3 – 4). It was at the edge of the wilderness that God first went before his people as a pillar

of cloud by day to lead them, and a pillar of fire by night (14:24). During the day the cloud was visible, and at night it was the fire. It was in this cloud that God was visibly present as the angel of the covenant (14:19). From the cloud God spoke to both Moses and Israel, and it was the cloud that rested upon Mount Sinai (24:15 – 18).

The ANGEL of the Lord was clearly God himself. According to Exod. 13:21, God himself "went ahead" of the Israelites, and later the statement was recorded that "the angel of God, who had been traveling in front of Israel's army, withdrew and went behind them. The pillar of cloud also moved from in front and stood behind them" (14:19). The Shekinah was represented as the angel of the Lord apparently when JACOB wrestled with God at Peniel. See PENUEL (PLACE). The angel of the Lord confronted HAGAR as she fled from SARAH (Gen. 16:7 – 14). Likewise the angel of the Lord appeared to ABRAHAM at the oaks of MAMRE (ch. 18).

The lighting of the perpetual lamp symbolized the Shekinah, and there was the tradition that from his birth Moses was under the wings of the Shekinah. Since the Shekinah was felt to dwell between the wings of the CHERUBIM over the MERCY SEAT, which was the top of the ark of the covenant, it may be that the Shekinah was also identified with these angelic creatures. Worthy of note also is Isaiah's statement that "the angel of his presence saved them" (Isa. 63:9). The midrashic literature in the later period made the Shekinah almost an independent personality who stood between God and the world in a mediatorial role. Maimonides (1135 – 1204) taught that the Shekinah was a fiery created being who was the agent of divine activity in the world.

IV. NT parallels. As in the OT, so in the NT the term *Shekinah* was not used; but there is much indication of the idea of the immanence of God expressed in terminology that approximates the rabbinical usage. The Gospel of Luke among the synoptics especially reveals that trait. In the very beginning of that book, with the announcement of the birth of Jesus, Luke records concerning the shepherds, "An angel of the Lord appeared to them, and the glory of the Lord shone around them" (Lk. 2:9). The "glory of the Lord" is a reference, no doubt, to the supernatural LIGHT with which God appears, whether personally or by his messengers. The most notable instance of the influence of the Shekinah concept in Luke is in connection with the TRANSFIGURATION of Jesus: "As he was praying, the appearance of his face changed, and his clothes became as bright as a flash of lightning" (9:29). Outside the Gospels, the only allusion to this experience of Jesus elsewhere in the NT is 2 Pet. 1:16 – 18, in which the author by a shifting emphasis interpreted the transfiguration as heralding the PAROUSIA of Christ, perhaps because in the Synoptic Gospels the event follows a reference to the SECOND COMING of the Lord in glory and power.

It seems that the concepts of the Shekinah glory and the imminence of God in Jesus Christ have a happy union. In fact, in the Ethiopic text of the apocryphal *Apocalypse of Peter* the transfiguration was blended with the ASCENSION OF CHRIST, suggesting a correspondence between the cloud that received him and the glory that surrounded him. As the Shekinah in the thought of the Jews could depart this world and return to heaven, so Jesus was caught up in a cloud upon his departure (Acts 1:9). The second glimpse of Christ in the book of Acts was given in connection with PAUL'S experience on the road to Damascus (9:3 – 6; 22:6 – 11; 26:12 – 16). Although the details of Paul's experience were given differently in the three accounts of it found in Acts, all three emphasized the blinding light from heaven, brighter than the sun, out of which the Christ communicated with him.

John's gospel is also noteworthy because of parallels to the Shekinah concept. That gospel begins with a passage that is most interesting because it says, "The Word became flesh and made his dwelling [*lit.*, tabernacled] among us" (Jn. 1:14; see LOGOS). The verb *eskēnōsen* (from *skēnoō*

G5012) recalls the Shekinah through which God appeared to his people in the tabernacle during the wilderness wanderings. The passage developed the idea further in that it seemed to regard the Shekinah as dwelling in the tabernacle of the flesh of Jesus, for it was said, "We have seen his glory," which was the manifestation of the Shekinah among human beings. The Johannine Word was the light which lighted everyone. (Note that the Aaronic blessing of Num. 6:25, "the LORD make his face shine upon you," was rendered by *Tg. Onk.*, "the LORD give you the light of his Shekinah.")

The term GLORY, very important as a representation of the Shekinah by the rabbis, was of special significance in John's gospel. Generally it referred to the action of God in the world through Jesus Christ. The true temple was not the edifice in Jerusalem, but the very body of Jesus. It was in him that the glory of God shone, and in his resurrection that God acted supremely in behalf of sinners (Jn. 2:21). His miracle of CANA, the first of the Johannine signs, was said to manifest his glory (2:11). There are eighteen occurrences of the term *glory* (Gk. *doxa G1518*) in John's gospel and only twenty-three in the synoptics combined; and among the synoptics Luke has thirteen. There is a noted predilection for the term that is shared by John and Luke.

In the Hebrew OT the *kābôd H3883* or "glory" of God was the visible manifestation of his majesty as he acted in power. John emphasized that Jesus' glory was visible throughout his ministry, and in spite of the fact that the transfiguration is not recounted in the fourth gospel, it was John who insisted that Jesus' glory was visible from the beginning and not just after his resurrection. Especially through the signs was this true (Jn. 2:11; 11:40; 17:4). The resurrection was regarded by all the Gospels as the supreme act of God that declared Christ's glory, but John thought of the passion, death, and resurrection of Jesus as one "hour." Throughout the entirety of that hour, John emphasized the glory of it all (12:23, 28; 13:32; 17:1). Jesus prayed, according to John, "Father, glorify me in your presence with the glory I had with you before the world began" (17:5). John wrote that Isaiah had seen Christ's glory (Jn. 12:41), but the *Targum Jonathan* expanded Isa. 6:5 to read, "my eyes have seen the glory of the Shekinah of the King of the Ages, LORD Sabaoth." Similarly, the epistle to the Hebrews declares Christ to be "the radiance of God's glory" (Heb. 1:3). PETER speaks of "the Spirit of glory" and describes God as "the Majestic Glory" (1 Pet. 4:14; 2 Pet. 1:17).

Another concept that was very significant to John is that of "abiding" (the Gk. verb *menō G3531* occurs almost seventy times in his gospel and epistles), and of course the same notion is central to the understanding of Shekinah. According to *m. ʾAbot* 3:6, the Shekinah "rests" or "abides" among those who occupy themselves with God's law, and one of the passages quoted as proof is Exod. 20:24, "Wherever I cause my name to be honored, I will come to you and bless you." The NAME of God in Jewish thought constituted the essence of God himself. Interestingly, the DIDACHE (10.2) contains this prayer: "We give thanks to you, holy Father, for your holy name, which you made to tabernacle in our hearts." This echoes Jn. 17:4, 6, where the manifestation of the name of God was the same as the glorification of the Father, the bringing of the Shekinah to earth. In John, Jesus also prayed for his followers to be kept in the name that had been given to him, and in which he had kept them (Jn. 17:11–12).

Many passages in the writings of Paul are thought to have a parallel to the Shekinah. The Corinthian correspondence may be the earliest of his material to reveal the parallel, and this is especially to be seen in connection with the term *glory*. Paul used "Lord of glory" as a title for Christ (1 Cor. 2:8; cf. also Jas. 2:1). He also recalled the experience of Moses, who put a veil over his face that the Israelites might not see the end of the glory that had been upon him (2 Cor. 3:14)—no doubt an allusion to the Shekinah concept. Christ's people in contrast to Moses behold the "glory of the Lord" and are transformed from glory to glory (v. 18).

The GOSPEL was also related by Paul to this concept, speaking as he did of "the light of the gospel of the glory of Christ" (2 Cor. 4:4). Ephesians and Colossians employ similar terminology related to Christ (Eph. 1:17 – 18; 3:16; Col. 1:27). Romans likewise takes note of this with the observation that all have fallen short of the glory of God (Rom. 3:23). The sinner's hope in Christ is to share the glory of God (5:2; 8:18). (See further G. F. Moore, *Judaism in the First Centuries of the Christian Era: The Age of the Tannaim*, 3 vols. [1927 – 30], 1:434 – 38; E. E. Urbach, *The Sages: Their Concepts and Beliefs*, 2 vols. [1979], ch. 3; *ISBE* rev. [1979 – 88], 4:466 – 68.)

<div align="right">H. L. DRUMWRIGHT, JR.</div>

Shelah (person) shee'luh (שֵׁלַח *H8941*, possibly "offshoot" [see *HALOT*, 4:15 – 17; cf. *ABD*, 5:1191]; gentilic שֵׁלָנִי *H8989*, "Shelanite"; Σαλά *G4885*). KJV also Salah, NT Sala. (1) Son (or descendant) of ARPHAXAD and more distant descendant of SHEM (Gen. 10:24; 11:12 – 15; 1 Chr. 1:18, 24); included in Luke's GENEALOGY OF JESUS CHRIST (Lk. 3:35, where Shelah is listed as son of CAINAN, following the LXX).

(2) Son of JUDAH (by his Canaanite wife), grandson of JACOB, and ancestor of the Shelanite clan (Gen. 38:5; 46:12; Num. 26:20; 1 Chr. 2:3; 4:21; the gentilic SHILONITE in 1 Chr. 9:5 [*šîlônî*] and Neh. 11:5 [*šilōnî*] is widely thought to be a textual corruption of "Shelanite" [*šēlānî*]). Shelah was promised in marriage to Judah's widowed daughter-in-law, TAMAR, but Judah failed to keep his promise (vv. 11, 14, 26).

Shelah, Pool of shee'luh (שֶׁלַח *H8940*, perhaps "canal"). A reservoir in JERUSALEM, near the FOUNTAIN GATE and the KING'S GARDEN; its wall was repaired by the ruler of the district of Mizpah, SHALLUN son of Col-Hozeh (Neh. 3:15 NRSV). It is thought by many to be identical with the King's Pool (2:14) and with the Lower Pool (Isa. 22:9). While some identify it with the Pool of SILOAM (so NIV; similarly KJV ["Siloah"; cf. Isa. 8:6, "Shiloah"]), others regard it as a separate reservoir in the complex water system of JERUSALEM that was fed by the Spring of GIHON. The NJPS interprets the word not as a name but as a common noun and renders, "the irrigation pool." (On the distinction between the Pool of Shelah and "the artificial pool" [Neh. 3:16], see H. G. M. Williamson, *Ezra-Nehemiah*, WBC 16 [1985], 207.)

<div align="right">T. E. MCCOMISKEY</div>

Shelanite shee'luh-n*i*t. See SHELAH.

Shelemiah shel'uh-m*i*'uh (שֶׁלֶמְיָה *H8983* and שֶׁל מְיָה *H8982*, "Yahweh has repaid [*or* replaced]"; cf. SHALLUM, SHILLEM). (1) A Levite who was responsible for the EAST GATE (1 Chr. 26:14). His full name was MESHELEMIAH (9:21; 26:1 – 2, 9).

(2 – 3) Two of the descendants of Binnui who agreed to put away their foreign wives (Ezra 10:39, 41). The parallel passage includes only one Shelemiah in this context (1 Esd. 9:34; KJV, "Selemias"), and it is possible that the second Shelemiah in the Ezra list was a descendant of Azzur (see MACNADEBAI).

(4) Father of Hananiah; the latter, along with Hanun son of Zalaph, was in charge of repairing the portion of the Jerusalem wall above the HORSE GATE (Neh. 3:30).

(5) A priest who, along with others, was appointed by NEHEMIAH to oversee the collection and distribution of tithes for the support of the Levites (Neh. 13:13).

(6) Son of Cushi and grandfather of Jehudi; the latter was the official sent to Baruch, instructing him to bring to the court the scroll on which were written the prophecies of Jeremiah (Jer. 36:14).

(7) Son of Abdeel; he was one of three men commanded by King Jehoiakim to seize Baruch and Jeremiah, a mission that proved unsuccessful (Jer. 36:26).

(8) Father of Jehucal; the latter and a priest were sent by King Zedekiah to Jeremiah to ask the prophet to pray for him and the people (Jer. 37:3; subsequently Jehucal [Jucal] joined others in recommending the death sentence for Jeremiah, 38:1 – 4).

(9) Father of Irijah; the latter was a sentry who seized Jeremiah on suspicion of deserting to the Babylonians during a temporary lifting of the siege (Jer. 37:13).

<div align="right">A. E. Cundall</div>

Sheleph shee'lif (שֶׁלֶף *H8991,* meaning uncertain). Son of Joktan and grandson of Eber, listed in the Table of Nations (Gen. 10:26; 1 Chr. 1:20). Many think Sheleph is a tribal name, referring to a group in S Arabia otherwise known by the name of as-Salif (or as-Sulaf; *see ABD,* 5:1192 – 93).

Shelesh shee'lish (שֶׁלֶשׁ *H8994,* possibly "gentle"). Son of Helem; listed among the brave warriors who were heads of families of the tribe of Asher (1 Chr. 7:35; cf. v. 40).

Shelomi shi-loh'm*i* (שְׁלֹמִי *H8979,* possibly "my peace" [but *see ABD,* 5:1193]). Father of Ahihud, from the tribe of Asher; the latter was among the leaders appointed to divide the land of Canaan among the tribes (Num. 34:27).

Shelomith shi-loh'mith (שְׁלֹמִית *H8984* [male] and *H8985* [female], possibly "at peace" or "complete"). Sometimes confused with Shelomoth, which according to some scholars is the original male form of the name. (1) Daughter of Dibri, from the tribe of Dan. Shelomith's unnamed son (by an Egyptian father), following a quarrel with another Israelite, blasphemed the divine name and was subsequently stoned to death (Lev. 24:11).

(2) Daughter of Zerubbabel and descendant of David (1 Chr. 3:19); she is the only woman listed in this genealogy.

(3) Son of Shimei and descendant of Levi through Gershon (1 Chr. 23:9 KJV and NJPS, following the *Qere;* NIV and NRSV, "Shelomoth").

(4) Son of Izhar and also a Gershonite (1 Chr. 23:18; called "Shelomoth" in 24:22).

(5) Son of Zicri and descendant of Moses; he was in charge of all the spoils of war and other gifts dedicated to the maintenance of the sanctuary (1 Chr. 26:25 – 28, following the *Qere;* NRSV, "Shelomoth").

(6) Son of Rehoboam (by his favorite wife Maacah) and descendant of David (2 Chr. 11:20).

(7) Son of Josiphiah; he was family head of the descendants of Bani who returned with Ezra from Exile (Ezra 8:10 NIV and NRSV, following Lxx and 1 Esd. 8:36 [where KJV reads "Assalimoth"]). The MT omits the name Bani, yielding the translation, "of the descendants of Shelomith: the son of Josiphiah, and with him 160 men" (cf. KJV and NJPS).

<div align="right">A. E. Cundall</div>

Shelomoth shi-loh'moth (שְׁלֹמֹות *H8977,* possibly "at peace" or "complete"). Sometimes confused

with SHELOMITH. (1) Son of Shimei and descendant of LEVI through GERSHON (1 Chr. 23:9 NIV and NRSV, following the *Ketib;* KJV and NJPS, "Shelomith").

(2) Son of Izhar and also a Gershonite (1 Chr. 24:22; called "Shelomith" in 23:18).

(3) Son of Zicri and descendant of MOSES; he was in charge of all the spoils of war and other gifts dedicated to the maintenance of the sanctuary (1 Chr. 26:25 – 28 NRSV, following the *Ketib;* KJV and NIV, "Shelomith").

<div align="right">A. E. CUNDALL</div>

Shelumiel shi-*loo*'mee-uhl (שְׁלֻמִיאֵל *H8981,* "God is my peace [*i.e.,* salvation]"). Son of Zurishaddai; he was a leader from the tribe of SIMEON, heading a division of 59,300 (Num. 2:12; 10:19). Shelumiel was among those who assisted MOSES in taking a census of the Israelites (1:6) and who brought offerings to the Lord for the dedication of the TABERNACLE (7:36 – 41). See also SALAMIEL.

<div align="right">A. E. CUNDALL</div>

Shem shem (שֵׁם *H9006,* possibly "name [*i.e.,* esteemed]" or, like Akk. *šummum,* "son, offspring"; perhaps short form of a theophoric name such as שְׁמוּאֵל *H9017* [see SHEMUEL]; Σήμ *G4954*). Son of NOAH, possibly his firstborn (Gen. 5:32 et al.; 1 Chr. 1:4 et al.); included in Luke's GENEALOGY OF JESUS CHRIST (Lk. 3:36; KJV, "Sem"). Shem is considered the ancestor of the peoples known as the SEMITES and, in the classificatory sense, of those speaking Semitic languages. He and his wife were two of the eight persons who escaped from the flood in the ark (Gen. 7:13; see FLOOD, GENESIS). Two years after leaving the ark, at the age of 100, he became the father of Arphaxad (Arpachshad); other sons and daughters were born during his 600-year life (11:10).

The Table of NATIONS gives additional details concerning Shem's descendants (Gen. 10:21 – 31; 1 Chr. 1:17 – 27). His sons ELAM, ASSHUR, ARPHAXAD, LUD, and ARAM are identified in the earlier Bible geographies as ancestral to the lands of PERSIA, ASSYRIA, CHALDEA (prob.), LYDIA, and SYRIA, respectively. An uncertainty attached to Lud, as another person by the same name appears in connection with Egypt (10:13), but these later people are regarded as Hamitic. The Chronicler adds four additional sons of Shem (Uz, Hul, Gether, and Meshech, 1 Chr. 1:17 MT), but Genesis identifies these as sons of Aram (Gen. 10:23). If the Chronicles passage is not textually corrupt (cf. NIV, following some MSS of LXX), it may be that the author is simply referring to them in the general sense of descendants of Shem. In the development of the ethnic relationships of Shem's family, not all his descendants would necessarily have spoken Semitic languages and dialects. Hence the apparent discrepancies between the genealogical data of Gen. 10 and the historical affinities among the peoples of the Near E may be more imagined than real.

Historically, the earliest home of the Semites, or the families of the five sons of Shem, must have been in the foothills and valleys of Armenia. From this nuclear region, reconstruction of migrations indicates that their descendants moved outward in the various directions required by their settlement identifications. Arphaxad may have remained longest in the original settlement area, then worked his way southward along the eastern side of the Zagros range of mountains, finally to journey westward to the plain of SHINAR (Gen. 11:2). G. Childe (*New Light on the Most Ancient East* [1953], 147, 155, 167 – 68) used archaeological data to show that the Semites probably had earlier contact with Egypt and carried cultural affinities from there into SUMER.

<div align="right">M. H. HEICKSEN</div>

Shem, Paraphrase of. A gnostic document preserved in the NAG HAMMADI LIBRARY (NHC VII, 1). Probably composed in Greek (c. A.D. 200), whence it was translated into Coptic, the work describes itself as a "paraphrase about the unbegotten Spirit" (though the meaning of the word *paraphrase* is ambiguous) and purports to be a revelation granted to SHEM by Derdekeas (a redeemer figure; see GNOSTICISM). Shem relates that in his mind he was taken up to the top of the world. There he learned that Derdekeas, son of the Light, descended to the realm of Darkness to rescue the Spirit. The narrative makes allusion to a few OT events, but it gives little evidence of Christian influence. Some think that the *Paraphrase of Seth*, a heretical work mentioned by the Christian writer Hyppolitus, may have been a Christianized version of the *Paraphrase of Shem*. (English trans. in *NHL*, 339 – 61.)

Shem, Treatise of. A Jewish astrological work preserved only in a 15th-cent. Syriac MS, but probably composed in antiquity, maybe as early as the 1st cent. B.C. (the original language may have been Hebrew or Aramaic). Although attributed to SHEM, he is not actually mentioned in the work, which claims to predict the characteristics of the year, depending on which part of the zodiac the year begins. The emphasis it places on natural phenomena and on the movements of the heavenly bodies does not sit well with the biblical notion of divine PROVIDENCE. See ASTROLOGY. (English trans. in *OTP*, 1:473 – 86.)

Shema (person) shee'muh ([שֶׁמַע *H9050*, prob. short form of שְׁמַעְיָהוּ *H9062*, "Yahweh has heard"; see SHEMAIAH). (1) Son of HEBRON and descendant of CALEB, included in the genealogy of JUDAH (1 Chr. 2:43 – 44). Many of the names in this passage refer to places, and Shema could be the name of a Judahite settlement; see SHEMA (PLACE).

(2) Son of Joel and descendant of REUBEN (1 Chr. 5:8); it is possible that Shema in this verse should be identified with Shemaiah, or perhaps with Shimei, both of whom are mentioned as descendants of Joel earlier in the passage (v. 4). See also JOEL #5.

(3) Son of ELPAAL and descendant of BENJAMIN; he and his brother BERIAH, heads of families in AIJALON, put to flight the inhabitants of GATH (1 Chr. 8:13). This Shema is apparently the same as the SHIMEI mentioned later in this genealogy (v. 21).

(4) One of the prominent men who stood near EZRA when the law was read at the great assembly (Neh. 8:4; 1 Esd. 9:43 [KJV, "Sammus"]).

<div align="right">A. E. CUNDALL</div>

Shema (place) shee'muh ([שֶׁמַע *H9054*, meaning uncertain). One of "the southernmost towns of the tribe of Judah in the Negev toward the boundary of Edom" (Josh. 15:26). Some scholars emend Shema to Sheba on the basis of a partially parallel passage that includes the latter name among Simeonite towns within Judahite territory (19:2); see SHEBA #5. Others identify Shema with the "son" of Hebron (1 Chr. 2:43); see SHEMA (PERSON) #1. In any case, the location of this town is not known (for proposals, cf. G. N. Knoppers, *I Chronicles 1 – 9*, AB 12 [2004], 312).

Shema, the shuh-mah'. Name give to the confession found in Deut. 6:4 – 9 (followed in SYNAGOGUE services by 11:13 – 21 and Num. 15:37 – 41). This designation derives from the first word of the passage, *šĕma(*, "Hear!" (imperative form of the verb *šāma(H9048*).

Shemaah shi-may'uh (שְׁמָעָה *H9057*, occurring with the definite article, הַשְּׁמָעָה, suggesting that the

form should be emended to יְהוֹשָׁמָע, "Yahweh has heard"). A man from GIBEAH whose two sons, AHIEZER and JOASH, were among the ambidextrous relatives of SAUL who joined DAVID'S forces at ZIKLAG (1 Chr. 12:3; cf. v. 1). On the basis of the primary SEPTUAGINT witnesses and a few Hebrew MSS, the plural "sons" is often emended to "son"; if the singular reading is original, then Shamaah was the father only of Joash.

Shemaiah shi-may'yuh (שְׁמַעְיָהוּ *H9062* and שְׁמַ עְיָה *H9061*, "Yahweh has heard"; cf. ELISHAMA). One of the most common biblical names, borne especially by priests and Levites; in some cases it is difficult to distinguish between them. (1) Son of Shecaniah and descendant of DAVID in the line of ZERUBBABEL (1 Chr. 3:22).

(2) Descendant of SIMEON and ancestor of Ziza; the latter was one of the clan leaders in the time of HEZEKIAH who invaded the land of the Hamites and the Meunites (1 Chr. 4:37; cf. vv. 38 – 41).

(3) Son of Joel and descendant of REUBEN (1 Chr. 5:4; possibly the same as SHEMA in v. 8).

(4) Son of Hasshub and descendant of LEVI through MERARI; listed among those who resettled in Jerusalem after the EXILE (1 Chr. 9:14) and among the heads of the Levites "who had charge of the outside work of the house of God" (Neh. 11:15).

(5) Son of Galal, also a Merarite, whose son Obadiah is included among those who resettled in Jerusalem (1 Chr. 9:16); he is evidently the same as SHAMMUA father of Abda (Neh. 11:17).

(6) Head of a Levitical family descended from ELIZAPHAN, listed among those who helped to bring the ARK OF THE COVENANT to Jerusalem in the reign of DAVID (1 Chr. 15:8, 11).

(7) Son of Nethanel; he was a Levitical scribe who recorded the results of King David's choice by lot of those who would serve in the twenty-four priestly divisions (1 Chr. 24:6).

(8) Firstborn son of OBED-EDOM; he and his brothers belonged to the division of the gatekeepers, and Shamaiah's sons "were leaders in their father's family because they were very capable men" (1 Chr. 26:4, 6 – 7).

(9) A "man of God" or prophet who advised REHOBOAM not to take military action against JEROBOAM and the ten northern tribes that seceded (1 Ki. 12:22 – 24 = 2 Chr. 11:2 – 4). Rehoboam was later the subject of another word from the Lord through Shemaiah, who predicted the king's defeat at the hand of SHISHAK, pharaoh of Egypt (2 Chr. 12:5 – 8). Along with IDDO the seer, Shemaiah was also a chronicler of the life of Rehoboam (12:15). There is some confusion in the SEPTUAGINT, which includes after 1 Ki. 12:24 a brief résumé of the account of AHIJAH the prophet and Jeroboam (reported in 11:29 – 40), but which assigns the prophet's role to Shemaiah.

(10) One of six Levites whom King JEHOSHAPHAT sent to teach the law in the cities of Judah (2 Chr. 17:8). Appointed to the same mission were a number of princes and priests.

(11) Descendant of JEDUTHUN the musician; he and his brother UZZIEL were among the Levites assigned to consecrate the temple in the days of HEZEKIAH (2 Chr. 29:14).

(12) A Levite who faithfully assisted KORE in distributing the contributions made to the temple during the reign of HEZEKIAH (2 Chr. 31:15).

(13) A leader of the Levites during the reign of King JOSIAH; along with his brothers CONANIAH and NETHANEL, Shemaiah provided 5,000 offerings (lambs) and five head of cattle for the renewed celebration of the Passover (2 Chr. 35:9; 1 Esd. 1:9 [KJV, "Samaias"]).

(14) Descendant of Adonikam and a family head who returned with EZRA from Babylon (Ezra 8:13; 1 Esd. 8:39 [KJV, "Samaias"]).

(15) One of a group of leaders sent by EZRA to Iddo to get attendants for the house of God (Ezra

8:16; 1 Esd. 8:44 [KJV, "Mamaias"]).

(16) One of the priests descended from Harim who agreed to put away their foreign wives (Ezra 10:21; 1 Esd. 9:21 [KJV, "Sameius"]).

(17) Another man in the line of Harim, evidently not the same as #16 above, but an ordinary Israelite, who had also married a foreign wife (Ezra 10:31).

(18) Son of Shecaniah; he was a priest who guarded the EAST GATE and who made repairs to the wall in front of his house (Neh. 3:29).

(19) Son of Delaiah; he was a hired prophet sent by TOBIAH and SANBALLAT to intimidate NEHEMIAH and so hinder progress on the rebuilding of the wall (Neh. 6:10). The fear of assassination was calculated to cause Nehemiah to flee into the temple, a forbidden act, and so bring reproach upon him in the eyes of the people, and perhaps divine wrath as well. Nehemiah wisely refused this ploy (vv. 11 – 13).

(20) One of the priests who participated with Nehemiah in the sealing of the covenant at the dedication of the wall (Neh. 10:8). He is probably the same Shemaiah mentioned in connection with the coming of Zerubbabel to Jerusalem (12:6). In the days of the high priest JOIAKIM, Jehonathan was the head of Shemaiah's priestly family (12:18).

(21) A priest who took part in one of the choirs at the dedication of the wall (Neh. 12:34).

(22) Descendant of ASAPH and grandfather of Zechariah; the latter was a musician who participated in the dedication of the wall (Neh. 12:35).

(23) Another musician who participated in the dedication of the wall (Neh. 12:36).

(24) A priest or Levite who participated in the choir at the dedication of the wall (Neh. 12:42).

(25) Father of a prophet named URIAH, from KIRIATH JEARIM. He prophesied against Jerusalem in the time of King JEHOIAKIM, who sought his life. Uriah, however, escaped to Egypt, but he was brought back and executed by Jehoiakim (Jer. 26:20 – 23).

(26) A NEHELAMITE who was a false prophet; JEREMIAH pronounced judgment upon him and predicted the extinction of his family (Jer. 29:24 – 32).

(27) Father of Delaiah; the latter was one of the officials who witnessed Jehoiakim's burning of the scroll containing the words of Jeremiah (Jer. 36:12).

(28) One of the descendants of Ezora who had married foreign wives (1 Esd. 9:34 RSV; KJV and NRSV, "Samatus").

(29) Father of Ananias (Hananiah) and Jathan (Nathan), acquaintances of TOBIT, who calls him "the great Shemaiah" (Tob. 5:13 RSV; KJV, "Samaias"; NRSV, "Shemeliah" [v. 14]).

M. H. HEICKSEN

Shemariah shemr*i*'uh (שְׁמַרְיָהוּ *H9080* [only 1 Chr. 12:5, MT 12:6] and שְׁמַרְיָה *H9079,* "Yahweh has watched over"). (1) One of the ambidextrous Benjamite warriors who joined DAVID while he was in exile from SAUL at the Philistine city of ZIKLAG (1 Chr. 12:5; cf. v. 2).

(2) Son of King REHOBOAM by his first wife MAHALATH (2 Chr. 11:19; KJV, "Shamariah").

(3) One of the descendants of Harim who agreed to put away their foreign wives in the time of EZRA (Ezra 10:32).

(4) One of the descendants of Binnui who agreed to put away their foreign wives (Ezra 10:41). Regarding the textual problems in this verse, see discussion under MACNADEBAI.

S. BARABAS

Shemeber shem-ee'buhr (שְׁמְאֵבֶר *H9008*, meaning uncertain). The king of ZEBOIIM (Gen. 14:2); he and four other kings were defeated in the Valley of Siddim by KEDORLAOMER and his allies.

Shemed shee'mid (שֶׁמֶד *H9013*, derivation uncertain). Son of ELPAAL and descendant of BENJAMIN; he is credited with having built ONO and LOD (1 Chr. 8:12; KJV, "Shamed").

Shemeliah shem'uh-li'uh (Σεμελιας). Father of Hananiah and Nathan, acquaintances of TOBIT (Tob. 5:14; KJV, "Samaias" [v. 13]; RSV, "Shemaiah" [v. 13]).

Shemer shee'muhr (שֶׁמֶר *H9070*, possibly short form of שְׁמַרְיָהוּ *H9080*, "Yahweh has watched over"). (1) Owner of a hill purchased by King OMRI as the site for a city; the king called it SAMARIA (Heb. *šōměrôn H9076*) after Shemer (1 Ki. 16:24).

(2) Son of Mahli, descendant of LEVI through MERARI, and ancestor of the musician ETHAN (1 Chr. 6:46; KJV, "Shamer").

(3) An Asherite (1 Chr. 7:34 NRSV; KJV, "Shamer"; NIV, "Shomer"). See SHOMER.

Shemida shi-m*i*'duh (שְׁמִידָע *H9026,* possibly "the Name *[i.e.,* God] has understood"; gentilic שְׁמִידָעִי *H9027,* "Shemidaite"). Son of GILEAD, grandson of MANASSEH, and ancestor of the Shemidaite clan (Num. 26:32; Josh. 17:2; 1 Chr. 7:19 [some KJV editions, "Shemidah"]).

S. BARABAS

sheminith shem'uh-nith. See MUSIC VI.C.

Shemiramoth shi-mihr'uh-moth (שְׁמִירָמוֹת *H9035,* meaning unknown). (1) A Levite and one of the gatekeepers assigned to be a musician when DAVID made preparation to transfer the ARK OF THE COVENANT to Jerusalem (1 Chr. 15:18). He is called one of the brothers of the "second order" (NRSV; NIV, "next in rank") who followed HEMAN, ASAPH, and ETHAN. Shemiramoth and some others "were to play the lyres according to *alamoth"* (v. 20; see MUSIC VI.C). Later, he was one of the Levites appointed "to minister before the ark of the LORD, to make petition, to give thanks, and to praise the LORD, the God of Israel" (16:4 – 5).

(2) One of six Levites whom King JEHOSHAPHAT sent to teach the law in the cities of Judah (2 Chr. 17:8). Appointed to the same mission were a number of princes and priests.

Shemuel shem'y*oo*-uhl (שְׁמוּאֵל *H9017,* possibly "his name is God"; see details under SAMUEL). (1) Son of Ammihud; he was a leader from the tribe of SIMEON, chosen to assist in the distribution of the land (Num. 34:20).

(2) Son of Tola and grandson of ISSACHAR, described as head of family (1 Chr. 7:2; NIV, "Samuel").

(3) KJV alternate form of Samuel (only 1 Chr. 6:33).

Shen shen (שֵׁן *H9095,* with the definite article, הַשֵּׁן, "the tooth" [possibly alluding to the shape of a topographical formation]). A place near which the stone named EBENEZER was set up by SAMUEL (1

Sam. 7:12). Shen was evidently not far from Mɪᴢᴘᴀʜ, but its location is unknown. On the basis of the Sᴇᴘᴛᴜᴀɢɪɴᴛ (which reads *tēs palaias*, "the old") and the Peshitta (*yšn*), many scholars emend the text to *yĕšānâ*, Jᴇꜱʜᴀɴᴀʜ (cf. NRSV), a town some 5 mi. N of Bᴇᴛʜᴇʟ.

Shenazar shi-naz'uhr. KJV form of Sʜᴇɴᴀᴢᴢᴀʀ.

Shenazzar shi-naz'uhr (שֶׁנְאַצַּר *H9100*, prob. from Akk. *Sin-uṣur*, "may [the god] Sin protect"). KJV Shenazar. Son of the exiled King Jᴇʜᴏɪᴀᴄʜɪɴ (1 Chr. 3:18). See also Sʜᴇꜱʜʙᴀᴢᴢᴀʀ.

Shenir shee'nuhr. KJV alternate form of Sᴇɴɪʀ.

Sheol shee'ohl (שְׁאוֹל *H8619*, derivation disputed; suggestions include "place of inquiry," alluding to necromancy [from שָׁאַל *H8626*, "to ask"; cf. BDB, 983], and "desolation, destruction" [from שָׁאָה *H8615*, "to be desolate"; cf. *HALOT*, 4:1368; fuller discussion in *ABD*, s.v. "Dead, Abode of the," 2:101 – 2, and *TDOT*, 14:240 – 41]). The place where the ᴅᴇᴀᴅ were believed to dwell. The Hebrew term is used sixty-five times in the OT, and more than half of its occurrences are found in the Wɪꜱᴅᴏᴍ Literature. The KJV translates it as "the grave" or "hell" ("the pit" three times). The NIV usually renders it "the grave" (Gen. 37:35 et al.; see R. L. Harris in *The NIV: The Making of a Contemporary Translation*, ed. K. L. Barker [1987], 75 – 92), but occasionally gives such contextual renderings as "the realm of death" (Deut. 32:22), "death" (Job 17:16 et al.), and "depths" (Ps. 139:8). The NRSV and other modern versions use the transliteration *Sheol*.

The Hebrews evidently shared with their contemporaries the belief that there was a region occupied by the dead as a shadowy underworld existence. A number of obvious parallels exist between the biblical descriptions and references in extrabiblical literature. According to the OT, the realm of the dead was a place of darkness: "…before I go to the place of no return, / to the land of gloom and deep shadow, / to the land of deepest night, / of deep shadow and disorder, / where even the light is like darkness" (Job 10:21 – 22; cf. Ps. 143:3). It was also viewed as a place of silence whose inhabitants cannot praise God (Ps. 6:5; 99:10 – 12; 94:17; 115:17). The book of Ecclesiastes states that "the dead know nothing" and that "in the grave, where you are going, there is neither working nor planning nor knowledge nor wisdom" (Eccl. 9:5, 10). The inhabitants of Sheol are but a shadow of their former selves; in fact, they are called by a term that may mean "shades" (*rĕpā'îm H8327*; see Rᴇᴘʜᴀɪᴛᴇ).

Sheol is a place of continued existence rather than annihilation, and it does not lie beyond the reach of God. "If I ascend to heaven, you are there; / if I make my bed in Sheol, you are there" (Ps. 139:8 NRSV). "Sheol is naked before God, / and Abaddon has no covering" (Job 26:6 NRSV; see Aʙᴀᴅᴅᴏɴ). Thus there springs the hope mentioned several times in the OT that God will rescue his people from Sheol. The OT makes little distinction between the lot of the godly and the ungodly in this realm. The distinction developed later, during the intertestamental period.

Some ambiguity exists relative to the location of Sheol. In a large number of instances, Sheol is spoken of as a place "down to" which one goes. It is a question as to how closely the Hebrew identified Sheol with the grave itself. The place is depicted as being underground: "The earth opened its mouth and swallowed them up, along with their households—everyone who belonged to Korah and all their goods. So they with all that belonged to them went down alive into Sheol; the earth closed over them, and they perished from the midst of the assembly" (Num. 16:32 – 33). Elsewhere

the dead are said to dwell "beneath the waters" (Job 26:5).

An important question regarding Sheol is this: At death, did the OT believers go to such a place of gloom or did they go to be with the Lord immediately? The former view was prevalent in the early church, which also held that Christ at his death descended into Sheol (HADES) to bring the OT believers to heaven with him. The latter view is held by those who believe that the Sheol concept was held by the Israelites in common with their pagan neighbors until God gradually revealed more and more information about the life after death, climaxing his revelation in Christ who brought life and immortality to light. Both views contain considerable difficulties.

(See further S. Zandstra in *PTR* 5 [1907]: 631 – 41; C. F. Burney, *Israel's Hope of Immortality* [1909]; E. F. Sutcliffe, *The Old Testament and the Future Life* [1947]; N. J. Tromp, *Primitive Conceptions of Death and the Nether World in the Old Testament* [1969]; K. Spronk, *Beatific Afterlife in Ancient Israel and in the Ancient Near East* [1986]; P. S. Johnston, *Shades of Sheol: Death and Afterlife in the Old Testament* [2002]; *DDD,* 768-70.)

H. BUIS

Shepham shee'fuhm (שֶׁפָם *H9172,* meaning uncertain). One of the sites in NE Canaan which served to delineate the E boundary of the Promised Land (Num. 34:10 – 11). It is mentioned between HAZAR ENAN (prob. modern Qaryatein, c. 70 mi. NE of DAMASCUS) and RIBLAH (an unknown location apparently not too far to the E or NE of the Sea of Galilee), but the site is unknown.

Shephatiah shef-uh-thi'uh (שְׁפַטְיָהוּ *H9153* [only 1 Chr. 12:5; 27:16; 2 Chr. 21:2] and שְׁפַטְיָה *H9152,* "Yahweh has judged [i.e., obtained justice for the innocent]"). (1) Son of DAVID by his wife Abital; he was among David's children who were born in HEBRON (2 Sam. 3:4; 1 Chr. 3:3).

(2) Son of Reuel, descendant of BENJAMIN, and father of MESHULLAM; the latter was a family head who returned to Jerusalem from the Babylonian captivity (1 Chr. 9:8).

(3) A HARUPHITE from the tribe of Benjamin who joined David's band while the latter dwelt at ZIKLAG to escape SAUL'S attempt to take him (1 Chr. 12:5).

(4) Son of Maacah and chief officer of the tribe of SIMEON while David was king (1 Chr. 27:16). He belonged to one of the divisions responsible for the affairs of the kingdom, serving a month at a time (v. 1).

(5) Son of JEHOSHAPHAT, king of Judah (1 Chr. 21:2). He and his brothers received a very generous inheritance (v. 3). Jehoshaphat's firstborn, JEHORAM, killed all his brothers when he became king (v. 4).

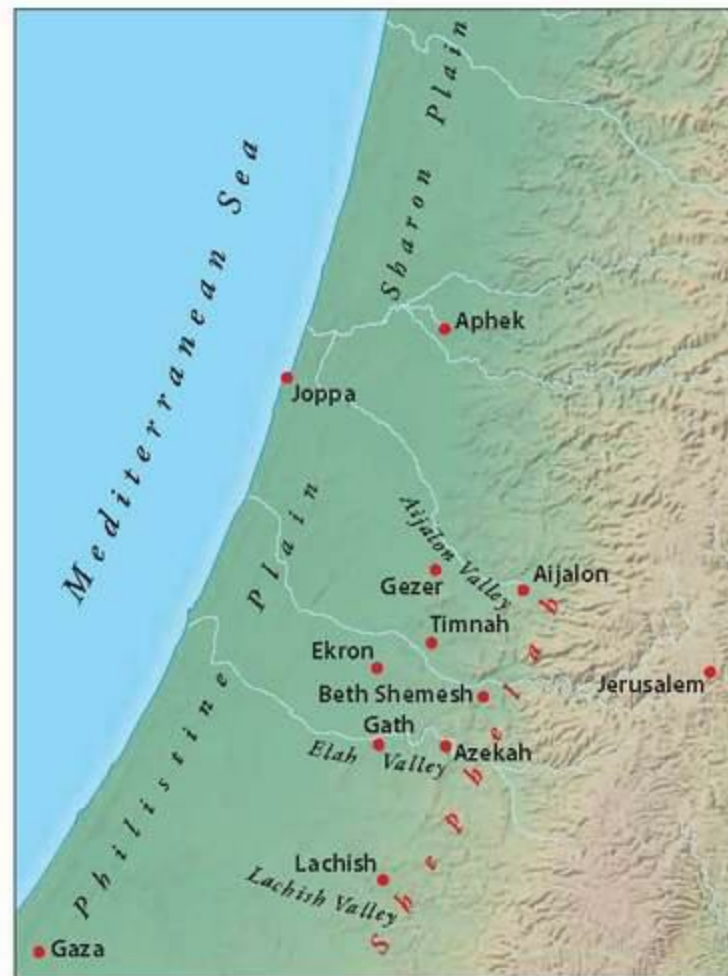
(6) Ancestor of an Israelite family, 372 of whom returned to Jerusalem from Babylon with ZERUBBABEL (Ezra 2:4; Neh. 7:9; the number is given as 472 in 1 Esd. 5:9 [KJV, "Saphat"]). Later, 80 more members of this family, plus their head Zebadiah, returned to Jerusalem with EZRA (Ezra 8:8; the number is given as 70 plus their head Zeraiah in 1 Esd. 8:34 [KJV, "Saphatias"]).

(7) Ancestor of a family of SOLOMON'S servants who returned to Jerusalem with Zerubbabel (Ezra 2:57; Neh. 7:59; 1 Esd. 5:33 [KJV, "Shapheth"]).

(8) Son of Mahalalel, descendant of JUDAH, and ancestor of Athaiah; the latter was a postexilic provincial leader listed among those who lived in Jerusalem at the time of NEHEMIAH (Neh. 11:4).

(9) Son of Mattan; he was one of the officials who complained to ZEDEKIAH about the unfavorable predictions of Jeremiah (Jer. 38:1-4).

J. J. EDWARDS

Shephelah shi-fee'luh, shef'uh-luh (שְׁפֵלָה *H9169,* "lowland"; usually rendered as a common noun in the LXX, but Σεφηλα in 2 Chr. 26:10 et al.). This name occurs frequently in the NRSV, which however does not use it consistently to translate the Hebrew term (it is rendered "lowland" in Joshua and Judges; similarly, the NJPS has "Shephelah" in most instances, but not all). The KJV uses a variety of renderings (e.g., "valley," "vale," "plain"), but has "Sephela" once in the APOCRYPHA (1 Macc. 12:28). The NIV renders the word as "western foothills" (Deut. 1:7 et al.) or simply as "foothills" (1 Ki. 10:27 et al.).


The Shephelah.

The term Shephelah refers to a well-known feature of the landforms of PALESTINE, namely, the low hill tract between the coastal plain and the high central hills of JUDEA and SAMARIA. It consists of hard Eocene limestones that form low, rocky plateaus and hilly swells that rise from the coastal plain to elevations of some 1,500 ft. above sea level. The word derives from *šāpēl H9164*, "to become low," and topographically it is accurate, suggesting the foothills below the main limestone dorsal of Judea-Samaria. As a buffer zone between the coastal plain of PHILISTIA and the Israelite highlands to the interior, the geopolitical character of the Shephelah was given clear identity in the OT (e.g., 2 Chr. 26:10; 28:18).

In at least one passage, the use of the term seems to indicate a particular type of landscape of rocky Eocene outcrops: "the Shephelah…and the hill country of Israel and its Shephelah" (Josh. 11:16, lit. trans.). This suggests that the landscape of the central CARMEL region behind JOKNEAM and MEGIDDO was recognized to have similar physical features to the Shephelah proper, as its similar geological outcrops testify. The Shephelah is poor country, neither suited traditionally to the tree-crops of Judah (the olive and vine) nor to the open barley fields of Philistia. Possibly the allusion to its SYCAMORE trees (1 Ki. 10:27) suggests a scrubby vegetation cover that helps explain its role as a poor buffer zone.

As such, the Shephelah figured prominently in the conquest and settlement of the land by the Israelites. First, Judah took possession of the eastern hills around BETHLEHEM. Then its clans spread out to the northern Shephelah by establishing amicable relationships with the Canaanites in this area (e.g., Gen. 38). Meanwhile other Hebrew tribes seized the southern hill lands of Judea, and the fall of LACHISH marked the conclusion to this phase of conquest. Only GEZER and its neighboring AMORITE cities stood up to the pressures of the Israelites (Jdg. 1:29, 35). These decisive events occurred during the decline of the 19th Egyptian dynasty, when the central authority over Canaan ceased.

In the northern Shephelah, however, a group of Canaanite fortresses remained untaken: GEZER, Shaalbim (SHAALABBIN), and AIJALON. Several generations after the Israelites, waves of SEA PEOPLES, known as the PHILISTINES, invaded the coastal plain by land and sea. They became complete masters of the S Canaanite coast, from the Yarkon valley southward. Thrusting inland from their strongholds of EKRON and GATH—on the edge of the Shephelah and commanding strategic valley passes—the Philistines penetrated eventually into the eastern Shephelah. The narratives of SAMSON reflect the beginning of this conflict in the Shephelah when pressure was first exerted against the tribe of DAN (Jdg. 15:9 – 20). The boundary between the Philistines and the Israelites then lay between Ekron and BETH SHEMESH.

The struggle for the control of the Shephelah reached its climax when the house of ELI was defeated in battle (1 Sam. 4) and SHILOH, then the center of northern Israel, was destroyed (Ps. 78:60; Jer. 7:12, 16; 26:6, 9). By the beginning of SAUL'S reign there were Philistine garrisons at GEBA of Benjamin (1 Sam. 10:5; 13:3). For some 150 years the Philistines dominated the Shephelah, with their superior monopoly of IRON smelting—perhaps inherited from the HITTITES (13:19 – 22). It was in this military crisis for Israel that the united Israelite monarchy was forged as a new political institution that transformed Palestine.

The struggle against the Philistines in the Shephelah continued throughout Saul's reign (1 Sam. 14:52). The duel between DAVID and GOLIATH took place in the Valley of Elah, between SOCOH and AZEKAH, where the frontier between Saul's territory and that of Gath was located (see ELAH, VALLEY OF). Border skirmishes are also alluded to, such as the raids of the Philistines to rob the threshing floors of KEILAH (23:1 – 6). Later, David gained a strategic advantage when he established JERUSALEM as a fortress capital. One does not have a clear picture of David's Shephelah campaigns,

but one passage (2 Sam. 8:1) indicates he took from the Philistines those areas that were essential to forming a bridge between Jerusalem and the SHARON plain, thus outflanking the Philistines and assuring supremacy of the region. Eventually Philistia was dominated by David by vassal treaty.

The low hills of the Judean Shephelah, looking E through the Elah Valley.

The transverse valleys of the Shephelah have been of critical significance in the history of the area, and help to explain the military importance of its major towns and fortresses. These valleys provided links between the coast and the Judean hill country. The most important of these, the Valley of Aijalon, was guarded by the fortress of Aijalon, referred to in the TELL EL-AMARNA tablets as Aialuna. It was fortified by REHOBOAM (2 Chr. 11:10), then subsequently retaken by the Philistines (28:18). The twin towns of Upper and Lower BETH HORON were also in the Aijalon Valley (Josh. 10:10 – 14), scene of the battle for which Joshua called upon the sun to stand still until the day's work was accomplished.

To the E, the Aijalon valley divides with approaches to both BETHEL and Jerusalem. South of it is the SOREK valley, where many of the exploits of Samson are recorded (Jdg. 16:4). Beth Shemesh, a border town, was in this valley. First set apart as a Levite town (Josh. 21:16) but later fortified, it was destroyed by Pharaoh SHISHAK (1 Ki. 14:25 – 28) and then rebuilt. There JOASH defeated AMAZIAH (2 Ki. 14:11 – 23), and then later the area was repossessed by the Philistines (2 Chr. 28:18). Further up the Sorek valley was KIRIATH JEARIM ("city of forests"), where the ARK OF THE COVENANT was kept for twenty years (1 Sam. 7:1 – 2).

A third valley is the Valley of Elah (the "terebinth valley") or Wadi es-Sanṭ. A significant town here was Azekah (modern Tell Zakariyeh), where Joshua pursued the Amorites after their attack on GIBEON (Josh. 10:10 – 11), and where REHOBOAM later established a fortress (2 Chr. 11:9). The shortest route inland to Hebron is the Zephathah Valley or Wadi Zeita, with its town of Moresheth, home of the prophet MICAH (Mic. 1:1; see MORESHETH GATH). Here the armies of ASA gained a victory over "Zerah the Cushite" (2 Chr. 14:9). About 1.5 mi. to the N of it, the Romans built the town of Eleutheropolis.

Finally, in the Wadi Qubeiba to the S, Tell ed-Duweir is the site of the military stronghold of Lachish, of HYKSOS origin. It was destroyed by Joshua (Josh. 10:31 – 32), fortified by Rehoboam (2 Chr. 11:9), and besieged by SENNACHERIB (2 Ki. 18:13 – 17) and NEBUCHADNEZZAR (Jer. 34:1). In

the light of events and the strategic significance of the Shephelah, it may be aptly termed "the buffer-zone of Palestine." (See further G. A. Smith, *Historical Geography of the Holy Land*, 25th ed. [1931], ch. 10; P. Pfeiffer and H. F. Vos, *The Wycliffe Historical Geography of Bible Lands* [1968], 110 – 16; A. F. Rainey in *BASOR* 251 [Summer 1983]: 1 – 22.)

<div align="right">J. M. Houston</div>

Shepher shee'fuhr (שֶׁפֶר *H9184,* possibly "beauty"). KJV Shapher. The name of a mountain at which the Israelites camped in the period of the wilderness wandering (Num. 33:23 – 24). It is listed between Kehelathah and Haradah, but none of these sites can be identified.

<div align="right">T. E. McComiskey</div>

shepherd. One who cares for a flock of SHEEP (see also OCCUPATIONS I.B). The Hebrew term *rōʿēh* (ptc. of *rāʿâ H8286,* "to pasture, tend") is first found in Gen. 4:2 to describe the occupation of ABEL. Later ABRAHAM, ISAAC, JACOB, and Jacob's sons are identified as shepherds (13:7; 26:20; 30:36; 37:12 – 14). Because of their occupation the sons of Jacob, when they went to Egypt, were not allowed to dwell near the Egyptians, who considered shepherds unclean (46:34).

MOSES was tending sheep when God called him to lead Israel out of Egypt (Exod. 3:1). DAVID was also a shepherd when God called him to be king of Israel (1 Sam. 16:11). The life of the shepherd was excellent preparation for one who should lead God's people (cf. Amos 1:1). Shepherds were known for feeding and protecting the flock (Jer. 31:10; Ezek. 34:2), for seeking out the lost sheep (Ezek. 34:12), and for rescuing those which were attacked (Amos 3:12).

From the idea of the shepherd as a protector and leader of the flock came the concept of God as the Shepherd of Israel. Shepherds themselves first declared this likeness. Jacob so addressed God in the days just before his death (Gen. 48:15). David called God his shepherd in the well-known psalm Ps. 23, as did ASAPH in Ps. 80. ISAIAH expanded on this view of God, who is described by him as the shepherd who feeds Israel (Isa. 40:11). JEREMIAH speaks of God as one like a shepherd who protects his flock (Jer. 31:10). EZEKIEL completes this conception by describing the Lord as a God who seeks out his flock (Ezek. 34:12).

In keeping with this concept, one finds in the OT many passages that speak of the leaders of God's people as shepherds under God. In Num. 27:17 and 1 Ki. 22:17, the plight of Israel without leaders is likened to sheep without a shepherd. Later, the prophets, priests, and kings who had failed God and God's people were condemned as shepherds who deserted or misled the flock (Jer. 2:8; 10:21; 23:1 – 4; Ezek. 34:1 – 10 et al.).

It is not surprising then that in the NT we find our Lord described as a shepherd *(poimēn G4478).* He is the good shepherd who lays down his life for his sheep (Jn. 10:1 – 18). He knows how to separate his sheep from the goats (Matt. 25:32); and he suffers for the sake of the sheep as a good shepherd (26:31). The writer of Hebrews calls Jesus the "great Shepherd of the sheep" (Heb. 13:20). Peter also calls him "the Shepherd and Overseer of your souls" (1 Pet. 2:25).

<div align="right">J. B. Scott</div>

Shephi shee'fi. See SHEPHO.

Shepho shee'foh (שְׁפוֹ *H9143,* also שְׁפִי [1 Chr. 1:40], derivation uncertain). Son of SHOBAL and grandson of SEIR the HORITE (Gen. 36:23; in 1 Chr. 1:40 the KJV and other versions have "Shephi,"

following MT); he was a chieftain living in EDOM (Gen. 36:21).

Shephupham shi-fy*oo*'fuhm (שְׁפוּפָם *H9145* [not in NIV], meaning unknown; prob. a textual corruption of שׁוּפָם *H8792,* gentilic שׁוּפָמִי *H8793,* "Shuphamite"). Son of BENJAMIN, grandson of JACOB, and eponymous ancestor of the Shuphamite clan (Num. 26:39 NRSV and other modern versions, following the MT). Both the KJV and the NIV have SHUPHAM, which is the reading of a few Hebrew MSS and several ancient versions. In the genealogical lists of Benjamin there seems to be the tendency toward the use of pairs of names of similar sound with some variations occurring. For example, in the present passage Shephupham/ Shupham is paired with HUPHAM and Huphamites, whereas a parallel passage has SHUPPIM and HUPPIM (1 Chr. 7:12). Huppim occurs also in the initial list of Benjamin's sons, but instead of Shuppim that list has MUPPIM (Gen. 46:21). See also SHEPHUPHAN. There seems to have been a trend toward stylization and simplification of names. (See discussion in *ABD,* 5:1205.)

H. E. FINLEY

Shephuphan shi-fy*oo*'fuhn (שְׁפוּפָן *H9146,* meaning unknown). Son of BELA and grandson of BENJAMIN (1 Chr. 8:5). Some Hebrew MSS and the TARGUM read SHEPHUPHAM (cf. also *Sōphan* in a few MSS of the LXX).

Sherah shee'ruh KJV form of SHEERAH.

sherd. See POTSHERD.

Sherebiah sher'uh-b*i*'uh (שֵׁרֵבְיָה *H9221,* meaning uncertain [for suggestions, see *HALOT*, 4:1651, and *ABD*, 5:1205]). (1) A Levite who, with his extended family, joined EZRA at a river encampment in Babylon in preparation for journeying to Palestine (Ezra 8:18, 24; 1 Esd. 8:47 [KJV, "Asebebeiah"], 54 [KJV, "Esebrias"]). Mentioned alongside HASHABIAH, he is described as "a capable man" to whom were committed funds and vessels for the temple treasury at Jerusalem. This Sherebiah is probably the same Levite who assisted in Ezra's public reading and exposition of the law (Neh. 8:7; 1 Esd. 9:48 [KJV, "Sarabias"]), shared in leading worship (Neh. 9:4 – 5), and joined in sealing the covenant with Nehemiah (10:12). See also #2 below.

(2) A Levite who returned from exile in company with ZERUBBABEL and "who, together with his associates, was in charge of the songs of thanksgiving" (Neh. 12:8, 24). Some believe that he is the same as #1 above, but that presents chronological problems. It is also possible that "Sherebiah" was a family name. (For a discussion of the issues involved, see *ABD*, 5:1205 – 07.)

M. H. HEICKSEN

Sheresh shihr'ish (שֶׁרֶשׁ *H9246,* perhaps "offshoot" or "clever"). Son of MAKIR and grandson of MANASSEH (1 Chr. 7:16).

Sherezer shuh-ree'zuhr. KJV form of SHAREZER (only Zech. 7:2).

Sheshach shee'shak (שֵׁשַׁךְ *H9263*). TNIV Sheshak. This name, which occurs twice (Jer. 25:26; 51:41), is evidently a cryptogram for BABYLON. See ATBASH.

Sheshai shee'sh*i* (שֵׁשַׁי H9259, derivation uncertain). One of three descendants of ANAK who lived in HEBRON when the Israelites spied out the land and who were defeated by the invading Israelites (Num. 13:22; Josh. 15:14; Jdg. 1:10). See AHIMAN.

Sheshak shee'shak. TNIV form of SHESHACH.

Sheshan shee'shan (שֵׁשָׁן H9264, meaning unknown). Son of Ishi and descendant of JUDAH through the line of JERAHMEEL (1 Chr. 2:31). He is said to have had a son named AHLAI, but subsequently the text states that he only had daughters, that he gave an unnamed daughter in marriage to his Egyptian servant JARHA, and that this daughter gave birth to a son named ATTAI (vv. 34 – 35). Some have argued that Ahlai was the name of Sheshan's daughter (in which case the introductory phrase in the Hebrew of v. 31, "the sons of Sheshan," is a general reference to progeny). Others have thought that Ahlai and Attai were one and the same person, or that Ahlai was the name given to Jarha when he was adopted, or that a distinction is being made between family relationships and genealogical pedigrees, or that the genealogy derives from two conflicting sources (cf. G. N. Knoppers, *I Chronicles 1 – 9,* AB 12 [2004], 310).

Sheshbazzar shesh-baz'uhr (שֵׁשְׁבַּצַּר H9256 [Aram. H10746], an Akk. theophoric name [cf. SHENAZZAR], though the precise derivation is disputed [see discussion in *HALOT,* 4:1664 – 65]). A postexilic Israelite referred to as the "prince" (Heb. *nāśî) H5954*) of Judah who brought the temple treasures from Babylon to Jerusalem (Ezra 1:8, 11; cf. 1 Esd. 2:12, 15 [LXX, vv. 8, 11; KJV, "Sanabassar"]). Elsewhere we are told that, having been appointed "governor" (Aram. *peḥâ H10580)* by CYRUS, Sheshbazzar "laid the foundations of the house of God in Jerusalem" (Ezra 5:14, 16; cf. 1 Esd. 6:18, 20 [LXX, vv. 17, 20; KJV, "Sanabassarus"]).

The identity of Sheshbazzar is disputed. If the designation "prince" indicates royalty, he may well have been the son of JEHOIACHIN (Jeconiah), king of Judah from 598 to 597 B.C., who was carried into captivity by NEBUCHADNEZZAR. Among the sons of Jehoiachin was one named SHENAZZAR (1 Chr. 3:18), which some scholars have considered a variant form of Sheshbazzar. The appointment of such a member of the Judean royal house as Persian governor or representative in Judah is totally in line with the rather magnanimous policy of Cyrus the Great toward his subject peoples. If the assumption is correct that the two names are the same essentially, then the decree of Cyrus (c. 538) recorded in Ezra 5:15 – 17 was directed to him and he was responsible for clearing the rubble and beginning the foundations of the walls. According to the historical record he was not able to finish his commission, but may possibly have died during the rebuilding (6:1 – 2 states that DARIUS, the next ruler of Persia, again ordered the renovation of the "house of God in Jerusalem"; this second decree must be set after 522). This approach would make Sheshbazzar the first governor of the Second Commonwealth and uncle of his successor ZERUBBABEL (5:1 – 2).

Some authorities, however, have proposed that Sheshbazzar and Zerubbabel were in fact the same person (1 Esd. 6:18 refers to Sheshbazzar and Zerubbabel as separate individuals, but this is probably a secondary reading). It is argued that if they are not the same person, then Ezra represents both Sheshbazzar and Zerubbabel as beginning the renovation and rebuilding of the TEMPLE (certainly Haggai and Zechariah credit Zerubbabel with this accomplishment). However, Ezra 3:2, which mentions Zerubbabel, refers to the state of the temple's reconstruction in the time closest to that of the author, while 5:16 refers to the previous decree of Cyrus. Insofar as Darius's decree was only a

recommissioning of the previous edict, both leaders were carrying out Cyrus's original order. It is well known that the OT narratives of whatever era are not primarily concerned with chronological analysis.

A further argument has been raised that Sheshbazzar may have been the governor's Babylonian name while Zerubbabel was his Jewish name (on the analogy of Dan. 1:7). However, such a proposal does not take into account that Zerubbabel itself is a Babylonian name (Akk. *zēr-bābili*, "offspring of Babilu"; cf. J. J. Stamm in *Mitteilungen der vorderasiatischen Gesellschaft* 44 [1939]: 269 – 70). There is additional evidence that Zerubbabel's career is placed by the author of the Ezra chronicles in the reign of Darius.

Although Sheshbazzar is one of the minor characters of the OT narrative, he holds an important place in the continuation of the Davidic royal line, which, after the return and restoration of the city of David and the other covenant sites of his once glorious kingdom, should produce the MESSIAH. The hope of Cyrus, called God's "anointed" (Isa. 45:1), was that the divine temple of the Jews be rebuilt and that the core of Israel's heritage be preserved; both were accomplished through Sheshbazzar. (For the view that Sheshbazzar did not belong to the royal line and thus was not the same as Shenazzar, but that he should not be equated with Zerubbabel either, see T. C. Eskenazi in *ABD*, 5:1207 – 09.)

W. WHITE, JR.

Sheshonk. See SHISHAK.

Sheth sheth (שֵׁת *H9269*, possibly "provision, restitution"). (1) The expression "the sons of Sheth" is used in one of BALAAM'S oracles with reference to the people of MOAB (Num. 24:17). The Hebrew form of the name is identical to that of SETH (Gen. 4:25 – 26 et al.), but since it is very unlikely that Seth could have been viewed as the ancestor of the Moabites—or of any other nation, for that matter —perhaps the Shethites were a people group living in or near Moab (possibly the Suteans mentioned in Egyptian and Babylonian texts; see *HALOT*, 4:1667). The Hebrew text is difficult, however, and many scholars emend *šēt* to *šāᵓôn H8623* ("roar, noise") on the basis of Jer. 48:45, which seems to be a quotation of Num. 21:28a plus 24:17b. This change results in a translation such as "the people of tumult" (NIV mg., "the noisy boasters").

(2) KJV alternate form of SETH (only 1 Chr. 1:1).

Shethar shee'thahr (שְׁתָר *H9285*, perhaps from Old Persian *cica*, "bright," as proposed by A. R. Millard in *JBL* 96 [1977]: 485, but see R. Zadok in *ZAW* 98 [1986]: 109). One of "the seven nobles of Persia and Media who had special access to the king and were highest in the kingdom" (Esth. 1:14). Queen VASHTI was banished by Ahasuerus (XERXES) on their advice.

Shethar-Bozenai shee'ahr-boz'uh-ni (שְׁתַר בּוֹזְנַי *H10750*, derivation uncertain [for proposals, cf. *EncBib*, 4:4462]). KJV Shethar-boznai. A Persian official who joined TATTENAI, the governor of the province of Trans-Euphrates, in complaining to King DARIUS about the Jewish rebuilding of the TEMPLE (Ezra 5:3, 6; 6:6, 13; called "Sathrabuzanes" in 1 Esd. 6:3, 7, 27; 7:1). Darius returned a decree requiring them to refrain from hindering the work and to assist completion of the building, and its continuing services, in every way possible.

M. H. HEICKSEN

Shethar-boznai shee'thahr-boz'n*i*. KJV form of SHETHAR-BOZENAI.

Sheva shee'vuh (שְׁוָא *H8737*, prob. an Aram. name meaning perhaps "similar [to his father]"). (1) A royal secretary (see SCRIBE) in DAVID'S court (2 Sam. 8:17). For the variations on his name and further discussion, see SHAVSHA.

(2) Son of CALEB (by his concubine MAACAH) and descendant of JUDAH (1 Chr. 2:49). He is identified as "the father of Macbenah and Gibea," meaning probably that he was the founder of the two cities bearing those names.

shewbread. See SHOWBREAD.

Shibah sh*i*'buh (שִׁבְעָה *H8683*, "oath" or "abundance"). KJV Shebah. The name that ISAAC gave to a well dug by his servants (Gen. 26:33). See discussion under BEERSHEBA.

shibboleth shib'uh-lith (שִׁבֹּלֶת *H8672*, "[head of] grain," or *H8673*, "flood"; contrasted in pronunciation with סִבֹּלֶת *H6027*). The password used by the Gileadites at the Jordan to detect the fleeing Ephraimites (Jdg. 12:6). The narrative describes how JEPHTHAH had just concluded a very successful campaign against the Ammonites without the aid of the Ephraimites. The latter were angered at being left out of such an opportunity to assert leadership among the tribes, and made very arrogant threats toward Jephthah (cf. the similar incident in 8:1 – 3). Jephthah replied that his call to the Ephraimites for help had gone unheeded. In the battle that followed, Jephthah's band of Gileadites gained the upper hand and held the fords of the Jordan. As the Ephraimites sought to escape across the river they were challenged to prove, by pronouncing the password, that they were not Ephraimites. Each of the fugitives in turn was unable to pass the test and, in mispronouncing the word, gave himself away and was killed.

Because the point to the story is not the meaning of the word but its pronunciation, the English versions transliterate (rather than translate) it as *shibboleth*; similarly, the Ephraimites' pronunciation is given as *sibboleth*. It is clear that the word was chosen because it would reveal one of the dialectal pronunciation differences between the two groups. What the difference was, however, has been a matter of considerable debate. There is no linguistic evidence to support the view that some Israelites pronounced *š* (*sh*) as *s* (even with the qualification "in certain cases," suggested in GKC §2*w*). The most likely explanation is that the Israelites in TRANSJORDAN (where GILEAD is located) preserved the earlier phoneme *t* (*th*), but that those W of the Jordan (Cisjordan) were unable to imitate it precisely and thus pronounced it in a way that resembled *s* (for the evidence, further discussion, and bibliography, see G. A. Rendsburg in *ABD*, 5:1210 – 12). If this view is correct, the Hebrew letter v was used in this passage to represent the sound *t* (the latter should be distinguished from the spirant ת [as opposed to the plosive תּ], which arose in later times not as an independent phoneme, but as a contextual phonetic variation or allophone of the phoneme /t/).

G. GOLDSWORTHY

Shibmah shib'muh. KJV alternate form of SIBMAH (only Num. 32:38).

Shicron shik'ron. KJV form of SHIKKERON.

shield. See ARMOR, ARMS.

shiggaion shuh-gay'on. See MUSIC VI.A.

Shihon sh*i*'hon. KJV form of SHION (some editions).

Shihor sh*i*'hor (שִׁיחוֹר *H8865*, prob. from Egyp. *š(y)-ḥr*, "waters of [the god] Horus"). KJV also Sihor. A river described as lying "on the east of [*lit.*, before] Egypt" and cited as the southern extremity of the land that remained to be conquered in JOSHUA'S old age (Josh. 13:3). It is mentioned in an Egyptian poetical work written in praise of the city of RAMESES; this document (Papyrus Anastasi III) cites the name in parallelism with *p)-twf* ("reed-thicket, papyrus-marshes") and speaks of its production of salt and its use as a shipping way (trans. in *ANET,* 471; see also RED SEA I). The identification of Shihor depends on the location of the city of Rameses, which has been identified both with the modern San el-Ḥagar (Tanis or ZOAN) and with Qantir (c. 17 mi. S of San el-Ḥagar). At any rate, Shihor appears to have been an extremity of one of the arms of the NILE, perhaps the Pelusiac or the Bubastite.

This identification agrees with the occurrence of Shihor in Isa. 23:3, where it is in parallelism with "the River" (i.e., the Nile), and in Jer. 2:18, where it parallels the EUPHRATES, the chief river of ASSYRIA. Some have thought that the occurrence of Shihor in Josh. 13:3 and 1 Chr. 13:5 (where it is cited as the S extremity of the Davidic empire) would seem to warrant an identification of Shihor with the Wadi el-ʿArish, c. 100 mi. E of the Nile (see EGYPT, BROOK OF). Since, however, the area of the Sinai S of this wadi was for the most part uninhabited, it may be that these passages simply indicate the extreme limits of Israelite influence.

T. E. MCCOMISKEY

Shihor Libnath sh*i*'hor-lib'nath (שִׁיחוֹר לִבְנָת *H8866,* possibly "the waters of Libnath" [see SHIHOR]). Also Shihor-libnath. A town or stream that served to mark the SW boundary of the territory apportioned to the tribe of ASHER (Josh. 19:26). It was evidently in the area of Mount Carmel (see CARMEL, MOUNT), but its identification is uncertain (the LXX regards Shihor and Libnath as separate locations). Some scholars have suggested locations S of Carmel; for example, A. Alt identified Shihor Libnath with the swamps created by the outflow of Nahr ed-Difleh and Nahr ez-Zerqa, and others have followed him (cf. *HALOT,* 4:1478). Y. Aharoni, however, views that proposal as "impossible" and suggests instead the mouth of the River KISHON *(The Land of the Bible: A Historical Geography,* rev. ed. [1979], 258; cf. also Z. Kallai, *Historical Geography of the Bible* [1986], 176). He further thinks that Libnath in particular may be identified with the modern harbor town of Tell Abu Huwam (part of Haifa). If so, the town gave its name to the river ("the waters of Libnath").

T. E. MCCOMISKEY

Shikkeron shik'uh-ron (שִׁכְּרוֹן *H8914,* meaning uncertain). KJV Shicron. A town on the NW border of the tribal territory of JUDAH, between the PHILISTINE city of EKRON and Mount BAALAH, toward the sea (Josh. 15:11). Shikkeron is probably to be identified with modern Tell el-Ful, some 4 mi. NW of Ekron and a little N of the Valley of SOREK.

Shilhi shil'h*i* (שִׁלְחִי *H8944,* meaning uncertain). The father of Azubah, who was King Asa's wife and mother of King Jehoshaphat (1 Ki. 22:42; 2 Chr. 20:31). Because the name is otherwise unattested, some emend the text to read "Azubah from Shilhim" or understand the term as a gentilic, "Azubah daughter of a Shilhite" (see Shilhim).

Shilhim shil'him (שִׁלְחִים *H8946,* meaning uncertain). A town in the Negev within the tribal territory of Judah (Josh. 15:32). It is probably to be identified with Sharuhen, as suggested by the parallel list (19:6; however, see *ABD,* 5:1213).
